Persons receiving this divine influence often fell to the earth under its influence, as in ordinary catalepsy (Gen. xvii, 3, etc.; 1 Sam. xix, 24, Heb. or margin; Ezek. i, 28; Dan. viii, 18; x, 15, 16; Rev. i, 10, 17). It is important, however, to observe that in all these cases the visions beheld are also related; hence such cases are distinguished from a mere *deliquium animi*. We find likewise in the case of Peter that "he fell into a trance" (or rather a "trance fell upon him," *ἐπίπεσεν ἐπ' αὐτὸν ἔκστασις*), during which he "saw a vision," which is therefore distinguished from the trance (Acts x, 10; comp. Paul's trance, xxii, 17; 2 Cor. xii, 2, etc.). The reality of the vision is established by the correspondence of the event. The nearest approach we can make to such a state is that in which our mind is so occupied in the contemplation of an object as to lose entirely the consciousness of the body—a state in which the highest order of ideas, whether belonging to the judgment or imagination, is undoubtedly attained. Hence we can readily conceive that such a state might be supernaturally induced for the higher purpose of revelation, etc. The alleged phenomena of the mesmeric trance and clairvoyance, if they serve no higher purpose, may assist our conceptions of it. See VISION.

**Trani**, a name common to some Jewish authors, of whom we mention the following:

1. ISATAH DA, so called after his native place Trani, a seaport town of Naples, and, by way of abbreviation, *Rid*=ריר, from the initials ישיב דה-רני i. e. *R. Isaiiah da Trani*, flourished about A.D. 1232-70. He may be regarded as the founder of the school of Talmudical and traditional exegesis in Italy. He wrote not only numerous annotations on the Talmud, and theological decisions (פסקים) connected with traditional law, but also *scholia* (נביקים) to the Bible, which are as follows: נביקי החומש, *Scholia on the Pentateuch* (Leghorn, 1792); קצור פרוש יהושע, *Annotations on Joshua*, published, with a Latin translation by J. A. Steinmetz, under the title *Esaiæ Comment. in Josuam quem in Codice MS. Bibl. Senat. Lips. Descriptum et Versione ac Notis Illustratum*, Præside J. G. Abicht *Eruditorum Examini subjecti* (Lips. 1712);—*Annotations on Judges and 1 Samuel*, printed in the Rabbinical Bibles (q. v.). Besides these published commentaries, the following annotations of Trani are in MS.: a commentary on Ezra, Cod. Opp.; a commentary on the Five Me-

gilloth and Daniel, in the Angelica at Rome; commentaries on the minor prophets, Psalms, and Job, to be found in MS. in several European libraries. See Fürst, *Bibl. Jud.* iii, 438 sq.; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 318 sq.; Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodl.* col. 1389-92; Kitto, *Cyclop.* s. v.; Grätz, *Gesch. d. Juden* (Leips. 1873), vii, 175; Jost, *Gesch. d. Judenth. u. s. Sekten*, iii, 33; Zunz, *Zur Gesch. u. Literatur*, p. 58.

2. MOSES DA, was born at Salonica in 1505. When a boy he went to Adrianople, and was educated in the house of his uncle. In the year 1521 he went to Safet to continue his studies, and four years later he received ordination, and in 1535 went to Jerusalem, where he died in 1585. His success in teaching was so great that he was styled "The Light of Israel," "The Sinaite of Mount Sinai and the Uprooter of Mountains," because he solved the difficulties in the law. He wrote, *בית אלהים*, on Jewish rites, ceremonies, prayers, morals, etc. (Venice, 1576): *ס' קריית ספר*, a body of Jewish laws, in which he distinguishes between the laws written by Moses, those which were transmitted by tradition, and those only founded on the decisions of the doctors:—a collection of decisions in 3 parts, and other works of minor import. See Fürst, *Bibl. Jud.* iii, 441 sq.; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 319 sq.; Basnage, *Histoire des Juifs* (Taylor's transl.), p. 708; Adams, *Hist. of the Jews*, ii, 14; Jost, *Gesch. d. Judenth. u. s. Sekten*, iii, 129; Zunz, *Zur Gesch. u. Literatur*, p. 229, 230. (B. P.)

**Transanimation**, the transfer of souls from one body to another=TRANSMIGRATION (q. v.).

**Transcendent**, or **Transcendental** (from *transcendere*, to go beyond), words employed by various schoolmen, particularly Duns Scotus, to describe the conceptions that, by their universality, rise above or transcend the ten Aristotelian categories. Thus, according to Scotus, *Ens*, or Being, because it is predicable of substance and accident alike, of God as well as of the world, is raised above these by including or comprehending them. Again, the predicates assumed by Scotus to belong to *Ens*, or simple existence, viz. the One, the True, the Good—*Unum, Verum, Bonum*—are styled transcendent because applicable to *Ens* before the descent is made to the ten classes of real existence. According to Kant, transcendental applies to the conditions of our knowledge which transcend experience, which are *a priori*, and not derived from sensitive reflection. Between the hitherto convertible terms transcendental and transcendent Kant drew a distinction of considerable importance in understanding his own system. By the word *transcendental* he designates the various forms, categories, or ideas assumed to be native elements of human thought; implying that, although they are not products of experience, they are manifested only in experience: such as space and time, causality, etc. The word *transcendent* Kant reserves for those among the transcendental or *a priori* elements that altogether transcend experience. They may seem to be given in experience, but they are not really given. Such are the "Ideas of the Pure Reason," God, an immaterial soul, etc. Transcendental elements, when legitimately applied to experience, as causality and relation, are called *immanent*. See *Chambers's Encyclop.* s. v.; Fleming and Krauth, *Vocab. of Phil. Science*, s. v.

**Transcendentalism**, a name given to some forms of recent German philosophy. Fichte taught a subjective idealism, Schelling an objective idealism, and Hegel an absolute idealism—regarding thought and being as identical. Nature is God coming into self-consciousness, for he is ever striving after self-realization: "In order to philosophize aright, we must lose our own personality in God, who is chiefly revealed in the acts of the human mind. In the infinite developments of divinity, and the infinite progress towards self-conscious-

ness, the greatest success is reached in the exertions of human reason. In men's minds, therefore, is the highest manifestation of God. God recognises himself best in human reason, which is a consciousness of God. And it is by human reason that the world (hitherto without thought, and so without existence, mere negation) comes into consciousness; thus God is revealed in the world. After arriving at an ideal God, we learn that philosophy and religion draw us away from our little selves, so that our separate consciousness is dissolved in that of God. Philosophy is religion; and 'true religion frees man from all that is low, and from himself, from clinging to I-hood (*Ichheit*) and subjectivity, and helps him to life in God as the truth, and thereby to true life.' In this ablation of personal identity, we must not claim property even in our own thoughts. Hegel teaches that it is God who thinks in us; nay, that it is precisely that which thinks in us which is God. The pure and primal substance manifests itself as the subject; and 'true knowledge of the absolute is the absolute itself.' There is but a step to take and we arrive at the tenet that the universe and God are one. The Hegelians attempt to distinguish this from the doctrine of Spinoza, but their distinctions are inappreciable; their scheme is pantheism. And as God is revealed by all the phenomena of the world's history, he is partly revealed by moral action, and consequently by sin, no less than by holiness. Sin is, therefore, a part of the necessary evolution of the divine principle; or, rather, in any sense which can affect the conscience, there is no evil in sin—there is no sin. It was reserved for Hegel to abandon all the scruples of six thousand years, and publish the discovery—certainly the most wonderful in the history of human research—that something and nothing are the same! In declaring it he almost apologizes, for he says that this proposition appears so paradoxical that it may readily be supposed that it is not seriously maintained. Yet he is far from being ambiguous. Something and nothing are the same. The absolute of which so much is vaunted is nothing. But the conclusion, which is, perhaps, already anticipated by the reader's mind, and which leaves us incapacitated for comment, is this—we shudder while we record it—that after the exhaustive abstraction is carried to infinity in search of God, we arrive at nothing. God himself is nothing!" (*Princeton Essays*).

These systems of philosophy in Germany, "that nation of thinkers and critics," have, each in its turn, influenced the science of Biblical philology; and whether it be the moralism of Kant, or the idealism of Fichte, or the deeper transcendentalism of Hegel, it makes Scripture speak its own dogmas, and consecrates the apostles the coryphæi of its system. When Strauss wrote his *Leben Jesu*, Germany was thrilled by the publication—all classes of her divines and philosophers, historians and scholars. When, as in this work of Strauss, all historical reality is denied to the gospels, and they are declared to be composed, not of facts, but ideas, and are affirmed to describe, not a personal God or a historical Christ, but a cluster of notions intensely prevalent in Judæa; and when it is argued that the names and events occurring in the evangelical narrations are but symbols of inward emotions, and the blasphemies of pantheism are reasoned for from the union of deity and humanity in Jesus, as shadowing forth the identity of the forms vulgarly named Creator and creature, it is easily seen that the author uses the philosophy of Hegel as the great organ of perverting and desecrating the records of the evangelists, especially of polluting the finer and more experimental portions of the work of the beloved disciple. Weisse, the producer of a similar mixture of boldness and impiety, declares it impossible for any one to understand his theology unless he have mastered his philosophy. No one can comprehend the systems of Daub, Schwartz, or Schleiermacher till he has mastered the philosophy which Schelling propounded in his early and adventurous youth. "A

life beyond the grave," says Strauss, "is the last foe which speculative criticism has to encounter, and, if it can, to extirpate." So, to find a place for such theories, this author commenced a series of wild and unjustifiable attacks on the gospels—finding discrepancies where there are none, creating exaggerations where the narrative is easy and simple, denying the possibility of miracles, and involving the whole narrative in confusion and mystery, in order to destroy its historical character, and render its interpretation possible only on the supposition of its being a useless and disconnected mythology. Whatever sophistry and perverted logic could supply, whatever perplexity a shrewd and malicious criticism could suggest, whatever reasoning a clever and fascinating philosophy could produce, were used to create and garnish the new hypothesis. The whole system is a sad memorial of the proud and unhallowed wisdom of this world, impugning the revelation already given, delighting in every high thing that exalts itself against the knowledge of God, and exulting in withdrawing every thought from the obedience of Christ. Well might Eschenmayer speak of the "Ichariotismus" of Hegelianism. While it kissed, it betrayed, and at length proceeded to the trial and condemnation of its victim (*Old and New*, Aug. 1870, p. 186). See DEISM; PAN-  
THEISM; RATIONALISM.

**Transelementation** (*trans* and *elementum*), a term used to signify the change of the elements in one body into those of another.

**Transfiguration.** The Greek word *μετεμορφώθη*, well rendered "was transfigured," signifies a change of form or appearance (Matt. xvii, 2; Mark ix, 2), and is so explained in Luke ix, 29, "the fashion of his countenance was altered." This is one of the most wonderful incidents in the life of our Saviour upon earth, and one so instructive that we can never exhaust its lessons. The apostle Peter, towards the close of his life, in running his mind over the proofs of Christ's majesty, found none so conclusive and irrefragable as the scenes when he and others were with his Master in the holy mount (2 Pet. i, 18) as eye-witnesses that he received from God the Father honor and glory, when there came such a voice to him from the excellent glory, "This is my beloved Son, in whom I am well pleased." The apostle John likewise refers to the convincing power of the "glory" exhibited on that occasion (John i, 14). If we divide Christ's public life into three periods—the first of miracles, to prove his divine mission; the second of parables, to inculcate virtue; and the third of suffering, first clearly revealed and then endured, to atone for sin—the transfiguration may be viewed as his baptism or initiation into the third and last. He went up the Mount of Transfiguration on the eighth day after he had bidden every one who would come after him take up his cross, declaring that his kingdom was not of this world, that he must suffer many things, and be killed, etc.

The Mount of Transfiguration is traditionally thought to have been Mount Tabor; but as this height is fifty miles from Cæsarea Philippi, where Jesus last taught, it has of late been supposed to have been a mountain much less distant, namely, Mount Hermon. As there was an interval, however, of a week between this and the preceding occurrence, we may naturally conclude that a part of this time was occupied in the journey. See TABOR. The only persons thought worthy to ascend this mount of vision were Peter, James, and John, three being a competent number of witnesses, or they being more faithful and beloved than any others. Whatever the reason was, these three disciples appear on more than one other occasion as an elect triumvirate—as at the raising of Jairus's daughter, and during our Lord's agony in the garden. The disciples, in all probability, ascended the mountain anticipating nothing more than that Jesus, as at other times (Luke vi, 12), would continue all night in prayer to God. When the curtains of night closed around them, they were so worn

out by their labors as to sink down in sleep, till startled from their slumbers by the glory of the Lord shining round about them; for, as Jesus prayed, the fashion of his countenance was altered, "and his face did shine as the sun, and his raiment was white as the light. And behold there talked with him two men, which were Moses and Elias, who appeared in glory, and spake of his decease, which he should accomplish at Jerusalem." Peter's words, "Master, it is good for us to be here," are a natural expression of rapture; and his proposal to build three tabernacles indicated his desire both to keep his Lord from going down to Jerusalem to die there, and to prolong the blessedness of beholding with open face the glory of God. Such is at least a plausible interpretation of his language, while "he wist not what to say." It is worthy of remark that Peter had no thought of tents for himself and his companions, his only desire being that the beatific vision might endure forever. While he yet spake, behold, a bright cloud overshadowed them—not a black cloud such as that which rested on Mount Sinai, but a cloud glistening as the Shechinah when the glory of the Lord filled the tabernacle, or as the cloud that filled the house of the Lord when the priests were come out of the holy place. "And behold a voice out of the cloud"—that is, out of the long-established symbol of Jehovah's presence—"which said, This is my beloved son, in whom I am well pleased: hear ye him. And when the disciples heard it, they fell on their face, and were sore afraid"—like Daniel and all others who have felt themselves entranced by revelations of God. "And Jesus came and touched them, and said, Arise, and be not afraid"—showing such gentleness as proved him to be fitly named the Lamb of God. How long the glorification of our Saviour continued it were vain to inquire; but it appears from the narrative of Luke that he did not lead down his disciples till the day following that on which they had ascended the height. As they descended, he bade his disciples keep what they had seen a secret till after his resurrection, doubtless because the whole vision, to those who had not seen it, would have been a rock of offence, appearing as an idle tale. He also opened their eyes to see that Elias whom they looked for in the future was to be sought in the past, even in John the Baptist, who was clothed with his spirit and power.

The final causes of the transfiguration, although in part wrapped up in mystery, appear to be in part plain. Among its intended lessons may be the following: First, to teach that, in spite of the calumnies which the Pharisees had heaped on Jesus, the old and new dispensations are in harmony with each other. To this end the author and the restorer of the old dispensation talk with the founder of the new, as if his scheme, even the most repulsive feature of it, was contemplated by theirs, as the reality of which they had promulgated only types and shadows. Secondly, to teach that the new dispensation was superior to the old. Moses and Elias appear as inferior to Jesus, not merely since their faces did not, so far as we know, shine like the sun, but chiefly because the voice from the excellent glory commanded to hear him in preference to them. Thirdly, to gird up the energies of Jesus for the great agony which was so soon to excruciate him; as in Gethsemane itself an angel appeared unto him strengthening him; as the Holy Ghost descended upon him in the likeness of a dove before his temptation in the wilderness; and as, when the devil left him, angels came and ministered unto him. Fourthly, to comfort the hearts of the disciples, who, being destined to see their Master, whom they had left all to follow, nailed to a cross, to be themselves persecuted, and to suffer the want of all things, were in danger of despair. But, by being eye-witnesses of his majesty, they became convinced that his humiliation, even though he descended into the place of the dead, was voluntary and could not continue long. Gazing at the glorified body of their Master, they beheld not only a proof, but an express and lively image, of his resur-

rection, ascension, and exaltation above the heavens. As in a prophetic vision, they beheld him seated upon clouds, and seen by every eye as the Judge of the quick and the dead, or enthroned in heaven amid the host of his redeemed. Henceforth they ceased not questioning one another what the rising from the dead should mean. Fifthly, to teach that virtue will not allow supine contemplation, but demands the exercise and exertion of our several powers. To some this lesson may seem a refinement, but it is ingeniously deduced by Schleiermacher from the fact that, while Peter yet spake in his ecstasy, the vision in which he longed to wear out his life vanished away: as if the aim were to teach us that when we have ascended the mount of vision on the cherub-wings of contemplation, even if we burn to dwell there in a perpetual sweetness, yet we must shun all monastic seclusion that we may mingle among men and do them good; even as the great Exemplar would not let his chosen repose in rapturous musings, and had scarcely come down from the mountain of his glory before he recommenced his works of usefulness.

The transfiguration is so fine a subject for the painter that we are not surprised to learn that it employed Raphael's best hours, and that his portraiture of it is confessedly the highest of all efforts of pictorial genius. The original work, still unfaded, though more than three centuries have passed over it, hangs in the Vatican. A copy of it in mosaic on a colossal scale, and which might pass with most men for the original, fills the head of the left aisle in St. Peter's at Rome. The design is as simple as the artless narrative of the evangelists. In the centre, and in raiment white as the light, is he, the fashion of whose countenance was altered. On either hand, and floating on the air, appear in glory Moses and Elias. Beneath, the disciples, overshadowed by a bright cloud, their hands shielding their dazzled eyes, are fallen on their faces, sore afraid of the voice proceeding out of the cloud, but catching glimpses of Jesus transfigured before them.

Raphael's Representation of the Transfiguration.

For monographs on the transfiguration, see Volbeding, *Index Programmatum*, p. 47; Hase, *Leben Jesu*, p. 161; Bagot, *On the Transfiguration* (Lond. 1840); Anon., *Tabor's Teachings* (ibid. 1867, 1868); also the (Am.) *Free-will Baptist Quarterly*, Jan. 1858. See JESUS CHRIST.

**Transfiguration-** (or **Jesus-**) **day** was kept in the Western Church in the time of St. Leo, and in the Greek Church about A.D. 700. By a bull of Calixtus III, 1456 (or 1457), it was ordered to be generally observed, in memory of the victory of Hunniades and the Hungarian army over Mohammed and the Turks. In the English calendar it stands on Aug. 6. In France, after consecration, the chalice was filled with new wine, or, as at Tours, received some of the juice of the ripe grapes; and the clusters are blessed in Germany and the East on this day.—Blunt, *Dict. of Theol.* s. v.; Walcott, *Sac. Archaeol.* s. v.

**Transitorium**, a term for a short anthem, or respond, in the rite of Milan, chanted after the communion of the priest.—Lee, *Gloss. of Liturg. Terms*, s. v.

**Translation**, BIBLICAL. See VERSIONS.

**TRANSLATION**, in ecclesiastical usage, is the removal of a bishop from the charge of one diocese to that of another. After such removal, the bishop, in all his attestations, dates from the year of his translation (*anno translationis nostræ*), not from that of his consecration (*anno consecrationis nostræ*). In the early Church a bishop could not translate himself to another see without the consent and approbation of a provincial council. Some, indeed, thought it absolutely unlawful for a bishop to forsake his first see and betake himself to any other, because they looked upon his consecration to be a sort of marriage to his church, and therefore looked upon his removal to another see as spiritual adultery.

**Transmigration** (a *passing over*), in the theological acceptance of the term, means the supposed translation of the soul after death into another substance or body than that which it occupied before. The basis of this belief being the assumption that the human soul does not perish together with the body, it can belong only to those nations which believe in the immortality of the soul. But in proportion as such an idea is crude or developed, as it is founded merely on a vague fear of death, and a craving for material life, or on ethical grounds, and a supposed causal connection between this and a future life, the belief in transmigration assumes various forms. The notion, dating back to a remote antiquity, and being spread all over the world, seems to be anthropologically innate, and to be the first form in which the idea of immortality occurred to man.

1. *India*.—It was in India, where the problems of metaphysics and ethics as connected with ontology and the destiny of the soul were elaborated to the last degree on a theistic basis, that metempsychosis was most ingeniously and extensively developed. The Hindûs believed that human souls emanated from the Supreme Being, which, as it were, in a state of bewilderment or forgetfulness allowed them to become separate existences and to be born on earth. The soul thus severed from the real source of its life is bound to return to it, or to become merged again into that divine substance with which it was originally one. But having become contaminated with

sin, it must strive to free itself from guilt and become fit for its heavenly career. Religion teaches that this is done by the observance of religious rites and a life in conformity with the precepts of the sacred books; philosophy, that the soul will be reunited with Brahman, if it understands the true nature of the divine essence whence it comes. So long, therefore, as the soul has not attained this condition of purity, it must be born again after the dissolution of the body to which it was allied; and the degree of its impurity at one of these various deaths determines the existence which it will assume in a subsequent life. So closely was the account of a soul's misdeeds kept that it might pass thousands of years, or *kulpas* (æons), in one or other of the heavens, as a reward for good deeds or self-inflicted suffering, and yet be obliged to return to earth or hell to expiate as an animal, man, or dæmon certain sins. To us the details of the soul's migration, as described in the religious works of the Hindûs, are only interesting as they afford a kind of standard by which the moral merit or demerit of human actions was measured in India (see Manu, *Code of Laws*, bk. xii). A more general doctrine of the transmigration of souls is based by Hindû philosophers on the assumption of the three cosmic qualities of *sattwa*, i. e. purity or goodness; *rajas*, i. e. troubledness or passion; and *tamas*, i. e. darkness or sin, with which the human soul may become endued. On this basis Manu and other writers built an elaborate theory of the various births to which the soul may be subject. Manu teaches that "souls endued with the quality of *sattwa* attain the condition of deities; those having the quality of *rajas*, the condition of men; and those having the quality of *tamas*, the condition of beasts." The Buddhist belief in transmigration is derived from that of the Brahmanic Hindûs, and agrees with it in principle, though it differs from it in the imaginary detail in which it was worked out. To enlarge here on this difference is not necessary, and yet it will not be superfluous to point out one great difference which separates the notions of one class of Buddhists from those of the rest, as well as from those of the Brahmanic Hindûs. While other Hindûs believe that the same soul appears at the several births, the Southern Buddhists teach that the succession of existences is a succession of souls; that when the body dies the soul is "extinguished," and nothing remains but the good and bad acts performed in life; the result of these acts becomes the seed of a new life, which soul is the necessary product of the soul of the former life. This dogma is illustrated by various similes, e. g. "One lamp is kindled at another; the light of the former is not identical with that of the latter, but, nevertheless, without this the other light could not have originated."

2. *Egypt*.—According to the doctrine of the old Egyptians, the human race originated after the pure gods and spirits had left the earth; and this they did because the dæmons, who inhabited the earth, had revolted against them, and tainted it with guilt. In order that the dæmons might purify themselves, the gods created human bodies, so that in them they might expiate their guilt. These earthly bodies, united to the dæmons, are the human race, and human life is merely intended as a means of purifying the soul. All the precepts regulating the course of life are laid down by the Egyptians for this end, and the judgment after death in the palace of Osiris decides whether it has been attained or not. If it has not, then the soul must return to the earth, to renew its expiations, either in a human body, in the body of an animal, or in a plant. Matter was believed to be a substantial reality; and the material form that was once united with spirit in the one being of man was believed to maintain that connection so long as the material form remained. Hence the Egyptian practice of embalming the dead, to arrest the passage of the soul into other forms.

3. *Persia*.—The transmigration of souls was also a

tenet of the Persian religion before the time of Zoroaster, and was derived, with the language of Avesta, from Indian sources. Pherecydes of Syros, who lived before the age of Zoroaster, taught the doctrine, and Pythagoras received it in Babylon from the Magi (q. v.).

4. *In Greece*, the doctrine of transmigration did not become the belief of the people, but was confined to the mysteries and tenets of philosophers, who probably received it from Egypt or India. According to some, Thales was the first Greek philosopher who propounded it; according to others, Pherecydes, the teacher of Pythagoras. It was subsequently greatly developed by Pythagoras and Plato. The Greek mysteries were, in fact, not only a school in which metempsychosis was taught, but an indispensable grade or lodge through which all of the aspirants must pass before they could be purified and go on to higher stages of existence. In the system of Plato transmigration had a remedial function, and the soul could attain to divinity only by a varied probation of ten thousand years. The Epicureans denied it, but it appears to have been generally inculcated as one of the deepest doctrines of the mysteries. The Neo-Platonists, who believed in magic, assumed the doctrine of metempsychosis as a natural inheritance.

5. *Among the Jews* the doctrine of transmigration—the *Gilgul Neshamoth*—was taught in the mystical system of the Cabala (q. v.). "All the souls," says the *Zohar*, or Book of Light, "are subject to the trials of transmigration; and men do not know which are the ways of the Most High in their regard. They do not know how many transformations and mysterious trials they must undergo; how many souls and spirits come to this world without returning to the palace of the divine king. . . . The souls must re-enter the absolute substance whence they have emerged. But to accomplish this end they must develop all the perfections, the germ of which is planted in them; and if they have not fulfilled this condition during one life, they must commence another, a third, and so forth, until they have acquired the condition which fits them for reunion with God. On the ground of this doctrine it was held, for instance, that the soul of Adam migrated into David, and will come into the Messiah; that the soul of Japheth is the same as that of Simeon, and the soul of Terah migrated into Job. Modern Cabalists—for instance, Isaac Loria—have imagined that divine grace sometimes assists a soul in its career of expiation by allowing it to occupy the same body together with another soul, when both are to supplement each other, like the blind and the lame. Sometimes only one of these souls requires the supplement of virtue, which it obtains from the other soul, better provided than its partner. The latter soul then becomes, as it were, the mother of the other soul, and bears it under her heart as a pregnant woman. Hence the name of gestation or impregnation is given to this strange association of two souls.

6. *Of the Druids*, it is told by classical writers that they believed in the immortality of the soul, and in its migration after a certain period subsequent to death. Little is known of the manner in which they imagined such migrations to take place; but, to judge from their religious system, there can be no doubt that they looked upon transmigration as a means of purifying the soul and preparing it for eternal life.

7. *Norse*.—A very poetical form of belief in transmigration is found in Germanic mythology, according to which the soul, before entering its divine abode, assumes certain forms or animates certain objects, in which it lives for a short period—as a tree, a rose, a vine, a butterfly, a pigeon, etc.

8. *Among the early Christians*, Jerome relates, the doctrine of transmigration was taught as a traditional and esoteric one, which was only communicated to a select few. Gnostics and Manichæans welcomed it, and the more speculative or mystical of the Church fathers found in it a ready explanation of the fall of man and

the doctrine of evil spirits. This considerable step towards reconciling the existence of suffering with that of a merciful God was distinctly set forth by Porphyry and Origen, and passed, in all probability, with all the strange heresies of "Illumination," through such institutions as the Cairene House of Sight and the Knights Templars, into the wild doctrines of the obscure sects of the Middle Ages in Europe. The Taborites, an extreme branch of the Hussites, are said to have accepted the doctrine.

One great philosopher, at least, of modern times, G. E. Lessing, accounted for human progress by a species of transmigration. He argues that the soul is a simple being capable of infinite conceptions, which are obtained in an infinite succession of time. The order and measure of the acquisition of these conceptions are the senses. These, at present, are five; but there is no evidence that they have always been the same. Nature, never taking a leap, must have gone through all the lower stages before it arrived at that which it occupies now. . . . And since nature contains many substances and powers which are not accessible to those senses with which it is now endowed, it must be assumed that there will be future stages at which the soul will have as many senses as correspond with the powers of nature.

9. *Modern Savages*.—Probably the lowest forms of this belief are those found among some of the tribes of Africa and America, which hold that the soul, immediately after death, must look out for a new owner, entering, if need be, even the body of an animal. Some of the Africans assume that the soul will choose with predilection the body of a person of similar rank to that of its former owner, or a near relation of his. They therefore frequently bury their dead near the houses of their relatives in order to enable the souls of the former to occupy the newly-born children of the latter, and the princely souls to re-enter the princely family; and sometimes holes are dug in the grave to facilitate the soul's egress from it.

In North America some tribes slaughter their captives to feed with their blood such souls in suspense. The negro widows of Matamba are especially afraid of the souls of their husbands; for at the death of these they immediately throw themselves into the water to drown their husbands' souls, which otherwise, they imagine, would cling to them. The natives of Madagascar seem to have invented a kind of artificial transmigration; for in the hut where a man is about to die they make a hole in the roof in order to catch the outgoing soul and to breathe it into the body of another man at the point of death.

**Transportation** is a term used in Scotland for the removing or translation of a minister from one parish or congregation to another.

**Transubstantiation** (*change of substance*), a word applied to the alleged conversion or change of the substance of the bread and wine in the eucharist into the body and blood of Jesus Christ at the time the officiating priest utters the words of consecration.

I. *The Term*.—Probably the first to make use of the word *transubstantiatio* was Peter Damian (*Expositio Can. Miss.* cap. vii; Mai, *Script. Vet. Nov. Coll.* VI, ii, 215), A.D. 988-1072; though similar expressions, such as *transitio*, had previously been employed. Its use was, however, limited, and in the 12th century was becoming very rare. Its first appearance as a term accepted and recognised by the Church is in the first of the *Seventy Constitutions* presented to the fourth Council of Lateran

(1215) by Innocent III, and tacitly adopted by that council. The term thus adopted by the Western Church has its counterpart in the Eastern Church in the term *Metousiosis* (*Μετουσίωσις*), which was formally adopted, in the "Orthodox Confession of Faith of the Catholic and Apostolic Church of the East," in 1643; and in Art. xvii of the Council of Bethlehem, or of Jerusalem, in 1672.

The Church of England never adopted the word "transubstantiation" in any formal document; and at the same time that the Council of Trent was fixing it upon the Latin Church, the sacred synod of the English Church was declaring, in the 28th art. of Religion, "Pannis et vini Transubstantiatio in Eucharistia ex sacris literis probari non potest, sed apertis Scripturæ verbis adversatur et multarum superstitionum dedit occasionem" (A.D. 1552). This part of Art. xxviii now stands in English in the following form: "Transubstantiation (or the change of the substance of bread and wine) in the supper of the Lord cannot be proved by Holy Writ, but is repugnant to the plain words of Scripture, overthroweth the nature of a sacrament, and hath given occasion to many superstitions" (A.D. 1571).

II. *The Doctrine*.—In the Confession of the Synod of the fourth Lateran Council, transubstantiation is thus defined: "There is only one universal Church, beyond which no man can in any way be saved. In which Jesus Christ is himself the priest and sacrifice, whose body and blood are really contained in the sacrament of the altar, under the form of bread and wine, being *transubstantiated*, the bread into the body and the wine into the blood, by divine power." By the institution of Corpus Christi Day by pope Urban IV in 1264 and pope Clement V in 1311 at the Synod of Vienne, the doctrine in question was expressed in a liturgical form and its popularity secured. Henceforth the sacrifice of the mass formed more than ever the centre of the Catholic ritual, and reflected new glory upon the priesthood.

The change effected by transubstantiation is declared to be so perfect and complete that, by connection and concomitance, the soul and divinity of Christ coexist with his flesh and blood under the species of bread and wine; and thus the elements, and every particle thereof, contain Christ whole and entire—divinity, humanity, soul, body, and blood, with all their component parts. Nothing remains of the bread and wine except the accidents. The whole God and man Christ Jesus is contained in the bread and wine, and in every particle of the bread, and every drop of the wine. The natural result of such a doctrine is the elevation of the Host for adoration, a practice unknown till the rise of transubstantiation.

It is claimed by the advocates of transubstantiation that it had the belief and approval of the early fathers of the Church. Bingham (*Christ. Antiq.* bk. xv, ch. v, § 4) asserts that "the ancient fathers have declared as plainly as words can make it that the change made in the elements of bread and wine by consecration is not such a change as destroys their nature and substance, but only alters their qualities, and elevates them to a spiritual use, as is done in many other consecrations, where the qualities of things are much altered without any real change of substance." We give some extracts from the authorities quoted by Bingham. Thus Gregory of Nyssa (*De Bapt. Christi*, iii, 369), "This altar before which we stand is but common stone in its nature . . . but after it is consecrated to the service of God, and has received a benediction, it is a holy table, an immaculate altar, not to be touched by any but the priests, and that with the greatest reverence. The bread also at first is but common bread, but when once it is sanctified by the holy mystery, it is made and called the body of Christ." Cyril of Jerusalem (*Catech. Myst.* iii, note 3), "Beware that you take not this ointment to be bare ointment; for as the bread in the eucharist, after the invocation of the Holy Spirit, is not mere bread, but the body of Christ, so this holy ointment, after invocation.

is not bare or common ointment, but it is the gift or grace of Christ and the Holy Spirit, who by his presence and divine nature makes it efficacious." Chrysostom, in his famous *Epistle to Cæsarius*, explaining the two natures of Christ—that he had both a human and a divine substance in reality—says, "As the bread, before it is sanctified, is called bread, but after the divine grace has sanctified it by the mediation of the priest it is no longer called bread, but dignified with the name of the body of the Lord, though the nature of bread remain in it, and they are not said to be two, but one body of the Son; so here, the divine nature residing or dwelling in the human body, they both together make one Son and one Person." When this passage was first produced by Peter Martyr, it was looked upon as so unanswerable that the Romish Church declared it to be a forgery, and it was stolen from the Lambeth Library during the reign of queen Mary. Theodoret plainly says that the bread and wine remain still in their own nature after consecration. Augustine, instructing the newly baptized respecting the sacrament, tells them that what they saw upon the altar was bread and the cup, as their own eyes could testify to them; but what their faith required to be instructed about was that the bread is the body of Christ, etc. Answering an objection, supposed to be urged, that Christ had taken his body to heaven, Augustine replies, "These things, my brethren, are therefore called sacraments, because in them one thing is seen and another is understood. That which is seen has a bodily appearance; that which is understood has a spiritual fruit." He also says that "this very bread and wine are the body and blood of Christ; consequently it could not be his natural body in the substance, but only sacramentally. The natural body of Christ is only in heaven, but the sacrament has the name of his body, because, though in outward, visible, and corporeal appearance it is only bread, yet it is attended with a spiritual fruit." Isidore, bishop of Seville (A.D. 630), speaking of the rites of the Church, says, "The bread, because it nourishes and strengthens our bodies, is therefore called the body of Christ; and the wine, because it creates blood in our flesh, is called the blood of Christ. Now, these two things are visible, but, being sanctified by the Holy Ghost, they become the sacrament of the Lord's body" (*De Eccles. Offic.* i, 18). From the time of Paschasius this doctrine had been the subject of angry contention, and one of its bitterest opponents was the able scholastic writer Duns Scotus, whose opinions were maintained in the 11th century by Berengarius and his numerous followers.

**III. Arguments.**—The doctrine of transubstantiation is defended by a literal interpretation of the words spoken by our Lord at the last supper, "This is my body," "This is my blood." From these words it is argued that there is the real bodily presence of Christ's body, which is accounted for by the miracle of a change of substance of the bread and wine. In answer, it is urged,

1. The accounts which the Romanists give of this supposed miracle are at variance with their own statement of it. In such a case, for instance, as that of the miracle of Moses' rod, every one would say "the rod was changed into a serpent" (all the attributes of this last being present), not *vice versa*; so that by Romanists' own account it is Christ's body and blood that are changed into bread and wine.

Wherever a miracle was wrought in the Old or New Test., as in the instance above alluded to, or in the turning of the water into wine at Cana, such change was obvious to the senses: the appeal, in fact, for the reality of the miracle is to the senses; while, therefore, we might admit that if a Romish priest were to assert that he had converted our Saviour's body into bread and wine, he was as safe as far as the senses go, we should hold, *per contra*, that if he professed to have turned bread and wine into the body and blood of Christ, that body and blood ought to be clear to the senses. We had

bread and wine *before* the consecration; we have, as to sense, bread and wine *after*. In the whole history of miracles, nothing of this sort has ever been known; nor can we, under such circumstances, admit that the alleged change has taken place. Suppose Aaron's rod to have remained still with all the attributes of a rod, could Pharaoh and his court believe it to be now a serpent?

2. The late origin of the doctrine of transubstantiation has been alleged as one reason for its rejection, and it is certainly a point worthy of considerable notice. If, however, it had been as early as the superstitious veneration for relics and images, it would have been but an ancient error.

3. It must be evident to every one who is not blinded by ignorance and prejudice that our Lord's words, "This is my body," are mere figurative expressions; and that they were no more likely to be designed to be received, literally than the declarations made by our Lord that he was a "vine," a "lamb," a "door," a "way," a "light."

4. Besides, such a transubstantiation is so opposite to the testimony of our senses as completely to undermine the whole proof of all the miracles by which God has confirmed revelation. According to such a transubstantiation, the same body is alive and dead at once, and may be in a million of different places whole and entire at the same instant of time; accidents remain without a substance, and substance without accidents; and a part of Christ's body is equal to the whole. It is also contrary to the end of the sacrament, which is to represent and commemorate Christ, not to believe that he is corporeally present (1 Cor. ix, 24, 25).

5. The practical evil of this and of consubstantiation (q. v.) is that it leads to the paying divine adoration to a bit of bread, and the still more noxious superstition of thinking that Christ's body can be received and act like a medicine on one who is "not considering the Lord's body," as, e. g., an infant, or a man in a state of insensibility.

Antiq.* (see Index); Brown, *Compendium*, p. 618; Cosen, *On Transubstantiation* (1858); Hagenbach, *Hist. of Doctrines* (see Index); Hill, *English Monasticism* (Lond. 1867); Kidder, *Messiah*, iii, 80; Knott, *On the Supper of our Lord* (1858); Smith, *Errors of the Church of Rome*, dial. 6; Thirlwall, *Transubstantiation: What Is It?* (1869); Van Oosterzee, *Christ. Dogmat.* (see Index); Watson, *Biblical Dict.* s. v.

**Trap** (מִלְכָּדֶה, *mokêsh*, Josh. xxiii, 13, a snare, as elsewhere rendered; מַלְכֹּדֶה, *mal'kodêh*, Job xviii, 10, a noose; מַשְׁחִית, *mashchith*, Jer. v, 26, a destroyer, as elsewhere; and so Σήπα, Rom. xi, 9, lit. the chase). See HUNTING.

**Trapp, John**, a Puritan divine, was born in 1601, and educated at Christ Church, Oxford. He was schoolmaster at Stratford-on-Avon and vicar of Weston-on-Avon from 1624 until his death, in 1669. He wrote, *God's Love-Tokens* (Lond. 1637, 4to);—*Theologia Theologiae* (1641, 8vo);—*Commentaries on the Scriptures*, viz.: *St. John the Evangelist* (1646, 4to); *All the Epistles and the Revelation of St. John* (1647, 4to; 2d ed. 1649, 4to); *All the New Testament* (1647, 2 vols. 4to; new ed. 1663, imp. 8vo); *Pentateuch* (1650, 4to; 2d ed. 1654, 4to); *Joshua* to *2d Chronicles*; *Proverbs*, *Ecclesiastes*, and *Songs of Solomon* (1650, 4to); *The Twelve Minor Prophets* (1654, fol.); *Ezra*, *Nehemiah*, *Esther*, *Job*, and *the Psalms* (1656, fol.; 2d ed. 1657, fol.); *Proverbs to Daniel* (1656, fol.)—all published together in 1662 (5 vols. fol.). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Trapp, Joseph, D.D.**, an English divine, was born at Cherrington, Gloucestershire, in November, 1679. Educated at first by his father, he was afterwards placed under the care of the master of New College, Oxford,

and in 1695 entered Wadham College in the same city. He was chosen a fellow of his college in 1704, and first professor of poetry in 1708. In 1709-10 he acted as manager for Dr. Sacheverell on his memorable trial, and in 1711 was appointed chaplain to Sir Constantine Phipps, lord chancellor of Ireland. In 1720 he was presented to the rectory of Dauntzey, Wiltshire, which he resigned in 1721 for the vicarage of the united parishes of Christ Church, Newgate Street, and St. Leonard's, Foster Lane, London. He received his degree of D.D. from Oxford in February, 1727. He was, in 1733, preferred to the rectory of Harlington, Middlesex, by lord Bolingbroke, whose chaplain he had previously been. In 1734 he was elected one of the joint lecturers of St. Martin's-in-the-Fields. He died at Harlington, Nov. 22, 1747. Mr. Trapp was a hard student, and published numerous works, viz., *Prælectiones Poeticæ*, etc. (Oxon. 1711-19, 3 vols. 8vo), being his Latin lectures as professor of poetry:—*A Preservative*, etc., in several discourses (collected in 1722, 2 vols. sm. 8vo):—*The Æneid of Virgil Translated into Blank Verse* (1718, 2 vols. 4to):—*Explanatory Notes on the Four Gospels*, etc. (1747-48, 2 vols. 8vo; Oxford, 1775, 8vo; 1805, 8vo):—besides poems, sermons, theological tracts, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Trappists**, the members of a monastic order in the Church of Rome which is characterized by the extreme austerity of its rule. It had its origin in the Cistercian abbey of La Trappe in Normandy during the abbacy of Rancé (q. v.). This prelate had been grossly addicted to sensual pleasures, and had also evinced considerable fondness for scholarly pursuits; but his conscience became awakened, and he was transformed into an intense ascetic. He renounced all the benefices he possessed except that of La Trappe; and when he had repaired the buildings of that abbey, he undertook the restoration of its ancient discipline. He introduced a number of strict Benedictines, and became a monk himself and regular abbot. In 1675 he caused the members of the order to renew their vows, and imposed on them the additional obligation to preserve unchanged all his arrangements and rules.

This immutable rule obliges the Trappists to sleep on a bed of straw, with pillow also of straw, placed on a board and covered with a blanket. They must rise at two o'clock in the morning. Eleven hours of their day are devoted to prayers and masses, the remaining hours to hard labor performed in strict silence. Scientific pursuits are forbidden. The Trappist's thoughts are to be directed only to repentance and death. His only speech, apart from hymns and prayers, is the responsive greeting "Memento mori." He maintains a constant fast in the plainness and frugality of his food, which is served upon a bare table. After supper and subsequent religious meditations and exercises, he labors for a time upon the grave he is to occupy after death, and then retires to rest—at eight o'clock in summer and at seven in winter. The order contains lay-brothers, professors, and *frères domés*, i. e. temporary associates. Its garb consists of a long robe with wide sleeves of coarse grayish-white wool; a black woollen cowl with two strips a foot wide which reach down to the knee; a broad girdle of black leather, from which are suspended a rosary and a knife, symbols of devotion and toil; and wooden shoes. In the choir a dark-brown mantle with sleeves, and a cowl of like color, are worn. The lay-brothers wear gray habits.

Rancé's immoderate austerity occasioned the death of a number of monks, and brought upon him the censure of many critics. His aversion to literary employ-

Trappist Monk and Nun.

ments was also condemned, among others by Mabillon in the *Traité des Études Monastiques* (1691). The order did not spread beyond its original limits until after the founder's death (Oct. 12, 1706), and has never become very strong in its numbers. A female branch was instituted at Cloet, France, in 1705, by princess Louise de Condé. The revolution expelled the Trappists from France, but they established themselves in Valsainte, Freiburg, Switzerland, where a monastery founded by Augustine l'Estrange (1791) was made an abbey by Pius VI, and Augustine placed at its head. Again assailed by the French and compelled to flee, the Trappists found a temporary home in Poland. They were everywhere disliked, however, and found no settled home until after the restoration of the Bourbons in 1817, when they recovered their original abbey of La Trappe. Other stations were established, among them a female convent near London. In 1834 a papal decretal consolidated the Trappists into a *Congrégation des Religieux Cisterciens de N. D. de la Trappe*. They possess settlements in Algiers and North America, but are chiefly found in France. See the *Allgem. Darmst. Kirchenzeitung*, 1831, p. 1424; 1832, p. 90, 119; 1833, p. 1464; 1835, p. 1087; Châteaubriand, *Vie de Rancé* (Par. 1844); Ritsert, *Orden d. Trappisten* (Darmst. 1833).

In 1851 Muard founded an order of Trappist preachers in the bishopric of Sens, who established themselves in a convent near Avallon. They observe the Trappist rule and wear the habit of the order, but by dispensation are allowed to break the vow of silence and serve the Church by preaching. See *Der Katholik*, Sept. 1851, p. 239 sq.; Herzog, *Real-Encyklop.* s. v.; Hélyot, *Ordres Religieux*, s. v.

**Trask**, JOHN, a Sabbatarian Puritan, was a native of Somersetshire, and, after being a schoolmaster until he was thirty-four years of age, became a preacher in London about 1617. He was at first refused ordination by the bishop of Bath and Wells, but "afterwards got orders and began to vent his opinions." He enjoined severe asceticism upon his followers, inducing them to fast three days at a time, alleging that the third day's fast would bring them to the condition of justified saints, according to the promise "after two days he will revive us; in the third day he will raise us up, and we shall live in his sight" (Hos. vi, 1). Among other precepts

strictly enforced by Trask was that of doing everything by the law of Scripture, having been converted to this view by the arguments of Hamlet Jackson. Trask prescribed to his followers ceremonial customs respecting dress and domestic life; required Jewish strictness in the observance of Sunday; and eventually adopted Saturday as the Sabbath. On April 1, 1634, the commissioners for ecclesiastical causes ordered the prosecution of all separatists, novelists, and sectaries, among whom the Traskists were named. Trask was brought before the Star-chamber, where his Judaizing opinions and practices were refuted by bishop Andrewes, and he was put in the pillory. He is said to have afterwards recanted his errors, but became an Antinomian before his death, the date of which is not given. His followers began to be called Seventh-day men about the year 1700. The published works of Trask are, *Sermon on Mark xvi, 16* (Lond. 1615, 8vo):—*Treatise of Liberty from Judaism* (1620, 4to):—*Power of Preaching* (1623, 8vo):—*The True Gospel, etc., from the Reproach of a New Gospel* (1636, sm. 12mo). See Paget, *Heresiography* (1662, p. 161, 184); Baker, *Chronicle*; Fuller, *Church History of Great Britain*; Brook, *Puritans*; Chamberlain, *Present State of England for 1702*, p. 258.—Blunt, *Dict. of Sects*, s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Traskites.** See TRASK, JOHN.

**Trauthson**, the name of an ancient Tyrolese family which furnished two representatives to the episcopal office in the Church of Rome. The former of these was twenty-first bishop of Vienna, and died in 1702. The latter, JOHANN JOSEPH, Count Trauthson and Falkenstein, was born in 1704 at Vienna, in which city he studied (and possibly at Rome and Sienna), became canon and provost, and in 1751 was made prince-archbishop of Vienna. He issued a pastoral letter in which he urged his clergy to prefer the presentation of necessary truths to that of merely useful truths in their sermons, and remonstrated against the excessive zeal expended in the preaching of the merits of saints, while but little attention was given to the preaching of the merits of Christ. He also condemned the introduction of odd or laughable elements into the preaching. This circular occasioned great excitement, and called forth a number of apologetical and polemical tracts, which are enumerated in *Acta Hist. Eccl.* xviii, 1008 sq.; Heinsius, *Kirchenhist.* iv, 329 sq.; and Henke, *Kirchengesch.* v, 292 sq. Many Protestants suspected that the archbishop had understated the tenets of his Church in order to win over uninformed Protestants, and many Romanists charged him with having begun the betrayal of the Church. Both, however, were mistaken. Trauthson was influenced by the "enlightenment" of his time, but was none the less a zealous supporter of the Church of Rome. His letter was, however, productive of no special results. Maria Theresa appointed him chief director of studies in the University of Vienna and director of the Theresianum, and pope Benedict XIV made him cardinal in 1756. He persuaded the curia to reduce the number of festivals in his diocese. He died March 10, 1757. His pastoral letter has been translated into many languages. See Von Einem, *Vers. einer vollst. Kirchengesch. d. 18. Jahrh.* (Leips. 1782 sq.), i, 554, 590; Schröckh, *Kirchengesch.* vii, 309–313; *Leben d. Cardinäle d. 18. Jahrh.* iii, 260.—Herzog, *Real-Encyklop.* s. v.

**Travelling** (prop. some form of אָרָח, *arách*, especially אָרָח, *oréach*, a traveller; fem. אָרָחָה, *orecháh*, a "travelling company" [Gen. xxxvii, 25; Isa. xxi, 13], i. e. *caravan*) in the East is still much more cumbersome than with us, since it is almost exclusively undertaken solely on errands of business, and rarely for purposes of pleasure. Its laboriousness is partly occasioned by the sandy and desert nature of the country, which often requires way-marks to be set up for guidance (Arrian, *Exped. Alex.* v, 26); partly by the bad and neglected

roads (comp. Philo, *Opp.* ii, 578), especially in winter [see ROAD]; partly by the general absence of proper hotels [see INN]; and partly by the bands of robbers who infest the country in general (comp. 2 Cor. xi, 26). See ROBBER. Commerce (q. v.) is carried on by means of caravans (q. v.), which carry all necessities with them, and are often so large as to seem like a considerable army (see Wellsted, *Reisen*, p. 227). Part of the company is always armed, and constitutes the van and rear guard (see Olivier, *Voyage*, vi, 329 sq.). In the desert a local guide is usually employed (comp. Numb. x, 81), and a beacon-fire as a standard by night (see, generally, Jahn, *Archäol.* I, ii, 17 sq.). Single travellers in the interior of the well-inhabited country, or in Palestine proper, usually ride upon asses (1 Sam. xxv, 20, 42; 2 Sam. xvii, 23; 1 Kings ii, 40; 2 Chron. xxviii, 15; comp. Luke x, 34); tourists, however, and sheiks, upon horses; and in some instances wagons were anciently used as vehicles (1 Kings xii, 18; 2 Kings xix, 21; Acts viii, 28) in certain parts of the country. Most persons went on foot (comp. John iv, 6) and carried their most essential supplies with them (Judg. xix, 18 sq., i. e. *τῆρα*, Matt. x, 10), likewise a tent (q. v.) under which to encamp if in a solitary region (Dionys. Hal. viii, 8). Gloves are mentioned in the Mishna (*Chelim*, xvi, 6) as travelling apparatus. The Jews journeyed to the great festivals in caravans (Luke ii, 42, 44) with song and rejoicing. Single travellers usually found a ready hospitality (except among the Samaritans towards Jews), and eventually khans (q. v.) were established along the highways, especially for non-Israelites (see Reisseger, *Reisen*, iii, 62 sq.). Travellers of distinction were often welcomed with torchlights and great ceremony (2 Macc. iv, 22), and for princes the roads were frequently repaired (Psa. lxxviii, 5; Isa. xl, 3; Diod. Sic. ii, 13; Arrian, *Alex.* iv, 30; Josephus, *War*, iii, 6, 2). Also on departing they were dismissed with an honorary procession (*προπύπαι*, Acts xxi, 5; *deducere*, Cicero, *Cat. Maj.* xviii) and many ceremonious attentions (Acts xv, 3; Rom. xv, 24; 1 Cor. xvi, 16; 3 John 6). Samaria was avoided as a route by the Jews. The Galileans, in visiting the festivals at Jerusalem, usually went along the Jordan or through Peræa (Luke xvii, 11; John iv, 4; Josephus, *Ant.* xx, 6, 1). See SAMARITAN. Journeying on the Sabbath was forbidden in postexilic times (see Josephus, *Ant.* xiii, 8, 4). See SABBATH-DAY'S JOURNEY. On account of the heat travel was sometimes pursued by night. (See, generally, Hackett, *Illustr. of Script.* p. 12–16.) See JOURNEY.

**Travis**, GEORGE, an English clergyman, was a native of Royton, Lancashire, and was educated at St. John's College, Oxford. He became vicar of Eastham and rector of Hendley, Cheshire; prebendary of Chester in 1783; and archdeacon of Chester in 1786. He died Feb. 24, 1797. He published, *Letters to Edward Gibbon*, etc., in defence of 1 John 5, 7 (Chester, 1784, 4to; corrected and enlarged, 1794, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Treasure** (prop. אֲצִיזָה, *to hoard*, *θησαυρός*), in Scripture signifies anything collected together in stores, e. g. a treasure of corn, of wine, of oil; treasures of gold, silver, brass; treasures of coined money. Snow, winds, hail, rain, waters, are in the treasures of God (Psa. cxxxv, 7; Jer. li, 16). We read also of a treasure of good works, treasures of iniquity, to lay up treasures in heaven, to bring forth good or evil out of the treasures of the heart. Joseph told his brethren, when they found their money returned in their sacks, that God had given them treasures (Gen. xliii, 23). The kings of Judah had keepers of their treasures, both in city and country (1 Chron. xxvii, 25; 2 Chron. xxxii, 27, etc.), and the places where these magazines were laid up were called treasure-cities. Pharaoh compelled the Hebrews to build him treasure-cities, or magazines (Exod. i, 11). The word treasures is often used to express anything in great abundance, "In Jesus Christ

are hidden all the treasures of wisdom and knowledge" (Col. ii, 3). The wise man says that wisdom contains in its treasures understanding, the knowledge of religion, etc. Paul (Rom. ii, 5) speaks of heaping up a treasure of wrath against the day of wrath; and the prophet Amos says (iii, 10) they treasure up iniquity, they lay up iniquity as it were in a storehouse, which will bring them a thousand calamities. The treasures of impiety or iniquity (Prov. x, 2) express ill-gotten riches. The treasures of iniquity, says the wise man, will eventually bring no profit; and, in the same sense, Christ calls the riches of iniquity mammon of unrighteousness, an estate wickedly acquired (Luke xvi, 9). Gospel faith is the treasure of the just; but Paul says, "We have this treasure in earthen vessels" (2 Cor. iv, 7). Isaiah says of a good man, "The fear of the Lord is his treasure" (xxxiii, 6). On the Scripture allusions to "hid treasures" see Thomson, *Land and Book*, i, 195 sq.; Freeman, *Hand-book of Bible Manners*, p. 350 sq. See STORR.

**Treasurer** (technically Heb. and Chald. גִּזְבָּר, *gizbār*, Ezra i, 8; vii, 21; Chald. also גִּזְבָּר, *gizbār*, Dan. iii, 2, 3; improp. סֹכֵן, *sokēn*, Isa. xxii, 15, an associate, i. e. the king's intimate friend), an important officer in all Oriental courts. See KING. In Dan. iii, 2, 3, the Chald. אֲדַרְגָּזֵר, *adargazer* (Sept. ῥάπανος, A. V. "judge"), occurs among the titles of Babylonian royal officers, and has (perhaps from the resemblance of the word to the Greek γάρζα) been thought by some to mean the officers of the Turkish court and government, now called *defterdars*, who have the charge of the receipts and disbursements of the public treasury. Gesenius and others conceive that the word means *chief-judges* (from אָדַר, *magificent*, and בִּזְרִין, *deciders*); but Dr. Lee seems to prefer seeking its meaning in the Persian *adar*, fire, and *gazar*, passing; and hence concludes that the *adargazerin* were probably officers of state who presided over the ordeals by fire, and other matters connected with the government of Babylon. See JUDGE.

**TREASURER, ECCLESIASTICAL**, the keeper of the treasures, e. g. the muniments, sacred vessels, relics, and valuables of a church, cathedral, or religious house. He was known by different names; *sacrist*, from having charge of the sacristy; *cellarer*, as providing the eucharistic elements and canonical bread and wine; *matricular*, as keeper of the inventory; *constre* in France and Germany; *custos* and *cimeliarch* in Italy; and in the Greek *scenophylax*. The *custos* had charge of all the contents of the Church, but at length became superintendent of deputies, discharging his personal duties, and at last took the title of treasurer, as having charge of the relics and valuables of the Church. He is the Old-English *cyrcward* and mediæval perpetual *sacristan*, and now represented by the humbler *sexton*. Every necessary for the Church and divine service was furnished by him. The old title of *custos* descended before the 13th century to his church-service.

In order the treasurer usually succeeded the chancellor, and had a stall appointed to himself. His dignity was founded at York in the 11th century; at Chichester, Lichfield, Wells, Hereford, St. Paul's, in the 12th; and at St. David's and Llandaff in the 13th. It has been commonly preserved and exercised since the Reformation, both in English colleges and cathedrals, but has fallen into disuse at York, Lincoln, and Lichfield, and at Exeter, Llandaff, and Amiens is held by the bishop.

The monastic treasurer, or *bursar*, received all the rents, was auditor of all the officers' accounts, paymaster of wages, and of the works done in the abbey.—Lee, *Gloss. of Liturg. Terms*, s. v.; Walcott, *Sac. Archæol.* s. v.

**Treasury** (usually אֹצָר, *otsâr*, a collection, often rendered "treasure," sometimes Heb. גִּנְזָיִם, *genazim* [Esth. iii, 9; iv, 1], or Chald. גִּנְזִין, *ginzin* [Ezra v,

17; vi, 1; vii, 20, "treasure-house"], a store or deposit). See also ASUPPIM. In 1 Chron. xxviii, 11, the treasury of the Temple is called תִּזְבֵּי, *ganzâk*, and means substantially the same as the κορβανὰς of Matt. xxvii, 6, namely, the hoard of money contributed towards the expenses of that edifice. The same thing, or perhaps rather the place where the contribution-boxes for this purpose were kept, is designated in the New Test. as the γαζοφυλάκιον (Mark xii, 41; Luke xxi, 1; John viii, 20), and so likewise Josephus (*Ant.* xix, 6, 1; *War.* v, 5, 2), after the Sept. (Neh. x, 37; xiii, 4, 5, 8; Esth. iii, 9). According to the rabbins this treasury was in the court of the women, where stood thirteen chests called *trumpets* from their form or funnel-shaped mouth, into which the Jews cast their offerings (comp. Exod. xxx, 13 sq.). See TEMPLE.

**Treat**, SAMUEL, a Congregational minister, was born at Milford, Conn., in 1647 (or 1648), and graduated at Harvard College in 1669. He was ordained and settled at Eastham, Plymouth Colony, in 1672. Soon after his settlement he studied the Indian language, and devoted to the Indians in his neighborhood much of his time and attention. Through his labors many of the savages were brought into a state of civilization and order, and not a few of them were converted to the Christian faith. In 1693 he wrote a letter to Increase Mather, in which he states that there were within the limits of Eastham five hundred adult Indians, to whom he had for many years imparted the Gospel in their own language. He had under him four Indian teachers, who read in separate villages on every Sabbath, excepting every fourth, when he himself preached the sermons which he wrote for them. He procured schoolmasters, and persuaded the Indians to choose from among themselves six magistrates, who held regular courts. In 1700 he began to serve the new settlement of Truro, and performed parochial duties until a church was established. After having passed near half a century in the most benevolent exertions as a minister of the Gospel, he died, March 18, 1717. He published the *Confession of Faith* in the Nauset Indian language, and an *Election Sermon* (1713). See Sprague, *Annals of Amer. Pulpit*, i, 183.

**Treaty**. See ALLIANCE.

**Trecānum**, an anthem sung after the communion, before the 6th century, in honor of the Holy Trinity: called by this name in Gaul. Some think it was the Apostles' Creed. In the Greek Church there is a confession of the Holy Trinity sung after the *hagio Hagios*. The latter form is mentioned by Cyril of Jerusalem, Basil, and the Mozarabic and Gallican liturgies.

**Tredischi**, NICHOLAS, an eminent ecclesiastic, was a native of Sicily, born towards the close of the 14th century, and became one of the most celebrated canonists of his time. He was present at the Council of Basle, in which he took a prominent part, and was made a cardinal by Felix V in 1440.

**Tree**, prop. עֵץ, *êts* (ένδρουν), which also signifies wood (ξύλον); in Jer. vi, 6, the fem. עֵצָה, *êtsâh*, is used. Besides this generic term, there also occur peculiar words of a more distinct signification, e. g. אֶשְׁלֵךְ, *eshel* (1 Sam. xxii, 6; xxxi, 13; "grove" [q. v.] in Gen. xxi, 33), which is thought to denote the *tamarisk* or else the *terebinth*; אֵיל, *eyl* (Isa. lxi, 3; Ezek. xxxi, 14); Chald. אֵילָן, *ilân* (Dan. iv, 10 sq.), prob. the *oak* (q. v.); עֵץ הָחַיִּים, *êts hudâr* ("goodly tree," Lev. xxiii, 40), אֲבוֹת, *abôth* ("thick tree," ver. 40; Neh. viii, 15), and צֶלֶל, *tsél* ("shady tree," Job xl, 21, 22), which designate rather vigorous trees in general than specific varieties. See TABERNACLES, FESTIVAL OF. For a list of all the kinds of trees (including shrubs, plants, fruits, etc.) mentioned in the Bible, see BOTANY. See Taylor, *Trees of Scripture* (Lond. 1842).

Ancient Assyrians cutting down Palms of a Besieged City.

In Eastern countries trees are not only graceful ornaments in the landscape, but essential to the comfort and support of the inhabitants. The Hebrews were forbidden to destroy the fruit-trees of their enemies in time of war, "for the tree of the field is man's life" (Deut. xx, 19, 20). Trees of any kind are not now very abundant in Palestine. Some trees are found, by an examination of the internal zones, to attain to a very long age. There are some in existence which are stated to have attained a longevity of three thousand years, and for some of them a still higher antiquity is claimed. Individual trees in Palestine are often notable for historical and sacred associations (Thomson, *Land and Book*, ii, 151). See ALLON-BACHUTH; MEONENIM.

**TREE OF LIFE, etc.** Whatever may have been the frame and texture of Adam's body while in Eden, it is certain that, being "of the earth, it was earthy," and was thus liable to disease and exposed to decay; just as his soul, at the same time, was liable to the greater evil of temptation by being exposed to the power of the tempter. Hence, while "every tree of the garden was given for food," the tree of life, in the midst of the garden, was provided by Infinite Wisdom as the appointed antidote of disease or decay of the body; while, at the same time, the enjoyment of spiritual life, or the indwelling of the spirit of God, and the right of access to the tree of life, thus securing immortality, were conditioned on our first parents not eating the forbidden fruit of the tree of knowledge (Gen. ii, 9-17). The various references to the "tree of life" evidently consider it to have been the divinely appointed medium for securing the immortality of our first parents (Prov. iii, 18; xi, 30; Ezek. xlvii, 12; Rev. ii, 7; xxii, 2, 14). See REINECCIUS, *De Arbore Vitæ* (Weissenf. 1722). See LIFE.

The tree of the knowledge of good and evil, of which they were forbidden to eat under penalty of excision from the tree of life, and consequent death, which also occupied a conspicuous place in the garden, was the divinely appointed test of good and evil, the means whereby God would try and prove the faithfulness and obedience of our first parents. It was the test of moral good and evil, i. e. of holiness and sin, and of consequent happiness or misery (Gen. iii, 1-24). When, through the instigation of the tempter, the first human pair disregarded the command of their Creator and partook of the fruit of the prohibited tree, they lost the indwelling of the spirit of God, and forfeited the right of access to the tree of life. On that day the sentence of death was awarded to the guilty pair. They were now dead in the eye of the divine law, and the same condemnation passed upon the whole race of man. By partaking of the forbidden tree, they obtained an experimental sense of the distinction between good and evil. Hence their expulsion from Eden and removal from the tree of life was an act of mercy as well as of justice;

for, had they been allowed to retain the use of the tree of life, it would, in their condition, have sustained them in an immortality of guilt and misery. See MÜLLER, *De Arbore Boni et Mali, et Arb. Vitæ* (Lips. 1755); *Journ. of Sac. Lit.* Oct. 1862; Jan. and Oct. 1864. See EDEN.

**Tregelles, SAMUEL PRIDEAUX, LL.D.**, an eminent English Biblical scholar, was born at Falmouth, Jan. 30, 1813. After receiving

an education at the Falmouth Classical School, he was employed in the iron-works at Neath Abbey, Glamorganshire, 1828-34, and became, in 1836, a private tutor in Falmouth. Devoting himself to the study of the Scriptures, he visited the Continent several times for the purpose of collating the principal uncial MSS. At Rome he was permitted to see the Vatican MS., but not to copy it. He received his degree of LL.D. from St. Andrew's University in 1850, and in 1863 received an annual pension of one hundred pounds. Of Quaker parentage, he became associated with the Plymouth Brethren, was an active philanthropist, and was appointed a member of the company on the revision of the A. V. of the Old Test. Dr. Tregelles died at Plymouth, April 24, 1875. He published, *Englishman's Greek Concordance to the New Test.* (1839, imp. 8vo; 2d ed. 1844, imp. 8vo; *Index to*, 1845, imp. 8vo):—*Englishman's Hebrew and Chaldee Concordance to the Old Test.* (1843, 2 vols. imp. 8vo):—*Book of Revelation in Greek, etc.* (1844, 8vo):—*Gesenius's Hebrew and Chaldee Lexicon to the Old-Test. Scriptures, etc.* (1847, 4to; last ed. 1857, 4to):—*Remarks on the Prophetic Visions of the Book of Daniel* (1847, 8vo; 4th ed. with notes, and *Defence of the Authenticity of the Book of Daniel*, also published separately, 1852, 8vo):—*Book of Revelation, Translated from the Ancient Greek Text* (1848, 12mo; 1858, 12mo):—*Prospectus of a Critical Edition of the Greek New Test., etc.* (Plymouth, 1848, 12mo):—*On the Original Language of St. Matthew's Gospel* (Lond. 1850, 8vo):—*The Jansenists: their Rise, etc.* (1851, 8vo):—*Lecture on the Historic Evidence of the Authorship, etc., of the Books of the New Test.* (1852, small 8vo):—*Heads of Hebrew Grammar* (1852, 8vo):—*An Account of the Printed Text of the Greek New Test., etc.* (1854, 8vo):—*The Greek New Test. Edited from Ancient Authorities, etc.* (1857-72); this last is considered his most important work:—*Codex Zacynthius* (1861, small fol.):—*Canon Muratorianus*, earliest catalogue of books of the New Test. (Camb. and Lond. 1868, 4to). For full description of works, see Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Trelawney, Sir Harry**, an English baronet, was born in 1756, and was educated at Christ Church College, Oxford. He was in succession a preacher among the Methodists, then served a Presbyterian congregation at West Loo, Cornwall, and afterwards seceded to the Rational Dissenters. Returning to the Church of England, he obtained a rectory in the west of England, and was made prebendary of Exeter in 1789. According to Allibone, he died a Roman Catholic, at Laverno, Italy, in 1834. He published a sermon on 1 Cor. iii, 9, *Ministers Laborers together with God* (Lond. 1778, 4to). See *Lond. Gent. Mag.* 1834, i, 652; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Trelawney, Sir Jonathan**, an English baronet and prelate, born in 1648, was ordained bishop of Bristol in 1685, translated to Exeter in 1689, and to Winchester in 1707. He was one of the seven bishops committed to the Tower in the reign of James II. His death occurred in 1721. He published a sermon on Josh. xxiii, 8, 9, *Thanksgiving for Victory* (Lond. 1702, 4to):—*Caution against False Doctrine* (1704, 12mo). See *Lond. Gent. Mag.* 1827, ii, 409; *State Trials* (Howell's ed.), xii, 182, 187; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Tremellius, EMMANUEL**, a learned Protestant divine, was born at Ferrara in 1510. By birth a Jew, he was educated in the Jewish faith; but he was converted to Christianity by the teaching, it is said, of cardinal Pole and M. A. Flaminio. Through the influence of Peter Martyr he soon after joined the Reformation party, and became an active propagator of their views. Having left Italy, he visited Germany and England, where he lived in intimacy with archbishops Cranmer and Parker, and for some time supported himself by teaching Hebrew at Cambridge. On the death of Edward VI he returned to Germany, where he remained teaching Hebrew at Hornbach and Heidelberg. He was next invited to occupy the Hebrew chair at Sedan, where he died in 1580. His works are: *Rudimenta Ling. Heb.* (Wittenb, 1541):—*הנהיג בחרירי ירו*, *Initiatio Electorum Domini*, a catechism in Hebrew (Par. 1551, 1552; Strasb. 1554; Leyd. 1591):—*Gram. Chald. et Syr.*, prefixed to *Interpretatio Syr. N. T. Hebraicis Typis Descripta* (Par. 1569):—*Biblia Sacra, sive Libb. Canon. Latini recens ex Heb. Facti* (Francof. 1579; Lond. 1580). See Fürst, *Bibl. Jud.* iii, 443; Kitto, *Cyclop.* s. v.; Steinschneider, *Bibliogr. Handbuch*, p. 140; Kalkar, *Israel und die Kirche*, p. 73 sq.; Wolf, *Bibl. Hebr.* I, iii, 4, No. 1797; Butters, *Emmanuel Tremellius* (Zweibrücken, 1859); Delitzsch, *Saut auf Hoffnung* (Erlangen, 1865), iv, 28 sq.; Da Costa, *Israel and the Gentiles*, p. 469 sq.; Adams, *History of the Jews*, ii, 71. (B. P.)

**Trench** (prop. תְּרֵנֶץ, *teñdāh*, 1 Kings xviii, 32, 35, 38, a channel, or "conduit," as elsewhere), a kind of ditch cut into the earth for the purpose of receiving and draining the water from adjacent parts. Something of this kind was the trench cut by the prophet Elijah to contain the water which he ordered to be poured on his sacrifice (ver. 32), and which, when filled to the brim with water, was entirely exhausted, evaporated, by the fire of the Lord which consumed the sacrifice. See ELIJAH.

*Trench* (תְּרֵנֶץ, *cheyl*, 2 Sam. xx, 15, a wall, rampart, or bulwark, as elsewhere rendered; מַגָּל, *magāl*, 1 Sam. xxvi, 5, 7; or מַגָּלָה, *magalāh*, xvii, 20, a wagon-rut, hence a defence formed by the vehicles of an army; חָפָאֵץ, Luke xix, 43, a mound [Lat. *vallum*] for blockading a besieged city, formed of the earth thrown out of a moat and stuck with sharp sticks or palisades) is also a military term, and denotes one description of the approaches to a fortified town. They were anciently used to surround a town, to enclose the besieged, and to secure the besiegers against attacks from them. Trenches could not be cut in a rock; and it is probable that, when our Lord says of Jerusalem (Luke xix, 43), "Thy enemies shall cast a trench about thee," meaning, "they shall raise a wall of enclosure," he foretold what the Jews would barely credit from the nature of the case; perhaps what they considered as impossible: yet the providence of God has so ordered it that we have evidence to this fact in Josephus, who says that Titus exhorting his soldiers, they surrounded Jerusalem with a wall in the space of three days, although the general opinion had pronounced it impossible. This circumvallation prevented any escape from the city, and deterred from all attempts at relief by succors going into it. See SIEGE.

**Trendelenburg, Friedrich Adolf**, a German

philosopher, was born at Eutin, near Lubeck, Nov. 30, 1802; and was educated at the gymnasium of his native town, and at the universities of Kiel, Leipsic, and Berlin. From 1826 to 1833 he was private tutor in the family of postmaster-general Von Nagler, and in the latter year was appointed professor extraordinary of philosophy at Berlin. This position was exchanged, in 1837, for that of professor in ordinary. He was elected a member of the Berlin academy in 1846, and was its secretary in the "historico-philosophical" section from 1847 until his death, Jan. 24, 1872. "On that very day the journals announced his decoration by the king as a knight of the Order of Merit, for his eminence in science and art." "The foundation of Trendelenburg's doctrine is essentially Platonic and Aristotelian." He terms his philosophy the "organic view" of the world; and according to it each lower stage in existence is the basis of the higher stages, and necessarily involved in the higher. The soul is the self-realizing idea of man. God is the unconditioned, not directly demonstrable, but implied, with logical necessity, in the whole fabric of the universe and of human thought. Among Trendelenburg's works are, *Elementa Logices Aristotelicæ* (Berlin, 1837; 6th ed. 1868):—*Logische Untersuchungen* (ibid. 1840; 3d ed. 1870):—*Erläuterungen zu den Elementen der aristotelischen Logik* (2d ed. 1861):—*Naturrecht auf dem Grunde der Ethik* (2d ed. 1868). See Bonitz, *Zur Erinnerung an F. A. Trendelenburg* (Berlin, 1872); Brautschek, *Adolf Trendelenburg* (ibid. 1873); Prantl, *Gedächtnissrede auf F. A. Trendelenburg* (Munich, 1873); Ueberweg, *Hist. of Modern Phil.* (see Index).

**Trendelenburg, Johann Georg**, a German professor of ancient languages, was born Feb. 22, 1757. For a number of years he was professor of languages at the academic gymnasium in Dantzic, where he died March 11, 1825. He published, *Primi Libri Maccabeorum Græci, Textus cum Versione Syriaca Collatio Instituta* (reprinted in Eichhorn's *Repertorium*, xv, 59):—*Chrestomathia Flaviana, sive Loci Illustres ex Flavio Josepho Selecti et Animadversionibus Illustrati* (Lips. 1789):—*Chrestomathia Hezapharisi* (ibid. 1794):—*Commentatio in Verba Novissima Davidis 2 Sam. xxiii, 1-7* (Gott. 1779):—*Die ersten Anfangsgründe der hebr. Sprache* (Dantzic, 1784). See Fürst, *Bibl. Jud.* iii, 443; Winer, *Handbuch der theol. Literatur*, ii, 807. (B. P.)

**Trent, THE COUNCIL OF** (*Concilium Tridentinum*), was held in Trent, a city of Tyrol, Austria, on the left bank of the Adige. It has a cathedral built entirely of marble in the Byzantine style. In the Church of St. Maria Maggiore are the portraits of the members of the council, which was held in this building. This council was first convoked June 2, 1536, by pope Paul III, to be held at Mantua, May 23, 1537. Subsequently, the duke of Mantua having refused to permit the assembling of the council in that city, the pope prorogued the meeting to November, without naming any place. Afterwards, by another bull, he prorogued it till May, 1538, and named Vicenza as the place of assembly; nominating in the meantime certain cardinals and prelates to look into the question of reform, who, in consequence, drew up a long report upon the subject, in which they divide the abuses needing correction into two heads:

1. Those concerning the Church in general.
2. Those peculiar to the Church of Rome.

When the time arrived, however, not a single bishop appeared at Vicenza; whereupon the pope again prorogued the council to Easter, 1539, and subsequently forbade its assembling until he should signify his pleasure upon the subject. At last, at the end of three years, in the year 1542, after much dispute between the pope, the emperor, and the other princes in the Roman communion as to the place in which the council should be holden, the pope's proposition that it should take place at Trent was agreed to; whereupon the bull was published, May 22, convoking the council to Trent on Nov. 1 in that year. Subsequently he named, as his legates

in the council, cardinal John del Monte, bishop of Palestrina; the cardinal-priest of Sainte-Croix, Marcellus Cervinus; and the cardinal-deacon Reginald Pole. However, difficulties arose, which caused the opening of the council to be further delayed, and the first meeting was not held until December, 1545. The great importance of this council in the history of the Reformation, and in Roman Catholic doctrine since, justifies an unusually full treatment of it here.

*Session I* (Dec. 13, 1545).—When the council was opened there were present the three legates, four archbishops, and twenty-two bishops, in their pontifical vestments. Mass was said by the cardinal del Monte, and a sermon preached by the bishop of Bitonte; after which the bull given Nov. 19, 1544, and that of February, 1545, were read, and cardinal del Monte explained the objects which were proposed in assembling the council, viz. the extirpation of heresy, the re-establishment of ecclesiastical discipline, the reformation of morals, and the restoration of peace and unity.

On Dec. 18 and 22 congregations were held, in which some discussion arose about the care and order to be observed by prelates in their life and behavior during the council.

On Jan. 5 another congress was held, in which cardinal del Monte proposed that the order to be observed in conducting the business of the council should be the same with that at the last Council of Lateran, where the examination of the different matters had been intrusted to different bishops, who for that purpose had been divided into three classes; and when the decrees relating to any matter had been drawn up, they were submitted to the consideration of a general congregation; so that all was done without any disputing and discussion in the sessions. A dispute arose in this congregation about the style to be given to the council in the decrees. The pope had decreed that they should run in this form, "The Holy Œcumenical and General Council of Trent, the Legates of the Apostolic See presiding;" but the Gallican bishops, and many of the Spaniards and Italians, insisted that the words "representing the Universal Church" should be added. This, however, the legates refused, remembering that such had been the form used in the councils of Constance and Basle, and fearing lest, if this addition were made, the rest of the form of Constance and Basle might follow, viz., "which derives its power immediately from Jesus Christ, and to which every person, of whatever dignity, not excepting the pope, is bound to yield obedience."

*Session II* (Jan. 7, 1546).—At this session forty-three prelates were present. A bull was read prohibiting the proctors of absent prelates to vote; also another, exhorting all the faithful then in Trent to live in the fear of God, and to fast and pray. The learned were exhorted to give their attention to the question how the rising heresies could be best extinguished. The question about the style of the council was again raised.

In the following congregation, Jan. 13, the same question was again debated. Nothing was settled in this matter, and they then proceeded to deliberate upon which of the three subjects proposed to be discussed in the council (viz. the extirpation of heresy, the reformation of discipline, and the restoration of peace) should be first handled. Three prelates were appointed to examine the procurator papers and excuses of absent bishops.

In the next congregation the deliberations on the subject to be first proposed in the council were resumed. Some wished that the question of reform should be first opened; others, on the contrary, maintained that questions relating to the faith demanded immediate notice. A third party, among whom was Thomas Campeggio, bishop of Feltri, asserted that the two questions of doctrine and reformation were inseparable, and must be treated of together. This latter opinion ultimately prevailed, but at the moment the sense of the assembly was so divided that no decision was arrived at.

In the congregation held Jan. 22, the party in favor of entering at once upon the subject of reform was much increased, but the three legates continued their opposition to their scheme. Subsequently, however, they proposed that they should always take into consideration together one subject relating to the faith and one relating to reform, bearing one upon the other.

On the 24th a curious dispute arose about the proper seal for the use of the council. Some desired that a new seal should be made; but the legates succeeded in having the seal of the first legate attached to the synodal letters.

*Session III* (Feb. 4, 1546).—In this session nothing was done except to recite the Creed, word for word.

In a congress held Feb. 22, the legates proposed that the council should enter upon the subject of the Holy Scriptures; and four doctrinal articles were presented, extracted by the theologians from the writings of Luther upon the subject of Holy Scripture, which they affirmed to be contrary to the orthodox faith.

1. That all the articles of the Christian faith necessary to be believed are contained in Holy Scripture; and that it is sacrilege to hold the oral traditions of the Church to be of equal authority with the Old and New Test.
2. That only such books as the Jews acknowledged ought to be received into the canon of the Old Test.; and that the Epistle to the Hebrews, the Epistle of James, the Second Epistle of Peter, the Second and Third Epistles of John, the Epistle of Jude, and the Apocalypse should be erased from the canon of the New Test.
4. That Holy Scripture is easy to be understood, and clear, and that no gloss or commentary is needed, but only the Spirit of Jesus Christ.

The first two articles were debated in the four following congregations. As to the first article, the congregation came to the decision that the Christian faith is contained partly in Holy Scripture and partly in the traditions of the Church. Upon the second article much discussion arose. All agreed in receiving all the books read in the Roman Church, including the Apocryphal books, alleging the authority of the catalogues drawn up in the councils of Laodicea and Carthage, and those under Innocent I and Gelasius I; but there were four opinions as to the method to be observed in drawing up the catalogue. One party wished to divide the books into two classes—one containing those which have always been received without dispute, the other containing those which had been doubted. The second party desired a threefold division: 1. Containing the undoubted books; 2. Those which had been at one time suspected, but since received; 3. Those which had never been recognised, as seven of the Apocryphal books, and some chapters in Daniel and Esther. The third party wished that no distinction should be made; and the fourth that all the books contained in the Latin Vulgate should be declared to be canonical and inspired.

The discussion was resumed on March 8, but not decided: the members, however, unanimously agreed that the traditions of the Church are equal in authority to Holy Scripture.

In the following congregation it was decided that the catalogue of the books of Holy Scripture should be drawn up without any of the proposed distinctions, and that they should be declared to be all of equal authority.

The authority of the Latin Vulgate (declared in the third article to be full of errors) came under consideration in subsequent congregations, and it was almost unanimously declared to be authentic. With regard to the fourth article, it was agreed that in interpreting Scripture men must be guided by the voice of the fathers and of the Church.

*Session IV* (April 8, 1546).—Between sixty and seventy prelates attended this session. Two decrees were read: 1. Upon the canon of Scripture, which declares that the holy council receives all the books of the Old and New Test. as well as all the traditions of the Church respecting faith and morals, as having proceeded from the lips of Jesus Christ himself, or as having been dic-

tated by the Holy Spirit and preserved in the Catholic Church by a continued succession; and that it looks upon both the written and unwritten Word with equal respect. After this the decree enumerates the books received as canonical by the Church of Rome, and as they are found in the Vulgate, and anathematizes all who refuse to acknowledge them as such. The second decree declares the authenticity of the Vulgate, forbids all private interpretation of it, and orders that no copies be printed or circulated without authority, under penalty of fine and anathema.

In another congregation the abuses relating to lecturers on Holy Scripture and preachers were discussed; also those arising from the non-residence of bishops. After this the question of original sin came under consideration, and nine articles taken from the Lutheran books were drawn up and offered for examination, upon which some discussion took place. Ultimately, however, a decree was drawn up upon the subject, divided into five canons.

1. Treats of the personal sin of Adam.
2. Of the transmission of that sin to his posterity.
3. Of its remedy, i. e. holy baptism.
4. Of infant baptism.
5. Of the concupiscence which still remains in those who have been baptized.

A great dispute arose between the Franciscans and Dominicans concerning the immaculate conception of the Blessed Virgin. The Franciscans insisted that she should be specially declared to be free from the taint of original sin; the Dominicans, on the other hand, maintained that, although the Church had tolerated the opinion concerning the immaculate conception, it was sufficiently clear that the Virgin was not exempt from the common infection of our nature. A decree of reformation, in two chapters, was also read.

*Session V* (June 17, 1546).—In this session the decree concerning original sin was passed, containing the five canons mentioned above, enforced by anathemas. Afterwards the fathers declared that it was not their intention to include the Virgin in this decree, and that upon this subject the constitutions of pope Sixtus IV were to be followed, thus leaving the immaculate conception an open question.

In a congregation held June 18, they proceeded to consider the questions relating to grace and good works. Also the subject of residence of bishops and pastors was discussed. The cardinal del Monte and some of the fathers attributed the heresies and disturbances which had arisen to the non-residence of bishops, while many of the bishops maintained that they were to be attributed to the multitudes of friars and other privileged persons whom the pope permitted to wander about and preach in spite of the bishops, who, in consequence, could do no good even if they were in residence.

In the congregation held June 20, twenty-five articles, professedly drawn up from the Lutheran writings on the subject of justification, were proposed for examination. Some of these articles seem well to have merited the judgment passed upon them; thus, among others,

5. Declares that repentance for *past* sin is altogether unnecessary if a man lead a new life.
7. The fear of hell is a sin, and makes the sinner worse.
8. Contrition arising from meditation upon, and sorrow for, *past* sin makes a man a great sinner.
11. Faith alone is required; the only sin is unbelief; other things are neither commanded nor forbidden.
12. He who has faith is free from the precepts of the law, and has no need of works in order to be saved; nothing that a believer can do is so sinful that it can either accuse or condemn him.
13. No sin separates from God's grace but want of faith.
14. Faith and works are contrary to one another; to teach the latter is to destroy the former, etc.

At this time the three ambassadors of the king of France arrived—viz. Dursé, Lignières, and Pierre Danes. The last mentioned delivered a long discourse, in the course of which he entreated the council to suffer no attack to be made upon the privileges of the kingdom and Church of France.

In a congregation held Aug. 20, the subject of justification was again warmly discussed, as well as the doctrine of Luther concerning free-will and predestination. Upon this latter subject nothing worthy of censure was found in the writings of Luther or in the Confession of Augsburg; but eight articles were drawn up for examination from the writings of the Zwinglians. Upon some of these there was much difference of opinion. By the advice of the bishop of Sinagaglia, the canons drawn up embodying the decrees of the council were divided into two sets—one set, which they called the *decrees of doctrine*, contained the Catholic faith upon the subjects decided; the others, called *canons*, stated, condemned, and anathematized the doctrines contrary to that faith. These decrees were mainly composed by cardinal Sainte-Croix, who bestowed infinite pains upon them; at least one hundred congregations were held upon the subject. Afterwards they returned to the consideration of the reform of the Church, and to the question about episcopal residence. Most of the theologians present, especially the Dominicans, maintained that residence was a matter not merely canonically binding, but of divine injunction. The Spaniards held the same opinion. The legates, seeing that the discussion tended to bring the papal authority and power into question, endeavored to put a stop to it.

*Session VI* (Jan. 13, 1547).—In this session the decree concerning doctrine was read; it contained sixteen chapters and thirty-three canons against heretics.

These chapters declare that sinners are brought into a state to receive justification when excited and helped by grace, and, believing the word of God, they freely turn to God, believing all that he has revealed and promised, especially that the sinner is justified by the grace of God, given to him through the redemption of Jesus Christ; and when, acknowledging their sinfulness and filled with a salutary fear of God's justice, yet trusting to his mercy, they conceive hope and confidence that God will be favorable to them for the sake of Jesus Christ, and thereupon begin to love him as the only source of all righteousness, and to turn from their sins through the hatred which they have conceived against them, i. e. through that repentance which all must feel before baptism; in short, when they resolve to be baptized, to lead a new life, and to follow the commandments of God.

After this the decree explains the nature and effects of justification, saying that it does not consist merely in the remission of sin, but also in sanctification and inward renewal. That the *final* cause of justification is the glory of God and of Jesus Christ and eternal life; the *efficient* cause is God himself, who, of his mercy, freely washes and sanctifies by the seal and unction of the Holy Spirit, who is the pledge of our inheritance; the *meritorious* cause is our Lord Jesus Christ, his beloved and only Son; the *instrumental* cause is the sacrament of baptism, without which no one can be justified; and, finally, the *formal* cause is the righteousness of God given to each, not that righteousness by which he is righteous in himself, but that by which he makes us righteous; i. e. with which being endued by him, we become renewed in our hearts, and are not merely accounted righteous, but are made really so by receiving, as it were, righteousness in ourselves, each according to the measure given to us at the will of the Holy Spirit and in proportion to the proper disposition and co-operation of each. Thus the sinner, by means of this ineffable grace, becomes truly righteous, a friend of God, and an heir of everlasting life; and it is the Holy Spirit who works this marvellous change in him by forming holy habits in his heart—habits of faith, hope, and charity—which unite him closely to Jesus Christ and make of him a lively member of his body; but no man, although justified, is to imagine himself exempt from the observation of God's commandments. No man may dare, under pain of anathema, to utter such a rash notion as that it is impossible for a man, even after justification, to keep God's commandments; since God commands nothing impossible, but with the commandment he desires us to do all that we can, and to seek for aid and grace to enable us to fulfil that which in our natural strength we cannot do.

The decree further teaches upon this subject that no man may presume upon the mysterious subject of predestination so as to assure himself of being among the number of the elect and predestinated to eternal life, as if, having been justified, it were impossible to commit sin again, or, at least, as if, falling into sin after justification, he must of necessity be raised again; that, without a special revelation from God, it is impossible to know who are those whom he has chosen. It also teaches the same of perseverance, concerning which it declares that he who perseveres to the end shall be saved; that no one in

this life can promise himself an absolute assurance of perseverance, although all ought to put entire confidence in God's assistance, who will finish and complete the good work which he has begun in us by working in us to will and to do, if we do not of ourselves fall of his grace.

Further, they who by sin have fallen from grace given, and justification, may be justified again when God awakens them; and this is done by means of the sacrament of penance, in which, through the merits of Jesus Christ, they may recover the grace which they have lost; and this is the proper method of recovery for those who have fallen. It was for the benefit of those who fall into sin after baptism that our Lord Jesus Christ instituted the sacrament of penance, saying, "Receive ye the Holy Ghost; whosoever sins ye remit, they are remitted unto them; and whosoever sins ye retain, they are retained." Hence it follows that the repentance of a Christian fallen into sin after baptism is to be clearly distinguished from the repentance required at holy baptism; for it not alone requires him to cease from sin, and to view his villainy with horror—i. e. to have an humble and contrite heart—but it also implies the sacramental confession of his sin, at least in will, and the absolution of the priest, together with such satisfaction as he can make by means of fasting, alms-giving, prayer, etc. Not that anything that he can do can help towards obtaining the remission of the eternal punishment due to sin, which is remitted together with the sin by the sacrament of penance (or by the desire to receive that sacrament where it cannot be had), but such satisfaction is necessary to attain remission of the temporal penalties attached to sin, which are not always remitted in the case of those who, ungrateful to God for the blessing which they have received, have grieved the Holy Spirit and profaned the temple of God.

This grace of justification may be lost, not only through the sin of infidelity, by which faith itself is lost, but also by every kind of mortal sin, even though faith be not lost.

These chapters were accompanied by thirty-three canons, which anathematize those who hold the opinions specified in them contrary to the tenor of the doctrine contained in the chapters.

Besides this decree, another was published in this session, relating to the Reformation, containing five chapters upon the subject of residence.

It renews the ancient canons against non-resident prelates, and declares that every prelate, whatever be his dignity, being absent for six months together from his diocese, without just and sufficient cause, shall be deprived of the fourth part of his revenue; and that if he remain away during the rest of the year, he shall lose another fourth; that if his absence be prolonged beyond this, the metropolitan shall be obliged, under pain of being interdicted from entering the church, to present him to the pope, who shall either punish him or give his church to a more worthy shepherd; that if it be the metropolitan himself who is in fault, the oldest of his suffragans shall be obliged to present him.

The decree then goes on to treat of the reform of ecclesiastical, both secular and regular; of the visitation of chapters by the ordinary; and declares that bishops may not perform any episcopal function whatever out of their own dioceses without the consent of the bishop of the place.

Before the seventh session a congregation was held, in which it was agreed to treat in the next place of the sacraments; and thirty-six articles, taken from the Lutheran books, were proposed for examination, after which thirty canons on the subject were drawn up—viz, thirteen on the sacraments in general, fourteen on baptism, and three on confirmation. They relate to their number, their necessity, excellence, the manner in which they confer grace, which they declared to be *ex opere operato*, i. e. that the sacraments confer grace upon all those recipients who do not, by mortal sin, offer a bar to its reception; e. g. grace is conferred by baptism upon infants, although they bring with them no pious affections. They also drew up a decree declaring that the sacraments ought always to be administered gratuitously.

After this the question of reformation was discussed; among other things, it was debated whether a plurality of benefices requiring residence is forbidden by the divine law.

**Session VII (March 3, 1547).**—In this session the thirty canons above noted relating to the sacraments were read, together with the accompanying anathemas. Among the thirteen on the sacraments in general were the following:

1. Anathematizes those who maintain that the seven sacraments were not all instituted by Jesus Christ.
3. Anathematizes those who maintain that any one sacrament is of more worth than another.
8. Anathematizes those who deny that the sacraments confer grace *ex opere operato*, i. e. by their own proper virtue.
9. Anathematizes those who deny that baptism, orders, and confirmation imprint an ineffaceable character.
10. Anathematizes those who maintain that all Christians, male and female, may preach God's word and administer the sacraments.
11. Anathematizes those who deny that the intention of the minister to do what the Church does is necessary to the effectual administration of the sacraments.
12. Anathematizes those who maintain that the sin of the minister invalidates the sacrament.
13. Anathematizes those who maintain that the minister may change the prescribed form.

#### Among the fourteen canons on baptism:

2. Anathematizes those who assert that real and natural water is not necessary in baptism.
3. Anathematizes those who maintain that the Church of Rome does not teach the true doctrine on the subject of baptism.
4. Anathematizes those who deny the validity of baptism conferred by heretics, in the name of the blessed Trinity, and with the intention to do what the Church does.
5. Anathematizes those who maintain that baptism is not necessary to salvation.
7. Anathematizes those who maintain that the baptized need only believe, and not keep the law of God.
10. Anathematizes those who maintain that sin after baptism is remitted by faith.
11. Anathematizes those who maintain that apostates from the faith should be again baptized.
12. Anathematizes those who maintain that no one ought to be baptized until he is of the age at which our Lord was baptized, or at the point of death.
13. Anathematizes those who deny that baptized infants are not to be reckoned among the faithful.
14. Anathematizes those who maintain that persons baptized in infancy should, when they come of age, be asked whether they are willing to ratify the promise made in their name.

Secondly, the decree of reformation, containing fifteen chapters, relative to the election of bishops, pluralities, etc., was passed.

In a congregation which followed, the question of transferring the council to some other place was discussed, a report having been circulated that a contagious disease had broken out in Trent.

**Session VIII (March 11, 1547).**—In this session a decree was read transferring the council to Bologna, which was approved by about two thirds of the assembly; the rest, who were mostly Spaniards or other subjects of the emperor, strongly opposed the translation. The emperor complained much of the transfer of the council, and ordered the prelates who had opposed it to remain at Trent, which they did.

**Session IX (April 21, 1547).**—In the first session held at Bologna, the legates and thirty-four bishops were present. A decree was read postponing all business to the next session, to be held on June 2 ensuing, in order to give time for the prelates to arrive.

**Session X (June 2, 1547).**—At this session, however, there were but six archbishops, thirty-six bishops, one abbot, and two generals of orders present; the rest continuing to sit at Trent. It was deemed advisable to prorogue the session to Sept. 15 ensuing; but the quarrel between the pope and the emperor having now assumed a more serious aspect, the council remained suspended for four years in spite of the solicitations made by the German bishops to the pope that the sessions of the council might continue.

In 1549, Paul III died, and the cardinal del Monte having been elected in his place, under the name of Julius III, he issued a bull, dated March 14, 1551, directing the re-establishment of the Council of Trent, and naming as his legates, Marcellus Crescentio, cardinal; Sebastian Pighino, archbishop of Siponto; and Aloysius Lipomanes, bishop of Verona.

**Session XI (May 1, 1551).**—The next session was held at Trent, when cardinal Crescentio caused a decree to be read to the effect that the council was reopened,

and that the next session should be held on Sept. 1 following.

*Session XII* (Sept. 1, 1551).—In this session, an exhortation was read in the name of the presidents of the council, in which the power and authority of oecumenical councils were extolled; then followed a decree declaring that the subject of the eucharist should be treated of in the next session. Afterwards, the earl of Montfort, ambassador from the emperor, demanded to be admitted to the council, which was agreed to. James Amyot, the ambassador of Henry II of France, presented a letter from his master, which, after some opposition, was read; it explained why no French bishop had been permitted to attend the council. Afterwards, Amyot, on the part of Henry, made a formal protest against the Council of Trent, in which he complained of the conduct of Julius III.

In the congregation following, the question of the eucharist was treated of, and ten articles selected from the doctrine of Zwingli and Luther were proposed for examination.

1. That the body and blood of Christ are present in the eucharist only in a figure, not really.
2. That the Lord's body is eaten, not sacramentally, but only spiritually and by faith.
3. That no transubstantiation takes place in the eucharist, but a hypostatic union of the human nature of Christ with the bread and wine.
4. That the eucharist was instituted for the remission of sins only.
5. That Jesus Christ in the eucharist is not to be adored, and that to do so is to commit idolatry.
6. That the holy sacrament ought not to be kept; and that no person may communicate alone.
7. That the body of Christ is not in the fragments which remain after communion; but it is so present only during the time of receiving, and not afterwards.
8. That it is sin to refuse to the faithful the communion in both kinds.
9. That under one species is not contained the same as under both.
10. That faith alone is required in order to communicate; that confession ought to be voluntary, and that communion at Easter is not necessary.

In another congregation the question of reform was discussed, the subject of episcopal jurisdiction was brought forward, and a regulation drawn up concerning appeals. No appeal from the judgment of the bishop and his officials was allowed, except in criminal cases, without consulting with civil judgments; and even in criminal cases it was not permitted to appeal from interlocutory sentences until a definitive sentence had been passed. The ancient right of the bishops to give sentence in the provincial synods was not, however, restored. The power was left to the pope of judging by means of commissioners delegated *in partibus*.

*Session XIII* (Oct. 11, 1551).—The decree concerning the eucharist was read Sept. 13, and was contained in eight chapters.

1. Declares that after the consecration of the bread and wine, our Lord Jesus Christ, very God and very Man, is verily, really, and substantially contained under the species of these sensible objects; that it is a sin to endeavor to put a metaphorical sense upon the words in which our Lord instituted the holy sacrament; that the Church has always believed the actual body and the actual blood, together with his soul and his divinity, to be present under the species of bread and wine after consecration.
2. That each kind contains the same as they both together do, for Jesus Christ is entire under the species of bread, and under the smallest particle of that species, as also under the species of wine, and under the smallest portion of it.
3. That in the consecration of the bread and wine there is made a conversion and change of the whole substance of the bread into the substance of our Lord's body, and a change of the whole substance of the wine into that of his blood, which change has been fitly and properly termed "transubstantiation."
4. That the worship of Latria is rightly rendered by the faithful to the holy sacrament of the altar.
5. That there are three modes of communicating:—(1) sacramentally, as in the case of sinners; (2) spiritually, as they do who receive only in will and by faith; (3) both sacramentally and spiritually, as they do who actually receive, and with faith and proper dispositions.

To this decree there were added eleven canons, anathematizing those who held certain heretical doctrines on the subject of the holy eucharist, and especially those contained in the ten articles proposed for examination in the congregation held Sept. 2.

Thus, can. 1 condemns the opinion contained in the first of those articles; can. 2, that contained in art. 3; can. 3, that contained in art. 9; can. 4, that contained in art. 7; can. 5, that contained in art. 4; can. 6, that contained in art. 5; can. 7, that contained in art. 6; can. 8, that contained in art. 2; can. 9, that contained in art. 10; can. 10 condemns those who deny that the priest may communicate alone; and can. 11 condemns those who maintain that faith alone, without confession, is a sufficient preparation for the communion.

Afterwards, a decree of reformation, containing eight chapters, was read; the subject of it was the jurisdiction of bishops.

In a congregation held after this session, twelve articles on the subjects of penance and extreme unction were examined, taken from the writings of Luther and his disciples. In a subsequent congregation the decrees and canons upon the subject were brought forward, together with a decree in fifteen chapters on reform.

*Session XIV* (Nov. 25, 1551).—In this session the decree upon penance, in nine chapters, was read.

1. States that our Lord chiefly instituted the sacrament of penance when he breathed upon his disciples, saying, "Receive ye the Holy Ghost," etc.; and the council condemns those who refuse to acknowledge that by these words our Lord communicated to his apostles and to their successors the power of remitting or retaining sins after baptism.
2. That in this sacrament the priest exercises the function of judge.
3. That the form of the sacrament, in which its force and virtue resides, is contained in the words of the absolution pronounced by the priest, "Ego te absolvo," etc.; that the penitential acts are contrition, confession, and satisfaction, which are, as it were, the matter of the sacrament.
4. The council defines contrition to be an inward sorrow for, and hatred of, the sin committed, accompanied by a firm resolution to cease from it in future. With respect to imperfect contrition, called attrition, arising merely from the shame and disgracefulness of sin, or from the fear of punishment, the council declares that if it be accompanied by a hope of forgiveness, and excludes the desire to commit sin, it is a gift of God and a motion of the Holy Spirit; and that, far from rendering a man a hypocrite and a greater sinner, it disposes him (*disponit*) to obtain the grace of God in the sacrament of penance.
5. The decree then goes on to establish the necessity of confessing every mortal sin which, by diligent self-examination, can be brought to remembrance. With regard to venial sins, it states that it is not absolutely necessary to confess them, and that they may be expiated in many other ways.
6. As to the minister of this sacrament, it declares that the power of binding and loosing is, by Christ's appointment, in the priest only; that this power consists not merely in declaring the remission of sins, but in the judicial act by which they are remitted.
7. As to the reserved cases, it declares it to be important to the maintenance of good discipline that certain atrocious crimes should not be absolved by every priest, but be reserved for the first order.
8. That we can make satisfaction to God by self-imposed inflictions, and by those which the priest prescribes, as well as by bearing patiently and with a penitential spirit the temporal sorrows and afflictions which God sends to us.

In conformity with this decree, fifteen canons were published, condemning those who maintained the opposite doctrines. After this, the decree upon the subject of extreme unction, in three chapters, was read.

It stated that this unction was appointed by our Lord Jesus Christ as a true sacrament of the New Test.; that it is plainly recommended to the faithful by James, and that the use of it is insinuated by Mark. That the matter of the sacrament is the oil consecrated by the bishop, and that its form consists in the words pronounced when the unction is applied; that its effect is to wipe out the remains of sin, and to reassure and comfort the soul of the sick person by exciting within him a full confidence in God's mercy, and sometimes to restore the health of the body, when such renewed health can advantage the salvation of the soul. That bishops alone may administer this sacrament. That this sacrament ought to be given to those who are in danger of death; but that if they recover, they may receive it again.

The council then agreed upon four canons on the subject, with anathemas.

1. Anathematizes those who teach that extreme unction is not a true sacrament instituted by Jesus Christ.
2. Anathematizes those who teach that it does not confer grace, nor remit sin, nor comfort the sick.
3. Anathematizes those who teach that the Roman rite may be set at naught without sin.
4. Anathematizes those who teach that the *νεροβύρεποι*, of whom James speaks, are old persons, and not priests.

After this the question of reform came before them, and fourteen chapters upon the subject of episcopal jurisdiction were published.

1. Forbids the granting of dispensations and permissions by the court of Rome to the prejudice of the bishop's authority.
2. Forbids bishops *in partibus infidelium*, upon the strength of their privileges, to ordain any one under any pretext without the express permission of, or letter dismissory from, the ordinary.
3. Gives bishops power to suspend clerks ordained without proper examination or without their license.
4. Orders that all secular clerks whatever, and all regulars living out of their monasteries, shall be always, and in all cases, subject to the correction of the bishop in whose diocese they are, notwithstanding any privileges, exemption, etc., whatsoever.
5. Relates to the conservators.
6. Orders all clerks, under pain of suspension and deprivation, to wear the habit suited to their order, and forbids them the use of short garments and green and red stockings.
7. Enacts that a clerk guilty of voluntary homicide shall be deprived of all ecclesiastical orders, benefices, etc.
8. Checks the interference of prelates in the dioceses of others.
9. Forbids the perpetual union of two churches situated in different dioceses.
10. Directs that benefices belonging to the regulars shall be given to regulars only.
11. Directs that no one shall be admitted to the religious life who will not promise to abide in the convent in subjection to the superior.
12. Declares that the right of patronage can be given only to those who have built a new church or chapel, or who endow one already built.
13. Forbids all patrons to make their presentation to any one but to the bishop, otherwise the presentation to be void.

In a congregation held Dec. 23 the sacrament of orders was considered, and twelve articles taken from the Lutheran writings were produced for examination. Subsequently eight canons were drawn up condemning as heretics those who maintained the following propositions: 1. That orders is not a true sacrament. 2. That the priesthood is the only order. 3. That there ought to be no hierarchy. 4. That the consent of the people is necessary to the validity of orders. 5. That there is no visible priesthood. 6. That unction is unnecessary. 7. That this sacrament does not confer the Holy Spirit. 8. That bishops are not by divine appointment nor superior to priests.

*Session XV* (Jan. 25, 1552).—In this session a decree was read to the effect that the decrees upon the subject of the sacrifice of the mass and the sacrament of orders, which were to have been read in this session, would be deferred until March 19 under the pretence that the Protestants, to whom a new safe-conduct had been granted, might be able to attend.

In the following congregation the subject of marriage was treated of, and thirty-three articles thereon were submitted for examination.

The disputes which arose between the ambassadors of the emperor and the legates of the pope produced another cessation of the council. The Spanish bishops and those of the kingdoms of Naples and Sicily, as well as all who were subjects of the emperor, wished to continue the council; but those, on the other hand, who were in the interests of the court of Rome did all they could to prevent its continuance, and were not sorry when the report of a war between the emperor and Maurice, elector of Saxony, caused most of the bishops to leave Trent. In the meantime some Protestant theologians arrived, and urged the ambassadors of the emperor to obtain from the fathers of the council an an-

swer to certain propositions, and to induce them to engage in a conference with them; both of which, however, the legates, upon various pretexts, eluded.

*Session XVI* (May 28, 1552).—The chief part of the prelates having then departed, the pope's bull declaring the council to be suspended was read in this session. This suspension lasted for nearly ten years; but on Nov. 29, 1560, a bull was published by Pius IV (who succeeded to the papacy upon the death of Julius III, in 1555) for the reassembling of the council at Trent on the following Easter-day; but from various causes the reopening of the council did not take place until the year 1562.

*Session XVII* (Jan. 18, 1562).—One hundred and twelve bishops and several theologians were present. The bull of convocation and a decree for the continuation of the council were read; the words "proponentibus legatis" inserted in it passed in spite of the opposition of four Spanish bishops, who represented that the clause, being a novelty, ought not to be admitted, and that it was, moreover, injurious to the authority of oecumenical councils.

In a congregation held Jan. 27 the legates proposed the examination of the books of heretics and the answers to them composed by Catholic authors, and requested the fathers to take into their consideration the construction of a catalogue of prohibited works.

*Session XVIII* (Feb. 26, 1562).—In this session the pope's brief was read, who left to the council the care of drawing up a list of prohibited books. After this a decree upon the subject of the books to be prohibited was read, inviting all persons interested in the question to come to the council, and promising them a hearing.

In congregations held on March 2, 3, and 4, they deliberated about granting a safe-conduct to the Protestants, and a decree upon the subject was drawn up.

On March 11 a general congregation was held, in which twelve articles of reform were proposed for examination, which gave rise to great dispute and were discussed in subsequent congregations.

*Session XIX* (May 14, 1562).—In this session nothing whatever passed requiring notice, and the publication of the decrees was postponed to the following session. Immediately after this session the French ambassadors arrived, and their instructions were curious, and to the following effect:

That the decisions which had taken place should not be reserved for the pope's approval, but that the pope should be compelled to submit to the decision of the council. That they should begin with the reform of the Church in its head and in its members, as had been promised at the Council of Constance, and in that of Basle, but never completed. That annates should be abolished; that all archbishops and bishops should be obliged to reside; that the council should make arrangements with respect to dispensations, so as to remove the necessity of sending to Rome. That the sixth canon of Chalcedon should be observed, which prohibits bishops to ordain priests without appointing them to some specific charges, so as to prevent the increase of useless ministers, etc.

On May 26 a congregation was held to receive the ambassador of France. The Sieur de Pibrac, in the name of the king his master, in a long discourse, exhorted the prelates to labor at the work of reformation, promising that the king would, if needful, support and defend them in the enjoyment of their liberty.

*Session XX* (June 4, 1562).—In this session the promoter of the council replied to the discourse delivered by Pibrac in the last congregation; after which a decree was read proroguing the session to July 16.

In the following congregation five articles upon the subject of the holy eucharist were proposed for examination.

1. Whether the faithful are, by God's command, obliged to receive in both kinds?
2. Whether Jesus Christ is received entire under one species as under both?
3. Whether the reason which induced the Church to

give the communion to the laity under one kind only still obliged her not to grant the cup to any one?

4. Upon what conditions the cup should be permitted to any persons, supposing it to be advisable to grant it?

5. Whether the communion is necessary to children under years of discretion?

The question about the obligation of residence was also again mooted; but the cardinal of Mantua objected to its discussion as entirely alien from the subject before them, promising, at the same time, that it should be discussed at a fitting season.

In subsequent congregations held from the 9th to the 23d of June the subject of the five articles was discussed.

In a congregation held July 14 the decree in four chapters on the communion was examined.

*Session XXI* (July 16, 1562).—The four chapters on doctrine were read, in which the council declared:

That neither laymen nor ecclesiastics (not consecrating) are bound by any divine precept to receive the sacrament of the eucharist in both kinds; that the sufficiency of communion in one kind cannot be doubted without injury to faith. Further, that the Church has always possessed the power of establishing and changing in the dispensation of the sacraments (without, however, interfering with essentials) according as she has judged to be most conducive to the honor due to the holy sacrament, and to the good of the recipients, taking into account the diversities of place and conjuncture; that, although Jesus Christ instituted and gave to his apostles the sacrament under two kinds, it is necessary to believe that under either kind Jesus Christ is received whole and entire; and that no diminution is experienced in any of the graces conveyed by the sacrament. Lastly, that children not arrived at years of discretion are not obliged to receive the eucharist.

Four canons in conformity with this doctrine were then read:

1. Against those who maintain that all the faithful are under obligation to receive in both kinds.

2. Against those who maintain that the Church has not sufficient grounds for refusing the cup to the laity.

3. Against those who deny that our Lord is received entire under each species.

4. Against those who maintain that the eucharist is necessary to children before they come to the exercise of their reason.

Subsequently nine chapters on reform were read, having regard to the duties of bishops, education of clerks, etc.

A few days after this session the Italian bishops received a letter from the pope, in which he declared that he was far from wishing to hinder the discussion of the question concerning the nature of the obligation to residence; that he desired the council to enjoy entire freedom, and that every one should speak according as his conscience directed him; at the same time, however, he wrote to his nuncio, Visconti, bidding him take secure measures for stifling the discussion, and for sending it to the holy see for decision.

In the congregations held after the twenty-first session, the question was concerning the sacrifice of the mass; and all the theologians agreed unanimously that the mass ought to be regarded as a true sacrifice under the new covenant, in which Jesus Christ is offered under the sacramental species. One of their arguments was this, that Jesus Christ was priest after the order of Melchizedek; the latter offered bread and wine; and that, consequently, the priesthood of Jesus Christ includes a sacrifice of bread and wine.

In a congregation held about Aug. 18, the archbishop of Prague presented a letter from the emperor, in which he made earnest entreaties that the cup might be conceded to the laity. This delicate subject was reserved for special consideration in a subsequent congregation.

The decree on the subject of the sacrifice of the mass being now completed, the members began next to consider the subject of communion in both kinds. Three opinions principally prevailed among the prelates: 1. To refuse the cup entirely; 2. To grant it upon certain conditions to be approved of by the council; 3. To leave the settlement of the matter to the pope. The Spanish and Venetian bishops supported the first opinion.

Among those who were inclined to grant the cup were cardinal Madrucio, the bishop of Modena, and Gaspard Capal, bishop of Leira. But among the strongest advocates for granting the petition was the bishop of the Five Churches, who implored the prelates to have compassion on the churches, and to pay some regard to the pressing entreaties of the emperor. On the other hand, the patriarchs of Aquileia and Venice, and the Latin patriarch of Jerusalem, were in favor of refusing; the latter maintained that by giving way to them the people would be rather confirmed in the error of supposing that the body only of our Lord is contained under the species of bread, and the blood only under that of wine; that if they gave way now, other nations would require the same, and they would go further, and would next require the abolition of images, as being an occasion of idolatry to the people. Other bishops, supporting this opinion, reminded the assembly that the Church had been led to forbid the use of the cup from a fear lest the consecrated wine should be spilled or turn sour, and that the former accident could hardly be prevented when the holy sacrament was carried long distances and by bad paths. The archbishop of Rossano, the bishops of Cava, Almeria, Imola, and Rieti, with Richard, abbot of Preval, at Genoa, were also among those who spoke in favor of absolutely refusing the cup. On the eve of the twenty-second session a decree passed by which it was left to the pope to act as he thought best in the matter, the numbers being ninety-eight for the decree and thirty-eight against it. The discussion lasted altogether from Aug. 15 to Sept. 16.

*Session XXII* (Sept. 17, 1562).—One hundred and eighty prelates, with the ambassadors and legates, were present at this session. The doctrinal decree touching the sacrifice of the mass, in nine chapters, was published. It was to the following effect:

1. Although our Lord once offered himself to God the Father by dying upon the altar of his cross, in order to obtain thereby eternal redemption for us, nevertheless, since his priesthood did not cease at his death, in order that he might leave with his Church a visible sacrifice (such as the nature of man requires), by means of which the bloody sacrifice of the cross might be represented at the last supper, on the same night that he was betrayed, in the execution of his office as a priest forever after the order of Melchizedek, he offered his body and blood to the Father under the species of bread and wine, and gave the same to his apostles; and by these words, "This do in remembrance of me," he commanded them and their successors to offer the like sacrifice, as the Catholic Church has always believed and taught.

2. As the same Jesus Christ who once offered himself upon the cross with the shedding of his blood is contained and immolated without the effusion of blood in the holy sacrifice of the mass, this latter sacrifice is truly propitiatory, and that by it we obtain mercy and forgiveness; since it is the same Jesus Christ who was offered upon the cross who is still offered by the ministry of his priests, the only difference being in the manner of offering. And the mass may be offered, not only for the sins and wants of the faithful who are alive, but also for those who, being dead, are not yet made pure.

3. Although the Church sometimes celebrates masses in honor and in memory of the saints, the sacrifice is still offered to God alone, for she only implores their protection.

4. The Church for many ages past has established the sacred canon of the mass, which is pure and free from every error, and contains nothing which is not consistent with holiness and piety, being in truth composed from our Lord's words, the traditions of the apostles, and the pious institutions of the holy popes.

5. The Church, in order the better to set forth the majesty of so great a sacrifice, has established certain customs—such as saying some things at mass in a low voice, others aloud; and has introduced certain ceremonies—as the benediction, lights, incense, ornaments, etc., after the tradition of the apostles.

6. Although it is to be desired that at every mass all the faithful should communicate, not only spiritually, but also sacramentally, nevertheless the council does not condemn private masses in which the priest only communicates, but, on the contrary, approves and authorizes them, for they are celebrated by the proper minister in behalf of himself and the faithful.

7. The Church has ordained that the priest shall mix water with the wine, because there is reason to believe that our blessed Lord did so, and because both blood and water issued from his side; which sacred mystery, by the use of this mixture, is remembered.

8. Although the mass contains much to edify the people, the fathers did not judge it right that it should be celebrated in the vulgar tongue, and the Roman Church has preserved the use; nevertheless, the clergy should at times, and especially on festivals, explain to the people some part of what they have read to them.

9. Anathematizes, in nine canons, all those who deny the affirmative of twelve of the thirteen articles proposed in the congregation following the twenty-first session, viz. the 1st, 3d, 13th, and 4th, 2d, 10th, 7th, 11th, 5th, 8th, 9th, and 6th (which see).

Then followed a decree concerning what should be observed or avoided in the celebration of mass:

Bishops were ordered to forbid and abolish everything which had been introduced through avarice, irreverence, or superstition, such as pecuniary agreements for the first masses, and forced exactions made under the name of alms: vagabond and unknown priests were forbidden to celebrate, also those who were notorious evil lives; no masses were to be said in private houses; all music of an impure and lascivious character was forbidden in churches, and all worldly conversation, profane actions, walking about, etc. Priests were forbidden to say mass out of the prescribed hours, and otherwise than Church form prescribed. It was also ordered to warn the people to come to church on Sundays and holidays at least.

In the third place, the decree of reformation was read, containing eleven chapters:

1. Orders that all the decrees of the popes and the councils relating to the life, morals, and acquirements of the clergy should be in future observed, under the original and even greater penalties.

2. Enacts that bishoprics shall be given only to those persons who possess the qualifications required by the canons, and who have been at least six months in holy orders.

3. Permits bishops to appropriate the third part of the revenue of the prebends in any cathedral or collegiate church for daily distributions.

4. Declares that no one under the rank of subdeacon shall have any voice in the chapter; that all the members shall perform their proper offices.

5. Enacts that dispensations *extra curiam* (i. e. granted anywhere out of the court of Rome) shall be addressed to the ordinary, and shall have no effect until he shall have testified that they have not been obtained surreptitiously.

6. Treats of the care to be observed in proving wills.

7. Orders that legates, nuncios, patriarchs, and other superior judges shall observe the constitution of Innocent IV beginning "*Romana*," whether in receiving appeals or granting prohibitions.

8. Orders that bishops, as the delegates of the holy see, shall be the executors of all pious gifts, whether by will or otherwise; that to them it appertains to visit hospitals and other similar communities, except those under the immediate protection of the king.

9. Directs that those to whom the care of any sacred fabric is intrusted, whether laymen or clerks, shall be held bound to give account of their administration yearly to the ordinary, unless the original foundation require them to account to any other.

10. Declares that bishops may examine notaries, and forbid them the exercise of their office in ecclesiastical matters.

11. Enacts penalties against those who usurp or keep possession of the property of the Church, and pronounces anathemas against them.

With respect to the concession of the cup to the laity, the council declared, by another decree, that it judged it convenient to leave the decision to the pope, who would act in the matter according as his wisdom should direct him.

In a congregation certain articles relating to the reformation of morals were discussed, and the theologians were instructed to examine eight articles on the subject of the *sacrament of orders*. This occupied many congregations, in one of which a large number of the prelates, chiefly Spaniards, demanded that there should be added to the seventh canon, concerning the institution of bishops, a clause declaring the episcopate to be of divine right. An attempt was made to stifle the discussion, but John Fonseca, a Spanish theologian, among others, entered boldly upon the subject, declaring that it was not, and could not be, forbidden to speak upon the matter. He maintained that bishops were instituted by Jesus Christ, and thus by divine right, and not merely by a right conferred by the pope. The discussion of this question proved highly disagreeable at Rome, and

the legates received instructions on no account to permit it to be brought to a decision. However, in subsequent congregations the dispute was renewed with warmth; in the congregation of Oct. 13, the archbishop of Granada insisted upon the recognition of the institution of bishops, and their superiority to priests, *jure divino*. The same view was taken in the following congregation by the archbishop of Braga and the bishop of Segovia; and no less than fifty-three prelates, out of one hundred and thirty-one present, voted in favor of the recognition of the divine institution and jurisdiction of bishops. According to Fra Paolo, the number amounted to fifty-nine. The dispute was, however, by no means ended. On the 20th the Jesuit Lainez, at the instigation of the legates, delivered a powerful speech in opposition to the view taken by the Spanish bishops, denying altogether that the institution and jurisdiction of bishops were of divine right. However, powerful as was his speech, he was answered by the bishop of Paris so effectually that the legates, to their great discomposure, saw the views of the Spanish prelates gain ground. The latter then declared formally that unless their demand were granted, and the order and jurisdiction of bishops declared in the canon to be *jure divino*, they would thenceforth absent themselves from all the congregations and sessions.

In the meantime the cardinal of Lorraine arrived at Trent with several French prelates, and was received with honor. In a congregation held Nov. 23, he read the letter of the king of France to the council, in which he strongly urged them to labor sincerely to bring about a sound reformation of abuses, and to restore its pristine glory to the Catholic Church by bringing back all Christian people to one religion. After the letter was finished the cardinal delivered a speech, strongly urging the necessity of proceeding speedily with the work of reformation, in which he was followed by Du Ferrier, the king's ambassador, who spoke his mind freely.

All this time so little progress had been made with the canons and decrees that when Nov. 26, the day fixed for holding the twenty-third session, arrived, it was found necessary to prorogue it. After this, in the following congregations, the subject of the divine right of bishops was again discussed, when the French bishops declared in favor of the views held by the Spaniards.

At the beginning of the year 1563 the French ambassadors presented their articles of reformation under thirty-two heads. Their principal demands were as follows:

6. That no person should be appointed bishop unless he were of advanced age, and of good character and capacity.

7. That no curates should be nominated unless they were of good character and abilities.

9. That bishops, either personally or by depnty, should preach on every Sunday and festivals, besides Lent and Advent.

10. That all curates should do the same when they had a sufficient audience.

12. That incapable bishops, abbots, and curates should resign their benefices, or appoint coadjutors.

14. That all pluralities whatever should be abolished, without any consideration of compatibility or incompatibility.

16. That steps should be taken to provide every beneficed clerk with a revenue sufficient to maintain two curates and to exercise hospitality.

17. That the gospel should be explained to the people at mass, and that after mass the priest should pray with the people in the vulgar tongue.

18. That the ancient decretals of pope Leo and Gelasius on communion in both kinds should be re-established.

19. That the efficacy of the sacraments should also be explained to the people before their administration.

20. That benefices should be conferred by bishops within six months: after which time they should devolve to the immediate superior, and so gradually to the pope.

21. That they should abolish, as contrary to the canons, all expectancies, regressions (returning to a benefice which has been once resigned), resignations, etc.

23. That simple priories should be renitted to the cure of souls, originally intended by the foundation, which had been separated from them, and assigned to perpetual vicars with miserable pittance.

27. That bishops should take in hand no matter of importance without the advice of their chapters; and that canonics should be compelled to continual residence.

31. That no sentence of excommunication should be passed until three moultings had been issued, and then only for grievous faults. That bishops should be desired to give benefices rather to those who drew back from receiving than to such as sought for them.

32. That diocesan synods should be assembled at least once a year, provincial synods every three years, and general councils every ten years.

The pope, in order to elude the difficulty in which he was placed by the demand of the Spanish and French bishops that the divine right of bishops should be inserted in the seventh chapter, sent a form for the approval of the council, in which it was declared that "bishops held the principal place in the Church, but in dependence upon the pope." This, however, did not meet with approval, and, after a long contest, it was agreed to state it thus, that "they held the principal place in the Church *under the pope*," instead of in dependence upon him. However, a still warmer contest arose upon the chapter in which it was said that the pope had authority to feed and govern the Universal Church. This the Gallican and Spanish bishops would by no means consent to, alleging that the Church is the first tribunal under Christ. Accordingly, they insisted that the words *universas ecclesias*, "all churches," should be substituted for *Universam Ecclesiam*. The Gallicans even more strenuously denied that "the pope possessed all the authority of Jesus Christ," notwithstanding all the limitations and explanations which were added to it.

On Feb. 5 the legates proposed for consideration eight articles on the subject of marriage, extracted from so-called heretical books:

1. That marriage is not a sacrament instituted by God.
2. That parents may annul marriages contracted by their children clandestinely.
3. That a man may marry again during the life of his first wife, divorced on account of fornication.
4. That polygamy is allowed to Christians, and that to forbid marriages at certain seasons is a heathen superstition.
5. That marriage is to be preferred to the state of virginity.
6. That priests in the Western Church may marry, notwithstanding their vow.
7. That the degrees of consanguinity and affinity laid down in Lev. xviii are to be observed, and no others.
8. That the cognizance of causes relating to marriages belongs to the secular princes.

These articles were discussed in several congregations. The sixth article came under consideration March 4; all agreed in condemning it as heretical, but they were divided upon the grounds of their opinion. The question was afterwards discussed whether it was advisable, under the circumstances of the times, to remove the restriction laid upon the clergy not to marry; this was in consequence of a demand to that effect made by the duke of Bavaria. Strong opposition was made to this demand, and many blamed the legates for permitting the discussion, and maintained that if this license were granted the whole ecclesiastical hierarchy would fall to pieces, and the pope be reduced to the simple condition of bishop of Rome, since the clergy, having their affections set upon their families and country, would be inevitably detached from that close dependence upon the holy see in which its present strength mainly consists.

In the meantime, the cardinal of Mantua had died, and the pope despatched two new legates to the council, cardinal Morone and cardinal Navagier. The French continued their importunities on the subject of reformation, and were as constantly put off upon one pretext or another by the legates, and thus much time was wasted.

In a congregation held May 10, a letter from the queen of Scots was read, in which she expressed her sorrow that she had not one Catholic prelate in her dominions whom she could send to the council, and declared her determination, should she ever attain to the crown of England, to do all in her power to bring that

kingdom, as well as Scotland, back to the Roman obedience.

All this time the contests about the institution and jurisdiction of bishops, and the divine obligation of residence, continued; and at last, in order to accommodate matters, and bring things to an end, it was resolved to omit altogether all notice of the institution of bishops and of the authority of the pope, and to erase from the decree concerning residence whatever was obnoxious to either party. They then fell to work upon the decree concerning the reformation of abuses.

*Session XXXIII* (July 15, 1563).—At this session 208 prelates, besides the legates and other ecclesiastics, were present, with the ambassadors of France, Spain, Portugal, etc. The sermon was preached by the bishop of Paris, who seems to have contrived in it to give offence to all parties. After the sermon, the bulls authorizing Morone and Navagier to act as legates for the pope were read, together with the letters of the king of Poland, the duke of Savoy, and the queen of Scotland. Lastly, the decrees and canons drawn up during the past congregation were brought before the council. The decree upon the sacrament of orders, in four chapters, was read, and eight canons on the sacrament of orders were published, which anathematized,

1. Those who deny a visible priesthood in the Church.
2. Those who maintain that the priesthood is the only order.
3. Those who deny that ordination is a true sacrament.
4. Those who deny that the Holy Spirit is conferred by ordination.
5. Those who deny that the unction given at ordination is necessary.
6. Those who deny that there is a hierarchy composed of bishops, priests, and ministers in the Catholic Church.
7. Those who deny the superiority of bishops to priests, or that they alone can perform certain functions which priests cannot, and those who maintain that orders conferred without the consent of the people are void.
8. Those who deny that bishops called by the authority of the pope (*qui auctoritate Romani pontificis assumuntur*) are true and lawful bishops.

After this the decree of reformation was read, containing eighteen chapters, on the residence of bishops, and on other ecclesiastical affairs.

In the following congregations the decrees concerning marriage were discussed, and it was unanimously agreed that the law of celibacy should be continued binding upon the clergy.

Moreover, twenty articles of reformation, which the legates proposed, were examined; and during the discussion letters were received from the king of France, in which he declared his disappointment at the meagre measure of ecclesiastical reform proposed in these articles, and his extreme dissatisfaction at the chapter interfering with the rights of princes. Shortly after, nine of the French bishops returned home, so that fourteen only remained.

On Sept. 22 a congregation was held, in which the ambassador Du Ferrier spoke so warmly of the utter insufficiency of the articles of reform which the legates had proposed, and of their conduct altogether, that the congregation broke up suddenly in some confusion.

To fill up the time intervening before the twenty-fourth session, the subjects of indulgences, purgatory, and the worship of saints and images were introduced for discussion, in order that decrees on these matters might be prepared for presentation in the twenty-fifth session.

*Session XXXIV* (Nov. 11, 1563).—In this session the decree of doctrine and the canons relating to the sacrament of marriage were read.

After establishing the indissolubility of the marriage tie by Holy Scripture, it adds that Jesus Christ, by his passion, merited the grace necessary to confirm and sanctify the union betwixt man and wife. That the apostle means us to understand this when he says, "Husbands, love your wives, as Jesus Christ loved the Church;" and, shortly after, "This sacrament is great: I speak of Jesus Christ and the Church." Marriage, under the Gospel, is declared to be a more excellent state than that of marriage under the former dispensation, on account of the grace conferred by it, and that, accordingly, the holy fa-

thers, councils, and universal tradition rightly teach us to reckon marriage among the sacraments of the new law.

There are twelve canons, with anathemas, upon the subject.

1. Anathematizes those who maintain that marriage is not a true sacrament.

2. Anathematizes those who maintain that polygamy is permitted to Christians.

3. Anathematizes those who maintain that marriage is unlawful only within the degrees specified in Leviticus.

4. Anathematizes those who deny that the Church has power to add to the impediments to marriage.

5. Anathematizes those who maintain that the marriage tie is broken by heresy, ill-conduct, or voluntary absence on either side.

6. Anathematizes those who deny that a marriage contracted, but not consummated, is annulled by either of the parties taking the religious vows.

7. Anathematizes those who maintain that the Church errs in holding that the marriage tie is not broken by adultery.

8. Anathematizes those who maintain that the Church errs in separating married persons for a time in particular cases.

9. Anathematizes those who maintain that men in holy orders, or persons who have taken the religious vow, may marry.

10. Anathematizes those who maintain that the married state is preferable to that of virginity.

11. Anathematizes those who maintain that it is superstitious to forbid marriages at certain seasons.

12. Anathematizes those who maintain that the cognizance of matrimonial causes does not belong to the ecclesiastical authorities.

After this a decree of reformation was published relating to the same sacrament, containing ten chapters.

1. Forbids clandestine marriages: orders curates to publish the names of the parties about to contract marriage on three consecutive festivals in church during the solemn mass; orders that two or three witnesses be present at the marriage, and declares all marriages to be null which are not solemnized in the presence of the clergyman of the parish, or of some other priest, having his permission or that of the ordinary.

2. Treats of the impediments to marriage, which were in some respects relaxed, i. e. the impediments to marriage between a godparent and godchild and the parents of the godchild was removed; also that between the person administering baptism and the person baptized, or his or her parents.

3 and 4. Also refer to the relaxation of the impediments.

5. Those who wilfully contract marriage within the prohibited degrees are sentenced to be separated without any hope of obtaining a dispensation.

6. No marriage to be allowed between a ravisher and the woman ravished while she remains in his power; if, however, when at liberty, she consents, they may be married—the ravisher, and all aiding and abetting, to be nevertheless excommunicated.

7. Care to be used in permitting wanderers to receive the sacrament of marriage.

8. Fornicators, whether married or single, to be excommunicated, unless they will put away their mistresses after three monitions. The women, after three monitions, to be driven out of the diocese unless they obey.

9. Forbids all masters, magistrates, etc., under anathema, to compel those under their control to marry against their own inclinations.

10. Confirms the ancient prohibitions to celebrate marriages between Advent and Epiphany, and between Ash-Wednesday and the octave of Easter.

After this a decree, containing twenty-one articles, upon the reform of the clergy was read, setting forth the duty of bishops to visit their dioceses; to preach in person or by deputy; relating to dispensations, sacraments, visitations, pluralities, etc.

*Session XXV and last* (Dec. 3 and 4, 1563).—At this session the decrees concerning purgatory, the invocation of saints, and the worship of images and relics were read.

1. *Of Purgatory*.—Declares that the Catholic Church, following Holy Scripture and tradition, has always taught, and still teaches, that there is a purgatory, and that the souls which are detained there are assisted by the suffrages of the faithful and by the sacrifice of the mass. Orders all bishops to teach, and to cause to be taught, the true doctrine on this subject.

2. *Of the Invocation of Saints*.—Orders bishops and others concerned in the teaching of the people to instruct them concerning the invocation of saints, the honor due to their relics, and the lawful use of images, according to

the doctrine of the Church, the consent of the fathers, and the decrees of the councils; to teach them that the saints offer up prayers for men, and that it is useful to invoke them, and to have recourse to their prayers and help. It further condemns those who maintain that the saints in rest ought not to be invoked, that they do not pray for men, that it is idolatry to invoke them, that it is contrary to Holy Scripture, etc., and that their relics and their tombs ought not to be venerated.

On the subject of images, the council teaches that those of our Lord, the Blessed Virgin, and of the saints are to be placed in churches; that they ought to receive due veneration, not because they have any divinity or virtue in them, but because honor is thus reflected upon those whom they represent. By means of these representations the people are instructed in the mysteries of the faith, and, by thus seeing the good deeds of the saints, are led to bless God, and endeavor themselves to do likewise.

The council then proceeds to anathematize all who hold or teach any contrary doctrine.

Lastly, in order to remedy abuses, it declares that if in any scriptural painting the Divinity is represented under any figure, the people should be warned that it is not intended that the Divinity can be seen by mortal eyes; further, that all things tending to superstition in the invocation of saints, the worship of their relics, and the right use of images should be done away with; that care should be taken not to profane the festivals of the saints, etc.; that no new miracles or relics should be admitted without the bishop's consent, and that any other abuses should be rectified by the bishop and provincial council.

These decrees were followed by one of reformation, consisting of twenty-two chapters, which relate to the regular clergy. After this another decree, in twenty-one chapters, on general reformation, was read.

A decree was also published upon the subject of indulgences to this effect, that the Church, having received from Jesus Christ the power to grant indulgences, and having, through all ages, used that power, the council declares that their use shall be retained as being very salutary to Christian persons and approved by the holy councils. It then anathematizes all who maintain that indulgences are useless, or that the Church has no power to grant them. At the same time, it desires that the ancient custom of the Church be adhered to, and that they be granted with care and moderation, forbidding all trafficking in them.

Further, the council exhorted all pastors to recommend to the observance of all the faithful whatever had been ordered by the Church of Rome, established in this or in any one of the oecumenical councils, and to impress upon them especially the due observance of the fasts and festivals of the Church.

The list of books to be proscribed was referred to the pope, as also were the catechism, missal, and breviaries.

Then the secretary, standing up in the midst of the assembly, demanded of the fathers whether they were of opinion that the council should be concluded, and that the legates should request the pope's confirmation of the decrees, etc. The answer in the affirmative was unanimous with the exception of three. The cardinal-president Morone then dissolved the assembly amid loud acclamations.

In a congregation held on the following Sunday, the fathers affixed their signatures to the number of two hundred and fifty-five—viz. four legates, two cardinals, three patriarchs, twenty-five archbishops, one hundred and sixty-eight bishops, thirty-nine proctors, seven abbots, and several generals of orders.

The acts of the council were confirmed by a bull bearing date Jan. 6, 1564. The Venetians were the first to receive the Tridentine decrees. The kings of France, Spain, Portugal, and Poland also received them in part; and they were published and received in Flanders, in the kingdom of Naples and Sicily, in part of Germany, in Hungary, Austria, Dalmatia, and some part

of South America, also among the Maronites. The Churches of England, Ireland, Scotland, Russia, Greece, Syria, Egypt, etc., reject the authority of this council.

In France the Council of Trent is received generally as to doctrine, but not altogether as to discipline. Various regulations which were deemed incompatible with the usages of the kingdom, the liberties of the Gallican Church, the concordat, and the just authority of the king, were rejected (see Mansi, *Concil.* xiv, 725; Landon, *Manual of Councils*, s. v.).

**Literature.**—The history of the Council of Trent was written chiefly by two able and learned Catholics—Fra Paolo Sarpi, of Venice, an almost semi-Protestant monk, *Istoria del Concilio Tridentino* (Lond. 1619; translations in French and German; Engl. transl. by Brent, *ibid.* 1676), in opposition to the papal court, and (against him) cardinal Sforza Pallavicino, *Istoria del Concilio di Trento* (Rome, 1656–57, 2 vols. fol.).

The canons and decrees of the council were first published by Paul Manutius (Rome, 1564), and often since in different languages. The best Latin edition is by Le Plat (1779), and by Schulte and Richter (Leips. 1853); and the best English edition is by Rev. J. Waterworth, with a *History of the Council* (Lond. 1848). The *Catechism*, an authorized summary of the faith drawn up by order of the council, appeared at Rome in 1566. The original acts and debates of the council, as prepared by its general secretary, bishop Angelo Massarelli (6 vols. large fol.), were deposited in the Vatican Library, and remained there unpublished for more than three hundred years, until they were brought to light, though only in part, by Aug. Theiner, in *Acta Genuina SS. Ecum. Concilii Tridentini nunc primum integre edita* (Lips. 1874, 2 vols.). The most complete collection of the official documents and private reports bearing upon the council is that of Le Plat, *Mém. ad Histor. Conc. Trident.* (Lovan. 1781–87, 7 vols.). New materials were brought to light by Mendham (1834 and 1846) from the MS. history by cardinal Paleotto; by Sickel, *Actenstücke aus österreichischen Archiven* (Vienna, 1872); and by Dr. Döllinger, *Ungedruckte Berichte und Tagebücher zur Geschichte des Conc. von Trient* (Nördlingen, 1876, 2 pts.). Among Protestant historians of the Council of Trent are Salig (1741–45, 3 vols.); Dauz (1846); Buckley (Lond. 1852); and Bungener (Paris, 1854; Engl. transl. N. Y. 1855). On the Tridentine standards see Schaff, *History of the Creeds of Christendom* (1876), i, 90 sq. See, in general, also Cunningham, *Hist. Theol.* (see Index); Hagenbach, *Hist. of Doctrines* (see Index); Mosheim, *Eccles. Hist.* vol. iii (Index). In particular see *The Council of Trent and its Proceedings* (Presb. Board of Publication, Phila. 1835, 18mo); Pallavicino, *Hist. du Conc. de Trente* (Montrouge, 1844, 3 vols. 8vo); Dupin, *Hist. du Conc. de Trente* (Brussels, 1721, 2 vols. 4to); Salig, *Vollst. Hist. des Tr. Conc.* (Halle, 1741, 3 vols. 4to); Courayer, *Hist. de la Reception du Conc. de Trente* (Amst. 1756). See COUNCILS.

**Trental**, an office for the dead in the Latin Church, consisting of thirty masses on thirty consecutive days.

**Trepalum**, a name given to the rack used for examining witnesses by torture. According to canon 33, Council of Tarragona, presbyters and deacons were forbidden to stand at the Trepalum while persons were tortured. See Bingham, *Christ. Antiq.* bk. xviii, ch. v, § 34.

**Trespass** (עֲוֹן, *guilt*; παράπτωμα) is an offence committed, a hurt, or wrong done to a neighbor; and partakes of the nature of an error or slip rather than of deliberate or gross sin. Under the law, the delinquent who had trespassed was of course bound to make satisfaction; but an offering or oblation was allowed him to reconcile himself to the Divine Governor (Lev. v, 6, 15). Our Saviour teaches us that whoever does not forgive the trespasses of a fellow-man against himself is not to expect that his Father in heaven will forgive his trespasses (Matt. vi, 14, 15).

**Trespass-offering** (עֹלָה, *ashâm*, once [Lev. vi, 5] fem. חֲטָאתֶיךָ, which properly denotes the act of trespass, as elsewhere). This sacrifice was offered for individuals only, and chiefly for such transgressions as were not punishable by the laws of the State (vii, 19). The victim sacrificed was different on different occasions. 1. A trespass-offering was brought when a person did not inform of a crime committed by another (v, 1); when a person had touched any unclean object, and had omitted the sacrifice of purification (ver. 2, 3); when a person had, through forgetfulness, neglected to fulfil his rash vow. In each of these cases the offering was a ewe or a she-goat; or, if the sacrificer were poor, it might consist of doves or fine flour, without oil and incense (ver. 4–13). 2. When a person had, through mistake, applied to a common purpose anything which had been consecrated to a holy use (ver. 10, 16; xxii, 14), or had in any way violated an engagement, or denied stolen property, or concealed any lost thing which he had found. In these cases the offering was a ram, and the restoration of the alienated property, with one fifth of the value; in the former case to the priest, in the latter to the owner or his heirs (vi, 2–7). 3. When any person had, through ignorance, done something forbidden, the victim was a ram (v, 17, 18). 4. When a man had a criminal connection with a betrothed female slave (xix, 20–22), or had, in later times, contracted an idolatrous marriage, the victim was a ram (Ezra x, 19). So also a Nazarite who had contracted defilement by touching a dead body (Numb. vi, 9–12), and a leper who had been healed, were to bring a lamb for a trespass-offering (Lev. xiv, 12, 24). In this offering the victim was slain on the north side of the altar, the blood sprinkled round it, and the pieces of fat burned upon it. See SIN-OFFERING.

Among the Hebrews trespass-offerings, like all other expiatory sacrifices, were symbolical representations of the great work, for the effecting of which the Messiah was promised to fallen man (Psa. xl, 6, 8; Heb. viii, 3; ix, 14, 26, 28; x, 5, 10). As it was the design of the Mosaic law to remind the Hebrews that they were guilty of sin and liable to death, so every sacrifice was a memorial of this mournful truth, as well as a type of the work of our Redeemer. When a Hebrew had committed a trespass against the divine law, providing the transgression was such as admitted an expiation, he had to offer the requisite sacrifices before he could be restored to his civil privileges. With this a mere worldly-minded Hebrew was content; but, as no mere animal sacrifice could make atonement for sin, to the sincere believer the sacrifice was only the symbol and type of something spiritual. It reminded him that his sins had not only excluded him from the divine favor, but that he deserved death and subsequent agony; it directed him to the need of a sacrifice for sin ere God would forgive his transgression; and it assured him that, just as by sacrifice he had been restored to his civil and political rights, so by faith in the great sacrifice for sin on the part of the lamb of God might he be restored to the divine favor, and to a place in that spiritual kingdom of which the Hebrew nation was the type. See PROPITIATORY SACRIFICES.

**Treuensfels**, ABRAHAM, a Jewish rabbi and doctor of philosophy of Germany, was born at Detmold in the year 1818. After visiting the gymnasium of that place, he went, in 1837, to Hanover, where he studied under Dr. Adler (now chief rabbi of England). In 1839 he pursued a course of studies at the Bonn University, and completed his Rabbinical education at Frankfurt. In 1844 he was appointed rabbi at Weilburg, in Nassau, and in 1860 he was called to Stettin, where he died, Jan. 30, 1879. He published, בְּרֵאשִׁית זוֹנָה, oder die kleine Genesis und die noch vorhandenen Bruchstücke derselben, griechisch und deutsch, und mit Anmerkungen, in the *Literaturblatt des Orients*, 1846, No. 129:—*Ueber*

den *Bibelcomen des Flavius Josephus* (1849). But his literary activity was chiefly displayed in the *Israelitische Wochenschrift*, which he published in connection with Dr. M. Rahmer. (B. P.)

**Treves, COUNCILS OF** (*Concilium Trevirense*), take their name from Treves, a town of Rhenish Prussia, in which they were held. The town is situated on the right bank of the Moselle, and had in 1871 a population of 21,442. It is a decayed place, noted for its ultramontaniam. The cathedral contains many relics—the principal one being the Holy Coat of Treves—and Roman remains. It has a priestly seminary, a gymnasium, a library of 100,000 volumes, a museum full of valuable antiquities—including the famous *Codex Aureus*, or MS. of the Gospel in gold letters, presented to the Abbey of St. Maximin by Ada, sister of Charlemagne.

I. The First Council was held in 948. The legate Marinus, the archbishop of Treves, and several bishops here excommunicated Hugo, count of Paris, and two pretended bishops, made by Hugo, the pseudo-archbishop of Rheims. See Mansi, *Concil.* ix, 632. See INGELHEIM.

II. The Second Council was held in 1548 by John, count of Isembourg, archbishop of Treves, who presided. Ten chapters, and a decree against the concubinary clergy, were published. See Mansi, *Concil.* xiv, 606.

III. The Third Council was held by John, archbishop of Treves, in 1549. Twenty canons were published.

1. Forbids to believe, hold, or teach any other than the Roman doctrine.

2, 3, 4. Of preachers.

6. Orders that the hours be duly said by clerks, and that those who cannot attend at the time in the choir shall say them privately.

9. Of the celebration of the mass.

10. Provides for lessening the number of festivals, and gives a list of those which shall in any case be retained.

11, 12. Of the religious and their houses.

15. Of schools.

17, 18. Of the immunity of churches.

19. Of the life and deportment of the clergy.

20. Provides that the heads of monasteries and colleges, and others of the clergy, shall be supplied with a copy of these canons.

See Mansi, xiv, 705.

**Treves, HOLY COAT OF.** See HOLY COAT OF TREVES.

**Trevett, RUSSELL, D.D.**, a clergyman of the Protestant Episcopal Church, was a native of New York. He was ordained in 1841, became professor of languages in St. James's College, Maryland, in 1843, and occupied the same position in St. John's College, Annapolis, Md., being elected thereto in 1855. Subsequently he became rector of St. James's Church, North Salem, N. J., a position which he held at the time of his death, March 8, 1865. See *Amer. Quar. Church Rev.* July, 1865, p. 321.

**Trial**, a term used in Scripture only in the sense of *testing* (usually some form of *דָּוָה*, *dokimē* or *dokimōv*; but once *בְּפֶה*, Job ix, 23, elsewhere "temptation" [q. v.]; and so *פֶּה*, Heb. xi, 36; *πύρωσις*, "fiery trial," 1 Pet. iv, 12, lit. *burning*, as elsewhere rendered, to denote painful circumstances into which persons are brought by divine Providence with a view to illustrate the perfections of God, bring to light the real character of those who are thus tried, and by the influence of temporal suffering, which shows the transitory nature and uncertain tenure of all earthly advantages, to promote their eternal and spiritual interests. See TEMPT.

**TRIAL, CHURCH.** See EXCOMMUNICATION.

**TRIAL, FORENSIC** (denoted in Heb. by *דָּוָה*, to hold a court, while *פֶּה* is the sentence rendered by the judge, whether favorable or adverse, both terms being usually rendered "judgment" in the A. V.; Gr. *κρίσις*). Originally the head of the family was the umpire among the Hebrews, with the power of life and death (comp. Deut. i, 16). Later the elders (q. v.) succeeded to a similar authority. According to the Mosaic law, there

were to be judges in all the cities, whose duty it was to exercise judicial authority over the surrounding neighborhood. Weighty causes were submitted to the supreme ruler. Originally trials were everywhere summary. Moses, in his laws, did not establish any more formal or complicated method of procedure. He was, nevertheless, anxious that strict justice should be administered, and therefore frequently inculcated the idea that God was a witness (Exod. xx, 21; xxiii, 1-9; Lev. xix, 15; Deut. xxiv, 14, 15). In ancient times, the forum or place of trial was in the *gates* of cities (Gen. xxiii, 10; Deut. xxi, 19). In the trial the accuser and the accused appeared before the judge or judges (xxv, 1), and both the implicated parties stood up. The witnesses were sworn, and in capital cases also the parties concerned (1 Sam. xiv, 37-40; Matt. xxvi, 63). In order to establish the accusations, two witnesses were necessary, and, including the accuser, *three*. The witnesses were examined separately, but the accused person had the liberty to be present when they gave their testimony (Numbers xxxv, 30; Deut. xvii, 1-15; Mark xxvi, 59). The sentence was pronounced soon after the completion of the examination, and the criminal, without any delay, even if the offence was a capital one, was taken to the place of punishment (Josh. vii, 22; 1 Sam. xxii, 8; 1 Kings ii, 23). See L'Empeur, *De Legibus Hebræorum Forensibus* (Lugd. 1637); Ziegler, *De Juribus Judæorum* (Vitemb. 1684); Benny, *Criminal Code of Jews* (Lond. 1880, 12mo). See JUDGE.

The following remarks respecting certain special instances of judicial proceedings in the New Test. are calculated to set them in their true legal light.

1. The trial of our Lord before Pilate was, in a legal sense, a trial for the offence *læsæ majestatis*—one which, under the Julian law, following out that of the twelve tables (*Digest*, iv, 1, 3), would be punishable with death (Luke xxiii, 2, 38; John xix, 12, 15). See JESUS CHRIST.

2. The trials of the apostles, of Stephen, and of Paul before the high-priest were conducted according to Jewish rules (Acts iv, v, 27; vi, 12; xxii, 30; xxiii, 1). See STEPHEN.

3. The trial, if it may be so called, of Paul and Silas at Philippi was held before the *duumviri*, or, as they are called, *στρατηγοί*, prætors, on the charge of innovation in religion—a crime punishable with banishment or death (Acts xvi, 19, 22). See SERGEANT.

4. The interrupted trial of Paul before the proconsul Gallio was an attempt made by the Jews to establish a charge of the same kind (Acts xviii, 12-17, see Conybeare and Howson, i, 492-496).

5. The trials of Paul at Cæsarea (Acts xxiv, xxv, xxvi) were conducted according to Roman rules of judicature, of which the procurators Felix and Festus were the recognised administrators. (1.) In the first of these, before Felix, we observe (a) the employment by the plaintiffs of a Roman advocate to plead in Latin [see ORATOR]; (b) the postponement (*ampliatio*) of the trial after Paul's reply (see Smith, *Dict. of Class. Antig.* s. v. "Judex"); (c) the free custody in which the accused was kept, pending the decision of the judge (Acts xxiv, 23-26). (2.) The second formal trial, before Festus, was probably conducted in the same manner as the former one before Felix (xxv, 7, 8), but it presents two new features: (a) the appeal, *appellatio* or *provocatio*, to Cæsar by Paul as a Roman citizen. The right of appeal *ad populum*, or to the tribunes, became, under the empire, transferred to the emperor, and, as a citizen, Paul availed himself of the right to which he was entitled, even in the case of a provincial governor. The effect of the appeal was to remove the case at once to the jurisdiction of the emperor (see Conybeare and Howson, ii, 360; Smith, *ut sup.* s. v. "Appellatio;" *Digest*, xlix, 1, 4). (b) The conference of the procurator with "the council" (Acts xxv, 12). This council is usually explained to have consisted of the assessors, who sat on the bench with the prætor as *consilarii* (Sueton. *Tib.* 33; Grotius,

On *Acts* xxv; Conybeare and Howson, ii, 358, 361). But, besides the absence of any previous mention of any assessors (see below), the mode of expression *συλλαλήσας μετὰ τοῦ συμβουλίου* seems to admit the explanation of conference with the deputies from the Sanhedrim (*τὸ συμβ.*). Paul's appeal would probably be in the Latin language, and would require explanation on the part of the judge to the deputation of accusers before he carried into effect the inevitable result of the appeal, viz. the dismissal of the case so far as they were concerned. See PAUL.

6. We have, lastly, the mention (*Acts* xix, 38) of a judicial assembly which held its session at Ephesus, in which occur the terms *ἀγοραῖοι* (i. e. *ἡμέραι*) *ἀγούνται* and *ἀνδύπατοι*. The former denotes the assembly, then sitting, of provincial citizens forming the conventus, out of which the proconsul, *ἀνδύπατος*, selected "judices" to sit as his assessors. The *ἀνδύπατοι* would thus be the judicial tribunal composed of the proconsul and his assessors. In the former case, at Cæsarea, it is difficult to imagine that there could be any conventus and any provincial assessors. There the only class of men qualified for such a function would be the Roman officials attached to the procurator; but in Proconsular Asia such assemblies are well known to have existed (Smith, *Dict. of Class. Antig.* s. v. "Provincia").

Early Christian practice discouraged resort to heathen tribunals in civil matters (1 Cor. vi, 1). See PUNISHMENT.

#### Trial Sermon. See TRIALS.

**Trials**, the name given in ecclesiastical diction to those discourses delivered before the presbytery by students who have finished their course, and are seeking to be licensed to preach. These discourses are a sermon, a lecture, a homily, an exegesis or exercise with additions, and a thesis. There are also examinations on systematic theology and practical piety, on Church history, and on the Greek and Hebrew Scriptures.

**Triangle Controversy.** This was a dispute occasioned by *The Triangle*, a book by Samuel Whelpley (1816) against limited atonement, inability, and immediate imputation. The controversy led to the trial of Albert Barnes and of Lyman Beecher for alleged heresy, and finally to the disruption of the Presbyterian Church in 1837. See Hagenbach, *Hist. of Doct.* ii, 442.

**Tribe** (טִּיבֵּה וְטִיבֵּה, both originally meaning a rod or branch; φυλή) is the name of the great groups of families into which the Israelitish nation, like other Oriental races, was divided. The modern Arabs, the Bedawin, and the Berbers, and also the Moors on the northern shores of Africa, are still divided into tribes. The clans in Scotland are also analogous to the tribes of the ancient Israelites. The division of a nation into tribes differs from a division into castes, since one is a division merely according to descent, and the other superadds a necessity of similar occupations being prevalent among persons connected by consanguinity. There occurs, however, among the Israelites a caste also, namely, that of the Levites. In Gen. xlix the tribes are enumerated according to their progenitors; viz. 1, Reuben, the first-born; 2, Simeon, and 3, Levi, instruments of cruelty; 4, Judah, whom his brethren shall praise; 5, Zebulun, dwelling at the haven of the sea; 6, Issachar, the strong; 7, Dan, the judge; 8, Gad, whom a troop shall overcome, but who shall vanquish at last; 9, Asher, whose bread shall be fat; 10, Naphtali, giving goodly words; 11, Joseph, the fruitful bough; 12, Benjamin, the wolf: all these were originally the twelve tribes of Israel (see Allin, *Prophecies of the Twelve Tribes* [Lond. 1855]). In this enumeration it is remarkable that the subsequent division of the tribe of Joseph into the two branches of Ephraim and Manasseh is not yet alluded to. After this later division of the very numerous tribe of Joseph into the two branches of Ephraim and Manasseh had taken place, there were, strictly speaking, thirteen tribes. It was, however, usual to view them as

comprehended under the number twelve, which was the more natural, since one of them, namely, the caste of the Levites, did not live within such exclusive geographical limits as were assigned to the others after they exchanged their nomadic migrations for settled habitations, but dwelt in towns scattered through all the other twelve tribes. It is also remarkable that the Ishmaelites, as well as the Israelites, were divided into twelve tribes; and that the Persians also, according to Xenophon (*Cyropædia*, i, 2, 4 sq.), were similarly divided. Among other nations also occur ethnological and geographical divisions, according to the number twelve. From this we infer that the number twelve was held in so much favor that, when possible, doubtful cases were adapted to it. An analogous case we find even at a later period, when the spiritual progenitors of the Christian *δωδεκάφυλον*, or the apostles, who were, after the death of Judas, the election of Matthias, and the vocation of Paul, really thirteen in number, were, nevertheless, habitually viewed as twelve; so that wherever, during the Middle Ages, any division was made with reference to the apostles, the number twelve, and not thirteen, was adopted, whether applied to the halls of theological libraries, or to the great barrels of costly wines in the cellar of the civic authorities at Bremen. Concerning the arrangement of these tribes on their march through the wilderness, in their encampments around the ark, and in their occupation of the land of Canaan, see the cognate articles, such as EXODE; ENCAMPMENT; GENEALOGIES; LEVITES, WANDERING; and the names of the several tribes. We confine ourselves here to two points.

1. *The "Lost Tribes."*—This has been an inexhaustible source of theologico-historical charlatanism, on which there have been written so many volumes that it would be difficult to condense the contradictory opinions advanced in them within the limits of a moderate article. Suffice it to say that there is scarcely any human race so abject, forlorn, and dwindling, located anywhere between the Chinese and the American Indians, who have not been stated to be the ten tribes which disappeared from history during and after the Babylonian captivity. If the books written on the ten tribes contained much truth, it would be difficult to say where they are not.

The truth, however, of the matter seems rather to be as follows. After the division of the Israelites under Jeroboam and Rehoboam into the two kingdoms of Judah and Israel, the believers in whom the feelings of ancient theocratic legitimacy and nationality predominated, and especially the priests and Levites, who were connected by many ties with the sanctuary at Jerusalem, had a tendency to migrate towards the visible centre of their devotions; while those members of the tribes of Judah and Benjamin who had an individual hankering after the foreign fashions adopted in Samaria, and the whole kingdom of Israel, had a tendency externally to unite themselves to a state of things corresponding with their individuality. After the political fall of both kingdoms, when all the principal families connected with the possession of the soil had been compelled to emigrate, most Israelites who had previously little feeling for theocratic nationality gradually amalgamated by marriages and other connections with the nations by which they were surrounded; while the former inhabitants of the kingdom of Judah felt their nationality revived by the very deprivation of public worship which they suffered in foreign lands. Many of the pious members of those tribes which had formerly constituted the kingdom of Israel undoubtedly joined the returning colonies which proceeded, by permission of the Persian monarchs, to the land of their fathers. However, these former members of the other tribes formed so decidedly a minority among the members of the tribe of Judah that henceforth all believers and worshippers of Jehovah were called יְהוּדִים, *Ioudaioi*, *Judæi*, Jews. Thus it came

to pass that the best, although smaller, portion of the ten tribes amalgamated with the Jews, some of whom preserved their genealogies till after the destruction of Jerusalem; while the larger proportion of the ten tribes amalgamated with the Gentiles of Central Asia, to whom they probably imparted some of their notions and customs, which again were, in a state more or less pure, propagated to distant regions by the great national migrations proceeding from Central Asia. We are glad to find that this, our historical conviction, has also been adopted by the most learned among the Jews themselves (see Jost, *Allgemeine Geschichte des israelitischen Volkes* [Berlin, 1832], i, 407 sq., 416 sq.). See CAPTIVITY.

II. *Boundary-lines of the Tribes Identified.*—This topic has usually been abandoned by commentators as hopeless. Keil (*Comment. on Josh.*) is really the only one who has seriously grappled with its difficulties, some of which even he is compelled to pronounce insoluble. See each tribe in its alphabetical place.

1. *Reuben.*—On the south, being the southern boundary of the trans-Jordanic tribes, beginning at the mouth of the river Arnon (Wady el-Möjeb) on the Dead Sea; thence along the Arnon to Aroer (Ar'ir) (Josh. xiii, 16); thence along the south-eastern boundary of the trans-Jordanic tribes (which extended as far as the "plain" or tableland stretching eastward from Jordan [xii, 1], being that containing Medeba and Dibon [xiii, 9]) north-easterly along the Wady Enkheleth to Lejdin; thence along the eastern boundary of the trans-Jordanic tribes (east of the ruins of El-Herr) with an inclination west of north so as to exclude Jazer (ver. 26) (Seir), also Rabbath-ammon (2 Sam. xi, 1) (to a point below Jebelha which was excluded, probably being the Jogbehah of the Gadites, Numb. xxxii, 35); thence entirely south of Gilead (Josh. xiii, 25) (directly west, down the wadies Nann and Heban), excluding Beth-haran (Belt-haran) (ver. 27) and Atroth-shophan (near Merjakkeh) (Numb. xxxii, 35), but including Heshbon (Heshban), Elealeh (El-'Al), Bamoth (comp. xxi, 19, 20) (probably Jebel Humeih), and Nebo (now discovered in Jebel Neba) (xxxii, 37; Josh. xiii, 17); thence southerly along the Jordan to the place of beginning (ver. 28).

2. *Gad.*—On the south, following the northern line of Reuben from the Jordan to the eastern boundary of the trans-Jordanic tribes (at Jebelha); thence north by east along the eastern boundary of the trans-Jordanic tribes (around the northern brow of Jebel Zerka) (to a point opposite Jerash [Gerasa] between Jebel Zerka and Jebel Kafkafka); thence in a north-westerly direction across the region of Gilead (Josh. xiii, 25, 31), passing near Mahanaim (ver. 26, 30) (Mahnneh), to the southern extremity of the sea of Cinnereth (sea of Galilee) (ver. 27), with the Jordan for the western boundary.

3. *Manasseh East.*—On the south, following the northern line of Gad to its intersection with the eastern boundary of the trans-Jordanic tribes (at the opening of the valley between Jebel Zerka and Jebel Kafkafka, with the plain lying east of the latter); thence north-easterly along the boundary of the trans-Jordanic tribes (in a direct line across the last-named plain, over the northern end of Jebel es-Zumle, and partly across the plain of the Hauran), and again along the same boundary with a northerly and north-westerly curve through the plain of Bashan (Josh. xiii, 30) (i. e. the Hauran), so as to include Edrei (which may be Draa or Dera) (ver. 31), and so on north-westerly to the vicinity of Mount Hermon (ver. 11) (i. e. Jebel esh-Sheikh, where the northern line probably followed the present boundaries of the Arab clans along the top of the Hermon range to its junction with Wady el-Teim at Hasbelyah); where it joined the northern boundary of the cis-Jordanic tribes at the "entrance into Hamath" (Numb. xxxiv, 8); thence southerly along the sources of the Jordan (down Nahr el-Banias and its brook), through the lake of Merom, the upper Jordan, and the sea of Galilee, to the place of beginning (ver. 10-12).

4. *Judah.*—On the south, the southerly boundary of Canaan, beginning on the border of Edom, at the southern bay of the Dead Sea, southward along the Ghor past the ascent of Acrabbim, near the desert of Zin (the Wady el-Jelb or the Arabah), to the vicinity of Kadesh-barnea (Ain-weibeh or Ain-hashb) (Josh. xv, 1-8; Numb. xxxiv, 2-4); thence westward to Hebron, along the southern boundary of Canaan (perhaps through Wady Fikreh) (where we may assign a location) to Adar of Hazar-addar; thence westerly around (perhaps by wadies Maderah and Marreh) to Karkaa (perhaps in this latter), then still westerly to Azmon (possibly in the vicinity south of the ancient Elusa); thence north-westerly (perhaps by Wady en-Abiya) to "the river of Egypt" (or El-'Arish), and so on to the Mediterranean, which formed the western boundary of Palestine (Josh. xv, 8, 4, 12; Numb. xxxiv, 4, 6). See

*Quar. Statement of "Pal. Explor. Fund," p. 68 sq.; April, 1874, p. 68, 82; July, 1874, p. 190.*

On the north, beginning at the northern bay of the Dead Sea (which formed the eastern boundary), where the Jordan empties into it (see this whole line in Josh. xv, 5-12, and inversely in xviii, 14-20); obliquely across the plain of the Jordan to Beth-hoglah (Ain-hajla), thence to Beth-arabah (at first included, but afterwards excluded) (hence situated probably at the present Kfar Hajla); thence to the stone of Bohan (apparently very near the last place, and on the eminences in the side of Wady Dabur); thence (westerly) in the direction of Debir (which must therefore be placed on the west side of Wady Dabur [near its head], which last the boundary crossed, as expressed by coming) from the valley of Achor, thence northward towards Gilgal or Gellitho (which is explained as being in front of the ascent to Adummim (apparently lying on the hills skirting the Jordan just west of Gilgal, to which the access would be by the valley on the south side of Jebel el-Fasqa; Adummim [probably at ed-Dem near es-Snmeh] being further described as lying on the south side of the "river," probably Wady Kelt); thence to the waters of En-shemesh (probably the "fountain of the apostles," on the road between Bethany and Jericho); thence (across the Mount of Olives by way of Bethany) to En-rogel (the well of Job near Jerusalem); thence around the valley of Hinnom (but at a later date across Mount Moriah, which David purchased, and north of Jebus, which he conquered, and thus acquired both for Judah), through the valley of Gilion to the hill at its north-western end, bounding the plain or valley of Rephaim west of the city; thence along the ridge of this elevated plain or "hill" to the fountain of Nephtoi (probably Ain Yalo in Wady el-Werd, which last it probably followed after crossing the "giants' plain;" for it must have bent considerably to the south, since it passed near Rachel's sepulchre, now Kubbet Rihil, between Jerusalem and Bethlehem [1 Sam. x, 2]); thence in the direction of Mount Ephron (lying considerably northward of this vicinity, although among its "cities" may properly have been reckoned Kirjath-jearim; this line being probably carried through Wady Blith, then by Wady Safat, due north) to Kirjath-jearim (otherwise Balaah or Kirjath-baal) (now Kuryet el-Euab); thence west (across the intervening valley occupied by the Beni-melik in the direction of Yalo) to the ridge of Seir (perhaps indicated by the modern Sarle); thence (south-westerly along this mountain) to a more southern spur called Mount Jearim (just across Wady Ghûrah), where is located (Kesla, the representative of Chesalon (or Chesulloth)); thence (still keeping south-westerly along the same range of hills, between Zanoah [Zanûn], and Zorah [Sûra], the last of which was afterwards assigned to Dan, with several other cities on this part of the boundary [Josh. xix, 41 sq.]) to En-shemesh (or Ir-shemesh) (now Ain-shems); thence (a little south of Wady Surar near Timnath [Tibneh] and Ekron ('Akir) (the last three towns being finally reckoned as belonging to Dan), and so on to the Mediterranean, passing successively Shicron (perhaps Beit-sit), next Mount Balaah (possibly Tell Hermes), and finally Jabneel (elsewhere Jabneh [now Yebna]) (but eventually deserting the Nahr Rabin a little beyond its junction with Wady Marubah, and running thence south-west so as to include Gederah [Gheterah], but exclude Jabneh and Bene-berak [Burka], reaching the sea by Wady Sumt).

Of Judah only are there any distinct and regular subdivisions given (for Keil's arrangement of the towns of Simeon in four groups according to Josh. xv, 21-32 [Comment. ad loc.] is not justified by the parallel passage [Josh. xix, 2-9], nor by the analogy of enumeration in the case of the other subdivisions of Judah [xv, 33-42] and Benjamin [xviii, 21-28], nor with the Masoretic punctuation ["and"] being omitted only between different designations of the same locality), nor, finally, with the actual juxtaposition of the sites). The southernmost section (stretching apparently entirely across from the Dead Sea to the Mediterranean) constituted the territory of Simeon, including (as appears from a comparison of Josh. xv, 21-32 with xix, 1-5) twenty-nine (strictly twenty-six) cities (namely, Kabzeel, Eder, Jazur, Kinah, Dimonah, Adadah, Kedesh [Kadesh-barnea], Hazor, the twofold town Ithnan-Ziph [Zephath] with its neighboring ruins, Hormah [Hazar-addar], Telem, Shema, or Sheba [Hazar-shual], Moladah, Hebron [Azmon], Beth-palet, Beer-sheba, the twin-towns Bealoth or Balah [Ramath-nekeb] and Bizjath-jah-balaah or Balaath-beer [Lehi], Iim, Azem, Etolad, Chesil or Bethul, Ziklag, Madmanah or Beth-marcaboth, Sansannah or Hazar-usnah, Lebathoth or Beth-lebathoth, Shilhim or Sharuhen, and the double town Ain-rimmon or Ein-rimmon), besides three villages dependent upon two of these (namely, Hazor-hadathah and Kerioth-hezron or Hazor-amam [belonging to Hazor proper], and Hazor-gaddah [to Hazar-shual]), and in addition two of the towns in the plain (namely, Ether and Ashan), with others doubtless not here enumerated. The plain district or "valley" was again subdivided into four sections—the first comprising (originally) fourteen towns (Gederah and Gederothaim being the same), situated in the north-western corner of the tribe; the second comprising sixteen towns, situated immediately south of this, in the western part of the tribe;

the third comprising nine towns (two of which, as above, were afterwards set off to Simeon, doubtless lying on the southern boundary between the tribes), situated east of the last group and south of the preceding, in the middle of the tribe, east of the road leading from Eleutheropolis to Jerusalem; the fourth comprising the five principal Philistine towns, situated on the extreme west of the tribe along the Mediterranean coast (Ekron being really in Dan, and Gath-mizpeh in the "valley"). The highland district, or "mountains," was likewise subdivided into five groups—the first containing eleven chief towns, situated along the border of Simeon in the middle; the second containing nine chief cities, situated immediately north of the foregoing in the southern part of the tribe around Hebron; the third containing ten metropolitan towns, situated immediately east of the two preceding; the fourth embracing six principal cities, situated immediately north of the last two groups, as far as Jerusalem, on the northern boundary; and the fifth containing only two metropolitan towns, situated in the northern medial angle between the last-named group and the valley district. The remaining districts embraced the desert tract or "wilderness" along the Dead Sea, and included six chief towns (Beth-arabah being in Benjamin). The remarkable addition in the Septuagint (at ver. 59) of eleven cities (namely, Tekoa, Bethlehem, Phagor, Etam, Kulon, Tatum, Saris, Karem, Gallim, Bether, and Menuchah), probably real localities (see each in its place), is perhaps entitled to a place in the genuine text, and would indicate a group between the third and fourth above, reaching to Jerusalem (Kulon, Saris, and Gallim being in Benjamin).

5. *Simeon*.—This tribe had a portion set off from the above bounded territory of Judah (Josh. xix, 1-8), embracing some seventeen or twenty cities (according as we make several in the list identical or different), of which only two or three have been located with any degree of definiteness, namely, Beer-sheba (probably Bir-es-Saba), Moladah (perhaps el-Mil), and Hormah (or Zephath, possibly represented by the pass es-Sufa); this much only is evident, that they all lay on the extreme south of Judah, and we shall therefore probably be not far from correct if we draw the dividing line between Judah and Simeon west by north from the Dead Sea at Massada, up Wady Sebbek, thence across in the same direction from Ehdet, just south of Arad (Tell Arad) and Jattir ('Attir), to the junction of Wady Khamelifeh with Wady Khulil; thence still in the same direction up the former of these wadies to the summit of the mountains of Judah; thence west by south (along Wady Sherlah) to the Mediterranean, a short distance south of Gaza (Ghuzzeh).

6. *Benjamin*.—On the north, following the boundary of Ephraim (Josh. xvi, 1-3, 6, 7; xviii, 11-13), beginning at the Jordan opposite Jericho (probably at the mouth of Wady Nuwameh); thence (across the plain of the Jordan along this wady) to the northward of Jericho (ver. 12) (so as to include Zemaraim [es-Sumrah], ver. 22); thence northward (ver. 12) by the water east (i. e. north-east) of Jericho (xvi, 1) (perhaps Ras el-Ain, which discharges its water in that direction) through the mountains (xviii, 12) desert (xvi, 1) of Beth-aven (Beni-salim) (xviii, 12), that extends from Jericho to the hilly region of Beth-el (xvi, 1)—a description that appears to apply as well as any to the plain north-west of Jebel Knuutil (Mt. Quarantania), the northern part of which the line would partly traverse, so as to include (xviii, 23, 24) Ophrah (perhaps et-Tayibeh) and Ophni (probably Jifta) (probably up Wady el-Anjeh as it ascended Wady Habis, passing Naarah (xvi, 7, Naarah-Naaron) on the way, which lay east of Beth-el (1 Chron. vii, 28) (perhaps at el-Nejweih); from Bethel (now Beitlu) (which, being included in Benjamin, the expression "to the side of Luz southward" [Josh. xviii, 13] must be interpreted as indicating that the line ran between Beth-el on the south and the ancient site of Luz a little to the north, the two spots being distinguished in Josh. xvi, 2, although occupying the same vicinity) the line passed (directly south-west along the Nabulus road, west of Bireh [Beeroth]), passing Archi (situated perhaps at the ruined Kefr-muser) (xvi, 2) to Ataroth (called also Ataroth-adar or Ataroth-addar), in a lower spot near the hill on the south side of Beth-horon the lower (xviii, 15), yet with some interval to the east of this last place (xvi, 3), and at the southern extremity of this part of the line between Ephraim and Benjamin (that faced the east), not far from Beth-horon the upper (ver. 5), and west of Naarah on that part of the same line near the Jordan (i. e. facing the south) (ver. 7); indications that all point to some site (for but one place of the name seems to be designated, since these descriptions [ver. 5, 6 last clause, 7] are all of parts of the same southern boundary of Ephraim [the first two clauses of ver. 6, and the whole of ver. 8, however, refer to the northern border, as Kell, in his *Comment.*, admits, although he confesses himself unable to clear up the difficulties of the passage], reckoned first [ver. 5, 6 last clause] westward to Beth-horon, and thence back again [ver. 7] more minutely over the same line and eastward to the Jordan) directly east of Beth-horon (doubtless the Atara, whose ruins are still found at this point, a little north of the road from Jaffa to Jerusalem; and in that case we must locate "the hill south of Beth-horon the nether" among the eminences opposite Beit Ur el-Tahta, on the

south side of Wady Suleiman, through which this road runs); from Ataroth the line ran south-westerly along the Wady Suleiman, so as to include Chephirah (xviii, 26) (probably Keffir, near this road), opposite the hill above described (ver. 14, where the expression rendered "compared the corner of the sea" appears to signify [as some copies of the Sept. translate] a bend from a seaward [i. e. westerly] direction), and again south-easterly to Kirjath-jearim (thus forming the western side), where it joined the boundary of Judah, which it followed back to the Jordan, and so up to the point of beginning.

The towns of this tribe enumerated in Josh. xviii, 21-28 appear to be classed under two general sections—the twelve in ver. 21-24 lying north and east of Jerusalem, while the fourteen others occupy the more southern and western portion of the territory. At least one of these cities, Kirjath-jearim, was really (eventually) within the limits of the adjoining tribe, Judah (Judg. xviii, 12).

7. *Dan*.—This tribe was bounded by the Mediterranean on the west, and by the tribes of Judah on the south, Benjamin on the east, and Ephraim on the north. (The Danites also conquered from the Canaanites Leshem or Laish, in the extreme northern part of Palestine, within the bounds of Manasseh east, and retained it under the name of Dan.) The only portion unidentified is the northern boundary, which will be considered under Ephraim.

8. *Ephraim*.—The Mediterranean was the western and the Jordan the eastern boundary. The southern boundary has been already defined from the Jordan westward as far as Ataroth; from this point it passed westward (to the Jaffa road), in the vicinity of Japhleti (perhaps situated at Beit-Ua; but this word should probably be rendered "the Japhletites," i. e. family of Japhlet, a descendant of Asher [1 Chron. vii, 32, 33], although it is difficult to explain their existence in this location), to Beth-horon the nether (Josh. xvi, 8); thence more northerly (i. e. in a general north-westerly direction) to the Mediterranean (probably along the Jaffa road to Wady Budrus, and thence north on the western brow of the hills to Wady el-Anjeh, which it may naturally have followed westward to the sea; for it excluded Balaith [Balaht], Jehud [Yehudieh], and Japho [Joppa], xix, 44, 45, but included Beth-horon and Gezer [Abu-churheh], xxi, 21, 22), passing on the way Gezer (xvi, 8) west of Beth-el (1 Chron. vii, 28) [the other passages where it is mentioned do not help to fix the locality more definitely]; lately thought to have been found in Tell Jazer. The remainder of the description of the southern boundary (Josh. xvi, 5, last clause of 6, and whole of 7) is the same as that of Benjamin on the north.

The northern boundary (the account in Josh. xvi, 7, with the exception of the first name, must be transposed so as to connect immediately with the description of the south border in ver. 5), beginning at the Jordan (probably at the mouth of Wady Fual), passed westward (up this wady, otherwise called Wady Mudadreh, or Burshek) to Taanath-shiloh (ver. 6) (probably the present Ain-Faria); thence north-westerly to Tappuah (xvii, 7) (probably the Belad el-Taffne [or Atuf] mentioned by some travellers east of Shechem); thence northerly to Michmethah (xvi, 6; xvii, 7) (apparently at the intersection of the line with Wady Tubas); thence, with a north-westerly curve, to Asher (ibid.) (probably represented by the modern Yasir); thence the line is only given in general terms as extending to the river Kanah on the Mediterranean (xvi, 8; xvii, 9) (no doubt the present Nahr-Falaik, which is the principal marshy stream in that region).

9. *Manasseh West*.—The boundaries of this tribe are given with great indistinctness, and must be in part collected from the contiguous portions of Ephraim, Asher, and Issachar, from which certain towns were set off in addition to its proper territory (Josh. xvii, 11). From the Mediterranean, the northern boundary, beginning at Carmel (for Dor, below Carmel, is included [ibid.: xix, 26]), and following the edge of the mountain (probably along the Kishon [Nahr-el-Mukattah]) south-easterly (as far as Jokneam [Tell-el-Kaimon]), and thence keeping the mountain more closely so as to throw the plain of Esdraclon entirely within Issachar (Gen. xlix, 15), so as to include (Josh. xvii, 11) Megiddo (Lejjun), Taanach (Ta'anuk), but so as to exclude (xix, 21) En-gaunim (Jeuin); thence with a sharp curve due north (on the west brow of Mts. Gilboa and Little Hermon), so as to include En-dor (Endur) (xvii, 11), but not Jezreel (Zerlu), nor Cheeniloth (Ikssal), nor Shunem (Solam) (xix, 18), nor Tabor (ver. 21): thence (with another sharp curve) south-east (probably down Wady Oskeh), so as to include Beth-shean (Beisan) (xvii, 11), to the Jordan, which formed the eastern boundary.

10. *Issachar*.—This tribe was hemmed in on the south by Manasseh West, on the west by Asher, and on the north by Zebulun, leaving only the Jordan as a natural boundary on the east (Josh. xix, 22).

11. *Zebulun*.—In Jacob's dying blessing (Gen. xlix, 13), the territory of this tribe is prophetically described as being suitable for maritime purposes, and as extending along a sea as far as Sidon, which must be explained as meaning that it reached Phœnicia, through which latter seafaring people a communication was kept up through the river Kishon and the harbor at Carmel. In Josh. xix, 10-15, the boundaries are definitely laid down thus: Be-

ginning at a place called Sarid, which is nowhere else mentioned in Scripture, but which is here described as situated eastward from the Mediterranean, with high country intervening, one or two stations distant from the river before Jokneam (doubtless the Kishon), also as situated west of Chisloth-tabor, and beyond (i. e. south of) Daberath and Japhia, and finally on the southern boundary (for the northern line is subsequently described); all which details point to some spot about midway on the northern side of the plain of Esdraelon (probably the ruins on the "Mount of Precipitation," near el-Mezraah, on the north-west); thence westward ("towards the sea"), passing Maralah (perhaps at Mujeidil) and Dabbabeheth (perhaps the present Jebata), to the Kishon opposite Jokneam (probably Tell el-Kurnon); then returning to Sarid, and passing northerly in the general direction of Chisloth-tabor (Iksail) and Daberath (Deburih) (leaving these in Issachar), so as on the way to include Japhia (Yafa) (situated on higher ground); thence (northward) facing the east to Gittah-hepher (or Gath-hepher, 2 Kings iv, 25) (at el-Meshad) (included within Zebulun) and Itah-kazin (perhaps the modern Kefr Kenna); finally (as regards the southern line) extending (due north) in the direction of Rimmon that pertains to Neah ("Rimmon-methor to Neah") (the former answering doubtless to Rumaneh and the latter possibly to Nimrin, the names apparently being associated as adjacent) (and excluding both these, as will appear presently, so as to meet the line of Naphtali in Aznoth-tabor (apparently Kurn Hattin) (Josh. xix, 34). After this the description applies to the northern boundary (for the expression "compasseth it [Rimmon] on the north side" cannot mean that the southern border passed to the north of Rimmon, as this place belonged to Zebulun [1 Chron. vi, 7, which likewise includes Tabor, i. e. apparently Hattin, in the same tribe]), which does not appear to have extended to the Sea of Galilee (since the northern border of Issachar terminated at the Jordan [Josh. xix, 22], and the border of Naphtali, as it included various towns on the southern end of the shore [ver. 35; Matt. iv, 13], as well as Aznoth-tabor [Josh. xix, 34], must have passed up to this last point not far from the Wady Beadun, turning with a north-westerly sweep) so as to exclude (ibid.) Hukkok (Yakok), and, passing (apparently west) along Wady Selameh, so as to include Haimnethon (perhaps Deir Hannah), and running (south-west) to the valley of Jiphthah-el (probably marked by the modern Jefat), where it met the border of Asher (ver. 37).

In the enumeration of the border and interior towns of this tribe (Josh. xix, 10-15), twelve metropolitical cities only are counted, six others (Maralah, Jokneam, Chisloth-tabor, Daberath, Itah-kazin, and Jiphthah-el) being situated outside the boundary line.

12. *Asher*.—The description of the boundary (Josh. xix, 24-30) begins with a general statement of several towns—Heikath (perhaps Ukreth), Hali (perhaps Alia), Beten (perhaps el-Baneh), Achshaph (probably Kesaf), Alam-melech (probably some place on the Wady el-Melek), Amad (perhaps Shefu-amar), and Mihal (probably Misaili)—as lying near the border, which, crossing Carmel, reached to Shihor-libnath (perhaps Wady Milheh), just above Dor (see xvii, 11), leaving in Naphtali the city of Heleph (probably Beitlilif); then returning eastward the same line, passing Beth-dagon (probably Hajeb) and the city of Zebulun (now Alidin) as far as Jiphthah-el, pursued this last valley northward past Beth-emek and Neiel, leaving Cabul (Kabul) on the north, and, including several cities generally described (Hebron [i. e. Abdou], Rehob, Hammon, and Kanah), ran east of north (doubtless so as to strike the Litany), and then was continued as the northern boundary about opposite Sidon, where (without including the Phœnician sea-coast) it turned south-westerly (as the western border) past Tyre as far as Achzib (Zib).

In the recapitulation of the cities of this tribe (Josh. xix, 25-30), twenty-two metropolitical towns only are reckoned, three others (Jiphthah-el, Sidon, and Tyre) being outside the border, and two other names (Carmel and Shihor-libnath) not being towns.

13. *Naphtali* was bounded by Issachar, Zebulun, and Asher on the south and west, and extended as far as Mount Hermon on the north, and eastward by the sea of Galilee, the Jordan, sea of Merom, and the Damascus road, extending to Judah-upon-Jordan (Tell Naby Sidi-hnda), and including Beth-shemesh (Medjel es-Sheims) (Josh. xix, 22). The northerly limits of this tribe are stated in the general boundaries of Palestine (q. v.), laid down in Numb. xxxiv, 7-11, as follows: A line from the Mediterranean Sea crossing the mountain-range (Lebanon, or its offshoot Hermon), and intersecting the "entrance to Hamath" (Coele-Syria or the valley of the Leontes) apparently at Zedad (perhaps the present Jeddeth); thence to Ziphron (probably another place in the same valley [possibly Kankah]), and so by way of Hazer-euan (perhaps Hasbeyn) to the edge of the Hauran. From Hazer-euan, the northern boundary bent southward (so as to form in part the eastern boundary), so as to follow substantially the eastern arm of the upper Jordan, taking in successively Sheplam (perhaps Cesarea-Philippi; comp. Baal-gad in Josh. xi, 17) and Riblah (not the Riblah of Hamath, but a much more southerly place), east of Ain

(perhaps the spring of Tell el-Kady), and so on down to the sea of Galilee. The account in Ezek. xlvii, 14-17 (which is evidently a copy of that in Numbers) contains the following additional names: Hethlon, Berothah, Sib-ram, and Hazer-hatticon, which (at least the middle two), from their association with Hamath, appear (in this vague enumeration) to have been situated beyond the bounds of the Oriental Promised Land altogether.

In the sum of the cities enumerated in connection with this tribe, nineteen metropolitical towns only are included, five of the names (Allon-zaanaim, Adami-nekeb, Ziddimzer, Hammath-rakkath, and Migdal-el-Horem) being double, and two others (Aznoth-tabor and Judah-upon-Jordan) lying outside the border. See PALESTINE.

**Tribōlos.** See THORN.

**Tribulation** (Τῆς θλίψεως, both literally signifying *pressure* or *straits*) expresses in the A. V. much the same as *trouble* or *trial*, importing afflictive dispensations to which a person is subjected either by way of punishment (see Judg. x, 14, Matt. xxiv, 21, 29; Rom. ii, 9, 2 Thess. i, 6) or by way of trial (see John xvi, 33; Rom. v, 3; 2 Thess. i, 4).

**Tribur** (*Concilium Triburense*), COUNCILS OF. Tribur was a royal residence near Mayence, where several Church councils were held.

I. The first council was held in 895. Twenty-two bishops were present, including Hatho, archbishop of Mayence; Herman, archbishop of Cologne; and Ratbode, archbishop of Treves. King Arnulphus also attended, with many of the chief lords of his kingdom. Fifty-eight canons were published.

8. Declares that, with the king's consent, it is ordered that all his nobles shall seize those who refuse to perform the penance due to their offences, and bring them before the bishop.

4. Regulates the manner of disposing of the pecuniary mulct inflicted for wounding a priest: if the latter survived, the whole belonged to him; if he died, it was to be divided into three parts, one for his church, one for his bishop, and one for his relations.

5. Imposes five years' penance for killing a priest, during which time the penitent might not eat meat nor drink wine, except on Sundays and festivals. At the end of the five years he might be admitted into the Church, but not to communion, until the expiration of other five years, during which he was to fast three days in the week.

10. Renews the canon of the Council of Carthage which enacts that a bishop shall not be deposed by fewer than twelve bishops; a priest by fewer than six; nor a deacon by fewer than three.

12. Restricts the solemn celebration of baptism to Easter and Whitsunide.

13. Orders the division of tithes into four portions: 1, for the bishop; 2, for the clerk; 3, for the poor; and, 4, for the fabric.

15. Orders that the dead be buried, if possible, at the cathedral church; if not, at the church belonging to a monastery, in order that they might benefit by the prayers of the monks; otherwise in the church to which they pay tithe.

16. Proves from Scripture that no fee may be taken for burials.

17. Forbids to bury laymen within the church.

18. Forbids chalices and patens of wood.

19. Orders that water be mixed with the wine in the chalice, but that there be twice as much wine as water.

30. Orders all due respect to the see of Rome, and enacts penalties against those who cause the death of Christians by enchantments.

See Mansi, *Concil.* ix, 438.

II. The second council convened in October, 1076. The pope's legates, with several German lords and some bishops, assembled in council, debated concerning the deposition of the emperor Henry IV, in consequence of which he passed into Italy, and, after the most humiliating concessions, obtained absolution from the pope, Jan. 25, 1077. See Mansi, *Concil.* x, 355.

**Tribute** (prop. δῶν, φόρος), an impost which one prince or state agrees, or is compelled, to pay to another, as the purchase of peace or in token of dependence. In the Scriptures we find three forms of this requirement. See TAX.

I. *Native*.—The Hebrews acknowledged no other sovereign than God; and in Exod. xxx, 12, 15, we find they were required to pay tribute unto the Lord, to give an offering of half a shekel to "make an atonement for

their souls." The native kings and judges of the Hebrews did not exact tribute. Solomon, indeed, at the beginning of his reign, levied tribute from the Canaanites and others who remained in the land and were not of Israel, and compelled them to hard servitude (1 Kings ix, 21-23; 2 Chron. viii, 9); but the children of Israel were exempted from that impost, and employed in the more honorable departments and offices of his kingdom. Towards the end of his reign, however, he appears to have imposed tribute upon the Jews also, and to have compelled them to work upon the public buildings (1 Kings v, 13, 14; ix, 15; xi, 27). This had the effect of gradually alienating their minds, and of producing that discontent which afterwards resulted in open revolt under Jeroboam, son of Nebat. "Thy father made our yoke grievous," said the Israelites to Rehoboam; "now, therefore, make thou the grievous service of thy father and his heavy yoke which he put upon us lighter, and we will serve thee" (xii, 4). See **ASSESSMENT**.

II. *Foreign*.—The Israelites were at various times subjected to heavy taxes and tributes by their conquerors. After Judæa was reduced to a Roman province, a new poll of the people and an estimate of their substance were taken, by command of Augustus, in order that he might more correctly regulate the tribute to be exacted (Josephus, *Ant.* xvii, 15). This was a capitation-tax levied at so much a head, and imposed upon all males from fourteen, and all females from twelve, up to sixty-five years of age (Ulpian, *Digest. de Censib.* lib. iii; Fischer, *De Numism. Censu*). See **TAXING**.

The Assyrian Tartan, or Chief of Tribute. See **RASSARIS**.

To oppose the levying of this tribute, Judas the Gaulonite raised an insurrection of the Jews, asserting that it was not lawful to pay tribute to a foreigner, that it was a token of servitude, and that the Jews were not allowed to acknowledge any for their master who did not worship the Lord. They boasted of being a free nation, and of never having been in bondage to any man (John viii, 33). These sentiments were extensively promulgated, but all their efforts were of no avail in restraining or mitigating the exactions of their conquerors. See **JUDAS**.

The Pharisees, who sought to entangle Jesus in his talk, sent unto him demanding whether it was lawful to give tribute unto Cæsar or not; but, knowing their wicked designs, he replied, "Why tempt ye me, ye hypocrites?" "Render unto Cæsar the things which are Cæsar's, and unto God the things that are God's." See **PENNY**.

The apostles Peter and Paul severally recommended submission to the ruling powers, and inculcated the duty of paying tribute, "tribute to whom tribute is due" (Rom. xiii, 1-8; 1 Pet. ii, 13).

III. *The Temple Tax*.—The payment of the half-shekel (= half stater = two drachmæ) was (as has been said above), though resting on an ancient precedent (Exod. xxx, 13), yet, in its character as a fixed annual rate, of late origin. It was proclaimed, according to Rabbinic rules, on the 1st of Adar, began to be collected on the 15th, and was due, at latest, on the 1st of Nisan (Mishna, *Shekalim*, i, 7; Surenhusius, p. 260, 261). It was applied to defray the general expenses of the Temple, the morning and evening sacrifice, the incense, wood, showbread, the red heifers, the scape-goat, etc. (Mishna, *Shekal.* loc. cit.; in Lightfoot, *Hor. Heb. on Matt.*

xvii, 24). After the destruction of the Temple it was sequestered by Vespasian and his successors, and transferred to the Temple of the Capitoline Jupiter (Josephus, *War*, vii, 6, 6). See **TEMPLE**.

The explanation thus given of the "tribute" of Matt. xvii, 24, is, beyond all doubt, the true one. To suppose, with Chrysostom, Augustine, Maldonatus, and others, that it was the same as the tribute (*κῆρος*) paid to the Roman emperor (Matt. xxii, 17) is at variance with the distinct statements of Josephus and the Mishna, and takes away the whole significance of our Lord's words. It may be questioned, however, whether the full significance of those words is adequately brought out in the popular interpretation of them. As explained by most commentators, they are simply an assertion by our Lord of his divine Sonship, an implied rebuke of Peter for forgetting the truth which he had so recently confessed (comp. Wordsworth, Alford, and others): "Then are the children (*υἱοί*) free;" Thou hast owned me as the Son of the Living God, the Son of the Great King, of the Lord of the Temple, in whose honor men pay the Temple-tribute; why, forgetting this, dost thou so hastily make answer as if I were an alien and a stranger? This explanation, however, hardly does justice to the tenor of the language. Our Lord had not been present at the preceding Passover, and had therefore failed to pay the tax at the regular time and place. Hence he was waited upon in Galilee for that purpose, with some apprehension, perhaps, on the part of the collectors, that he might excuse himself for some reason, or at least neglect to pay. In his reply he asserts his just claim to exemption, not as an alien, but precisely because he was a member of the theocratic family in the highest sense. He was exempt on the broad constitutional ground that a king's son belongs to the royal household for whom tribute is collected, and not by whom it is rendered. Inasmuch as the tax was for the Temple service, Jesus, who was the son of the Lord of the Temple, could not be required to contribute to that expense. Peter is coupled in the payment, but not in the exemption; at least, not on the same ground precisely; but, if at all, on the general principle of association with the royal family. See **TRIBUTE-MONEY**.

**Tribute-money** (*διδραχμον*), the Temple-tax levied upon all Jews (Matt. xvii, 24), and likewise (*κῆρος*) the money collected by the Romans in payment of the taxes imposed upon the Jews (xxii, 19). The piece shown to our Saviour at his own request (in the latter passage) was a Roman coin, bearing the image of one of the Cæsars, and must have been at that time current in Judæa, and received in payment of the tribute, in common with other descriptions of money. There is no reason to suppose that the tribute was collected exclusively in Roman coins, or that the tribute-money was a description of coin different from that which was in general circulation. See **PENNY**.

As regards the half-shekel of silver paid to the Lord by every male of the children of Israel as a ransom for his soul (Exod. xxx, 13, 15), colonel Leake says "that it had nothing in common with the tribute paid by the Jews to the Roman emperor. The tribute was a denarius, in the English version a penny (Matt. xxii, 17; Luke xx, 24); the duty to the Temple was a didrachmon, two of which made a stater. It appears, then, that the half-shekel of ransom had in the time of our Saviour been converted into the payment of a didrachmon to the Temple, and two of their didrachma formed a stater of the Jewish currency." He then suggests that the stater was evidently the extant "Shekel Israel," which was a tetradrachm of the Ptolemaic scale, though generally below the standard weight, like most of the extant specimens of the Ptolemies; and that the didrachmon paid to the Temple was therefore of the same monetary scale. "Thus," says he, "the duty to the Temple was converted from the half of an Attic to the whole of a Ptolemaic didrachmon, and the tax was nominally raised in the proportion of about 105 to 65;

but probably the value of silver had fallen as much in the two preceding centuries. It was natural that the Jews should have revived the old name shekel, and applied it to their stater, and equally so that they should have adopted the scale of the neighboring opulent and powerful kingdom, the money of which they must have long been in the habit of employing" (Appendix, *Nuismata Hellenica*, p. 2, 3). See DIDRACHM.

**Tricerium** (τρικέρυον), a three-branched taper, so arranged that the wicks of each, though distinct, blend into one flame. With this the Oriental bishops sign the book of the gospels during certain services of the Greek Church.

**Trichotomy** (*threefold division*) is the theory according to which man is divided into three parts—*body, soul, and spirit*. This is thought by many to be the apostolic classification of our nature (1 Thess. v, 23). Generally soul and body are opposed; but spirit, so contrasted, is the highest portion of our nature, allaying it to God, and on which his Spirit works. Soul (in the German sense) is the lower portion, the region of appetite, instinct, and of much besides which we have in common with the lower creation. This idea throws light on many passages of Scripture. The body mediates between the soul and the external world, the soul between the spirit and body, and the spirit between both and God. This view of human nature would have prevailed, had it not been so keenly opposed by Tertullian, and so slighted even by Augustine, and had not Apollinaris adopted it to illustrate his erroneous view of our Lord's nature. He denied spirit, in this human sense, to Christ, but held that its place was occupied by the Divine Spirit. It was held by Luther, as it still is by the more evangelical part of the Lutheran Church. The Reformers, however, did not consider spirit and soul as different substances, but only as different attributes or operations of the same spiritual essence. See SOUL; SPIRIT.

**Tridentine** (*of or belonging to Trent*). The term is applied to the celebrated council of the 16th century, and to that part of the Church Universal which accepts the decrees and canons of the Council of Trent (q. v.).

**Tridentine Profession of FAITH**, or the *Creed of Pius IV.*, is a summary of the doctrines of the Council of Trent, suggested by that council, prepared by a college of cardinals under the supervision of pope Pius IV, and issued by him, Nov. 13, 1564. It consists of twelve articles, including the Nicene Creed (q. v.), and is put in the form of an individual profession and solemn oath. It is required of all Roman Catholic priests, and public teachers in seminaries, colleges, and universities. It is also used for Protestant converts to the Roman Catholic Church, and hence called the "profession of converts." The 10th article reads, "I acknowledge the holy Catholic Apostolic Roman Church as the mother and mistress of all churches; and I promise and swear true obedience to the bishop of Rome as the successor of St. Peter, prince of the apostles, and as the vicar of Jesus Christ." See Latin text in the two papal bulls of Nov. 13 and Dec. 9, 1564, and in Denzinger's *Enchiridion*, p. 292-294; also a history of this creed by Mohlke, *Urkundliche Geschichte der Professio Fidei Tridentinae* (Greifswald, 1822). See TRENT, COUNCIL OF.

**Triennial Visitation**, a visitation which is held once in three years. In England it is the custom to hold episcopal visitations at such intervals.

**Triers**, ECCLESIASTICAL. A parliamentary ordinance was passed in 1654 appointing thirty-eight commissioners to the office of *triers*: they were chosen by Cromwell, and sat at Whitehall. They were mostly Independents, though some Presbyterians were joined with them. They were appointed to try all ministers that came for institution and induction, and without their approval none were admitted. The opinion of Baxter is that they were of essential service to the Church. He says they saved many congregations from ignorant, un-

godly, and intemperate teachers—men who designed nothing more in the ministry than to repeat a sermon as readers say their prayers, and to patch up a few good words together to talk the people asleep on Sunday, and all the rest of the week go with them to the ale-house, and harden them in their sin; and that sort of ministers who either preached against a holy life, or preached as men that were not acquainted with it. They had power to eject scandalous, ignorant, and insufficient ministers and schoolmasters.

**Trigland**, JACOB, a Dutch theologian, was born at Haarlem, May 8, 1652, and died at Leyden, Sept. 22, 1705. His writings are, *Dissert. Theologico-philologica, Continens Defensionem Integritatis Codicis Sacri adversus Nuperas in eum Censuras* (Leyden, 1703):—*Diatribes de Secta Karæorum* (ibid. eod.; Germ. transl. by Fürst. in *Literaturbl. des Orients*, 1843, c. 12, 23, 39, 763, 776, 794, 827):—*Dissertationes Theologicae et Philologicae, Sylloge, ut et Oratorum Acad.* (Delft, 1728):—*Trium Scriptorum illustr. de Tribus Judæorum Sectis Syntagma in quo N. Serarii* (Mayence, 1604). *Drusii* (Franeker, 1608-5), *Jos. Scaligeri* (ibid. 1605) *Opuscula, quæ eo Pertinent*, etc. (ibid. 1703):—*Disput. II de Origine Sacrificiorum* (Leyden, 1692):—*De Josepho Patriarcha in Sacri Bori Hieroglyph. ab Egyptiis Adorato* (ibid. 1705). See Fürst, *Bibl. Jud.* iii, 447; Winer, *Handb. der theol. Literatur*, i, 29, 139, 442, 515, 823. (B. P.)

**Triglaw**, in Slavonic mythology, was the supreme god of the Servians, Wends, Poles, partly also of the Rügen islanders, Pomeranians, Prussians, and Lithuanians. He was, as his name indicates, triple-headed, and therefore represented the Slavonic trinity. The priests proclaimed Triglaw as the unseen supreme sovereign of heaven, earth, and the infernal regions. He was represented veiled, in the greatest temple at Stettin, as a celebrated man with three heads. A large army of priests served him, and taught that he, being long-suffering and kind-hearted, veiled his face so as not to see the evil deeds of men, and seldom made his appearance on earth, but taught his priests his will and commands, and by means of his holy black steed he distributed oracles, etc. This steed governed by his hoofs the whole population, and no one would have dared to do anything to which it did not give favorable signs. His temple, made of huge wooden posts covered with cloths, contained the largest part of all the spoils of war. Vast riches were heaped up here, and the superstitious dread of the people was a surer protection than marble or granite, perhaps, would have been. The destructive campaigns of Henry the Lion were the means of destroying all these temples, and closed to the world the inspection of the idols of their gods.

**Trim, COUNCIL OF.** Trim is the county town of Meath, situated on the river Boyne, about twenty-seven miles north-west of Dublin. It contains a national school, besides other public institutions; a handsome Roman Catholic chapel; the remains of Trim Castle; and the Yellow Tower, a part of St. Mary's Abbey, rebuilt by the De Lacys in the 13th century.

The council was held on the Sunday after St. Matthew's Day (1291). Nicholas M'Morissa, archbishop of Armagh, presided. The four archbishops, all the suffragan bishops, all the cathedral chapters, by their deputies, and the other orders and degrees of the clergy, unanimously agreed in this synod to maintain and defend each other in all courts, and before all judges, ecclesiastical or secular, against all lay encroachments upon, and violations of, their rights, liberties, or customs; and, further, amply to indemnify those of their messengers, executors of their orders, etc., who might receive loss or damage in the performance of their duty. Other articles of agreement were drawn up, pledging them to mutual co-operation in enforcing sentences of excommunication, etc. See Maut, *Hist. of the Irish Church*, p. 17.

**Trimmer, SARAH**, a zealous promoter of religious education in England, was born at Ipswich, Jan. 6, 1741. She was carefully educated, and while a resident of London passed her time in the society of Dr. Johnson, Dr. Gregory Sharpe, and other eminent persons in the literary world. In her reading she was directed by her father. Becoming a mother of a large family of children, her current of thought was turned to education. Having experienced great success in the plan of educating her own family, she naturally wished to extend that blessing to others, and this first induced her to become an author. She strenuously opposed the current of French and German infidelity and a lax education independent of the history and truths of revelation. She was also an early promoter and supporter of Sunday-schools. She died Dec. 15, 1810. Of her works, we refer to the last London edition: *Abridgment of the New Test.* (1852, 18mo):—*Abridgment of the Old Test.* (1850, 12mo):—*Help to the Unlearned in the Study of the Holy Scriptures* (1805, 8vo; 2d ed. 1850, 2 vols. 12mo):—*New and Comprehensive Lessons on the New Test.* (1849, 18mo):—*New and Comprehensive Lessons on the Old Test.* (1849, 18mo):—*Prayers and Meditations* (1842, 12mo; 2d ed. 1860):—*Sacred History* (1782–85, 6 vols. 12mo; 1841–49, 2 vols. 12mo):—*Scripture Catechism* (1851, 2 vols. 12mo):—*The Economy of Charity* (1786; revised 1801):—and many other works on history, education, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Trimnell, CHARLES**, bishop of Norwich and Winchester, was born at Ripton-Abbots, England, Dec. 27, 1663. He graduated with honor at Winchester College, and in 1688 was appointed preacher at Rolls. In 1691 he was installed prebendary of Norwich, in 1694 presented by the earl of Sunderland to the rectory of Bodington, and in 1698 installed archdeacon of Norfolk. About this time he was made chaplain in ordinary to queen Anne. Having no parochial duty in 1705, he for some time took charge of St. Giles's parish, Norwich; and in October, 1706, was instituted to St. James's, Westminster. In January, 1707, Mr. Trimnell was elected bishop of Norwich, and in August, 1721, he was transferred to the bishopric of Winchester. He died Aug. 15, 1723. He had a very serious turn of mind, and performed the duty of every station with the greatest exactness. His public life was characterized by great moderation and firmness of spirit. "He was a lover of peace and order both from judgment and inclination; and, being a sincere friend to the Church of England, he constantly avowed those principles of toleration and indulgence which make that Church the glory of the Reformation." Bishop Trimnell published fifteen single *Sermons, Letters, Charges*, etc. (1697–1715).

**Trine Baptism.** A mode of administering the sacrament, which was so universal in the primitive Church that some entertain no doubt of its being derived from apostolic tradition. The person baptized was thrice immersed, or water was thrice poured on him, in the name of the three persons of the Godhead. The reason of trine baptism was manifest: the three immersions showed the distinction of the three divine Persons, although the baptism was only one, in the name of the undivided Godhead—"one baptism for the remission of sins." Thus in baptism the unity of the Divine Nature and the distinction of the three Persons are clearly implied and set forth. The first who departed from this usage was Eunomius the Arian. Trine baptism was according to the fiftieth apostolical canon, the bishop or presbyter who baptized with one immersion being ordered to be deposed. In the 6th and 7th centuries one immersion in baptism was substituted by some in Spain for the ordinary rule of the Church, the Council of Toledo (A.D. 633, canon 6) allowing single immersion in Spain, to avoid schism; but this innovation lasted for only a short period, the early usage being restored, and

remaining the rule of the Western Church. Single immersion has never been authorized by the Eastern Church. See Blunt, *Dict. of Doct. and Hist. Theol.* s. v.; Landon, *Manual of Councils*, p. 582.

**Trine-God Controversy.** In the churches over which Hincmar (q. v.), archbishop of Rheims, presided, he forbade the singing of the last words of a very ancient hymn—*Te trina Deitas, unaque poscimus* ("Of thee, trine Deity, yet one, we ask")—on the ground that this phraseology subverted the simplicity of the Divine Nature, and implied the existence of *three Gods*. The Benedictine monks would not obey this mandate of Hincmar; and one of their number, Ratramnus, wrote in defence of a *trine Deity*. Godeschalcus, hearing of this dissension while in prison, sent forth a payer, in which he defended the cause of his fellow-monks. For this he was accused by Hincmar of Tritheism, and was confuted in a book written expressly for that purpose. But this controversy soon subsided; and, in spite of Hincmar's efforts, the words retained their place in the hymn. See Mosheim, *Ch. Hist.* bk. v, ch. ii, p. 94.

**Trinitarian Brothers, or ORDER OF THE MOST HOLY TRINITY for the Redemption of Captives**, was founded by St. John of Matha, who was born at Faucon, Provence, in 1154. When he first celebrated divine service, after his ordination, he beheld a vision of an angel in white, having a cross of red and blue on his breast, and his hands, crossed over each other, rested on the heads of two slaves who knelt on each side of him. He, with another holy man, Felix de Valois, arranged the institution of a new order for the redemption of slaves. They went to Rome, and received the approval of Innocent III in 1198. They assumed the white habit, having on the breast a Greek cross of red and blue. They returned to France, and received from Gaucher de Châtillon lands in the province of Valois. The pope also gave them at Rome the church and convent of S. Maria della Navicella, on the Monte Celio. Honorius III confirmed their rule, and in 1267 Clement IV approved of a change in their rules permitting them to purchase meat and own horses. They had at one time two hundred and fifty convents in France, three in Spain, forty-three in England, fifty-two in Ireland, besides others in Portugal, Italy, Saxony, Hungary, and Bohemia. In 1594 the Barefooted branch of this order was begun by Jean Baptiste de la Conception in the convent of Valde, Spain. He was granted a bull by Clement VIII in 1598

Spanish Trinitarian Monk.

to establish a reform in his order and lead them back to the ancient practice. The founders of the Trinitarians placed themselves under the protection of St. Radegunda, queen of Clothaire V of France, who afterwards took the religious habit and founded a monastery at Poitiers. See Jameson, *Leg. of Monastic Orders*, p. 217 sq.; Migne, *Dict. des Ordres Relig.*, s. v.

**Trinitarian Sisters.** This order was founded at Valence in 1615, and constituted a convent in 1696. They received letters patent from Louis in 1712, and were registered in Parliament in January, 1728. They established two hospitals, which were in 1802 devoted to the care of aged men and women. They have been quite flourishing since 1837. See Migne, *Dict. des Ordres Relig.*, s. v.

Trinitarian Nun.

**Trinitarians.** A general name for all Christians who hold the doctrine of the divine Trinity (q. v.).

**Trinity.** The doctrine of the Trinity in the god-head includes the three following particulars, viz. (a) There is only one God, one divine nature; (b) but in this divine nature there is the distinction of Father, Son, and Holy Ghost, as three (subjects or persons); and (c) these three have equally, and in common with one another, the nature and perfection of supreme divinity. It was the custom in former times for theologians to blend their own speculations and those of others with the statement of the Bible doctrine. It is customary now to exhibit first the simple doctrine of the Bible, and afterwards, in a separate part, the speculations of the learned respecting it.

I. *The Biblical Doctrine.*—It has always been allowed that the doctrine of the Trinity was not fully revealed before the time of Christ, and is clearly taught only in the New Test. Yet, while it is true (1) that if the New Test. did not exist we could not derive the doctrine of the Trinity from the Old Test. alone, it is equally true (2) that by the manner of God's revelation of himself in the Old Test. the way was prepared for the more full disclosure of his nature that was afterwards made. But (3) respecting the intimate connection of these persons, or respecting other distinctions which belong to the doctrine of the Trinity, there is nothing said in the Old Test. While in each particular text allusion is made to a trinity or plurality in God, yet these texts are so many in number and so various in kind that they impress one with the opinion that such a plurality in God

is indicated in the Old Test., though it is not fully developed or clearly defined.

(I.) The texts of the *Old Test.* may be arranged in the following classes:

1. Those giving the names of God in the plural form, and thus seeming to indicate a plurality of his nature, of which אֱלֹהִים, אֱלֹהִי, אֱלֹהֵינוּ are cited as examples; but as these may be only the *pluralis majestaticus* of the Oriental languages, they afford no certain proof.

2. Texts in which God speaks of himself in the plural. The plural in many of these cases can be accounted for from the use of the plural nouns אֱלֹהִים, אֱלֹהֵינוּ, etc. Philo thinks (*De Opif. Mundi*, p. 17) that in the expression "Let us make man" (Gen. i, 26), God addresses the angels. It is not uncommon in Hebrew for kings to speak of themselves in the plural (1 Kings xii, 9; 2 Chron. x, 9; Ezra iv, 18). In Isa. vi, 8 God asks, who will go for us (לָנוּ), where the plural form may be explained either as the *pluralis majestaticus*, or as denoting an assembly for consultation.

3. Texts in which יְהוָה (Jehovah) is distinguished from אֱלֹהִים (Elohim). These texts do not, however, furnish any decisive proof; for in the simplicity of ancient style the noun is often repeated instead of using the pronoun; and so, *from Jehovah* may mean *from himself*, etc. Further, the name אֱלֹהִים (Elohim) is sometimes given to earthly kings, and does not, therefore, necessarily prove that the person to whom it is given must be of the divine nature.

4. Texts in which express mention is made of the *Son of God* and of the *Holy Spirit*.

(a.) *Of the Son of God.*—The principal text of this class is Psa. ii, 7, "Thou art my son; this day have I begotten thee;" comp. Psa. lxxii, 1; lxxxix, 27. This Psalm was understood by the Jews and by the writers of the New Test. to relate to the Messiah. But the name *Son of God* was not unfrequently given to kings; it is not, therefore, *nomen essentialis*, but *dignitatis Messianæ*. The passage would then mean, "Thou art the king (Messiah) of my appointment; this day have I declared thee such." In this psalm, therefore, the Messiah is rather exhibited as king, divinely appointed ruler and head of the Church, than as belonging to the divine nature.

(b.) *Of the Holy Spirit.*—There are many texts of this class, but none from which, taken by themselves, the personality of the Holy Spirit can be proved. In these texts the term *Holy Spirit* may mean (1) the divine nature in general; (2) particular divine attributes, as omnipotence, knowledge, or omniscience; (3) the divine agency, which is its more common meaning. Isa. xlviii, 16, "And now Jehovah (the Father) and his Spirit (Holy Ghost) hath sent me" (the Messiah), is supposed to teach the whole doctrine of the Trinity. But the expression "and his Spirit" is used by the prophets to mean the *direct, immediate command* of God. To say, then, the Lord and his Spirit hath sent me is the same as to say, the Lord hath sent me by a direct, immediate command.

5. Texts in which *three* persons are expressly mentioned, or in which there is a clear reference to the number *three* (Numb. vi, 24; Psa. xxxiii, 6; Isa. vi, 3). But the repetition of the word *Jehovah* in the one text is not an undeniable proof of the Trinity; and in the other, the word *of his mouth* means nothing more than his *command*; and in the last text the threefold repetition of the word *holy* may have been by three choirs, all uniting in the last words, "The whole earth is full of thy glory."

Thus it appears that none of the passages cited from the Old Test. in proof of the Trinity are conclusive when taken by themselves; but, as was before stated, when they are all taken together, they convey the impression that at least a plurality in the godhead was obscurely indicated in the Jewish Scriptures.

(II.) Since we do not find in the Old Test. clear or decided proof upon this subject, we must now turn to the *New Test.* The texts relating to the doctrine of the Trinity may be divided into two classes—those in which the Father, Son, and Holy Spirit are mentioned in connection, and those in which these three subjects are mentioned separately, and in which their nature and mutual relation are more particularly described.

1. The first class of texts, taken by itself, proves only that there are the three subjects named, and that there is a difference between them; that the Father in certain respects differs from the Son, etc.; but it does not prove, by itself, that all the three belong necessarily to the divine nature, and possess equal divine honor. In proof of this, the second class of texts must be added. The following texts are placed in this class:

Matt. xviii, 18-20. This text, however, taken by itself, would not prove decisively either the *personality* of the three subjects mentioned, or their *equality* or *divinity*. For (a) the subject into which one is baptized is not necessarily a *person*, but may be a *doctrine* or *religion*. (b) The person in whom one is baptized is not necessarily God, as 1 Cor. i, 18, "Were ye baptized in the name of Paul?" (c) The connection of these three subjects does not prove their *personality* or *equality*. We gather one thing from the text, viz. that Christ considered the doctrine respecting Father, Son, and Holy Ghost as a fundamental doctrine of his religion, because he requires all his followers to be bound to a profession of it when admitted by baptism into the Church.

1 Pet. i, 2: "Elect according to the foreknowledge of God the Father, through sanctification of the Spirit, unto obedience and sprinkling of the blood of Jesus Christ." From what is here said of the Holy Spirit, it does not necessarily follow that he is a personal subject; nor, from the predicates here ascribed to Christ, that he is necessarily divine. This passage, therefore, taken by itself, is insufficient.

2 Cor. xiii, 14, "The grace of the Lord Jesus Christ, and the love of God, and the communion of the Holy Ghost, be with you all." Here we might infer, from the parallelism of the third member of the passage with the two former, the *personality* of the Holy Spirit; but we could not justly infer that they possessed *equal authority*, or the same nature.

John xiv, 26 offers three different personal subjects, viz. the Comforter, the Father, and Christ; but it is not sufficiently proven from this passage that these three subjects have equal divine honor, and belong to one divine nature.

Matt. iii, 16, 17 has been considered a very strong proof-text for the whole doctrine of the Trinity. But though three personal subjects are mentioned, viz. the voice of the Father, the symbol of the Holy Spirit, and Christ, yet nothing is here said respecting their nature.

1 John v, 7, 8 are generally admitted to be spurious; and, even if allowed to be genuine, they do not determine the nature and essential connection of the three subjects mentioned.

2. We now turn to the second class of texts, viz. those in which the Father, Son, and Holy Ghost are separately mentioned, and in which their nature and mutual relation are taught. These texts prove (a) that the Son and Holy Spirit, according to the doctrine of the New Test., are divine, or belong to the one divine nature; and (b) that the three subjects are personal and equal.

(1.) *The Deity of the Father.*—When the term *Father* is applied to God, it often designates the whole god-head, or the whole divine nature; as Θεός ὁ Πατήρ, 1 Cor. viii, 4-6; John xvii, 1-3. He is often called Θεός καὶ Πατήρ, i. e. Θεός ὁ Πατήρ, or Θεός ὅς ἐστι Πατήρ, as Gal. i, 4. All the arguments, therefore, which prove the existence of God prove also the deity of the Father.

(2.) *The Deity of Christ.*—To prove the deity of Christ we present three classes of texts.

(a.) The following are the principal texts in which divine names are given to Christ:

John i, 1, 2. Christ is here called ὁ Λόγος (the Word), which signified among the Jews and other ancient people, when applied to God, *everything by which God reveals himself to men*, and makes known to them his will. Hence those who made known the divine will to men were called by the Hellenists λόγοι. It was probably on this account that John declared Jesus to be the Logos which existed ἐν ἀρχῇ; that the Logos was with God, and the Logos was God. In this passage the principal proof does not lie in the word Λόγος, nor even in the word Θεός, which in a larger sense is often applied to kings and earthly rulers; but to what is predicated of the Λόγος, viz. that he existed from eternity with God, that the world was made by him, etc.

John xx, 28. Here Thomas, convinced at last that Christ was actually risen from the dead, thus addresses him, "My Lord and my God." This must not be considered an exclamation of surprise or wonder, as some have understood it; for it is preceded by the phrase εἶπεν αὐτῷ, "he said this to him." Thomas probably remembered what Jesus had often said respecting his superhuman origin (v, 8, 10, 17), and he now saw it all confirmed by his resurrection from the dead.

Phil. ii, 6, "Who, being in the form of God, thought it not robbery to be equal with God." There it is said of Christ that he is ἴσα Θεῷ, *Deo aequalis*; not ὅμοιος Θεῷ, ἄντιστοιχος, στοιχειδός, ἀνίμλις *Deo*—terms applied by Homer to kings and heroes. The term ἴσος Θεῷ, on the contrary, is never applied to a finite or created being. Hence the Jews (John v, 18) considered it as blasphemy in Christ to make himself ἴσον Θεῷ.

John x, 28-30, "I and my Father are one." These words are not to be understood to denote so much an equality of nature as unanimity of feeling and purpose. Still the passage is quite remarkable; because Christ professes to do his work in *common with his Father*; and that is more than any man, prophet, or even angel is ever said in the Bible to do. That being one with God, therefore, which Jesus here asserts for himself is something peculiar, which belongs to him only as he is a being of a higher nature.

Tit. ii, 13, "We expect the glorious appearance," etc. In this passage, since τοῦ is omitted before σωτήρος, both μεγάλου Θεοῦ and σωτήρος must be construed in apposition with Ἰησοῦ Χριστοῦ. Moreover, ἐπιφάνεια is the word by which the solemn coming of Christ is appropriately designated.

In some of the texts in which Christ is called the *Son of God*, the name is used in three different senses—[1] Messiah or king, a title very commonly given to the Messiah by the Jews (see Matt. xvi, 16; Luke ix, 20; Matt. xxvii, 40; Luke xxiii, 35; see also Mark xiii, 32; 1 Cor. xv, 28); [2] the higher nature of Christ (John v, 17 sq.; x, 30, 33; xx, 31; Rom. i, 3, 4); [3] he is also called the Son of God (Luke i, 35), to designate the immediate power of God in the miraculous production of his human nature.

(b.) Texts in which divine attributes and works are ascribed to Christ. It is not necessary to find texts to prove that all the divine attributes are ascribed to Christ. These attributes cannot be separated; and if one of them is ascribed to Christ in the Bible, the conclusion is inevitable that he must possess all the rest. The following attributes and works are distinctly ascribed to Christ in the Scriptures:

[i.] *Eternity* (John i, 1; viii, 58; xvii, 5; Col. i, 17).

[ii.] *Creation and preservation of the world* (John i, 1-3, 10; Col. i, 16; Heb. i, 10 [where Psa. cii, 26 is quoted and applied to Christ]; ii, 10).

[iii.] *Omnipotence* is ascribed to Christ (Phil. iii, 21); *omniscience* (Matt. xi, 27). He is described as the *searcher of hearts*, etc. (1 Cor. iv, 5).

(c.) Texts in which divine honor is required for Christ. The following are the principal texts of this class: John, v, 23, "All men should honor the Son, even

as they honor the Father;" Acts i, 24; vii, 59; 2 Cor. xii, 8, where Christ is approached in prayer; and those in which the apostles refer to Christ the texts of the Old Test. that speak of the honor and worship of God, e. g. Heb. i, 6 from Psa. xcvi, 7; also Rom. xiv, 11 from Isa. xlv, 3; Phil. ii, 10; 2 Cor. v, 8-11; 2 Tim. iv, 17, 18.

(3.) The third point in the discussion of this doctrine is the personality and divinity of the Holy Spirit; for a full discussion of which see HOLY GHOST.

II. *History of the Doctrine.*—Respecting the manner in which the Father, the Son, and the Holy Ghost make one God, the Scripture teaches nothing, since the subject is of such a nature as not to admit of its being explained to us. It is therefore to be expected that theologians should differ widely in their opinions respecting it, and that in their attempts to illustrate it they should have pursued various methods.

1. *As Held by the Primitive Christians.*—For the first age the Scripture is sufficient evidence of the Christians' practice. For, not to insist upon the precept of honoring the Son as they honored the Father; or the form of baptism, in which they were commanded to join the Father, Son, and Holy Ghost in one act of worship; or the injunction to believe in the Son as they believed in the Father, let reference be made only to their example and practice. Stephen, the protomartyr, when he was sealing his confession with his blood, prayed to Christ, "Lord Jesus, receive my spirit," and "Lord, lay not this sin to their charge" (Acts vii, 59, 60). Paul asserts that he baptized only in the name of Christ (1 Cor. i, 13). Notice also his constant use of the name of Christ in invocation. There is the well-known fact that the early believers were known as those who called on the name of Christ (Acts ix, 14, 21; 1 Cor. i, 2; 2 Tim. ii, 22).

2. *As Held in the 2d and 3d Centuries.*—Towards the end of the 1st century, and during the 2d, many learned men came over both from Judaism and paganism to Christianity. These brought with them into the Christian schools of theology their Platonic ideas and phraseology, and they especially borrowed from the philosophical writings of Philo. As was very natural, they confined themselves, in their philosophizing respecting the Trinity, principally to the Logos; connecting the same ideas with the name *λόγος* as had been done before by Philo and other Platonists. Differing on several smaller points, they agreed perfectly in the following general views, viz.: the Logos existed before the creation of the world; he was begotten, however, by God, and sent forth from him. By this Logos the Neo-Platonists understood the infinite understanding of God, belonging from eternity to his nature as a power, but that, agreeably to the divine will, it began to exist out of the divine nature. It is therefore different from God, and yet, as begotten of him, is entirely divine. By means of this Logos they supposed that God at first created, and now preserves and governs, the universe. Their views respecting the Holy Spirit are far less clearly expressed, though most of them considered him a substance emanating from the Father and the Son, to whom, on this account, divinity must be ascribed. These philosophical Christians asserted rather the *divineness* of the Son and Spirit, and their divine origin, than their equal *deity* with the Father. Justin Martyr expressly declares that the Son is in God what the understanding (*νοῦς*) is in man, and that the Holy Spirit is that divine power to act and execute which Plato calls *ἀνερῆ*. With this representation Theophilus of Antioch, Clemens of Alexandria, and Origen substantially agree. According to Tertullian, the persons of the Trinity are *gradus, formæ, species unus Dei*. Thus we find that the belief in the subordination of the Son to the Father, for which Arianism is the later name, was commonly received by most of those fathers of the 2d and 3d centuries who assented, in general, to the philosophy of Plato. Another class of learned, phi-

losophizing Christians substituted another theory on the subject of the Trinity, which, however, was none the less formed rather from their philosophical ideas than from the instructions of the Bible. Among the writers of this class was Praxeas, of the 2d century, who contended that the Father, Son, and Spirit were not distinguished from each other as individual subjects; but that God was called *Father*, so far as he was creator and governor of the world; *Son* (*Λόγος*), so far as he had endowed the man Jesus with extraordinary powers, etc. He, in accordance with this view, denied any *higher, pre-existing* nature in Christ; and with him agreed Artemon, Noetus, and Beryllus of Bostra. Sabellius regarded the terms Father, Son, and Holy Spirit as merely describing different divine *works*, and various modes of divine *revelation*.

In the following table the writers of the first three centuries on the subject of the Trinity are ranged according to their opinions:

CATHOLIC.	MONARCHIANS.
Justin Martyr.	<i>Unitarians.</i>
Theophilus of Antioch.	Theodotus.
Athenagoras.	Artemon.
Irenæus.	Paul of Samosata.
Clemens Alexandrinus.	
Tertullian.	<i>Patripassians.</i>
Origen.	Praxeas.
Dionysius Alexandrinus.	Noetus.
Cyprian.	Beryllus of Bostra
Novatian.	Sabellius.
Dionysius Romanus.	

Among the terms introduced in the discussion of the doctrine of the Trinity during this period the following are the most common, viz. (1.) *Τριάς*, introduced by Theophilus of Antioch in the 2d century, and often used by Origen in the 3d century. Tertullian translated it into Latin by the word *trinitas*, of which the English word is an exact rendering. (2.) *Οὐσία, ὑπόστασις*. These terms were not sufficiently distinguished from each other by the Greek fathers of the 2d and 3d centuries, and were often used by them as entirely synonymous. By the word *ὑπόστασις*, the older Greek fathers understood only a really existing subject, in opposition to a nonentity, or to a merely ideal existence; in which sense they also not unfrequently used the word *οὐσία*. (3.) *Πρόσωπον*. This word was first employed by Tertullian, and by it he means an *individual*, a single being, distinguished from others by certain peculiar qualities, attributes, and relations; and so he calls Pater, Filius, Spiritus Sanctus, *tres personæ* (three persons), at the same time that he ascribes to them *unitas substantiæ* (unity of substance), because they belong to the divine nature (*οὐσία*) existing from eternity.

We call attention to the following as shedding light upon the *practice* of the Church during this period. Pliny, a judge under Trajan, in the beginning of the 2d century took the confessions of some accused Christians, and says, "They declared that they were used to meet on a certain day before it was light, and, among other parts of their worship, sing a hymn to Christ as their God." Polycarp (*Ep. ad Philip.* n. 12) joins God the Father and the Son together in his prayers for grace and benediction upon men. Justin Martyr answering, in his *Second Apology*, the charge of atheism brought against them by the heathen, answers, "That they worshipped and adored still the God of righteousness and his Son, as also the Holy Spirit of prophecy." Athenagoras answers the charge of atheism after the same manner. Similar testimony is afforded by the writings of Lucian the heathen, Theophilus of Antioch, Clemens Alexandrinus, Origen, Novatian, and others, illustrating the practice of the Church in paying divine honors to the Son and Holy Spirit.

3. *The Trinity as Held in the 4th Century.*—It had already been settled, by many councils held during the 3d century, and in the symbols which they had adopted in opposition to Sabellius and Paul of Samosata, that

the Father must be regarded as *really* distinguished from the Son, and the Holy Spirit as distinguished from both. The relation, however, of the three persons of the Trinity, and the question in what the distinction between them properly consists, not having been discussed, these subjects were left undetermined by the decisions of councils and symbols. Different opinions prevailed, and learned men were left to express themselves according to their convictions.

Origen and his followers maintained, against the Sabellians, that there were in God *τρῖς ὑποστάσεις* (three persons), but *μία οὐσία* (one substance) common to the three. Few had as yet taught the entire *equality* of these three persons, but had allowed, in accordance with their Platonic principles, that the Son, though belonging to the divine nature, was yet subordinate to the Father. In the beginning of the 4th century, Alexander of Alexandria, and Athanasius, his successor, attempted to unite the hypotheses of Origen and Sabellius, thinking that the truth lay between the two extremes. Athanasius stated the personal distinction of the Father and the Son to be that the former was *without beginning and unbegotten*, while the latter was *eternally begotten* by the Father, and equally eternal with the Father and the Spirit.

Arius, about 320, disputed the doctrine taught by Alexander, viz. *ἐν τριῶν μοῖρα εἶναι*, and so favored the Sabellian theory. As the controversy proceeded, Arius declared, in opposition to Sabellius, that there were not only three persons in God, but that these were unequal in glory (*δόξαις οὐχ ὅμοιαι*); that the Father alone was supreme God (*ἀγέννητος*), and God in a higher sense than the Son; that the Son derived his divinity from the Father before the creation of the world, and that he owed his existence to the divine will; and that the Holy Spirit was likewise divine in a sense inferior to that in which the Father is so. In opposition to all the Arian, and various other theories, Athanasius and his followers zealously contended. They succeeded, at a general council at Nice in 325, in having a symbol adopted which was designed to be thenceforward the only standard of orthodoxy. This symbol was confirmed by the council held at Constantinople in 381, under Theodosius the Great. The distinctions established at Nice and Constantinople were often re-enacted at various succeeding councils. Many urged, in opposition, that *tritheism* (q. v.) was the inevitable consequence of the admission of these distinctions, but they, nevertheless, remained in force. The council adopted the word *ὁμοούσιος* (consubstantiality), explaining themselves thus: The Son was not created, but eternally generated from the nature of the Father, and is therefore in all respects equal to him, and no more different, as to nature, from God than a human son is from his father, and so cannot be separated from the Father. All that they meant to teach by the use of this word was that the Father, Son, and Holy Spirit had the divine nature and divine perfections so in common that one did not possess more and another less; without asserting, however, that there were three Gods: in short, that in the Godhead there were *tres distincti, unitate essentie conjuncti*. See CREED, NICENE.

The characteristics by which the persons of the Trinity may be distinguished from each other under this view belong to two classes.

(1.) *Internal* ("characteres interni"). These are distinctive signs arising from the internal relation of the three persons in the Godhead to each other, and indicating the mode of the divine existence. The following distinctions are derived from the names Father, Son, and Spirit, and from some other Bible phraseology: (a.) The Father generates the Son, and emits the Holy Spirit, *generat Filium, spirat Spiritum Sanctum*; and possesses, therefore, as his personal attributes, *generatio activa* and *spiratio activa*. (b.) The Son is generated by the Father—*Filius est generari non generare*. The Son, therefore, possesses as his personal attributes *filia-*

*tio, generatio passiva*; and also, as he is supposed to emit the Spirit in conjunction with the Father, *spiratio activa*. (c.) The Holy Spirit neither generates nor is generated, but proceeds from the Father and the Son—*Spiritus Sanctus est, nec generare nec generari, sed procedere*. In regard to the Holy Spirit, there was nothing decided, during the first three centuries, by ecclesiastical authority respecting his nature, the characteristics of his person, or his relation to the Father and the Son. Nor was anything more definite, with regard to his nature and his relation to the other persons of the Trinity, than what has already been stated, established by the council at Nice, or even by that at Constantinople. To believe in the Holy Ghost—*τὸ σὺν Πατρὶ καὶ Υἱῷ συμπροσκυνούμενον*, and *ἐκ τοῦ Πατρὸς ἐκπορευόμενον*—was all that was required in the symbol there adopted. But there were many, especially in the Latin Church, who maintained that the Holy Spirit did not proceed from the Father only, but also from the Son. They appealed to John xvi, 13, and to the texts where the Holy Spirit is called the *Spirit of Christ*, e. g. Rom. viii, 9. To this doctrine the Greeks were, for the most part, opposed, because they did not find that the New Test. ever expressly declared that the Spirit proceeded from the Son. It prevailed, however, more and more in the Latin Church; and when in the 5th and 6th centuries the Arians urged it as an argument against the equality of Christ with the Father, that the Holy Spirit proceeded from the Father only, and not from the Son, the Catholic churches began to hold more decidedly that the Holy Spirit proceeded from both, and insert the adjunct *Filioque* after *Patre* in the *Symbolum Niceno-Constantinopolitanum*.

(2.) *External* ("characteres externi"). These are characteristics of the persons of the Trinity arising from the works of the Deity relating to objects extrinsic to itself, and called *opera externa, sive ad extra*. They are twofold: (a.) *Opera Dei œconomica*, those institutions which God has founded for the salvation of the human race. The Father sent his Son to redeem men (John iii, 16, 17), and gives or sends the Holy Spirit (xiv, 26). The Son is sent from the Father, etc., and sends the Holy Spirit from the Father (xv, 26). The Holy Spirit formed the human nature of Christ (Luke i, 35) and anointed it (Acts x, 38), i. e. endowed it with gifts; and is sent into the hearts of men, and carries them forward towards moral perfection. (b.) *Opera Dei attributiva*, such divine works as are common to the three persons, but which are frequently ascribed to one of the three. To the Father are ascribed the decree to create the world, the actual creation, and the preservation of it. To the Son, also, the creation, preservation, and government of the world are ascribed; also the raising of the dead and judgment. To the Holy Spirit are ascribed the immediate revelation of the divine will to the prophets, the continuation of the great work of salvation commenced by Christ, and the communication and application to men of the means of grace.

4. *History of the Doctrine since the Reformation.*—Nearly all the writers upon the subject of the Trinity since the Reformation belong to some one of the general classes already mentioned. We present several theories.

(1.) Some have attempted to illustrate and explain this doctrine by philosophy; and not a few have gone so far as to think they could prove the Trinity *a priori*, and that reason alone furnishes sufficient arguments for its truth. Others, again, looked to reason for nothing more than an illustration of this factor of the divine existence. In the latter class may be placed Philip Melancthon, who, in his *Loci Theologici*, thus explained the Trinity: "God from his infinite understanding produces thought, which is the image of himself. To this thought he imparted *personal* existence, which, bearing the impress of the Father, is his likeness and resemblance, and hence called by John λόγος. This illustration of the Trinity was received without offence or suspicion, until

the heresy which lurks beneath it was detected and exposed by Flacius. The latest attempt to explain the Trinity in this manner may be found in the *Berliner Monatsschrift*, Sept. 1790, § 280, in an article written by Schwab of Stuttgart, who refers to the accidents of space, viz. length, breadth, and thickness, as an illustration of the Trinity. Among those who supposed that the Trinity could be mathematically proved were Bartholomew Keckerman, in his *Systema Theologicum*; Peter Poirer, and Daries, who published an essay *In qua Pluralitas Personarum in Deitate, . . . Methodo Mathematicorum, Demonstratur* (Leovardiae, 1735, 8vo).

(2.) Others have expressed themselves so boldly on the subject of the Trinity that they have seemed to approximate towards *tritheism*; in which class we may mention Matthew Gribaldus of Padua, in the 16th century, who maintained that the divine nature consisted of three equally eternal spirits, between whom, however, he admitted a distinction in respect to rank and perfections.

(3.) Some modern writers have inclined to adopt the Sabellian theory, among whom were Servetus (q. v.), Grotius, *Silvæ Sacrae*; Stephen Nye, *Doctrine of the Trinity* (Lond. 1701). In this class we place the hypothesis of Le Clerc, that the Father, Son, and Holy Spirit designate the different modifications of the divine understanding, and the plans which God forms. This is the error into which Weigel and Jacob Böhme fell. Many of the modern German theologians have so explained the Trinity as to lose the idea of three divine persons, for which they have substituted either three distinct powers or attributes (as Meier, Seiler, Claudius, and Töllner), or a threefold agency in God—three eternal actions distinct from each other (as S. G. Schlegel, Kant, Tieftrunk, Daub, Schelling, De Wette, and Fessler).

(4.) The Arian theory has also found advocates among Protestant theologians, especially those of the 18th century (e. g. Whiston, Harwood, and Wettstein); but the system which has met with the most approbation is that more refined subordinationism taught by Samuel Clarke, *Scripture Doctrine of the Trinity* (Lond. 1712).

(5.) The *Socinians* or *Photinians*. The founders of this sect were Lælius Socinus and his nephew Faustus Socinus (q. v.), who brought over considerable numbers to their doctrine in Poland and Transylvania.

(6.) A new theory on the Trinity was proposed by Dr. Ursperger, *Kurzgefaßtes System seines Vortrags von Gottes Dreieinigkeit* (Augsburg, 1777, 8vo). He endeavored to unite the three theories—the Arian, Sabellian, and Nicene—by making a distinction between *trinitas essentialis*, the internal threefold distinction necessarily belonging to the divine nature, and *trinitas œconomica*, the three persons revealed to us in the work of redemption.

It is proper to say that "the conclusion is obvious that, while we are taught by the Scriptures to believe in three equal subjects in the Godhead, who are described as persons, we are still unable to determine in what manner or in what sense these three have the divine nature so in common that there is only one God" (Knapp, *Christ. Theology*, § 34-44). See PERSON.

III. *Practical Value of the Christian Doctrine of the Trinity.*—The idea of a triune being—Father, Son, and Holy Ghost—is not by any means to be considered as separate from that of the nature and attributes of God. This apparent tritheism can be considered as the conclusion of true deism, and as a safeguard in the most momentous questions. Polytheism, pantheism, and dualism have been to some extent employed to vivify and prove the truth of religion; but we would present the practical advantages of the doctrine of the Trinity in quite a different manner: not as serving merely to prove another proposition without being also true in itself, but as aiding us in arriving at the knowledge of God's nature with an efficacy which is essentially inherent to its objective and permanent recognition. God may be considered either as not true or lofty enough, or not good

and holy enough, or not essentially active enough; these may be considered the possible faults of a given system of deism. So long, then, as it distinguishes only between God and the world, and not between God himself, it retains always a tendency either to return to pantheism or to deny the existence of an absolute being. An absolute safeguard against atheism, polytheism, pantheism, or dualism cannot be found except in the doctrine of the Trinity; for the distinction existing between the Divine Being and the world is better made and observed as an absolute one by those who worship the triune God than by those who do not. Those monotheistic systems which were the most strenuously opposed to the idea of a Trinity, such as Judaism and Mohammedanism, have, by reason of their dryness and emptiness, led to the grossest pantheism.

From the doctrine that the Word, who was God, became flesh, follows the necessity of considering God as personally united with sinless humanity, but at the same time, also, the necessity of drawing a clear distinction between the divine essence and mere human nature. Faith in the everlasting holy love, which is God, can only be rendered theoretically and practically perfect by the knowledge of the perfect, eternal object of the self-consciousness and love of God; i. e. by the thought of the love of God for his only begotten Son. Finally, the idea of the fulness of God's creative and imparting nature can only be preserved from diminishing by the Trinitarian doctrine of a Holy Ghost. Whatever difficulties may result from the Christian idea of different divine persons, when brought into connection with the personality of the divine essence, the apparent contradiction is yet susceptible of a solution; even when we do not consider that the Primitive Church did not, for a long time, recognise these three persons but as only *ἰδιότητες, ὑποστάσεις*, etc.

The Latin Church alone has, since Augustine, sanctioned the expression *personæ* in the *Symbolum Quicunque*. Augustine himself said, yet, "Tres personæ, si ita dicenda sunt." Some consider the Trinity as essential to constitute the perfect personality, and employ the metaphysics of consciousness as an analogical proof thereof (see Schneider, *Cölestin, drei geistliche Gespräche* ü. d. *Personen d. Gottheit* [1834], i). Others refuse to recognise the real personality of God in any but one of the so-called hypostases: namely, in the Logos, the Son. Such is Swedenborg. Others still hold peculiar opinions. At any rate, we are obliged, according to the clear sense of Scripture, to seek not only the Trias in the subjectivity of the representation, nor exclusively in the economy of revelation, but also recognise that immediate faith does here contain within itself the germ of endless speculation; not only because every theological system of antiquity, from the time when, as reflecting gnosis, it rose above the myths, shows certain higher theological ideas (in the sense in which Nitzsch has presented it in a historical and critical manner in his *Theol. Stud.* ch. i), nor merely because the Christian theologians of all times have made a certain rational understanding of this mystery possible and found it necessary. It is even essentially necessary for the Biblical theologian to recognise in the notion of the Logos—who is with God and is God, the precreative image of God, the inmost spirit of God who knew God—the elements of essential, immanent Trinity. For those only retain the trace of Biblical theogony who, in all attempts at explaining it, keep in view the notion of the self-knowledge and self-love of God, or of the distinction between the self-concealing and self-revealing God. Twisten has latterly greatly perfected the philosophy of the doctrine of the Trinity, both in its history and in its essence; first by placing the Trinity *κατὰ τὸν ἀποκαλύψεως τρόπον*, as subordinate to the analogical and philosophical interpretation; but then, again, *κατὰ τρόπον ὑπάρξεως*, and shows the connection between both interpretations. In the first case, he seeks a mediation between the *ens absolutum* and the finite world which yet reveals the infi-

nite, and this he finds in the primordial, creative thought of God. But revelation cannot take place except towards discerning beings, and finite beings cannot know God save through God. This argument presents the three notions of God, Logos, and Spirit, yet forming still but one godhead. Such as God reveals himself, such, however, he is. This leads us to another consideration, viz. that the *ego*, in order to possess a real, living personality, must not only become dually contradistinguished within itself, but also, by a third process, reflectively act on itself as a third subject, and be conscious of itself as being a perfect image of self. This manner of treating this mystery, by analogy, is neither accidental nor gratuitous, since, according to Scripture, human nature is also analogous to the divine. Tertullian and Augustine had themselves established their theories already on this basis.

IV. *Literature*.—This is immensely copious. We can here refer only to a few leading authorities. See Baur, *Hist. of Doctrines*; Burris, *The Trinity* (Chicago, 1874); Cunningham, *Hist. Theology*, i, 267; Lamson, *Origin of Trinity*; Lessing, *Das Christenthum und die Vernunft* (Berlin, 1784, 8vo); Marheinecke, *Grundlehren der christl. Dogm.* p. 129, 370 (ibid. 1819); Mattison, *The Trinity and Modern Arianism* (18mo); Morus, *Commentary*; Mosheim, *Leben Servet's* (Helmst. 1748, 8vo); Meier, *Historical Development of the Trinity*; Neander, ii, 2, 891; Sailer, *Theorie des Weisen* (Spottes, 1781, 8vo); Walch, *Historia Controversiæ Græcorum Lutinarumque de Processione Spiritus Sancti* (Jenæ, 1751, 8vo); Ziegler, *Geschichtsentwicklung des Dogma vom heiligen Geist*. For further literature see *Biblioth. Sac.* (1844-73), index to vol. i-xxx; Dantz, *Wörterbuch der theol. Literatur*, s. v. "Trinität." Darling, *Cyclop. Bibliog.* col. 268, 1446, 1719-1722; Poole, *Index to Period. Lit.* s. v. "Trinity."

TRINITY, HEATHEN NOTIONS OF. In examining the various heathen philosophies and mythologies, we find clear evidence of a belief in a certain sort of trinity, and yet something very different from the Trinity of the Bible.

In the Egyptian mythology, the powers of the Supreme Being as the producer, the producing, and the produced were symbolized by deities who were respectively father, mother, and child of each other. Every Egyptian town had its local triad, but the most famous was the great Theban triad of Amen-ra, Maut, and Khousu. Sometimes the king himself, as a god, made the third member of the triad. These combinations of divine properties must not be confounded with the dogma of a trinity either of creator, preserver, and destroyer, as in Hindû mythology, or of Creator, Redeemer, and Sanctifier of the Christian faith. The Babylonian mythology offers a trinity, each member of the triad having his own wife or consort. At the head of this trinity stands Anu, representing abstract divinity. He appears as an original principle; the primeval chaos, the god of time, and the world—uncreated matter issuing from the fundamental principle of all things. A companion deity with Anu is Hea, god of the sea and of Hades. He is lord of generation and of all human beings; he animated matter and rendered it fertile, and inspired the universe with life. The third member of this triad was Bel (Elu, Enu, Kaptu), the demiurgus and ruler of the organized universe. There were also second and third trinities descending from the first, but becoming more and more defined in character, and assuming a decidedly sidereal aspect.

The system of Plato may be thus stated: God first produced the ideal world, i. e. his infinite understanding conceived of the existence of the world, and formed the plan of creation. The *real* world was then formed after this *ideal* world as its model; and this was done by uniting the soul of the world with matter, by which the world became an animated, sensitive, rational creature—guided, pervaded, and held together by this rational soul. The three principles of Plato were (a) the Su-

preme God, whom he calls Πατήρ; (b) the divine understanding, which he calls νοῦς, λόγος, σωτήρ, σοφία; and (c) the soul of the world. These views are developed in his *Timæus*, etc. The Neo-Platonists eagerly embraced these ideas of Plato, and during the 2d and 3d centuries seemed to labor to outdo one another in explaining, defending, and more fully developing them. They not only widely differ from Plato, but often disagree among themselves in their mode of thinking and in their phraseology.

While the Jews who resided in Palestine were satisfied with their Phariseo-Rabbinic theology, and looked for their Messiah as a religious reformer, this was not the case with those residing elsewhere, who had been educated under the influence of the Grecian philosophy. These abandoned the expectation of a future Messiah, or regarded his kingdom as entirely of a moral nature. Among them the theory of the λόγος is found as early as the 1st century. The λόγος they regarded as existing before the Creation, and as the instrument through whom God made all things. See Knapp, *Christ. Theol.* p. 145 sq.; Lenormant, *Chald. Magic*, ch. ix; Smith, *Chald. Account of Genesis*; Tholuck, *Die speculative Trinitätslehre der neuern Orientalen* (Berlin, 1826, 8vo).

**Trinity**, FRATERNITY OF THE, a religious society instituted at Rome by Philip Neri in 1548. They had charge of the pilgrims who were constantly coming to Rome from all parts of the world. Pope Paul IV gave them the Church of St. Benedict, near which they built a large hospital, and in which there was also a college of twelve priests for the instruction of pilgrims.

**Trinity Sunday**, the octave day of the feast of Pentecost. The introduction of this day into the calendar is of comparatively recent date, it being established by pope Benedict XI, A.D. 1805. It is probable that the zeal of many Christians against the use of images in the 8th and 9th centuries may have been the first cause of the appointment of a distinct day for meditating upon the nature of the Holy Trinity in unity, or the one true God, as distinguished from all idols. The reason for its late introduction is that in the creed of the Church, and in its psalms, hymns, and doxologies, great prominence was given to this doctrine, and it was thought that there was no need to set apart a particular day for that which was done every day.

**Triphysites** (from τρεῖς, *three*, and φύσεις, *natures*), those divines who, at the fourteenth and fifteenth councils of Toledo, A.D. 684, 688, carried their opposition to the Monophysites and Monothelites to such an extreme that they declared a belief not only in Christ's distinct divine and human natures, but also in a third nature resulting from the union of the two.

**Triplet**, a window of three lights. Many such occur in the First Pointed style, the centre light being usually longer or more elevated than the two side lights.

**Trip'olis** (ἡ Τρίπολις), the Greek name of a city of great commercial importance, which served at one time as a point of federal union for Aradus, Sidon, and Tyre (hence the name *the threefold city*), which each had here its special quarter. What its Phœnician name was is unknown; but it seems not impossible that it was *Kadytis*, and that this was really the place captured by Necho, of which Herodotus speaks (ii, 159; iii, 5). *Kadytis* is the Greek form of the Syrian *Kedutha*, "the holy," a name of which a relic still seems to survive in the Nahr-Kadish, a river that runs through *Tarabûlûs*, the modern representative of Tripolis. All ancient federations had for their place of meeting some spot consecrated to a common deity, and just to the south of Tripolis was a promontory which went by the name of Θεοῦ πρίσωπον.

It was at Tripolis that, in the year B.C. 351, the plan was concocted for the simultaneous revolt of the Phœnician cities and the Persian dependencies in Cyprus against the Persian king Ochus. Although aided by a league with Nectanebus, king of Egypt, this attempt failed, and in the sequel a great part of Sidon was burned and the chief citizens destroyed. Perhaps the importance of Tripolis was increased by this misfortune of its neighbor, for soon after, when Alexander invaded Asia, it appears as a port of the first order. After the battle of Issus, some of the Greek officers in Darius's service retreated thither, and not only found ships enough to carry themselves and eight thousand soldiers away, but a number over and above, which they burned in order to preclude the victor from an immediate pursuit of them (Arrian, ii, 13). The destruction of Tyre by Alexander, like that of Sidon by Ochus, would naturally tend rather to increase than diminish the importance of Tripolis as a commercial port. When Demetrius Soter, the son of Seleucus, succeeded in wresting Syria from the young son of Antiochus (B.C. 161), he landed there and made the place the base of his operations. It is this circumstance to which allusion is made in the only passage in which Tripolis is mentioned in the Bible (2 Macc. xiv, 1). The prosperity of the city, so far as appears, continued down to the middle of the 6th century of the Christian æra. Dionysius Periegetes applies to it the epithet *Λιθαρίον* in the 3d century. In the *Peutinger Table* (which probably was compiled in the reign of the emperor Theodosius), it appears on the great road along the coast of Phœnicia, and at Orthosia (the next station to it northwards) the roads which led respectively into Mesopotamia and Cilicia branched off from one another. The possession of a good harbor in so important a point for land traffic doubtless combined with the richness of the neighboring mountains in determining the original choice of the site, which seems to have been a factory for the purposes of trade established by the three great Phœnician cities. Each of these held a portion of Tripolis surrounded by a fortified wall, like the Western nations at the Chinese ports; but in A.D. 543 it was laid in ruins by the terrible earthquake which happened in the month of July of that year, and overthrew Tyre, Sidon, Beytus, and Byblus as well. On this occasion the appearance of the coast was much altered. A large portion of the promontory Theuprosopon (which in the Christian times had its name, from motives of piety, changed to Lithoprosopon) fell into the sea, and, by the natural breakwater it constituted, created a new port, able to contain a considerable number of large vessels. The ancient Tripolis was finally destroyed by the sultan El-Mansûr in A.D. 1289, and the modern Tarabalûs is situated a couple of miles distant to the east, and is no longer a port. El-Myna, which is perhaps on the site of the ancient Tripolis, is a small fishing village. Tarabalûs contains a population of fifteen or sixteen thousand inhabitants, and is the centre of one of the four pashalics of Syria. It exports silk, tobacco, galls, and oil, grown in the lower parts of the mountain at the foot of which it stands, and performs, on a smaller scale, the part which was formerly taken by Tripolis as the entrepôt for the productions of a most fertile region (Diod. Sic. xvi, 41; Strabo, xvi, 2; Vossius *ad Melam*, i, 12; Theophanes, *Chronographia*, sub anno 6043). For the modern place, see Pococke, ii, 146 sq.; Maundrell, p. 26; Burckhardt, p. 163 sq.; Porter, *Handbook*, p. 542; Bäder, *Palestine*, p. 509 sq. (where a map is given). See PHœNICIA.

Coins of Tripolis.

**Triptych**, a picture with two folding-doors, set over altars. The centre panel usually contains the chief subject. In the illustration (from the pencil of Mr. A. Welby Pugin) the triptych is a kind of cupboard with folding-doors, containing a throned figure of the Virgin Mary crowned, and holding her divine child in her lap. A figure of Peter on one side and of Paul on the other are painted on the inner panels of the doors.

Triptych.

**Triquetral** (*three-cornered*), a censer used by bishop Andrewes, in which the clerk put incense at the reading of the first lesson.

**Trisacramentarians**, a controversial name given to those reformers who maintained that there are three sacraments necessary to salvation, viz. baptism, the Lord's supper, and absolution. This opinion was held by some Lutherans at Leipsic, and was authoritatively set forth as a doctrine of the Church of England in the *Institution of a Christian Man* (1562).

**Trisagion** (*τρισάγιον*, *thrice holy*) was so called because of the thrice repeating "Holy, holy, holy, Lord

God of hosts," in imitation of the seraphim in the vision of Isaiah. The original of this hymn was "Holy, holy, holy, Lord God of hosts! heaven and earth are full of thy glory, who art blessed forever. Amen." Thus it is in the *Constitutions*, and frequently in Chrysostom. Afterwards the Church added some words to it, and sang it in this form: "Ἅγιος ὁ Θεός, ἅγιος ἰσχυρός, ἅγιος ἀθάνατος, ἰλέησον ἡμᾶς" ("Holy God, holy Mighty, holy Immortal, have mercy upon us"). The hymn is attributed to the patriarch Proclus, in the 4th century. Theodosius the younger ordered it to be sung in the liturgy, after his vision of a child chanting it during an earthquake at Constantinople. Later still, by Anastasius the emperor, or by Peter Enapheus, bishop of Antioch, the following words were added: ὁ σταυρωθεὶς δι' ἡμᾶς ("that was crucified for us"). This was done to oppose the heresy of the Theopaschites (q. v.), which was, in effect, to say that the whole Trinity suffered, because this hymn was commonly applied to the whole Trinity. To avoid this inconvenience, Calandio, bishop of Antioch, in the time of Zeno the emperor, made another addition to it of the words "Christ our King," reading it thus: "Holy God, holy Mighty, holy Immortal, Christ our King, that wast crucified for us, have mercy on us." These additions occasioned much confusion in the Eastern Church, while the Constantinopolitans and Western Church stiffly rejected them. It was chiefly sung in the middle of the communion service, though sometimes it was used on other occasions. After the preface this hymn was always sung, and, according to Cyril of Jerusalem, Chrysostom, and the second Council of Vaison, also at all masses, matin lentes, or of the dead.—Bingham, *Christ. Antiq.* bk. xiv, ch. ii, § 8.

**Trisantia**, a mediæval term for (1) a cloister, or (2) a place of retreat for religious persons where meditations are made.—Lee, *Gloss. of Liturg. Terms*, s. v.

**Triscillidæ**, a sect of Sabellian heretics mentioned by Philaster (*Hæc.* c. xciii), Augustine (*Hæc.* c. lxxiv), and Prædestinatus (*Hæc.* c. lxxiv) as maintaining the opinion that the divine nature is composed of three parts, one of which is named the Father, the second part the Son, and the third the Holy Ghost; and that the union of these three parts constitutes the Trinity. Philaster, in condemning this heresy, uses expressions very similar to some in the Athanasian hymn, "Ergo est vera persona Patris quæ misit Filium, et est vera persona quæ advenit de Patre, et est vera persona Spiritus quæ a Filio et Patre missa est."

**Tritheim** (Lat. *Trithemius*), JOHANN, a German historian and theologian, was born at Tritenheim, near Treves, Feb. 1, 1462, being the only son of John of Heidenberg and Elizabeth of Longway. His early education was conducted in a desultory manner, but in 1482 he entered the Benedictine abbey at Spanheim, where the next year he was elected abbot, and administered its affairs with great zeal. In 1506 he exchanged this position for a similar one in the abbey of Würzburg, where he remained till his death, Dec. 27, 1516. His many learned writings are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v. The principal ones are, *De Scripturis Ecclesiasticis* (1492);—*Polygraphia* (1518);—*Stenographia* (1531).

**Tritheists**, a sect which appeared in the 6th century, and which taught that the Father, Son, and Spirit were three coequal, distinct Beings, united by one common will and purpose. This sect was divided into the Philoponists and Cononites, according to the names of their respective leaders, who agreed in the doctrine of the three Persons in the Godhead, but differed in some opinions concerning the resurrection of the body. Having made this change in the doctrine of the Trinity, they made another change answerable to it in the form of baptism—baptizing in the name of three unoriginated principles, as three Sons, three Paracletes. As a consequence of asserting three unbegotten principles, they

made three Fathers, three Sons, and three Holy Ghosts, which was a Trinity of trinities.

Cyril of Jerusalem (*Catech.* c. xvi) attributes the origin of Tritheism in its broadest form to Marcion, and Hilary (*De Synod.* xxii, 56) associates it with the heresy of Photinus. The Tritheists of the 6th century did not hold the opinion in its broad form, and would have shrunk from any such statement as that there are three Gods. The Tritheism of the 6th century was revived by Roscelin in the 11th, and his Nominalistic opinion that the name God is the abstract idea of a genus containing the three Persons called Father, Son, and Holy Ghost was opposed by Anselm (*De Fide Trinitat.* etc.), and was condemned by the Council of Soissons, A.D. 1092. In 1691 the heresy was revived by Dr. Sherlock (*A Vindication of the Doctrine of the Holy and Ever-blessed Trinity*). In a sermon delivered before the University of Oxford (1695), the preacher maintained the theory of Dr. Sherlock that "there are three infinite distinct minds and substances in the Trinity," and that "the three Persons in the Trinity are three distinct infinite minds or spirits, and three individual substances." These propositions were condemned by the authorities of the university. The speculation of Hutchinson in the last century was very similar in its logical consequences to that of the older Tritheists. See Bingham, *Christ. Antiq.* bk. xi, ch. iii, § 4; Blunt, *Dict. of Sects*, s. v.

**Triumph** (usually  $\nu\lambda\zeta$  or  $\nu\lambda\zeta\omega$ , *Στραμβέω*). Almost all ancient nations celebrated success in war by a triumph, which generally included a gorgeous procession, a display of captives and spoils, and a solemn thanksgiving and sacrifice to the gods. Among the Egyptians, the triumph of a king returning from war was a grand solemnity celebrated with all the pomp which the wealth of the nation could command (Wil-

Triumphal Procession of Rameses III.

kinson, *Anc. Egypt.* i, 277 sq.). The Assyrian sculptures abound with similar representations. See SENNACHERIB.

The Hebrews, under the direction of inspired prophets, celebrated their victories by triumphal processions, the women and children dancing, accompanying their steps with various musical instruments (see Judg. xi, 34-37), and singing hymns of triumph to Jehovah, the living and true God. The song of Moses at the Red Sea, which was sung by Miriam to the spirited sound of the timbrel (Exod. xv, 1-21), and that of Deborah on the overthrow of Barak (Judg. v, 1-31), are majestic examples of the triumphal hymns of the ancient Hebrews. Triumphal songs were uttered for the living (1 Sam. xviii, 6-8; 2 Chron. xx, 21-28) and elegies for the dead (2 Sam. i, 17-27; 2 Chron. xxxv, 25). The conquerors were intoxicated with joy, and the shout of victory resounded from mountain to mountain (Isa. xlii, 11; lii, 7, 8; lxiii, 1-4; Jer. l, 2; Ezek. vii, 7; Nah. i, 15). Monuments in honor of victory were erected, and the arms of the enemy were hung up as trophies in the temples (1 Sam. xxi, 9; xxxi, 10; 2 Sam. viii, 13; 2 Kings xi, 10). Indignities to prisoners formed a lead-

Ancient Assyrian King in Procession after Victories.

ing feature of triumphs among ancient nations generally; and among the Assyrians and Babylonians atrocities were frequently practiced, such as maiming, blinding [see EYE], and killing, especially in the case of rebel princes. See CAPTIVE. To put one's foot upon the

Assyrian King Placing the Foot on the Neck of an Enemy.

respect, we find Joshua ordering the five kings of the Canaanites, who had taken refuge in a cave, to be brought out that his captains might come one after another and put their foot on the necks of the prostrate princes (Josh. x, 24). Literally this usage does not ap-

pear to have been much practiced by the covenant people, but it forms the ground of many figurative representations in the prophetic Scriptures (Psa. cx, 1; Isa. lx, 14; 1 Cor. xv, 26). See FOOT, NECK. Among the Greeks, it does not appear that triumphs were accorded to victorious generals, but conquerors occasionally entered their native cities attended by their victorious soldiers bearing branches of palm. Such processions became very common under the successors of Alexander the Great, particularly the Seleucids of Syria and the Ptolemies of Egypt, who are generally believed to have been the inventors of the *toga palmata*, or robe adorned with representations of palm-trees interwoven into its fabric. It is clearly to the Græco-Syrian form of triumph that the apostle John alludes in the Apocalypse, when he describes those who had overcome by the blood of the lamb standing "before the throne, clothed with robes, and palms in their hands" (Rev. vii, 9).

Next to the Egyptians, the Romans were chief among ancient nations in attributing importance to a triumph, and exerting themselves to bestow a gorgeous brilliancy upon the triumphal procession. The highest honor which could be bestowed on a citizen or magistrate was the triumph or solemn procession in which a victorious general passed from the gate of the city to the Capitol. He set out from the Campus Martius, and proceeded along the Via Triumphalis, and from thence through the most public places of the city. The streets were strewn with flowers, and the altars smoked with incense. First went a numerous band of music, singing and playing triumphal songs; next were led the oxen to be sacrificed, having their horns gilt and their heads adorned with fillets and garlands; then followed the spoils taken from the enemy, carried in open wagons, or on a species of bier called *feretrum*, around which were displayed the golden crowns sent by allied and tributary states. The titles of the vanquished nations were inscribed on wooden frames; and images or representations of the conquered countries and cities were exhibited. The captive leaders followed in chains, with their

Roman Triumph.

children and attendants; after the captives came the victors, having their fasces wreathed with laurel, followed by a great company of musicians and dancers, dressed like satyrs, and wearing crowns of gold; in the midst of whom was a pantomime, clothed in a female garb, whose business it was with his looks and gestures to insult the vanquished. A long train of persons followed, carrying perfumes; after whom came the general, dressed in purple, embroidered with gold, wearing a crown of laurel on his head, holding a branch of laurel in his right hand, and in his left an ivory sceptre with an eagle on the top, his face painted with vermilion, and a golden ball hanging from his neck on his breast. He stood upright in a gilded chariot adorned with ivory, drawn by four white horses, attended by his relations and a great crowd of citizens, all clothed in white. It was creditable to Roman morality that a public slave accompanied the conqueror in his chariot, to remind him of the vicissitudes of fortune, and to present to him, in the midst of all his glory, the remembrance of the varied changes and chances of mortality. The conqueror's children sometimes accompanied him, and sometimes rode in a second chariot, escorted by the lieutenants and military tribunes who had served in the war. The consuls, senators, and other magistrates followed the general's chariot on foot; and the whole procession was closed by the victorious army, drawn up in order, crowned with laurel, decorated with the gifts which they had received for their valor, and singing their own and their general's praises. See Smith, *Dict. of Class. Antiq.* s. v. See TIRUS (*Emperor*).

Paul makes frequent allusions to such triumphal processions (Col. ii, 15; Eph. iv, 8), with which he compares the triumphs of Christ's followers in spreading abroad, in every place, the perfume of the gospel of salvation (2 Cor. ii, 14-16). Our Saviour's triumphal entry into Jerusalem (Matt. xxi, 1-9) was a token of his royal character (see the monographs in Hase, *Leben Jesu*, p. 181).

**Triumphus**, AUGUSTINUS, an Augustinian hermit-monk who was a native of Ancona, attended the University of Paris for a time, and was present at the Council of Lyons in 1274. He also sojourned at Venice while engaged in the publication of several small books in honor of the Virgin, and at Naples, where he became the favorite of kings Charles and Robert, and where he died in 1328, at the age of eighty-five years. A number of published and unpublished works from his pen are yet extant. We note one *On the Ecclesiastical Power*, addressed to pope John XXII (Augsburg, 1473):—*A Commentary on the Lord's Prayer*:—*Comments on the Ave Maria and the Magnificat* (Rome, 1590, 1592, 1603):—*a Milleloquium* from the works of Augustine, unfinished by Triumphus, but completed by the Augustinian Bartholomew of Urbino (Lyons, 1555). Of unpublished writings we mention, *Four Books on the Sentences*:—*On the Holy Ghost*, a polemic against the Greeks:—*On the Spiritual Hymn*:—*On the Entrance into the Land of Promise*:—*On the Knowledge and Faculties of the Soul*:—*Theorems respecting the Resurrection of the Dead*:—*Expositions of Ezekiel and all New-Test. Books*:—*Discourses of the Lord*:—*On the Saints*:—*On the Moralia of St. Gregory*. See Pamphilus, *Chron. Eremit. S. August.* p. 46; Cave, *Script. Eccl. Hist. Lit.* (Gen. 1720).—Herzog, *Real-Encyklop.* s. v.

**Trivet**, NICHOLAS, an English Dominican monk, was born at Norfolk about 1258. He was educated at Oxford and Paris, and became prior of English houses of his order. He died in 1328. He was the author of *Annales Sex Regum Angliæ, cum Continuazione ut et A. Murimuthensis Chronicon*, etc. (Oxon. 1719-22, 2 vols. 8vo). He left many MSS. on various subjects of philosophy and theology, as well as a *Commentary on Seneca's Tragedies*, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Trivulzi**, the name of several cardinals of Italian extraction, but of French association in the diplomatic

movements of their age. See Hoefer, *Nour. Biog. Générale*, s. v.

1. AGOSTINO was the nephew of Antonio (1); became deacon in 1517, archbishop of Reggio in 1520, and successively bishop of Bobbio (1519-21), Toulon (1524), Asti (1528), Bayeux (1529), and Brugnato (1535); and died at Rome, March 30, 1548.

2. ANTONIO (1) was born at Milan in January, 1457, and after various diplomatic services was made bishop of Coma in 1487, and cardinal in 1501. He died at Rome, March 18, 1508.

3. ANTONIO (2), nephew of the following, was made successor of his uncle Agostino as bishop of Toulon in 1528, and cardinal in 1557. He died June 26, 1559.

4. SCARAMICCIO, a learned lawyer, was made professor of canon law at Pavia in 1491, and in 1499 counsellor of Louis XII. He became cardinal in 1517, bishop of Coma in 1508, and afterwards of Piacenza (1522-26). He died at the monastery of Maguzzano, near Verona, Aug. 9, 1527.

**Tro'as** (Τρωάς). The city from which Paul first sailed, in consequence of a divine intimation, to carry the Gospel from Asia to Europe (Acts xvi, 8, 11)—where he rested for a short time on the northward road from Ephesus (during the next missionary journey), in the expectation of meeting Titus (2 Cor. ii, 12, 13); where, on the return southwards (during the same missionary journey), he met those who had preceded him from Philippi (Acts xx, 5, 6), and remained a week, the close of which (before the journey to Assos) was marked by the raising of Eutychus from the dead during the protracted midnight discourse; and where, after an interval of many years, the apostle left (during a journey the details of which are unknown) a cloak and some books and parchments in the house of Carpus (2 Tim. iv, 13)—deserves the careful attention of the student of the New Test., and is memorable as a relic of the famous city of Troy.

The full name of the city was *Alexandria Troas* (Livy, xxxv, 42), and sometimes it was called simply *Alexandria*, as by Pliny (*Hist. Nat.* v, 33) and Strabo (xiii, 593), sometimes simply *Troas* (as in the New Test. and the *Ant. Itin.* See Wesseling, p. 334). The former part of the name indicates the period at which it was founded. It was first built by Antigonos, under the name of *Antigonia Trous*, and peopled with the inhabitants of some neighboring cities. Afterwards it was embellished by Lysimachus, and named *Alexandria Troas*. Its situation was on the coast of Mysia, opposite the south-east extremity of the island of Tenedos. The name *Troad* strictly belongs to the whole district around Troy.

Under the Romans it was one of the most important towns of the province of Asia. It was the chief point of arrival and departure for those who went by sea between Macedonia and the western Asiatic districts; and it was connected by good roads with other places on the coast and in the interior. For the latter see the map in Leake's *Asia Minor*, and in Lewin's *St. Paul*, ii, 81.

Coins of Troas.

Ruins of the Gymnasium at Troas.

The former cannot be better illustrated than by Paul's two voyages between Troas and Philippi (Acts xvi, 11, 12; xx, 6), one of which was accomplished in two days, the other in five. At this time Alexandria Troas was a *colonia* with the *Jus Italicum*. This strong Roman connection can be read on its coins. The Romans had a peculiar feeling connected with the place, in consequence of the legend of their origin from Troy. Suetonius tells us that Julius Cæsar had a plan of making Troas the seat of empire (*Cæs.* 79). It may perhaps be inferred from the words of Horace (*Carm.* iii, 3, 57) that Augustus had some such dreams. Even the modern name *Eski-Stambûl* or *Eski-Istamboul* ("Old Constantinople") seems to commemorate the thought which was once in Constantine's mind (Zosim. ii, 30; Zonar. xiii, 3), who, to use Gibbon's words, "before he gave a just preference to the situation of Byzantium, had conceived the design of erecting the seat of empire on this celebrated spot, from which the Romans derived their fabulous origin."

The ruins at *Eski-Stambûl* are considerable. The most conspicuous, however, especially the remains of the aqueduct of Herodes Atticus, did not exist when Paul was there. The walls, which may represent the

what are presumed to be the ruins of ancient Troy at Hisarlik by Schliemann (*Troy and its Remains* [Lond. 1875]). See also Maclaren, *Plain of Troy* (Edinb. 1863); Meyer, *Gesch. von Troas* (Leips. 1877).

**Trogyllium** (Τρωγύλλιον), the rocky extremity of the ridge of Mycale, which is called thus in the New Test. (Acts xx, 15) and by Ptolemy (v, 2), and *Trogilium* (Τρωγίλιον) by Strabo (xiv, 636). It is directly opposite Samos (q. v.). The channel is extremely narrow. Strabo (*loc. cit.*) makes it about a mile broad, and this is confirmed by the Admiralty charts (1530 and 1555). Paul sailed through this channel on his way to Jerusalem at the close of his third missionary journey (Acts xx, 15). The navigation of this coast is intricate; and it can be gathered from ver. 6, with subsequent notices of the days spent on the voyage, that it was the time of dark moon. Thus the night was spent at Trogyllium. It is interesting to observe that a little to the east of the extreme point there is an anchorage which is still called *St. Paul's Port*. Pliny refers to three small islands lying about Trogyllium, and names them Sandalion, Psilon, and Argennon (*Hist. Nat.* v, 37). The port where Paul anchored is generally considered to be that

Plan of the Remains of Troas.

Plan of Trogyllium and its Adjoining Islands.

sheltered by Sandalion; but the port now known as the Port of St. Paul is that protected by the island of Nero, the ancient Argennon (Lewin, *St. Paul*, ii, 89). See PAUL.

**Troil, Samuel**, a Swedish prelate, was born May 22, 1706, at Saint Schedwi (Dalecarlia), being the son of a pastor. He studied philosophy at the University of Stockholm, and became successively grand almoner of the king (April 22, 1740), president of the consistory (Jan. 2, 1742), bishop of Westerås (April 23, 1751), and archbishop of Upsala (Nov. 8, 1757), where he died, Jan. 18, 1764. He was a learned and eloquent preacher, and left many funeral discourses, etc.

**Troil, Uno**, a Swedish prelate, son of the foregoing, was born at Stockholm, Feb. 24, 1746. After a brilliant course of study at Upsala, and extensive travels in Germany, France, and England, he became successively almoner of the regiment (1773), preacher in ordinary to the king (1775), bishop of Linköping (1784), president of the consistory of Stockholm and archbishop of Upsala (Aug. 30, 1787), where he died, July 27, 1803. He wrote several historical sketches, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

**Troki, Isaac Ben-Abraham**, a Jewish scholar, who derived his name from his native place, Troki, a town in the Russian province of Wilna, was born in 1533. At the period in which this character lived, Poland was not only the seat of Jewish learning, but also the scene of action of the different sects to which the Reformation gave rise. "In the earlier years of the religious Reformation of the 16th century, the scepticism which had prevailed so generally in Rome and the Italian states, chiefly among the higher clergy, and perhaps most intensely in the highest, tainted the Italian mind, and imparted a peculiar stamp of heterodoxy to the adherents of the Reformation in that country. The court of Rome had sagaciously put off the garb of pagan laxity which

it had worn so jauntily since the revival of letters. The Council of Trent, while reviewing every article of Roman theology, having stated in its canons the fundamental articles of Christian faith with a clearness that was indeed much needed, gave strict instructions to all the licensed preachers of their Church, and so enabled them to assume a new appearance of sound faith, at least in those particulars which would contrast not only with their former heterodoxy, now to be concealed, but with the open heterodoxy of certain fugitive Italian Protestants. These persons found congenial society among the Jews in Poland, who, while heroically adhering to the letter of the Mosaic law, had nevertheless not accepted the more fully unfolded verity of Christian revelation. Heretics they were in the eye of Rome, and the persecution that haunted them drove them at once into the arms of the Polish Karaites; for, like them, and even more than they, these protesters against Rome hated tradition and all human authority. Like the Karaites, they were sturdy Monotheists in the same narrow sense. They outran Arius in the race of unbelief. Their own Socino left his name to a sect just as Sadok had left his; and Socino, with his principal followers, chose Poland to be at once their asylum and their citadel. From that time it became the centre of Socinianism in Europe. In Poland the Jew and the Christian both enjoyed religious liberty, and for once the most orthodox of the Israelites and the least orthodox of the Christians could fraternize on one point, and on only one." One of those Jews was Isaac. He was brought up in the study of Talmudism as a branch of Jewish learning, and in the faith of the Karaites, cold withal, until quickened and elevated under the impulse of persecution. Young Isaac, to whom Hebrew was vernacular, was also liberally educated in the Latin and Polish languages. In these languages he read the chief controversial writings, as they were issued by their eminent authors, against the Church of Rome. He carefully studied the Catholic-Polish version of the Bible, made by Leonard from the Vulgate, which appeared in Cracow in 1561, and again in 1575 and 1577; the Calvinistic-Polish version, called the Radzivil Bible, and published in 1563; and the Socinian version, made also from the original texts, by the celebrated Simon Budny, which was published at Nieswicz, in Lithuania, in 1570; as well as the writings of Nicholas Paruta, Martin Chechowiz, and Simon Budny, the heads of Unitarianism in Poland. As all these sects, who differed from each other on almost every other point, agreed in their attack upon the Jews and their faith, the rabbi set to work on a confutation of Christianity. He read the New Test., in Budny's version, with the cool and orderly habit of a hard-working student. Every passage on which he could fix a doubt or hazard a denial was marked as it stands in the sacred book, and for the purpose of controversy. The entire stock of anti-Christian cavils with which educated Jews, at least, are familiar, combined with the objections of the Socinians, were brought to bear on the New Test. by direct attack on all the leading sentences in relation to the person, life, and ministry of Christ. The work, written in Hebrew, under the title of *Confirmation of the Faith*, אִשְׁתָּכִיחַ אֱמֻנַת הַדָּת, and which has a world-wide celebrity, Isaac finished in 1593, when sixty years of age. The work is interesting for its quotations from some little-known Christian and polemical works in the Polish language, and because it has been made use of by critical writers upon the New Test. from Voltaire to Strauss; for the former at least acknowledges, in his *Mélanges*, iii, 344: "Il a rassemblé toutes les difficultés que les incrédules ont prodiguées depuis. . . . Enfin, incrédules les plus déterminés n'ont presque rien allégué qui ne soit dans ce rempart de la foi du rabbin Isaac." The book is divided into two parts—the first, which is devoted to an examination of the objections raised by Christians against

Judaism, and which is subdivided into fifty chapters, discusses very minutely the interpretation of the Messianic passages of the Old Test. and their application to Christ as the predicted Messiah; while the second part is taken up with a critical examination of the statements made in the sundry books of the New Test. Troki died in 1594. His work was first published by Wagenseil, with a Latin translation, in his collection of *The Fiery Darts of Satan* (*Tela Ignea Satanae*) (Altdorf, 1681), from a MS. obtained from an African Jew, which was imperfect. A reprint of this vitiated text without the Latin translation appeared in Amsterdam in 1717, and in Jerusalem in 1845. The best edition, however, is that edited by rabbi D. Deutsch, with a German translation (Sohran, 1865). Besides this German translation, there is another by M. Gelling (Hamb. 1631-33). It was translated into Spanish by Isaac Athia, and into Italian by M. Luzzatto. The work has also been refuted by Müller, *Confutatio Libri Chizuk Emuna*, comprised in his *Judaismus ex Rabbinorum Scriptis Detectus, etc., Refutatus* (ibid. 1644); by Gousset, *Ternio Controversas. adversus Judæos, Oppositus R. Isaac Chissuk Emuna* (Dordrecht, 1688), which, however, was not satisfactory to the duke Louis of Orleans (d. 1752), who wrote another refutation; by Gebhard, *Centum Locu N. T. Vindicata adversus Chissuk Emuna* (Greifswalde, 1699); Storr, *Evangelische Glaubenskraft. Gegen das Werk Chissuk Emuna* (Tub. 1703); and by Kidder [Bp.], in his *Demonstration of the Messiah* (2d ed. Lond. 1726). See Wolf, *Bibl. Hebr.* iv, 639 sq.; Hoefer, *Nouv. Biog. Générale*, xxvi, 10; Fürst, *Bibl. Jud.* ii, 138; iii, 448, De Rossi, *Dizionario Storico* (Germ. transl.), p. 320 sq.; id. *Biblioth. Antichristiana*, p. 42 sq.; Kitto, *Cyclop.* s. v.; Steinschneider, *Catal. Libr. Hebr. in Bibl. Bodl.* col. 1074 sq., and his *Jewish Literature*, p. 212; Etheridge, *Introd. to Hebr. Lit.* p. 444; Rule, *Hist. of the Karaite Jews*, p. 170 sq.; Basnage, *Hist. des Juifs* (Taylor's transl.), p. 772; Geiger, *Isaak Troki, ein Apologet des Judenth. am Ende des 16ten Jahrhds.* (Breslau, 1853; reprinted in his *Nachgelassene Schriften*, iii, 178, Berlin, 1876); id. *Proben jüdischer Vertheidigung gegen christliche Angriffe*, in Liebermann's *Kalender*, 1854; Grätz, *Gesch. d. Juden*, ix, 490 sq.; Becker, in *Saat auf Hoffnung* (Erlang. 1870), vii, 154 sq.; Fürst, in the same quarterly (ibid. 1871), viii, 224 sq. (B. P.)

**Trolle**, GUSTAVUS, a Swedish prelate, descended from a noble Danish family named Erik, was born near the close of the 15th century, and became archbishop of Upsala Oct. 30, 1514, but was besieged in his palace by an old family enemy; and, although reinforced by the interdict and troops of pope Leo X, he at length fell in battle on the island of Fionia, and died at Gottorp, near Sleswick, July 11, 1535. For the details of his stormy career see Hoefer, *Nouv. Biog. Générale*, s. v.

**Tromm** (*Van der Trommen*, Lat. *Trommius*), ABRAHAM, a learned Protestant divine of Holland, was born at Groningen, Aug. 23, 1633, and studied the classics, philosophy, and theology in that university. He travelled through Germany, Switzerland, France, and England, and on his return was appointed curate at Haren. In 1671 he was invited to the pastorate of Groningen, and continued there until his death, May 29, 1719. John Martinus, of Dantzic, having begun a *Concordance of the Old Testament* in Flemish, Tromm completed it (Amsterd. 1685-92, 2 vols. fol.). He also published a *Greek Concordance of the Septuagint* (Utr. 1718, 2 vols. fol.), which has remained a standard work.

**Tronchin, Louis**, a Swiss divine, was born at Geneva, Dec. 4, 1629, and after studying theology there and at Saumur, he travelled abroad and then became preacher at Lyons in 1654. In 1661 he was made professor of theology in Geneva, where he died, Sept. 8, 1705. He was noted for his mildness during the Calvinistic controversy of his time.

**Tronchin, Theodore**, a learned Swiss divine, father of the preceding, was born at Geneva, April 17,

1582. He was well educated, visited foreign universities, and on his return to Geneva, in 1606, he gave such proof of his learning that he was chosen professor of the Hebrew language. He was made minister in 1608, and created rector of the university in 1610. In 1616 he was promoted to the professorship of divinity. He was sent from Geneva to the Council of Dort, where he displayed his great knowledge in divinity, and a moderation which was highly applauded. For several of his works see Hoefer, *Nouv. Biog. Générale*, s. v.; Herzog, *Real-Encyclop.* s. v.

**Troop** is, in the A. V., especially employed as the rendering (sometimes "band," etc.) of גִּדּוּד, *gedûd*, which means a marauding party, in the forays for which Palestine has always been notorious, especially beyond the Jordan (Gen. xlix, 19; 1 Sam. iii, 22; xxii, 30; xxx, 8; Job xix, 12; Psa. xviii, 29; Jer. xviii, 22; Hos. vi, 9; vii, 1; Mic. v, 1).

**Tropæa** (τροπαια), the name of churches erected in honor of martyrs, or dedicated to them. The reason of the name is found in the reported appearance of the cross to Constantine, and in the labarum on which, according to Eusebius, were inscribed the words τοῦ σταυροῦ τροπαιον.

**Tropes**, or *sequence*, are verses sung before the holy Gospel in the mass. They are a kind of prose, written in a species of verse, though unfettered by any recognised law of metre. They were introduced at the close of the 9th century. Four only are found in the Roman missal. See SEQUENCE.

**Trophimus** (τροφίμος, *nutritious*) a Hellenistic Christian, who with others travelled with the apostle Paul in the course of his third missionary journey, and during part of the route which he took in returning from Macedonia towards Syria (Acts xx, 4). A.D. 54. From what we know concerning the collection which was going on at this time for the poor Christians in Judæa, we are disposed to connect him with the business of that contribution. Both he and Tychicus accompanied Paul from Macedonia as far as Asia (*ἀχρητῆς Ἀσίας*, loc. cit.), but Tychicus seems to have remained there, while Trophimus proceeded with the apostle to Jerusalem. There he was the innocent cause of the tumult in which Paul was apprehended, and from which the voyage to Rome ultimately resulted. Certain Jews from the district of Asia saw the two Christian missionaries together, and supposed that Paul had taken Trophimus into the Temple (xxi, 27-29). From this passage we learn two new facts, viz. that Trophimus was a Gentile, and that he was a native not simply of Asia, but of Ephesus. A considerable interval now elapses, during which we have no trace of either Tychicus or Trophimus; but in the last letter written by Paul, shortly before his martyrdom, from Rome, he mentions them both (*Τυχικὸν ἀπέστειλα εἰς Ἐφέσον*, 2 Tim. iv, 12; *τροφίμον ἀπέλπιον ἐν Μιλήτῳ ἀσθενούντα*, ver. 20). From the last of the phrases we gather simply that the apostle had no long time before been in the Levant, that Trophimus had been with him, and that he had been left in infirm health at Miletus. Of the further details we are ignorant; but this we may say here, that while there would be considerable difficulty in accommodating this passage to any part of the recorded narrative previous to the voyage to Rome, all difficulty vanishes on the supposition of two imprisonments, and a journey in the Levant between them. Trophimus was no doubt at Miletus on the occasion recorded in Acts xx, 15-38, but it is most certain that he was not left there. The theory also that he was left there on the voyage to Rome is preposterous; for the wind forced Paul's vessel to run direct from the south-west corner of Asia Minor to the east end of Crete (xxvii, 7). We may add that when Trophimus was left in sickness at Miletus, whenever that might be, he was within easy reach of his home friends at Ephesus, as we see from xx, 17.

Stanley thinks that Trophimus was one of the two brethren who, with Titus, conveyed the Second Epistle to the Corinthians (2 Cor. viii, 16-24). "Trophimus was, like Titus, one of the few Gentiles who accompanied the apostle; an Ephesian, and therefore likely to have been sent by the apostle from Ephesus with the first epistle, or to have accompanied him from Ephesus now; he was, as is implied of 'this brother,' whose praise was in all the churches, well known; so well known that the Jews of Asia [Minor?] at Jerusalem immediately recognised him; he was also especially connected with the apostle on this very mission of the collection for the poor in Judæa. Thus far would appear from the description of him in Acts xxi, 29. From xx, 4 it also appears that he was with Paul on his return from this very visit to Corinth" (*Commentary on Corinthians*, 2d ed. p. 492).

The traditional story that Trophimus was one of the seventy disciples is evidently wrong; but that part of the legend which states that he was beheaded by Nero's orders is possibly true (*Menol. Gr.* iii, 57).

**Tropici** are those who explain away, by figurative interpretations, texts of Scripture which Catholic faith and tradition require to be otherwise interpreted. Athanasius (*Ad Serap.* i, 2, 10, 21) gives the name Tropici to the *Pneumatomachi* (q. v.) in so marked a manner that it has narrowly escaped becoming a proper name of that sect. For example, they argued that in 1 Tim. v, 21 the name of the Holy Spirit would naturally follow the names of Father and Son, that the term "elect angels," tropically taken, includes the Holy Spirit, the inference being that the Holy Spirit is a created angel. The word Tropici has been used, again, by Catholic writers to describe those who err regarding the holy sacraments, and explain as mere figures the words of our Lord in John iii, 5; *Matt.* xvi, 26.

**Tropitæ** (τροπιταί) were a sect of heretics who held that our Lord acquired a body of flesh by conversion of the substance of the godhead into the substance of flesh; an opinion which arose in the latter time of the Arian controversy among those who, maintaining the true divinity of the Son of God, and rightly desiring to maintain his sinlessness, were perplexed by the erroneous assumption that the human body, as such, is and cannot but be the seat of sin. To avoid the impiety of attributing a sinful body to our Lord, they devised the tenet that the body of Christ is consubstantial with his divinity, which passes into the somewhat more definite proposition that the substance of the Word is converted into the substance of flesh, and that the flesh being in the form of man is thus called human. This heresy was first dealt with by Athanasius (*Epistle to Epictetus*), A.D. 370. Apollinaris was at the head of those who denied the true incarnation of Christ, asserting the general proposition that the Son of God did not assume that which in man is the seat of sin; and varied applications of this proposition were made by his followers. A belief in the possibility of the conversion of the godhead into flesh almost necessarily presupposes the reception of the Cabalistic doctrine that all matter is an emanation from God. Athanasius remarks that Valentinus fancied the flesh to be a part of Deity, and so concluded that the passion was common to the whole Trinity. Fabricius remarks that the heresy is confuted by Tertullian. The Council of Chalcedon determined that the two natures in Christ are united ἀρρήτως.

**Tropological** INTERPRETATION is where a moral signification is given to a passage. An illustration will explain this sense. In Deut. xxv, 4 we read, "Thou shalt not muzzle the ox when he treadeth out the corn." Paul (1 Cor. ix, 9) quotes this precept of the law, adding the comment, "Doth God take care for oxen? Or saith he it altogether for our sakes? For our sakes, no doubt, this is written."—Blunt, *Dict. of Doctrines*, s. v. See HERMENEUTICS.

**Trosle, COUNCIL OF** (*Concilium Trosleianum*), was held in Trosle, a small village near Soissons, France. It assembled June 26, 909, Herivé, archbishop of Rheims, presiding. The decrees of this council are signed by twelve prelates, and are contained in fifteen chapters; they are in the form rather of long exhortations than of canons, showing the pitiable condition of the Church.

1. Orders due respect to the Church, to clerks, and to monks.
3. Relates to the reform of abuses in monastic institutions.
4. Anathematizes those who pillage the Church.
5. Anathematizes those who injure and persecute the clergy.
6. Is directed against those who refuse tithes.
7. Against rapine and robbery, and orders restitution.
8. Is directed against the violent abduction of women, and incest.
9. Forbids priests to have women in their houses.
10. Exhorts all Christians to charity, and to avoid luxury and excess.
11. Forbids perjury and oath-breaking.
12. Is directed against passionate and litigious persons.
13. Against lars and homicides.
14. Denounces those who plunder the property of bishops after their death.
15. Contains an exhortation to all the faithful to abstain from sin and to do their duty.

See Mansi, *Concil.* ix, 520.

**Trost, MARTIN**, professor of Hebrew at Wittenberg, where he also died, April 8, 1636, was born at Hoxter in the year 1588. He published, *Grammatica Hebraica Universalis* (Hafniae, 1627, and often); excerpts from his grammar were published by Baldoivius, Gezelius, Mitternacht, and Mylius:—*Disputatio de Mutatione Punctorum Hebraeorum Generali* (Wittenberg, 1633):—*Novum Test. Syr. cum Versione Latina ex Diversis Editionibus Recensum. Accesserunt in fine notationes variantis lectionis collectae a M. Tr.* (Cöthen, 1621). See Fürst, *Bibl. Jud.* iii, 449; Winer, *Handbuch der theol. Literatur*, i, 55; ii, 808; Steinschneider, *Bibliog. Handbuch*, p. 141. (B. P.)

**Troth** (*truth*), a word occurring in the Prayer-book only in the marriage service, thus, "And thereto I plight thee my *troth*;" that is, "thereto I most solemnly pledge thee my *truth* and *sincerity*." Near the end of the same service the minister says that the persons now married have "pledged their *troth* each to other," i. e. have promised to be *true* and *faithful* to each other.—Stanton, *Dict. of the Church*, s. v.

**Trough** (תְּרוֹם, *shôketh*, from תָּרַם, *to drink*), a vessel of wood or stone for watering animals (Gen. xxiv, 20; xxx, 38). See WELL. But in Exod. ii, 16 a different term (רָחַף, *râhat*, from the idea of *flowing*; "gutter," Gen. xxx, 38, 41) is employed for the same thing. See also KNEADING-TROUGH.

**Troy, JOHN THOMAS, D.D.**, an Irish prelate, was born near Porterstown, in the county of Dublin, and at the age of fifteen went to Rome, where he became a Dominican, and finally rector of St. Clement's in that city. In 1776 he was elected bishop of Ossory. In January, 1779, he promulgated very spirited circulars against the outrages of the Whiteboys, and in October excommunicated them. In 1786 he was promoted to the see of Dublin. In November, 1787, he issued his pastoral directions to his clergy, in which he strictly prohibited the future celebration of midnight masses. In 1793 he published *Pastoral Instructions on the Duties of Christian Citizens*. He died May 11, 1823. See D'Alton, *Memoirs of the Archbishops of Dublin*, p. 480.

**Troyes, COUNCILS OF** (*Concilium Tricassinum*), were held in Troyes, France, a city which has a splendid Gothic cathedral, founded in 1208; the Church of St. Urban; the Church of St. John, in which Henry V of England was married; the Church of Sainte-Madeleine, containing a stone rood-loft of great beauty; and a public library of 110,000 volumes.

I. Held Oct. 25, 867. About twenty bishops, from the kingdoms of Charles and Lothaire, were present, who wrote a long letter to pope Nicholas I, in which they gave the history of the affair of Ebbo, and of the priests whom he had ordained. They, moreover, besought the pope not to interfere with the rule laid down by his predecessor, and not to permit, in future, the deposition of any bishop without the intervention of the holy see. This was in accordance with the principles of the false decretals of the pope. See Mansi, *Concil.* viii, 868.

II. Held in 878, by pope John VIII, who presided over thirty bishops. The former had come into France to escape from the violence of Lambert, duke of Spoleto. In the first session, the pope exhorted the bishops to compassionate the injuries which the Roman Church had suffered from Lambert and his accomplices, and to excommunicate them. The prelates, however, declined to act until the arrival of their brethren. In the second session, John read an account of the ravages committed by Lambert, after which the council declared him to be worthy of death and anathema. The archbishop of Arles presented a petition against bishops and priests leaving one Church for another, and also against persons deserting their wives in order to marry other women. In the third session, the bishops declared their consent to the pope's propositions. Hincmar of Laon, whose eyes had been put out, presented a complaint against his uncle, and demanded to be judged according to the canons. Hincmar of Rheims required that the cause might be delayed, to give him time to reply to the complaint. Further, the sentence of condemnation passed against Formosus, formerly bishop of Porto, and Gregory, a nobleman, was read, anathematizing them without hope of absolution; as also were the canons forbidding the translation of bishops, viz. those of Sardica, Africa, and of pope Leo. Seven canons were published.

1. Orders that temporal lords shall show due respect to bishops, and that they shall not sit down in their presence without their permission.

7. Forbids to receive anonymous accusations against any person.

III. Held in 1104, by the legate Richard, bishop of Albano, whom Paschal II had sent into France to absolve king Philip. The council was very numerous, and among those present we find Ivo of Chartres. Hubert, bishop of Senlis, accused of simony, cleared himself by oath. The election of the abbot Godefroi, by the people of Amiens, to the bishopric of that town was approved, and, in spite of the abbot's resistance, he was compelled to consent to it. See Mansi, *Concil.* x, 738.

IV. Held in 1107, by pope Paschal II, who presided. The main object of this council was to excite the zeal of men for the Crusade, besides which sentence of excommunication was denounced against those who should violate the Truce of God. The freedom of elections of bishops was asserted and established, and the condemnation of investitures repeated. Several German bishops were on various accounts suspended. Mansi (*Concil.* x, 754) adds five canons to those usually attributed to this council.

1. Orders that any one receiving investiture at the hands of a layman shall be deposed, as well as the persons ordaining or consecrating him.

V. Held Jan. 13, 1128, by the legate Matthew, bishop of Albano, assisted by the archbishops of Rheims and Sens, thirteen bishops, and by St. Bernard, St. Stephen, and other abbots. A rule was drawn up for the Order of the Templars, instituted in 1118, prepared by authority of the pope and of the patriarch of Jerusalem. In this council the white dress was given to the Templars. See Mansi, *Concil.* x, 922.

**Truber**, PRIMUS, a notable personage in the Reformation in Germany, was consecrated to the priesthood by Peter Bonomus, bishop of Trieste, and took charge

of the parish of Lack in 1527. In 1531 he became a canon of Laibach, where the new doctrine was already promulgated, and soon afterwards he took ground in opposition to the Church of Rome. He was assailed by the clergy and the government, but protected by the nobles until 1540. Bishop Bonomus then called him to Trieste. In 1547 the bishop of Laibach, Urban Textor, procured an order for the apprehension of Truber, in consequence of which the latter was compelled to flee. He found a new parish at Rothenburg in the following year, and while there he entered into wedlock with a woman named Barbara. From 1553 to 1560 he was pastor at Kempten. As early as 1550, or, perhaps, earlier still, Truber had endeavored to minister to the needs of his countrymen by preparing translations in the Wendish dialect of an *Abecedarium* and a catechism, which were printed, with Latin letters, at Tübingen. The prosecution of his plans was made possible through Vergerius (q. v.), who induced duke Christopher of Württemberg to pay for the printing. In 1555 the Wendish *Gospel of St. Matthew* appeared in print, and in 1556 the other historical books of the New Test. Romans, both epistles to the Corinthians, and Galatians were published in 1561. After various vicissitudes, Truber obtained the parish of Urach, where the famous baron Hans Ungnad became his patron and enabled him to establish his own press for the printing of Slavic books. The types used were both Glagolitic and Cyrillic. See GLAGOLITA. The accounts of the printing-office are still in existence, and show that many princes and towns contributed to its support. Its publications included Luther's catechisms, the *Augsburg Confession*, and the *Apology*, Melancthon's *Loci Communes*, the *Württemberg Church Discipline*, the *Beneficium Christi*, and spiritual hymns; but the enterprise was not remunerative, and was abandoned soon after the death of baron Ungnad in 1564. Truber passed the last twenty years of his life in charge of the parish of Deredingen, near Tübingen. Two days before he died he dictated to his amanuensis the closing sentences for his translation of Luther's *Hauspostille*. He died June 28, 1586, after a brief illness, and in the seventy-eighth year of his age. See Sillem, *Primus Truber, der Reformator Krains* (Erlang. 1861); Schnurrer, *Slavischer Bücherdruck in Württemberg* (Tüb. 1799); and particularly Herzog, *Real-Encyclop.* xxi, s. v., where a much more complete and somewhat divergent sketch of Truber's career is given.

**Trublet**, NICHOLAS C. J., a French abbé, of temporary fame, was born at St. Malo, in December, 1697. There are no memoirs of his education or early progress, but it appears that he was treasurer of the Church of Nantes, and afterwards archdeacon and canon of St. Malo. His irreproachable conduct and agreeable manners procured him very general esteem as a man, but as a writer he never ranked high in public opinion, and though ambitious of a seat in the French Academy, did not secure that honor until 1761. He died in March, 1770, at his native place. His principal works are, *Essais de Littérature et de Morale* (4 vols. 12mo):—*Panegyriques des Saints*:—*Mémoires pour servir à l'Histoire de Messieurs de la Motte et de Fontenelle* (Amst. 1761). He was also a contributor to the *Journal des Savans* and *Journal Chrétien*. See Chalmers, *Biog. Dict.* s. v.; Hoefer, *Nouv. Biog. Générale*, s. v.

**Truce of God**, a scheme set on foot by the Church in the Middle Ages for the purpose of quelling the violence and preventing the frequency of private wars, occasioned by the fierce spirit of barbarism. It was first proposed at the Council of Chaux in 989, adopted by the Council of Orleans in 1016, and by the Council of Limoges in 1031. In France a general peace and cessation from hostilities took place A.D. 1032, and continued seven years, through the efforts of the bishop of Aquitaine. A resolution was formed that no man should, in time to come, attack or molest his adversaries during the season set apart for celebrating the

great festivals of the Church, or from the evening of Thursday in each week to the morning of Monday in the week ensuing, the intervening days being consecrated as particularly holy—Thursday as the day of our Lord's ascension; Friday as that of his Passion; Saturday, when he rested in the grave; and Sunday, the day of his resurrection. In 1034 it was opposed by the bishop of Cambray. Later it was extended to nearly all the more important fasts, feasts, and holy seasons of the Church. England (1042) and Italy adopted the custom, which was further confirmed by the second and third Lateran councils (A.D. 1139, 1179). A change in the dispositions of men so sudden, and one which proposed a resolution so unexpected, was considered as miraculous, and the respite from hostilities which followed upon it was called the "Truce of God." This cessation from hostilities during three complete days every week allowed a considerable space for the passions of the antagonists to cool, and for the people to enjoy a respite from the calamities of war, and to take measures for their own security. The triumph of legal over feudal government eventually did away with the institution and the necessity for it. See Trench, *Medieval Church History*, p. 424 sq.

**True, CHARLES K., D.D.**, an eminent Methodist Episcopal divine, was born in Portland, Me., Aug. 14, 1809. The family afterwards removed to Boston. He graduated at Harvard University in 1832, having been converted at the Eastham camp-meeting while connected with that college, and immediately commenced preaching in the vicinity, being among the first Methodist preachers at the opening of denominational services in Newton Upper Falls, established through the faithful endeavors of Marshall S. Rice. His early efforts awakened great attention. His personal appearance was attractive, his voice pleasant, his address graceful, and his discourses often very eloquent. He entered the New England Conference in 1833, was an agent of the New England Education Society in 1834, and became the first principal of the Amenia Seminary in 1835. He entered the New York Conference in 1836, and had a memorable experience, both in the conference and in his charge at Middletown, Conn., in the antislavery controversy, having early taken very pronounced grounds on the question. In 1838 he was transferred to the New England Conference, and stationed at Lynn. He remained, filling appointments with much acceptableness, in Boston and vicinity until 1849, when he was elected professor of intellectual and moral science in Wesleyan University. He became again a member of the New York Conference in 1860, but re-entered the New England Conference in 1866. From 1870 to 1873 he was a financial agent of the Wesleyan University, and was a member of the New York East Conference until his death, which occurred suddenly, June 20, 1878. During his last years he was connected with one or two of the charitable societies whose offices are in New York city, and supplied the pulpits of churches in the New York East Conference not far distant from his home. Dr. True wrote a text-book upon logic, and several interesting volumes of a historical character. He was a man of fine abilities, an original thinker, with marked repose of mind and manner, self-reliant, and with just enough eccentricity to give an original flavor to his opinions. He was a good preacher, at times powerful in discourse, and particularly effective in exhortation. See *Minutes of Annual Conferences*, 1879, p. 30 sq.

**True Reformed Dutch Church** is an organization which grew out of the secession of the Rev. Solomon Froeligh, D.D., in 1822. He was a professor of theology, a man of erudition, and pastor of the two congregations of Hackensack and Schralenburg, N. J., which he carried with him. His secession was the culmination of difficulties of long standing, in which he was subjected to censure for aggression upon a neigh-

boring Church. He refused to submit to the authorities of the Church. A number of disaffected ministers united with him, together with portions of their churches. The grounds alleged for their separation were that the Dutch Church had become erroneous in doctrine, lax in discipline, and corrupt in practice. The confusion, strife, and troubles produced by this conflict were long and bitter. The "True Reformed Dutch Church" retains the standards of the Church which it left, and declares that it alone keeps them in their purity. It holds no fellowship with any other denomination, refuses to co-operate with the benevolent religious institutions of the age, and is generally antinomian in sentiment and practice. The churches of this sect are less than twenty in number, small, feeble, and dwindling away with the survivors of the original strife. They are located in New Jersey and New York. For full accounts, reference is made to their pamphlet entitled *Reasons Assigned by a Number of Ministers, Elders, and Deacons for Declaring Themselves the True Reformed Dutch Church in the United States of America*. See also Corwin, *Manual of the Ref. Church in America*; Taylor, *Annals of Classis and Township of Bergen*, very full and accurate. (W. J. R. T.)

**Trullo, COUNCIL OF**, the name by which the sixth Council of CONSTANTINOPLE (q. v.) is called, from the circumstance of its having been held in the domed chapel of the palace.

**Trumbull, Benjamin, D.D.**, a Congregational minister, was born in Hebron, Conn., Dec. 19, 1735, graduated at Yale College in 1759, and was ordained December, 1760, pastor at North Haven, where he remained until his death, Feb. 2, 1820. He published, *A Discourse Delivered at Freemans' Meeting* (1773):—*A Plea in Vindication of the Connecticut Title to the Contested Lands lying West of the Province of New York, Addressed to the Public* (1776):—*An Appeal to the Public respecting Divorce* (1785):—*An Address on Family Religion* (1807):—*Twelve Discourses on the Divine Origin of the Scriptures* (1810):—*A General History of the United States*, etc. (ed.):—*Two Pamphlets on the Unlawfulness of Marrying a Wife's Sister* (ed.):—*A Complete History of Connecticut* (2 vols. 1797, 1818):—and several occasional Sermons. See Sprague, *Annals of the Amer. Pulpit*, i, 584.

**Trumbull, Robert, D.D.**, a distinguished Baptist minister and scholar, was born in Whiteburn, Linlithgowshire, Scotland, Sept. 10, 1809. He was brought up as a Presbyterian. Having graduated at the Glasgow University, he attended the theological lectures of Drs. Chalmers and Dick in Edinburgh, having among his fellow-students Robert Pollok, the author of the *Course of Time*. While pursuing his theological studies, he changed his sentiments on the subject of Christian baptism, and connected himself with a Baptist Church. For a year and a half he preached in Westmancotte, Worcestershire, England. In 1833 he came to this country, and for two years was pastor of the Second Baptist Church in Danbury, Conn., when he was called to the pastorate of the First Baptist Church in Detroit, Mich., where he remained two years, and then became pastor of the South Baptist Church in Hartford, Conn. In all these churches his labors were greatly blessed. For two years he continued in Hartford, and then accepted a call in 1839 to what is now the Harvard Street Church in Boston, where his six years' (1839-45) ministry added greatly to the strength of the Church. In July, 1845, he returned to Hartford, to take the pastoral charge of the First Baptist Church in that city. His connection with that Church as its minister continued for twenty-four years. "Under his earnest and faithful ministry the Church enjoyed a succession of revivals and constant accessions, till it became in numbers, beneficence, and influence one of the strongest in the denomination." The unusually long pastorate of Dr. Trumbull closed in 1869. It was not his wish

again to become a permanent pastor. For more than two years he preached in New Haven, supplying the pulpit of a mission chapel in Dwight Street one year, and another year preaching in a chapel in the north-western part of the city. Dr. Trumbull was chosen in 1872 secretary of the Connecticut Baptist Convention. In this capacity he served for the remainder of his life, performing a work for the feeble Baptist churches in Connecticut the value of which cannot be overestimated. His memory is cherished with warm affection in the community and state which he so long blessed by his Christian ministry. For a little more than five years he devoted himself with great zeal to his work, and saw it abundantly successful. He died at Hartford, Nov. 20, 1877. Dr. Trumbull was a voluminous writer, considering the amount of ministerial work he performed during his life. Among his published writings were the following: *Olympia Morata* (1842):—*Vinel's Vital Christianity* (a translation) (1846):—*Genius of Scotland* (1847):—*Pulpit Writers of France and Switzerland* (1848):—*Genius of Italy* (1849):—*Theophany, or the Manifestation of God in Christ* (1851):—*Vinel's Miscellanies* (1852):—*Life Pictures* (1857). He edited also sir William Hamilton's *Discussions on Philosophy, Literature, and University Reform*. He was the editor of the *Christian Review* for two years. See *Christian Secretary*, Nov. 28, 1877. (J. C. S.)

**Trump** (σάλπιγξ, 1 Cor. xv, 22; 1 Thess. iv, 16). See TRUMPET.

**Trumpet** is in the A.V. usually the rendering of one or the other of the two Hebrew words detailed below; but besides these it occasionally stands as the representative of the following: יֹבֵב, *yobél*, Exod. xix, 13, the jubilee (q. v.) trumpet; תִּקְוֶה, *takha*, Ezek. vii, 14, prop. the blowing of the trumpet. See TRUMPETS, FEAST OF.

1. חֲצֹצְרָה, *chatsotserâh* (Sept. σάλπιγξ, Vulg. *tuba*), prob. an onomatopoeic word, like the Lat. *tarantantara*, from the quivering reverberation of its sound, was the straight trumpet (Josephus, *Ant.* iii, 12, 6; Jerome, *ad Hos.* v, 8; Buxtorf, *Lex. s. v.*), and is the term used in Numb. x, 2, 8, 9, 10; xxxi, 6; 2 Kings xi, 14 ("trumpeter," in first occurrence); xii, 13; 1 Chron. xiii, 8; xv, 24, 28; xvi, 6, 42; 2 Chron. v, 12, 13; xiii, 12, 14; xv, 14; xx, 28; xxiii, 13; xxix, 26, 27, 28; Ezra iii, 10; Neh. xii, 35, 41; Psa. xcvi, 6; Hos. v, 8. There were originally two such, which the priests used on festive occasions (Numb. x, 2 sq.; comp. xxxi, 6; 2 Kings xii, 13). Later (in David's time) the instruments were of a richer character (1 Chron. xv, 24; xvi, 42; 2 Chron. v, 12 sq.; xxix, 20; for a conjecture as to their form, see Sommer, *Bibl. Abhandl.* i, 39 sq.). Similar ones were employed in the year of jubilee (2 Kings xi, 14), and for popular proclamations (Hos. v, 8); comp. Rosellini, *Monum.* II, iii, 32; Wilkinson, ii, 262. The form of this trumpet is indicated in the sculpture on the Arch of

Titus at Rome (see Reland, *Spolia Templi Hieros.* p. 184 sq.) and on coins (Fröhlich, *Anal. Syr.* proleg. p. 80, pl. 18, fig. 17 and 18), and it appears to have emitted a clear, shrill tone (comp. Foskel, i, 86), adapted to an *alarum* (שִׁפְפֹּה). See MUSICAL INSTRUMENTS.

2. שֹׁפָר, *shophâr* (Sept. usually σάλπιγξ, Vulg. *buccina*), was the curved trumpet or horn (Lat. *lituus*) for signals; and is the word elsewhere rendered "trumpet" in the A. V. ("cornet," 1 Chron. xv, 28; 2 Chron. xv, 14; Psa. xcvi, 6; Hos. v, 8). It was sounded in the year of jubilee (Lev. xxv, 9; the Talmudic New-year's-day, Mishna, *Rosh hash-Shanah*, iii, 3), in battle (Job xxxix, 25 [28]; Jer. iv, 5; vi, 1), and by sentinels (Ezek. xxxiii, 6); and had a loud (Isa. lviii, 1) tone like a thunder-pearl (Exod. xix, 16, 19). Some writers fail to distinguish this from the preceding kind of trumpet (Credner, *Joel*, p. 164 sq.; Hoffmann, in Warnekros, *Hebr. Al-terth.* p. 598 sq.); both instruments are named in the same connection in 1 Chron. xv, 28; 2 Chron. xv, 14; Psa. xcvi, 6; Hos. v, 8 (see Zoega, *De Buccina* [Lips. 1712]). Jerome (on the passage last cited) clearly distinguishes the *shophâr*: "*Buccina pastoralis est et cornu recurvo efficitur, unde et proprie Hebraice sophar, Græce σφαγην appellatur.*" According to the Mishna (*ut sup.*), however, the *shophâr* was sometimes straight and at others crooked (see Doughtæi *Analect.* i, 99 sq.). Curved horns (as of oxen or sheep) are still common in the synagogue under the same name (שֹׁפָר); according to the Gemara (*Shabb.* xxxvi, 1), שֹׁפָר originally denoted only the curved horn, and not until the downfall of the Jewish polity was it confounded with the חֲצֹצְרָה. The second Temple contained thirteen boxes (in the court of the women), shaped like (straight) trumpets (shopharoth), for the deposition of alms (Mishna, *Shekal.* vi, 5). The horn with which the year of jubilee was ushered in is technically called (as above observed) שֹׁפָר הַיּוֹבֵל, fully הַיּוֹבֵל שֹׁפָר (Josh. vi, 4 sq.); and the force of breath required to sound it is denoted by the term כֶּשֶׁף, *to draw out* (see Winer's *Simonis Lex.* p. 394, 584; comp. Gräser, *Kathol. Messe*, i, 107 sq.). See CORNET.

Various Forms of Trumpets.

1, 2, 3, 4. Ancient horns and curved trumpets; 5. Straight trumpet; 6. Pipe.

Ancient Egyptian Trumpets.

As above intimated, the Lord commanded Moses to make two trumpets of beaten silver, for the purpose of calling the people together when they were to decamp (Numb. x). They chiefly used these trumpets, however, to proclaim the beginning of the civil year, the beginning of the sabbatical year (Lev. xxiii, 24; Numb. xxix, 1), and the beginning of the jubilee (Lev. xxv, 9, 10). Josephus says (*Ant.* iii, 12, 6) that they were near a cubit long, and that their tube or pipe was of the thickness of a common flute. Their mouths were no wider than just admitted to blow into them, and their ends were like those of a modern trumpet. There were originally but two in the camp, though afterwards a

great number were made. In the time of Joshua there were seven (Josh. iii, 4), and at the dedication of the Temple of Solomon there were one hundred and twenty priests that sounded trumpets (2 Chron. v, 12). The following particulars concerning the use of trumpets in the Temple will be useful, and are collected chiefly from Lightfoot's *Temple Service*. The trumpets were sounded exclusively by the priests, who stood not in the Levitical choir, but apart, and opposite to the Levites, on the other side of the altar, both parties looking towards it—the priests on the west side and the Levites on the east. The trumpets did not join in the concert, but were sounded during certain regulated pauses in the vocal and instrumental music. "The manner of their blowing with their trumpets was first a long plain blast, then a blast with breakings and quaverings, and then a long plain blast again. . . . The priests did never blow but these three blasts went together. . . . The Jews do express these three several soundings that they made at one blowing by the words (translated) 'An alarm in the midst, and a plain note before and after it,' which our Christian writers do most commonly express by *tarantara*, though that word seems to put the quavering sound before and after, and the plain in the midst, contrary to the Jewish description of it." See **NEW YEAR, FESTIVAL OF**.

In addition to the sacred trumpets of the Temple, whose use was restricted to the priests, even in war and in battle, there were others used by the Hebrew generals (Judg. iii, 27). Ehud sounded the trumpet to assemble Israel against the Moabites, whose king, Eglon, he had lately slain. Gideon took a trumpet in his hand, and gave each of his people one, when he assaulted the Midianites (vii, 2, 16). Joab sounded the trumpet as a signal of retreat to his soldiers, in the battle against Abner (2 Sam. ii, 28), in that against Absalom (xviii, 16), and in the pursuit of Sheba, son of Bichri (xx, 22). See **WAR**.

In Matt. vi, 2 we read, "When thou doest thine alms, do not sound a trumpet before thee, as the hypocrites do in the synagogues," and most expositors have regarded this as an expression derived by an easy metaphor from the practice of using the trumpet to proclaim whatever was about to be done, in order to call attention to it and make it extensively known. Others, however, refer it to the trumpet-shaped boxes in which the alms were deposited (see above), and which gave a ringing sound as the coin was dropped into them. See **TEMPLE**.

**TRUMPETS, FEAST OF** (יִּזְכֹּרֶת, Numb. xxix, 1; Sept. ἡμέρα σφουαίας; Vulg. dies clangoris et tubarum; יִזְכֹּרֶת, Lev. xxiii, 24; μεσημέσιον σαλπικων; *sabbatum memoriale clangentibus tubis*: in the Mishna, ראש־השָׁנָה, "the beginning of the year"), the feast of the new moon, which fell on the first of Tisri. It differed from the ordinary festivals of the new moon in several important particulars. It was one of the seven days of Holy Convocation. See **FEAST**. Instead of the mere blowing of the trumpets of the Temple at the time of the offering of the sacrifices, it was "a day of blowing of trumpets." In addition to the daily sacrifices and the eleven victims offered on the first of every month [see **NEW MOON**], there were offered a young bullock, a ram, and seven lambs of the first year, with the accustomed meat-offerings, and a kid for a sin-offering (Numb. xxix, 1-6). The regular monthly offering was thus repeated, with the exception of one young bullock.

It is said that both kinds of trumpet were blown in the Temple on this day, the straight trumpet (יִצְחָקֶת) and the cornet (שֹׁפָר or קֶרֶן), and that elsewhere any one, even a child, might blow a cornet (Reland, iv, 7, 2; Carpzov, p. 425; *Rosh hash-Shan*, i, 2). When the festival fell upon a Sabbath, the trumpets were blown in the Temple, but not out of it (*Rosh hash-Shan*, iv, 1). See **JUBILEE**.

It has been conjectured that Psa. lxxxi, one of the songs of Asaph, was composed expressly for the Feast of Trumpets. The psalm is used in the service for that day by the modern Jews. As the third verse is rendered in the Sept., the Vulgate, and the A. V., this would seem highly probable—"Blow up the trumpet in the new moon, the time appointed, on our solemn feast day." But the best authorities understand the word translated *new moon* (כֶּזֶבֶד) to mean *full moon*. Hence the psalm would more properly belong to the service for one of the festivals which take place at the full moon, the Passover, or the Feast of Tabernacles (Gesenius, *Thesaur.* s. v.; Rosenmüller and Hengstenberg on Psa. lxxxi).

Various meanings have been assigned to the Feast of Trumpets. Maimonides considered that its purpose was to awaken the people from their spiritual slumber to prepare for the solemn humiliation of the Day of Atonement, which followed it within ten days. This may receive some countenance from Joel ii, 15, "Blow the trumpet (שֹׁפָר) in Zion, sanctify a fast, call a solemn assembly." Some have supposed that it was intended to introduce the seventh or sabbatical month of the year, which was especially holy because it was the seventh, and because it contained the Day of Atonement and the Feast of Tabernacles (Fagius, in *Lev.* xxiii, 24; Buxtorf, *Syn. Jud.* c. 24). Philo and some early Christian writers regarded it as a memorial of the giving of the law on Sinai (Philo, *Opp.* v, 46, ed. Tauch.; Basil, in Psa. lxxxi; Theodoret, *Quest.* xxxii in *Lev.*). But there seems to be no sufficient reason to call in question the common opinion of Jews and Christians, that it was the festival of the New-year's-day of the civil year, the first of Tisri, the month which commenced the sabbatical year and the year of jubilee. If the New-moon Festival was taken as the consecration of a natural division of time, the month in which the earth yielded the last ripe produce of the season, and began again to foster seed for the supply of the future, might well be regarded as the first month of the year. The fact that Tisri was the great month for sowing might thus have easily suggested the thought of commemorating on this day the finished work of creation, when the sons of God shouted for joy (Job xxxviii, 7). The Feast of Trumpets thus came to be regarded as the anniversary of the birthday of the world (*Mishna, Rosh hash-Shan*, i, 1; Hupfeld, *De Fest. Heb.* ii, 13; Buxtorf, *Syn. Jud.* c. 24).

It was an odd fancy of the rabbins that on this day, every year, God judges all men, and that they pass before him as a flock of sheep pass before a shepherd (*Rosh hash-Shan*, i, 2). See **NEW YEAR**.

**Trust** in God signifies confidence in or dependence upon him. This trust ought to be—1. Sincere and unreserved, not in idols, in men, in talents, riches, power, in ourselves part and in him part (Prov. iii, 5-6); 2. Universal—body, soul, circumstances (1 Pet. v, 7); 3. Perpetual (Isa. xxvi, 4); 4. With a lively expectation of his blessing (Mic. vii, 7). The encouragement we have to trust in him arises—1. From his liberality (Rom. viii, 32; Psa. lxxxiv, 11); 2. His ability (James i, 17); 3. His relationship (Psa. ciii, 13); 4. His promise (Isa. xxxiii, 16); 5. His conduct in all ages to those who have trusted him (Gen. xlviii, 15, 16; Psa. xxxvii, 25). The happiness of those who trust in him is great, if we consider, 1. Their safety (cxxx, 1); 2. Their courage (xxvii, 1); 3. Their peace (Isa. xxvi, 3); 4. Their character and fruitfulness (Psa. i, 3); 5. Their end (xxxvii, 37; Job v, 26). See **FAITH**.

**Trust-deeds** are forms of conveyances of real estate specifying some trust for which the property is held. At an early period of his history Wesley published a model deed for the settlement of chapels, to the effect that the trustees, for the time being, should permit Wesley himself, and such other persons as he might from time to time appoint, to have the free use of such

premises, to preach therein God's word. After his death, and that of Charles Wesley and William Grimshaw, the chapels were to be held in trust for the sole use of such persons as might be appointed at the yearly conference of the people called Methodists, provided that the said persons preached no other doctrines than those contained in Wesley's *Notes on the New Test.*, and in his four volumes of *Sermons*. This was followed, on Feb. 28, 1784, by the *Deed of Declaration*, explaining the words "yearly conference of the people called Methodists." This *Deed of Declaration* is recognised in the trust-deeds of all the chapels built by the Wesleyans. In the Methodist Episcopal Church it is directed that the following trust-clause shall be inserted in each deed: "In trust, that said premises shall be used, kept, maintained, and disposed of as a place of divine worship for the use of the ministry and membership of the Methodist Episcopal Church in the United States of America; subject to the discipline, usage, and ministerial appointments of said Church, as from time to time authorized and declared by the General Conference of said Church, and the Annual Conference within whose bounds the said premises are situate. In trust, that said premises shall be held, kept, and maintained as a place of residence for the use and occupancy of the preachers of the Methodist Episcopal Church in the United States of America who may, from time to time, be stationed in said place: subject to the usage and discipline of said Church, as from time to time authorized and declared by the General Conference of said Church, and by the Annual Conference within whose bounds said premises are situate."

**Trustees** are Church officers appointed for the purposes of holding the legal title to Church property, and of taking care thereof. In the different branches of Methodism there are some differences of provision, but in general principles they are the same. In the Methodist Episcopal Church the *Discipline* says, "Each board of trustees of our Church property shall consist of not less than three nor more than nine persons, each of whom shall be not less than twenty-one years of age, two thirds of whom shall be members of the Methodist Episcopal Church." Where the Church has not received a legal act of incorporation or charter, and where the law of the state does not specify any particular mode of election, "the trustees are elected annually by the Fourth Quarterly Conference . . . upon the nomination of the preacher in charge, or the presiding elder of the district. Where the state or territory directs the mode of election, that mode must be strictly observed; and where charters of incorporation are obtained, they specify the particular qualifications and time of election of these officers."

The trustees have the charge of all repairs to be made on Church property, and of all financial matters pertaining to its preservation; are directed by the *Discipline* to make an annual report to the Fourth Quarterly Conference of the amount and value of the property, expenditures and liabilities, etc.; and are held amenable to the Quarterly Conference for the manner in which they perform their duty. By the action of the General Conference of 1876 trustees are forbidden to "mortgage or encumber the real estate for the current expenses of the Church."

**TRUSTEES, GENERAL BOARD OF.** The General Conference of the Methodist Episcopal Church, in 1864, appointed a committee of seven to report a plan of trusteeship. The report of the committee was adopted, and is substantially the same as the section of the *Discipline* on that subject. The General Conference appointed a board whose headquarters should be at Cincinnati, and which was incorporated with the title of "the Board of Trustees of the General Conference of the Methodist Episcopal Church in the United States," and its charter was recorded July 11, 1865. According to the *Discipline*, "The duty of the board shall be to hold in trust, for the benefit of the Methodist Episcopal Church, any

and all donations, bequests, grants, and funds in trust, etc., that may be given or conveyed to said board, or to the Methodist Episcopal Church, as such, for any benevolent object, and to administer the said funds, and the proceeds of the same, in accordance with the direction of the donors," etc.

**Truth**, conformity to fact.

1. It has been distinguished by most *philosophical* writers, according as it respects being, knowledge, and speech, into

(1.) *Veritas entis*, or truth of the thing. The foundation of all truth is in truth of being—that truth by which a thing is what it is, by which it has its own nature and properties; and has not merely the appearance, but reality, of being. Philosophy is the knowledge of being; and if there were no real being—that is, if truth could not be predicated of things—there could be no knowledge.

(2.) *Veritas cognitionis*, or truth of knowledge. Truth, as predicated of knowledge, is the conformity of our knowledge with the reality of the object known; for, as knowledge is the knowledge of something, when a thing is known as it is that knowledge is formally true. To know that fire is hot is true knowledge. Objective truth is the conformity of the thing or object known with true knowledge.

(3.) *Veritas signi*, or truth of the sign. This consists in its adequateness or conformity to the thing signified. The truth and adequacy of signs belong to enunciation in logic.

2. *Scientific* truth consists in the conformity of thoughts to things; and *moral* truth lies in the correspondence of words with thoughts; while *logical* truth depends on the self-consistency of thoughts themselves.

3. Truth, in the strict *logical* sense, applies to propositions, and nothing else; and consists in the conformity of the declaration made to the actual state of the case. In its *etymological* sense, truth signifies that which the speaker *believes* to be the fact. In this sense it is opposed to a *lie*, and may be called *moral*. Truth is not unfrequently applied to arguments, when the proper expressions would be "correct," "conclusive," "valid." The use of truth in the sense of *reality* should be avoided. People speak of the *truth* or *falsity* of facts; whereas, properly speaking, they are either *real* or *fictional*. It is the statement that is true or false.

4. *Necessary* truths are such as are known independently of inductive proof; are those in which we not only learn that the proposition is true, but that it *must* be true; are those the opposite of which is inconceivable, contradictory, impossible. *Contingent* truths are those which, without doing violence to reason, we may conceive to be otherwise.

5. *Absolute* truth is the knowledge of God, the ground of all relative truth and being. All relative truth is partial because each relation presupposes something which is not relative. As to us relative truth is partial in another sense, because the relations known to us are affected by relations which we do not know, and therefore our knowledge even as relative knowledge is incomplete as a whole and in each of its parts. At the same time, relative knowledge is real knowledge; and if it were possible habitually to realize in consciousness that it is partial, it would be strictly true so far as it goes. See Blunt, *Dict. of Hist. Theol.* s. v.; Fleming, *Vocab. of Philos. Sciences*, s. v.

6. In Scripture language, eminently, God is truth; that is, in him is no fallacy, deception, perverseness, etc. Jesus Christ, being God, is also the truth, and is the true way to God, the true representative, image, character, of the Father. The Holy Spirit is the Spirit of truth, who communicates truth, who maintains the truth in believers, guides them in the truth, and who hates and punishes falsehood or lies, even to the death of the transgressor (Psa. xxxi, 5; John xiv, 6, 17; Acts v, 3, etc.).

Especially is truth a name given to the religion of

Jesus, in opposition to that of the Jew and that of the heathen. As contrasted with the Jewish system, it was the "truth" in the sense of "reality," as distinguished from the "emblems," symbols, representations, of that reality; from the "shadow of good things to come," contained in the Levitical law: in this sense it is that the apostle tells us "the law was given by Moses, but grace and truth came by Jesus Christ." As contrasted with paganism, Christianity was *truth* opposed to *falsehood*. The heathen mythology not only was not *true*, but was not even supposed as true: it not only deserved no faith, but it demanded none. Jesus inaugurated a new way of propagating a religion, by inviting converts not to conform to its institutions, but to "believe" and to let their actions be agreeable to truth: nothing, then, was more natural than that Christianity should receive names expressive of this grand peculiarity, *the truth* and *the faith*. See Whately, *Essays on Difficulties of St. Paul*, essay i.

**Tryphæ'na** (Τρύφαινα, *luxurious*), a person mentioned in connection with Tryphosa (q. v.), the two being Christian women at Rome, who, among those that are enumerated in the conclusion of Paul's letter to that city, receive a special salutation, and on the special ground that they are engaged there in "laboring in the Lord" (Rom. xvi, 12). A.D. 55. They may have been sisters, but it is more likely that they were fellow-deaconesses, and among the predecessors of that large number of official women who ministered in the Church of Rome at a later period (Eusebius, *Hist. Eccl.* vi, 43); for it is to be observed that they are spoken of as at that time occupied in Christian service (τὰς κοπιώσας), while the salutation to Persia, in the same verse, is connected with past service (ἥτις κοπίσεν).

We know nothing more of these two sister-workers of the apostolic time; but the name of one of them occurs curiously, with other names familiar to us in Paul's epistles, in the Apocryphal *Acts of Paul and Thecla*. See THECLA LEGEND. There Tryphæna appears as a rich Christian widow of Antioch, who gives Thecla a refuge in her house, and sends money to Paul for the relief of the poor (see Jones, *On the Canon*, ii, 371, 380). It is impossible to discern any trace of probability in this part of the legend.

It is an interesting fact that the columbaria of "Cæsar's household" in the *Vigna Codini*, near the Porta S. Sebastiano, at Rome, contain the name Tryphæna, as well as other names mentioned in this chapter, Philologus and Julia (ver. 15), and also Amplias (ver. 8). See Wordsworth, *Tour in Italy* (1862), ii, 173.

**Trypho**, an eminent man, who was seized as a Christian and imprisoned at Nice, about A.D. 50, in company with another, named Respicus. They were soon after put to the rack, which they bore with admirable patience for three hours, and uttered the praises of the Almighty the whole time. They were then exposed naked to the severity of the open air, which benumbed all their limbs, as it was in the very depth of winter.

**Try'phon** (Τρύφων, a not unfrequent Greek name of the later age), a usurper of the Syrian throne. His proper name was *Diodotus* (Strabo, xvi, 2, 10; Appian, *Syr.* 68), and the surname Tryphon was given to him, or, according to Appian, adopted by him, after his accession to power (Livy, *Epit.* liii, lv). He was a native of Cariana, a fortified place in the district of Apamea, where he was brought up (Strabo, *loc. cit.*). In the time of Alexander Balas he was attached to the court (Appian, *loc. cit.*, δούλος τῶν βασιλέων; Diodor. *Fr.* xxi, ap. Müller, *Hist. Gr. Fragm.* ii, 17, στρατηγός; 1 Macc. xi, 89, τῶν παρὰ Ἀλεξ.); but towards the close of his reign he seems to have joined in the conspiracy which was set on foot to transfer the crown of Syria to Ptolemy Philometor (ver. 13; Diodor. *loc. cit.*). After the death of Alexander Balas he took advantage of the unpopularity of Demetrius II to put forward the

claims of Antiochus VI, the young son of Alexander (1 Macc. xi, 39), B.C. 145. After a time he obtained the support of Jonathan, who had been alienated from Demetrius by his ingratitude, and the young king was crowned (B.C. 144). Tryphon, however, soon revealed his real designs on the kingdom, and, fearing the opposition of Jonathan, he gained possession of his person by treachery (xii, 39-50), and after a short time put him to death (xiii, 23). As the way now seemed clear, he murdered Antiochus, and seized the supreme power (ver. 31, 32), which he exercised, as far as he was able, with violence and rapacity (ver. 34). His tyranny again encouraged the hopes of Demetrius, who was engaged in preparing an expedition against him (B.C. 141), when he was taken prisoner (xiv, 1-3), and Tryphon retained the throne (Justin, xxxvi, 1; Diodor. *Leg.* xxxi), till Antiochus VII, the brother of Demetrius, drove him to Dora, from which he escaped to Orthosia, in Phœnicia (1 Macc. xv, 10-14; 37-39), B.C. 139. Not long afterwards, being hard pressed by Antiochus, he committed suicide, or, according to other accounts, was put to death by Antiochus (Strabo, xiv, 5, 2; Appian, *Syr.* 68, Ἀντίοχος—κτείνει . . . σὺν πόνῳ πολλῷ). Josephus (*Ant.* xiii, 7, 2) adds that he was killed at Apamea, the place which he made his headquarters (Strabo, xvi, 2, 10). The authority of Tryphon was evidently very partial, as appears from the growth of Jewish independence under Simon Maccabæus, and Strabo describes him as one of the chief authors of Cilician piracy (xiv, 3, 2). His name occurs on the coins of Antiochus VI, and he also struck coins in his own name. See ANTIOCHUS; DEMETRIUS.

Coin of Tryphon.

**Trypho'sa** (Τρυφῶσα, *luxurious*), a Christian female at Rome, addressed by Paul (Rom. xvi, 12). A.D. 55. See TRYPHÆNA.

**Tsab.** See TORTOISE.

**Tsabians** (from טַצְבִּי, a *host*) were those who worshipped the heavenly hosts, that being one of the earliest forms in which idolatry appeared. This species of idolatry first prevailed in Chaldaea, whence it spread over all the East, passed into Egypt, and thence found its way into Greece. The sun, moon, and each of the stars was believed to be a divine intelligence, who exercised a constant influence for good or evil upon the destinies of men. See SABIANS.

**Tsabua.** See HYENA.

**Tsaphtsaphah.** See WILLOW.

**Tschirner.** See TZSCHIRNER.

**Tschornaboltzi** (or rather *Tchernoltzi*), a Russian sect, the members of which refuse to take an oath, hold it unlawful to shave the beard, and do not pray for the emperor and imperial family according to the prescribed form. They have many things in common with the other sects, and believe that the end of the world is at hand. See RUSSIAN SECTS.

**Tseba.** See SABAOTH.

**Tsebi.** See ROE.

**Tselatsal.** See LOCUST.

**Tsepha.** See COCKATRICE.

**Tsephardea.** See FROG.

**Tseri.** See BALM.

**Tsing-Chamun-Keaou**, or *Tea-sect* of China (q. v.).

**Tsinnin.** See THORN.

**Tsiphoni.** See **ADDER.**

**Tsippor.** See **SPARROW.**

**Tsirah.** See **HORNET.**

**Tsirûph** (צִירֻף), or *anagram*, is a Cabalistic rule according to which various words are formed through the change of any word into others by the transposition of the component letters. Thus בְּרֵאשִׁית, "in the beginning," has been anagramatized אֶשׁ בְּרִירָה, "a covenant of fire," to accord with Deut. xxxiii, 2, "from his right hand went a fiery law for them." In a Cabalistic book entitled רִיקוּיִם, upwards of seventy combinations of this single word are formed by R. Simeon ben-Jochai. The Cabalists say that because the Hebrew letters are spiritual, and simple figures, they can therefore be construed in different ways; but this can be done in any language. Thus Herbert anagramatized the Virgin *Mary* into *Army*, as seen in the following two lines:

"How well her name an *Army* doth present,  
In whom the *Lord* of *hosts* did pitch his tent!"

(B. P.)

**Tsonkhapa**, a Thibetan reformer and monk, was born A.D. 1355, in the district of Amdo. He strictly prohibited ordinary tricks and pretended miracles of charlatanism, and united and reconciled the dialectical and mystical schools of modern Buddhism. He also published most comprehensive works. His innovations were never universally acknowledged. His followers, however, called *Gekupa*, or *Gakdaupa*, are the most numerous, and wear a yellow garb, the others having chosen red. See **THIBET.**

**Tsor.** See **FLINT.**

**Tsori.** See **BALM.**

**Tu'bal** (Heb. *Tubal'*, תּוּבַל in Gen. x, 2; Ezek. xxxii, 26; xxxix, 1], of uncertain signification; Sept. *Θοβῆλ*, except in Ezek. xxxix, 1, where Alex. *Θοβῆρ*; Vulg. *Thubal*, but in Isa. lxvi, 19, *Italia*). In the ancient ethnological tables of Genesis and 1 Chron. Tubal is reckoned with Javan and Meshech among the sons of Japheth (Gen. x, 2; 1 Chron. i, v). B.C. post 2514. The three are again associated in the enumeration of the sources of the wealth of Tyre: Javan, Tubal, and Meshech brought slaves and copper vessels to the Phœnician markets (Ezek. xxvii, 13). Tubal and Javan (Isa. lxvi, 19), Meshech and Tubal (Ezek. xxxii, 26; xxxviii, 2, 3; xxxix, 1), are nations of the north (xxxviii, 15; xxxix, 2). Josephus (*Ant.* i, 6, 1) identifies the descendants of Tubal with the Iberians, that is—not, as Jerome would understand it, Spaniards, but—the inhabitants of a tract of country between the Caspian and Euxine seas, which nearly corresponded to the modern Georgia. Knobel connects these Iberians of the East and West, and considers the *Tibareni* to have been a branch of this widely spread Turanian family, known to the Hebrews as Tubal (*Völkertafel d. Gen.* § 13). Bochart (*Phaleg*, iii, 12) makes the Moschi and Tibareni represent Meshech and Tubal. These two Colchian tribes are mentioned together in Herodotus on two occasions: first, as forming part of the nineteenth satrapy of the Persian empire (iii, 94), and again as being in the army of Xerxes under the command of Ariomardus the son of Darius (vii, 78). The Moschi and Tibareni, moreover, are "constantly associated, under the names of *Muskai* and *Tuplai*, in the Assyrian inscriptions" (Sir H. Rawlinson, in Rawlinson's *Herod.* i, 535). The Tibareni are said by the scholiast on Apollonius Rhodius (ii, 1010) to have been a Scythian tribe, and they as well as the Moschi are probably to be referred to that Turanian people who in very early times spread themselves over the entire region between the Mediterranean and India, the Persian Gulf and the Caucasus (Rawlinson, *Herod.* i, 535). In the time of Sargon, according to the inscriptions, Ambris, the son of Khuliya, was hereditary chief of Tu-

bal (the southern slopes of Taurus). He "had cultivated relations with the kings of Musak and Vararat (Meshech and Ararat, or the Moschi and Armenia), who were in revolt against Assyria, and thus drew upon himself the hostility of the great king (*ibid.* i, 169, note 3). In former times the Tibareni were probably more important; and the Moschi and Tibareni, Meshech and Tubal, may have been names by which powerful hordes of Scythians were known to the Hebrews. But in history we only hear of them as pushed to the farthest limits of their ancient settlements, and occupying merely a strip of coast along the Euxine. Their neighbors the Chaldæans were in the same condition. In the time of Herodotus the Moschi and Tibareni were even more closely connected than at a later period, for in Xenophon we find them separated by the Macrones and Mossynœci (*Anab.* v, 5, 1; Pliny, vi, 4, etc.). The limits of the territory of the Tibareni are extremely difficult to determine with any degree of accuracy. After a part of the ten thousand Greeks, on their retreat with Xenophon, had embarked at Cerasus (perhaps near the modern Kerasûn Dere Sû), the rest marched along the coast, and soon came to the boundaries of the Mossynœci (*Anab.* v, 4, 2). They traversed the country occupied by this people in eight days, and then came to the Chalybes, and after them to the Tibareni. The eastern limit of the Tibareni was therefore about eighty or ninety miles along the coast west of Cerasus. Two days' march through Tibarene brought the Greeks to Cotyora (*ibid.* v, 5, 3), and they were altogether three days in passing through the country (Diod. Sic. xiv, 30). Now from Cape Jasonium to Boon, according to Arrian (*Periplus* 16), the distance was 90 stadia, 90 more to Cotyora, and 60 from Cotyora to the river Melanthius, making in all a coast line of 240 stadia, or three days' march. Prof. Rawlinson (*Herod.* iv, 181) conjectures that the Tibareni occupied the coast between Cape Yasûn (Jasonium) and the river Melanthius (Melet Irmak); but if we follow Xenophon, we must place Boon as their western boundary, one day's march from Cotyora, and their eastern limit must be sought some ten miles east of the Melet Irmak, perhaps not far from the modern Aptar, which is three and a half hours from that river. The anonymous author of the Periplus of the Euxine says (33) that the Tibareni formerly dwelt west of Cotyora as far as Polemonium, at the mouth of the Puleman chai, one and a half miles east of Fatsâh.

In the time of Xenophon the Tibareni were an independent tribe (*Anab.* vii, 8, 25). Long before this they were subject to a number of petty chiefs, which was a principal element of their weakness, and rendered their subjugation by Assyria more easy. Dr. Hincks (quoted by Rawlinson, *Herod.* i, 380, note 1) has found as many as twenty-four kings of the *Tuplai* mentioned in the inscriptions. They are said by Apollonius Rhodius to have been rich in flocks (*Arg.* ii, 377). The traffic in slaves and vessels of copper with which the people of Tubal supplied the markets of Tyre (Ezek. xxvii, 13) still further connects them with the Tibareni. It is well known that the regions bordering on the Pontus Euxinus furnished the most beautiful slaves, and that the slave-traffic was an extensive branch of trade among the Cappadocians (Polyb. iv, 38, 4; Horace, *Ep.* i, 6, 39; Persius, *Sat.* vi, 77; Martial, *Ep.* vi, 77; x, 76, etc.). The copper of the Mossynœci, the neighbors of the Tibareni, was celebrated as being extremely bright and without any admixture of tin (Aristot. *De Mir. Auscult.* 62); and the Chalybes, who lived between these tribes, were long famous for their craft as metal-smiths. We must not forget, too, the copper-mines of Chalvar in Armenia (Hamilton, *Asia Min.* i, 173).

The Arabic version of Gen. x, 2 gives Chorasan and *China* for Meshech and Tubal; in Eusebius (see Bochart) they are Illyria and Thessaly. The Talmudists (*Yoma*, fol. 10, 2), according to Bochart, define Tubal as "the home of the *Uniaci* (אוֹנִיָּיִק)," whom he is in-

clined to identify with the Huns (*Phaleg*, iii, 12). They may, perhaps, take their name from Cēnoe, the modern Unieh, a town on the south coast of the Black Sea, not far from Cape Yasūn, and so in the immediate neighborhood of the Tibareni. In the Targum of R. Joseph on 1 Chron. (ed. Wilkins) יִרְיָיִר is given as the equivalent of Tubal, and Wilkins renders it by Bithynia. But the reading in this passage, as well as in the Targums of Jerusalem and of Jonathan on Gen. x, is too doubtful to be followed as even a traditional authority. See ETHNOLOGY.

**Tu'bal-cain** (Heb. *Tu'bal Ka'yin*, תּוּבַל קַיִן, apparently of foreign etymology; Sept. ὁ Θούβιλ; Vulg. *Tubal caïn*), the son of Lamech the Cainite by his wife Zillah (Gen. iv, 22). B.C. cir. 3700. He is called "a furbisher of every cutting instrument of copper and iron." The Jewish legend of later times associates him with his father's song. "Lamech was blind," says the story as told by Rashi, "and Tubal-cain was leading him; and he saw Cain, and he appeared to him like a wild beast, so he told his father to draw his bow, and he slew him. And when he knew that it was Cain his ancestor, he smote his hands together and struck his son between them. So he slew him, and his wives withdraw from him and he conciliates them." In this story Tubal-cain is the "young man" of the song. Rashi apparently considers the name of Tubal-cain as an appellative, for he makes him director of the works of Cain for making weapons of war, and connects "Tubal" with תּוּבַל, *tabbēl*, to season, and so to prepare skilfully. He appears, moreover, to have pointed it תּוֹבֵל, *tobēl*, which seems to have been the reading of the Sept. and Josephus. According to the writer last mentioned (*Ant.* i, 2, 2), Tubal-cain was distinguished for his prodigious strength and his success in war.

The derivation of the name is extremely obscure. Hasse (*Entdeckungen*, ii, 37, quoted by Knobel on Gen. iv, 22) identifies Tubal-cain with *Vulcan*; and Buttmann (*Mythol.* i, 164) not only compares these names, but adds to the comparison the Τελγίτης of Rhodes, the first workers in copper and iron (Strabo, xiv, 654), and Dwalinn, the demon smith of the Scandinavian mythology. Gesenius proposed to consider it a hybrid word, compounded of the Pers. *tūpal*, iron slag, or *scoria*, and the Arab. *kain*, a smith; but this etymology is more than doubtful. The Scythian race *Tubal*, who were coppersmiths (Ezek. xxvii, 13), naturally suggest themselves in connection with Tubal-cain.

**Tubie'ni** (Τουβιῖνοι; Alex. Τουβείνοι; Vulg. *Tubianei*). The "Jews called Tubieni" lived about Charax, 750 stadia from a strongly fortified city called Caspis (2 Macc. xii, 17). They were doubtless the same who are elsewhere mentioned as living in the towns of *Toubion* (A. V. "Tobie"), which again is probably the same with the *Tob* (q. v.) of the Old Test.

**Tübingen School, THE OLD.** The origin of this school, which became so noteworthy a factor in the development of Protestant theology during the latter half of the 18th century, is associated chiefly with the personality and influence of G. C. Storr (q. v.), professor of theology in the University of Tübingen, and, at a later day, court-preacher at Stuttgart. This scholar gathered about him a number of pupils, whom he impressed with the broad culture and thorough and comprehensive learning as well as logical arrangement and extraordinary clearness of his lectures, and whom he captivated by his evident piety, dignified demeanor, and unvarying kindness. Storr's dominant elements of character, whether as a man or a scholar, were, however, wholly of the objective class. His piety was not the expression of profound religious feeling, but of rigidly earnest and conscientious principle; and as his heart lacked fervor, so his intellect was deficient in imagination and the true speculative quality. The age in which he lived was a period of unrest. The orthodoxy

of Brentius and Jakob Andreä was beginning to loosen its hold upon the times. J. W. Jäger, the learned chancellor (1702-20), had ventured upon the innovation of introducing a more attractive method in theology than that in vogue. Pfaff and Weismann also broke away from the polemical methods of orthodoxy, and sought to impart greater simplicity and life to theological instruction. In another direction, the so-called enlightenment or neology of the 18th century was gaining prominence and power, and was rejecting not merely the form, but the substance, of the orthodox teachings. Storr was not able to deny that the crisis which had come upon theology had its origin in very adequate causes; but he could not fully accept all its results, and therefore assumed a position midway between the contending parties, so as to be able to retain much of the substance of the old orthodox theology while adopting much of the methods of the new. He endeavored to base his teaching wholly on the Scriptures, and for that purpose brought together a mass of isolated passages to serve as the basis of his theology; but he had no conception of the organic unity of Scripture, of its living combination into separate principles, and of a consequent genetic unfolding of scriptural truths. Baur strikingly remarks that Storr recognised no canon, but only passages, of the Scriptures. His system was furthermore impaired by the Pelagianizing tendency of his mind, which led him to tone down the contrast between the fundamental doctrines of sin and grace, and to make grave concessions to neology with regard to the doctrines of the atonement and of the person of Christ. His great object was to render Christianity plausible to the destructive criticism of his time; and the endeavor to realize that object occasioned in his bearing a certain indecision and ambiguity of manner, so that his theology is made to seem forced and constrained. Great attention is given to the discussion of unimportant and particular ideas, while the thought of a connected and organic system of Christianity has no proper recognition in his works. This disposition to expend effort upon subordinate details is apparent in all his works, and especially in his criticism of Kant's *Religion innerhalb der Grenzen der reinen Vernunft*, and in the works he aimed against the "accommodation hypothesis" of Semler, Teller, and others. It was his misfortune to want the historical sense, and that attitude of impartiality towards doctrine which would have enabled him to discover the gradual development of scriptural truth. His system of Christian dogmatics and ethics aims to be simply a bringing-together and connecting of the results of exegesis; and this aim is realized by the mosaic-like collocation of isolated passages in such a manner as to justify the above criticism of Baur that Storr had no authoritative rule, but only a fragmentary view of Scripture. In this way he gave expression to the principle of the authority of Scripture upon which he professed to erect his entire system.

The school of Storr was, more particularly, composed of Johann Friedrich Flatt, Friedrich Gottlieb Süsskind, and Karl Christian Flatt, all of them pupils, successors, and in part colleagues of Storr in the theological faculty (for a more particular notice of these scholars, see the articles under their names). The older Flatt was an acute and learned man, exceedingly conscientious and careful, naturally cheerful, but infirm in body and greatly afflicted by repeated sorrows, in consequence of which he developed a measure of irritability and melancholy in his disposition. He left lectures on Christian ethics and on the Pauline epistles, which were published from notes by his pupils. Süsskind devoted his scientific activity chiefly to the elucidation of fundamental questions in doctrines and apologetics considered with reference to the philosophy current in his day. Against Kant and Fichte he discussed the office and the limitations of reason, and against Schelling he endeavored to secure the theistic basis of Christianity. His investigations in the line of doctrine were chiefly

concerned with the idea of the possibility of the forgiveness of sins, or, in other words, of the remission of penalty. He also discussed, in a fragmentary way, the theology of Schleiermacher (see Süsskind, *Vermischte Schriften*, 1831). His leading personal traits were great intellectual penetration and energy of the will, united with sternness of manner and the utmost conscientiousness of spirit. He was a master in logic, bold and confident in debate, the dialectician of his school. His ability was nevertheless impaired by the lack of speculative power and depth. The younger Flatt was rather a receptive than an independently creative character. His earliest work attempted to prove that the Kantian theory of atonement, according to which the forgiveness of sins is determined by, and consequent on, the measure of moral reformation, is not the only reasonable, but also the only allowable, view under the New Test. He was induced to retract the teachings of that book, and in time became wholly identified with the tendency of Storr and the elder Flatt.

The peculiarity of these theologians lay in the abstract theism beyond which they were not able to advance by reason of the want of true philosophical sense. They employed a pitiless logic to expose the gaps and weaknesses of transcendental speculation, but failed to attain to a living apprehension of their own theism; and, while they defended their theory of revelation with the utmost tenacity, they rendered that theory thoroughly intolerable to reason by numerous provisos, explanations, and modifications. This criticism applies to everything which is peculiar to their teaching, and indicates what is, more than any other feature, the characteristic of their school.

Affiliated to this school, though less closely than the men already named, was Ernst Gottlieb Bengel, professor of historical theology at Tübingen. This scholar passed beyond the ordinary favorable attitude of the school of Storr in his fondness for Socinian views, and was also a Kantianizing, rationalizing supranaturalist. So firmly was he intrenched in such views that he steadily refused to be influenced by any new tendency which the changing philosophy of a new era might bring to bear upon theological inquiry. He scarcely indicated that he knew of the existence of Schleiermacher, and prevented the appointment of Bockshammer—who had written an unusually able work on the freedom of the will—to the faculty as the successor of the elder Flatt, because of Bockshammer's departure from the old plan to which Bengel was committed. Other adherents of this school, as Steudel, Christian Friedrich Schmid, etc., remained more faithful to the Storrian ideas in some respects, but were, on the other hand, gradually led away from the traditional position of the Tübingen school through the influence of the theology of Schleiermacher. New men, new tendencies, new methods, have taken the place of the old, not only with respect to the external fact, but even as regards the results of what was at one time a noteworthy factor in the development of theological science. The Tübingen school has produced, upon the whole, effects much less important to such development than its prominence would seem to warrant.

See Herzog, *Real-Encyklop.* s. v., and the various names mentioned in this article in Herzog and this *Cyclopedia*. See also RATIONALISM.

**TÜBINGEN SCHOOL, THE NEW.** A very different era was inaugurated in the University of Tübingen on the appointment of F. C. Baur (q. v.) as professor of theology in 1826. He began to attack the objective positions of Christianity through the Pauline epistles, selecting some of these only as authentic, and pointing out alleged discrepancies between them and other parts of the New-Test. history. His theory, which is summed up in his work on the apostle Paul, is, in brief, that, taking the epistles to the Galatians, the Romans, and the Corinthians especially as guides, we find therein "exposed the fact that there were two parties in the early

Church, the Pauline and the Petrine. These struggled for supremacy, and the conflict was a long one. Peter was a thorough Jew, and his side predominated even after the death of the principal combatants. Judaism was the cradle of Christianity; and the latter was only an earnest, restless, reformatory branch of the former. But it was not an offshoot as yet, for Christianity was essentially Jewish all through its first historic period. The canonical writings of the New Test., which constitute the chief literature of the first two centuries, are the literary monument of Christianity while it was yet undeveloped and undetached from Judaism. These writings are the *mediating theology* of those distant days. The Petrine party was very strong until the middle of the 2d century, when it was obliged to yield to, or rather harmonize with, the Pauline. Many causes contributed to bring the two factions together. There was an absence of growth quite incompatible with their respective strength. Alone, they were almost unable to brave the storm of persecution. Finally, for the sake of security and propagation, they laid down their weapons and united under one banner. From this union came the subsequent growth of Christianity. The canonical works so much revered by the Church had been written in the interest of one or the other of these parties. Since the enmity has been destroyed, their literary productions must be considered in the light of history. The Church is therefore much mistaken in attaching importance to the Scriptures, for they were written for a timeserving end, and are quite unworthy of the interest which we attach to them."

It is obvious how destructive to the essential faith of Christians were these positions, and yet it is wonderful that they were broached with so much assurance, although based upon so trivial a comparison of circumstances. Nevertheless, a numerous circle of disciples clustered around Baur, and they enjoyed his leadership until his death, in 1860. But the writings of both the master and his school were quickly answered by the best theologians of Germany, such as Thiersch, Dörner, Leckler, Lange, Schaff, Bleek, Hase, Bunsen, and Iischendorf. Yet the effects of the insinuations, suspicions, and criticisms of Baur were for a long time a serious hindrance to the truth. The authors of the movement were disciples of the Hegelian philosophy. Their aim was to explain the origin of Christianity by natural causes alone. In this endeavor they but reproduced in a new and ingenious form the exploded infidelity of a former age. And the primitive doctrine of supranaturalism was again defended by an appeal, as of old and ever, to facts of the inspired records and the instinctive convictions of humanity. Yet some of its champions in this contest were themselves unconsciously infected more or less by the insinuating influences of the new scepticism, and were led to make concessions which later and sounder theologians have seen to be unnecessary and untenable.

Meanwhile, the attack upon the fundamental documents of Christianity was resumed in a still more virulent form by D. F. Strauss (q. v.), on his appointment to the theological faculty of Tübingen in 1832, and culminated in his famous *Leben Jesu*, which boldly impugns the historical truth of the Gospel itself. For the discussion of the controversy resulting, see MYTHICAL THEORY. A strong reaction has long since set in against these negative views, even in Tübingen itself, so that what has recently been known as "the Tübingen theology" is likely soon to be a thing of the past. See Hurst, *Hist. of Rationalism*, p. 280 sq.; Cook, *Monday Lectures*, ser. i; Fisher, *Supernat. Origin of Christianity*, p. xxxv. See NEOLOGY.

**TUCH, JOHANN CHRISTIAN FRIEDRICH**, a Protestant divine of Germany, was born Dec. 17, 1806, at Quedlinburg. Having prepared himself for the university at the gymnasium in Nordhausen, he went in 1828 to Halle, where he attended the lectures of Gesenius. Here he also commenced his lectures on Oriental lan-

guages and Old-Test. exegesis. In 1839 the Zurich University made him licentiate of theology, while the philosophical faculty of Halle appointed him extraordinary professor. In 1841 he was called to Leipsic, and was made ordinary professor in 1843, having shortly before been honored with the doctorate by the Tübingen faculty. In 1853 he was made third professor and canon of Zeitz, and died as first professor, April 12, 1867. His main work is his learned *Commentary on Genesis* (Halle, 1838; 2d ed. 1871). He also published *Commentationis de Lipsiens Codice Pentateuchi Syri Manuscripto Particula I* (Lips. 1849);—*Commentationes Geographicae. Pars i, De Nino Urbe Animadversiones tres* (ibid. 1845);—*Reise des Sheikh Ibrahim el-Khijari el-Medini durch einen Theil Palästinas* (ibid. 1850);—*Commentatio de Ματθαῖος ἐν Ἀρβύλοις*, 1 Macc. ix, 2 (ibid. 1853);—*Die Himmelfahrt Jesu* (ibid. 1857);—*Quæstiones de Flavii Josephi Libris Historicis* (ibid. 1859);—*Quæstiones de Flavii Josephi loco B. J. iv, 8, 2* (ibid. 1860). See Fürst, *Bibl. Jud.* iii, 450; Zichold, *Bibl. Theol.* ii, 1352; *Theol. Universal-Lex.* s. v.; Hilgenfeld, *Zeitschrift*, 1871, pt. iii; Diestel, *Gesch. d. alten Testaments in der christl. Kirche*, p. 613, 648, 730; *Literarischer Handweiser für das kathol. Deutschland*, 1867, p. 266. (B. P.)

**Tucher, CHRISTOPH KARL GOTTLIEB VON**, a famous jurist of Germany, was born May 14, 1798, at Nuremberg. He studied jurisprudence at Erlangen, Heidelberg, and Berlin, and after having occupied prominent positions in his profession, he died at Berlin, Feb. 17, 1877. He is known as the author of the following hymnological works: *Schatz des evangelischen Kirchengesanges, der Melodie und Harmonie nach, aus den Quellen des 16. und 17. Jahrhunderts geschöpft*, etc. (Stutt. 1840);—*Schatz des evangelischen Kirchengesangs im 1. Jahrhundert der Reformation* (Leips. 1848, 2 vols.) (B. P.)

**Tucker, Abraham**, a metaphysical writer, was born in London in 1705, and was educated at Bishop's Stortford School and Merton College, Oxford. He studied for a while at the Inner Temple, but was not admitted to the bar. He died in 1774. He published, *Free-will, Fore-knowledge, and Fate; a Fragment by Edward Search* (Lond. 1763, 8vo);—*Man in Quest of Himself, or a Defence of the Individuality of the Human Mind or Self*, etc., by Cuthbert Comment, Gent. (1763, 8vo). His great work, however, is *The Light of Nature Pursued*, by Edward Search (1768-78; Cambridge, Mass., 1831, 4 vols. 8vo, with later editions, and an abridgment by William Hazlitt, 1807, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tucker, Elijah W.**, a Congregational minister, was born at Dorchester, Mass., March 31, 1810. He was converted at the age of twenty, graduated at Brown University in 1838, and at Andover Theological Seminary in 1841, and labored at South New Market, N. H., in 1841 sq.; Chatham, Mass., in 1846 sq.; Essex, Conn., in 1852; Goshen, Conn., 1853-58; Preston, Conn., 1858-65; and Northfield, Conn., in 1865, until his death, July 6, 1866. Mr. Tucker was a direct, earnest preacher, and a sympathetic, watchful pastor. Revivals resulted from his labors in almost every field. See *Cong. Quarterly*, 1867, p. 46.

**Tucker, Eliha, D.D.**, a Baptist minister, was born at Rensselaerville, Albany County, N. Y., Dec. 24, 1794. His early education was limited. He began to preach in 1816, and was ordained pastor of the Baptist Church of Coventry, Chenango County, N. Y., Aug. 19, 1818. Here he continued with great success until Aug. 12, 1822, when he became pastor of the Church at Fredonia, N. Y. He was afterwards pastor of the First Baptist Church in Buffalo from September, 1831, until October, 1836; then of the Second Baptist Church of Rochester, N. Y., until May, 1841; and of the Oliver Street Baptist Church, New York city, until 1848. In 1851 his health became very much impaired, and he

began travelling in the hope of improving it, but died Dec. 29, 1853. He was the eldest of six brothers, five of whom entered the ministry. Dr. Tucker published a *Sermon Delivered at Fredonia at the Ordination of Mr. Jarvis Handy* (1826). See Sprague, *Annals of the Amer. Pulpit*, vi, 667.

**Tucker, Josiah, D.D.**, a learned English divine, was born at Laugherne, Carmarthenshire, in 1711. He was educated at St. John's College, Oxford, and in 1737 became curate of St. Stephen's Church, Bristol, and was subsequently appointed minor canon in the cathedral of that city. On the death of Mr. Catcott, he became rector of St. Stephen's, and in 1758 was created dean of Gloucester. Mr. Tucker was an able advocate of the great political questions of the day, and was bold and determined in the principles which he advocated. He died Nov. 4, 1799. He wrote, *The Elements of Commerce and Theory of Taxes* (Bristol, 1753, 4to);—*Six Sermons* (1772, 12mo);—four tracts, etc., on political and commercial subjects (Gloucester, 1774, 8vo);—besides *Treatises*, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tucker, Levi, D.D.**, a Baptist minister, was born in Schoharie County, N. Y., July 6, 1804. He studied theology at the Hamilton Institution, graduated June 3, 1829, and on the 10th of the same month was ordained pastor of the church at Deposit, N. Y. In the summer of 1831 he accepted a call to settle at Blockley (now West Philadelphia), Pa., where he labored with great success, acting also for a while as agent of the Baptist Educational Society of that state, until the spring of 1836, when he removed to Cleveland, O. After remaining there seven years, he was for a while pastor of the Washington Street Baptist Church in Buffalo, and on Dec. 29, 1848, became pastor of the Bowdoin Place Church, Boston. His health having become greatly impaired, he resigned his charge in September, 1852, and took a journey to England, France, Italy, and Egypt, whence he returned in the early part of August, 1853, and died on the 23d of the same month. See Sprague, *Annals of the Amer. Pulpit*, vi, 786.

**Tucker (or Tooker), William, D.D.**, a learned English divine of the 16th century, was born at Exeter. He was educated at New College, Oxford, and was admitted perpetual fellow in 1577. In 1585 he was promoted to the archdeaconry of Barnstable, in Devonshire. He was eventually made chaplain to queen Elizabeth. Dr. Tucker afterwards became prebendary of Salisbury, and took his degree of D.D. in 1594. He was made canon of the church at Exeter, and was installed dean of Lichfield, Feb. 21, 1604. He died at Salisbury, March 19, 1620. Dr. Tucker was esteemed an excellent Greek and Latin scholar. He was an able divine, a person of great gravity and piety, and well read in curious and critical authors. His publications are, *Charisma, sive Rabilium Sanitatum Gratia*, etc. (Lond. 1597, 4to), a historical defence of the power of royalty to cure the king's evil;—*Of the Fabric of the Church and Churchmen's Living* (ibid. 1604, 8vo);—*Singulare Certamen cum Martino Becano Jesuita* (ibid. 1611, 8vo), written in defence of James I against Becan and Bellarmine. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tuckerman, JOSEPH, D.D.**, a Unitarian minister, was born in Boston, Mass., Jan. 18, 1778, and graduated from Harvard College in 1798. After devoting himself to the study of theology, under Rev. Thomas Thacher of Dedham, he was ordained and installed as pastor in Chelsea, Nov. 4, 1801. While at Chelsea, his attention was drawn to the temptations and necessities of seafaring men, and in the winter of 1811-12 he founded the first society for the religious and moral improvement of seamen. In 1816 Mr. Tuckerman visited England in search of health, but soon returned without having experienced much apparent advantage from his tour. He resigned his charge at Chelsea in 1826,

preaching his farewell sermon on Nov. 4. He immediately entered upon his work as minister at large in Boston, devoting himself to the visitation of the poor and destitute for the remainder of his life. In 1833 he again went to Europe, returning in the following year. He died in Havana, whither he had gone for his health, April 20, 1840. He published a large number of *Sermons, Letters, Essays*, etc. (1800-38). See Sprague, *Annals of the Amer. Pulpit*, viii, 345.

**Tuckney, ANTHONY**, a learned Nonconformist divine of England, was born at Kirton, Lincolnshire, in September, 1599. He was matriculated at Emanuel College, Cambridge, at fourteen, received his degree of A.M. in 1620, and was chosen fellow of his college three years after. In 1627 he took his degree of B.D., and became assistant to the famous vicar John Cotton, upon whose departure he was chosen to the vicarage. When the assembly of divines met at Westminster, Mr. Tuckney was one of the two nominated for the county of Lincoln, and was appointed minister of St. Michael Querne's, Cheapside. In 1645 he was appointed master of Emanuel College, but did not entirely reside on this employment until 1648, when, being chosen vice-chancellor, he removed with his family to Cambridge, and took his degree of D.D. the year after. In 1653 he was chosen master of St. John's, and two years after regius professor of divinity. At the Restoration complaints were made by royalists against Mr. Tuckney, who resigned both positions June 22, 1661, receiving a pension of £100 per year. The rest of his life he spent in retirement, mostly in London. Although appointed commissioner at the Savoy Conference, he never attended it. In the time of the plague he lived at Colwich Hall, near Nottingham, where he was troubled and confined, but was discharged in a few months. Upon the passage of the Five-mile Act he removed to Oundle, and thence to Warmingtton, Northamptonshire. After the fire of London he removed to Stockerston, Leicestershire, and then to Tottenham, and in 1669-70 to Spitalyard, where he died in February, 1670. He wrote, *Sermon on Jer. viii, 22* (Lond. 1643, 4to);—*Five Sermons* (1656, 12mo);—*Forty Sermons* (1676, 4to), published by his son:—*Letters*, etc. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tudhope, ARCHIBALD**, a Presbyterian minister, was born at Paisley, Scotland, Aug. 19, 1801; graduated at the University of Glasgow in April, 1822; studied theology at the Divinity Hall of the Relief Synod in Paisley; was licensed by the Relief Presbytery of Glasgow in 1828, and ordained pastor of the Church in Anan, in Dumfriesshire, Scotland, Oct. 14, 1834. In 1838 he emigrated to the United States, and became pastor of the Ninth Presbyterian Church, Philadelphia, where he remained till 1849. He died Dec. 6, 1861. He was an instructive preacher, and his sermons to children were specially successful efforts. See Wilson, *Presb. Hist. Almanac*, 1863, p. 214.

**Tudela, BENJAMIN (ben-Jonah)** OF, the famous Jewish traveller of the 12th century, is known for his researches on the state of the various colonies of the Hebrew people, both in the East and in the West. From 1165 to 1173 he travelled in several countries in Europe, Asia, and Africa, and published his results in his *Massaoth*, or *Itinerarium of Benjamin*. Among Christians the book has not been favorably received. In the first place, the whole of its complexion is Jewish—recording in every place of his arrival the census, condition, and leading names of his nation; scarcely ever noticing the objects which usually invite the attention of Gentile travellers, such as customs, climate, language, politics, history, etc. In the second place, he commits numerous errors in dates and names when he does refer to Gentile history; and, thirdly, the farther he advances from home, the more wonderful are his reports concerning the numbers and wealth of the Jews. These considerations have induced every one of his translators to believe that he

never quitted Spain, but made a compilation of all the travellers' tales he could gather respecting foreign lands. On the other hand, Gibbon (*Decline*, v, 348, Milman's ed.) remarks, "The errors and fictions of the Jewish rabbi are not sufficient grounds to deny the reality of his travels." In our days, however, deeper investigation has certified the reality of the voyage, and the actual truth of many of its details, which are, however, mixed up with much that is fabulous, and accompanied by many incredible tales. This curious book of travels was edited, with a Latin translation, by Arias Montanus at Antwerp in 1622, and by L'Empereur at Leyden in 1633; with an English translation it was published in Purchas's *Pilgrims* (Lond. 1625, ii, 1437); by Harris, in *Collection of Voyages and Travels* (ibid. 1744-48), i, 546-555; by Gerrons (ibid. 1784); by Pinkerton, in his *Collection of Voyages and Travels of the World* (ibid. 1804-14), vol. vii; and in Bohn's *Early Travels in Palestine* (ibid. 1848, p. 63-126). The best edition is that of Asher, *The Itinerary of Rabbi Benjamin of Tudela* (translated, etc.; vol. i, bibliography and translation, Lond. and Berl. 1840; vol. ii, notes and essays, ibid. 1841). A French translation is given in Bergeron, *Collection de Voyages, faits principalement en Asie, dans les XII<sup>e</sup>, XIII<sup>e</sup>, XIV<sup>e</sup>, et XV<sup>e</sup> Siècles* (the Hague, 1735, 2 vols.); by Barratier (Amst. 1784, 2 vols.); another transl. appeared at Paris in 1830; a Dutch transl. by Bara (Amst. 1666); and a German transl. in Jewish characters by Arbach (Frankf.-on-the-M. 1741). See First, *Bibl. Jud.* i, 117 sq.; De Rossi, *Dizionario Storico*, p. 321 sq. (Germ. transl.); Grätz, *Gesch. d. Juden*, vi, 214; Braunschweiger, *Gesch. d. Juden in d. roman. Staaten*, p. 154; Dessauer, *Gesch. d. Israeliten*, p. 289, 371-420; Jost, *Gesch. d. Judenth. u. s. Sekten*, ii, 54; iii, 363; Basnage, *Histoire des Juifs*, p. 617 (Taylor's transl.); Da Costa, *Israel and the Gentiles*, p. 283 sq.; Lindo, *History of the Jews in Spain*, p. 67; Finn, *Sephardim*, p. 210 sq.; Etheridge, *Introduction to Hebrew Literature*, p. 259; Adams, *History of the Jews* (Boston, 1812), i, 238 sq. (B. P.)

**Tudor, SALATHIEL**, a Methodist Episcopal minister, was born in Bedford County, Pa., in 1789. Converted when a youth, he labored as a local preacher for eleven years, and was received on trial in the Pittsburgh Conference in 1827. In 1829 his health declined; in 1830 he was a superannuate, and he died Nov. 26 of the same year. As a preacher he was acceptable and useful. "His end was peaceful and glorious." See *Minutes of Annual Conferences*, 1832, p. 159.

**Tudor Flower.** See TUDOR STYLE.

**Tudor Rose.** A conventional representation of the rose, found in Third-pointed architectural work, both in wood and stone carvings, adopted in honor of the Tudors.

**Tudor Style.** This name is used by some writers on Gothic architecture, but they do not agree in the application of it. It is variously employed to designate the Perpendicular style throughout its continuance—the latter period of this style—and the mixed style which sprang up on the decline of Gothic architecture, usually called Elizabethan. The term is not very extensively used, and is most commonly understood to mean late Perpendicular work, and Henry VII's Chapel at Westminster is looked upon as the most perfect specimen in this style. The *Tudor Flower* is a flat flower, or leaf, placed upright on its stalk, much used in Perpendicular work, especially late in the

Tudor Style.

style, in long suites as a crest or ornamental finishing on cornices, etc. The examples differ considerably in detail, but the general effect does not vary much.

**Tueshimel** ERDENT, in Lamaism, is the name for one of the seven sanctuaries which are placed upon the altars in front of the idol. It is a drawing, upon a gold background, representing an ambassador of the heavenly kingdom and also the god of the temple.

**Tuet**, ESPRIT CLAUDE, a French ascetic author, was born about 1745 and died about 1787, and was the writer of a number of religious tracts and sermons, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

**Tufa**, a porous stone (called *travertine* when compact) found in calcareous streams, and used, from its lightness, in vaultings, as at Bredon and Canterbury.

**Tuff-taffeta**, a kind of inferior silk used in church-hangings.

**Tulscon**, in German mythology, was an earth-born god, from whom all Germans are said to have sprung. He was highly esteemed by his son, man. The Druids sacrificed human beings to him. According to the accounts given by Cæsar, these sacrifices were made not only in Germany, but throughout the whole of Gaul. Some hold him to be a historic person, others a personified idea.

**Tukkiyim**. See PEACOCK.

**Tukudh Version**. This version is of a very recent date; and the translation of the four gospels and the epistles of John into that dialect was undertaken by the British and Foreign Bible Society, at the request of the Church Missionary Society, and was made in the year 1872 by the Rev. R. McDonald, who had been laboring among the people with much success. As to the dialect itself, it is spoken by a tribe of Indians on the river Yucon, on the confines of the Arctic region. Mr. McDonald, who has been laboring there for the last sixteen years, has reduced the language to writing, and in his translating efforts has had the assistance of a native Christian. The syllabic characters which were adopted in the Cree version were first tried, but the unusually large number of syllables in the language obliged the translator to fall back upon the Roman characters. The following, taken from the report of the British and Foreign Bible Society for the year 1873, will be of interest to the student: "The Tukudh tribe, which is often known by the name of *Loucheux*, from a peculiarity in the eyes of some of the natives, is small, not including more than about eight hundred, nearly the whole of whom are under Christian instruction. Their numbers, however, are on the increase, and it is not improbable that some neighboring tribes will become incorporated with them, and thus add considerably to the community. Like most of the North American Indian tribes, the Tukudh Indians have among themselves certain religious beliefs on which it is not impossible to build up the pure theology of the Bible. Their name *Tukudh* signifies 'haughty people.' When the geographical position of Mr. McDonald's station at Fort Macpherson is considered, it will not be wondered at that these people are living in primitive simplicity. The edition requested is to consist of five hundred copies, and some of the gospels it is proposed to bind separately. The expense of the work will be large and the readers few; but when a language has been reduced to written form, and Christian men capable of translating the Scriptures are available, the committee deem it a matter of clear duty to go forward in printing the Word of God, even though but a comparatively small population may be benefited by their labors." According to the report for 1879, about 810 copies altogether have been circulated among these people. (B. P.)

**Tulchans**, or **Tulchan Bishops**. A *tulchan* was the effigy of a calf, or rather it was a stuffed calf-skin, set up before a cow when she was milked, under the belief that the animal thereby yielded her milk more

freely. The custom has long been discontinued. Under the regent Morton, and after 1572, attempts were made to introduce bishops into the Presbyterian Church of Scotland. The men who consented to take the title had bound themselves, as the price of their elevation, to receive only a small part of the revenues, the rest going to Morton and his lordly colleagues. "The bishop had the title, but my lord had the milk." Such bishops were called *tulchans* by the people. The first *tulchan* was John Douglas, appointed to the see of St. Andrew's. Patrick Adamson, who afterwards himself became a *tulchan*, said in a sermon, "There be three kinds of bishops—my lord bishop, my lord's bishop, and the Lord's bishop. My lord bishop was in the papistry; my lord's bishop is now, when my lord gets the benefice, and the bishop serves for nothing but to make his title sure; and the Lord's bishop is the true minister of the gospel."

**Tulisso**, in Prussian mythology, were priests of a lower order, belonging to none of the three higher classes of Grivaits, Siggonos, and Wurrkaits. The care of the sick rested with them, whom they either prepared for death, or sought, with their scanty knowledge, to cure or to alleviate their sufferings. They resided among the populace in villages, and were therefore not esteemed very much.

**Tulla** INTOON and HALTIORHIN. According to the Finnish creed, each man bore within him from his birth a divine spirit who was his inseparable companion for life. This spirit became more closely united to its subject in proportion as the latter tore himself away from earthly things to retire into the sanctuary of his soul. The magician, therefore, aspired to a transcendental ecstasy (*tulla intoon*), to a great state of excitement of the soul (*tulla haltiorhin*), in which he became like the spirit dwelling in him and entirely identified with it. He used artificial means, e. g. intoxicating drugs, in order to attain to this state of excitement.—Lenormant, *Chaldean Magic*, p. 254.

**Tulloch**, JAMES, a Scotch Congregational minister, was the first Dissenter who settled in Scotland. He was tutored by Rev. Mr. Ewing of Glasgow, and sent out under the auspices of the Society for Propagating the Gospel at Home. Mr. Tulloch was settled over the Congregational Church at Bixter in 1808, and did much in establishing new churches and propagating the Gospel. He died Feb. 26, 1862. See (Lond.) *Cong. Year-book*, 1864, p. 247.

**Tully, George**, an English divine, was educated at Queen's College, Oxford, and died rector of Gateside in 1697. He was a zealous writer against popery, and was suspended for a sermon he preached and published in 1686. "He was the first clergyman who suffered in the reign of James II in defence of our religion against popish superstition and idolatry." He is best known as the author of *Discourse on the Government of the Thoughts* (1693-94, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Hook, *Eccles. Biog.*, s. v.

**Tully, Thomas**, a learned English divine, was born in the city of Carlisle July 22, 1620; he entered Queen's College, Oxford, in 1634, and obtained a fellowship. In 1642 he was created A.M., and became master of the grammar-school at Tetbury, in Gloucestershire. He afterwards returned to his college, and became a noted tutor and preacher there. He died Jan. 14, 1676.

**Tulu**, or **Tuluva**, is the ancient and proper dialect of the long narrow tract of land now called Canara, situated westward of Mysore, between the range of the Western Ghats and the ocean. Owing to the long subjection of Canara to Karnata princes, the Karnata or Canarese language is now chiefly spoken by the higher classes in the province, while the Tulu still continues the vernacular of the common people, especially in South Canara. In idiom and structure it closely resembles the Malayalim language, and it is written in the same char-

acters. In 1834 a missionary station was established by the German Missionary Society at Mangalore, the capital of Canara. In 1844 a translation of the New Test. was made, which was published in 1852. See *Bible of Every Land*, p. 144. (B. P.)

**Tum.** Among the Egyptians the sun was considered in each phase a different god, having its peculiar name, attributes, and worship. Thus the sun during its nocturnal existence was *Tum*; when it shone in the meridian, it was *Ra*; when it produced and nourished life, it was venerated as *Kheper*. Since, according to the Egyptians, the night precedes the day, Tum was considered to have been born before Ra, and to have issued alone from the abyss of chaos.—Lenormant, *Chaldean Magic*, p. 81 sq.

**Tumanurong**, in the mythology of the Marquesas, was a goddess who descended from heaven and was immediately made queen by the people, who were charmed by her beauty. She married the then ruling sovereign, and gave birth to a son, who was able to speak immediately after his birth.

**Tumblers**, a name given to the TUNKERS (q. v.) in ridicule of their peculiar motions while undergoing the rite of baptism by immersion.

**Tundley**, RALPH, an English Congregational minister, was born at Alton, Staffordshire, in 1795. He was converted under the influence of the Dissenters, became interested in Sunday-school work, and at the earnest solicitation of the Church at Alton he became their pastor and ministered to them until his death, Feb. 22, 1863. See (Lond.) *Cong. Year-book*, 1864, p. 247.

**Tunic**, or **Tunica**, a term applied to several articles of clerical dress. (1.) A dress worn by the subdeacon, made originally of linen, reaching to the feet, and then of inferior silk, and narrower than the dalmatic of the deacon, with shorter and tighter sleeves, and devoid of the stripes or embroidery of that vestment. For some centuries, however, the assimilation has grown so complete as to render the slight difference between them almost imperceptible. Bishops wore both the tunic and dalmatic at pontifical mass. (2.) The *parva tunica*, or cotta, a linen habit reaching to the knees, used at all kinds of services by simple clerks and others; it differed from the rochet, in being fuller. Amalaricus speaks of a blue tunic of jacinth color, or *subucula*, worn by the bishop (Rupert says under the chasuble) as emblematical of the seamless robe of Christ. (3.) A dress worn by monks. See COAT.

**Tunicle-ball**, a ball of crystal to which tassels were attached, hanging from the shoulders of mediæval dalmatics.

**Tunicle-chest**, a chest for holding the tunic and dalmatic, and differing in shape from those chests which contained the copes and chasubles of a sacristy.

**Tunis**, JEWISH MISSION AT. As early as the year 1833, the London Society for the Propagation of the Gospel among the Jews commenced missionary operations in Tunis. The first missionary to that place was the late Rev. Dr. F. C. Ewald, who arrived there June 30. He found a Jewish population from 30,000 to 40,000, all living in their own quarter. There was also a large number of Roman Catholics, who had their own church and convent, a Greek community with church and priest, and about fifty Protestants without the means of grace. Mr. Ewald at once commenced divine service, which was attended by almost every Protestant. The Jews being accessible in that place, opportunities were afforded to the missionary to preach unto them the word of God. The Bible in Hebrew was eagerly sought after and bought by them, and thus the work could be carried on. In 1855 Mr. Page, who succeeded Dr. Ewald, established a school there, which proved a great success. Owing, however, to the removal by cholera of Mr. Page from the scene of his labors, mis-

sionary operations had to be suspended for a time, to be resumed again in 1860 by the Rev. Mr. Fenner. In July, 1861, a school was opened for Jewish boys with six scholars, whose number had increased by the close of the year to ninety-nine, all Jewish youths from seven to eighteen years of age. In 1862 a girls' school was established through the benevolence of a Christian lady in the north of England. Since that time missionary operations have been carried on there regularly, and in spite of the efforts made by the Israelitish Alliance to counterbalance the work of the mission, there were 160 boys and 305 girls in attendance at the mission schools during the year 1878-79. Since 1862, 1600 girls and 960 boys have passed through the schools. The popularity of these schools may be best seen from the fact that a notice of the opening of the mission-schools after the summer vacation was put up in the principal synagogues of Tunis. In connection with the two day-schools, Sunday-schools have also been opened there of late, besides a night-school which seems very promising. Some years ago the society built a chapel, where the Protestant community of Tunis is now gathered regularly for divine service, and where the sacraments are administered. According to the last report for the year 1879, there were fourteen persons engaged at this station, viz. two ordained ministers, a colporteur and depository, a schoolmaster, four assistants, a schoolmistress and four assistants. (B. P.)

**Tunkers** (Germ. *tunken*, "to dip"), a sect of German-American Baptists, called by themselves *Brethren*. Their name is sometimes erroneously spelled *Dunkers*. The sect is said to have been founded by Alexander Mack at Schwarzenau, Westphalia, in 1708. Driven from Germany, some of them emigrated to America in 1719, and settled in Pennsylvania. They formed a settlement at Ephrata, Lancaster Co., under the directorship of Conrad Peyssel. Here they built a town in the form of a triangle, the houses being three stories in height, and each of them a kind of monastery. They dressed much in the style of monks and nuns, men and women lived in different houses, and they used a vegetable diet, practicing considerable mortification. Although marriage was not forbidden, when couples married they were required to remove from Ephrata. They subsequently settled in Ohio, Indiana, Maryland, Virginia, and several other states. Their doctrines are similar to those of the Mennonites (q. v.), and in dress and manners they resemble the Friends. They use the kiss of charity, feet-washing, laying-on of hands, anointing the sick with oil; are opposed to war, and will not engage in lawsuits. They hold love-feasts, and an annual meeting about Whitsuntide, which is attended by their bishops, teachers, and representatives chosen by the congregations. Universal redemption, though not an article of faith, is commonly held by them. Some of them are strict sabbatarians, observing Saturday as their day of rest. They oppose statistics, which they believe to savor of pride, and, therefore, trustworthy statements as to their numbers cannot be given; they are supposed to number about 100,000. By reason of their quiet and peaceable lives they have retained a name which was given to them at first, that of "The Harmless People."

For the denomination there are now published four weekly papers—the *Primitive Christian*, the *Gospel Preacher*, the *Brethren at Work*, and the *Progressive Christian*. This last is published at Berlin, Pa., by the liberals among the Brethren or Tunkers; and its position is defined (in the *Independent* of May 8, 1879) as follows:

"We are in full accord with the Church on all Gospel doctrines and practices; but do not believe in any tradition as being worthy of comparison with a divine injunction. In fact, we do not regard a custom one hundred or five hundred years old, whether it originated in the Church or in the world, as possessing any claims upon the attention of Bible Christians. We believe in 'nonconformity to the world' from all its sinful practices; but we hold

that the earth is the Lord's and the fulness thereof, and that the inventions and discoveries of man are simply the products of the wisdom of God, and should be applied by the Christian to the glorifying of his name. We believe that the time now is when we shall neither in the garb of a hundred years ago nor in the style of the present age worship the Father; but when the true worshippers shall worship him in spirit and in truth. We believe in self-denial, but not in stoicism; we advocate close communion, but not exclusiveness. In short, we hold that the Word of God is our perfect law, which if we obey we do well."

See BAPTISTS, GERMAN.

**Tunnell, JOHN**, an early Methodist minister, was about thirteen years in the work of the ministry; was elected to the office of an elder at the Christmas Conference in 1784; travelled extensively throughout the United States; was for years the leader of a pioneer band of preachers among the Holston mountains; and died in great peace near Sweet Springs, Va. July 9, 1790. He was buried by Asbury among the Alleghany heights, a martyr to his work. He was a man of solid piety, great simplicity, and godly sincerity; well known and much esteemed both by ministers and people for his indefatigable labors, and his commanding talents as a preacher. See *Minutes of Annual Conferences*, i, 87; Bangs, *Hist. of the M. E. Church*, i, 319; Stevens, *Hist. of the M. E. Church*, ii, 34, 38, 39, 43, 53, 99, 272, 297, 496.

**Tunstall (or Tonstall), Cuthbert**, a learned Romish prelate, was born at Hatchford, near Richmond, Yorkshire, about 1474. He entered Baliol College, Oxford, about 1491, but subsequently went to Cambridge and became a fellow of King's Hall. He afterwards went to Padua and took the degree of LL.D. On his return to England, archbishop Warham constituted him vicar-general, August, 1511, recommended him to Henry VIII, and in December of the same year collated him to the rectory of Harrow-on-the-hill, Middlesex, which he held till 1522. In 1514 he was installed prebendary of Stowlonga, Church of Lincoln, and in the following year admitted archdeacon of Chester. He was made master of the rolls in 1516. Serving as an ambassador to emperor Charles V, he was rewarded on his return (prob. 1519) by a series of preferments. In 1519 he was made prebendary of Bontevant, Church of York; in May, 1521, prebendary of Combe and Hornham, Church of Sarum, and dean of Salisbury. He was promoted to the bishopric of London in 1522; was made keeper of the privy seal in 1523; and in 1525 he and Sir Richard Wingfield went as ambassadors to Spain. In July, 1527, Tunstall attended cardinal Wolsey on his embassy to France, and in 1529 was one of the English ambassadors employed to negotiate the treaty of Cambray. On his return he exerted himself to suppress Tyndale's edition of the New Test. In 1530 he was translated to the bishopric of Durham, where he laid out large sums in improving his episcopal houses. At first Tunstall favored the divorce of Henry VIII, but afterwards espoused the cause of the queen. When Henry took the title of supreme head of the Church, Tunstall recommended this course in his injunctions and in a sermon preached at Durham. He also vindicated the king's supremacy in 1533, in a sermon preached before the king on Palm-Sunday. In 1535 he was one of the commissioners for taking the valuation of ecclesiastical benefices, and in 1538 was appointed to confer about the Reformation with the German ambassadors. A new edition of the English Bible was revised by him and Nicholas Heath, bishop of Rochester, in 1541. In December, 1551, he was committed to the Tower on a charge of misprision of treason, and although the bill was thrown out by the House of Commons, he was brought before a commission (consisting of the chief-justice of the king's bench and six others) and deprived of his bishopric. He continued a prisoner in the Tower during the remainder of Edward's reign. On the accession of Mary, in 1553, Tunstall was restored to his bishopric, but, on account of his mild treatment of the Protestants, was again deprived, July, 1559. He was committed to the custody of Parker, then in possession of Lambeth Palace, who treated him

in a very friendly and respectful manner, until he died, Nov. 18, 1559. Tunstall was opposed to making transubstantiation an article of faith, and also held the doctrine of justification by faith only. His principal writings are, *In Laudem Matrimonii* (Lond. 1518, 4to):—*De Arte Supputandi* (Lond. 1522, 4to):—*Sermon on Royal Supremacy* (Lond. 1639, 4to):—*Confutatio*, etc. (Paris, 1522, 4to):—*De Veritate Corporis et Sanguinis Domini Jesu Christi in Eucharistia* (Lutet. 1554, 4to):—*Compendium in Decem Libros Ethicorum Aristotelis* (Paris, 1554, 8vo):—*Contra Impios Blasphematores Dei Prædestinationis* (Antwerp. 1555, 4to):—*Godly and Devout Prayers in English and Latin*, etc. (1558, 8vo). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tunstall, James, D.D.**, an English divine, was born about 1710, and educated at St. John's College, Cambridge, of which he afterwards became fellow and tutor. In 1739 he obtained the rectory of Sturmer, Essex, and two years later was elected public orator of the university, and was appointed chaplain to Potter, archbishop of Canterbury. In 1744 he was created D.D. at Cambridge; was afterwards collated to the rectory of Great Chart, Kent, and to the vicarage of Minster, Isle of Thanet; both of which he resigned in 1757 for the valuable vicarage of Rochdale, Lancashire, where he remained until his death, March 28, 1772. His writings are, *Epistola ad Virum Eruditum Conyers Middleton*, etc. (Camb. 1741, 8vo):—*Observations on the Present Collection of Epistles between Cicero and Brutus*:—*Sermon before the House of Commons* (May 29, 1746):—*Vindication of the Power of the State to Prohibit Clandestine Marriages*, etc. (1755):—*Marriage in Society Stated*, etc. (1755):—*Lectures on Natural and Revealed Religion* (published after his death, in 4to). See Chalmers, *Biog. Dict.* s. v.; *English Cyclop.* s. v.

**Tuonela** was, according to the Finnish belief, the river of the country of the dead.—Lenormant, *Chald. Magic*, p. 258.

**Tuoni**, was the father of Kivutar, or Kipu-tyttö, the Finnish goddess of diseases.—Lenormant, *Chald. Magic*, p. 259.

**Tuquoqa**, in the mythology of the Hottentots, is the evil spirit causing harm and misery, for whom numerous sacrifices are offered for the purpose of relieving the Hottentots, whom he is said to persecute.

**Tura (or Turra), COSIMO (Cosimè da Ferrara)**, an Italian painter, was born at Ferrara in 1406. He was a disciple of Galasso Galassi, and was court-painter in the time of the duke Borso d'Este. He died in 1469. Tura worked both in oil and fresco, and painted in the dry, Gothic style then prevailing. Among his paintings are, *Annunciation and Nativity*, in the cathedral:—*Acts of St. Eustace*, Monastery of San Guglielmo:—*Virgin and Saints*, Church of San Giovanni:—*Christ Praying in the Garden*, at the Cappuccini:—*Madonna with Saints*, Berlin Museum. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Turban**. Though it is presumable that in a climate like that of Palestine the inhabitants did not expose themselves to the cold of winter or the heats of summer without some covering for the head, there is no certain evidence that any such was in common use. The Hebrews have several words by which articles of head-dress are designated, but they all apparently belong to coverings which were either official or merely ornamental, with the exception of those used by the military.

In the Pentateuch two kinds of head-coverings are mentioned as forming part of the priest's dress, the כִּטְיָאֵל of the high-priest, and the כִּטְיָאֵל of the common priests; the former of which was probably a sort of tiara, while the latter may have been a turban, but was more probably a high cap of a flower-like shape, such as are found among Orientals in the present day (Bähr, *Symbolik des mos. Cult.* ii, 66). As these head-

coverings (A. V. "bonnets") were expressly designed for "glory and for beauty" (Exod. xxviii, 40), they evidently give us no idea of what was commonly worn on the head by the people. In the ceremony prescribed for the drinking of the waters of jealousy, the priest is directed to *loosen* (פָּרַס) the woman's head—i. e. to let her hair fall down loosely (Numb. v, 18); and in the law concerning the leper it is prescribed that his head shall be *loosened* (פָּרַס); phraseology which seems to indicate that it was customary in the Mosaic times to bind the hair with a band or fillet, such as we see represented on the Egyptian and Assyrian monuments. On the other hand, from the stress that is laid in the law concerning the Nazarite on his suffering his locks to grow, and on his hair thus abundantly grown being the crown of God on him (Lev. xiii, 45), it seems fair to infer that the cropping of the hair, and perhaps also the shaving of the head and the wearing of some covering (it may be of artificial hair, as among the Egyptians), was common among the people.

In the other books the terms which occur designating head-dress, besides those which are *regal*, such as כִּנֹּרֶת and כִּנְרוֹת [see CROWN], and those which are *military* [see ARMOR], are the following:

1. צִנִּיף, *tsiniph*. This term occurs three times in the Old Test. (Job xxix, 14; Isa. lxiii, 3; Zech. iii, 5). In all these cases the usage of the word shows that it refers, not to an ordinary article of dress, but to one which was ornamental and for display. It was probably a turban, the word being derived from צָנַף, to roll round or wind. Schröder (*De Vest. Mulier. Heb.* p. 364) endeavors to prove from the Arabic that this word means a narrow strip wound round the head; but his instances only prove that the Arabic *tsinf* and *tsinfa* denote a small band, or the hem of a garment. In Isa. iii, 22 the fem. *tseniphâh* is used of a female head-dress worn for ornament.

2. פֶּעֶר, *peér*. This word is used of the head-dress of distinguished persons, both male and female (Isa. iii, 20; lxi, 3, 10; Ezek. xxiv, 17, 23; xlv, 18). In Exod. xxxix, 28 it is used of the priest's head-dress, as also in Ezek. xlv, 18. In all the other instances it indicates an article of holiday costume. Saalschütz suggests that the *peér* was probably the hat or bonnet, properly so called, and the *tsiniph* the ornamental head-band wrapped round it.

3. צִפְרֵיִת, *tsaphirâth*, from צָפַר, to circle, a circlet or diadem (Isa. xxviii, 5); or it may have been a piece of fine muslin wound round the turban for ornament, such as the Orientals still use.

4. לִירָאֵה, *liryâh* (Prov. i, 9; iv, 9). Some regard this as a species of fillet by which the head was bound; but it probably means rather a garland or wreath of flowers.

The examination of these terms has failed to convey to us any information respecting the ordinary every-day costume for the head of the Hebrew people. Probably they were wont simply to throw some part of their dress over their heads when they had occasion to expose themselves to the weather, or to fold a piece of cloth over their heads, as do the Arabs of the present day, reserving such articles as those above named for holiday or festive occasions (Jahn, *Biblische Archäologie*, i, ii, 2, p. 116; Saalschütz, *Arch. der Hebr.* ii, 22). See HEAD-DRESS.

**Turchi**, ALESSANDRO, called *Veronese*, also *L'Orbetto*, an Italian painter, was born at Verona (according to Pozzo) about 1578. When a lad his talent was recognised by Felice Riccio, who took him into his study, and carefully instructed him. Leaving Riccio, he went to Venice, where he studied with Carlo Cagliari, and then proceeded to Rome. Here he made his home until his death, in 1648. Turchi excelled in the choice and distribution of his colors, among which he introduced a reddish tint which much enlivens his pictures. At Rome he painted

some altar-pieces and other pictures for the churches, the most esteemed of which are in the Church of La Concezione. Among his other principal works at Rome are, *The Flight into Egypt*, in San Romualdo; *The Holy Family*, in San Lorenzo; and *St. Carlo Borromeo*, in San Salvatore. There are also to be noticed his *Passion of the Forty Martyrs*, in San Stefano; and his *Pietà at La Misericordia*. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Turck**, ANTHONY, a Methodist Episcopal minister, was a native of New York State, and of Dutch descent. He was received into the travelling connection in 1798; "a holy and devout man, indefatigable and successful in his labors, subject to great afflictions, temptations, and trials," but with "increasing sweetness in communion with God" towards his end, and victory in death. He died March 13, 1803. See *Minutes of Annual Conferences*, i, 109.

**Turibio** (TURIBIUS), *St.*, is said to have been born Nov. 16, 1538, of good family. Every Christian perfection distinguished him in early youth. He was educated at Valladolid and Salamanca, was made president of Granada by Philip II, and subsequently became archbishop of Lima, in South America, though still a layman. He was consecrated in 1581, and proceeded to initiate an excellent administration, during which he founded hospitals, seminaries, and churches, ordered diocesan and provincial synods, travelled in the execution of his duties over the entire country, and displayed great devotion during a contagious pestilence. He is credited with the miraculous cure of several persons who were sick, and with at least one successful raising of the dead to life. He died at Santa, Nov. 23, 1606. It is said that his body was brought, undecayed, to Lima after a whole year had passed since his decease, and that it continued to work miracles. He was accordingly beatified in 1679 by Innocent XI, and canonized by Benedict XIII in 1726. See Wetzer u. Welte, *Kirchen-Lex.* xi, 330; Herzog, *Real-Encyclop.* s. v.

**Turin, COUNCIL OF** (*Concilium Turinense*), was held at Turin, Italy, in 398, or, according to others, in 401, to settle certain differences which had arisen among the Gallican prelates. The bishops of the province of Aix, Proculus of Marseilles, Simplicius of Vienne, and the bishop of Arles were present. As Turin was at that time under the metropolitan of Milan, it is conjectured that Simplicianus of Milan convoked it.

1. The first question settled in the council was that of Proculus of Marseilles, who (although that see was not in the province) desired to be recognised as metropolitan of the province of Narbonne. The council, for the sake of peace, granted to Proculus personally, but not to his see, the right of primacy which he claimed, declaring, however, that after his death the metropolitan should be a bishop of the province itself.

2. The council took into consideration the differences between the archbishops of Arles and Vienne, who both pretended to the primacy of Viennese Gaul. The decision was that he of the two who could prove his city to be the metropolis of the province as to civil matters should be considered as the lawful metropolitan, and in the meantime they were exhorted to live in peace.

3. The excuses of the bishops Octavius, Ursion, Remigius, and Triferius were considered. These prelates were accused of having conferred orders irregularly and uncanonically. The council decided that, in this case, indulgence should be granted to the four bishops; but that, in future, any bishops so violating the ancient decrees of the Church should be deprived of the right of ordaining, and of all voice in synodical assemblies; and that those who should be so ordained should be deposed. This canon was confirmed in the Council of Riez, A.D. 439.

Several other regulations relating to the affairs of the Church were also made, and eight canons in all published. See Mansi, *Concil.* ii, 1155.—Landon, *Manual of Councils*, s. v.

**Turkey** is the largest Mohammedan empire of the world, containing extensive possessions in Eastern Europe, Western Asia, and Northern Africa. Including the provinces in Europe and Africa which are virtually independent, and only pay an annual tribute to the Turkish government, the Turkish empire, in 1880, had an area of 2,302,000 square miles, and 47,000,000 inhabitants. In consequence of the treaty of Berlin in 1878, Turkey had to recognise the entire independence of Roumania and Servia, and to consent to the occupation of Bosnia and Herzegovina by the government of Austria. Moreover, Bulgaria and Eastern Roumelia have become virtually independent of Turkish rule, leaving to the Turkish government only a small territory in Europe which is fully under its control. In Africa, Egypt and Tunis are likewise independent in point of administration. Deducting the dependencies, the Turkish government at present rules over a territory of 1,043,000 square miles, with a population of 23,500,000. In June, 1880, the Supplementary Conference at Berlin declared that in order to carry out the provisions of the treaty of Berlin concerning the rectification of the frontier between Turkey and Greece, Turkey ought to cede to Greece a territory containing about 8292 square miles and 400,000 inhabitants.

[Note by the Editor.—For the purpose of enabling our readers to understand more fully the present complicated boundaries of Turkey, we insert a map based upon the one recently issued by Stanford, of Charing Cross, London. It will be perceived that, in consequence of the late Russo-Turkish war, Turkey has lost far more than

half her European possessions, which are to be bounded henceforth by the Balkan Mountains instead of the River Save and the eastern Carpathian chain. Roumania, Bulgaria, Servia, Bosnia, and Montenegro are wholly severed from her. Bulgaria has lost a slice of her territory on the west, given to Servia, and another on the north-east, given to Roumania. Montenegro has gained a piece on the north-west from Bosnia, and another on the south-east from Turkey. Bosnia, including the part of Croatia formerly in Turkey, together with Herzegovina, has been occupied by Austria, and is not likely to be restored to Turkey. Greece gains a part of Albania and Thessaly; and Russia that part of Roumania (bounded by the Pruth and the Danube) adjoining Bessarabia (which she already held). In Asia Russia also acquires a district of Armenia adjoining Batumi. Besides, there is created a quasi-independent district of Eastern Roumelia, within the above narrowed limits of Turkey. Turkey in Europe virtually now consists merely of a part of Roumelia and a part of Albania. The interior changes in territory and population made by the Berlin treaty are stated as follows in the London *Athenæum*. Estimates of other statisticians vary considerably from these figures.

	Square Miles.	Inhabitants.	Mohammedans.
Ceded to Roumania.....	5,935	246,000	142,000
Ceded to Servia.....	4,326	264,000	75,000
Ceded to Montenegro.....	1,549	40,000	9,000
Ceded to Austria.....	15	2,000	—
Ceded to Greece (?).....	5,300	750,000	40,000
To be occupied and administered by Austria.....	28,125	1,061,000	513,000
Formed into the principality of Bulgaria.....	24,404	1,773,000	681,500
Included in Eastern Roumelia.....	13,646	746,000	265,000

Roumania, in exchange for the territory ceded, is called upon to surrender 3270 square miles, with 140,000 inhabi-

Map of Turkey in Europe, showing the Territorial Changes made by the Treaty of Berlin.

tants, to Russia. If we exclude the provinces "indefinitely" to be occupied by Austria, and Eastern Roumelia, there remain to Turkey in Europe only 74,790 square miles, with 4,779,000 inhabitants, of whom 1,521,500 are Mohammedans. In Armenia Russia takes 10,000 square miles, with about 350,000 inhabitants. Cyprus, entrusted to the keeping of England, has an area of 2288 square miles, and about 150,000 inhabitants. Many of these accessions, however, are already the fruitful source of contention, and some of them will probably have to be taken possession of by force of arms. Greece is at the present moment (Aug. 1880) preparing to do so for her share. It is impossible now to predict what the issue will be.]

The former volumes of this *Cyclopædia* have special articles on BULGARIA, EGYPT, ROUMANIA, SERBIA; and on some of the Eastern Churches which are wholly or chiefly found in Turkey, as the JACOBITES, NESTORIANS, and MARONITES. In the present article, after giving such preliminary information of a general character as the intense interest at present prevailing on the Oriental question seems to demand, we treat, more particularly, of the religions of Turkey proper, so far as they have not yet been discussed in the special articles which have just been referred to.

I. *Geographical and Ethnological Features.*—The geographical position of the Turkish empire is peculiar, and would, under a strong government, be most advantageous. It connects Europe with Asia, Asia with Africa, the East with the West, the Mohammedan with the Christian world. It has an extensive seacoast, which is indented by numerous gulfs and bays, and embraces many excellent harbors. Some parts of this coast were in former times the seat of a very flourishing commerce, which would undoubtedly be revived under favorable circumstances. Almost the entire territory which is subject to direct Turkish rule is noted for its fertility; but Turkish misrule has not only arrested, but diminished, its productiveness. By far the greater portion of the Turkish possessions is situated in Asia. The European possessions have always been much smaller, but as they contained the capital and seat of government, they have hitherto been of much greater political importance. This importance has, however, of late been greatly reduced by the territorial losses which Turkey has sustained by the last Eastern war and the treaty of Berlin. The African part of the Turkish empire consists almost wholly of tributary states; and the farther the territory of one of these states, Egypt, is extended, the smaller becomes the hold the Turkish government has on it. Although ruling over portions of Europe, Asia, and Africa, Turkey is really an Asiatic power.

While the Turks are the ruling race of the empire, they constitute a majority of the total population only in the Asiatic possessions. Even Asiatic Turkey can hardly be said to be an Ottoman land, for the bulk of the people are descendants of the old Seljukian Turks who have been subjected by the Ottoman Turks. In the African dependencies the Turks are hardly represented at all, and in Europe they are almost everywhere in a minority. According to an elaborate article on the ethnographical relations of Turkey in Petermann's *Geographische Mittheilungen*, 1876, No. 7, the Turks are to be found as a compact population only in three sanjaks, those of Rustchuk, Tulcha, and Varna. These three sanjaks formed part of the vilayet of the Danube. They are less numerous in the Rhodope Mountains. On the shores of the Ægean Sea and the Sea of Marmora, and on the south-east shore of the Black Sea, they are greatly outnumbered by the Greeks, especially in the direction of Constantinople. It is a remarkable fact that all the sanjaks which contain the most compact Turkish population are now subject to the semi-independent prince of Christian Bulgaria and to the Christian governor of the autonomous province of Eastern Roumelia. The aggregate number of the Osmanli Turks in Europe, including Bulgaria, Eastern Roumelia, Bosnia, and Herzegovina, is estimated at about 2,000,000. Exclusive of these provinces, over which the authority of the sultan is not likely to be

ever restored, the number of Osmanlis will barely reach 1,000,000 in a total population of about 5,000,000. In Asia the Turkish race is supposed to number more than 8,500,000 of a total population of 17,000,000; but this number embraces many old tribes who have been totally absorbed and merged in the Turks. The Turcomans, who live chiefly in Northern Mesopotamia, and number about 100,000, belong to the same race as the Turks.

Up to the time of the late Eastern war, the bulk of the population in the European dominions of Turkey was made up of five non-Turkish tribes—Roumanians, Servians, Bulgarians, Greeks, and Albanians. The Roumanians, who chiefly inhabit the principality of Roumania, where they number about 5,000,000, have long been semi-independent of Turkey, and became entirely independent by the treaty of Berlin. Only about 200,000 remain subject to Turkish rule. Outside of Roumania and Turkey, Austria has a Roumanian population exceeding three millions. West and south of the Roumanians we find two branches of the Slavic race, the Servians and the Bulgarians. The Servians embrace the inhabitants of the principalities of Servia and Montenegro, and of Bosnia and Herzegovina. Both Montenegro (q. v.) and Servia (q. v.) are now independent states; Bosnia and Herzegovina have been placed under Austrian administration, and are likely to become soon a part of the Austrian empire. In Bosnia, the landed aristocracy, after the conquest of the country by the Turks, became Mohammedans, in order to save their property and their privileges, but they continue to speak the Servian language. Outside of the present and former dominions of the sultan, Austria has a Servian population of about 4,500,000, called Croats, Slavonians, Dalmatians, and Slovenians. The large majority of the Servians belong to the Greek Oriental Church; but in Austria and in Bosnia there is also a large Roman Catholic element. According to a recent work by Klaić on Bosnia (Agram, 1878), written in the Croatian language, the population of Bosnia is divided, as regards the religious denominations, into—Orthodox Greek Church, 646,678, or 48.4 per cent.; Mohammedans, 480,596, or 35.9 per cent.; Roman Catholics, 207,119, or 15.5 per cent.; and Jews, 3000, or .2 per cent.; but in regard to race, 1,291,398 of this population are Slaves, only 2000 Osmanli Turks, 30,000 Albanians, and 11,000 gypsies. The Servians of all the different denominations in Austria and the former Turkish dominions are only now awakening to the full significance of the fact that their common language makes them joint members of one nationality, and a strong movement towards uniting at some future time all these members into one state has set in. Although the Mohammedan Bosnians are strongly opposed to this union movement, as well as to the annexation of their province to Austria, the rule of the Osmanli Turks over the Servian nationality may be said to be at an end.

The second Slavic race of European Turkey is the Bulgarians. They occupy the country south of the Danube, their southern ethnic boundary being a line passing through the towns of Nissa, Prisrend, Ochrida, Kastoria, Niagostos, Salonica, Adrianople, and Burgas, on the Black Sea. The number of Bulgarians is estimated at from three to four millions. After four centuries and a half of oppression, they were considered at the beginning of the 19th century the most wretched people of Europe. Then a marvellous awakening began. See BULGARIA. In spite of all oppression, they laid the foundation of a national system of education, and re-established the independence of their national Church. The treaty of San Stefano, March 3, 1878, between Russia and Turkey, provided for the establishment of Bulgaria as a tributary Ottoman principality and a national militia. The principality thus constituted would have extended from the boundaries of Servia and Albania to the Black Sea, and from the Danube nearly to the Ægean Sea, taking in about fifty miles of the Ægean coast. It would have included all the pre-

dominantly Bulgarian districts, both north and south of the Balkans, containing an aggregate of 79,400 square miles and an estimated population of between five and five and a half millions. But although the Bulgarians would have been the dominant race, a considerable number of Turks, Servians, and Greeks would have been merged in the Bulgarian majority. The treaty of Berlin of July 13, 1878, greatly modified this plan. The tributary principality of Bulgaria, as constituted by it, contains only 33,000 square miles and about 1,860,000 inhabitants. The Bulgarian districts south of the Balkans were constituted as the autonomous province of Eastern Roumelia, the governor of which must be a Christian, but is appointed by the Turkish government with the consent of the treaty powers. Eastern Roumelia has about 13,664 square miles and 850,000 inhabitants, of whom about 600,000 are Bulgarians, 150,000 Greeks, and 70,000 Turks. The aggregate population of Bulgaria and Eastern Roumelia reaches about 3,000,000, of whom fully 2,500,000 are Bulgarians, and the remainder mostly Turks and Greeks. The Mohammedan population is estimated at from 800,000 to 950,000, but fully two thirds of them are of Bulgarian descent. The Bulgarians, generally, were greatly dissatisfied with the provisions of the treaty of Berlin, and a strong movement began at once for a reunion of Bulgaria and Eastern Roumelia, which can hardly fail to be ere long successful, and result in the emancipation of the entire Bulgarian population from Turkish rule.

The Greeks, or Hellenes, have a numerical preponderance in the southern part of European Turkey, especially in Thessaly, Epirus, Southern Macedonia, and the islands, the most important of which is Crete. They are the most civilized among the Christian races of Turkey. Their number is estimated at about 1,000,000 in European and 1,000,000 in Asiatic Turkey. The people of the predominantly Greek districts expressed during the late civil war a desire to be annexed to the kingdom of Greece, and the government of that kingdom made in January, 1879, an attempt to occupy these districts. The attempt had, however, to be abandoned at the request of the great powers. The Congress of Berlin expressed a desire that the frontier between Greece and Turkey should be rectified to the advantage of the former power, and offered the mediation of the great powers in case Turkey and Greece should be unable to agree. As this agreement was not reached, the supplementary congress held in Berlin in June, 1880, designated the new frontier between the two states. In Asia, the Greeks are fast occupying the seaports and coast of Asia Minor, from which the Turks are steadily retreating before them, and it is believed by many that a vigorous Greek kingdom in Europe would soon find a legitimate field of expansion along the coast of Asia no less than that of Europe.

The Albanians occupy the country south of the Servians and Bulgarians, and north of the Greeks. Their number is estimated at from 1,200,000 to 2,000,000. More than one half of them have embraced Islam, though it is said that many of the Mohammedan Albanians remain secretly Christian. They are divided into a number of tribes. Some of the most warlike mountain tribes are Roman Catholics. In the frontier districts the Albanians are greatly mixed with Servians in the north and with Greeks in the south. They opposed with great vigor the cession to Montenegro by the Turkish government of some districts largely inhabited by Albanians, and declared an intention to oppose no less vigorously the cession of some of their southern districts to Greece. The Albanians are the only one of the five non-Turkish nationalities of European Turkey which shows some kind of attachment to the Ottoman government. This must partly be explained by the predominance among them of Mohammedanism, and partly by their determination not to be absorbed by Servians and Greeks. The increasing consolidation of Servians, Bulgarians, and

Greeks will, however, cut them off from Constantinople, and make it impossible for them to remain a Turkish province.

A curious fact in the relation of the different races that people European Turkey is the irregular manner in which they are distinguished and mingled. "No locality," says Baker, in his *Turkey*, "can be found where the population is exclusively of the same nationality; but a rival race crops up here and there, and jostles its neighbors. We find, for instance, a quarter where the majority of the population are Bulgarians; but among them in considerable numbers are Turks, Greeks, Circassians, and gypsies. In another quarter the majority are Albanians, but they again have to bear the friction of Bulgarians, Wallachians, Greeks, and Turks; and so on all over the country. Each of these nations has its own language, religion, and customs; and it therefore follows that the difficulty of governing the mass lies in a direct ratio to the number of races represented in it." This irregular distribution of races has, however, been considerably affected by the close of the Eastern war, when, especially, large numbers of Turks and Bulgarians left their endangered homes, and emigrated to districts predominantly inhabited by coreligionists. The Austrian consul Sax (in *Oesterreichische Monatsschrift für den Orient*, 1878) estimates the number of those who from the spring of 1877 to the close of 1878 changed their residence at more than one million.

**II. Origin and Political History.**—The Turks are first heard of in history when they emerged from the regions of Central Asia, and emigrated, early in the Christian era, to the neighborhood of the Aral and Caspian seas. In the 6th century they formed an alliance with the Roman emperor Justin II; in the 7th they began to learn the Mohammedan religion at the hands of the Saracens. After their conversion to Mohammedanism they rapidly rose in power and influence. One branch, which, after its leader, Seljuk, received the name of Seljukian Turks, subjugated a large portion of Persia, and thence spread into Syria, Armenia, Georgia, and Lower Egypt. Under Malek Shah, the grandson of Seljuk, the dynasty of the Seljukian Turks was in the 11th century the greatest power in Asia. They gradually pressed their conquests to the West, and from this time a more special and crying persecution of the Christians began. After Malek's death, the empire was divided into smaller states, which became rivals, and were finally extinguished in the 13th century by the irruption of the Moguls under Genghis Khan. Then the history of the Ottoman Turks begins. The first mention of them is made at the beginning of the 13th century, when they emigrated, under the name of Oghuz Turks, from the main body in Khorassan, Persia, to the mountains in Armenia, whence a part removed and settled near Angora, still acknowledging the suzerainty of the Seljukian sultan of Iconium. Partly at the expense of the Greeks, partly at that of other Turkish emirs or princes, the leaders of this band, Ertoghrul and his son Othman, or Osman, gradually grew in power. Othman became the most powerful prince in Western Asia, and from him his followers took the name by which this branch of the Turks has ever since been designated, that of Ottoman, or Osmanli. Shortly before the death of Othman, in 1326, his armies took Brousa, which became the Asiatic capital of the Ottomans. With Othman's son, Orkhan, the Ottoman empire begins. He made himself entirely independent of the Seljukian sultan, though he continued to bear the inferior title of emir. During his reign Gallipoli, in the Thracian Chersonesus, the first acquisition of the Turks in Europe, was conquered, in 1357, and all of Western Asia occupied. He imposed upon the conquered Christian nations the tribute of children, who were brought up in the Mohammedan faith, and out of whom was formed the famous force of the Janizaries, who for three centuries constituted the strength of the Ottoman armies.

In the reign of Murad I, the successor of Orkhan, Adrianople was taken, which became the European capital of the Ottomans till they captured Constantinople. When the Turks entered Europe, the territory of the Greek empire was almost limited to a quadrangle extending from Constantinople to Adrianople, and from the Black Sea to the Archipelago, to a small part of the coast near Thessalonica, and the larger portion of the Peloponnesus. The bulk of what subsequently became European Turkey consisted of the empire of Serbia, extending from the Danube to the Peloponnesus, and bounded on the west by Bosnia and the Adriatic Sea; and of the kingdom of Bulgaria, extending from the Danube to Adrianople, bounded on the east by the Black Sea. The frontier between Bulgaria and Serbia was constantly changing. When the Turks began to get a foothold, Widdin and Sophia were the nearest Bulgarian towns to the frontier. At this time the power of Serbia began to go down after the death of Stephen Dushan, its greatest ruler, and Bulgaria began to split up into three separate kingdoms. Thus both were unable to resist the advancing Turks. In 1363 the Bulgarian city of Philippopolis was taken. About 1371 the chief of the three Bulgarian kingdoms, that of Tirnova, became tributary. For a while a Slavic confederation, under the Bosnian king Stephen, won some successes; but in the great battle of Kossova, in 1389, the confederate Bosnians, Servians, Bulgarians, and Wallachians were utterly defeated. Two or three years later, Serbia and Wallachia became tributary, and the greater part of Bulgaria was conquered. Murad's son, Bajazet I, was the first to exchange the humble title of emir for that of sultan, and also the first who attacked Constantinople. The progress of the Turks was arrested by the stunning defeat which they suffered in 1402 at Angora, at the hand of Timur, the famous Tamerlane; but they recovered their power under Bajazet's grandson, Murad II (1421-51), who conquered Thessalonica, Corinth, Patras, and a part of Albania, which was heroically defended by the great Scanderbeg. His son, Mohammed II (1451-81), conquered Constantinople, and thereby destroyed the Greek empire. He reduced, in 1459, Serbia from a tributary principality to an Ottoman province; in 1463 Bosnia was annexed; in 1461, the Christian empire of Trebizond, in Asia; in 1466, Caramania; in 1479, the Peloponnesus, which at that time belonged to the Venetians. In 1480 Otranto, in Italy, was captured; and the design was openly avowed to conquer all of Western Europe and to exterminate Christianity. But Mohammed's death, in 1481, put an end to these schemes; Otranto was soon abandoned, and no further progress was ever made west of the Adriatic. The conquests of Mohammed gave to the Turkish empire about the same extent it had before the late Eastern war. In the whole of the Balkan peninsula only the small mountain district of Montenegro has kept its independence to our own times. Selim the Inflexible (1512-19) warred against Mohammedan enemies, and annexed Syria and Egypt to his dominions. From the last of a line of nominal caliphs Selim obtained a cession of his rights, and ever since the Ottoman sultans have been acknowledged as chiefs of their religion by all Mussulmans of the Sunnite sect. During the reign of Suleiman II (1519-66) the empire attained the greatest extent it has ever had. The larger portion of Hungary was annexed; a Turkish pasha ruled at Buda; and the princes of Transylvania, Moldavia, and Wallachia became vassals of the sultan. Rhodes was taken from the Knights of St. John, and a large tract of land in Asia from the Persians. With the death of Suleiman the decline of Turkish power began. The reign of Selim II, the Drunkard (1566-74), was marked by the first great reverse of the Ottoman arms—the overthrow of the Turkish fleet by the fleets of Spain and Venice at the battle of Lepanto, in 1571. No lasting conquests of importance were made from this time, except the islands of Cyprus and Crete. The frontier

on the north towards Hungary, and in later times towards Russia, went steadily back. The succession of great rulers was stopped. The powers of the sultan became less, the power of the pashas greater. In 1622 a sultan was, for the first time, murdered. In the latter half of the 17th century the Turks began to lose their hold on Hungary. The battle of St. Gotthard, in 1664, was the first great overthrow of the Turks by land. At the end of the 17th century the Turks had been at war with all their Christian neighbors, and they had lost territory at all points except one. In a war against Poland they had gained Podolia; they had lost, besides Hungary, the Peloponnesus, and Azof. All of these territories, inclusive of Podolia, were given up by the treaties in 1699 and 1700. The peace of Carlowitz, in 1699, marks a point in the decline of the Ottoman power, and the Turks were for the first time compelled to treat with the Christian powers of Europe on equal terms. The wars against Austria, which, with breaks from time to time, had gone on since the battle of Mohacz, 1526, by which the Turks established their rule over Hungary, were ended by the peace of Sistova in 1791. The result was that Hungary was freed from the Turk, but that Serbia and Bosnia were left in his clutches. The frontier established by that peace has remained almost unchanged. The most dangerous of all the foreign enemies of Turkey proved to be Russia. The wars between Russia and the Turks began in the middle of the 17th century, and the two countries have ever since appeared as irreconcilable hereditary foes whose interminable conflict could only be ended by the destruction of the one or the other. The wars between Russia and Turkey put on a very distinctive character when Peter the Great, in 1696, took Azof, the key of the Black Sea. From the time that Mohammed the Conqueror took the Genoese possessions in the Crimea, the Black Sea had been wholly under the power of the Turks. When Azof fell into the hands of the Russians, it remained for a great time the point of contention between the two countries. A new stage in the history of these wars is marked by the famous treaty of Kainarji of 1774, which ended the first war of Catherine II against the Turks. This treaty for the first time brought the Ottoman power into some measure of dependence. It gave Russia a firm foothold on the Black Sea, and the important right to remonstrate in behalf of Wallachia and Moldavia, in case of any breach of their privileges by the Turks.

The most prominent feature in the Turkish history of the 19th century is the successful revolt of the subject Christian nations against the Ottoman power. This war of independence began in Serbia in the first years of the new century. It was at first a rising against local tyrants who defied the authority of the sultan, but it soon became a war of independence. In 1826 the independence of the country was recognised by Turkey, which was only to receive an annual tribute, and for some time retained the right of keeping garrisons in certain fortresses. The Greek war of independence began in 1821. Finding himself unable to subdue both Greece and Serbia, the sultan had to apply for help to his rebellious vassal, pasha Mehemet Ali of Egypt; but the outrages of the Egyptians led to an interference by England, France, and Russia, who, in 1827, in the treaty of London, agreed to make Greece free; destroyed, in November, 1827, at the battle of Navarino, the Turkish and Egyptian fleet, and compelled the sultan to agree to the treaty of London. In the treaty of Adrianople (1829), Turkey had not only to acknowledge the independence of Greece, but the almost complete independence of Moldavia and Wallachia, whose hospodars thereafter held office for lifetime, and to cede several fortresses on the coast of the Black Sea to Russia. Mahmud II (1808-40) was desirous of introducing important reforms, and in 1826 exterminated the Janizaries; but while his reforms did little good to the Christians, they set his Mohammedan subjects

against him. There were Mohammedan revolts in Albania and Bosnia, which were put down in 1831 and 1832; but more important was the rebellion of Mehemet Ali of Egypt, who conquered Syria and other Asiatic possessions of the sultan, and seemed to threaten the very existence of the empire, when (1840) four of the great Christian powers of Europe concluded the treaty of Buda-Pesth, and compelled Mehemet Ali to give up his Asiatic conquests. In the Crimean war (1853-55), Turkey would probably have been crushed by Russia but for the interference of England, France, and Sardinia in its behalf. By the treaty of peace in 1856, the powers which signed it—France, Austria, Great Britain, Prussia, Russia, and Sardinia—declared that the Sublime Porte was admitted to partake in the advantages of public law and the European concert. This concession was made to the Porte in recognition of the *hatti-humayum* (Feb. 18, 1856), a proclamation which promised to the Christians equal civil rights, but which the Porte found itself no more able to carry out than a preceding reformatory edict, the *hatti-sherif* of Gulhane of 1853. The approaching collapse of Turkey became more and more apparent. Terrible massacres of Christians in Damascus and Mount Lebanon led, in 1860, to a French intervention. In 1861 Moldavia and Wallachia united themselves, in spite of the treaty of Paris and of the protest of the Porte, into one state, called Roumania. A powerful impulse was given to the aspiration of the Christians for freedom by the complete victory of the nationality principle in Italy and Germany. As the Italians and Germans had re-established an Italian kingdom and a German empire, thus the Greeks of Turkey expressed a wish for a union with Greece, the Servians began to dream of the re-establishment of a large Servian empire, the Bulgarians of a Bulgarian kingdom, the Roumanians of severing the last tie of connection with Turkey. The first movement in this direction was the insurrection in Crete in 1866, which was suppressed in 1869. The powers which had signed the treaty of Paris held a special conference and recognised the demands of the Porte as just. In 1867 the demand of Serbia that the Turkish garrisons be withdrawn from all the Servian fortresses was granted. In 1872 the sultan conceded to the khedive of Egypt two important attributes of sovereignty, the direct hereditary succession and the authorization to make loans. On July 6, 1875, an insurrection broke out in Herzegovina, which gradually kindled the great Eastern war. A series of joint steps were taken by the great powers of Europe to induce the Porte to concede the reform demanded by the Christian insurgents. The most important were, the note of count Andrassy of Dec. 30, 1875; the Berlin Memorandum of May 14, 1876; the Constantinople Conference from December, 1876, to January, 1877; and the London Protocol of March 21, 1877. On April 24 Russia declared war, and at the beginning of 1878 Turkey was utterly crushed. In the peace of San Stefano of March 3, 1878, Turkey had to recognise the entire independence of Roumania, Servia, and Montenegro, to cede some additional territory to Servia and Montenegro, and to consent to the establishment of an independent principality of Bulgaria. In the case of Bulgaria, these stipulations were considerably modified by the treaty of Berlin of July 13, 1878, as has already been stated. Bosnia and Herzegovina were placed under Austrian administration, and to Greece the annexation of some Greek districts in Southern Turkey was promised. The introduction of the reforms formally demanded by the great powers of Europe was again promised, and their execution placed under the guarantee of the great powers. A few weeks before (June 4, 1878), Turkey had concluded a secret treaty with England, which assumed a protectorate over the Asiatic dominions of the sultan as long as Russia would not return its conquests in Armenia. In return, Cyprus was placed under English administration, and the Porte pledged itself to carry through administrative reforms in the Asi-

atic possessions. Thus Turkey appeared in an entirely helpless condition, and, so far as its European possessions were concerned, in a state of total decay. Among the European powers, only one—the Tory government of England—occasionally used its influence in behalf of the Turkish government. The fall of the Tory ministry in 1880, and the access to power of the Liberal party, which, during the war, had openly expressed its sympathy with the Christian nationalities of the Balkan peninsula, especially with the Greeks, deprived the Mohammedan government of its last hope. As the Turks had been unable to agree with the Greek government about the promised rectification of frontier, the powers which had signed the treaty of Berlin held another special conference at Berlin in June, 1880, and designated the districts which, in their opinion, should be ceded to Greece. The vital power of Turkey appears to be exhausted. A constitution drawn up by Midhat Pasha, and proclaimed Dec. 23, 1876, which promised to the population very extensive rights, failed to make any impression either at home or abroad. The Parliament which met in March, 1877, attracted more attention by its novelty than by its work.

III. *National Characteristics and Governmental Policy.*—Comparing Turkey with the other states of Europe, we are struck with one very remarkable distinction. In all the other countries of Europe the bulk of the people have learned that they have a common country, and that, however widely their opinions may differ, and however much they may dislike the existing government, they have important interests in common. The Turks have never become a nation. After subjecting many tribes of different race and religion, the exclusive aim of the sultans has been to keep them in subjection, and to extort from them as high a tribute as possible. The effect of Turkey's rule has therefore been most blighting upon every interest of her subjects. Morally, socially, economically, and politically, her dependencies have sunk, under the combined influence of a false, fanatical, and sensual religion, a bigoted, selfish, and imbecile régime, and an ignorant, fatalistic, and effete philosophy, to the lowest possible point of civilized communities. Corruption reigns in every department of state, and superstition in every form of society. The ruling class, being Turks and Moslems, feel no sympathy with the natives, who are largely Christian and of different races from themselves. Extortion, bribery, chicanery, and treachery have for ages characterized the government, until it has become a festering ulcer and a burning shame upon the face of Europe. But for the intrigues and jealousies among the other European powers, each of which has been anxious to outwit the rest in seizing upon the spoils of "the Sick Man's estate," Turkey would have been dismembered long ago by foreign interference, or have collapsed in utter ruin by its internal rottenness. England has been largely chargeable for maintaining, by her diplomatic policy, this eyre and blot upon the map of the world.

Several large territories are but very loosely connected with the empire. Tunis, in Africa, considers itself as a vassal state of the sultan, but without any definite obligation, not even that of paying an annual tribute. Formerly there were two other states of this class, Algeria and Tripoli; but the former has been conquered by France, and the latter has recently come under the direct authority of the sultan. The vassal states which had only to pay an annual tribute, and were otherwise autonomous, were, in 1878, Roumania and Servia, in Europe; Samos, in Asia; and Egypt, in Africa. In 1878 Roumania and Servia became entirely independent, and Bulgaria was erected into a tributary vassal state. In the autonomous province of Eastern Roumelia, the power of the sultan has been almost reduced to the right of appointing a governor.

By the old law of succession, which has been left unchanged by the constitution of 1876, the crown is inherited, according to seniority, by the male descendants

of Othman, sprung from the imperial harem. The harem is considered a permanent State institution. All children born in the harem, whether offspring of free women or of slaves, are legitimate and of equal lineage; but the sultan is succeeded by his eldest son only when there are no uncles or cousins of greater age. It has not been the custom of the sultans for some centuries to contract regular marriages. A special feature attending the accession of new sultans to the throne has been the slaughter of brothers and other near kinsfolk who were feared as rivals. Until very recently the will of the sultan was not limited by any law. The precepts of the Koran were regarded as the fundamental law of the empire. The legislative and the executive authority were exercised in the name of the sultan by the grand-vizier as head of the temporal government, and the Sheikh el-Islâm as the head of the Church. The constitution of 1876 pretended to make the sultan a constitutional monarch, and to provide for the exercise of the legislative and judicial powers after the model of the West European states; but the constitution thus far (1880) is almost a dead letter. Several Christians, however, have of late held the position of Minister of State. The financial affairs of the government are in a condition of thorough and hopeless disorganization, and the time of the empire's complete dissolution cannot be distant.

IV. *Mohammedanism*.—The Turks have been a Mohammedan people from the 10th century, and have ever since been the banner-bearer among the Mohammedan states. The sultan is regarded as the head of the Sunnite Mohammedans [see SUNNITES], not only in Turkey, but as far as the Sunnite form of Mohammedanism extends. Church and State are so intimately united in Turkey that the judicial and the priestly power are vested in the same officer, the *Ulema*, who regards the Koran as the sole authority for the decision of ecclesiastical as well as civil causes. "The administration of justice in Turkey is now divided into two parts—that of the *Sheri*, wherein all judges are Mussulmans, and that of the *Nizâmiyeh*, composed of both Christians and Mussulmans. The head of all the courts of the Sheri is the Sheikh el-Islâm, who sanctions all their judgments. The judiciary of the Sheri is composed of a high court of appeal (*Arz-odacy*), divided into two chambers (*Sudâr*), one for Turkey in Europe, and one for Asia. At the head of each is a *câzi-asker*, literally military judge. The *câzi-asker* is assisted by fourteen honorary chief-justices. In the hierarchy of the Ulema the mollahs rank next to the *câzi-asker*, and after them the cadis. The first in rank are the mollahs of Constantinople, nine in number, and who sit in the court Sheri, at the capital, for a year, being taken in turn from the body of the mollahs. At its head is the mollah of Stamboul. The second in rank is the *Melevizet*, which numbers fifty-seven titularies. The mollah, when on duty, serves for only a year, and then returns to the roll" (Baker, *Turkey*). Turkish education, until recently, was also in close connection with the State religion. It was organized by sultan Mohammed I (1451-81), the greatest soldier-statesman that the Ottoman empire has produced. He established elementary schools called *mektebs*, scattered over his empire in every town and in almost every Mohammedan village, and numerous public schools or colleges of the higher order, which were called *medresses*, in distinction from the *mektebs*, or elementary schools. The *medresses* went through ten regular courses of grammar, syntax, logic, metaphysics, philology, the science of tropes, the science of style, rhetoric, geometry, and astronomy. The taker of a degree in these subjects received the title of *damishmend*, which has now been replaced by the term *âfîa*. The degree entitles him to the mastership of one of the minor public schools; but in that case he renounces the prospect of becoming a member of the Ulema, or of any of the higher educational appointments. For this it is necessary to go through a still further course of study, and to pass several examinations. Incentives to work are

given in the honors and endowments which are conferred. The Ulema supplies all the professors of the high-schools, who are called *muderrris*, and from the same order are chosen all the ministers of justice, including the *câzi-askers*, the mollahs, and the cadis. The actual priesthood of Turkey takes a very inferior position in the State. The ministers of public worship are called *imams*, who officiate at public prayers, and sheiks, or preachers. But the fact that the appointments to the priesthood are allotted to the holders of minor degrees does not mark, on the part of the Turks, any want of respect for their faith. It only arises in consequence of the legal profession being so intimately connected with the Church as expounders of the law of the Koran that they, in fact, form the senior branch of the hierarchy. Dervishes, or Mohammedan monks, are very numerous and are divided into a number of sects. See DERVISH. The *Vacouf*, or Church property, which belongs to the mosques and other religious institutions and to benevolent foundations, is administered by a special department of the State called the *Evkaf*, and consists of two classes: 1st. Property or its produce actually belonging to such ecclesiastical establishments, and held and received on their account by the Evkaf; and 2d. Property owned by private persons, but lapsing, in default of direct heirs of the owner, to the Evkaf, and subject, in the meantime, to a small yearly contribution payable to that department; but an owner of Vacouf property having no direct heirs is not debarred from selling it to a person having such heirs, and so preventing it, for the time, from falling into the Evkaf. By a recent law a private person holding Vacouf property can, on payment of certain fees to the government, have it converted into what is called *mulkieh*, a title which gives the holder the fee simple of the land, to do with it as he pleases, to leave it by will, and, in default of his doing so, it passes to his next heir.

Trustworthy statistics on the religious denominations of Turkey cannot yet be obtained. E. G. Ravenstein, in an article on the population of Russia and Turkey in the *Journal of the Statistical Society* (Lond. 1877), estimates the total population of European Turkey, exclusive of Roumania and Servia, but inclusive of Bosnia and Bulgaria, at 9,661,000, which he distributes as follows among the religious denominations:

EUROPE.	
Turkish Mohammedans.....	1,767,500
Mohammedans of other nationalities.....	2,479,500
Total Mohammedans.....	4,247,000
Greek Church.....	4,705,450
Armenians.....	89,000
Roman Catholics.....	426,000
Protestants.....	10,000
Total Christians.....	5,230,450
Jews.....	73,000
Gypsies.....	104,750
Total.....	9,660,200
ASIA.	
Turks.....	6,973,500
Other Mohammedans.....	6,299,850
Total Mohammedans.....	13,273,350
Greek Church.....	1,484,868
Armenians.....	735,100
Roman Catholics.....	100,100
Protestants.....	10,450
Maronites, etc.....	451,000
Total Christians.....	2,517,518
Jezides and Kizilbash.....	62,000
Jews.....	106,000
Gypsies.....	67,000
Total.....	16,325,868

A Servian statistician, Jakshitsch, gives the following estimates of the population of European Turkey: *Christians* in Turkey proper, 2,484,501; in Eastern Roumelia, 559,776; in Bosnia, 780,276; in Bulgaria, 1,196,248; total, 5,020,801. *Mohammedans* in Turkey proper, 1,883,127; in Eastern Roumelia, 359,434; in Bosnia, 400,635; in Bulgaria, 760,267; total, 3,403,463. *Jews* in Turkey

proper, 55,018; in Eastern Roumelia, 3969; in Bosnia, 6968; in Bulgaria, 8959; total, 74,914. Total population of European Turkey, 8,499,178. According to these authorities, the aggregate number of Mohammedans in European and Asiatic Turkey may be estimated at from 15,700,000 to 16,500,000, that of Christians of all denominations at about 8,000,000, that of the Jews at about 200,000. The aggregate population of the African dependencies, owing to the rapid expansion of the Egyptian dominions of late years, was estimated, in 1880, at 20,500,000, nearly all of whom, with the exception of the Copts of Egypt, are Mohammedans. See MOHAMMEDANISM.

V. *The Christian Churches of Turkey.*—Although the Turks, after the conquest of the Balkan peninsula, displayed all the horrors of Oriental despotism, they did not aim at the extermination of the Christian religion. There is probably no country of Christian Europe which has not imposed, at some time in the course of its history, more severe penalties upon the profession of a dissenting Christian creed than the Turks have done upon the profession of Christianity. The Christians, in their civil relations, found themselves greatly oppressed, but the Turks did not meddle with the internal affairs of the churches. The influence which they usurped by the appointment of the high dignitaries in the Eastern churches was inspired by considerations not of power or proselytism, but of greed. The social advantages which an apostasy to Islam involved gradually induced nearly the whole population of Albania, the entire nobility of the Bosnians, and large numbers of the Bulgarians and other Christian tribes to adopt the religion of the conquerors; but the immense majority of the population of the European dominions of Turkey and large numbers in Asia continued to adhere to the several Christian churches. As the military power of Turkey began to wane, Russia, France, and other powers claimed, and received by treaty, the right of protectorate over the Turkish subjects professing the national religions of the several European countries. In 1839 the sultan, by the *hatti-sherif* of Gulhane, proclaimed the equality of Christians and Moslems before the law. The provisions of this charter of religious liberty were renewed and extended by sultan Abdul-Mejid in the charter called the *hatti-humayun*, promulgated in February, 1856. The renewal of the charter was mentioned in the treaty of Paris as the consideration on which the powers admitted Turkey to the company of European states, and guaranteed to it its rights as an independent and inviolable power. The new Turkish constitution of December, 1876, promised to the professors of all religious denominations full equality of civil rights. In the first Turkish Parliament, which met in 1877, all the religions of the empire were fairly represented. Thus among the deputies returned from Constantinople were five Turks, four Christians, and one Jew; and of the Christians, one was a Greek, one a Roman Catholic Armenian, and two Gregorian Armenians. In 1878 the treaty of Berlin (art. 62) placed the establishment of the principle of religious liberty to its fullest extent under the guarantee of all the great powers of Europe. When the Turks completed the conquest of the Balkan peninsula, they designated the aggregate of the Christian subjects as *rajah* (herds), while the different tribes were distinguished as *millet* (nation). The Mohammedan Turks were, however, so strongly inclined to confound Church and State that they viewed the several millets as so many religious communions. Mohammed II, after the capture of Constantinople, made the patriarch of that city the secular head of all the *rajah* belonging to the Orthodox Eastern or Greek Church. The civil functions of the patriarch were shared in different degrees by the subordinate bishops, and thus the entire hierarchy of the Greek Church appeared as the actual administrator of the civil interests of the people, and as such were held by the Porte responsible for the loyalty of the population. Besides the millet of the

Greeks, there are others for the Armenians, United Armenians, Latins, Protestants, and Jews. Their organization is similar to that of the Greeks. The secular jurisdiction of the Armenian patriarch includes the Jacobites. For various statistical statements of the present Christian population of Turkey, see above.

1. *The Greek Church.*—When the Turks took, in 1453, possession of Constantinople, the foremost episcopal see of the Eastern Church became subject to their rule. The patriarch of Constantinople had gradually become for the Eastern Church what the patriarch of Rome became for the West. See GREEK CHURCH. When the termination of ecclesiastical communion between the patriarchs of Rome and Constantinople became a fixed fact, all of the Orthodox Eastern churches looked upon the patriarch of Constantinople as the most eminent bishop of the Orthodox churches, although many of them, like the churches of Russia, were entirely independent of his jurisdiction. As long as there was a shadow of hope that the Eastern Roman empire would be aided by the Catholic Church of Western Europe in its resistance to the advance of the Turks, several patriarchs of Constantinople had shown a readiness to reunite with Rome. To the bulk of the clergy and the laity the idea of such a reunion was extremely distasteful, and after the conquest of Constantinople it was entirely abandoned. The sultans claimed the same rights with regard to the appointment of the patriarchs that had been possessed by the Eastern or Byzantine emperors, and the Eastern Church submitted to the demand. Georgius Scholarius, who was elected patriarch soon after the conquest of Constantinople, and assumed the name of Gennadius, accepted from sultan Mohammed II the investiture as patriarch of New Rome. The sultan showed, however, but little respect for the authority of the patriarch, and finally compelled him to resign, notwithstanding the petitions of the faithful in his behalf. The next patriarch, Joasaph, was banished by the sultan because he had refused to acknowledge the unlawful marriage of a Mohammedan minister with the daughter of an Athenian prince. Patriarch Simon, also living in the second half of the 15th century, was the first who offered to the sultan one thousand ducats for the patriarchate. This money for the confirmation of the new patriarch is called *kharatzion* or *peskesion*; it has not only been always paid since, but the amount was constantly increased, and the Turkish government generally showed a disposition to sell the patriarchate to the highest bidder, and to vacate it as often as possible. Only a few of the patriarchs were allowed to remain in office for a long term; generally, after holding it for a short term, they were either compelled to resign, or they were banished, throttled, or degraded. The habit of the patriarch to purchase the confirmation by the sultans had a most disastrous influence upon the Church. The Simonistic corruption descended from the patriarchs to the archbishops and bishops, who had to pay heavy sums for their confirmation, and, in return, tried to indemnify themselves by extorting as much money as possible from their people. For political reasons, the external form of the Church was changed as little as possible; but in consequence of the corruption prevailing in the high places, the Church fell into great decay. The lower clergy, who were generally destitute of a higher education, showed but little sympathy with the people; and when the government conferred upon them some privileges, they looked with indifference upon the heavy taxes which oppressed the laity. Little resistance was even made by the clergy to the cruel institution of the Janizaries, a military corps formed by the children of Christians, who were taken away from their parents, educated as fanatical Moslems, and used for the compulsory extension of Mohammedanism. In some of the provinces the power of the Christian people to resist the proselytism of the Turks gradually relaxed. Especially was this the case in Albania, where the Christian population decreased

from 350,000 to 50,000 during the period from 1620 to 1650. Among the apostates were even many priests and monks. The subsequent history of the Greek Church of Turkey does not offer many points of great interest. The growing power of Russia extorted from the Ottoman Porte in a number of treaties the official promise to protect the Christian religion and the Christian churches, and made itself chiefly felt in behalf of the coreligionists of Russia, the Orthodox Eastern Church. Between Constantinople and Rome an entire estrangement continued to exist. At the beginning of the 17th century the patriarch Neophytus II of Constantinople was believed to be favorable to a union with Rome; but no formal negotiations were opened, and none of the following patriarchs of Constantinople has shown any leaning in that direction. All the invitations and overtures that were made by the popes met, in Constantinople, with a firm and decided refusal: thus, in 1848, an invitation from Pius IX, addressed to the entire Eastern Church, for a corporate union with Rome, and another in 1869, addressed by the same pope to the Greek bishops to attend the Vatican Council, were promptly and firmly declined in Constantinople and throughout the Greek Church. In the Asiatic part of Turkey the patriarch Athanasius IV of Antioch, who was elected in 1686, joined the communion of Rome, and was followed by a part of the clergy and laity. Thus arose the United Greek Church of Turkey [see GREEK CHURCH, UNITED], which, from Syria, spread over all parts of the Turkish empire. In the 16th century both the Lutheran and the Calvinistic theologians endeavored to establish friendly relations with the Greek Church, and entered into correspondence with several patriarchs of Constantinople. The Lutheran attempts were never attended with any success. The Calvinists completely gained over to their side one of the most gifted patriarchs that have ever occupied the see of Constantinople, Cyril Lucar (q. v.), who went so far as to transmit to Geneva the form of a Calvinistic confession of faith; but, with the violent death of the patriarch, who was strangled, and whose memory was execrated by the Oriental patriarchs, this attempt, too, came to an end, and the Greek Church in Turkey, as well as in other countries, has kept aloof from all corporate negotiations with Protestant churches. In the 19th century the attempts made by the more congenial Anglican churches of the British isles and the United States to establish intercommunion with the various Episcopal churches of the East led to friendly correspondence between the patriarchs of the Greek Church, on the one hand, and the archbishop of Canterbury and other Anglican bishops, on the other. At the union conferences held at Bonn, Germany, in 1874 and 1875, between Oriental, Anglican, and Old-Catholic theologians, the Greek Church of Turkey was also represented by several theologians. See RUSSIA.

Until the establishment of the independence of Greece, the Turkish empire comprised nearly all the Greek churches of the world, except those of Russia and Austro-Hungary. Among the bishops of the Greek Church the patriarch of Constantinople holds the highest rank. He alone is invested by the Turkish government with the attributes of civil head of the entire Church. In regard to ecclesiastical jurisdiction, he is, however, only the head of the patriarchate of Constantinople, the other three patriarchs (of Antioch, Jerusalem, and Alexandria), as well as the metropolitan of Cyprus and the abbot of Mount Sinai, being independent of him. The three patriarchs named receive in their *berat*, or official decree of confirmation, the same rights and privileges as the patriarch of Constantinople; each of them has his own patriarchal synod, which fills the see in case of vacancy. An attempt made by the patriarch of Constantinople to appoint the patriarchs of the three other sees led, from 1843 to 1845, to a violent controversy between the patriarch of Constantinople and the Patriarchal Synod of Jerusalem, in which the latter remained

victorious. The three patriarchs communicate, nevertheless, with the Turkish government through the patriarch of Constantinople, and are not even allowed to come to the capital without his permission. The aggregate territory of these three patriarchates is, however, small, and all the remainder of the Greek churches of Turkey was until recently under the immediate jurisdiction of the patriarch of Constantinople. The establishment of the kingdom of Greece, in 1821, virtually severed the connection of the churches of the kingdom with the patriarch of Constantinople, on whom they had formerly been dependent. The entire independence of the Church of Greece was, however, not proclaimed until 1833, when a synod of the bishops of Greece met for this purpose at Nauplia, and the formal recognition of the independence by the patriarch of Constantinople did not take place until 1850. Servia and Roumania were virtually as independent of the patriarch of Constantinople in ecclesiastical affairs as they were of the sultan in politics. The establishment of their entire political independence, in 1878, entails the complete severance of their ecclesiastical connection with Constantinople. The Bulgarians, although agreeing in doctrine with the Eastern Orthodox Church, were, until 1767, independent of the jurisdiction of the patriarch of Constantinople, having a primate and patriarch of the national Bulgarian Church at Ochrida; but in 1767 the last patriarch abdicated, and, by the joint efforts of the Turkish government and the patriarch of Constantinople, the Bulgarian Church was not only placed under the spiritual jurisdiction of the Greek patriarch, but entirely denationalized. Their bishops and priests were dismissed, their sees and parishes were occupied by Greeks, their monasteries and schools were seized, and the revenues appropriated by the Greek communities; but the greatest blow of all was struck in the elimination of the Bulgarian language and literature from all the educational establishments. A strong educational movement for re-establishing the rule of the Bulgarian language in school and Church set in about 1840. It made at once rapid and steady progress in the province of education, and at length, in 1870, led to the reorganization of a national Bulgarian Church. Notwithstanding the most desperate opposition to the Bulgarian movement by the patriarch of Constantinople and the Greek Fanar, the Porte found it necessary to yield to the Bulgarians so far as to issue a firman which constituted, under the title of *The Bulgarian Exarchate*, a separate spiritual administration, comprising in its jurisdiction the towns and districts of Rustchuk, Silistria, Shumla, Timova, Sophia, Vratscha, Lovtcha, Widdin, Nish, Kustentji, Samakov, Veles (with the exception of about twenty villages and three towns), the sanjak of Slivmia (except a few villages), the district of Sisopolis, the town of Philippopolis, the district of Stanimaka (with the exception of a few villages), and the metropolitan diocese of Philippopolis (except a few monasteries). The firman further provided that the powers of the exarchate be defined by an organic code, which was to be in conformity on all points with the established laws and religious principles of the Orthodox Church; but to exclude entirely, on the other hand, all interference, direct or indirect, on the part of the patriarch, with monastic affairs, and more especially with the election of the exarch and the bishops. The exarch was to be named by imperial *berat*. He was to be bound, in conformity with ecclesiastical rules, to commemorate the name of the patriarch of Constantinople, and the synod of the exarchate was to be bound to obtain the holy oils in use in the Church from the patriarchate of Constantinople. Although the patriarch of Constantinople at first excommunicated all who availed themselves of the firman and connected themselves with the Bulgarian exarchate, the latter rallied more and more all members of the Orthodox Church who were of the Bulgarian nationality. The treaty of Berlin of 1878, which provided for the establishment

of a tributary principality of Bulgaria, and an autonomous province of Eastern Roumelia, in both of which countries the Bulgarians are the predominant race, made the bulk of the Bulgarian nation virtually independent of both the sultan and the patriarch of Constantinople, and cannot fail to complete, ere long, the organization of a national Bulgarian Church, comprising all the Orthodox Christians who speak the Bulgarian language, and enjoying an independence equal to the national churches of Russia, Greece, Roumania, and Servia. The jurisdiction of the patriarch of Constantinople is thereby restricted to those Christians of the Eastern Orthodox Church who are of the Greek nationality. See RUSSO-GREEK CHURCH.

The office of the patriarch is intended to be held by the occupant for life; but the Porte may remove him on account of high-treason, and the synod may ask the Porte for his removal on account of bad administration and of heresy. Charges of the first class are very frequent; and as it is the pecuniary interest of Turkish officials to have the patriarchs removed as often as possible, they are always found willing to co-operate in such removal. Depositions of patriarchs are therefore very frequent. The patriarch is assisted by a "Holy Synod" (*Jemaat*), which consists of from ten to twelve metropolitans, besides the patriarch, its president. The patriarch has the right to select them, with the exception, however, of the metropolitans of Heraclea, Cyzicus, Nicomedia, and Chalcedon, who are members *ex officio*, and among whom, as they are so near the capital, the patriarchal seal, which consists of four parts, is divided. As the keepers of the patriarchal seal must always be present in Constantinople, the four metropolitans occupy a peculiar position, which the Porte recognises by specially enumerating them in the *berat* of the patriarch. The patriarch has no right to send them to their dioceses. He may increase the number of the members of the synod, but is not allowed to reduce it below ten. It is customary for eight of the metropolitans who are members of the synod to be present at Constantinople. They are called "the prominent" (*ἑκπρωτοί*), and are addressed as the "holy old ones" (*ἁγιοὶ γέροντες*). In 1847, the Porte desired to add to the synod, for all questions not relating to the doctrine or discipline of the Church, three lay members—the grand logothete Aristarchi; the ex-prince of Samos, Vogorides; and a rich merchant of Chios, Psychari, generally called Messeyani; but the synod opposed the plan so strongly that it was abandoned by the Porte. According to a habit which is expressly recognised by the sultan, all the patriarchs and metropolitans of the Eastern Orthodox Church who happen to be present at Constantinople have a right to take part in the debates and resolutions of the Holy Synod. For questions of minor importance, especially such as relate to the administration of the Church, the decision of the patriarch and the four metropolitans who keep the patriarchal seal is deemed sufficient. The Holy Synod is the supreme tribunal for the clergy of the Greek Church, and serves as a court of appeal from the decisions of the bishops. Without its consent, the patriarch can give no decision in ecclesiastical or temporal affairs, and appoint no bishop. The synod alone has judicial and punitive power over the patriarch; and the deposition of the patriarch by the Porte, except in cases of high-treason, takes place only at the request of the Holy Synod. The most important right of the synod is the election of a new patriarch. The synod regulates and distributes the ecclesiastical taxes, and keeps the seals of all the monasteries. It has its own seal, consisting of four pieces, one of which is kept by the patriarch of Constantinople, and the other three by metropolitans elected by the synod. The sessions of the synod are generally held on Sundays and holidays, after divine service. Most of its decrees need for their execution a firman of the sultan. When a new patriarch is to be elected, the members of the

synod, and the archbishops and bishops present at the time in Constantinople, assemble at the synodicon, or patriarch's palace, which is situated in the Fanar, or Greek quarter, in order to nominate by ballot, in the presence of a commissary of the Turkish government, three candidates for the vacant see. All the candidates must be metropolitans. As soon as the nomination is made, it is communicated to the representatives of the Greek community, who are assembled in the vestibule of the synodicon. This assembly designates by acclamation, and the shout of *ἀξιος* (worthy), the candidate of its preference. The election, being thus completed, the minutes are signed by all present, and an official report is made to the Porte, which then orders the *berat* to be drawn up. This official *berat*, for which a large amount of money has to be paid, enumerates all the rights belonging to the patriarch and the synod. On the day after the election, the new patriarch officially visits the grand-vizier, who presents him with a magnificent suit of clothes, consisting of a *caftan* (a long silken robe), a cloak, a black capuchon, and a patriarchal hat; moreover, with a finely wrought patriarchal staff and a white horse. The patriarch pays also to the other ministers of the Porte an official visit. Soon after these visits follows the enthronization, an act of great simplicity, which is performed by the metropolitan of Heraclea. The ecclesiastical rights of the patriarch are very extensive. He appoints, with the concurrence of the synod, all metropolitans and bishops. He has supreme jurisdiction in all affairs relating to marriage and wills. Complaints against bishops can be decided by the government only with the concurrence of the patriarch. The arrest of a Greek prelate requires the consent of the patriarch and the co-operation of his officers. He has the right, without restraint, to excommunicate any member of the church; to deny ecclesiastical burial, etc. He enjoys the privilege of consecrating the holy oil, and has in all dioceses the right of the *stauropoleion*, i. e. the right, at the foundation of a church or a monastery, to erect a cross on the spot where the altar is to stand, and thereby to subject to his control such church or convent. The civil jurisdiction which the patriarch enjoys as the head of the "Greek nation" (which means, in the official language, all the members of the Eastern Church), is in some respects even more comprehensive because it extends also over the other patriarchal dioceses. This power, however, is on the wane. As has already been indicated, the non-Greek nationalities have either achieved their entire independence of Turkish rule, or, like the Bulgarians, have severed their ecclesiastical connection with the patriarch of Constantinople, whose jurisdiction, ecclesiastical as well as civil, will be restricted to the Church members of the Greek nationality. The patriarch has his own court, before which especially cases of minor importance are brought, not only between Greeks and Greeks, but also between Greeks and people of other churches, even between Greeks and Turks. An appeal can, however, be had from the patriarch's court to the Turkish courts. The revenue of the patriarch is considerable. He inherits the property of metropolitans, bishops, priests, monks, and nuns who die without legal heirs. If there are legal heirs, the persons named may bequeath to the patriarch up to one third of their property. Other sources of revenue are the fees for ordination, the tax on the installation of metropolitans and bishops, the annual contributions from the bishops and from the convents which are immediately subject to the patriarch, smaller contributions from each priest and each layman of his diocese, the fees of his chancery, fees for every marriage and burial, etc. The patriarch has the right to have all these dues collected by special commissaries, who, if necessary, can invoke the aid of the government officials. The patriarch is exempt from ordinary taxes, but has to pay a large sum annually to the government as a special tax, and to make frequent presents to the ministers. The patriarch is assisted in

the administration of the patriarchate by a number of officers. They are divided into two choirs—one at the right, and the other at the left. The former consists of three sections, each of which embraces five persons, and is therefore called a *πέντας*. All these offices were formerly of great importance, and, with the exception of those which required an ordination or had the superintendence of convents, were in the hands of the noble Greek families, the so-called Phanariotes. The occupants had a vote at the election and deposition of the patriarch. At present, most of these offices are mere titles. The only officer who has still an important political position and considerable influence is the grand logothete (*μέγας λογοθέτης*), or the grand keeper of the seal. He is elected by the patriarch and Holy Synod from among the Greek notables for lifetime. He is confirmed by the Porte, and can only be removed by the concurrent action of both powers. The patriarchate conducts through him all negotiations with the Porte relating to its secular privileges; and all the official communications from the patriarch to the Porte pass through his hands. He has the right to countersign all synodal resolutions relating to the appointment of metropolitans and bishops, and to receive certain fees for drawing up the official documents. See PATRIARCHS.

The three patriarchs of Alexandria, Antioch, and Jerusalem are not subject to the ecclesiastical jurisdiction of the patriarch of Constantinople, but are co-ordinate to him. The *berat* by which they are appointed confers upon them the same rights, and each of them has a synod which has the same rights as the Synod of Constantinople. They are inferior to the patriarch of Constantinople only in so far as they have no civil jurisdiction. The patriarch of Alexandria has jurisdiction over the Greek churches of Egypt, Libya, Arabia, and Nubia; the patriarch of Antioch, who resides at Damascus, over those of Syria, Cilicia, Mesopotamia, Isauria, and other Asiatic provinces; the patriarch of Jerusalem, who resides at Galata, a suburb of Constantinople, over those of Palestine. The aggregate territory of the three patriarchates is, however, but small compared with that of Constantinople. Metropolitans with suffragan bishops are rare in the Turkish empire. The name metropolitan or archbishop is generally only a title which confers a higher dignity than the title bishop, but not a greater jurisdiction. The title of metropolitan is especially given to the bishops of the provincial capitals. As bishops must be unmarried, they are generally taken from the monasteries. If a layman is to be ordained a bishop, he has first to take all orders up to priesthood, and then can receive the episcopal ordination only after the expiration of thirty days. The candidate must be thirty years of age, and at his ordination three bishops must be present. Bishops are bound to reside in their dioceses; and if a bishop is absent from his diocese for more than six months, except it be by order of the patriarch, he is deposed. The bishop has entire control of the Church property of the diocese, and can impose taxes upon his diocesans. Without his permission, no convent can be built within the diocese. The revenue of metropolitans and bishops is derived from the same sources as that of the patriarch. They receive annual contributions from the priests and the laity of the diocese, besides fees and inheritances. The income of many bishops is considerable. The metropolitans and bishops have also an influential position in the political administration of the empire, as they are, in virtue of their office, members of the administrative councils, by which the *valis* of the vilayets are assisted. In 1836, patriarch Gregory VI and the Holy Synod issued a circular in which all bishops were requested to establish in their dioceses an ecclesiastical committee, after the model of the one existing in Constantinople, for consulting on the spiritual interests of the dioceses. All the diocesan committees send reports to Constantinople, and thence receive advice. The committees consist of not less than three members, who are se-

lected from among the educated, virtuous, and zealous clergy. One member of the committee has to examine the candidates for ordination, and to instruct and guide the confessors. A second member has to superintend the printing and the sale of books, the ecclesiastical discipline, and the lives of the clergy. No book can be printed without his permission. The third member superintends education and preaching. The secular clergy are mostly uneducated and poor, and, to support themselves and their families, they often carry on some trade, cultivate a farm, and perform other manual labor. The parochial churches are maintained by the congregations, and on every Sunday and holiday collections are taken up for the purpose. The *kaja bachi*, or chief of the congregation, administers the financial affairs, and has, in particular, to take care of the support of the priests, the churches, and the schools. No one can be admitted to a male or female convent without an examination, or before being ten years of age. Besides the monks and nuns who live in convents, there are eremites on Mount Athos, and anchorites in Macedonia. See MONKS, EASTERN.

The number of metropolitans and bishops who were subject to the patriarch of Constantinople before the churches of Roumania, Servia, and Bulgaria had severed their connection with him amounted, according to Silbernagl (*Verfassung sämmtlicher Kirchen des Orients* [1865]), to 181, of whom 92 belonged to Europe, 21 to Asia, and 18 to the provinces. In consequence of the decay of the Turkish empire, a very large number of the dioceses are now no longer subject to the jurisdiction of the patriarch, which, ere long, may be restricted to the dioceses in which the people are of the Greek nationality. Under the patriarch of Antioch were 12 dioceses, and to this patriarchate also belongs the archbishop of Cyprus, who is exempt, and has under his jurisdiction 5 suffragan bishops. Under the jurisdiction of the patriarch of Jerusalem are 14 archbishops and bishops, under that of Alexandria 4. The population of the patriarchate of Alexandria is reported as only 5000 souls; that of Jerusalem as 15,000; while the patriarchate of Antioch comprises 29,000 families. The total population connected with the Greek or Orthodox Eastern Church of Turkey, after the great territorial changes made in 1878, was estimated at 8,800,000 (see *Appletons' Annual Cyclopædia*, 1878, art. "Greek Church"); but of this number a considerable part belongs to the Bulgarian dioceses of Eastern Roumelia, which have no longer any ecclesiastical communion with the patriarch of Constantinople. Of the convents of the Church, which are still numerous, the most celebrated are those on Mount Athos (q. v.). Of late, education has begun to make great progress among the population connected with the Greek Church. Two theological seminaries have been established, the one on the island of Chalki, near Constantinople, and the other at Jerusalem; and no one is henceforth to be appointed as bishop who has not been educated at one of these institutions, or is not fully up to the standard of the education there imparted. A flourishing teachers' seminary, according to the German model, has been established at Salonica, in Macedonia. See EASTERN CHURCH.

2. *The Armenian Church.*—For more than three hundred years nearly two thirds of ancient Armenia has been under the rule of Turkey [see ARMENIA]; and, therefore, although the head of the Church (the catholicos of Echmiadzin) is now a subject of Russia (q. v.), the large majority of the adherents of the Armenian Church are still to be found in Turkey. Among the Armenian bishops of Turkey, the patriarch of Constantinople occupies the highest rank: he is inferior only to the catholicos of Echmiadzin. An Armenian diocese was established at Constantinople as early as 1307. Archbishop Joachim, of Bursa, was raised to the rank of patriarch of Constantinople in 1461 by the sultan Mohammed II, and he was at the same time appointed the civil head of the Armenian nation. The

patriarch is elected by the notables and the prominent clergymen of the Armenian community of Constantinople, and is confirmed by the Porte. Formerly the Armenian bankers had the ascendancy in this assembly; but in 1839 several Armenian employes of the Turkish government obtained the leading influence. The patriarch is entirely dependent upon these laymen, who appoint a coadjutor, or have him removed by the Turkish government, whenever they please. The new patriarch has to make a profession of faith, which consists of nine articles, the eighth of which designates the patriarch as the vicar of Christ. The *berat* which the patriarch receives from the Porte confers upon him a direct power over the priests and laity of his diocese. Like the catholicos, he has the right to ordain bishops and to consecrate the holy oil. With the exception of the patriarch of Jerusalem, he can appoint metropolitans and bishops throughout Turkish Armenia; remove, exile, and recall them; divide or unite their dioceses. The entire property of the Church is under his control; in the administration of it he is, however, limited by the lay synod, which consists of twenty members elected by the people and confirmed by the Porte. Moreover, he is assisted in the exercise of his ecclesiastical functions by a clerical synod consisting of his officials. As he has also civil jurisdiction, he has, like the Greek patriarch, his own court and a patriarchal prison. He is the civil head not only of the Armenian nation, but also of the Syrian Jacobites. All communications between the Turkish government and the Armenians pass through his hands; and even the Armenian patriarch of Sis and the bishops not directly subject to his jurisdiction receive their *berat* through him. Like the Greek patriarch, he enjoys a number of honorary rights and exemption from taxation, but, in return, has to pay an annual tribute to the Porte. His revenue consists chiefly of taxes of installation and annual contributions from bishops; fees for ordination, for the holy oil, for marriages; inheritances and donations. Besides the patriarch of Constantinople, the Armenian Church of Turkey has patriarchs at Sis, in the vilayet of Adana, at Jerusalem, and at Aghtamar, on the island of Van.

The first patriarch of Sis was elected in 1440, when the clergy of Sis, after the death of the catholicos Joseph III, feared lest the residence of the patriarch, which had been at Sis since 1294, might be removed to Echmiadzin. Without waiting for a general assembly of the Armenian bishops, the clergy of Sis hurriedly proceeded, conjointly with the people of Sis, to the election of a catholicos. The bishops and *vartabeds* met, however, in 1441, at Echmiadzin, and elected as catholicos the monk Kyriakos, who was almost generally recognised by the Armenian churches. In order to prevent a permanent schism, the privilege was conferred upon Sis to be governed by a patriarch, on condition, however, that he receive the holy oil from the catholicos as a sign of his submission. The condition was accepted, and from that time Sis has had its own patriarchs. According to a concordat concluded between the catholicos of Echmiadzin and the patriarch of Sis, the jurisdiction of the latter was to extend over the Armenian churches of Cilicia, Syria, Egypt, and Palestine; but, as the bishop of Jerusalem made himself independent in the middle of the 17th century, his jurisdiction has since been limited to the Armenian churches of Armenia Minor, Cappadocia, and Cilicia. The patriarch of Sis has the title "Patriarch and Primate of Armenia Minor and the Armenians who are in Cilicia, Syria, and Palestine, Minister of the Right and of the Throne of St. Gregory the Illuminator."

The patriarchate of Jerusalem has been in existence since the middle of the 17th century, when the catholicos Philippos conferred upon the archbishop of Jerusalem the right of consecrating, himself, the holy oil; and the archbishop consequently assumed the title of patriarch, and began to ordain bishops. The patriarch of Jerusalem, however, ceased long ago to exercise

these functions; and his powers have been greatly curtailed, as the patriarch of Constantinople calls him to account when he pleases. In order to guard as much as possible his own independence, the patriarch procures from the Turkish government his own *berat*, and supports in Constantinople an agent of his own. He has to pay an annual tribute, not only to the Porte, but to the pasha of Damascus. He is elected by his suffragan bishops, and has his residence in the monastery of St. James at Jerusalem. His income is derived from the same sources as that of the patriarch of Constantinople, the presents from the pilgrims to Jerusalem constituting an element of special importance.

In 1114 bishop David of Tornik made himself patriarch of Aghtamar, in Lake Van, and assumed the title catholicos. The schism has continued to the present day; but the patriarchate is of little importance, since its jurisdiction extends hardly any farther than Lake Van. The patriarch is elected by the bishops and clergy under his jurisdiction, and is supported by the revenue of the monastery on the island of Aghtamar.

The metropolitans, or archbishops, are not distinguished from the bishops by any greater jurisdiction, but only by some honorary rights. The catholicos can only be elected out of their number. The bishops are regularly elected from the unmarried *vartabeds*, and only occasionally, and by special permission of the catholicos or the patriarchs, from the monks, since, according to the Church law, a monk is not to become a bishop. The bishop is generally elected by the clergy and the heads of families, and after the election he is presented for confirmation to the catholicos or the patriarchs, who appoint several (generally three) bishops for examining the candidate. It is required that he be fifty years of age, of legitimate descent for three generations, on both father's and mother's side, and well versed in the Holy Scriptures and the canonical law. Many of the metropolitans and bishops have no dioceses, but live in convents, and there hold the office of archimandrite. Many of them are at the same time *vartabeds*. The patriarch of Constantinople, according to the regulations made by the provincial council on Nov. 20, 1830, has under his jurisdiction 18 archbishops, or metropolitans, and 35 bishops. The patriarchate of Sis embraces three towns and forty villages. Towards the close of the 16th century the patriarch of Sis still had 23 archbishops and bishops under his jurisdiction. The diocese of the patriarch of Jerusalem embraces the churches of Palestine, Syria, Akra, and Tripolis. His residence, in the monastery of Mar Yakub on Mount Zion, was built in the 11th century, belonged to the Armenians as early as 1238, and has been in their undisputed possession since 1666. Besides the patriarch, 5 bishops and more than 100 priests live in the monastery. The total number of suffragan bishops is reported to be 14. The diocese of the patriarch of Aghtamar comprises two towns and thirty villages. In the second half of the 17th century he had under his jurisdiction from 8 to 9 bishops residing in the monasteries on the shore of Lake Van. The population connected with the Armenian Church is estimated at about 2,400,000, of whom about 400,000 are in the European dominions of Turkey. See ARMENIAN CHURCH.

3. *Other Oriental Churches.*—Besides the Greeks and Armenians, Turkey has two other Oriental churches—the so-called *Nestorians* and *Jacobites*. Both have been fully treated in former volumes of this *Cyclopædia*. See JACOBITES; NESTORIANS.

4. *The Roman Catholic Church in Turkey.*—There are only a few tribes and congregations in the present dominions of the Turkish empire which have always been in connection with the Church of Rome. They are chiefly to be found in Albania. The foundation of other congregations dates from the time of the crusades, which established the Latin Church on a permanent basis in Syria, Palestine, and Cyprus. The rule of the Venetians in the Mediterranean Sea, and the commer-

cial intercourse between the Balkan peninsula and the Catholic nations of Western Europe increased the number of Latin congregations in all the large cities of the empire. Finally, the unceasing efforts of the numerous missionaries which the Church of Rome has supported in all parts of the empire have won over fractions of all the various Oriental Christian denominations in which the empire abounds. These fractions have been allowed by the pope to retain a number of national and ecclesiastical peculiarities; and, while they have adopted the doctrines of the Roman Catholic Church, recognise the pope as the head of the Church Universal, and must be recognised themselves, in the fullest sense of the word, as part of the Roman Catholic Church, they appear, especially in consequence of the retention at divine service of a rite different from the Latin, as a kind of semi-independent division of the Church. A correct view of the actual strength of the Roman Catholic Church in the Turkish empire is best obtained by reviewing the several rites separately.

The Latin *millet* embraces the Roman Catholics of all rites, except the United Armenians, who have their own civil head. The head of the Latin *millet* is a layman, who has the title *Vekil* (representative). He is assisted by four deputies of the Latin population, with whom he constitutes a permanent council called the Latin Chancery. The functions of this council are similar to those of the Greek patriarch.

(1.) *The Latin Rite.*—A Latin patriarchate was established at Constantinople in 1203, in consequence of the crusades. The occupant received a rank next to the pope. When Constantinople, in 1453, became the residence of the sultan, the Latin patriarchs transferred the seat of the patriarchate to Venice, and sent to Constantinople as their representative a vicar, who for a long time was only a monk. When the Catholics, in consequence of their increasing number, applied for a bishop, the Propaganda prevailed upon the patriarch to appoint an assistant bishop for Constantinople, and to pay him a regular salary. This bishop sometimes called himself patriarchal vicar, sometimes suffragan of the patriarch. After some time, the Propaganda found it necessary to appoint, in its turn, an apostolical patriarchal vicar. When, after the middle of the 17th century, the patriarch took up his residence at Rome, and the patriarchate of Constantinople became a mere title in *partibus infidelium*, which was conferred upon a prelate residing in Rome, the apostolical vicar was invested with full jurisdiction over all Catholics of the Latin rite. The population of his diocese, which extends over Thrace and the opposite coast of Asia Minor, is estimated at about 15,000. The larger portions of the vicariate apostolic (formerly archbishopric) of Sophia, which had before the late war a Latin population of about 8000, and of the diocese of Nicopolis, which had a population of about 3000, are no longer under Turkish rule. Both the towns of Sophia and Nicopolis lie within the new principality of Bulgaria. A considerable portion of the archbishopric of Scopia, or Uskub, in Macedonia (now the western part of Roumelia) has been annexed to Servia. The whole diocese numbered before the war about 8000 Catholics of the Latin rite. Before the enlargement of the principality in 1878, the entire Roman Catholic population, numbering about 4000 persons, was included in the diocese of Belgrade and Semendria [see SERBIA], which belonged as a suffragan see to the ecclesiastical province of Antivari. The two vicariates apostolic of Moldavia and Wallachia, numbering in 1878 an aggregate Roman Catholic population of 114,000, now belong to the independent state of Roumania. The two vicariates of Bosnia and Herzegovina, which embrace the entire Roman Catholic population in the two provinces after which they have been called, were in 1878, by the treaty of Berlin, placed under Austrian administration. The Catholic population in these vicariates is numerous, especially in the northern and north-western districts of Bosnia, which before the conquest of the coun-

try by the Turks belonged to Hungary. The bishop of Bosnia fled, in consequence of the Turkish conquest, to Hungary, and established his residence at Deacovar. The occupant of this see still has the title bishop of Bosnia and Sirmium; but, as the Turks did not allow the jurisdiction of a foreign prelate, a vicar apostolic was appointed for the Catholics of the Turkish provinces. The Catholic population is estimated at about 140,000, that of Herzegovina at 42,000. In the European provinces remaining under Turkish rule the Roman Catholic Church has its greatest stronghold in Albania. There are two ecclesiastical provinces in Albania, Antivari-Scutari and Durazzo. The latter has no longer any suffragan see, and consists only of the archdiocese of Durazzo. The archdiocese of Antivari and the diocese of Scutari were united in 1867, at which time they had an aggregate Roman Catholic population of about 33,000. The suffragan sees of Antivari and Durazzo are Sappa, Pulati, and Alessio, all in Albania, with an aggregate population of about 42,000. The diocese of Belgrade, in Servia, which has already been referred to, also belongs to this ecclesiastical province. The island of Scio, which belongs to Asiatic Turkey, has still an episcopal see, although the number of Roman Catholics is less than one thousand. It is a suffragan see of the archdiocese of Naxos, which belongs to the kingdom of Greece. In the Middle Ages, while this island was under the rule of the Venetians, it was very flourishing, and the Roman Catholic population was numerous; but during the Greek war of independence nearly the entire Christian population was exterminated or sold into slavery. The population of Cyprus, which in 1878 was placed under English administration, has rapidly increased during the last twenty years, and the Roman Catholic Church there numbers about 10,000 Catholics of the Latin and Greek rites, and 3000 Maronites. The flourishing city of Smyrna, in Asia Minor, has an archdiocese with about 15,000, nearly all of whom live in the capital. The archbishopric in this city was restored in 1818, and has now as a suffragan see the diocese of Candia, which, after being long conferred as a title in *partibus infidelium*, was restored in 1874. Besides these dioceses, the Church of Rome has an archbishop of Babylon, who resides at Bagdad. For the Roman Catholics of Jerusalem, who were formerly under the jurisdiction of Franciscan monks, an archbishopric was established in 1847, the occupant of which received the title of patriarch. The number of Roman Catholics in Palestine is estimated at about 15,000. Two "apostolic delegations" have been established, one called "Asiatic Turkey," and embracing Mesopotamia, Kurdistan, and Armenia Minor, and the other Syria; and two apostolical vicariates, Aleppo and Asia Minor. The number of Roman Catholics in all these dioceses and ecclesiastical districts is small, but the bishops and the comparatively numerous orders display a considerable activity among the Christians of the Oriental rites. Several Catholic congregations have been collected in the commercial towns of the Arabian coast. They are administered by the apostolical vicar of Aden. The number of Catholics in the African dependencies of Turkey is small, but is increasing by immigration from Catholic countries of Europe, especially France and Italy. The French population residing in Egypt in 1877 amounted to 17,000, the Italian to 13,900, the Austrian to 6300; the large majority of all these are Catholics. The patriarchate of Alexandria, like that of Antioch in Asia, is now a mere title conferred upon an Italian prelate who resides in Rome. For the 25,000 Catholics of Tunis there is a vicar apostolic, and for the 5000 of Tripoli a præfect apostolic.

(2.) *The Armenian Rite.*—The Church of Rome began to gain a firm footing among the Armenians at the time of the crusades. See ARMENIAN CHURCH. Although the bulk of the nation always continued averse to a union with Rome, considerable numbers accepted the union, and, retaining the rites of the national Church,

were organized into a United Armenian Church. The Mechitarists (q. v.) have gained for this ecclesiastical community a greater literary distinction than can be claimed by any other Oriental communion. In regard to their political rights, the United Armenians were subject to the jurisdiction of the patriarch of the National Armenian Church until pope Pius VIII, in 1830, succeeded, with the aid of France and Austria, in making them independent. He erected at Constantinople the see of an archbishop-primate for the Catholic Armenians, who was to be immediately subject to the holy see. At the appointment of the first primate the pope appears to have taken into consideration the national wishes, and to have conceded to them the right to propose three candidates for the vacant see, from whom the pope chose one. In 1845 the pope appointed Anthony Hassun as successor of the primate, without consulting the nation. By a brief of April 30, 1850, pope Pius IX erected the towns of Ancyra, Artvin, Brousa, Erzurum, Isphahan, and Trebizond into episcopal sees of the United Armenians, and made them suffragans of the Armenian archbishop of Constantinople. The same brief appointed the bishops of these sees without consulting the nation. The United Armenian nation gave its consent to the establishment of the sees, but refused to recognise the bishops, because they had not previously been consulted. After some time, they yielded this point also, in order to prevent a schism; and the Turkish government, through the mediation of France, gave to the new bishops the necessary *berat*. When the pope established the see of an archbishop-primate at Constantinople, it was intended to confer upon him also the secular jurisdiction over the Catholic Armenians; but the Porte did not recognise the primate, and clothed, by a *berat* of 1831, a priest of the Order of Mechitarists with the *præfectura nationalis*. At the request of the French ambassador, after some time, a patriarch was appointed, but without any ecclesiastical functions, and having only those secular rights which are connected with the offices of the Greek and the Gregorian-Armenian patriarchs. The patriarch was to be elected by the United Armenian community, and to be confirmed by the Porte. He was to be assisted by a council of administration consisting of twelve members, who were likewise to be elected by the nation and to be confirmed by the Porte. The *berat* given to the patriarch extended his jurisdiction over all the United Eastern churches; but, in consequence of the religious controversies and inner dissensions which arose, the patriarch lost the right to represent the other Catholic nationalities at the Porte, and this right passed over to the *vekil* of the Latins. In 1866 Hassun, the archbishop-primate of Constantinople, was elected also patriarch of Cilicia, and assumed as such the name Anthony Peter IX. Thus for the first time the highest ecclesiastical dignity of the United Armenians, the patriarchate of Cilicia, was united in one person with the civil headship of the United Armenian nation which was attached to the office of the primate of Constantinople. Simultaneously with confirming the new patriarch, pope Pius IX, in July, 1867, issued the bull *Reversurus*, which abolished the rights that hitherto the United Armenians had enjoyed with regard to the election of their patriarch and their bishops, and reserved for the pope rights hitherto not exercised by him. The opposition which at once manifested itself against this bull led in 1870 to an open schism. The opponents secured the assistance of the Turkish government; Hassun was exiled from Constantinople and from Turkey, and Kupelian chosen in his stead patriarch of the United Armenians. Besides, a number of bishops sympathizing with Kupelian were appointed for United Armenian dioceses. Notwithstanding repeated excommunications by Rome, the party headed by Kupelian remained in opposition to the pope, and assumed a position similar to that of the Old Catholics in Western Europe. The Kupelians continued for many years to enjoy the patronage and active support of the

Turkish government, but never succeeded in bringing over to their side the majority of the United Armenian laity. In 1876 a general amnesty, granted by the new sultan, Murad, on his accession to the throne, permitted Hassun to return to Constantinople. The schism continued, however, until 1879, when the efforts made by the papal delegates and the ambassador of France secured the submission of Kupelian and the other bishops of the opposition, and the entire end of the schism.

(3.) *Other United Oriental Rites.*—The Roman Catholic Church has also gained over the entire tribe of the Maronites, as well as portions of the Nestorians and the Jacobites in Asia, and of the Copts in Egypt. The United Nestorians are generally called Chaldeans, while the United Jacobites are designated United Syrians. These United Orientals have already been referred to in the articles MARONITES; CHALDEANS; COPTS; JACOBITES. The aggregate number of these religious denominations is not large. The number of Chaldeans (inclusive of the congregations in Persia) is estimated at from 20,000 to 30,000, that of the Syrians at from 9000 to 30,000, that of the Copts at 10,000. From 1870 to 1879 almost the entire community of the Chaldeans, including their patriarch, Andu, and all their bishops, was in a state of open rebellion against Rome. The patriarch desired to extend his jurisdiction over the Christians of St. Thomas in British India, who, like the Chaldeans, are United Nestorians, and number about 100,000. Rome objected to this, desiring the Christians of St. Thomas to remain as heretofore under the jurisdiction of the vicar apostolic of Verapoli, who is of the Latin rite. The Chaldeans, moreover, protested against a Roman bull, issued in 1869, which forbade the patriarch to ordain bishops without the previous approbation of the pope. The Chaldeans had possessed and exercised this right from the time when they joined the communion of Rome, and they denied the right of the pope to abolish it without their consent. The patriarch and the bishops long resisted all the efforts made by Rome. One of their bishops visited India and prevailed upon a large portion of the Christians of St. Thomas to place themselves under his jurisdiction, and withdraw from that of the Latin vicar apostolic of Verapoli. At length, however, they relented in their resistance; and, after the death of patriarch Andu, the pope succeeded, in 1879, in securing the submission of the Chaldeans, and in the election of a new patriarch who declared himself willing to concede all the demands made by Rome. See THOMAS (ST.), CHRISTIANS OF.

(4.) *Protestantism.*—The most important Protestant churches in the Turkish empire are under the care of American missionary societies. The Rev. Pliny Fisk and the Rev. Levi Parsons were appointed by the American Board in 1818 missionaries to Palestine, and arrived at Smyrna in 1820. In the next year Mr. Parsons went to Jerusalem. A printing-press, designed to print books for Turkey, was set up at Malta by the Rev. Daniel Temple in 1823, and was removed in 1833 to Smyrna. The Rev. Messrs. William Goodell and Isaac Bird were stationed at Beirut, where they began the Syrian mission in 1823, and opened schools the next year. In the same year the circulation of the Scriptures was forbidden by the government. The station at Jerusalem was suspended for nine years after the death of Mr. Fisk, in 1825, and the mission in Syria was suspended for a short time in 1828. It was soon resumed; the Rev. William Goodell was appointed to Constantinople, and a deputation was sent to visit the Armenian populations of the empire. Mr. Goodell visited the Armenian patriarch and ecclesiastics at Constantinople in 1831, and was at first welcomed by them. Schools were opened near Constantinople, and in 1834 stations were established at Trebizond and Brousa. The Greek and Armenian ecclesiastics became jealous of the progress of the missions, and a strong opposition was instigated against them; but in 1839 the new sultan made the first of a series of concessions of religious liberty. In 1841 the

Rev. Cyrus Hamlin opened a school at Bebek, near Constantinople, which was the beginning of what is now Robert College.

Churches were formally organized at Constantinople, Adabazar, and Trebizond in 1846. In the next year the Protestants were recognised by the government as an independent community, and in 1850 they were accorded a charter, placing them on the same basis as the other Christian communities of the empire. In 1856 the sultan granted, and in 1860 formally proclaimed, the *hatti-humayun* by which religious liberty and equal rights were conferred upon all classes. The missions in Syria were transferred to the Board of Foreign Missions of the Presbyterian Church in the United States of America in 1870. The churches of the American Board are distributed through a territory extending from Mosul, on the Tigris, to Monastir, in Macedonia. They are arranged into four missions, which are known as the Eastern Turkey (Armenia), Central Turkey (embracing the country south of the Black Sea), Western Turkey (Asia Minor), and European Turkey (Constantinople, Eastern Roumelia, Bulgaria, and Macedonia) missions, and include 90 churches with 7300 members. The Presbyterian Church has 12 churches in Syria, with 716 communicants. The Synod of the Reformed Presbyterian Church of North America has a mission at Latakia, with 94 members; the Free Church of Scotland has two missionaries, with 26 members; an independent Baptist missionary reports 11 members, and the Friends have 14 members, all in Syria. The Rev. Samuel Gobat, an agent of the Church Missionary Society, went to Palestine in 1841, and was afterwards appointed bishop of Jerusalem. He founded schools, which passed in 1877 under the control of the Church Missionary Society. This society returns 12 native Protestant congregations in Palestine, having 1108 members. Other societies engaged in Palestine are the London Jewish Mission, the Jewish Mission of Berlin, the Crischna Mission, and the Kaiserswerth Deaconesses' Association.

The Methodist Episcopal Church has a mission in Bulgaria, begun in 1857, which included, in 1878, 5 stations, 38 members, and 13 probationers. The Disciples of Christ appointed a missionary to Constantinople in 1878. The mission of the United Presbyterian Church of North America in Egypt, after twenty-five years of development, has 9 churches and 947 communicants. The Protestant churches have in all in the empire about 385 preaching-places, more than 100 ordained missionaries with as many churches, and about 10,000 communicants. Besides these, the Jewish mission societies of London, the Established and Free Churches of Scotland, and the Irish Presbyterian Church have stations and schools at Alexandria, Smyrna, Beirût, Constantinople, Salonica, Adrianople, and Rustchuk.

The Protestant religious work is supplemented by efficient schools of every grade. The American Board has 300 common-schools, 16 boarding-schools for girls, and 12 seminaries and training-schools, with a total attendance of more than 11,000 pupils; the Presbyterian Mission in Syria has 84 common-schools, 3 high-schools, and 2 female seminaries, with a total of 4097 pupils, a college, and a theological seminary; the Reformed Presbyterian Mission has 476 day-school scholars; the Society of the British Syrian Schools and Bible Mission, 30 schools and 3000 scholars; and in Syria proper, not including Palestine or Asia Minor, there are 11,000 children in evangelical schools, of whom about one half are girls. In Palestine, there are under the control of the Church missionary and other societies some 36 or 37 Protestant schools, which are attended by Mohammedan, Jewish, Druse, and Samaritan pupils. The United Presbyterians in Egypt have 39 schools, with 1893 pupils, and 6 theological students in the training-schools. The English Church schools at Cairo and Damietta have 590 pupils. Of the Jewish mission schools, those of the Church of Scotland return 1702 Jewish and other

than British pupils. At the Syrian Protestant College of the Presbyterian Mission at Beirût instruction is given in the English language, while the Arabic is taught as a classic. The college has a faculty of 8 professors, 120 students, and a medical department which had 23 students in 1877, and which has sent out several graduates, who are practicing as physicians in different parts of the empire. Robert College, near Constantinople, is not immediately connected with any Church organization, but is under Protestant direction, with a board of trustees composed of citizens of the United States. It has a faculty of 15 instructors, including American, European, Armenian, Bulgarian, Greek, and Turkish professors, and registered, in 1878-79, 151 students, among whom fifteen nationalities and all the religions prevailing in the empire were represented. Instruction is given in the usual collegiate studies, and in fifteen ancient and modern languages. The college has a library of 6000 volumes. Central Turkey College, at Aintab, is also an independent Protestant institution, in which instruction is given in the branches of science and literature, the English, Turkish, and Armenian languages.

The American Board has a press at Constantinople, and the Presbyterians have one at Beirût, at both of which religious, educational, and scientific books are published in the languages of the people. The Arabic Bible published at Beirût is circulated in all Mohammedan countries. Other editions of the Bible are published in all the languages spoken in the empire. The whole number of copies of books, tracts, etc., printed at the press of the American Board from the beginning of its operations to 1879 is 2,248,354, comprising a total of 325,503,988 pages, in the Armenian, Armeno-Turkish, Greco-Turkish, and Bulgarian languages; and the whole number of pages printed on the Presbyterian press from the beginning to 1879 is 183,705,027.

The organization of Protestant churches has been generally confined to other than Mussulman populations—chiefly to Greeks, Bulgarians, and Armenians. It was until recently a capital offence, by the Turkish law, for a Moslem to become a Christian. More attention is now given to the evangelization of the Turkish population; but the number of Protestant Turks is still very insignificant. The Protestants have acquired a good reputation in the communities among whom they live, and have gained their esteem and confidence to a degree that is rarely accorded to persons professing a strange religion. See SYRIA, MISSIONS IN.

VI. *Other Religious Denominations.*—The most important of the other religious denominations of the Turkish empire are the Jews. Their old native land, Palestine, is now a part of Turkey in Asia, but the overwhelming majority of its population consists at present of Mohammedans, the total number of Jews in all Asiatic Turkey being estimated at only 50,000. It is believed that their first appearance in European Turkey may have been connected with the conquests of Alexander the Great, who planted many colonies of Jews about his empire. Philo mentions Jews in Thessaly, Bœotia, Macedonia, etc. Luke speaks of them at Thessalonica and Berea. The Jews have probably been settled in Macedonia from the first emigration to the present time. In consequence of their expulsion from Spain, a large number of Spanish Jews settled in Thessalonica. Paul Lucas says that in his day there were 30,000 in that city, with twenty-two synagogues. The descendants of these Spanish Jews spread throughout the empire; they continue to speak among themselves the Spanish language, but their written correspondence is carried on in Hebrew. The great mass of the Jews in Turkey are Talmudists, but there exists a small section of *Karaïtes* (q. v.). The latter have about a hundred families at Has-Keui, near Constantinople; there are also many in Galicia and the Crimea; but the great bulk of the Jews of this persuasion are, outside of the Turkish empire, in Galicia and the Crimea. "There is

also a curious sect of Jews at Salonica called *Mamim*, which signifies 'turncoat.' They believe in the fourteenth false Messiah, Sabati Levi, who, to save his life, became with his followers Mohammedans; but these, again, have their religious differences, and are divided into three sects. They are still Jews at heart, but their trifling with two creeds makes them despised and looked down upon. They marry among themselves only, and live together in a particular quarter of the town. There are others of the same sect in parts of Russia. At Salonica they are Mohammedans in public and Jews in private life. The Jews have no hierarchy, but each congregation is independent, and is governed by its own chief rabbi; but they have a representative head at Constantinople, called the *khakham-bashi*, who is chief of the Israelitish nation in the empire. The *khakham-bashi* at Constantinople has a court or council to assist him in administering both ecclesiastical and civil law. It is divided into two parts—first, the *Mejliss-i-rouhani*, or spiritual council, composed of six grand rabbins, which, as its name implies, deals with questions relating to the Jewish religion; and, second, the *Mejliss-i-jesmani*, or civil council, which deals with questions of civil law, and assists the Turkish courts in any questions relating to Jews. The same organization applies to each grand rabbi, who, in his turn, is assisted by two similar councils. As the Jewish law, like that of the Mohammedan, is explained by the teaching of the sacred books, the establishment of these councils forms a ready means of arriving at a judgment on all religious and civil cases arising in the Jewish community. The *khakham-bashi* takes rank immediately after the Greek and Armenian patriarchs. The Jewish population of the Turkish empire is estimated at 158,000. The poorer are entirely dependent upon the liberality of the upper classes for education and relief in case of want, and the obligation is met in a most commendable spirit. They possess an institution called the 'Universal Israelitish Alliance,' which is charged with the administration of education, etc. In 1875 the alliance had twenty-one schools throughout the empire, which gave instruction to 2094 children of both sexes, and of this number 809 were admitted gratuitously. The teachers of these schools are educated in the Rabbinical Seminary at Paris, and they give their pupils instruction in foreign languages and all the elements of a first-class education. The elementary schools, or *talmudoras*, are crowded with children of both sexes, who are simply taught to read and write" (Baker). The estimates of the Jewish population in the Turkish empire vary greatly. It has already been mentioned that Baker, in his work on Turkey, gives the total number as 158,000, and that in the Asiatic possessions they are supposed not to exceed 50,000. The Servian statistician Jakshitch estimates the Jews in the immediate European possessions at only 55,000, distributed as follows among the several vilayets: Constantinople, 22,943; Adrianople, 13,492; Salonica, 7409; Monastir, 2566; Kossovo, 1323; Yanina, 4085; Crete, 3200—total, 55,018. The same statistician gives the number of Jews in Roumelia at 3969, in Bosnia at 6968, in Bulgaria at 8959—total in Turkish empire in Europe, 74,914. In the African dependencies, the Jews are chiefly represented in Tunis, where they are supposed to number 45,000 souls. See JEWS.

There are a number of sects peculiar to Turkey. The most prominent among them are the *Ansarians* (q. v.) and the *Druses* (q. v.). The number of gypsies is estimated at about 200,000.

VII. Literature.—For information on the religious denominations of Turkey, see Baker, *Turkey* (Lond. and N. Y. 1878); Audouard, *L'Orient et ses Peuplades* (Paris, 1867); Zur Helle von Samo [a Mohammedan dervish, previously an Austrian diplomatist], *Die Völker des osmanischen Reiches* (Vienna, 1877); Ubicini, *Études Historiques sur les Populations Chrétiennes de la Turquie d'Europe* (Paris, 1867). (A. J. S.)

*Postscript.*—Since the above was in type, the political situation of Turkey has undergone no material change. The Turks, as well as the natives, made so much opposition to carrying out the provisions of the treaty of Berlin that a naval demonstration by the great European powers in the Archipelago became necessary in order to compel the surrender to Montenegro of Dulcigno, a seaport of Albania, on the Adriatic. Meanwhile both Greece and Turkey continued their warlike attitude and preparations, both parties declining the mediation of the other powers; but as none of these seemed disposed to aid either of the contestants, the latest advices (April, 1881) are that a compromise of the boundary question will be peaceably effected (by the absolute cession to Greece of a part only of the disputed territory in Albania and Thessaly, as suggested by Turkey and recommended by the other governments), and that thus a new lease of life, for a short time, will be granted to the Turkish rule in Europe.

**TURKEY, VERSIONS OF.** There exist a great many translations of the Scriptures which are used throughout the Turkish empire, but do not properly belong to Turkey alone, as the following list of versions, furnished to us by the Rev. Dr. A. W. Thomson, agent of the British and Foreign Bible Society at Constantinople, will show:

Albanian, Gheg.	Judeo-Polish.
Albanian, Tosk.	Judeo-Spaulish.
Arabic.	Kurdish.
Armenian, Ararat.	Kurdish, Armeno-
Armenian, Modern.	Maltese.
Azerbaijan.	Roumanian.
Bulgarian, General.	Russ, Modern.
Bulgarian, Eastern.	Servian.
Bulgarian, Western.	Syriac, Modern.
Croatian.	Turkish.
Greek, Modern.	Turkish, Armeno-
Hebrew.	Turkish, Græco-
Judeo-German.	

These versions have already been treated, more or less fully, in separate articles, or will be found in their proper order in the *Supplement*. Some of the most important translations—such as the Arabic, Turkish, Bulgarian, and Armenian—have been prepared entirely by American missionaries; and it is very interesting to know how their work is appreciated and regarded by scholars of other countries. The *British Quarterly Review*, in its January number, 1878, after speaking of the work done by Americans in the Turkish empire in respect to explorations, literature, and education, medical practice, and the improved condition of woman, thus goes on concerning the Bible translations:

"The most important contribution, however, which the Americans have made to the literature of Turkey is found in the accurate translations which they have made of the Christian Scriptures. These translations are worthy of special notice, because, apart from the religious influence of the Scriptures, they are making a marked impression upon the intellectual life of the various nationalities of Turkey. Fifty years ago there was no version of the Scriptures in any one of the modern languages of that country. The task of making these translations was not an ordinary one. Regard must be had, on the one hand, to the uneducated classes—the style must be such that the common people would readily understand the meaning; on the other hand, regard must be had to the educated classes—the style must be sufficiently elegant and idiomatic to commend itself to the taste of those who are proud of the literary excellences of their ancient tongues. The Americans may fairly claim that they have succeeded in this difficult task, in respect, at least, to four of the important languages of the country. We refer to the modern Armenian, the Arabic, the Turkish, and the Bulgarian. The Turkish versions have varied somewhat, according as they have been prepared for the Armenians, the Greeks, or the Osmanli Turks. The preparation of the entire Bible in the Armeno-Turkish language (the Turkish language written with the Armenian character) was the life-work of the late William Goodell, D.D. The Rev. Dr. Schauffer has given many years to the preparation of a version of the Scriptures in the Arabo-Turkish, or Turkish written with the Arabic character; while at the present time a permanent committee, of which the Rev. Dr. Riggs is chairman, is engaged in an attempt to recast all the Turkish versions of the Bible, and form one that may be printed in any character. We understand that there is one English representative on this commit-

tee. The translation of the Scriptures into Arabic is the result of the labors of two accomplished American scholars—Rev. Eli Smith, D.D., and Rev. C. V. A. Van Dyck, D.D. We are assured by many who are capable of judging that this Arabic version of the Scriptures is worthy of the highest praise, and reflects great credit upon the scholarship of the translators. The same is said of the translations of the Bible that have been made into modern Armenian and Bulgarian by the Rev. Elias Riggs, D.D. We cannot forbear quoting an extract from a letter from Dr. Riggs in regard to the time spent on this branch of his work: 'You ask,' he says, 'in regard to the time devoted to the Armenian and Bulgarian translations of the Bible. In both cases the translations were first issued in parts in small editions, intended partly to supply the existing demand and partly to secure criticisms and to leave room for corrections arising from comparison of the different parts of the Bible. In both cases the whole Bible was finally printed in a single imperial octavo volume, with references. To the Armenian Bible (including the two editions) I gave most of my time for seven years, and to the Bulgarian more than half my time for eleven years. How long our committee will take to complete the Turkish version it is quite impossible to say. We spent a year on the four gospels.' When we remember that these translations are all made from the original Hebrew and Greek; and when we remember, also, that the translations, when put in their permanent form, have been commended by the best Arabic, Turkish, Bulgarian, and Armenian scholars of Turkey; and when we recall, also, the great obstacles the Americans must have met in carrying these translations through the press at Constantinople and Beirut, we cannot refrain from expressing our appreciation, not only of their high scholarship, but of their persevering diligence and steadfastness of purpose; and we are convinced that generations of men yet to come will join in this hearty commendation."

This speaks well of the work performed by these American scholars. For reasons stated above, we have confined ourselves in this article to the *Turkish* version properly so called, and to its transcription into the Armenian and Greek characters.

I. *Turkish*.—The Turkish language, in its numerous dialectic varieties, is more or less diffused through the vast regions which extend from the Mediterranean to the frontiers of China, and from the shores of the Frozen Ocean to Hindustan. The nations to which this language is vernacular have acted an important part in history; and though their power has now declined, and the Crescent has fallen like a star from heaven, yet a member of this race still occupies the throne of Constantine. The peculiar dialect of this language to which the name of Turkish is generally, by way of pre-eminence, applied is spoken in European Turkey by the Ottoman or Osmanli Turks, and is the only language which can be employed as a general medium of communication with all the various kindreds of people inhabiting European and Asiatic Turkey. The most ancient Turkish alphabet is the Ougour, from which the Mongolian is derived; but the modern Turks use the Arabic and Persian characters. Their present alphabet consists of thirty-three letters, twenty-eight of which are Arabic, four are Persian, and one is peculiar to the Turkish. Like most Oriental languages, Turkish is written and read from right to left. Two versions of the Scriptures in kindred dialects of the Turkish language appear to have been completed about the same period. One of these versions, executed by Seaman, and printed in England in 1666, will be noticed in the *Supplement*, under KARASS. The other, comprising both the Old and the New Test., was the work of Ali Bey, whose history is rather remarkable. His original name was Albertus Bobowsky, or Bobovius. He was born in Poland, in the beginning of the 17th century, and while a youth was stolen by the Tartars and sold as a slave in Constantinople. After having spent twenty years in the seraglio, he publicly embraced Mohammedanism, at the same time assuming the name of Ali Bey. He became first dragoman, or translator, to Mohammed IV, and was said to be thoroughly conversant with seventeen languages. At the suggestion and under the direction of the famous Levin Warner, then Dutch ambassador at Constantinople, Ali Bey was induced to translate the catechism of the Church of England into Turkish, and afterwards betook himself to the translation of

the entire Scriptures into Turkish. The study of the sacred volume was not without effect on the translator; for it is recorded that Ali Bey entertained thoughts of returning to the Christian Church, and was only prevented by death from accomplishing his design. When his version was corrected and ready for the press, it was sent by Warner to Leyden to be printed. It was deposited in the archives of the university of that city, and there it remained for a century and a half, until baron Von Diez, formerly Russian ambassador at Constantinople, drew the attention of Europe to this long-neglected translation. He offered his services in editing the MS. to the committee of the British and Foreign Bible Society; and, meeting with great encouragement to prosecute his design, Mr. Diez immediately addressed himself to the revision of the Old Test. When four books of the Pentateuch were revised he died, and the work of revision was transferred by the society to Kieffer, professor of the Turkish language at the University of Paris and interpreting secretary to the king of France. The new editor disapproved of the plan pursued by his predecessor, particularly of his insertion of vowel-points, and he therefore commenced the work anew, applying himself, in the first instance, to the New Test. He followed the text of the MS. implicitly, without collating it with the original Greek; and thus several errors in the text were inserted in the printed copies, which were, however, soon detected, and gave rise to a printed controversy. The circulation was immediately suspended, the errors were examined and corrected by a sub-committee, and Prof. Kieffer commenced a laborious and thorough revision of the text by collating every portion, not only with the original, but with the English, German, and French versions; with the Tartar of Seaman, and of the Scotch missionaries at Karass; with the versions of Erpenius and of Martyn; and with those in the London Polyglot. The revision was carried on from 1820 to 1828, when the entire Bible, with the embodied corrections, was completed, and obtained the attestation of the most eminent Orientalists in Europe. The work was printed at Paris, and the original MS. was afterwards returned to Leyden. An edition of the Turkish New Test., carefully revised by Mr. Turabi under the superintendence of Dr. Henderson, was completed by the society in 1853. A subsequent revised edition was printed in 1857. A new version was commenced by the Rev. Dr. Schauffier, and the New Test. was printed in 1866. In 1867 the Psalms followed, to which were afterwards added the Pentateuch and Isaiah. These are, at present, the parts published of Dr. Schauffier's translation. The entire Bible was completed in 1873. "This work," says the *Annual Report* of the British and Foreign Bible Society for the year 1873, "is of a somewhat extraordinary character, requiring rare powers of scholarship for its execution. It has occupied many years, and the translator has devoted to it the most conscientious and untiring application. It has been the one thing to which his mind and learning have been consecrated. The question has been frequently mooted, and is again under discussion, whether a distinct translation in Turkish is to be published with exclusive reference to the Osmanlis, or whether one and the same text may not be made available both for Osmanlis and for other nationalities speaking the Turkish tongue, but reading their native characters. The latter was the object proposed when the translation of Dr. Schauffier was commenced; but the views of the translator became modified in the very early stages of his work, and he has aimed to adapt his translation in style to the taste of the Osmanlis, believing that the style common to the Greeks and Armenians speaking Turkish is too coarse and degraded to be met by a version acceptable to the Osmanlis. It is, moreover, alleged that the different nationalities employ the same terms frequently in widely different senses. This view does not elicit the sympathy or endorsement of many of the missionaries, who still hold to the theory

that one text should suffice for all classes, and that two versions would be injurious to the cause of divine truth, on the ground that it might, with some show of propriety, be objected that Protestants had one Bible for the rich and learned and another for the poor and unlearned. It is further contended that the necessity for distinct texts does not exist; that the style of Turkish spoken by the Christian populations has materially improved in dignity, although not level with that of the Osmanlis; and that it would be practicable to educate them to something still higher by means of a version of the Scriptures in pure idiomatic Turkish, without being cast in too lofty and artificial a mould. In order to bring the whole question to some practical and satisfactory solution, it is proposed that a committee be formed, composed of the best Turkish scholars, of which Dr. Schauffler shall be president, and to which the examination of his translation shall be submitted; and that authority be given to call in the aid of such literary effendis as may be judged desirable." The committee of joint revisers was formed; but, states the *Report* for 1874, "after a short experiment the venerable translator (Dr. Schauffler) resigned his position on the Board of Revisers, and handed over the MS. of the Old Test. to the agents of the British and Foreign and of the American Bible Society, at whose expense the translation has been made. It is an understood thing that the forthcoming Turkish Bible will be based on Dr. Schauffler's work, so that if he should have to regret that the whole will not be printed exactly as it leaves his hand, yet he will enjoy the satisfaction of knowing that he has contributed in a pre-eminent degree to this work, which was the fondest object of his later years; and that his name will go down to future generations associated with one of the hardest tasks ever attempted—the translation of the whole Bible into Osmanli Turkish." As to the work of the committee, we read in the *Annual Report* of the British and Foreign Bible Society for the year 1879 the following: "The revision of the Turkish Scriptures has been completed, and the version may be fairly considered a new translation. The committee began their work in June, 1873, and the last words of the Old Test. were written at eleven o'clock on May 25, 1878. The object of the committee was to produce a complete Bible for the Turks, which would be simple in language and idiom, and intelligible to the uneducated and acceptable to the learned. The committee was composed of the Rev. Dr. Schauffler (who soon retired from the committee), Dr. Riggs, the Rev. R. H. Weakley, and the Rev. G. F. Herrick, and these called to their help the Rev. Avedis Constantian, pastor of Marash, and two Turkish scholars, one of whom soon withdrew, and was replaced by a very learned man from the banks of the Tigris. One of these Turkish assistants became a first-fruit of the new version. The New Test. was first printed (Constantinople, 1877), and a second edition, in smaller form, was ready in time to send to Russia for the Turkish prisoners; and the printing of the Old Test. was completed in December, 1878. The Turkish government, to prevent the publication of the version, insisted that each copy should bear the *imprimatur* of the Imperial Council of Public Instruction, so that the copies go forth with the permission of the Turkish government; and what was meant for a hindrance has turned out to the furtherance of the work. The American Bible Society has shared with this society the labors and expenses of this great work." As to the MS. of Dr. Schauffler, which, as has been stated above, was handed to the agents of the British and Foreign and the American Bible Society, the translator has completed his final revision. "The parts," states the same report, "were not ready in time to be used by the revision committee, as had been intended. The MSS. of the Old Test. (except the Pentateuch and Isaiah already published) are now deposited in the strong-room of the American Bible House, New York, to the joint account of the British and Foreign and the American Bible Society."

II. *Turkish-Armenian*.—This is, properly speaking, a Turkish version, but printed in Armenian letters, and accommodated to the dialectic peculiarities which prevail among the Armenians of Asia Minor. A Turkish version in their peculiar dialect, and written in their characters, was commenced in 1815 by an Armenian archimandrite named Seraphim, in concert with another Armenian. An edition of five thousand copies of the Testament was printed at St. Petersburg in 1819. Mr. Leevs, agent of the British and Foreign Bible Society, devoted much time and trouble to the preparation of a revised edition. The work was afterwards taken up by the missionaries of the American Board of Missions; and in 1843 the entire Scriptures were printed in Smyrna at the expense of the American Society, the translation having been made by the Rev. W. Goodell. Subsequent editions of the Armeno-Turkish Scriptures have been printed at the American Mission press on behalf of the British and Foreign Bible Society.

III. *Turkish-Greek*.—This, like the preceding version, is Turkish, but printed in Greek letters. In 1782 the Psalms, translated into Turkish by Seraphim, metropolitan of Karamania, were printed in Greek letters; and in 1810 a Turkish version of the Acts and Epistles was printed in the same character at Venice. In consequence of inquiries instituted in 1818 by Dr. Pinkerton, respecting the state of the Christian inhabitants of the ancient Lydia, Caria, Lycia, Phrygia, Pisidia, Cilicia, and Lycæonia, it was ascertained that these poor people are all Greeks or Armenians, acquainted with no language but that of their Turkish masters. As they were unable to read or write except in their native characters, the British and Foreign Bible Society published the Turkish Testament in Greek letters, the translation having been made by Messrs. Goodell and Bird. This edition was printed at Constantinople in 1828. In order to make it more conformable to the provincial mode of speaking Turkish which prevails among the Greek Christians of Asia Minor, Mr. Leevs, agent of the society, undertook a new and revised version, assisted by Mr. Christo Nicolaides, of Philadelphia, who joined Mr. Leevs in 1832, and from that period to 1839 was uninterruptedly employed in the undertaking. The printing of the entire Bible was commenced at Syra, and afterwards transferred to Athens. In 1865 the Psalms, revised with great care under the editorial superintendence of the Rev. Dr. Riggs, passed through the press; and in 1870 the whole Bible, with marginal references, was published in Constantinople. See, besides the *Bible of Every Land*, the *Annual Reports* of the British and Foreign and American Bible Societies; and Read, *The Bible Work of the World* (Lond. 1879). (B. P.)

**Turlupins**, the French name for the BRETHREN OF THE FREE SPIRIT (q. v.). The origin of the word is unknown, though it is thought to be connected with wolfish or predatory habits.

**Turner, Daniel**, an English Baptist minister, was born at Blackwater, Hertfordshire, March 1, 1710. He first settled at Reading, and after devoting some years to school-teaching, became, in 1748, pastor of the Baptist Church in Abingdon, Berkshire, which position he filled till his death, Sept. 5, 1798. Many of his publications were highly approved; among them were, *Compendium of Social Religion* (1758, 8vo);—*Letters Religious and Moral* (1766, 8vo);—*Meditations on Scripture* (Abing. 1771, 12mo);—*Dissertations on Religion* (1775, 8vo);—*Essays on Religion* (1780, 2 vols.; Oxf. 1787, 2 vols. 12mo);—*Expositions on Scripture* (Lond. 1790, 8vo). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Turner, Francis**, an English prelate of the 17th century, received his education at Winchester School, graduated at New College, Oxford, April 14, 1659, and took his degree of A.M. there in 1663. He received his degree of D.D. July 6, 1669, and in the following December was collated to the prebend of Sneating, in

St. Paul's. He succeeded Dr. Dunning to the see of Chichester, and followed him in the mastership of St. John's College, Cambridge, April 11, 1670. In 1683 he was made dean of Windsor; was consecrated bishop of Rochester, Nov. 11; and Aug. 23, 1684, was translated to the bishopric of Ely. He was one of the six bishops who joined archbishop Sancroft on May 18, 1688, in refusing to read the *Declaration for Liberty of Conscience*, and with them was committed, June 8, to the Tower, but was acquitted on the 29th. Refusing to take the oath when William and Mary ascended the throne, he was deprived of his bishopric, and lived in retirement till his death, Nov. 2, 1700. He wrote, *A Vindication of the late Archbishop Sancroft and his Brethren*, etc.:—*Animadversions on the Naked Truth:—Letters to the Clergy of his Diocese:—Brief Memoirs of Nicholas Ferrar* (2d ed. 1837, 12mo):—*Sermons* (1681–85). See Bliss's *Wood, Athen. Ozon.* iv, 545; Burnett, *Own Times*; Macaulay, *Hist. of England*, ch. xiv, xvi, xvii; Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Turner, James (1)**, a Presbyterian minister, was born in Bedford County, Va., May 7, 1759. He was converted in 1789, licensed to preach in 1791, and ordained and installed as colleague pastor with the Rev. James Mitchel, July 28, 1792, in what was then called the Peaks Congregation. He also took charge of the New London Congregation. Here he spent the whole of his ministerial life, and died, Jan. 8, 1828. He was exceedingly attractive as a preacher; a man of real genius; acknowledged to be unrivalled among the clergy of Virginia in his power over the passions of men. See Sprague, *Annals of the Amer. Pulpit*, iii, 581; Foote, *Sketches of Virginia*, 2d series.

**Turner, James (2)**, an English Congregational minister, was born at Oldham, March, 1782. He was educated at Rotherham College, and ordained at Knutsford in 1808, which place became the chief centre of his exertions. He was for years secretary of the British and Foreign Bible Society and the Cheshire Union of Independent Ministers. His judgment and clearness of mind were often consulted in private business, and great confidence was reposed in him. He died May 22, 1863. See (Lond.) *Cong. Year-book*, 1864, p. 248.

**Turner, Jesse H.**, a Presbyterian minister, was born in Bedford County, Va., Jan. 1, 1788; was educated in Hampden Sidney College, Va.; studied theology in the Union Seminary, Prince Edward, Va.; was licensed by Hanover Presbytery and ordained by the same in 1813. He began his labors as a missionary in Richmond, Va.; he subsequently preached at Fayetteville, N. C.; Manchester, Va.; and in Hanover County, Va. He died March 13, 1863. He was a sincere, good man, and successful as a preacher. See Wilson, *Presb. Hist. Almanac*, 1867, p. 454.

**Turner, Joseph M. W.**, an English painter, was born at 26 Maiden Lane, Covent Garden, London, April 23, 1775. He became a student, in 1789, of the Royal Academy, and as early as 1799 was elected an associate of the Academy, becoming three years after a full academician. In 1807 he was elected professor of perspective, but failed on account of literary qualifications. He travelled in Scotland, France, Switzerland, and the Rhine countries, and paid three visits to Italy. He died at Chelsea, Dec. 19, 1851. He bequeathed a noble collection of his works to the nation, and they were placed in a room in the National Gallery. Among his many works we notice, *The Fifth Plague of Egypt:—Tenth Plague of Egypt:—a Holy Family*. He also wrote a poem, *The Fallacies of Hope*. See Ruskin, *Modern Painters*; Thornbury, *Life of Turner* (Lond. 1862, 2 vols.; new ed. 1874).

**Turner, Nathaniel**, a Congregational minister, was born at Norfolk, Conn., in 1771; graduated at Williams College in 1798; studied theology with Dr. Catlin; was ordained over the Church in New Marlborough,

Mass., in 1799; and died May 25, 1812. See *Cong. Quarterly*, 1859, p. 46.

**Turner, Peter**, an English Congregational minister, was born at Wolverhampton in 1808. His parents were Wesleyans, and it was in connection with that body that he began to labor, at the age of eighteen, as a local preacher. He continued a liberal and zealous member of the Wesleyan community until 1846, when he joined the Independents, and in 1851 accepted the pastorate of the Independent Church at Evesham, Worcestershire. In 1856 he removed to Southampton, and labored with the Congregational Church until his death, July 26, 1861. Mr. Turner was very devoted to his people and pastoral duties, and his pulpit ministrations were highly prized by all who knew him. See (Lond.) *Cong. Year-book*, 1862, p. 267.

**Turner, Samuel Hulbeart, D.D.**, an eminent Episcopal clergyman and scholar, was born in Philadelphia, Pa., Jan. 23, 1790, and graduated at the University of Pennsylvania in 1807. He was ordained deacon in 1811, and priest in 1814; was pastor of a church at Chestertown, Md., from 1812 to 1817; and was elected professor of historic theology in the General Episcopal Seminary, New York, Oct. 8, 1818. He continued with the institution during its stay in New Haven, Conn., and returned with it to New York in 1821. On Dec. 19 he took the chair of Biblical learning and interpretation of Scripture, in which he continued till his death, Dec. 21, 1861. He was also professor of Hebrew language and literature in Columbia College from 1831. He was the author of, *Notes on the Epistle to the Romans* (N. Y. 1824, 8vo):—with Dr. Whittingham, *Introduction to the Old Testament*, transl. from the Latin and German of John Jahn (1827, 8vo):—*Introduction to Sacred Philology and Interpretation*, transl. from the German of Dr. G. J. Planck (Edinb. 1834, 12mo):—*Companion to the Book of Genesis* (N. Y. 1841, 8vo):—*Biographical Notices of some of the Most Distinguished Rabbies*, etc. (1847, 12mo):—*Parallel References Illustrative of the New Testament* (1848, 12mo):—*Essay on Our Lord's Discourse*, etc., *John vi* (1851, 12mo):—*Thoughts on the Origin, Character, and Interpretation of Scripture Prophecy* (1852, 12mo):—*Epistle to the Hebrews*, in Greek and English (1852, 8vo):—*Epistle to the Romans* (1853, 8vo):—*Epistle to the Ephesians* (1856, 8vo). See *Autobiography of Samuel H. Turner, D.D.* (1862, 12mo); *Amer. Quar. Church Rev.* 1862, p. 734; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Turner, Sharon**, an English author, was born in London, Sept. 24, 1768. After many years' practice as an attorney in the Temple, he retired, in 1829, to Winchmore Hill, where he resided until a few weeks before his death, which occurred in London, Feb. 13, 1847. Mr. Turner is best known by his *History of England from the Earliest Period to the Death of Elizabeth*, etc. (Lond. 1799–1805). He also wrote, *History of Henry VIII*, etc. (1826, 4to):—*History of the Reigns of Edward VI, Mary, and Elizabeth* (1829, 4to):—*Sacred Meditations and Devotional Poems by a Layman* (1810, 12mo):—*The Sacred History of the World*, etc. (1832, 3 vols. 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Turner, Thomas, D.D.**, an English divine, was born at St. Giles's, Heckfield, in 1591. He was educated at St. John's College, Oxford, and in 1623 was presented by his college to the vicarage of St. Giles's in Oxford. Laud, when bishop of London, made him his chaplain, and in 1629 collated him to the prebend of Newington, Church of St. Paul, and in October following to the chancellorship of the same church. Charles I made him a canon residentiary, and appointed him one of his chaplains in ordinary, giving him the rectory of St. Olave, Southwark, with which he held the rectory of Fetcham, Surrey. At the request of Charles I he accompanied that prince to Scotland to

be crowned. In 1641 he was preferred to the deanery of Rochester, but on the death of the king he was stripped of his preferments and treated with indignity. At the Restoration he entered the deanery of Canterbury, August, 1660. He died in October, 1672.

**Turner, William**, an English divine, was born near Broadoak, Flintshire, and for some time previous to going to Oxford he was an inmate of the house of Philip Henry, father of Matthew, the commentator. He took his A.M. at Edmund Hall, Oxford, June 8, 1675. Becoming, afterwards, vicar of Walberton, in Sussex, he resided there in 1697; but the date of his death is uncertain. He published, a *History of All Religions* (Lond. 1695, 8vo):—*Complete History of the Most Remarkable Providences*, etc. (1697, fol.). "This curious collection ranks with the similar performances of Clark, and Wanley in his *History of the Little World*, but is superior perhaps to both in selection and conciseness."

**Turner, William Hindley**, an English Congregational minister, was born at Beeston, Leeds, in 1784. He was educated at Rotherham College, and became an exceedingly popular preacher. Mr. Turner's first settlement was at Bury, and after seven years' efficient work he removed to Hindley, where he built up a prosperous and manly ministry. In 1862 growing infirmities led him to resign the stated ministry. He was a disinterested, devoted, and faithful minister of Christ. He died Dec. 8, 1868. See (Lond.) *Cong. Year-book*, 1870, p. 324.

**Turnus**, in ancient Italian mythology, was the king of the Rutuli, and a son of Daunus and Venelia, who was a niece of queen Amata, wife of Latinus. Her daughter Lavinia, having been destined by fate to Æneas, was the subject of dispute between the Trojans and the Latins, in which the former were victorious. Turnus, after many wild battles, was finally killed in a duel with Æneas.

**Turpentine-tree** (τερεβινθος, τερεβινθος; Vulg. *terebinthus*) occurs only once, viz. in the Apocrypha (Ecclus. xxiv, 16), where wisdom is compared with the "turpentine-tree that stretcheth forth her branches." The τερεβινθος or τερεβινθος of the Greeks is the *Pistacia terebinthus*, *terebinth-tree*, common in Palestine and the East, supposed by some writers to represent the *elâh* (עֵלֶה) of the Hebrew Bible. See OAK. The terebinth, though not generally so conspicuous a tree in Palestine as some of the oaks, occasionally grows to a

large size. See Robinson (*Bibl. Res.* ii, 222, 223), who thus speaks of it. "The butm" (the Arabic name of the terebinth) "is not an evergreen, as often represented, but its small lancet-shaped leaves fall in the autumn, and are renewed in the spring. The flowers are small, and followed by small oval berries, hanging in clusters from two to five inches long, resembling much those of the vine when the grapes are just set. From incisions in the trunk there is said to flow a sort of transparent balsam, constituting a very pure and fine species of turpentine, with an agreeable odor like citron or jessamine, and a mild taste, and hardening gradually into a transparent gum. In Palestine nothing seems to be known of this product of the butm!" The terebinth belongs to the natural order *Anacardiaceæ*, the plants of which order generally contain resinous secretions. See TEREBINTH.

**Turpin** (or **Tilpin**), a French prelate of the 8th century, of whose early history nothing definite is known, was a monk of St. Denis, and became bishop of Rheims probably in 753, after a long opposition by Milon. He was one of the twelve French bishops present in 769 at the council called at Rome by pope Stephen to condemn the antipope Constantine. About 786 Turpin founded a chapel dedicated to St. Denis, which afterwards became an abbacy. He died Sept. 2, 800. He left a genuine letter to pope Adrian I, and a romantic Latin *Chronicle* of the wars of Charlemagne against the Saracens in Spain, the authenticity of which has been greatly doubted, although avouched by a declaration of pope Calixtus in 1122. The oldest MSS. of it date from the end of the 11th century, and the first writer who speaks of it is Raoul of Tortoise (1096–1145). The Latin text was published in 1584 by Schard, in his *Germanicarum Rerum Chronographi*, and French versions have appeared by Raguin (Paris, 1527, 4to; Lyons, 1583, 8vo, etc.), and lately by Ciampi (Florence, 1822, with a dissertation on the author) and Reiffenberg (Brussels, 1836). See Gascon Paris, *De Pseudo Turpino* (Paris, 1865).

**Turpin, THOMAS D.**, a Methodist Episcopal minister, was born in Somerset County, Md., June 30, 1805. He was converted Sept. 8, 1823; licensed to preach Sept. 12, 1827; admitted on trial in the travelling connection Feb. 7, 1829, and was appointed to Union Circuit; in 1830, to Pendleton; in 1831, to the Savannah mission; in 1832, to the Black Swamp Circuit; in 1833, to May and New River; in 1834, to the Wadmatane and John's Island mission and Orangeburg Circuit; in 1835, to Pee Dee; in 1836, to Laurens; in 1837, again to Pendleton; and in 1838, to the Cambridge and Flat Woods mission, where he died, July 26, 1838. See *Minutes of Annual Conferences*, ii, 665.

**Turquoise**, a Persian gem of a peculiar bluish-green color, which was very generally used in the Middle Ages for the adornment of every species of sacred vessel, e. g. the chalice, ciborium, altar-cross, mitre, and pastoral staff.

**Turret, Touret, or Turette**, a small tower: the name is also sometimes given to a large pinnacle. Turrets are employed in Gothic architecture for various purposes, and are applied in various ways; they also differ very greatly in their forms, proportions, and decorations. In many cases they are used solely for ornament; they are also often placed at the angles of buildings, especially castles, to increase their strength, serving practically as corner buttresses. Occasionally they carry bells or a clock, but one of the most common uses to which they are applied is to contain a *newel*, or spiral staircase: for this purpose they are usually found attached to church-towers, forming an external projection, which very frequently terminates considerably below the top of the tower; but in some districts turrets of this kind generally rise above the tower, and are finished with a parapet or small spire. Turrets of all dates are sometimes perfectly plain and sometimes variously ornamented, according to the character of the prevailing style of archi-

*Pistacia terebinthus*.

Beckley, Oxfordshire.

St. Mary's, Beverley, Yorkshire.

ture, the upper part being the most enriched, and not unfrequently formed of open-work. In the *Norman* style the lower part is usually square, and this form is continued to the top, but the upper part is sometimes changed to a polygon or circle. Few turrets of this date retain their original terminations, but they appear to have been often finished with low spires, either square, polygonal, or circular, according to the shape of the turret. In the *Early English* and later styles they are most usually polygonal, but are sometimes square, and occasionally circular. The upper terminations are very various; in the *Early English* style spires prevail, but in the *Decorated* and *Perpendicular* not only spires, but parapets, either plain, battlemented, pannelled, or pierced, and pinnacles are used. The peculiar kind of turrets often found attached to small churches and chapels, which have no towers to receive the bells, is designated by the term *Bell-gable*. See SPIRE; TOWER.

**Turretini**, the name of a family of theologians of Geneva, whose ancestor, Francis Turretin or Turretini, the son of a gonfalonier of Lucca, was expatriated on account of his religion. He came to Geneva in 1579. Among his descendants three men deserve mention in this place.

1. **BENEDETTO** was born in 1588 at Zurich, became pastor at Geneva in 1612, and professor of theology in 1618. In 1620 he represented the Church of Geneva at the national synod of Alais, which introduced the decrees of Dort into France, and in the following year he was sent to Holland and the cities of the Hanseatic League to solicit aid towards fortifying Geneva, a task in which he was eminently successful. He died in 1631, leaving to the world a number of sermons and theological writings. See Leu, *Allgem. hist. Lexikon*, xviii, 375; Senebier, *Hist. Lit. de Genève*, ii, 136.

2. **FRANÇOIS** was born in 1623, became pastor of the Italian congregation at Geneva, and in 1658 professor of theology. He was sent to Holland on a similar mission to that formerly undertaken by his father, Benedetto. He is particularly known as a zealous opponent of the theology of Saumur [see AMYRAUT], and defender of orthodoxy in the sense of Dort. He was also one of the originators of the *Helvetic Consensus* (q. v.) He left numerous works, the more important of which, includ-

ing the *Institutio Theol. Elenctica*, were reprinted at Edinburgh in 1847 sq.

3. **JEAN ALPHONSE**, the son of François, was born in 1671, and became the pupil of the Cartesian Chouet and of the Arminianizing Louis Tronchin (q. v.) at Geneva. In 1691 he went to Holland to study church history under Spanheim, and in 1692 he visited England, where he became acquainted with Newton and acquired the English language. On his return to the Continent he sojourned for a time in Paris, and was admitted to the society of men like Bossuet, Mabillon, Malebranche, etc. He availed himself of this opportunity to study Arabic under the tuition of the abbé Linguet. In Geneva he was received into the ministry at the age of twenty-two, and soon afterwards into the *Vénérable Compagnie des Pasteurs*. His ability as an orator at once commanded attention. He was accustomed to follow the English practice of presenting to the view a leading truth or duty; but he made the application of his discourse with greater unction than the English speakers cultivated, and by thus combining the methods of the Genevan and the English pulpit he became the originator of a new method.

The arrangement of his sermons was natural and logical, his statement clear and simple, his manner dignified. In 1697 he was made professor of church history, and in 1701 became rector of the academy. The latter honor was conferred upon him ten times, to which fact we are indebted for ten important addresses delivered on the successive days of promotion. He followed Tronchin, in 1705, as professor of systematic theology, though still retaining his own (historical) chair. He wrote upon almost the whole of dogmatics, and connected with these labors exegetical lectures on parts of the New Test.

The influence of Turretini was especially apparent in the management of the enterprise to bring about the abrogation of the *Helvetic Consensus* as a binding formula. He kept it before the Venerable Company, the council, and the Two Hundred until a majority were gained over to that project; and he induced Wake, archbishop of Canterbury, to urge the abrogation upon leading men throughout Switzerland, and also to persuade the king of England to address an appeal to the cantons in behalf of the same measure. He was also prominent in promoting fraternal relations between Lutherans and Reformed Christians in Geneva, in recognition of which fact he was made a member of the Royal Academy of Berlin, and awarded a gold medal by the Prussian king.

The principal theological works of Turretini, from which his tendency may most readily be learned, are, *Nubes Testium pro Moderato et Pacifico de Rebus Theol. Judicio et Instituenda inter Protestantas Concordia* (1729), with a dissertation on the fundamental articles of the faith annexed. Such articles he describes as "quorum cognitio atque fides ad Dei gratiam salutemque obtinendam necessaria est." This dissertation exposed Turretini to attack from two different directions: first, from the Jesuit De Pierre, Lyons, 1728, who sought to show that the Reformed Church had no greater reason to renounce the communion of the Church of Rome than that of the Lutheran Church; and, second, from Crinsons, Protestant pastor of Bionens, 1727. A second and more important work is his *Cogitationes et Dissertationes Theologicae*, in which he displays a liberal type of orthodoxy. He emphasizes the importance of natural theology in genuine Reformed fashion, but holds that revealed religion has for its object merely the supplementing and completing of what natural religion

teaches. He recognises the existence of mysteries in revealed religion, but zealously rejects foreign and scholastic additions in theology. With respect to the doctrine of the divine decrees, he avoids, as he does everywhere, all extreme statements, but lays hold on the elements of practical utility in the teaching. With reference to the doctrine of Divine Providence, he represented the optimistic Leibnitzian theory. He followed that philosopher also in his rejection of innate ideas. The *Cogitationes* contained much apologetical material, and earned for their author an honorable place among apologists (see Pelt, *Encyclop.* p. 391). The form in which his apologetical ideas were given to the French world of readers by Vernet is, it should be noted, revised and altered, in the first editions with the author's consent, as Vernet claimed; but the improvement progressed with each successive edition, and Vernet clearly reveals the deism of the 18th century in his work.

In 1725 Turretini was commissioned to deliver the so-called *Clôture des Promotions*, an address in the French language, together with the charge prescribed by the laws for the occasion, when the Two Hundred and the General Assembly of citizens were to elect the principal magistrates of the State. The twenty-five addresses which he delivered to these bodies were highly commended because of the striking and practical ideas with which they were filled. He also took active part in the improvement of the liturgy, in the ordering of week-day services, in the publication of a new edition of the French New Test. (1726), in the forming of a society for the religious instruction of youth, and finally in the introduction of the public confirmation of catechumens. He rendered important services to the churches of Hungary, Transylvania, the Palatinate, and the Waldenses, and maintained an extensive correspondence with Switzerland, England, Holland, Germany, etc. George II of England and his consort honored him with expressions of their favor, and employed him in works of benevolence. His last years were disturbed by the troubles of Geneva in 1734. He died May 1, 1737. After his death were issued from the press his *Comment. Theoret.-pract. in Ep. ad Thesalon.* (Basle, 1739):—*Praelectiones* on Romans xi (Geneva, 1741):—and a tractate on the exposition of Scripture (Berlin, 1766). A complete edition of his works appeared in Leeuwarden in 1775.

*Sources.*—Senebier, *Hist. Lit. de Genève*, ii, 259; Sa-yous, *Hist. de la Lit. Franc. à l'Étranger*, etc. (1853); Cellérier, *L'Académie de Genève* (1855); Vernet, *Éloge Historique, sur J. A. Tur.* in the *Bibl. Raisonnée*, xxi; various biographical dictionaries; and Herzog, *Real-Encyclop.* s. v.

**Turri**, in the mythology of the Finns, was a god of war and hunting, living in steep rocky caverns, and was worshipped as the god of the nation.

**Turrigëra** (or **Turrita**) (*tower-bearer* or *towered*), in Roman mythology, was a surname of Cybele.

**Turselin** (Lat. *Tursellinus*), HORACE, a learned and indefatigable Jesuit of Rome, was born in 1545, and taught rhetoric in that city twenty years, and was rector of several colleges. He promoted the study of belles-lettres in his society, and died at Rome, April 6, 1599. His principal works are, *Life of St. Francis Xavier* (best ed. 1596, 4to):—*History of Loretto* (8vo):—*Treatise on the Latin Particles*:—*Abridgment of Universal History from the Creation to 1598*, etc. (best editions are those which have a continuation by father Philip Briet, 1618-61, the best French translations are by abbé Lagneau, Paris, 1757, 4 vols. 12mo).

**Turstine**, a monk of Caen, in Normandy, who, in 1801, was sent over to England and installed first Norman abbot of Glastonbury Abbey. Through his influence, William I granted the abbey a charter, restoring its lost lands, and confirming all its privileges. In a

general council, he opposed the assumptions of Giso, bishop of Wells, and was so successful that Giso had to go to Glastonbury and there have decided the question of jurisdiction over the two minor monasteries, Muchelney and Etheling. Turstine then turned his attention to the internal arrangements of the abbey, but by his introduction of foreign practices brought about insubordination among the monks. French soldiers were brought in, who slew some of the monks while in the sanctuary. Turstine was obliged to retire to Normandy in disgrace. William II permitted him to return to the abbey on payment of five hundred pounds in silver, but he seems not to have stayed there. See Hill, *English Monasticism*, p. 247, 248, 252.

**Turtle**, or **TURTLE-DOVE** (תור, *tôr*, so called, no doubt, in imitation of its cooing note; *τρυγών*), occurs first in Scripture in Gen. xv, 9, where Abram is commanded to offer it along with other sacrifices, and with a young pigeon (גוזל, *gozâl*). In the Levitical law a pair of turtle-doves or of young pigeons are constantly prescribed as a substitute for those who were too poor to provide a lamb or a kid, and these birds were admissible either as trespass, sin, or burnt offering. In one instance, the case of a Nazirite having been accidentally defiled by a dead body, a pair of turtle-doves or young pigeons were specially enjoined (Numb. vi, 10). It was in accordance with the provision in Lev. xii, 6 that the mother of our Lord made the offering for her purification (Luke ii, 24). During the early period of Jewish history there is no evidence of any other bird except the pigeon having been domesticated; and up to the time of Solomon, who may, with the peacock, have introduced other gallinaceous birds from India, it was probably the only poultry known to the Israelites. To this day enormous quantities of pigeons are kept in dove-cots in all the towns and villages of Palestine, and several of the fancy races so familiar in this country have been traced to be of Syrian origin. The offering of two young pigeons must have been one easily within the reach of the poorest, and the offerer was accepted according to what he had, and not according to what he had not. The admission of a pair of turtle-doves was, perhaps, a yet further concession to extreme poverty; for, unlike the pigeon, the turtle, from its migratory nature and timid disposition, has never yet been kept in a state of free domestication; but, being extremely numerous, and resorting especially to gardens for nidification, its young might easily be found and captured by those who did not even possess pigeons.

*Turtur Egyptiacus.*

It is not improbable that the palm-dove (*Turtur *Ægyptiacus*, Temm.*) may, in some measure, have supplied the sacrifices in the wilderness, for it is found in amazing numbers wherever the palm-tree occurs, whether wild or cultivated. In most of the oases of North Africa and Arabia every tree is the home of two or three pairs of these tame and elegant birds. In the crown of many of the date-trees five or six nests are placed together; and sportsmen have frequently, in a palm-grove, brought down ten brace or more without moving from their post. In such camps as Elim a considerable supply of these doves may have been obtained.

From its habit of pairing for life and its fidelity for its mate, the dove was a symbol of purity and an appropriate offering (comp. Pliny, *Hist. Nat.* x, 52). The regular migration of the turtle-dove and its return in spring are alluded to in Jer. viii, 7, "The turtle and the crane and the swallow observe the time of their coming;" and Cant. ii, 11, 12, "The winter is past . . . and the voice of the turtle is heard in our land." So Pliny, "Hyeme mutis, a vere vocalibus;" and Aristotle, *Hist. An. ix*, 8, "Turtle-doves spend the summer in cold countries, the winter in warm ones," although elsewhere (viii, 5) he makes it hibernate (φωλεῖ). There is, indeed, no more grateful proof of the return of spring in Mediterranean countries than the voice of the turtle. One of the first birds to migrate northwards, the turtle, while other songsters are heard chiefly in the morning or only at intervals, immediately on its arrival pours forth from every garden, grove, and wooded hill its melancholy yet soothing ditty unceasingly from early dawn till sunset. It is from its plaintive note, doubtless, that David, in Psa. lxxiv, 19, pouring forth his lament to God, compares himself to a turtle-dove.

From the abundance of the dove tribe and their importance as an article of food, the ancients discriminated the species of *Columbidae* more accurately than of many others. Aristotle enumerates five species, which are not all easy of identification, as but four species are now known commonly to inhabit Greece. In Palestine the number of species is probably greater. Besides the rock-dove (*Columba livia*, L.), very common on all the rocky parts of the coast and in the inland ravines, where it remains throughout the year, and from which all the varieties of the domestic pigeon are derived, the ring-dove (*Columba palumbus*, L.) frequents all the wooded districts of the country. The stock-dove (*Columba *oenas*, L.*) is as generally, but more sparingly, distributed. Another species, allied either to this or to *Columba livia*, has been observed in the valley of the Jordan, perhaps *Col. leucomota*, Vig. (see *Ibis*, i, 35). The turtle-dove (*Turtur *auritus*, L.*) is, as has been stated, most abundant, and in the valley of the Jordan an allied species, the palm-dove, or Egyptian turtle (*Turtur *Ægyptiacus*, Temm.*), is by no means uncommon. This bird, most abundant among the palm-trees in Egypt and North Africa, is distinguished from the common turtle-dove by its ruddy chestnut color, its long tail, smaller size, and the absence of the collar on the neck. It does not migrate, but, from the similari-

ty of its note and habits, it is not probable that it was distinguished by the ancients. The large Indian turtle (*Turtur *gelastes*, Temm.*) has also been stated, though without authority, to occur in Palestine. Other species, as the well-known collared dove (*Turtur *risoria*, L.*), have been incorrectly included as natives of Syria.

The birds of this subgenus are invariably smaller than pigeons properly so called; they are mostly marked with a patch of peculiarly colored scutellated feathers on the neck, or with a collar of black, and have often other markings on the smaller wing-covers. The species *Columba Turtur*, with several varieties merely of color, extends from the west of Europe through the north of Africa to the islands south of China. The turtle-dove of Palestine is specially the same; but there is also a second, we believe local: both migrate farther south in winter, but return very early, when their cooing voice in the woods announces the spring.—Kitto. See Schlichter, *De Turture* (Hal. 1788); Tristram, *Nat. Hist. of the Bible*, p. 217 sq.; Wood, *Bible Animals*, p. 419 sq. See Dove.

**Turtle, JOHN**, a Wesleyan missionary, was born in the County of Suffolk, England, June 9, 1793. He was converted in 1811, commenced to preach in 1815, at Thetford, and in 1817 he received his appointment for the Bahamas, W. I. His first circuit was Eleuthera; next, New Providence; and after that, successively, Turk's Island, Harbor Island, Abaco, Jamaica (1822), Abaco, Eleuthera, and Turk's Island, where he died, Aug. 16, 1825. Mr. Turtle cut short his life by his indefatigable labors. He had natural abilities of a high order, and a spiritual life of beauty and consistency. See *Wesleyan Meth. Mag.* 1828, p. 217; *Wesleyan Minutes*, 1826.

**Turton, Thomas, D.D.**, a bishop of the Church of England, was born in Yorkshire in 1782. He became a pensioner of Queen's College, Cambridge, in 1801; two years thereafter he removed to St. Catharine's College (then known as Catharine Hall), from which he graduated in 1805. In 1806 he was elected a fellow of his college, and in 1807 became a tutor. In 1822 he was appointed Lucasian professor of mathematics, and in 1826 accepted the college living of Gimingham-cum-Trunch, in the County of Norfolk; but was recalled to the university in the following year by his election to the regius professorship of divinity. In 1830 he obtained the deanery of Peterborough, which office he filled until 1842, when he was appointed dean of Westminster. In 1845 he became bishop of Ely. He died at his residence in London, Jan. 7, 1864. As a controversialist, Dr. Turton has been rarely surpassed. His taste in fine arts was exquisite, and he was the composer of several excellent pieces of Church music. See *American Quar. Church Rev.* April, 1864, p. 157.

**Turton, William**, an English Wesleyan missionary, was born in the island of Barbadoes, W. I. His father was a planter. His first labors were on the island of Antigua. In 1798 he received an appointment for St. Bartholomew from the English Conference. In 1800 he was sent to New Providence, and labored for the rest of his life on that and adjacent islands. He died at Nassau, May 10, 1818, aged fifty-seven. He was a faithful toiler. See *Wesleyan Meth. Mag.* 1821, p. 3, 81; *Wesleyan Minutes*, 1818.

**Tutānus**, in Roman mythology, was a deity who was implored in times of peril and danger for help and protection.

**Tutiani, BARTOLOMEO**, an engraver on wood, who is said to have executed some cuts marked with a Gothic monogram of his initials. Bartsch describes only one cut with this mark, *Christ Scoffed at by the Jews*, in a book (Nuremb. 1515); but there is no evidence that it was engraved by Tutiani. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

*Columba Turtur.*

**Tutilina**, in Roman mythology, was a goddess who was said to care for the fields of corn and grain. She had an altar and a pillar in the circus—no temple, however, as she could only be worshipped in the open air.

**Tutilo**, a monk of St. Gall and celebrated artist, was contemporary with the great teachers Notker Balbulus and Radbert of St. Gall, and associated with them in friendship and in the work of making St. Gall the foremost seat of the arts and sciences in their day. He was of gigantic stature and full of joyous humor; a *magister* and *presbyter* according to the necrology, but none the less a born artist and unquestioned genius. Driven into the world by his artist nature, he nevertheless preserved his piously simple and blameless life. In the monastery itself his strength and geniality determined his position. He was its butler and sacristan, and also the host and companion of visiting strangers, serving in the latter capacity down to A.D. 912.

The Irish bishop or presbyter Mark, and his nephew Moengal (the latter preferably called Marcellus by the monks), visited St. Gall in the middle of the 9th century; and Moengal instructed Tutilo, among others, in the art of music until he became a proficient composer. As an instrumentalist and vocalist he captivated the ear and the heart. He became himself a teacher of music, and in a separate room gave regular instruction to the sons of the nobility in the use of stringed instruments. Nor did he confine himself to sacred music only; but his finest laurels were still gathered in that field. He imitated the Scottish custom of associating instrumental music with vocal in the worship of the Church, and carried it further. Some of the instruments used in the small chapel of St. Gall are pictured in old MSS. which are still extant. His own most especial creation were the so-called *tropes*, i. e. ornamental melodic additions, with texts, to the hymns of the mass, and particularly to its *Introit*, which were intended to impart a specifically festive character to the hymns for festal days. His Christmas trope *Hodie Cantandus* is well known. These tropes were widely received and used throughout the Church, and were perpetuated, under various modifications, down to the 17th century. He also composed hymns and litanies (see the St. Gall MSS. Nos. 37 and 380).

The genius of Tutilo was displayed with equal force in the arts of painting, sculpture, and architecture. He had the independence to work from new, indigenous motives as well as from Roman and Byzantine models and after a traditional type. His fame extended widely, and made it the fashion to procure works from his hand. A statue of the Virgin Mary, erected by him at Metz, was wrought in so exalted a manner as to give currency to the report that the Virgin herself was his instructor. Of his carvings the ivory tables which Charlemagne kept under his pillow are especially celebrated. They passed into the hands of archbishop Hatto of Mayence, then into those of Solomon, abbot of St. Gall, and from him into the possession of the monastery. One of them was smooth, and upon its upper surface Tutilo carved the Virgin between four angels, while its lower surface received a portrayal of the legend of St. Gall, in which the saint gives bread to his obedient bear in reward for his labor of bearing wood for fuel. Stumpf, the ancient Swiss chronicler, mentions also an astronomical chart of brass upon which the orbits of the heavenly bodies were beautifully marked, as having been one of Tutilo's masterpieces and as being still in existence in his day. It is now, however, lost. On Tutilo's death he was buried in a chapel which was dedicated to his memory and called by his name; and he was venerated as a saint. The documents of the 11th and 12th centuries always speak of him as a saint; but his worship was soon lost.

**Tuttle, Amos C.**, a Presbyterian minister, was born at Monckton, Vt., July 28, 1800. He pursued his preparatory studies in the Academy at Middlebury, Vt.; graduated at Middlebury College in 1827; studied theology privately; was licensed by the Addison County Association June 30, 1829; ordained by an ecclesiastical council Oct. 30, 1829; and became stated supply of the Church in Whitehall, N. Y., Sept. 1, 1830. In 1832 he became pastor of the Congregational Church in Hartford, N. Y.; in 1836 he accepted an agency for the Auburn Theological Seminary; in 1837 became pastor of the Presbyterian Church in Fayetteville, Onondaga Co., N. Y.; in 1841, of a church at Liverpool, N. Y.; in 1844, of the Congregational Church in Sherburne, Chenango Co., N. Y.; in 1856, of the Church in Paw Paw, Van Buren Co., Mich.; in 1859, of the Church in Lapeer, Mich., where he labored until his death, Sept. 24, 1862. Mr. Tuttle was a man of more than ordinary mind, well educated, and popular as a preacher. See Wilson, *Presb. Hist. Almanac*, 1863, p. 308.

**Tuttle, Jacob**, a Presbyterian minister, was born at New Vernon, Morris Co., N. J., Aug. 24, 1786. He was educated at the Bloomfield Academy, N. J.; studied theology privately; taught at the Academy at Newton, Sussex Co., N. J., from 1817 to 1820; was licensed to preach by the Presbytery of New Jersey April 27, 1820; ordained and installed pastor of the West Milford Church, Passaic Co., Aug. 14, 1821; and removed to Ohio in 1832, where he engaged in home missionary labors, planting several churches, and was everywhere honored as a true man of God. He died Jan. 6, 1866. He was a successful minister, full of concern for his hearers, and honored of God. See Wilson, *Presb. Hist. Almanac*, 1867, p. 324.

**Tuttle, Samuel Lawrence**, a Presbyterian minister, was born at Bloomfield, N. J., Aug. 25, 1815. He was converted in 1830; pursued his academical studies in Newark, N. J.; graduated at the College of New Jersey in 1836; studied theology at the Auburn Seminary, N. Y.; was licensed by the Newark Presbytery Oct. 8, 1840; ordained pastor of the Caldwell Church, N. J., March 9, 1841; was in the employ of the American Bible Society from 1849 to 1854; became pastor of the Madison Church, Morris Co., N. J., Jan. 3, 1854; agent of the American Bible Society for Western New York from 1862 to 1863; and assistant to the secretaries until his death, which occurred April 16, 1866. Mr. Tuttle was an eloquent preacher. The Rev. Dr. Taylor, one of the secretaries of the American Bible Society, gave it as his opinion that there was no person so thoroughly and minutely acquainted with the history and workings of the Bible Society as he. See Wilson, *Presb. Hist. Almanac*, 1867, p. 327.

**Tuttle, Timothy**, a Congregational minister, was born at East Haven, Conn., Nov. 29, 1781. He graduated at Yale College in 1808; studied theology with Rev. David Smith of Durham, Conn.; commenced preaching at Durham, N. Y.; and was ordained over the Church in Ledyard, Conn., in 1811. Here he labored until his death, June 6, 1864. Mr. Tuttle was plain in appearance and manners, yet a man of godly sincerity and of considerable influence. He was an instructive preacher. See *Cong. Quar. Rev.* 1864, p. 301.

**Twelfth-day**, (1) the feast of Epiphany, being the twelfth day after Christmas; (2) the old Christmas-day.

**TWELFTH DAY OF THE MONTH.** In the evening service of the Church of England for the twelfth day of any month, the hymn after the second lesson, beginning "God be merciful unto us," etc., is omitted, because it comes in the regular psalm for the day, and would thus occasion an unnecessary and useless repetition.—Stanton, *Dict. of the Church*, s. v.

**Twelfth-night**, the eve of the festival of the Epiphany, which occurs exactly twelve days after the feast of Christmas.

**Twelfth-tide**. See EPIPHANY.

**Twells**, LEONARD, a learned English divine, was educated at Jesus College, Cambridge, where he proceeded A.B. in 1704. In 1733 the University of Oxford conferred on him the degree of A.M. by diploma, in approbation probably of his *Critical Examination*, etc. He was at that time vicar of St. Mary's, Marlborough, but in 1737 was presented to the united rectories of St. Matthew's, Friday Street, and St. Peter's, Cheap. He was also a prebendary of St. Paul's, and one of the lecturers of St. Dunstan's-in-the-West. He died Feb. 19, 1741 or 1742. His publications in his lifetime were, *A Critical Examination of the Late New Text and Version of the Testament, in Greek and English* (pts. i, ii, Lond. 1731; pt. iii, 1732, 8vo):—*A Vindication of the Gospel of St. Matthew* (1735, 8vo):—*An answer to the Inquiry into the Meaning of Dæmoniacks in the New Test.* (1737, 8vo):—*Answer to the Further Inquiry* (1738, 8vo). After his death, his *Sermons* at Boyle's and lady Moyer's lectures were published for the benefit of his family (1743, 2 vols, 8vo). See *Chalmers, Biog. Dict.* s. v.; *Allibone, Dict. of Brit. and Amer. Authors*, s. v.; *Nichol, Lit. Anec.*; id. *Illustr. of Liter.*

**Twelve**. This number was sacred among the Jews, probably because it was that of the tribes (q. v.), or of the months of the year, or (as some think) of the signs of the zodiac. It was symbolical of just proportion, beauty, and stability. It is sometimes used in the general sense of a dozen: thus, Jeroboam's garment is said to have been rent into twelve pieces (1 Kings xi, 30), and Elisha to have ploughed with twelve yoke of oxen, etc. See NUMBER.

**Twesten**, AUGUST DETLEV CHRISTIAN, a Protestant divine of Germany, was born April 11, 1789, at Glückstadt, in Holstein. He studied theology and philosophy at Kiel, and in 1812 went to Berlin, where he became one of the earliest followers and an intimate personal friend of Schleiermacher. For some time he was professor of languages in one of the colleges at Berlin, but in 1814 he went back to Kiel as professor of theology and philosophy. After the death of Schleiermacher, in 1834, he was called to Berlin to succeed his teacher in the chair of systematic divinity. In 1850 he was appointed *Oberkirchenrath*, and died Jan. 8, 1876. As a writer, Twesten was the least prolific of all the more eminent German divines. This was owing partly to a certain timidity and conscientiousness, and partly to an unwillingness to publish anything which he had not first thoroughly searched and mastered, and for which there seemed to him no urgent need. He wrote an analytical logic, a critical edition of the three oecumenical creeds and the unaltered Augsburg Confession, essays on Heccius Illyricus, on Schleiermacher's *Ethics*, etc. But his main work is his *Vorlesungen über die Dogmatik der evangelisch-lutherischen Kirche* (Hamb. 1837, 2 vols.), which in its unfinished condition has great and abiding excellences; "for he is, perhaps," says Schaff, "the clearest thinker and writer among all the systematic divines of Germany. He possesses the gift of didactic exposition and analysis in an eminent degree. His learning is always accurate, minute, and thoroughly digested; his style transparent, smooth, and polished." The volumes which were published contain—the first, the introductory chapters on religion, revelation, inspiration, the authority and inspiration of the Scriptures, the use of reason, the history of dogmatic literature; the second embraces only the doctrine of God, the holy Trinity, the creation and preservation of the world, and angelology. As to his theological standpoint, it is, according to Schaff, "Schleiermacher's system passing over into Lutheran orthodoxy under a modernized form, or the Lutheran scholasticism of the 17th century revived, enlarged, and liberalized by

the scientific influence of Schleiermacher and the tolerant spirit of the evangelical union." See *Theol. Universal-Lex.* s. v.; Zuchold, *Bibl. Theol.* ii, 1353; Schaff, *Germany, its Universities*, etc., p. 320 sq. (B. P.)

**Twichell**, PLINY, a Presbyterian minister, was born at Athol, Worcester Co., Mass., Feb. 25, 1805. He was educated at Washington College, Pa.; studied theology in Auburn Seminary, N. Y.; was licensed by the Genesee Presbytery in 1836; and was ordained and installed pastor of the Presbyterian Church in Wyoming, N. Y., in 1841. Here he labored for fifteen years, until 1856, in which year he took charge of East Bethany Church, where he preached until his death, Sept. 15, 1864. See Wilson, *Presb. Hist. Almanac*, 1866, p. 180.

**Twilight**, ALEXANDER L., a Congregational minister and teacher, was born at Corinth, Vt., Sept. 23, 1795. By his own exertions he put himself through Randolph Academy and Middlebury College, graduating in 1823. He taught four years in Peru, N. Y.; was licensed to preach by the presbytery in Plattsburg in 1827; taught and preached one year in Vergennes, Vt.; and for eighteen years was principal of the grammar-school in Brownington, Vt., and again from 1852 to 1855. From 1847 until 1852 he taught in Shipton and Hatley, Ontario. He was ordained in Brownington in 1829, and supplied the pulpit there for many years, but was never a regular preacher. He died June 19, 1857. Mr. Twilight's great work was as a teacher; in this he was successful and influential. He pursued his purposes with undeviating energy, and built up his pupils in both character and knowledge. He was an able and often eloquent preacher. See *Cong. Quar. Rev.* 1867, p. 281.

**Twining**, THOMAS, a learned Anglican divine, was born in 1734, and educated at Sidney College, Cambridge, being contemporary in that university with Gray, Mason, and Bate. Mr. Twining was well versed in the composition, harmony, and history of the art and science of music. In 1760 he took his degree of A.B., and that of A.M. in 1763. He became rector of White Notley, Essex, in 1768, and of St. Mary's, Colchester, to which he was presented by the bishop of London, in 1770. He died Aug. 6, 1804. Sound learning, polite literature, and exquisite tastes in all the fine arts lost an ornament and defender in the death of this scholar and worthy divine.

**Twisse**, WILLIAM, D.D., a distinguished Nonconforming Calvinistic divine, was born at Newbury, Berkshire, England, in 1575. He was educated at, and became subsequently a fellow of, New College, Oxford. He became chaplain to princess Elizabeth, afterwards queen of Bohemia. After this he was appointed to the curacy of Newbury. In 1643 he was elected prolocutor of the Westminster Assembly of Divines. He confined himself with great thoroughness to the study of theology, and produced numerous works, among which are the following: *Vmicitie* (1631, 4to):—*Vindicia Gratie, Potestatis, ac Providentie Dei* (Amst. 1632, 4to):—*Dissertatio de Scientia Media, tribus Libris absoluta* (fol.):—*Morality of the Fourth Commandment* (Lond. 1641):—*Treatise on Reprobation* (1646, 4to):—*Riches of God's Love to Vessels of Mercy Consistent with his Absolute Hatred, or Reprobation of Vessels of Wrath* (Oxf. 1653, fol.). This work was strongly recommended by Dr. Owen, *De Causa Dei contra Pelagium*. He left a number of works in MS. His death occurred July 20, 1646.

**Two**. This number is sometimes used in Scripture in a symbolical sense: it typifies the connection between the magistracy and the ministry in the persons of Moses and Aaron; the two systems of idolatry which were learned in Egyptian and Babylonian bondage; the Old and New Tests; the Jewish and Christian dispensations; and, among the early fathers, the divine and human natures of Christ. Several of the early heretics endeavored to introduce the Persian duality into the

Christian system, and they therefore declared that the number two had a more mystic sanctity than any other. Traces of this delusion may be found so late as the 9th century of the Church. See NUMBER.

**Twombly, ISRAEL S.**, a Presbyterian minister, was born at Charlestown, Mass., Sept. 1, 1817. He was educated in Marion County, Mo.; graduated at Lane Theological Seminary in 1852; was licensed by Cincinnati Presbytery the same year, and ordained by Athens Presbytery pastor of the Church in Troy, O. He afterwards became pastor of the Church at Pomeroy, O., where he died, Oct. 31, 1860. He was a thorough scholar, and an earnest and impressive preacher. See Wilson, *Presb. Hist. Almanac*, 1862, p. 198.

**Twyne, BRIAN**, an English divine, was born in 1579, and admitted a scholar of Corpus Christi College in 1594. He was admitted probationer fellow in 1605, and, entering into holy orders, took the degree of B.D. in 1610. In 1614 he was made Greek reader of his college, in which office he acquitted himself with credit, but left his college in 1623. He was afterwards presented to the vicarage of Rye, Sussex, but passed most of his time at Oxford in reading, writing, and contemplation. He died in St. Aldate's, July 4, 1644. He published *Antiquitatis Academiæ Oxoniensis Apologia*, etc. (Oxon. 1608, 4to).

**Tyana, COUNCIL OF** (*Concilium Tyanense*), was held in 367 in Tyana, a town of Asia Minor. There were present in this council Eusebius of Cæsarea in Cappadocia, Athanasius of Ancyra, Pelagius of Laodicea, Gregory Nazianzen the elder, and many others who had declared their belief in the consubstantiality of the Son at Antioch in 363. The letters of pope Liberius and the bishops of Italy, Sicily, Africa, and Gaul were read, which had been written to wipe out the disgrace attaching to them on account of the Council of Ariminum. Eustathius of Sebaste, formerly deposed, was re-established; and a synodical letter written to all the bishops of the East, exhorting them to testify in writing their rejection of the acts of Ariminum, and their adherence to the faith of Nicæa. See Mansi, *Concil. ii*, 886.

**Tychæcum**, the original name of a Temple of Fortune at Antioch, which was turned into a church, and called by the name of Ignatius by Theodosius. See Bingham, *Christ. Antiq.* bk. viii, ch. iii, § 4.

**Tychê**, in Greek mythology, is identical with *Fortuna* of the Romans. Pindar calls her a daughter of Jupiter. She possessed at Thebes, and at numerous other places, temples and monuments.

**Tyches**, in Egyptian mythology, is one of the four protecting domestic spirits which are allotted to each human being during the period of life.

**Tych'icus** (Τύχικος for τυχι'κος, *fateful*), a companion of Paul on some of his journeys, and one of his fellow-laborers in the work of the Gospel. A.D. 54-64. (1.) In Acts xx, 4, he appears as one of those who accompanied the apostle through a longer or shorter portion of his return journey from the third missionary circuit. Here he is expressly called (with Trophimus) a native of Asia Minor (Ἀσιανός); but while Trophimus went with Paul to Jerusalem (Acts xxi, 29), Tychicus was left behind in Asia, probably at Miletus (xx, 15, 38). (2.) How Tychicus was employed in the interval before Paul's first imprisonment we cannot tell; but in that imprisonment he was with the apostle again, as we see from Col. iv, 7, 8. Here he is spoken of, not only as "a beloved brother," but as "a faithful minister and fellow-servant in the Lord;" and he is to make known to the Colossians the present circumstances of the apostle (τὰ κατ' ἐπὶ πάντα γνωρίσαι), and to bring comfort to the Colossians themselves (ἵνα παρακαλέσῃ τὰς καρδίας ὑμῶν). From this we gather that diligent service and warm Christian sympathy were two features of the life and character of Tychicus. Colossæ was in

Asia; but from the fact that of Onesimus, who is mentioned immediately afterwards, it is said, ὅς ἐστιν ἐξ ὑμῶν, whereas Tychicus is not so styled, we naturally infer that the latter was not a native of that city. These two men were doubtless the bearers both of this letter and the following, as well as that to Philemon. (3.) The language concerning Tychicus in Eph. vi, 21, 22 is very similar, though not exactly in the same words. It is the more important to notice this passage carefully, because it is the only personal allusion in the epistle, and is of some considerable value as a subsidiary argument for its authenticity. If this was a circular letter, Tychicus, who bore a commission to Colossæ, and who was probably well known in various parts of the province of Asia, would be a very proper person to see the letter duly delivered and read. (4.) The next references are in the Pastoral Epistles, the first in chronological order being Tit. iii, 12. Here Paul (writing possibly from Ephesus) says that it is probable he may send Tychicus to Crete, about the time when he himself goes to Nicopolis. (5.) In 2 Tim. iv, 12 (written at Rome during the second imprisonment) he says, "I am herewith sending Tychicus to Ephesus." At least it seems natural, with Dr. Wordsworth, so to render ἀπιστεῖλα, though Bp. Ellicott's suggestion is also worth considering, that this mission may have been connected with the carrying of the first epistle. (See their notes on the passage.) However this may be, we see this disciple at the end, as we saw him at the beginning, connected locally with Asia, while also co-operating with Paul. We have no authentic information concerning Tychicus in any period previous to or subsequent to these five scriptural notices. The tradition which places him afterwards as bishop of Chalcedon in Bithynia is apparently of no value. But there is much probability in the conjecture (Stanley's *Corinthians*, 2d ed. p. 493) that Tychicus was one of the two "brethren" (Trophimus being the other) who were associated with Titus (2 Cor. viii, 16-24) in conducting the business of the collection for the poor Christians in Judea. As arguments for this view we may mention the association with Trophimus, the probability that both were Ephesians, the occurrence of both names in the Second Epistle to Timothy (see 2 Tim. iv, 20), the chronological and geographical agreement with the circumstances of the third missionary journey, and the general language used concerning Tychicus in Colossians and Ephesians. See ASIA; EPHESUS; TROPHIMUS.

**Tycho**, in Greek mythology, was a dæmon similar to Conisalus, generally found represented in company with Priapus.

**Tychonius**, a Donatist of the 4th century, who displayed an impartial and sincere desire to arrive at the truth with respect to the controversy between his sect and the Church. He is described as having been learned in the Scriptures, tolerably acquainted with history and with secular literature, and zealously interested in the affairs of the Church. He regarded the Church as the sole divinely provided remedial institution, into which all men must enter if they would attain to salvation; and therefore held that the moral state of the members cannot destroy the value and efficiency of the Church. He was also consistent in protesting against the rebaptism of persons who became Donatists. His views were attacked as heretical by the Donatist Parmenian (q. v.), and drew forth an epistle from Augustine. Tychonius was accused of being a Chiliast, but the charge is probably untrue. A single work from his pen remains, the *Liber Septem Regulis*, first published by Gryneus (Basle, 1569), and afterwards in a better edition by Gallandi in the *Bibl. Vet. Patrum* (Venet. 1772), viii, 107-129. The work is designed to serve as a guide to the interpretation of the Scriptures, and some of its rules are still followed by some expositors: e. g., the sixth, *De Recapitulatione*, which teaches that the same thing is sometimes repeatedly narrated or de-

scribed, especially in the Apocalypse, so that successive narratives do not necessarily refer to successive events. The book furnished Isidore of Seville the idea for his work *Sententiarum Libri Tres*. As the earliest endeavor to construct a theory of Christian hermeneutics, the work certainly deserves attention. It would appear from Augustine that Tychonius died about 390; but Gennadius (*De Script. Eccles.* c. 18) fixes a later time. Gallandi furnished a sketch of Tychonius in *Proleg. to Bibl. Vet. Patr.* VIII, ii, 5, and a more careful notice is given in Tillemont, *Mémoires pour servir à l'Hist. Eccles. des Six premiers Siècles* (2d ed. Paris, 1704), vi, 81 sq., 145–150. See Herzog, *Real-Encyklop.* s. v.

**Tychsen, Olaus Gerhard**, a German Talmudist, was born Dec. 14, 1784, at Tondern, a town in Sleswick. He studied the classical and Oriental languages in the gymnasium of Altona, with the exception of Arabic, which he acquired from a merchant whose business had caused him to reside during many years in North Africa. He finished his theological course at Halle, and was soon afterwards appointed a teacher in G. A. Franke's Orphanage. While so employed he learned the English, Hindostani, and Tamil languages from a missionary (Schulz). His favorite study, however, was the Rabbinical Talmud, in whose language he was so proficient as to be able to speak and write with great ease. He was, in April, 1759, appointed missionary to the Jews and Mohammedans, and travelled in that capacity through North Germany, Prussia, Denmark, and Saxony, but without accomplishing anything. In the synagogue at Altona his sermon even earned for him a severe beating. In 1760 Tychsen went to the University of Bützow, in Mecklenburg, as *magister legendi*, and remained there until Bützow was united with the University of Rostock and transferred to the latter place, when he likewise removed thither. He died Dec. 30, 1815. Tychsen had earned a great reputation, as is attested by his election to numerous societies and by many flattering testimonials; but this reputation respected simply the extent, and not at all the thoroughness, of his knowledge. He possessed solid acquirements only in the Rabbinical, and joined with them a keen eye and considerable skill for the detection of foreign written characters; but he was deficient in judgment, ready to venture the most improbable hypotheses, and anxious for notoriety. He is consequently important only as a Talmudist, a numismatist, and an epigrapher. His controversy with Kennicott and Bayer directed attention to him more than any other incident of his career, and it afforded evidence of all the traits described above—his wide learning, obstinate orthodoxy, and want of critical judgment. In this dispute he wrote, *Tentamen de Variis Codicum Hebr. Vet. Test. MSS. Generibus* (Rost. 1772, 8vo), in support of the Masoretic text:—*Befreites Tentamen*, etc. (1774):—and a supplement (1776). He insisted that the Greek versions had been made from a Hebrew text written in Greek characters, and advocated the no less singular theory that the Samaritan Pentateuch had been copied from a Hebræo-Jewish (Masoretic) text with the vowel-points—the latter in *Disputatio Hist.-phil.-crit. de Pent. Samarit.* etc. (Bützow, 1765, 4to). In 1779 he published a work to demonstrate the spurious character of all Jewish coins bearing Jewish or Samaritan characters, including those of the Maccabæan period, which drew forth a reply from the Spanish Jesuit Bayer and occasioned a protracted dispute. In the study of Arabic coins Tychsen rendered real service, and began the systematic study of Oriental numismatics. He showed himself a master in the deciphering of inscriptions (see *Erklärung d. arab. Schrift auf d. röm.-kaiserl. Krönungsmantel, in der Meckl.-Schwerin. Gelehrten Beiträge*, 1780, Nos. 42, 45, and the *Interpret. Inscript. Cufic. in Marm. Templ. Patriarch. S. Petri Cathedra* [Rost. 1787]). Tychsen also published editions of Al-Makrizi: *Al-Makrizi Hist. Monetæ Arab. e Cod. Escorial.* (ibid. 1797, 8vo):—and *Tractat. de Legalibus Arab. Ponderibus et Mensuris* (ibid. 1800, 8vo). His *Elementale Arabi-*

*cum*, etc., is of inferior value, as is also his *Element. Syriacum*. See Hartmann, *Olaus Gerhard Tychsen*, etc. (Bremen, 1818 sq.); De Sacy, *Biog. Universelle*, xlvii, 120 sq.—Herzog, *Real-Encyklop.* s. v.

**Tychsen, Thomas Christian**, a German scholar and professor, was born at Horsbyll, in Sleswick, May 8, 1758; studied at Kiel and Göttingen; travelled over the Continent after having completed his studies; and became professor extraordinary of theology in Göttingen in 1784, through the intervention of Heyne, his patron. In 1788 he was made ordinary professor of philosophy; 1806, councillor; 1817, honorary doctor of theology. He was a member of several learned societies, and director of the Royal Scientific Association of Göttingen. He died Oct. 24, 1834. This Tychsen, like Olaus G. Tychsen (q. v.), to whom he was in nowise related, was more prominent as an Oriental and classical scholar and antiquarian than as a theologian. He composed forty-three books and essays, all of which are characterized by learning, thoroughness, and good judgment. We mention, *De Παρουσια Christi et Notionibus de Adventu Christi in N. T. Obvis*:—*De Josephi Auctoritate et Usu*, etc.:—*De Litteratura Hebr.*:—*Illustr. Vatican. Joelis*. c. 3 (Gott. 1788). The dispute of Olaus Tychsen with Bayer led him also to give attention to the study of Jewish coins. In this pursuit he wrote, *De Numis Hebræo-Samarit.* etc., in *Nov. Comment. Soc. Reg. Gott.* viii, 120 sq.:—*De Numis Oriental.* (1789):—*De Numis Hasmæorum*, etc., in *Nov. Com. vol. xii*. He furthermore wrote *Geschichte d. hebr. Literatur* (ibid.). In 1791 he became the collaborator of J. D. Michaelis in the Oriental and exegetical library published by the latter, and his successor beginning with vol. ix. He also completed part iv of Michaelis's *Anmerk. für Ungelehrte* and vol. vi of his *Suppl. ad Lex. Hebr.* (1792). He edited vol. vi of Koppe's edition of the New Test., comprising *Galatians, Ephesians, and Thessalonians* (2d ed. 1791). A complete list of his works and detailed sketch of his life may be found in *Neuer Nekrolog der Deutschen* (1834, pt. ii; Weimar, 1836), p. 894–900.—Herzog, *Real-Encyklop.* s. v.

**Tye, CHRISTOPHER**, an English musician of the 16th century, was born at Westminster, and brought up in the Royal Chapel. He was musical preceptor to prince Edward, son of Henry VIII. In 1545 he was admitted to the degree of doctor in music at Cambridge, and in 1548 was incorporated a member of the University of Oxford. In the reign of queen Elizabeth he was organist of the Royal Chapel, and a man of some literature. "The Acts of the Apostles," set to music by Dr. Tye, were sung in the Chapel of Edward VI; but the success of them not meeting the expectation of their author, he commenced the composition of music to words selected from the Psalms of David. The former was published with the following title, *The Actes of the Apostles, translated into Englyshe Metre*, etc. (1553, sm. 8vo). He also composed *A Notable Historie of Nastagio and Traversari, no less Pitefull than Pleasaunt* (Lond. 1569, 12mo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Tyler, Bennet, D.D.**, an eminent Congregational divine, was born at Middlebury, Conn., July 10, 1788. His parents were in humble circumstances, and he worked on the farm until he was fifteen, when an accident disabled him so that it was resolved to send him to college. His own exertions, with some assistance from his father, enabled him to graduate at Yale College in 1804 free from debt. He was converted while at college in the great revival of 1802, studied theology with Rev. Asahel Hooker, and in 1808 was ordained over the Church in South Britain, Conn., where he remained fourteen years. From 1822 to 1828 he was president of Dartmouth College, also performing the duties of college pastor. In 1828 he succeeded Dr. Payson in the pastorate of the Second Church, Portland, Me., where he was greatly beloved. Dr. Tyler was a clear, logical,

and pungent preacher, and he specially delighted in doctrinal themes. About this time Prof. N. W. Taylor, of Yale Divinity School, enounced views which were regarded by many New England theologians as unsafe and unsound. Dr. Tyler was his principal opponent, and the long and able discussion which followed belongs to the history of controversy. To offset the influence of the New Haven theology on the young preachers in the state, the Theological Institute of Connecticut was founded at East Windsor in 1833, and Dr. Tyler was chosen its president and professor of theology. He held these positions until his resignation, July 16, 1857. He died at East Windsor, after only a few hours' sickness, May 14, 1858.

Dr. Tyler was a man of humble and sincere piety, and of a genial and sympathetic nature. In his theological opinions he did not embrace pure Calvinism, but as modified by Edwards and his school. He was in full sympathy with the traditional theology of New England, and was a straightforward controversialist, avoiding metaphysical speculations and verbal subtleties. In forming his system he began, not with mind, but with the Bible, and he looked for no advances in theology except such as come from a richer Christian experience. His writings are permeated by a spirit of practical religion, and, according to some, checked the influence of Dr. Taylor's views. Dr. Tyler published many sermons and controversial articles and pamphlets. His larger works are as follows: *History of the New Haven Theology in Letters to a Clergyman* (1837); *A Review of Day on the Will* (1837); *Memoir of Rev. Asahel Nettleton, D.D.* (Hartford, 1844, 12mo); *Nettleton's Remains* (ibid. 1845, 12mo); *The Sufferings of Christ Confined to his Human Nature* (N. Y. 1845); *A Treatise on New England Revivals* (1846); *Letters to Dr. Horace Bushnell on Christian Nurture* (1847-48); *Lectures on Theology* (posthumous), with a *Memoir* by Rev. Nahum Gale, D.D. (his son-in-law) (Boston, 1859, 8vo). See *Cong. Quar. Rev.* 1860, p. 351 sq. (by A. H. Quint); *New-Englander*, August, 1859 (by Prof. Lawrence); Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tyler, Edward Royall**, a Congregational minister and author, was born at Guilford, Vt., Aug. 3, 1800. He was the son of chief-justice Tyler, two of whose sons became ministers in the Protestant Episcopal Church and one in the Presbyterian. Edward was converted while a clerk in a counting-house in New York, and under the ministry of Dr. Spring. He graduated at Yale College in 1825, studied theology, and was ordained pastor of the South Church in Middletown, Conn., in 1827. Here he was successful in building up the Church, but ill-health induced his resignation in 1832. He was next pastor in Colebrook, Conn., 1833-36. For a year Mr. Tyler was agent of the American Antislavery Society, and from 1838 to its discontinuance in 1842 he was editor of the *Connecticut Observer*. In 1843 the *New-Englander* was established under his proprietorship and editorship, and he continued in connection with it until his death, except during the periods of his prostration through illness. He died Sept. 28, 1848. Mr. Tyler contributed twenty-two articles to the first six volumes of the *New-Englander* (see these enumerated in that periodical, vi, 607). His other publications were, *Slavery a Sin per se*; *Lectures on Future Punishment* (Middletown, 1829, 12mo); *Holiness Always Preferable to Sin: a Sermon* (New Haven, 1829, 8vo). This opposed the position of some of the metaphysical divines of New England, that God sometimes preferred sin to holiness: *The Doctrine of Election: a Sermon* (New Haven, 1831, 8vo); *The Congregational Catechism* (ibid. 1844, 18mo). Tyler's writings are able, and some were thought at the time to be unsurpassed in their treatment of the subject in hand. Many were produced under the depressing influence of disease. "He was by nature, by culture, and by the grace of God, one of the best sort of men, in whom the elements of character are ennobled by faith and sanctified by devotion. We have

seen his uncomplaining patience, his uniform cheerfulness, his kindness and sympathy, his generous impulses, his childlike piety." See *New-Englander*, 1848, p. 603 sq. (by L. Bacon); *Cong. Quar. Rev.* 1866, p. 287.

**Tyler, James Endell**, an English clergyman, was born at Monmouth in 1789. He was educated at Oriel College, Oxford, where he became fellow, dean, and tutor. Presented to the rectory of St. Giles-in-the-Fields, London, in 1826, he became canon residentiary of St. Paul's in 1845. He died in 1852. He wrote, *Indices Attici* (Lond. 1824, 12mo); *Oaths, their Origin, Nature, and History* (1834, p. 8vo); *Conversations of a Father with his Children* (5th ed. 1840, 2 vols. 18mo); *Primitive Church Worship* (1840, 8vo); *A Father's Letters to his Son on Confirmation* (1843, 12mo); *Worship of the B. V. Mary in the Church of Rome* (1844, 8vo); *Image-worship of the Church of Rome* (1847, 8vo); *Meditations from the Fathers of the First Five Centuries* (1849, 2 vols. 12mo); *Rector's Address to his Parishioners* (1851, 8vo); *Christian's Hope in Death*; *Sermons* (1852, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tyler, Joseph D.**, a clergyman and instructor of the Protestant Episcopal Church, was born at Brattleborough, Vt. He graduated at Yale in 1829, and pursued a theological course at Alexandria, Va. His organs of hearing having become impaired by disease, he became connected with the Deaf-and-Dumb Asylum at Hartford, Conn., and subsequently became principal of the Deaf-and-Dumb Institution of Virginia. He died at Staunton, Va., Jan. 28, 1852. He was an excellent scholar, and made some graceful contributions to the literature of the day. See *Amer. Quar. Church Rev.* 1852, p. 142.

**Tyler, William**, a Congregational minister, was born at Attleborough, Mass., Jan. 7, 1780, and was educated at Brown University in the class of 1800. For some time after leaving college he was engaged in secular pursuits. Having decided to study theology, he placed himself under the tuition of Rev. Dr. Emmons, of Franklin, Mass., and was licensed to preach in 1818. He was ordained in 1819 as junior pastor of the Congregational Church in South Weymouth, Mass., soon becoming sole pastor. He remained thirteen years in this place (1819-32). He removed to South Hadley Falls, Mass., in 1832, and was pastor of the Church in that place seven years (1832-39). For several years he performed missionary service, under the direction of the Home Mission Society, in the interior of Massachusetts, having his residence at Amherst. He removed to Northampton, Mass., in 1847, and became the editor of the *Courier*, published in that place. For several years he resided in Pawtucket, R. I., and represented that town in the convention which met in 1853 to revise the State Constitution. He removed to Auburndale, Mass., in 1863, where he spent the remainder of his life, and where he died Sept. 27, 1875. "He was well instructed," says Prof. Gammell, "in theology, and was particularly interested in local history and antiquities, and on these subjects he was a frequent contributor to magazines and newspapers." (J. C. S.)

**Tympanum**, the triangular space between the horizontal and sloping cornices on the front of a pediment in classical architecture; it is often left plain, but is sometimes covered with sculpture. This name is also given to the space immediately above the opening of a doorway, etc., in mediæval architecture, when the top of the opening is square and has an arch over it; this arrangement is not uncommon in England in Norman work, and on the Continent is to be found in each of the styles. Tympanums of this kind are occasionally perfectly plain, but are generally ornamented with carving or sculpture. In Continental work the subjects are usually arranged in tiers one above another, and often embrace a great number of figures. Also when an arch is surmounted by a gable-moulding or triangular hood-

Tympanum of Doorway, Essendine, Rutlandshire, cir. 1130.

mould, the space included between the arch and the mould is termed the *tympanum* of the gable.—Parker, *Gloss. of Architect.* s. v.

**Tympe**, JOHANN GOTTFRIED, professor of theology and Oriental languages at Jena, was born in 1699 at Biederitz, near Magdeburg, and died June 28, 1768. He wrote, *Forma Verborum Perfectorum Hebraicorum, Chaldaicorum, Syriacorum atque Arabicorum Communis et Harmonica in Tabulis Compendio Exhibita et Descripta* (Jena, 1728-32):—*Progr. quo Indistinctam Antiquorum Ebraeorum Scripturam esse recens Commentum Morinianum, Certitudinis Divinarum Litterarum longe Perniciosissimum Ostendit* (ibid. 1730):—*Tabule Universae Accentuationis Hebr.-Chald. tum Pros. tum Metr.* (ibid. 1740):—*Geneseos Prima quinque Capita et Partem Secti Hebraice et Singularum Vocum Rationem Grammaticam Secundum Principio Danziano exposuit. in Usus Auditorum* (ibid. 1727):—*De Cultu Divino ad Stata Loca Restricto*, etc. (ibid. 1728):—*Schediasma, quo Iterandae Editiones Concordantiarum Ebraeo-Chaldaicarum Chr. Noldii Novanque Conc. Pronominum*, etc. (ibid. eod.):—*Forma Arabicorum Verborum Perfectorum Descripta* (ibid. eod.):—*Diss. I et II de Descensu Nubis Glorae in Sanctuarium ante Consecrationem Auronis Facto, adversus Talmudistas et Veteres Ebraeorum Commentatores* (ibid. 1731-33), etc. See Fitst, *Bibl. Hebr.* iii, 456; Winer, *Handb. der theol. Lit.* i, 115, 121; Steinschneider, *Bibliog. Handb.* p. 141. (B. P.)

**Tyndale** (or **Tindal**), WILLIAM, the Bible translator and martyr, was born in the hundred of Berkeley, either at Stinchcomb or North Nibley, Gloucestershire, about the year 1484 (or 1477). At an early period he was sent to Oxford, where he took his degree, and also gave instructions in Magdalen Hall. But he left Oxford for Cambridge, where it is believed that he took a degree. In 1502 he obtained priest's orders, and in 1508 entered the monastery at Greenwich as a friar. He seems to have already formed the design, or even to have actually begun the work, of translating the New Test., and had probably imbibed some of the notions which were beginning to be circulated in favor of reforming the Church. In 1522 (or 1520) Tyndale is next found as tutor in the house of Sir John Welch, of Little Sodbury, not far from Bristol, where he preached in the villages and towns on the Sabbath, and often disputed with neighboring abbots and other Romish ecclesiastics. Here, too, he translated the *Enchiridion Militis* of Erasmus, as a present to his host and his lady. His free opinions and discussions soon got him into troublesome examinations before the popish dignitaries, but no penalty was inflicted on him. He took the hint, however, left the county, and went to London, his mind being now fully occupied with the idea of translating the Scriptures. He soon found, as he himself quaintly says, "that there was no room in my lord of London's palace to translate the New Test.; nay, no place to do it in all England." In London he sometimes preached at St. Dunstan's-in-the-West, while alderman Humphrey Monmouth took him under his protection, and gave him an annuity of ten pounds a year to enable him to live abroad, for which ten pounds

he was in return to pray for the souls of the alderman's father and mother. Tyndale, leaving England went first to Hamburg. It is often said that from Hamburg he proceeded to Wittenberg, where he met Luther, who had now thrown off the last vestige of popish thralldom, and that there he completed his translation of the New Test. The statement is apparently not correct, for during 1524 he seems to have remained at Hamburg, and in 1525 he appears to have been first at Cologne and then at Worms. At Cologne Tyndale seems to have commenced to print his first edition in 4to, but after ten sheets were printed the work was interrupted, and the

translator and his coadjutors betook themselves to the Lutheran city of Worms, where the quarto was finished, and an octavo edition also issued from the press (1525). The prologue to the quarto has been republished under the name of *A Pathway to the Scriptures*. The translator's name was attached to neither of the two editions, and he assigns a reason for this omission in his *Wicked Mammon*, published in 1527. Copies of these versions early found their way into England. In 1526 Tunstall, bishop of London, fulminated his prohibition of them, and two years afterwards a number of copies were collected, nay, some were purchased by the bishop in Antwerp, and burned at St. Paul's Cross. Warham and Wolsey were also dreadfully enraged, and Sir Thomas More was employed to denounce Tyndale, but his genius was foiled in the attempt, and Tyndale won a victory over the learned chancellor. Of the first edition only a fragment now exists, and of the second only two copies, one of them imperfect. Two editions were afterwards printed at Antwerp, and found their way to England in vessels laden with grain. Endeavors were made to seize Tyndale and punish all who had assisted him, but he removed to Marburg, in Hesse, in 1528, and published there a book of great value—*The Obedience of a Christian Man*. The result of all the English opposition was that, as Fox expresses it, "copies of the New Test. came thick and threefold into England." We find Tyndale again at Antwerp in 1529, during which year a fifth edition was printed; the four books of Moses were also translated, printed each at a separate press, and put into circulation. The enemies of the translator endeavored to decoy him into England, but he was too wary to be so easily entrapped, for he well knew what displeasure Henry VIII felt at his tract called *The Practice of Prelates*, and what penalty the royal indignation would speedily inflict. After the martyrdom of Frith, Tyndale set himself to revise and correct the version of the New Test., and it was soon thrown off, with this remark in the preface, "Which I have looked over again with all diligence, and compared with the Greek, and have wedded out of it many fautes." But his enemies in England, whose power had been shaken by the copious circulation of the English New Test., were the more enraged against him, and conspired to seize him on the Continent, in the name of the emperor. An Englishman named Philips betrayed him, and, acting under such information, the authorities at Brussels seized him, in the house of Pointz, his friend, and conveyed him to Vilvoorden, twenty-three miles from Antwerp. Pointz, who had with difficulty escaped himself, made every effort for him, but in vain. The neighboring University of Louvain thirsted for his blood. Tyndale was speedily condemned, and on Friday, Oct. 6, 1536, in virtue of a recent Augsburg decree, he was led out to the scene of execution. On being fastened to the stake, he cried, in loud and earnest prayer, "Lord, open the eyes of the king of England," and then was first strangled and afterwards burned. The merits of Tyndale must ever be recognised and honored by all who enjoy the English Bible—for their authorized version of the New Test. has his for its basis. He made good his early boast that ploughboys should have the

Word of God. His friends all speak of his great simplicity of heart, and commend his abstemious habits, his zeal, and his industry; while even the imperial procurator who prosecuted him styles him *homo doctus, pius, et bonus*. The works of Tyndale and Frith were collected and published (Lond. 1831, 3 vols. 8vo). For information respecting Tyndale, his writings, and editions of his translations of the Testament, Pentateuch, etc., see Bliss's *Wood, Athen. Oxon.* i, 94; Fox, *Acts and Mon.*; *Biog. Brit.*; Walter and Offor, *Life of Tyndale*; Wordsworth, *Eccles. Biog.*; Newcome, *English Bible Translations*; Johnson, *Hist. of English Translations of the Bible*; Lewis, *Hist. of Translations of the Bible into English*; Cotton, *List of Editions of the Bible in English*; Anderson, *Annals of the English Bible*; Horne, *Introd. to Study of the Bible*; *Historical Account of English Versions of Scripture*; Watt, *Bibl. **Tyndareus**, in Greek mythology, was the husband of the renowned Leda, and was king in Sparta, from which he was driven with his brother Icarus. Hercules placed the fleeing brothers again in possession of their kingdoms. Pausanias saw his grave in Lacedæmonia before the temple of Jupiter Cosmetes (iii, 17, 4).

**Tyndarides**, in Greek mythology, was a surname of the *Dioscuri*.

**Tyndaris**, in Greek mythology, was a surname of Helen.

**Tyng**, DUDLEY A., a clergyman of the Protestant Episcopal Church, was born in Prince George County, Md., in 1825. He graduated at the University of Pennsylvania in 1843; studied at the Alexandria (Va.) Theological Seminary; became deacon in 1846 and priest in 1849; was first settled as a clergyman in Columbus, O., and afterwards was rector of Christ Church, Cincinnati; in 1854 was pastor of the Church of the Epiphany, Philadelphia, where he remained one year, resigning and organizing a new parish called the Church of the Covenant, of which he was minister at the time of his death, which occurred at Brookfield, near Philadelphia, April 19, 1858. See *American Quar. Church Rev.* 1858, p. 344.

**Type**. I. *Name*.—The Greek word *τύπος*, from which our *type* is derived, denotes primarily a *blow*, then the *mark left by a blow*, then a *mark or print of any kind*, then a *figure or image*, and finally a *mould or model*, whether that be viewed as the original from which something else has taken its form, or as indicating the form which something not yet existing may assume. In the New Test. the word occurs in several of these senses, and in some passages with a shade of meaning peculiar to itself. In John xx, 25 it is used to denote the mark which the nails made in our Lord's hands and feet; in Acts vii, 43 it means a copy or image; in ver. 44 and Heb. viii, 5 it signifies a model after which something is made; in Rom. vi, 17 it denotes a mould from which a form is derived; in ver. 14 it conveys the idea of one person presenting some analogy to another person; and in several places it means an example which others may follow (1 Cor. x, 6, 11; Phil. iii, 17; 1 Thess. i, 7; 2 Thess. iii, 9, etc.).

As used by theologians, the word *type* has received a special technical meaning not exactly equivalent to any of these usages, though approaching to that of Rom. v, 14, where Adam is said to be the type of Christ. They mean by it any object, whether office, institution, person, or action, by means of which some truth connected with Christianity was prefiguratively foretold under preceding dispensations. Such an object the apostles call a *σκιά*, a shadow or adumbration of that which it indicated (comp. Heb. x, 1; Col. ii, 17). This shadow became a type because it presented the model or representation of something yet future. Some-

times, also, the term *παράβολή* is used with a similar meaning (Heb. ix, 9; xi, 19).

II. *Fundamental Principles*.—There are certain notions which must be assumed as lying at the basis of typology.

1. Spiritual truths, ideas, thoughts, may be represented by material symbols, whether actions, institutions, or objects. This the usage of all nations establishes. More especially was this a favorite method of communicating thought among the imaginative Orientals; in general, it is found to prevail most in the earlier stages of a people's history, while as yet the use of objects that appeal to the senses is more effective than the use of written documents. In Scripture, frequent instances occur of such symbolical methods of conveying ideas; as, for instance, the placing of the hand under the thigh for confirmation of an oath; the boring of the ear of the servant who declined to avail himself of the liberty brought by the year of jubilee; the rending; of the garments in token of grief; and such acts as those of Abijah when, in announcing to Jeroboam the secession of the ten tribes from the house of Solomon, he tore his garment into twelve pieces and gave to Jeroboam ten (1 Kings ix, 29); that of Elisha when he indicated to the king of Israel the victories which by divine help he should obtain over the Syrians by commanding him to shoot an arrow from the window eastward after he had placed his hand on the king's hand (2 Kings xiii, 14-19); and those of Jeremiah and Ezekiel when they were signs to the people (Jer. xix, 1-11; Ezek. xii, 3-16).

2. Such symbolical representations may be employed to convey religious truth. This usage we find also to have prevailed among all nations, especially in the earlier stages of their history. Among the Jews it was abundantly used; not, however, according to human caprice or ingenuity, but always in obedience to the express ordinance of God. The symbolical observances of an earlier age introduced into the service of God, it may be presumed, were also of divine appointment, on the general principle that, as God alone can declare what worship he will receive, it is only as he appoints that any service can be properly offered to him.

3. The true religion has in all ages been essentially the same, so that the truths symbolized by the institutions of the earlier dispensations are identical with those more directly and fully made known to us under the Christian dispensation. The substantial identity of the patriarchal and Mosaic religions with the Christian must be assumed in all attempts to argue from the Old Test. to the New, or *vice versa*, and will not be denied by any who receive these books as divine. From this it necessarily follows that what was taught by *symbol* under the ancient economies as part of religious truth will be found identical with what is taught in *words* under the new dispensation.

4. The religion of Jesus Christ is one resting on the facts of his personal appearance and work. Out of these all its truths flow directly or indirectly; and to these they all have respect. Hence the truths taught symbolically to the Old-Test. saints, being identical with those of Christianity, must also rest on, and have respect to, these facts.

5. A twofold character was thus of necessity given to the religious institutions of the ancient economies. They were primarily symbolical of religious truth. They were secondarily predictive of facts in the future on which these truths rested.

III. *Nature of Types*.—Proceeding on these data, we may attempt to construct a typology, the design of which shall be to show what are the types in the Old Test. and the correspondence between them and their antitypes in the New Test. The most important step towards this is to determine from the preceding data what is the proper idea of a type. This we would express as follows: A type is an institute or act appointed by God to symbolize a religious truth, and to prefigure

by means of analogy or resemblance those facts in the mediatorial work of Christ on which these truths rest. This definition involves the following elements:

1. A type is an *institute* or *act*. We use these terms in a wide sense, understanding under the former not only formal organizations and religious offices, but times, places, implements of religious service; and under the latter not only rites and ceremonies, but special acts or series of acts determined by the proper criterion to be typical. By this definition, however, *persons* and *things* simply as such are excluded. A person *per se*, or a thing simply as such, cannot possess a symbolical character; and cannot be the *σικιά*, or prefigurative sign, of another person or thing, much less of a fact or series of facts. A person may sustain a typical office or may perform a typical act, and a thing may be used in a typical service or ceremony, but in and by itself it cannot be a type. This sets aside a whole host of types which the ingenuity of interpreters has constructed out of the historical personages of the Old Test. That many of these sustained typical offices and performed typical acts is admitted; but that they were in themselves—in their proper individual personality—types of our Lord, we cannot believe. The assertion, indeed, is to us unintelligible except in a sense which would be profane and untrue—viz. that their personal character and conduct were a representation of the character and conduct of our blessed Lord. It is true that for this doctrine of personal types the authority of the New Test. has been pleaded. But we are unable to find a solitary instance in the New Test. of any historical character mentioned in the Old Test. being brought forward as having been personally a *σικιά* of Christ or his work. In one passage, indeed, Adam is called a *τύπος* of Christ, but *τύπος* is not there equivalent to *σικιά*; and, even if it were, it would not follow that it was Adam as a *person* who was the type of Christ, for the apostle is speaking throughout that context of our first parent in his official, federal, or representative character. The words of Peter also (1 Pet. iii, 21) have been cited as showing that a simple historical occurrence may be the type of a Christian truth; but, whatever the apostle may mean in that passage by calling salvation by baptism the *ἀντίτυπον* of Noah's salvation by the ark, he certainly cannot mean that the latter was a divinely appointed prefiguration of the former. The utmost that can be drawn from his words is that an analogy subsists between the two, whereby the one is fitted to illustrate the other. The strongest case in favor of the opinion we are opposing is our Lord's representation of himself as the true bread of which the manna was the prefiguration. We cannot understand this as intimating less than that the manna was a type of him. Still it was the manna, not as a natural phenomenon, but as a special and peculiar provision made by God for the feeding of the people, that was the type of Christ; and in this divine appointment we find what reduces this under the head of proper types.

2. A type is an institute or act *appointed by God*, and by him adapted to the end it is designed to serve. Knowing what in due time was to be exhibited to men by the mission and work of his Son, God could not only predict it in words, but also give by means of symbolical acts and institutes such representation of it as would, in some measure at least, bring before the minds of the ancient saints a lively idea of it. As God alone could do this, it is on his appointment that the whole must rest. "To constitute one thing the type of another, as the term is generally understood in reference to Scripture, something more is needed than mere resemblance. The former must not only resemble the latter, but must have been *designed* to resemble the latter. It must have been so designed in its original institution. It must have been designed as something *preparatory* to the latter. The type as well as the antitype must have been preordained; and they must

have been preordained as constituent parts of the same general scheme of Divine Providence. It is this *previous design* and this preordained connection which constitute the relation of type and antitype" (Marsh, *Lectures on Criticism and Interpretation*, p. 374). By the earlier typologists this condition was neglected, and resemblance was made the sole criterion of the relation between an event or person of the Old Test. and a fact or doctrine of the New Test. as type and antitype. A once popular book written on this plan is that of M'Ewen, *On the Types and Figures of the Old Test.* But the principle has been carried out to the wildest extent in a work entitled *The Typical Testimony to the Messiah*, by Micaiah Hill (Lond. 1862).

3. Each act or institute designed by God to serve as typical possessed a *symbolical* as well as a *predictive* character. This follows from the position that a type is a sensible emblem or prefigurative token of some spiritual truth, which itself rests upon certain events yet future, but of which events a certain degree of knowledge is possessed by those to whom the type is exhibited. In all such cases a twofold impression is conveyed to the mind: in the first place, that a particular truth already known is symbolically indicated; and, in the second place, that those events on which that truth depends shall certainly take place. In the testimony of God concerning his Son there are two points—one of fact, and one of doctrine—on both of which we must be instructed before we can really believe that testimony in all its fullness. What God calls us in the Bible to believe is, first, "the truth;" and, secondly, that "truth as it is in Christ Jesus." With regard, for instance, to the doctrine of salvation by the atonement, there is, first, the general principle that such a mode of salvation is reasonable, practicable, and intended by God; and, secondly, the matter of fact that such an atonement has really been presented by our Lord Jesus Christ and accepted by the Sovereign and Judge of all. Now it was, of course, the same under the Old-Test. dispensation: there were both the doctrine to be announced and the fact to be predicted before a complete statement of saving truth could be laid before the mind; and it was only as both of these were apprehended that the belief of a Jew in the truth became full and intelligent. Hence every type contained at once a symbol of the truth and a prediction of the fact. It presented to the senses of the beholder an outward sign of a great general truth, and a memorial that in due season the event on which that truth rested would take place. Thus, for instance, in the case of sacrifice, there were both a symbol and a prediction. The slaying of the animal and the burning of its flesh were emblems of the great truth that the sinner whose substitute that animal had become deserved death and subsequent agony, as well as of the general truth that God's plan of saving men from that desert was by the substitutionary sufferings of another. All this, however, would have been of no avail to the sin-burdened Israelite, who knew well that no mere animal could make atonement for the sins of man, had not that act prefigured and predicted the great sacrifice for sin on the part of the Lamb of God. But, pointed forward to this, his faith obtained an object upon which to rest, and he was enabled to rejoice in the salvation of God. So, also, with regard to the immediate consequences of sacrifice. When a Jew had committed a trespass against the Mosaic law, he had to offer certain sacrifices before he could enjoy his civil and political rights. Immediately, however, on presenting these, he stood *rectus in curia*; he was acquitted of the sin he had committed, and restored to his civil privileges. With this a mere carnal and worldly Jew was content. But to the pious believer all this was only the symbol and type of something spiritual. It reminded him that his sins against God had made him guilty and excluded him from the divine favor; it directed him to the need of a sacrifice for sin ere God would forgive his transgression; and it

assured him that, just as by sacrifice he had been restored to his place in the Jewish State, so by the great sacrifice he might be restored to the divine favor, and to a place in that spiritual kingdom of which the Jewish nation was the type.

4. Though *resemblance* to that which it is designed to prefigure does not constitute the only, or even the primary, condition of a type, it is obvious that this must form a very important element in the adaptation of the type to serve its designed end. Hence we may expect to find some obvious analogy not only between the symbol and that which it symbolizes, but also between the divinely appointed act or institute and that which it was designed to prefigure.

On the other hand, as there must be a similarity or analogy between the type and the antitype, so there is also a *disparity* or dissimilitude between them. It is not in the nature of type and antitype that they should agree in all things; else, instead of similitude, there would be *identity*. Hence the apostle, while making Adam a type of Christ, yet shows how infinitely the latter excelled the former (1 Cor. xv, 47). So the priests of old were types of Christ, though he infinitely excelled them both as to his own person and as to the character of his priesthood (see Heb. vii, viii, ix, x). Chrysostom observes (*Hom. 61, in Gen.*) that there must be more in the type than in the antitype. Hence the distinction must be observed between *total* and *partial* types. This distinction Ecumenius also draws in commenting on Heb. vii, p. 829. He says: 'Ο τύπος οὐ κατὰ πάντα ἴσος ἐστὶ τῇ ἀληθείᾳ (ἐπεὶ καὶ αὐτὸς ἀλήθεια εὐρίσκειται, καὶ παντότης μᾶλλον, ἢ τύπος), ἀλλ' εἰκόνας ἔχει τινὰς καὶ ὑπόμματα—"A type does not express that which it represents in every minute particular, for then, instead of similitude, there would be identity, but it contains certain outlines and assimilations of the antitype." Cyril of Alexandria, in *Amos* vi, p. 815, also observes on this subject: 'Ο τύπος οὐκ ἀλήθεια, μύρρωσιν δὲ μᾶλλον τῆς ἀληθείας εἰσέρει—"A type is not the very truth itself, but its representation."

IV. *Relation to other Modes of Teaching.*—Having thus indicated the nature of a type, we would now point out the relation of this mode of teaching divine truth to other modes employed in Scripture more or less akin to it.

1. *Relation to Prophecy.*—Type stands related to prophecy as its parallel. Like it, it teaches a present truth, and announces a future fulfilment of it; like it, also, it has in its capacity of a type one definite meaning and one definite fulfilment, to both of which it was intended and designed to point. The difference between a prophecy and a type lies only in this, that the former teaches by words, the latter by things; the former, that is, by an artificial combination of signs, the latter by a scenical representation of the whole truth at once. A word is the symbol of an idea; a type is the symbol of some principle or law, and the prediction of some great general fact in the economy of redemption. See PROPHECY.

2. *Relation to Parable.*—From the word *παράβολη* being used to designate a type, it may be inferred that the connection between the two is intimate. A type, in fact, may be viewed as a sort of *acted parable*. Let us suppose, for instance, that our Lord, instead of describing in words the conduct and circumstances of the prodigal son, had, by the help of suitable actors and scenes, made the whole to pass before the eyes and ears of his auditors, the lesson would have been conveyed to them much in the same way as the truth concerning himself was conveyed to the ancient Jews by the typical rites of the Mosaic economy. In neither case is the lesson *new*, nor fully to be understood without an elucidatory comment; the object of both being to impress vividly a truth, otherwise reasonable or familiar, upon the minds of those to whom it is presented. There is this difference, however, between such a representation

and a type—that the former, being merely doctrinal, would be exhausted in inculcating a present truth, while the latter would, with the doctrine, incorporate a prophetic reference to some great event yet to happen on which the doctrine was based. See PARABLE.

3. *Relation to Comparison.*—The New-Test. teachers occasionally, for the sake of illustrating their meaning, introduce a comparison, drawn from some well-known fact in the history of the Jewish people, between which and the point they are discussing there exists some obvious analogy. In this way our Lord makes use of the fact of Moses' erecting the brazen serpent in the wilderness for the purpose of illustrating his own character as a deliverer, who was to be "lifted up, that whosoever believeth in him should not perish, but have everlasting life" (John iii, 14, 15). On another occasion he instituted a comparison between his own case, as about to be consigned for a season to the tomb, and that of Jonah, who had been "three days and three nights in the belly of the fish" (Matt. xii, 40). From this it has been hastily concluded that these events, and others alluded to in the New Test. in a similar manner, were real types and prefigurations of the facts they are brought to illustrate. It is obvious, however, that there is a great difference between a historical event—whether occurring in the natural course of things, or by the special interposition of the divine power, and which a subsequent writer or speaker may make use of to illustrate, by comparison, some fact or doctrine of which he is treating—and a symbolic institute expressly appointed by God to prefigure, to those among whom it was set up, certain great transactions in connection with that plan of redemption which, in the fulness of time, he was to unfold to mankind. In the two cases above referred to there is the absence of any express evidence that the events recorded possess any other than a simple historical character. In the case of the brazen serpent, indeed, we have divine appointment; but along with the appointment we have the specific mention of the purpose for which it was set up, which was not to teach any religious truths at all, or to form any part of religious worship, but simply that it might act as an instrument of cure to the Israelites who were bitten by the fiery flying serpents. See BRAZEN SERPENT. Yet even in this case it is clear from the whole tenor of the narrative that the act was significant of more than a mere physical remedy; and our Lord's reference to the event confirms its higher import. It is also possible that such a thing as the brazen serpent *might* possess a symbolical character; but if any will from this argue that it really had such a character, and that it was a symbol of Christ, it will be incumbent upon him, in the first place, to show some evidence in favor of his inference, and, in the next, to explain how it should come to pass that the express symbolical antithesis of the Messiah, the *serpent*, could form part of an institute intended to prefigure his work as the Saviour of men. As to the case of Jonah, we do not find in it so much as the appearance of anything typical; and, indeed, it would have been very strange had God caused the prophet to perform an action typical of the burial and resurrection of Christ, under circumstances in which there was no human being to receive any instruction by it except himself. A type is an acted lesson—a visible representation of invisible truths. To its utility, therefore, spectators are as indispensable as actors; and where the former are not present, to say that God appoints the latter to go through their performance is to charge him with doing something in vain. See SIMILITUDE.

4. *Relation to Allegory.*—"An allegory," says bishop Marsh, "according to its original and proper meaning, denotes a representation of one thing which is intended to excite the representation of another thing." Adopting this as a just explanation, it is obvious that type and allegory are closely allied. In both there is an original representation which has a meaning of its own, and there is the use of that for the purpose of calling up

to the mind the conception of another thing analogous to the former. The two, however, are very distinct. They differ in two respects: the one is that the subject of an allegory is a mere historical event occurring in the ordinary course of things, whereas a type is an act or institute expressly appointed by God to teach some important truth; the other is, that the allegorical sense is a fictitious meaning put upon a narrative for the sake of illustrating something else, whereas the explanation of a type is its true and only meaning, and is adduced solely for the sake of unfolding that meaning. Thus Paul, in order to explain the doctrine of the covenants, allegorizes the anecdote of Sarai and Hagar recorded by Moses, making Sarai represent the Abrahamic or new or everlasting covenant, and Hagar the Sinaitic or old covenant (Gal. iv, 24, 25). In the same way he allegorizes the fact of the water from the rock following the Israelites through the wilderness, speaking of it as representing Christ in the blessings he confers upon his church (1 Cor. x, 4). These allegorizings (*ἀλληγορούμενα*) are only comparisons without the form; and their use is obviously merely to explain one thing by another. The radical difference between the exposition of a type and an allegorical interpretation of history, is apparent from the use which the apostle makes of them respectively. His allegorizings are mere illustrations on which, by themselves, nothing is built; whereas his typical explanations are all brought forward as forming the basis of arguments addressed to those who, admitting the type, were thereby pledged to the admission of the truths it embodied. See ALLEGORY.

V. *Interpretation of Types*.—As a general rule it may be laid down that we should always expect to find in the antitype something higher and more glorious than in the type (Chrysost. in *Genes. Hom.* 35: *μη πάντα ἀπαιτεῖ ἐν τῷ τύπῳ· οὐδὲ γὰρ ἂν εἴη τύπος εἰ μέλλοι πάντα ἔχειν ἀνὰ τῇ ἀληθείᾳ συμβαινόντα*). This follows from the nature of the case. For if the design of a type be by outward symbols to foreshadow spiritual truths, it follows that, in proportion as the thing signified is more valuable than the mere sign, and as things spiritual and eternal are more glorious than things material and transitory, the type must be inferior in value and in majesty to that which it is designed to prefigure.

More specific rules having reference especially to the Mosaic ritual are—1. The symbolical ritual, as a whole and in its individual parts, can set forth only such ideas and truths as accord with the known, and elsewhere clearly announced, principles of Old-Test. theology. 2. An accurate knowledge of the outward constitution of each symbol is an indispensable condition of its interpretation; for, as the sole object of the symbol is to convey spiritual truth by sensible representations, to attempt to discover the former before we understand the latter is to endeavor to reach an end without using the means. 3. The first step in the interpretation of a symbol is the explanation of its *name*; for, as this is generally given with a direct reference to the idea symbolized, it forms of itself a sort of exponent of the symbol to which it is affixed. 4. Each symbol expresses, in general, only *one* grand idea; at the same time, of course, including all subordinate ideas that may be involved in it. Thus, in the case of sacrifices, a variety of truths are presented to the mind, but all going to make up the one grand truth which that rite symbolized. 5. Each symbol has always the same fundamental meaning, however different may be the objects with which it is combined. Thus, for instance, the act of purification has the same symbolical meaning, whether it is performed upon a person or an animal, or upon a material object. 6. In interpreting a symbol, we must throw out of view all that is merely necessitated by the laws of its physical condition, and that does not serve to help out the symbolical representation. Symbols have often accessories of two kinds: the one consisting of such as are in themselves symbolical, and which go to make up the sum total of the representation; the other, of such as are,

from the nature of things, required by the material objects composing the symbol for their continued existence. Thus, in the case of the candlestick in the sanctuary, it was provided that it should have branches and knobs and flowers, and also that it should be supplied with snuffers and snuff-dishes. Now, of those accessories the former were not indispensable to its serving the purpose for which it was designed—that of giving light; but they, having each a symbolical meaning, added to the symbolical effect of the whole; whereas the latter were merely required in order to prevent the lights from dying out for want of cleansing. Keeping this distinction in view, we need not be afraid of going too minutely into the explanation of the Mosaic ritual. Everything, in fact, of which it was composed was a symbol, with the single exception of such things as the earthly, physical condition of the substance or persons employed rendered indispensable. Nay, even these, from belonging to a typical institute, such as the nation of Israel was, acquired a sort of secondary typical character; just as the ordinary events of Israelitish history have for the same reason a spiritually doctrinal character. See SYMBOL.

VI. *Examples of Types*.—In tracing out *who* and *what* typified or shadowed forth Christ and his salvation under the antediluvian, patriarchal, and Mosaic dispensations, we must be careful not to substitute the suggestions of our own imaginations for the intimations of Scripture. We must endeavor to learn the mind of God as to what actually constitutes a type, either by the express declarations of Scripture, or by the obvious analogy which subsists between things under the Gospel and its antecedent dispensations. Thus guarding ourselves, we may notice the various types by which God was pleased, at all times, in a sense, to preach the Gospel to mankind.

1. Among *individual persons*, before the law, Adam, Enoch, Noah, Melchizedek, Abraham, Isaac, and Joseph were eminently typical of Christ, but only in certain relations. Again, under the law, Moses, Joshua, Samson, David, Solomon, Elijah, Elisha, Jonah, Zerubbabel, and Joshua the high-priest were, in many points, singularly types of Christ.

2. The first-born, the Nazarites, prophets, priests, and kings were *typical orders of persons*.

3. Under the head of *things typical* may be noticed: Jacob's ladder, the burning bush, the pillar of cloud and fire; and, in the opinion of some, the manna, the rock, and the brazen serpent.

4. *Actions typical* were: the deliverance out of Egypt, the passage of the Red Sea, the sojourn in the wilderness, the passage over the Jordan, the entrance into Canaan, and the restoration from Babylon.

5. *Rites typical* were: circumcision, various sacrifices, and sundry purifications.

6. *Places typical* were: the land of Canaan, the cities of refuge, the tabernacle, and the temple.

The above types were designed to shadow forth Christ and the blessings of his salvation; but there were others also which pointed at our miseries without him. There were ceremonial uncleannesses: the *leprosy*, for instance, was a type of our natural pollution.

See Michaelis, *Entwurf der typischen Gottesgelahrtheit* (Gött. 1763); Keach, *Tropologia*, p. 225-237; Suicer, *Thesaur.* ii, 1337; Mather, *Types of the Old Test.* (Lond. 1705); Bähr, *Symbolik des mosaischen Cultus* (Heidelb. 1837, 2 vols.); Chevallier, *Hulsean Lecture* for 1826; Fairbairn, *The Typology of Scripture* (Edinb. 1854, 2 vols.); and other works cited by Darling, *Cyclop. Bibliog.* col. 1803 sq., and by Malcom, *Theol. Index*, s. v. See MESSIAH.

**Typhoeus** = TYPHON (q. v.).

**Typhon** (*Typhos*, *Typhoem*, *Typhoeus*, and *Typhaton*), in Greek mythology, was a monster of remote antiquity, at one time thought to have been a destructive gale of wind, at another time represented as a giant of

the earth, ejecting volcanic flames. Homer places him in the country of Arim, buried in the earth, which Jupiter strikes with lightning. Hesiod represents Typhaon and Typhoeus as two different and distinct beings. Typhaon is the son of Typhoeus, a mighty wind, who with Echidna begets the dog Orthrus, Cerberus, the Lernean hydra, and Chimæra. Typhoeus is the youngest son of Tartarus and Gæa, with one hundred dragon-heads, frightfully sparkling eyes, and hideous voice. He attempted to gain sovereignty over gods and men, but Jupiter bound him with lightning, and he now lies under Ætna. In Egyptian mythology Typhon is the Greek name for the evil spirit represented by the dog-star, originally the influence that brought to Egypt the blessing of a yearly overflow of the banks of the river Nile, without which the country could not flourish. When the worship of Isis and Osiris came into practice, the dog-star was designed to be the destroyer of the life of nature by heat, and now Typhon became an evil god, whose names and titles upon monuments were destroyed, because he was believed to be the enemy and persecutor of Osiris (q. v.). Typhon owned Nephthys as his wife, who by him gave birth to Anubis. His real Egyptian name is stated differently as *Set* or *Sutekh*.

**Typhrestus**, in Greek mythology, was the son of Sperchius, after whom a city in the Trachinian province was named.

**Typicum** (Gr. *τύπικον*), a Greek term for (1) a book of rubrics; (2) a selection from the Psalter; (3) a Sunday service in the Oriental Church.

**Tyr**, in Norse mythology, is one of the supreme deities of Northern antiquity, a son of Ódin and Frigga, and brother of Thor. As the god of boldness, wisdom, and strength, he was implored by the Heliandians as well as by the Skaldians for his favor, and was worshipped with Thor and Odin. At the end of the world he will combat with the hell-dog Garm, and each will kill the other. Several antiquarians are inclined to identify him with Tuiscon.

**Tyrannus** (*Τύραννος*, *sovereign*), the name of a man in whose school or place of audience Paul taught the Gospel for two years, during his sojourn at Ephesus (see Acts xix, 9). A. D. 52, 53. The halls or rooms of the philosophers were called *σχολαί* among the later Greeks (Liddell and Scott, *s. v.*); and as Luke applies that term to the *auditorium* in this instance, the presumption is that Tyrannus himself was a Greek, and a public teacher of philosophy or rhetoric. He and Paul must have occupied the room at different hours; whether he hired it out to the Christians or gave them the use of it (in either case he must have been friendly to them) is left uncertain. Meyer is disposed to consider that Tyrannus was a Jewish rabbi, and the owner of a private synagogue or house for teaching (*בית מדרש*). But, in the first place, his Greek name, and the fact that he is not mentioned as a Jew or proselyte, disagree with that supposition; and, in the second place, as Paul repaired to this man's school after having been compelled to leave the Jewish synagogue (Acts xix, 9), it is evident that he took this course as a means of gaining access to the heathen; an object which he would naturally seek through the co-operation of one of their own number, and not by associating himself with a Jew or a Gentile adherent of the Jewish faith. In speaking of him merely as a certain Tyrannus (*Τυράννου τινός*), Luke indicates certainly that he was not a believer at first; though it is natural enough to think that he may have become such as the result of his acquaintance with the apostle. Hensen (*Der Apostel Paulus*, p. 218) throws out the idea that the hall may have belonged to the authorities of the city, and have derived its name from the original proprietor. See Seelen, *De*

*Schola Tyranni*, in his *Meditt. Ezeg.* ii, 615 sq.; Wallen, *Acta Pauli Ephesin.* (Gryph. 1783). See PAUL.

**Tyrannus**, in Greek mythology, was one of the Pterelaidæ, who were slain in the contest against the sons of Electryon.

**Tyrbenus**, in Greek mythology, was a surname of Apollo.

**Tyre** (Heb. *Tsôr*, צֹר [or צִיר, 1 Kings v, 1; Psa. lxxxiii, 7; lxxxvii, 4; Ezek. xxvi, 15; xxvii, 3, 8, 32; xxviii, 12; Hos. ix, 13; Zech. ix, 3; the form likewise found in inscriptions, Gesenius, *Monum. Phœn.* p. 261]; Sept., New Test., Josephus, and other writers, *Τύρος*; A. V. "Tyrus" [q. v.] in Jer., Ezek. [usually], and the minor prophets [except Joel]; see also TYRIAN), a celebrated commercial city of antiquity (Josh. xix, 29; 2 Sam. xxiv, 7; Isa. xxiii, 1; Ezek. xxvi, 15; xxvii, 2, etc.), situated in Phœnicia, on the eastern coast of the Mediterranean Sea, in latitude 33° 17' N. (Smythe, *Mediterranean*, p. 469). Although not the oldest, it was the greatest of the Punic cities, both in size and power. See PHœNICIA.

I. *The Name*.—Its Hebrew name, *Tsôr*, signifies a rock, which well agrees with the site of *Sûr*, the modern town on a rocky peninsula, formerly an island. From the word "Tsôr" were derived two names of the city, in which the first letters differed from each other, though both had a feature of their common parent: 1st, the Aramaic word *Tura* (טִירָא), whence the Greek word *Tyros*, probably pronounced *Tyros*, which finally prevailed in Latin, and, with slight changes, in the modern languages of the West; and, 2d, *Sara*, or *Sarra*, which occurs in Plautus (*Truc.* ii, 6, 58, "purpuram ex Sara tibi attuli"), and which is familiar to scholars through the well-known line of Virgil, "Ut gemma bibat, et Sarrauo dormiat ostro" (*Georg.* ii, 506; comp. Aul. Gell. xiv, 6; Silius Italicus, xv, 203; Juvenal, x, 30). According to a passage of Probus (ad Virg. *Georg.* ii, 115), as quoted by Grote (*Hist. of Greece*, iii, 353), the form "Sara" would seem to have occurred in one of the Greek epics now lost, which passed under the name of Homer. Certainly this form accords best with the modern Arabic name of *Sûr*.

II. *Ancient Relations*.—1. *Old Tyre*.—There is no doubt that, previous to the siege of the city by Alexander the Great, Tyre was situated on an island; but, according to the tradition of the inhabitants, if we may believe Justin (xi, 10), there was a city on the mainland before there was a city on the island; and the tradition receives some color from the name of Palætyrus, or Old Tyre, which was borne in Greek times by a city on the continent, thirty stadia to the south (Strabo xii, 11, 24). But a difficulty arises in supposing that Palætyrus was built before Tyre, as the word Tyre evidently means "a rock," and few persons who have

Ancient Insular Tyre.

visited the site of Palætyrus can seriously suppose that any rock on the surface there can have given rise to the name. To escape this difficulty, Hengstenberg makes the suggestion that Palætyrus meant Tyre that formerly existed, "quæ quondam fuit;" and that the name was introduced after the destruction of the greater part of it by Nebuchadnezzar, to distinguish it from that part of Tyre which continued to be in existence (*De Rebus Tyrionum*, p. 26). Movers, justly deeming this explanation unlikely, suggests that the original inhabitants of the city on the mainland possessed the island as part of their territory, and named their city from the characteristic features of the island, though the island itself was not then inhabited (*Das phönizische Alterthum*, II, i, 173). This explanation is possible; but other explanations are equally possible. For example, the Phœnician name of it may have been the Old City; and this may have been translated "Palætyrus" in Greek. Or, if the inhabitants of the mainland migrated to the island, they may afterwards, at some time or other, have given to the city which they left the name of Old Tyre, without its being necessarily implied that the city had ever borne simply the name of Tyre. Or some accidental circumstance, now beyond the reach of conjecture, may have led to the name. This again would tally with the remark of Grote, who observes (*loc. cit.*) that perhaps the Phœnician name which the city on the mainland bore may have been something resembling Palætyrus in sound, but not coincident in meaning. It is important, however, to bear in mind that this question regarding Palætyrus is merely archaeological, and that nothing in Biblical history is affected by it. Nebuchadnezzar necessarily besieged the portion of the city on the mainland, as he had no vessels with which to attack the island; but it is reasonably certain that, in the time of Isaiah and Ezekiel the heart or core of the city was on the island. The city of Tyre was consecrated to Hercules (Melkarth), who was the principal object of worship to the inhabitants (Quintus Curtius, iv, 2; Strabo, xvi, 757); and Arrian, in his *History*, says that the temple on the island was the most ancient of all temples within the memory of mankind (ii, 16). It cannot be doubted, therefore, that the island had long been inhabited. With this agree the expressions as to Tyre being "in the midst of the seas" (Ezek. xxvii, 25, 26); and even the threat against it that it should be made like the top of a rock to spread nets upon (see Des Vignoles, *Chronologie de l'Histoire Sainte* [Berlin. 1738], ii, 25). As, however, the space on the island was limited, it is

very possible that the population on the mainland may have exceeded the population on the island (see Movers, *loc. cit.* p. 81).

2. *Connection with Sidon.*—Whether built before or later than Palætyrus, the renowned city of Tyre, though it laid claims to a very high antiquity (Isa. xxiii, 7; Herod. ii, 14; Quintus Curtius, iv, 4), is not mentioned either in the *Iliad* or in the *Odyssey*; but no inference can be legitimately drawn from this fact as to the existence or non-existence of the city at the time when those poems were composed. The tribe of Canaanites that inhabited the small tract of country which may be called Phœnicia proper was known by the generic name of Sidonians (Judg. xviii, 7; Isa. xxiii, 2, 4, 12; Josh. xiii, 6; Ezek. xxxii, 30); and this name undoubtedly included Tyrians, the inhabitants being of the same race, and the two cities being less than twenty English miles distant from each other. Hence when Solomon sent to Hiram king of Tyre for cedar-trees out of Lebanon, to be hewn by Hiram's subjects, he reminds Hiram that "there is not among us any that can skill to hew timber like the Sidonians" (1 Kings v, 6). Hence Virgil, who, in his very first mention of Carthage, expressly states that it was founded by colonists from Tyre (*Æn.* i, 12), afterwards, with perfect propriety and consistency, calls it the Sidonian city (*ibid.* l. 677, 678; iv, 545; see Des Vignoles, *loc. cit.* p. 25). In like manner, when Sidonians are spoken of in the Homeric poems (*Il.* vi, 290; xxiii, 743; *Od.* iv, 84; xvii, 424), this might comprehend Tyrians; and the mention of

the city Sidon, while there is no similar mention of Tyre, would be fully accounted for—if it were necessary to account for such a circumstance at all in a poem—by Sidon's having been in early times more flourishing than Tyre. It is worthy, likewise, of being noted that Tyre is not mentioned in the Pentateuch; but here, again, though an inference may be drawn against the importance, no inference can be legitimately drawn against the existence, of Tyre in the times to which the Pentateuch refers. See SIDON.

3. *General Characteristics.*—As already intimated, Tyre was composed of two distinct parts or towns in historical times: the one situated on the mainland, or continental Tyre, and one on the island opposite, from four to thirty stadia (Pliny, Strabo) distant from each other. According to Pliny, the circumference of both was reckoned at about nineteen Roman miles, the island-town comprising about twenty-two stadia. The town on the shore was called Palætyrus, not from its having been founded before Island-Tyris—for this, indeed, we may assume to have been the first of the two (Reland, Vitranga, Hengstenberg, etc.)—but from the circumstance of its having achieved a high renown long before its much less favorably situated island-sister. Constantly exposed to earthquakes and deluges—occupying a space naturally circumscribed, and rendered still more so by the erections necessary for the purple-fisheries and manufactories—and cut off from the easy means of export and import by caravans that belonged to the opposite city, Island-Tyris was by far inferior in importance. In fact, only one (the western) part of the island had been built over up to the time of Hiram, the contemporary of Solomon—viz. the “Old Town” (τὸ ἄντυ), which probably served as harbor, a place for arsenals and magazines, to Palætyrus, that by this time had sent out colonies already to Tartessus and the northern coast of Libya. The other part of the island, or rather a small island by itself, which has now ceased to be such, and which was first joined to the ἄντυ as the “New Town” by Hiram, had till then probably been inhabited only by the priests attached to the sanctuary of Melkart. Besides these two there was a third town or suburb, the Eurychoros (esplanade), formed by means of substructions on the eastern side of the rock. Palætyrus, extending from the river Leontes on the north to the Ras el-Ain on the south, covered with all its outlying parts the whole available maritime strip of land, and lay in one of the most fertile and blooming plains of Phœnicia (comp. Hos. ix, 13, שְׁהוּלָה בְּנוֹרָה, “planted in a pleasant place,” or William of Tyre, “Fertilitate præcipua et amœnitate quasi singularis, habet plantitiam sibi continuum divitis glebæ et opimi soli,” xiii, 3). It was watered by several aqueducts, which carried the stream from the fountain-group situated in the plain itself (head of the well, Ras al-Ayin), not only through the whole territory of the continental city, but, probably by means of subterranean pipes, also into the island-city. Without this supposition it would hardly be credible how the latter, which, up to the siege by Shalmaneser (before the 8th century), had subsisted on rain-water only collected in cisterns and open canals (ὕδραρυγοί) from the Ras, could have stood the long sieges by Nebuchadnezzar (thirteen years) and of Alexander, who naturally stopped the overground supplies, without apparently once suffering from want of water. Possibly we may, in a certain annual rite called the “Wedding of the land-water to the sea-water,” still kept up by the inhabitants, see a faint reminiscence of this ancient juncture. Here also stood the ancient royal palace and the first sanctuary of Hercules, though the most celebrated one lay on the island opposite. The happy mixture of land and sea scenery thus exhibited by the two cities in the time of their prosperity is graphically described by Nonnus, a learned Egyptian antideologist of the end of the 4th Christian century: “The sailor furrows the sea with his oar, as the plough-

man the soil; the lowing of oxen and the song of birds answer the deep roar of the main; the hamadryad among the tall trees hears the voice of the nereid calling to her from the waves; the breeze from Lebanon, while it cools the rustic at his midday labor, speeds the sailor seaward.” “O Tyrus,” exclaims the prophet (Ezek. xxvii, 3, etc.), “thou hast said, I am of perfect beauty; thy borders are in the midst of the sea, thy builders have perfected thy beauty.” The poets call her “a virgin bathing in the sea, a Tartessus-ship swimming upon the ocean, an island on shore, and a city in the sea withal,” etc. Above all, however, Nonnus makes his Indian hero get into ecstasies at the “primeval fountains, especially those where the water . . . gushing out of the depths of the earth, returns every hour;” and he mentions three distinct sources or water-nymphs—“Abarbarea, the fertile; Kallirrhoe, the sweet; and Drosera, the rich and bridal one.”

The description of Tyre in the prophecy of Ezekiel (xxvii, 10) receives striking illustration from what we believe to be its earliest coins. These coins were held to be most probably of Tyre or some other Phœnician city, or possibly of Babylon, on numismatic evidence alone, by Mr. Burgon, of the British Museum. They probably date during the 5th century B.C.—they may possibly be a little older—but it is most reasonable to consider them as of the time of, and issued by, Darius Hystaspis. The chief coins are octodrachms of the earlier Phœnician weight, bearing, on the obverse, a war-galley beneath the towered walls of a city, and, on the reverse, a king in a chariot, with an incuse goat beneath. This combination of galley and city is exactly what we find in the description of Tyre in Ezekiel,

Early Coin of Tyre.

which mainly portrays a state-galley, but also refers to a port, and speaks of towers and walls. See NAVIGATION.

III. *History.*—1. The early history of Tyre is so completely shrouded in mythical mystery that a rational reconstruction of it is next to impossible. We hear of kings of Phœnicia whose very names mostly prove them to be mere types of deities, or special tribes, such as Agenor, Phoenix, Phalīs, Sidon, Tetramnestus, Tennes, Strato, Abdalomīnus (a word spelled in many different ways, the only reasonable orthography of which, however, must be Abd - Alonīm [Heb. Elyonim], עֶבֶר עֲלִיִּימִים, “servant of the highest ones, or gods”). Abibal, however, is called the first king of Tyre, and the predecessor of Hiram (Hierom, Suram, etc.), the Biblical Chiram, with whom, indeed, begins what to us is approximately the historical period of Phœnicia. We have already mentioned the calamity in consequence of which the Sidonians, hitherto the mightiest power of Phœnicia, were obliged to leave their capital and seek refuge in neighboring Tyre. This took place about B.C. 1200, and very soon after that period Tyre assumed the hegemony. Before the time of Samuel we already hear of the princes (Suffetes) of Tyre oppressing the Israelites (Judg. x, 12).

In the Bible, Tyre is named for the first time in the book of Joshua (xix, 29), where it is adverted to as a fortified city (in the A.V. “the strong city”), in reference to the boundaries of the tribe of Asher. Nothing historical, however, turns upon this mention of Tyre;

for it is indisputable that the tribe of Asher never possessed the Tyrian territory. According to the injunctions of the Pentateuch, indeed, all the Canaanitish nations ought to have been exterminated; but, instead of this, the Israelites dwelt among the Sidonians or Phœnicians, who were inhabitants of the land (Judg. i, 31, 32), and never seem to have had any war with that intelligent race. Subsequently, in a passage of Samuel (2 Sam. xxiv, 7), it is stated that the enumerators of the census in the reign of David went in pursuance of their mission to Tyre, among other cities, which must be understood as implying, not that Tyre was subject to David's authority, but merely that a census was thus taken of the Jews resident there.

2. But the first passages in the Hebrew historical writings, or in ancient history generally, which afford glimpses of the actual condition of Tyre are in the book of Samuel (2 Sam. v, 11), in connection with Hiram king of Tyre (B.C. 980-947) sending cedar-wood and workmen to David, for building him a palace; and subsequently in the book of Kings, in connection with the building of Solomon's temple. One point at this period is particularly worthy of attention. In contradistinction from all the other most celebrated independent commercial cities out of Phœnicia in the ancient and modern world, Tyre was a monarchy, and not a republic; and, notwithstanding its merchant princes, who might have been deemed likely to favor the establishment of an aristocratical commonwealth, it continued to preserve the monarchical form of government until its final loss of independence. Another point is the skill in the mechanical arts which seems to have already been attained by the Tyrians. Under this head, allusion is not specially made to the excellence of the Tyrians in felling trees; for, through vicinity to the forests of Lebanon, they would as naturally have become skilled in that art as the backwoodsmen of America. But what is peculiarly noteworthy is that Tyrians had become workers in brass or copper to an extent which implies considerable advancement in art. In the enumeration of the various works in brass executed by the Tyrian artists whom Solomon sent for, there are lilies, palm-trees, oxen, lions, and cherubim (1 Kings vii, 13-45). The manner in which the cedar-wood and fir-wood were conveyed to Jerusalem is likewise interesting, partly from the similarity of the sea voyage to what may commonly be seen on the Rhine at the present day, and partly as giving a vivid idea of the really short distance between Tyre and Jerusalem. The wood was taken in floats to Joppa (2 Chron. ii, 16; 1 Kings v, 9), a distance of less than seventy-four geographical miles. In the Mediterranean, during summer, there are times when this voyage along the coast would have been perfectly safe, and when the Tyrians might have reckoned confidently, especially at night, on light winds to fill the sails which were probably used on such occasions. From Joppa to Jerusalem the distance was about thirty-two miles, and it is certain that by this route the whole distance between the two celebrated cities of Jerusalem and Tyre was not more than 106 geographical, or about 122 English, miles. Within such a comparatively short distance (which by land, in a straight line, was about twenty miles shorter), it would be easy for two sovereigns to establish personal relations with each other, more especially as the northern boundary of Solomon's kingdom, in one direction, was the southern boundary of Phœnicia. Solomon and Hiram may frequently have met, and thus laid the foundations of a political alliance in personal friendship. If by messengers they sent riddles and problems for each other to solve (Josephus, *Ant.* viii, 5, 3; *Cont. Apion.* i, 17), they may previously have had, on several occasions, a keen encounter of wits in convivial intercourse. In this way, likewise, Solomon may have become acquainted with the Sidonian women who, with those of other nations, seduced him to polytheism and the worship of Astarte in his old age. Similar remarks apply to the circumstances which may

have previously occasioned the strong affection of Hiram for David (1 Kings v, 1). However this may be, it is evident that under Solomon there was a close alliance between the Hebrews and the Tyrians. Hiram supplied Solomon with cedar-wood, precious metals, and workmen, and gave him sailors for the voyage to Ophir and India; while, on the other hand, Solomon gave Hiram supplies of corn and oil, ceded to him some cities, and permitted him to make use of some havens on the Red Sea (ix, 11-14; 26-28; x, 22). Under Hiram, Tyre not only attained to its fullest glory and renown among its sister-states, but the capital itself, enlarged by him into three distinct towns, received its fullest share of palaces, temples, and public edifices, and its two roadsteads and two harbors probably date from this period. It is at this period also when the joint trading expeditions to Ophir are recorded to have taken place, in which the Tyrians furnished the pilots and mariners. Hiram himself seems altogether to have been a very refined, pious, and peaceful monarch. Hardly any wars are recorded during his lifetime, and his reported interchange of problems with the "wisest of mankind" points to his renown as a *bel esprit*. These friendly relations survived for a time the disastrous secession of the ten tribes, and a century later Ahab married a daughter of Ethbaal, king of the Sidonians (xvi, 31), who, according to Menander (Josephus, *Ant.* viii, 13, 2), was a daughter of Ithobaal, king of Tyre.

3. Hiram was followed, according to Menander (in Josephus) and Theophilus, by Baleastartus, whose four sons reigned after him for short periods. First came Abdestartus (939-931), who, in consequence of a palace revolution, was followed on the throne for twelve years by a son of his nurse—a period of internal sedition and general lawlessness having intervened, during which (so Justin tells us) all the free citizens of Tyre were murdered by the slaves. Astartus, the eldest son of Baleastartus, succeeded to the government, and ruled from 918 to 907, when a third brother, Astarymus, was made king. He was murdered nine years later by Phaletus, his youngest brother, who, after a brief reign of nine months, was put to death by Ithobaal, priest of Astarte, in whose family the kingdom henceforth became hereditary. This Ithobaal, the Ethbaal of Scripture, whose daughter was married to Ahab, is called by Josephus "king of Tyre and Sidon," a sign of the supremacy which Tyre had acquired in his day. The drought reported to have taken place in Judæa under Ahab seems to have also touched Phœnicia, and such was Ithobaal's piety that at his supplication thunder-claps were heard, followed by copious rains. It was chiefly before his reign (898-866) that Tyre commenced to spread its colonies as far as Africa, Spain, etc.—owing, in the first instance, probably to the danger of life and uncertainty of circumstances into which the country had been plunged by the internal conflicts. But Ithobaal himself seems to have encouraged colonization, and, in order to prevent the overcrowding of the old cities, to have built a number of new cities. Balezor, his son, succeeded in 865, and was followed by his son Mutton, the office of high-priest devolving on his second son, Siharbaal. Mutton died in 833, and left two children, Elissa (Dido) and Pygmalion, who were to share the kingdom between them, while Elissa, by her marriage with Siharbaal, was to unite the high-priesthood with the crown. To this arrangement, however, the people, averse to the supreme priestly power, demurred, and Pygmalion was declared sole king. Elissa's husband having been killed, for the sake of his treasures, by the new king, and herself being deprived of her dominion, she is said to have entered into a conspiracy with the aristocratic party, and, in the ninth year of Pygmalion's reign, assisted and followed by her brother Barca and the principal families of the land, to have reached Carthage (New Town, *קרית חדשה*), a colony founded some time

before by the Sidonians (about B.C. 813), and to have completely rebuilt it and laid the foundation for a power which contended with mighty Rome for the empire of the world.

4. The political existence of Palestine, Syria, and Phœnicia, which, instead of making a joint desperate stand, kept on intriguing and plotting against each other—Phœnicia, moreover, being hated and despised by her allies for her iniquitous trade in slaves kidnapped among her neighbors, chiefly in Judæa—was henceforth doomed. From this time commenced denunciations, and, at first, threats of retaliation (Joel iii, 4-8; Amos i, 9, 10); and, indeed, though there might be peace, there could not be sincere friendship between the two nations. But the likelihood of the denunciations being fulfilled first arose from the progressive conquests of the Assyrian monarchs. It was not probable that a powerful, victorious, and ambitious neighbor could resist the temptation of endeavoring to subjugate the small strip of land between the Lebanon and the sea, so insignificant in extent, but overflowing with so much wealth, which by the Greeks was called Phœnicia. Accordingly, when the king of Assyria had taken the city of Samaria, had conquered the kingdom of Israel and carried its inhabitants into captivity, he turned his arms against the Phœnician cities. At this time Tyre had reached a high point of prosperity. It possessed the island of Cyprus, with the valuable mines of the metal "copper" (so named from the island), and apparently the city of Sidon was subject to its sway. But the Assyrian king seems to have taken advantage of a revolt of the Cyprians; and what ensued is thus related by Menander, who translated the archives of Tyre into the Greek language (see Josephus, *Ant.* ix, 14, 2): "Elulæus reigned thirty-six years (over Tyre). This king, upon the revolt of the Kittæus (Cyprians), sailed with a fleet against them, and reduced them to submission. On the other hand, the king of the Assyrians attacked in war the whole of Phœnicia, but soon made peace with all, and turned back. On this, Sidon and Ace (i. e. Akkô or Acre) and Palætyrus revolted from the Tyrians, with many other cities which delivered themselves up to the king of Assyria. Accordingly, when the Tyrians would not submit to him, the king returned and fell upon them again, the Phœnicians having furnished him with sixty ships and eight hundred rowers. Against these the Tyrians sailed with twelve ships, and, dispersing the fleet opposed to them, they took five hundred men prisoners. The reputation of all the citizens in Tyre was hence increased. Upon this the king of the Assyrians, moving off his army, placed guards at their river and aqueducts to prevent the Tyrians from drawing water. This continued for five years, and still the Tyrians held out, supplying themselves with water from wells." But there can hardly be a doubt that Tyre, as well as the whole of Phœnicia, very soon was made tributary to Assyria, like all the neighboring countries, and the calamities brought upon them all alike by the uninterrupted war expeditions of the Assyrian monarchs could not but be felt also by the dependencies and colonies. These fell more or less about this time into the hands of new settlers, from whom again Carthage, somewhat later, wrested a part for herself.

5. After the siege of Tyre by the Assyrians (which must have taken place not long after B.C. 721), Tyre remained a powerful state with its own kings (Jer. xxv, 22; xxvii, 3; Ezek. xxviii, 2-12), remarkable for its wealth, with territory on the mainland, and protected by strong fortifications (ver. 5; xxvi, 4, 6, 8, 10, 12, xxvii, 11; Zech. ix, 3). Our knowledge of its condition thenceforward until the siege by Nebuchadnezzar depends entirely on various notices of it by the Hebrew prophets; but some of these notices are singularly full, and especially the twenty-seventh chapter of Ezekiel furnishes us, on some points, with details such as have scarcely come down to us respecting any one city of antiquity, excepting Rome and Athens. One point espe-

cially arrests the attention, that Tyre, like its splendid daughter, Carthage, employed mercenary soldiers (Ezek. xxvii, 10, 11). This has been the general tendency in commercial cities on account of the high wages which may be obtained by artisans in a thriving community, compared with the ordinary pay of a soldier, and Tyre had been unable to resist the demoralizing temptation. In its service there were Phœnicians from Arrad, Æthiopians obtained through the commerce of Egypt, and hardy mountaineers from Persia. This is the first time that the name of Persia occurs in the remains of ancient literature, before its sons founded a great monarchy on the ruins of the Chaldaean empire. Independently, however, of this fact respecting Tyrian mercenary soldiers, Ezekiel gives interesting details respecting the trade of Tyre. On this head, without attempting to exhaust the subject, a few leading points may be noticed. The first question is as to the countries from which Tyre obtained the precious metals, and it appears that its gold came from Arabia by the Persian Gulf (v, 22), just as in the time of Solomon it came from Arabia by the Red Sea. See OPHIR. Whether the Arabian merchants, whose wealth was proverbial in Roman classical times (Horace, *Od.* i, 29, 1), obtained their gold by traffic with Africa or India, or whether it was the product of their own country, is uncertain; but so far as the latter alternative is concerned, the point will probably be cleared up in the progress of geological knowledge. On the other hand, the silver, iron, lead, and tin of Tyre came from a very different quarter of the world, viz. from the south of Spain, where the Phœnicians had established their settlement of Tartessus, or Tartessus. As to copper, we should have presumed that it was obtained from the valuable mines in Cyprus; but it is mentioned here in conjunction with Javan, Tubal, and Meshech, which points to the districts on the south of the Black Sea, in the neighborhood of Armenia, in the southern line of the Caucasus, between the Black Sea and the Caspian. The country whence Tyre was supplied with wheat was Palestine. It may be added that the value of Palestine as a wheat country to Tyre was greatly enhanced by its proximity, as there was scarcely a part of the kingdom of Israel on the west of the river Jordan which was distant more than a hundred miles from that great commercial city. The extreme points in the kingdom of Judah would be somewhat more distant, but the wheat probably came from the northern part of Palestine. Tyre likewise obtained from Palestine oil, honey, and balm, but not wine apparently, notwithstanding the abundance of grapes and wine in Judah (Gen. xlix, 11). The wine was imported from Damascus, and was called wine of Helbon, which was probably not the product of the country adjoining the celebrated city of that name, but came from the neighborhood of Damascus itself (see Porter, *Handbook for Syria*, ii, 495; comp. Athenæus, i, 51). The Bedawin Arabs supplied Tyre with lambs and rams and goats, for the rearing of which their mode of life was so well adapted. Egypt furnished linen for sails, and doubtless for other purposes, and the dyes from shell-fish, which afterwards became such a source of profit to the Tyrians, were imported from the Peloponnesus (comp. the *Luconicas purpuras* of Horace, *Od.* ii, 18, 7, and Pliny, ix, 40). Lastly, from Dedan, in the Persian Gulf, an island occupied possibly by a Phœnician colony, horns of ivory and ebony were imported, which must originally have been obtained from India (Ezek. xxvii). See COMMERCE.

6. When the iron grasp of Assyria began to relax, the Chaldaeo-Egyptian contest brought still greater miseries upon that unfortunate Syro-Phœnician coast, and Phœnicia, still nominally ruled by Tyre. The Phœnicians, it would appear, had allied themselves to the Egyptians, who under Psammetichus had seized upon Philistia, and were about to assist Pharaoh-Necho in his further conquest of the Tyro-Palestinian states. When, therefore, at Carchemish, the Egyptians had been defeated by the

Chaldeans, the latter instantly followed up their victory by occupying Syria, Palestine, and Phœnicia, and selling a great number of the inhabitants of the latter, about B.C. 605. A league having been formed between these states to throw off the foreign yoke, gave rise to a new Chaldean expedition against them under Nebuchadnezzar (Jer. xxv, 22; xxvii, 3; xlvii, 4), which ended with the destruction of Jerusalem (B.C. 588) and the reduction of the sea-coast, except Tyre. For thirteen years Nebuchadnezzar besieged it by water and by land, but with what degree of success is still a matter of debate. Hitzig, Gesenius, Heeren, Winer, Kenrick, and others hold that the siege was a failure. It is certain that the fall of Tyre is mentioned in no ancient history—neither by Josephus, nor by the Tyrian historian Menander, nor by Philostratus. Berosus, indeed, affirmed that Nebuchadnezzar “subdued all Syria and Phœnicia,” but Tyre is not expressly mentioned. Nay, Jerome says persons who had examined Greek and Phœnician histories, especially the writings of Nicolaus Damascenus, find no mention of the siege at all, but the reply of the father is only a retort upon the *perfidia et mendacia* of profane writers. Jerome’s own assertion is, “Deus prædixerat, hoc sufficit.” The question then comes to be, whether the oracle of Ezekiel implies the capture of Tyre. The most graphic descriptions of this siege are found in Ezek. xxvi, 7–12, 17; xxviii, 2; xxix, 18, etc. The prophet’s language, “Son of man, Nebuchadnezzar, king of Babylon, caused his army to serve a great service against Tyrus: every head was made bald, and every shoulder was peeled; yet he had no wages, nor his army, for Tyrus, for the service that he had served against it. Therefore, thus saith the Lord God, Behold I will give the land of Egypt unto Nebuchadnezzar, king of Babylon, and he shall take her multitude, and take her spoil, and take her prey; and it shall be the wages for his army. I have given him the land of Egypt for his labor wherewith he served against it, because they wrought for me, saith the Lord God” (xxix, 18–20), would seem to imply that Nebuchadnezzar had failed; that his army had put forth all its energies, till “every head was bald” by the constant pressure of the helmet, and “every shoulder peeled” by the hard labor of the trenches and siege-work, but that he had been disappointed; that he got “no wages;” that the rich booty of the city did not fall into his possession, and that therefore Egypt was to afford him compensation “as a spoil,” “a prey,” “and wages for his army.” But surely the author or the collector of these oracles could not so contradict himself and his own utterances as to affirm, as in xxvi, 7–21, and then deny, the capture of Tyre by Nebuchadnezzar. The narrative of Berosus and Jerome is accepted by Movers and Ewald, the latter of whom says that Jerome’s statement “quite agrees with the brief words of Ezekiel.” It may also be replied, with Hävernick, Hengstenberg, Fairbairn, and others, that the meaning is that Nebuchadnezzar, though he took the city, yet found no fitting recompense, as, according to Jerome, the inhabitants had removed all their valuable property to the island. That he took Palætyrus seems certain, though there is no proof of Jerome’s assertion that, in his assault upon the island, he had nearly completed a dam, and had erected warlike engines on it. It is plain, too, that Tyre made submission to the Chaldean king. Many of the Tyrian royal family resided afterwards at Babylon, perhaps as hostages, and several of them were asked by the Tyrians at different times and crises to come and reign over them. These facts are proofs of the Chaldean conquest, and that it was more than such a capitulation as is admitted by Niebuhr, Dunker, Kenrick, and others (Niebuhr, *Gesch. Assur’s*, p. 216; Dunker, *Gesch. des Alterthums*, i, 172; Kenrick, *Phœnicia*, p. 390; see Pusey, *On Daniel*, p. 288). Moreover, Isaiah, in his oracle against Tyre, specifically declared that it should be destroyed, not by the power which then threatened, but by the Chaldeans, a people “formerly

of no account” (xxiii, 18). The more detailed predictions of the prophet Ezekiel were delivered a hundred and twenty years later, B.C. 588. Tyre was not taken till the fifteenth year after the captivity, B.C. 573, more than seventeen hundred years, according to Josephus, after its foundation. Its destruction then must have been entire; all the inhabitants were put to the sword or led into captivity, the walls were razed to the ground, and it was made a “terror” and a desolation. It is remarkable that one reason assigned by Ezekiel for the destruction of this proud city is its exultation at the destruction of Jerusalem. “I shall be replenished now she is laid waste” (xvi, 2). This clearly indicates that its overthrow was posterior to that event; and if we take the seventy years during which it was predicted by Isaiah (xxiii, 15) that Tyre should be forgotten to denote a definite term (which seems the most natural sense), we may conclude that it was not rebuilt till the same number of years after the return of the Jews from Babylon. That it was continental Tyre, and not insular Tyre, which Nebuchadnezzar besieged appears from the description of the siege which we have given us by Ezekiel; for we find that the king cast up a mound against it, and erected engines to batter down the walls (Ezek. xxviii, 8–10). But that the city on the island then escaped this fate is manifest from the Phœnician histories. But as to the latter also, at least a show of submission, if not a subjection—leaving the native sovereigns on the throne, and their wealth and naval power untouched—was what Nebuchadnezzar gained when he ended the “wageless” siege (comp. xxix, 17). Once more Nebuchadnezzar armed, at the end of this war, against Egypt, but Pharaoh-Apries, swiftly marching upon Phœnicia, subduing it and destroying its fleet, prevented this expedition. In this expedition Apries besieged Sidon, fought a naval battle with Tyre, and reduced the whole of the coast of Phœnicia, though this could not have had lasting effects (Herod. ii, 161; Diod. i, 68, Movers, *Das phönizische Alterthum*, ii, 451). The rule of Nebuchadnezzar over Tyre, though real, may have been light and in the nature of an alliance; and it may have been in this sense that Merbal, a subsequent Tyrian king, was sent for to Babylon (Josephus, *Cont. Apion.* i, 21). At this time the ancient constitution of Tyre was changed. Ithobaal had been followed by Baal, but after Baal two judges (suffetes) took for a certain period the place of the monarch. We hear of internal commotions—natural enough in a country and city upon which calamity after calamity had fallen in so short a time, and the existence of two parties in the commonwealth that looked respectively to Chaldæa and to Egypt could not but foster those internal dissensions. In 538, while Eiramus stood at the head of the Tyrian or Phœnician affairs, Cyrus captured Babylon, and thus became master also of Phœnicia, which had reverted to this power. At that time Sidon, being made the royal residence, again resumed the hegemony.

7. During the Persian domination the Tyrians were subject in name to the Persian king, and may have given him tribute. With the rest of Phœnicia, they had submitted to the Persians without striking a blow; perhaps through hatred of the Chaldees, perhaps solely from prudential motives. But their connection with the Persian king was not slavish. Thus, when Cambyes ordered them to join in an expedition against Carthage, they refused compliance, on account of their solemn engagements and parental relation to that colony; and Cambyes did not deem it right to use force towards them (Herod. iii, 19). Afterwards they fought with Persia against Greece, and furnished vessels of war in the expedition of Xerxes against Greece (ibid. vii, 98); and Mapên, the son of Sirom the Tyrian, is mentioned among those who, next to the commanders, were the most renowned in the fleet. It is worthy of notice that at this time Tyre seems to have been inferior in power to Sidon. These two cities were less than twenty English miles distant from each other; and it is easy to

Modern Tyre.

conceive that in the course of centuries their relative importance might fluctuate, as would be very possible in modern times with two neighboring cities, such, for example, as Liverpool and Manchester. It is possible, also, that Tyre may have been seriously weakened by its long struggle against Nebuchadnezzar. Under the Persian dominion, Tyre and Sidon supplied cedar-wood again to the Jews for the building of the second Temple; and this wood was sent by sea to Joppa, and thence to Jerusalem, as had been the case with the materials for the first Temple in the time of Solomon (Ezra iii, 7). Under the Persians, likewise, Tyre was visited by a historian, from whom we might have derived valuable information respecting its condition (Herod. ii, 44). But the information actually supplied by him is scanty, as the motive of his voyage seems to have been solely to visit the celebrated Temple of Melkarth (the Phœnician Hercules), which was situated in the island, and was highly venerated. He gives no details, as to the city, and merely specifies two columns which he observed in the temple, one of gold and the other of emerald; or, rather, as is reasonably conjectured by Sir Gardiner Wilkinson, of green glass (Rawlinson, *Herodotus*, ii, 81, 82). Under the successive Persian rulers Phœnicia was allowed to retain many of its national institutions, and even a certain amount of independence, in return for which it paid a comparatively small tax and placed its again powerful fleet at the disposal of the conquerors, who entirely lacked that most vital element of naval power. Together with Philistia and Cyprus, it was incorporated under Darius Hystaspis in the fifth

nomos, or circle, of the empire; and up to the time of Xerxes the relations between the conquerors and the conquered were of a perfectly friendly nature. But when this king, during his Greek invasion, had managed to destroy the highly prized Phœnician fleet almost completely, and to this calamity added galling measures and humiliations without end, the people became so exasperated that they took part, under Sidon's leadership, in the revolt of Egypt against Artaxerxes Mnemon and Ochus, about the middle of the 4th century, which ended most disastrously for the whole country, and particularly for Sidon, which, wealth and all, was fired by its own inhabitants. Tyre afterwards (350) again resumed the sway, until, after the battle on the Issus, all the Phœnician cities except herself paid their allegiance to the Macedonian warrior.

8. It was in consequence of this contumacy that Tyre was assailed for the third time by a great conqueror; and if some uncertainty hangs over the siege by Nebuchadnezzar, the results of the siege by Alexander were clear and undeniable. It was essential to the success of his military plans that the Phœnician fleet should be at his command, and that he should not be liable through their hostility to have his communications by sea

with Greece and Macedonia suddenly cut off; and he accordingly summoned all the Phœnician cities to submit to his rule. All the rest of them, including Aradus, Byblus, and Sidon, complied with his demands, and the seamen of those cities in the Persian fleet brought away their ships to join him. Tyre alone, calculating probably at first on the support of those seamen, refused to admit him within its walls; and then ensued a memorable siege which lasted seven months, and the success of which was the greatest of all the achievements which Alexander up to that time had attempted. At that time Tyre was situated on an island nearly half a mile from the mainland; "it was completely surrounded by prodigious walls, the loftiest portion of which on the side fronting the mainland reached a height not less than one hundred and fifty feet;" and, notwithstanding his persevering efforts, he could not have succeeded in his attempt, if the harbor of Tyre to the north had not been blockaded by the Cyprians, and that to the south by the Phœnicians. Moreover, owing to internal disturbances, Carthage was unable to afford any assistance to its parent state. For seven months Tyre sustained one of the most remarkable sieges ever recorded (B.C. 332). Palætyrus having been razed to the ground, the island-city was connected by the conqueror with the mainland by means of a mole, which, once destroyed, had to be reconstructed entirely anew. An immense fleet was collected, the ablest engineers of Phœnicia and Cyprus exercised all their skill on the construction of new battering and other machines; while the means of defence on the part of the Tyrians were as

cunning as they were successful, and fearfully galling to the besiegers. At last Tyre fell under a furious double attack, and, provoked by their desperate resistance even after the town was already taken, the soldiery fired it and massacred an immense number of the inhabitants. In accordance with the barbarous policy of ancient times, 30,000 of its inhabitants, including slaves, free females, and free children, were sold as slaves (Arrian, iv, 24, 9; Diodorus, xvii, 46). Alexander replaced the population by new colonists, chiefly Carians, and soon again the exceptionally favorable position of the place regained for it part of its ancient prosperity, though its trade is said to have suffered by the vicinity and rivalry of Alexandria.

9. Ptolemy had, after Alexander's death, annexed Phœnicia to his kingdom; but when, in B.C. 315, Antigonus returned from Babylonia, he easily expelled his garrisons from all the Phœnician cities save Tyre, which only surrendered after an eighteen months' siege. The boundaries of its territory at that period were: Sarepta to the north, the "Tyrian Ladder" to the south, and Kedes and Baka in Galilee to the east. Under the Macedonian successors of Alexander, it shared the fortunes of the Seleucids, who bestowed on it many privileges; and there are still in existence coins of that epoch with a Phœnician and Greek inscription (Eckhel,

ing it he says that the circumference of the city proper (i. e. the city on the peninsula) was twenty-two stadia, while that of the whole city, including Palætyrus, was nineteen Roman miles (*Hist. Nat.* v, 17). The accounts of Strabo and Pliny have a peculiar interest in this respect, that they tend to convey an idea of what the city must have been when visited by Christ (Matt. xv, 21; Mark vii, 24). It was perhaps more populous than Jerusalem; and if so, it was undoubtedly the largest city which he is known to have visited. It was not much more than thirty miles distant from Nazareth, where Christ mainly lived as a carpenter's son during the greater part of his life (Matt. ii, 23; iv, 12, 13, 18; Mark vi, 3). We may readily conceive that he may often have gone to Tyre while yet unknown to the world; and, whatever uncertainty there may be as to the extent to which the Greek language was likely to be spoken at Nazareth, at Tyre and in its neighborhood there must have been excellent opportunities for conversation in that language, with which he seems to have been acquainted (Mark vii, 26). At an early period a Christian community was formed there (Acts xxi, 3, 7). It was early the seat of a Christian bishopric, and Cassius, bishop of Tyre, is named as having been present at the Council of Cæsarea towards the close of the 2d century (Reland, *Palestina*, p. 1054).

For a long time Tyre retained her manufactures and trade, though a mere shadow of what these once had been. Chiefly with regard to her dyeing produce Hadrian granted Tyre the title of metropolis, and it formed the principal naval station on the Tyrian coast. Once again it was fired in A.D. 193, when it took part with Septimius Severus against Pescennius Niger in their contest for the crown, and Severus gratefully bestowed upon the place, which he peopled with his third legion, the title of colony and the Jus Italicum. Such was its elastic vitality that at the time of Constantine it again equalled all the Eastern cities in wealth and commercial prosperity. Jerome, in the 4th century, calls it the noblest and most beautiful city of Phœnicia, and expresses his astonishment at the apparent nonfulfilment of the prophecy which threatened its eternal desolation ("Nec edificaberis ultra" videtur facere questionem, quomodo non sit edificata? quam hodie cernimus Phœnices nobilissimam et pulcherrimam civitatem").

11. In the 7th century took place the extraordinary Arabian revolution under Mohammed which has given a new religion to so many millions of mankind. In the years A.D. 638-638 all Syria and Palestine, from the Dead Sea to Antioch, were conquered by the caliph Omar. This conquest was so complete that in both those countries the language of Mohammed has almost totally supplanted the language of Christ. In Syria there are only three villages where Syriac (or Aramaic) is the vernacular language. In Palestine it is not the language of a single native; and in Jerusalem, to a stranger who understands what is involved in this momentous revolution, it is one of the most suggestive of all sounds to hear the muezzin daily call Mohammedans to prayers in the Arabic language of Mohammed within the sacred precincts where once stood the Temple in which Christ worshipped in Hebrew or in Aramaic. (As to the Syriac language, see Porter, *Handbook for Syria and Palestine*, ii, 551.) But even this conquest did not cause the overthrow of Tyre. The most essential conditions on which peace was granted to Tyre, as to other Syrian cities, were the payment of a poll-tax, the obligation to give board and lodging for three days to every Moslem traveller, the wearing a peculiar dress, the admission of Moslems into the churches, the doing away with all crosses and all sounds of bells, the avoiding of all insulting expressions towards the Mohammedan religion, and the prohibition to ride on horseback or to build new churches (see Weil, *Gesch. der Chalifen*, i, 81-82). Some of these conditions were humiliating and nearly heart-breaking; but if submitted to, the lives

Greek Coin of Tyre.

*Doctr. Nummorum* Vol. iii, 379, etc.; Gesenius, *Monum. Phœn.* p. 262-264, and Tab. 34).

10. Beyond this nothing particular is known of Tyre from this time forth to the time of the civil wars of Rome—with which empire Phœnicia had been incorporated together with Syria by Pompey—when Cassius divided Syria into small provinces and sold them separately. Tyre for a short period thus became a principality again with a king of her own. Under the Romans it thus at first continued to enjoy a kind of freedom; for Josephus mentions that when Cleopatra pressed Antony to include Tyre and Sidon in a gift of Phœnician and Jewish territory which he made to her, he steadily refused, knowing them to have been "free cities from their ancestors" (*Ant.* xv, 4, 1). Subsequently, however, on the arrival of Augustus in the East (A.D. 20), he is said to have deprived the two cities of their liberties for seditious conduct (*ἰδουλώσατο*, Dion Cassius, lxi, 7). Still the prosperity of Tyre in the time of Augustus was undeniably great. Strabo gives an account of it at that period (xvi, 2, 23), and speaks of the great wealth which it derived from the dyes of the celebrated Tyrian purple, which, as is well known, were extracted from shell-fish found on the coast, belonging to a species of the genus *Murex*. In the days of Ezekiel, the Tyrians had imported purple from the Peloponnese; but they had since learned to extract the dye for themselves; and they had the advantage of having shell-fish on their coast better adapted for this purpose even than those on the Lacedæmonian coast (Pausanias, iii, 21, 6). Strabo adds that the great number of dyeing-works rendered the city unpleasant as a place of residence. He further speaks of the houses as consisting of many stories, even of more than in the houses at Rome—which is precisely what might be expected in a prosperous fortified city of limited area, in which ground-rent would be high. Pliny the Elder gives additional information respecting the city, for in describ-

and private property of the inhabitants remained untouched. Notwithstanding the establishment of an imperial dyeing manufactory at Constantinople, Tyre yet retained her ancient celebrity for her purple, which was imported into Lombardy at the time of Charlemagne. Under the caliphs it enjoyed the benefits of a mild and enlightened dominion, and during the crusades was much admired both for its natural beauty and its fine edifices and its generally prosperous aspect. It again had at that time to sustain a long siege, but finally surrendered (1124), and was made an archbishopric, bestowed four years afterwards upon William of Tyre, the chronicler of the crusades. In August, 1192, it was fixed as the northern boundary of the Christian territories in Palestine, and continued to flourish, chiefly through the Venetian trade, as a commercial city until the conquest of Syria by Selim I in 1516, from which time forth its decline, further aided by the discovery of the New World and the route to Asia by the Cape of Good Hope, has been rapid and complete.

IV. *Present Condition.*—In the first half of the 14th century Tyre was visited by Sir John Maundeville, who says, speaking of "Tyre, which is now called Sûr, here was once a great and goodly city of the Christians; but the Saracens have destroyed it in great part, and they guard that haven carefully for fear of the Christians" (Wright, *Early Travels in Palestine*, p. 141). About 1610–11 it was visited by Sandys, who said of it, "But this once famous Tyre is now no other than a heap of ruins; yet have they a reverent aspect, and do instruct the pensive beholder with their exemplary frailty. It hath two harbors, that on the north side the fairest and best throughout all the Levant (which the coursers enter at their pleasure); the other choked with the decays of the city" (Purchas, *Pilgrims*, ii, 1393). Towards the close of the same century, in 1697, Maundrell says of it, "On the north side it has an old Turkish castle, besides which there is nothing here but a mere Babel of broken walls, pillars, vaults, etc., there being not so much as an entire house left. Its present inhabitants are only a few poor wretches that harbor in vaults and subsist upon fishing" (see Harris, *Voyages and Travels*, ii, 846). Lastly, without quoting at length Dr. Richard Pococke, who in 1737–40 stated (see vol. x of Pinkerton, *Voyages and Travels*, p. 470) that, except some janizaries, there were few other inhabitants in the city than two or three Christian families, the words of Hasselquist, the Swedish naturalist, may be recorded, as they mark the lowest point of depression which Tyre seems to have reached. He was there in May, 1751, and he thus speaks of his visit: "We followed the seashore . . . and came to Tyre, now called Zur, where we lay all night. None of these cities, which formerly

were famous, are so totally ruined as this except Troy. Zur now scarcely can be called a miserable village, though it was formerly Tyre, the queen of the sea. Here are about ten inhabitants, Turks and Christians, who live by fishing" (*Voyages and Travels in the Levant* [Lond. 1766]). A slight change for the better began soon after. Volney states that in 1766 the Metâwileh took possession of the place, and built a wall round it twenty feet high, which existed when he visited Tyre nearly twenty years afterwards. At that time Volney estimated the population at fifty or sixty poor families. Since the beginning of the present century there has been a partial revival of prosperity. But it has been visited at different times during the last thirty years by Biblical scholars, such as Robinson, Stanley (*Sinai and Pal.* p. 270), and Renan (*Letter in the Moniteur*, July 11, 1861), who all concur in the account of its general aspect of desolation. Mr. Porter, who resided several years at Damascus, and had means of obtaining correct information, stated in 1858 that "the modern town, or rather village, contains from 3000 to 4000 inhabitants, about one half being Metâwileh, and the other Christians" (*Handbook*, p. 391). They are living among the broken ruins of its former magnificence, eking out a scanty livelihood upon insignificant exports of tobacco, cotton, wool, and wood. The place as it now stands was founded under the old name Sûr in 1766, and suffered very considerably during the earthquake in 1837. The remains of an ancient cathedral church probably enclose the bones of the emperor Frederick Barbarossa and of Origen. About one and a half mile distant from Tyre is the so-called Tomb of Hiram, an immense sarcophagus of limestone, popularly supposed to contain the corpse of that king. See HIRAM.

The present city lies only upon the eastern part of the island, on the junction of the island and isthmus. The houses are mostly mere hovels, one story high, with flat roofs; and the streets are narrow, crooked, and filthy. Yet the numerous palm-trees and pride-of-India trees interspersed among the houses and gardens throw over the plain an Oriental charm. One of the best accounts of its present appearance is given by Dr. Robinson, who spent a Sabbath there in 1838 (*Bibl. Res.* iii, 395): "I continued my walk," says he, "along the shore of the peninsula, part of which is now unoccupied except as 'a place to spread nets upon,' musing upon the pride and fall of ancient Tyre. Here was the little isle, once covered by her palaces and surrounded by her fleets; but, alas! thy riches and thy fame, thy merchandise, thy mariners and thy pilots, thy calkers, and the occupiers of thy merchandise that were in thee—where are they? Tyre has indeed become

Ruins of Tyre on the Mainland.

like 'the top of a rock.' The sole tokens of her more ancient splendor—columns of red and gray granite, sometimes forty or fifty heaped together, or marble pillars—lie broken and strewed beneath the waves in the midst of the sea; and the hovels that now nestle upon a portion of her site present no contradiction of the dread decree, 'Thou shalt be built no more.'"

The downfall and permanent desolation of Tyre is one of the most memorable accomplishments of prophecy which the annals of the world exhibit. The sins which sealed its ruin were, in the words of the sacred writers, these: "Because that Tyrus hath said against Jerusalem, Aha, she is broken that was the gates of the people; she is turned unto me: I shall be replenished, now she is laid waste" (Ezek. xxvi, 2). "Because thine heart is lifted up, and thou hast said, I am a god, I sit in the seat of God, in the midst of the seas" (xxviii, 2). "The children also of Judah and the children of Jerusalem have ye sold unto the Grecians, that ye might remove them far from their border" (Joel iii, 6).

**TYRE, COUNCIL OF.** The Arians, through Eusebius of Nicomedia, obtained the convocation of this council from the emperor Constantine, A.D. 335, under pretext of thereby healing the divisions which existed among the bishops; but their real intention was to oppress Athanasius. The bishops who were summoned to attend were selected by the Eusebian party, and came from Egypt, Libya, Asia, and most of the eastern provinces. The most noted were Marius of Chalcedon, Theognis of Nicæa, Ursaces of Singedunum, and Valens of Mursia; in all about sixty Arian bishops attended. There were also a few bishops present who were not of the Eusebian faction, as Maximus of Jerusalem, Marcellus of Ancyra, Alexander of Thessalonica, etc. Constantine sent the count Dionysius to keep order, who, as the event showed, was completely devoted to the Eusebian cause, and by his violence destroyed all liberty of debate.

Athanasius, compelled by the order of the emperor, came to the council, attended by forty-nine Egyptian bishops, among whom were Potamon and Paphnutius. No accusation was brought against Athanasius on account of his faith; but he was arraigned for having killed a Meletian bishop named Arsenius, and for having forcibly broken into a church while Ischyrius, a pretended priest, was celebrating; and for having overturned the altar and broken the sacred chalice. He was made to stand as a criminal, while Eusebius and the others sat as his judges, against which treatment Potamon of Heraclea made a vehement protest, heaping reproaches upon Eusebius. From the very first the Egyptian bishops protested against the proceedings; but their objections were not heeded. Sozomen says that Athanasius appeared frequently before the council, and defended himself admirably, listening quietly to all the calumnious accusations brought against him, and replying with patience and wonderful sagacity. However, his enemies, not contented with the charges which they had already brought against him, dared to impeach his purity, and introduced into the council a debauched woman, whom they had bribed to assert that she had been ravished by him. The utter falsehood of the charge was, however, triumphantly proved; for Athanasius having deputed one of his priests, named Timotheus, to reply for him, the woman, who was ignorant even of the person of the holy bishop, mistaking Timotheus for him, declared that he was the man who had offered violence to her at such a time and place.

Neither were his accusers more successful in their endeavor to fix upon him the murder of Arsenius, who, in the midst of their false statements, appeared before the council alive. Foiled in both these infamous attempts, the Arians were filled with fury, and endeavored to offer violence to him, in which, however, they were prevented by the officers of Constantine. Nothing now remained but the charge of having broken the chalice, and there being no proof ready, and the clergy of the country where the offence was said to have taken place having solemnly sworn to the falsehood of the charge, a deputation was sent to make inquiry on the spot (in the Mareotis), composed of the most decided of his enemies. In the meantime, Athanasius, seeing that his condemnation, by fair means or foul, was resolved, withdrew from Tyre. The deputies, upon their return, declared that they had found the charge correct; and upon this statement, sentence of deposition was pronounced, on the plea of his having been convicted of a part of the accusation brought against him. More than fifty bishops protested against the acts of this assembly. See Maus, *Concil.* ii, 435. See **ATHANASIUS**.

**Tyr'ian** (Τύριος), a native or inhabitant of the city of Tyre (Eccles. xlv, 18). The corresponding Heb. word (טַרְיִי, *Tsori*) is rendered by the indirect phrase "of Tyre" in the A. V. (1 Kings vii, 14; 1 Chron. xxii, 4; 2 Chron. ii, 14; Ezra iii, 7; Neh. xiii, 16), and so likewise the Greek (1 Esdr. v, 55; 2 Macc. iv, 10; Acts xii, 20).

**Tyrimmas**, in Greek mythology, was a friend of Ulysses, with whom the latter lived while on his journey from Troy to Epirus to consult the oracle about the war. Tyrimmas had a beautiful daughter, Erippe, whom Ulysses loved, and by whom he begot a son, Euryalus.

**Tyrius** (i. e. the Tyrian), in Greek mythology, was an epithet of *Hercules*, as adored in Cyprus.

**Tyrōnēs DEI** (*new soldiers of God*), a name given, in the early Church, to catechumens, by Tertullian (*De Penitent.* c. 6) and Augustine (*De Fide ad Catechumen.* ii, 1), because they were just entering upon that state which made them soldiers of God and candidates of eternal life. See Bingham, *Christ. Antiq.* bk. x, ch. i, § 1.

**Tyropœon** (Τυροποιών, *of the cheese-makers*), the name of a valley (φάραξ) in Jerusalem, mentioned only by Josephus who says that the city "was built, one quarter facing the other, upon two hills, separated by an intervening valley, at which over against each other the houses terminated." Again, "The valley of the Tyropœon, which, I have said, divided the hill of the upper town from that of the lower, extended as far as Siloam, . . . a fountain whose waters are sweet and copious" (*War*, v, 4, 1). He also tells us that the "other hill, called Akra, which sustained the lower city," lay opposite to Mount Moriah, from which it was separated by "another broad valley;" and, further, that the whole city, situated on these two hills, "lay over against the Temple in the manner of a theatre" (*Ant.* xv, 11, 5). Notwithstanding this repeated and seemingly definite notice, the position of the valley is still a matter of dispute. Dr. Robinson, in accordance with his theory of the site of Akra (q. v.), and of the topography of ancient Jerusalem in general, maintains that it is the small valley on the north of Zion; and the English engineers have determined that this chasm, although now inconsiderable, was formerly much deeper, being filled up with the rubbish of ages. Most archaeologists, however, have regarded the "Valley of the Cheesemongers" as identical with the conspicuous and important one leading from the Damascus gate to the Pool of Siloam, which in all ages has been the principal drain of the internal waters of the city (Thomson, *Land and Book*, ii, 470; Pierotti, *Jerusalem Restored*, i, 19). See **JERUSALEM**.

**Tyrrhēnus**, in Greek mythology, was a son of Hercules and Omphale, or a son of Telephus and Hiera, and a brother of Tarchon; or a son of Atys and Calli-thea, and brother of Lydus. He is said to have introduced the use of the great sea-shell as a trumpet. He colonized that part of Italy named after him at the time of his flight from Mæonia because of starvation.

**Tyrrhus**, in ancient Italian mythology, was a chief shepherd of Latinus, king of Italy. He was the owner of a beautiful tame deer which Silvia nursed, bathed, and ornamented with flowers. The Fury Alecto, sent from Tartarus, chased this deer, so that it came within reach of Ascanius, who wounded it, whereupon it fled towards home. The angry shepherd and his sons, and invisibly the Furies also, assembled the neighboring inhabitants, and this was popularly assigned as the original cause of the war which Æneas was obliged to carry on with the Latins in Italy.

**Ty'rus** (Τύρος), the Greek form of the name of two places in Palestine.

1. The well-known city of TYRE (q. v.), as the name is usually Anglicized, but "Ty'rus" in the A. V. in certain passages (Jer. xxv, 22; xxvii, 3; xlvii, 4; Ezek. xxvi, 2, 3, 4, 7, 15; xxvii, 2, 3, 8, 32; xxviii, 2, 12; xxix, 18; Hos. ix, 13; Amos i, 9, 10; Zech. ix, 2, 8; 2 Esdr. i, 11. Judith ii, 28; 1 Macc. v, 15; 2 Macc. iv, 18, 32, 44, 49).

2. A place described by Josephus as lying "between Arabia and Judæa, beyond the Jordan, not far from the country of Heshbon," where Hyrcanus built a strong castle, of a sumptuous character, as the centre of his power in that region (*Ant. xii, 4, 11*). It has been identified in modern times with the magnificent ruins *Arak el-Emir*, four hours from Heshban, which Tristram minutely describes as corresponding to the statements of the Jewish historian (*Land of Israel*, p. 529).

TYRUS, LADDER OF. See LADDER OF TYRE.

**Tyson, MICHAEL**, a learned English divine, was born in the parish of All-Saints, Stamford, Nov. 19, 1740. He was educated at Benedict College, Cambridge, where he received his degrees; that of A.B. in 1764, A.M. in 1767, and B.D. in 1775. After taking his bachelor's degree, he was elected a fellow of his college. In 1766 he travelled with Mr. Gough (afterwards the celebrated antiquarian), and, after his return in the following year, was elected a fellow of the Society of Antiquaries, and in 1769 a fellow of the Royal Society. In 1770 he was ordained deacon at Whitehall Chapel; and in 1773 received the officialty of the archdeaconry of Huntingdon from his father. He was, at the same time, bursar of the college, and succeeded to the cure of St. Benedict's Church, Cambridge. In 1776 he became Whitehall preacher, and in the same year was presented by the college to the rectory of Lambourne, near Ongar, Essex. He died May 3, 1780. Mr. Tyson wrote an ode *On the Birth of the Prince of Wales*, and another, *An Ode to Peace*. He was also an excellent draughtsman and painter.

**Tyssens, PETER**, a Flemish painter, was born at Antwerp in 1625; and, after the death of Rubens and Vandyck, was considered one of the ablest painters of his time. He was made director of the Academy at Antwerp in 1661. "His compositions are copious and ingenious, his design more correct than is usual with painters of his country, his coloring strong, clear, and harmonious." He died, according to best authorities, in 1692. Among his works most worthy of notice are, *The Martyrdom of St. Benedict*, Church of the Capuchins, Brussels:—*The Crucifixion*, at the Church of the Barefooted Carmelites:—*The Assumption of the Virgin*, Church of St. James, Antwerp. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Tzschirner, HEINRICH GOTTLIEB**, a German theologian and orator, was born Nov. 14, 1778, at Mitweida, in Saxony. He graduated at Leipsic, and in February, 1800, became an adjunct to the philosophical faculty at Wittenberg. His lectures were principally concerned

with empirical psychology, and yielded fruit in the works *Leben u. Ende merkw. Selbstmörder nebst Abhandl. üb. d. Selbsta'nd* (1805):—*Ueber d. moral. Indifferentismus*:—and *Verwandschaft d. Tugenden und Laster*. He was also associated with Manchart in the publication of the *Neues Repert. f. empir. Psychologie*. In 1801 the sickness of his father called him away from the university, and he became first assistant, and, after the decease of his father, deacon at Mitweida. At that time he began a history of apologetics, but published only one volume (Leips. 1805). In the same year he was received into the theological faculty at Wittenberg, and in 1809 he removed to Leipsic, where he remained until his death, with a temporary interruption occasioned by the war of deliverance from French domination, in which he served as chaplain and gained the decoration of the green cross (1813). The literary fruitage of his campaign is contained in the volume *Ueber den Krieg*, etc. (Leips. 1815). He died Feb. 17, 1823, regretted by the whole community of Leipsic.

Tzschirner's theological tendency was that known in his day as æstheticism, whose aim was the reconciliation of rationalism and supranaturalism. He regarded Christianity as being in its nature a religion of reason, though introduced by a supernatural revelation. See *Briefe, veranl. durch Reinhard's Geständnisse* (Leips. 1811), and *Briefe eines Deutschen an Chateaubriand*, etc., published by Krug. His *Dogmatik* (published by Hase, Leips. 1829) is non-committal, and contents itself with merely stating the differences of the two great opposing schools of thought in Protestant theology (see Röhr, *Krit. Prediger-Bibliothek*, x, 1). He was rather a historian than a systematic theologian, and disposed to hide himself behind his work. He added the two final volumes to Schröckh's *Church History since the Reformation*; but his principal work, according to his own judgment, is his *Fall des Heidenthums*, published by Niedner (Leips. 1829).

The period following the Napoleonic wars and beginning with the jubilee of the great Reformation (1817), developed Tzschirner into a foremost defender of Protestantism and popular freedom. Enthusiastically inspired by the study of the great past of the Evangelical Church, he yet refused to confine himself to the letter of Luther's authority, but insisted upon the exercise of the Protestant principle of intellectual liberty. In view of the fact that timid statesmen endeavored to repress the enthusiasm of the nation consequent on the defeat of Napoleon, and that Romanists and would-be perverts to Romanism charged upon Protestantism the originating and development of every revolutionary tendency and excess, he devoted his brilliant diction and incisive thought to the demonstration that Protestantism tends to mature the intelligence and fix the principles of peoples; and that it therefore tends to peace and quietness, and is more favorable to any legitimate form of settled government than Romanism. Numerous works, some of which became famous and were translated into foreign languages, were the result of this effort—e. g., *Katholicismus u. Protestantismus aus dem Standpunkte der Politik* (1822). He also wrote in behalf of oppressed Protestants in France, Sardinia, and Hungary (1824), and of the liberties of Greece (1821). His Protestant contemporaries, for their part, gave him many tokens of their appreciation of his labors in their behalf, among them the king of Denmark, who in 1826 conferred on him the Order of Danebrog.

Tzschirner had taken Reinhard for his model as a pulpit orator. His sermons are occasionally models of pulpit eloquence. They were carefully elaborated and strictly memorized, sometimes pervaded with a poetic spirit and great freshness, and characterized by the frequent use of matter drawn from Church history. His personality, voice, and manner in the pulpit gave him great power over his audiences, despite difficulties he experienced with his respiratory organs. Five volumes and several separately published *Sermons* by Tzschirner

are extant. His views respecting the effect of rationalistic principles upon the preacher are contained in the article *Dass die Verschiedenheit d. Dogmen Systeme kein Hinderniss des Zwecks d. Kirche sei*, in *Magazin für christl. Prediger*, 1823. His theory of homiletics sets forth that homiletics "is the art of edifying by means of speech which harmonizes with the forms of beauty and excites into activity all the faculties of the soul, subject to the purpose of promoting piety and vir-

tue, for which the Church exists" (see Röhr, *ut sup.* ii, 2, p. 243, art. "Tzschirner als Homiletiker").

*Literature*.—Krug, *Tzschirners Denkmal*, etc. (Leips. 1823); H. G. Tzschirner, etc. (2d ed. ibid. 1828); Goldhorn, *Dr. H. G. Tzschirner*, etc. (1828); Röhr, *Krit. Prediger-Bibl.* i, § 126; Tittman, *Memoria Tzschirners* (Lips. 1829); and many others. See also Herzog, *Real-Encyklop.* s. v., where an extended list of Tzschirner's numerous works is given.

## U.

**Ubal dini**, ROGER, archbishop of Pisa in 1276, was noted for his cruelty as a Ghibelline chief. Having captured Ugolino and his sons of the opposite party, he shut them up in a room and left them to die of hunger.

**Ubbonites**, the followers of Ubbo Phillips, who constituted a moderate class among the fanatical Anabaptists of Germany in the 16th century, and originated about 1534. Ubbo was born at Leeuwarden and became a Romish priest, but with his brother, Dirk Phillips, renounced the papacy as corrupt, and joined the party of the Anabaptists, in which both became leaders. The Ubbonites agreed with the Anabaptists with respect to the sacraments, the incarnation of Christ, and the freedom of the human will, but they did not teach that Christ's kingdom is of the earth and that the ungodly should be extirpated. They held, instead, that his kingdom is spiritual and subject to persecutions, and that it must be constantly renewed by regularly called apostles. They rejected the doctrine of divorce, and regarded themselves as the true Church. They denominated their meetings for worship "admonitions" and their ministers "admonishers," and they taught the necessity to an effective discipline of the rigid use of excommunication. Both Ubbo and Dirk disapproved of the fanatical outbreak at Münster, and the former acknowledged in a public confession that he heartily regretted that he had permitted himself to be deceived and that he had performed consecrations. He eventually separated from the sect and the party he had founded and entered the communion of the Reformed Church. He died in 1568. See Jehring, *Gründl. Historie . . . der Taufgesinnten oder Mennoniten*, etc. (Jena, 1720); Bergmann, *De Ubbone Philippo et Ubbonitis* (Rost. 1733).—Herzog, *Real-Encyklop.* s. v.

**Ubertinus**, surnamed, from the village of his birth, *De Casali*, was a Franciscan monk of the 13th century, and belonged to the strict party which insisted upon a rigid observance of the vow of poverty, and regarded the life and work of our Saviour as constituting a mere preparation for a higher and more perfect æra of the Holy Ghost. They also denounced the condition of the papacy and of the entire Church as being utterly corrupt. Ubertinus was a pupil of Peter John Olivi (died 1297), who stood at the head of his party. He defended the tenets of his party in an apology for Olivi, which is given in Wadding, *Annales Minorum*, etc. (Romæ, 1733; ann. 1297), xxxvi, 380 sq., and was severely assailed. Pope Clement V and many others called him to account for his book, and Ubertinus thereupon resolved to sever his connection with his order. Pope John XXII permitted him to enter the Benedictine convent of St. Peter at Gemblours; but the monks refused to receive him, and it is said that he ultimately became a Carthusian. In the meantime, pope John had again demanded an explanation of his opinions respecting the poverty of Jesus, etc., and Ubertinus responded that Jesus could not be said to have had possession of property in any secular meaning of the words (see Wadding, *ut sup.* vi, 362 sq.). In addition to the above, Ubertinus wrote a sort of commentary on the Apocalypse, entitled *Tractatus de Septem Statibus Ecclesiæ* (Venet. 1516). The time and manner of his death are unknown. See Herzog, *Real-Encyklop.* s. v.

**Ubiety** (Lat. *ubi*, "where") is the presence of one thing to another, or the presence of a thing in place. The schoolmen distinguish ubiety as

1. *Circumscriptive*, by which a body is so in one place that its parts are answerable to the parts of space in which it is and exclude every other body.

2. *Definitive*, as when a human spirit is limited or defined in its presence to the same place, like a human body.

3. *Repletive*, as when the Infinite Spirit is present through every portion of space.

This last is sometimes called **UBIQUITY** (q. v.), and means the Divine Omnipresence. See Krauth, *Vocab. of Phil. Sciences*, s. v.

**Ubiquitarians** (from the technical term "ubiquity" [q. v.]), in ecclesiastical history, a sect of Christians which arose and spread itself in Germany, and whose distinguishing doctrine was that the body of Jesus Christ is everywhere, or in every place. Brentius, a follower of Luther, and one of the earliest Reformers, is said to have first broached this error in 1560. Luther himself, in his controversy with Zwingli, had thrown out some unguarded expressions that seemed to imply a belief of the omnipresence of the body of Christ; for instance, that the man Christ *could* be everywhere present, not that he was *always* and *everywhere* present. He saw, however, that this opinion was attended with great difficulties, and particularly that it ought not to be made use of as a proof of Christ's corporeal presence in the eucharist. However, after the death of Luther, this absurd hypothesis was renewed, and dressed up in a specious and plausible form by Brentius, Chemnitz, and Andræus, who maintained the communication of the properties of Christ's divinity to his human nature. It is, indeed, obvious that every person who believes the doctrine of consubstantiation, whatever he may pretend, must be a Ubiquitarian. The doctrine again became a subject of controversy early in the 17th century, between the divines of Tübingen and Giessen, the former supporting the Ubiquitarian theory, and the latter earnestly opposing it. The Ubiquitarians are strong opponents of the Calvinistic and Zwinglian theories of the holy eucharist, and their dogma is, in fact, a revolution from them. See Bergier, *Dict. de Théologie*, s. v.; Cramer, *Enchirid. Controvers. Ubiquit.* (1613); Dörner, *Person of Christ*, II, ii, 280 sq., 422; Mosheim, *Eccles. Hist.* V, iii, 153 sq.

**Ubiquity** (Lat. *ubique*, "everywhere") is the opinion of some German divines that the body of Christ is present everywhere by virtue of its union with his divine nature. It was adopted in 1577 as a mode of explaining the eucharistic Presence by those who compiled the Formula of Concord. The party was soon divided in opinion, some affirming that Jesus Christ during his mortal life was everywhere, others dating the ubiquity from the time of his ascension into heaven. See **UBIQUITARIANS**.

**Ublanizn**, in Slavonic mythology, was a domestic god of the Poles, whom the negligent, lazy people authorized to make greater conveniences, and to whom they intrusted the protection of their household furniture.

**Uboze** (*Ubosche*), in Slavonic mythology, was the

name given to the spirits of the departed, who appeared in the family circles of their relatives in the form of dwarfs. They were therefore worshipped and made harmless by being made to eat and drink.

**U'cal** (Heb. *Ukal'*, אַכַּל, in some copies, *Ukkal'*, אַכְכַּל). According to the received text of Prov. xxx, 1, Ithiel and Ucal must be regarded as proper names; and if so, they must be the names of disciples or sons of Agur the son of Jakeh, an unknown sage among the Hebrews. But there is great obscurity about the passage. The Sept. translates τοῖς πιστεύουσιν Θεῷ καὶ παύονται; the Vulg., *cum quo est Deus, et qui Deo secum morante confortatus*. The Arabic follows the Sept. to some extent; the Targum reproduces Ithiel and Ucal as proper names, and the Syriac is corrupt, Ucal being omitted altogether. Luther represents the names as *Leithiel* and *Uchal*. De Wette regards them as proper names, as do most translators and commentators. Junius explains both as referring to Christ. The Sept. probably read אַכְכַּל אֶל אֱלֹהִים. The Veneto-Greek has καὶ συνήσονται = אַכְכַּל. Cocceius must have pointed the words thus, אֶל אֱלֹהִים אַכְכַּל, "I have labored for God and have obtained;" and this, with regard to the first two words, must have been the reading of J. D. Michaelis, who renders, "I have wearied myself for God, and have given up the investigation," applying the words to a man who had bewildered himself with philosophical speculations about the Deity and had been compelled to give up the search. Bertheau also (*Die Sprüche Sal.* Einleit. xvii) sees in the words "I have wearied myself for God, and have fainted" (אֶל אֱלֹהִים אַכְכַּל) an appropriate commencement to the series of proverbs which follow. Hitzig's view is substantially the same, except that he points the last word אַכְכַּל, and renders, "and I became dull;" applying it to the dimness which the investigation produced upon the eye of the mind (*Die Spr. Sal.* p. 316). Bunsen (*Bibelwerk*, i, p. clxxx) follows Bertheau's punctuation, but regards אֶל אֱלֹהִים אַכְכַּל, on its first occurrence, as a symbolical name of the speaker. "The saying of the man 'I have wearied-myself-for-God; I have wearied myself for God, and have fainted away.'" There is, however, one fatal objection to this view if there were no others, and that is that the verb אַכְכַּל, "to be wearied," nowhere takes after it the accusative of the object of weariness. On this account alone, therefore, we must reject all the above explanations. If Bertheau's pointing be adopted, the only legitimate translation of the words is that given by Dr. Davidson (*Introd.* ii, 338), "I am weary, O God, I am weary, O God, and am become weak." Ewald considers both Ithiel and Ucal as symbolical names, employed by the poet to designate two classes of thinkers to whom he addresses himself, or, rather, he combines both names in one, "God-with-me-and-I-am strong," and bestows it upon an imaginary character, whom he introduces to take part in the dialogue. "The name 'God-with-me,'" says Keil (*Hävernich, Einleit.* iii, 412), "denotes such as gloried in a more intimate communion with God, and a higher insight and wisdom obtained thereby, while 'I-am-strong' indicates the so-called strong spirits who boast of their wisdom and might and deny the holy God, so that both names most probably represent a class of freethinkers who thought themselves superior to the revealed law, and in practical atheism indulged the lusts of the flesh." Both names are probably symbolical, but the exact import remains uncertain. See PROVERBS.

**Ucalōgon**, in Greek mythology, was an inhabitant of Troy, an elder honored in the senate. His dwelling-place adjoining the dwelling of Deiphobus was, with the latter's, entirely destroyed by fire.

**Uckewallists**, one of the sects into which the old Flemings, or strict Anabaptist followers of Menno,

divided. They took their name from *Uke Walles*, a native of Friesland, who published his sentiments in 1637. In conjunction with John Leus, he propagated a doctrine of Universalism, in which he entertained a favorable opinion of the eternal state of Judas and the rest of Christ's murderers. His argument was this—that the period of time which extended from the birth of Christ to the descent of the Holy Ghost was a time of deep ignorance, during which the Jews were destitute of divine light; and that, of consequence, the sins and enormities which were committed during this interval were, in a great measure, excusable, and could not merit the severest displays of the divine justice. He was excommunicated by the Mennonites of Groningen, and banished from the city by its magistrates, but settled down in East Friesland. This denomination strictly adhered to the doctrine of the Mennonites.

**Udæus**, in Greek mythology, was one of the followers of Cadmus, five of whom murdered each other. He was grandsire of Tiresias.

**Udainsakr**, in Northern mythology, is the name given to that part of the land of the blessed where, with all earthly wants, all sorrows are at an end, whose inhabitants neither sickness nor death befalls. This place is in possession of king Gudmund, who was ruler of Jotunheim. From this last fact it would seem to follow that Udainsakr was not a paradise of the Aes, but of the former inhabitants of Scandinavia, the Jotes.

**Udall, Ephraim**, a loyal Puritan divine of the 17th century, was educated at Emanuel College, Cambridge, where he took his degree of A.B. in 1609, and that of A.M. in 1614. His only preferment appears to have been the rectory of St. Augustine's, Watling Street, London, but the time of his admission is not stated. He was sequestered in 1643, having declared openly for episcopacy and the liturgy. He died in May, 1647. Mr. Udall published, *A Coal from the Altar:—A Sermon on Ps. xxix*, 11 (1629, 4to);—*Communion Comeliness* (1641, 4to), in which he recommends rails around the communion-table. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Udall, John**, a Nonconformist divine of the 16th century, was a great sufferer on account of his nonconformity. He died in Marshalsea prison about the end of 1592. He published, *Sermons* (1584-89, 6 vols. 8vo);—*A Demonstration of the Truth of that Discipline which Christ hath Prescribed* (1588, 4to), for which he was condemned to die;—*Commentarie on the Lamentations of Jeremy* (Lond. 1593, 4to);—*Key of the Holy Tongue*, etc. (Leyden, 1593, 12mo); said to be the first Hebrew grammar in English. Respecting Udall and his works, see Fuller, *Church History*; Hallam, *Constitutional Hist. of England*; D'Israeli, *Quarrels of Authors*; *Lond. Quar. Rev.* x, 104; (*Lond.*) *Genl. Mag.* XXII, i, 306; ii, 624; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Udall, Nicholas**, an English clergyman, was born in Hampshire in 1504 (others say 1506); and was admitted to Corpus Christi College, Oxford, June 18, 1520, where he became probationer fellow, Sept. 3, 1524. He wrote verses for the city of London pageant at the coronation of Anne Boleyn, May, 1533; took orders in the Church of England; and was made master of Eton School in 1534. In 1543 he was charged with complicity in the robbery of some college chapel plate, and for this is said by some to have been dismissed from the mastership of the school. He was vicar of Braintree, Essex, from 1537 to 1544; entered the service of queen Catherine Parr; in 1551 he became canon of Windsor; in 1552 was preferred to the rectory of Calbourne, Isle of Wight. He was appointed head-master of Westminster School in 1556; and died, according to some authorities, in December, 1556, but, according to a manu-

script note on a copy of Bale, in 1557. Udall was the author of several school-books, some poems, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Udine, Giovanni da**, an Italian painter (whose family name is variously called *Manni, Nanni* [contractions of *Giovanni*], and *Ricamatore*), was born at Udine probably in 1489. He became a pupil and afterwards an assistant of Raphael. On the sacking of Rome he fled to his native city; was afterwards engaged by the Medici in Florence; and returned to Rome in the pontificate of Pius IV, where he died, 1561. He painted *The Holy Virgin and Infant Christ*, at Udine; and two *Scripture Histories*, in the archiepiscopal palace, Udine. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Udine, Girolamo da**, another painter of Udine, Italy, flourished about 1540. Little is known of him. There is an altar-piece, *The Coronation of the Virgin*, in the Church of San Francesco, Udine, bearing his signature. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Udine, Martino da**, called *Pellegrino di San Daniello*, an Italian painter, was born, according to some authorities, at Udine about 1480; others say at the Castle of San Daniello, about ten miles distant. He studied with Giovanni Bellini during that artist's residence at Udine. Martino died about 1545. He executed many works for the churches and public buildings at Udine and San Daniello, among which are, *St. Joseph, with the Infants Christ and St. John*, in the cathedral at Udine;—*Virgin, with several Female Saints and St. John the Baptist*, an altar-piece in the Church of Santa Maria di Battuti;—several frescos of the *Life of Christ*, in the Church of San Antonio, San Daniello. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Udu**, an Accadian deity, and possibly the same with the Assyrian Samas, god of the sun.—Lenormant, *Chald. Magic*, p. 17.

**Udur** (the destruction), in Norse mythology, was one of the daughters of Æger and Ran.

**Udvarde**, THE COUNCIL OF, was held in 1309, under Charles I, king of Hungary, and Thomas, archbishop of Strigonia. It was decreed,

1. That the angelical salutation should be rung out at noon, or at the close of the day.
2. That the inhabitants of Buda should pay some impost which they had endeavored to evade.
4. The constitutions of cardinal Evade were read, and an order made that a copy should be sent to every prelate, to use in his own diocese; the other regulations have perished.

See Mansi, *Concil. Suppl.* iii, 335.

**Ueberweg, Friedrich**, a German historian of philosophy, was born near Solingen, Rhenish Prussia, Jan. 22, 1826. He studied at Göttingen and Berlin, was tutor at the university from 1852 to 1862, and was appointed professor of philosophy at Königsberg in the latter year. He died there, June 7, 1871. He wrote, *The Development of Consciousness by Teachers* (Berlin, 1853):—*System der Logik und Geschichte der logischen Lehren* (Bonn, 1857; 8d ed. 1868; English transl. by Thomas Lindsay, Lond. 1871):—*Grundriss der Geschichte der Philosophie von Thales bis auf die Gegenwart* (Berlin, 1862–66, 3 vols.; English transl. by Geo. S. Morris, N. Y. and Lond. 1874, 2 vols.):—*Hist. of Philosophy* (N. Y. 1876):—and other minor works.

**U'el** (Heb. *U'el*, *עֵל*, will of God, accord. to Gesen., but for *Abuel* [God is father], accord. to Fürst; Sept. *Οὐήλ* v. r. *Οὐήλ*, Vulg. *Uel*), a "son" of Bani who divorced his Gentile wife after the Captivity (Ezra x, 34). B.C. 458.

**Ughelli, Ferdinando**, an Italian ecclesiastical historian, was born at Florence, March 21, 1595. After pursuing his studies with credit, he took the habit of the Cistercians, and held several honorable posts in the or-

X.—R r

der. He was appointed abbot of Tre Fontane at Rome, procurator in his province, and counsellor to the Congregation of the Index. Popes Alexander VII and Clement IX esteemed Ughelli, and gave him a pension of five hundred crowns. He refused offers of several bishoprics. He died May 19, 1670. His principal work is *Italia Sacra, sive de Episcopis Italianis, et Insularum Adjacentium*, etc. (Rome, 1642–62, 7 vols. fol.; reprinted, Venice, 1717–22, 10 vols.):—also *Lives of the Cardinals of the Cistercian Order*, etc.

**Uginda** is a festival of praying observed among the Cheremisses, before harvesting-time, as an occasion for asking the special blessing of the god Ageberen for an abundant harvest.

**Ugolino, Blaïsio**, a Jewish convert of Venice, born in 1748, is best known as the editor of a stupendous work under the title *Thesaurus Antiquitatum Sacrarum complectens Selectissima Clarissimorum Virorum Opuscula, in quibus Veterum Hebræorum Mores, Leges, Instituta, Ritus Sacri et Civiles Illustrantur* (Venet. 1744–69, 34 vols. fol.). This *Thesaurus* contains what the title indicates. The republic of learning of the 17th and 18th centuries is here represented. The names of Buxtorf, Trigland, Witsius, Goodwin, Hottinger, Pfeiffer, Sigonius, Rhenferd, Bonfere, Selden, Lowth, Reland, Huet, Bochart, Cellarius, Prideaux, Claverius, Opitz, Van Til, Carpov, Saubertius, Spencer, Deyling, Wagenseil, etc., are found among the contributors to the *Thesaurus*, which forms a library in itself. Of course most of the works of the authors mentioned are published separately, but, being scarce, this *Thesaurus* will always be perused with great profit by such as have the good luck to be near great libraries which can afford to keep this stupendous work on their shelves. Besides the scholars mentioned above, the editor himself has largely contributed to this work. His translations of the Midrashim and some of the Talmudical treatises, found in vol. xiv, xv, xvi, xvii, xviii, xix, xxv, are of great importance. The following is a general index of the contents:

- Vol. i treats of sacred seasons among the Jews.
- Vol. ii, iii, and iv treat of Jewish antiquities.
- Vol. v and vi relate to sacred geography.
- Vol. vii, viii, ix, x, xi, xii, and xiii bear upon the tabernacle, Temple, priesthood, and all matters connected with the same.
- Vol. xiv, xv, xvi, and xvii contain translations of the Midrashim, such as *Mechilta*, *Siphra*, *Siphre*, *Pesikta*, and of *Tosaphoth*, or additions to the Talmud.
- Vol. xviii, xix, and xx contain translations of different Talmudical treatises.
- Vol. xxi treats of the synagogue, rites, phylacteries, and prayers of the Jews.
- Vol. xxii treats of Jewish sects and proselytes.
- Vol. xxiii treats of Gentile deities.
- Vol. xxiv treats of Jewish theocracy.
- Vol. xxv, xxvi, and xxvii treat of Jewish civil law.
- Vol. xxviii treats of Jewish, Samaritan, and Phœnician coinage.
- Vol. xxix treats of vestments.
- Vol. xxx has reference to the rites of marriage, divorce, and of Biblical medicine.
- Vol. xxxi and xxxii treat of Hebrew poetry and musical instruments.
- Vol. xxxiii relates to mourning and burial rites and usages.
- Vol. xxxiv forms a fourfold index to the whole, giving an *Index Auctorum, Locorum S. Scripturæ, Dictionum Hebraicarum, and Rerum et Verborum*.

A complete list of the contents of the single volumes is given by Meusel, *Bibliotheca Historica*, I, i, 118–42; and Darling, *Cyclop. Bibliog.* s. v. (B. P.)

**Uhland, Ludwig Joseph**, a German doctor and professor of theology, was born at Tübingen, May 15, 1722, where he also died, Dec. 15, 1803. He wrote, *De Hist. Restaurati post Diluv. Orbis ab Exitu Noë ex Arca usque ad Dispersionem Gentium* (Tub. 1761):—*De Ordine Vaticanorum, quæ in Sedecim Prophet. Scripta Extant, Chronologicè* (ibid. 1778):—*Annotaciones ad Loca quædam Amosi, Imprim. Historica* (ibid. 1779–80):—*Annotaciones in Hoseæ Cap. iii* (ibid. 1787); *Cap. v, vv. 1–3* (ibid. 1789); *Cap. vi, 4–11*; *vii, 1–6* (ibid. 1790); *Cap.*

viii (ibid. 1791); *Cap. ix* (ibid. 1792):—*Dissertatio Ezegetica in Hagg. ii, 1-9* (ibid. 1789). See Winer, *Handbuch der theol. Literatur*, i, 225-226, 230, 553; ii, 810; Fürst, *Bibl. Jud.* iii, 457 sq. (B. P.)

**Uhle**, AUGUST GEORG, a Protestant theologian of Germany, was born Jan. 16, 1787, at Brunswick. He studied theology and philosophy at Helmstedt. For a time he instructed at the Orphanage in Brunswick, when, in 1770, he was called as pastor to the Church of St. Egidius at Hanover. In 1793 the learned society at the Hague awarded to him the second prize for his dissertation *De Jesu Christo Vero Dei Filio*; and in the same year he was made member of consistory and first court-preacher. In 1794 he was appointed general superintendent, and in 1801 he was honored with the doctorate by the Göttingen University. He died May 12, 1804. Uhle was not only very well acquainted with the ancient classical writers, but also with the writings of Hume, Robertson, Gibbon, Tillotson, Saurin, etc. In philosophy he leaned more towards the system of Leibnitz and Wolf than that of Kant; he was less satisfied with Fichte and Schelling. Among the German pulpit orators of the last century Uhle holds a prominent place. For his writings, see Döring, *Deutsche Kanzelredner*, p. 551. (B. P.)

**Uhlemann**, FRIEDRICH, a German doctor and professor of theology, was born at Zeitz, Nov. 26, 1795, and died at Berlin, April 19, 1864. He is the author of *Hebräische Sprachlehre* (Berlin, 1827):—*Elementarlehre der syrischen Sprache* (ibid. 1829; 2d ed. 1857; Engl. transl. by E. Hutchinson, N. Y. 1855):—*Institutiones Linguae Samaritanæ: acced. Chrestomath. Samar. cum Glossario* (Lips. 1837):—*De Variis Canticis Canticoorum Interpretandi Ratione* (Berlin, 1839):—*Anleitung zum Uebersetzen aus dem Deutschen in die Hebräische* (ibid. 1839-41, 2 pts.):—*Symeon der erste Säulenheilige in Syrien und sein Einfluss auf die weitere Verbreitung des Christenthums im Orient* (Leips. 1846). See Zuchold, *Bibl. Theol.* ii, 1361; Fürst, *Bibl. Jud.* iii, 457; Stein-schneider, *Bibliog. Handb.* p. 142. (B. P.)

**Uhlich**, LEBERECHT, a German sectary, the head of the so-called *Lightfriends* (Lichtfreunde), was born Feb. 27, 1799, at Köthen. He studied theology at Halle from 1817 to 1820 under Wegscheider, was tutor at Köthen, and in 1827 he went to Prussia as pastor in Pömmelte, near Schönebeck. In 1841 he organized the liberal preachers' meetings at Gnadau, which finally led to the formation of the Society of the Protestant Friends, or *Lichtfreunde*. Uhlich became the spiritual head of this movement, and soon obtained adherents in different countries, especially in the north of Germany. He went from place to place for the purpose of presiding at the meetings held by his adherents, until, in 1845, he was forbidden to leave his parish without permission. In the same year he was called to St. Catharine's Church in Magdeburg, where he went on in his usual way. But his low views of Christianity brought him into conflict with his consistory, until he was finally suspended from his office in September, 1847. He now left the Church and put himself at the head of a free religious congregation at Magdeburg, where he labored until March 23, 1872. Uhlich was a preacher of considerable popular eloquence and managing talent, sincere withal, and of an unblemished character; but his very low views of Christianity finally led him to a philanthropico-pantheistic naturalism, which he presented in a popular manner before his audience. Speaking of the Dissenting sects in Germany, Dr. Schaff, with regard to the Lichtfreunde, says, "It is deeply humiliating that a superficial rationalism which was supposed to be dead and buried could create such a commotion in a state like Prussia, and on the classical soil of the Lutheran Reformation. But the emptiest wagons often make the greatest noise" (*Germany, its Universities*, etc., p. 144). Of course it was only a noise, and hence as "for the development of the history of doctrines, the Protestant Friends," as Hagenbach says, "have only

a negative importance, and their place is rather in the transient story of the day than in the earnest history of religious truth" (*Hist. of Doctrines*, ii, 410). Uhlich wrote a great deal, and his publications consist mainly of sermons and discourses, for which see Zuchold, *Bibl. Theol.* ii, 1361 sq. See also his *Autobiography* (Magdeburg, 1872); *Theologisches Universal-Lex.* s.v.; Niedner, *Kirchengeschichte*, p. 912 sq. (B. P.)

**Ujen**, in Hindû mythology, was a celebrated king in the dynasty of the Children of the Moon. He was married to Marwa, who presented him with two daughters, Mirkinda and Lashmene, two of the seven princesses that became Krishna's first wives.

**Ukko** (the ancient or honorable) was the chief god of the Finns, "the celestial old man," "the god of heaven." He was the first of the trinity composed of himself, Wäinämöinen, and Ilmarinen. He appeared sometimes even as a first principle, whence his surname of *Ylijumala*, "the supreme god." In case of wounds, the secondary deities were resorted to for a cure; but, in order to complete and consolidate the work of the lesser divinities, the intervention of Ukko was needed. The cure of a wound needing the formation of new flesh was considered a regular act of creation, and therefore the help of the creative power himself was necessary.

**Ukkuma**, the great spirit of the Esquimaux, a being of infinite goodness, to whom they apply for the satisfying of all their wants.

**Uknaz**. See KENZAZ 4.

**U'lai** [many U'lai] (Heb. *Ulay*, אֵילַי [in pause אֵילַי], probably *Pehlvi Am-Halesh*, i. e. "pure water;") Sept. *Oûlai*; Theodotion, *Oûβάλ*; Vulg. *Ulai* is mentioned by Daniel (viii, 2, 16) as a river near Susa, where he saw his vision of the ram and the he-goat. It has generally been identified with the *Eulæus* of the Greek and Roman geographers (Marc. Heracl. p. 18; Arrian, *Exp. Al.* vii, 7; Strabo, xv, 3, 22; Ptolemy, vi, 3; Pliny, *H. N.* vi, 31), a large stream in the immediate neighborhood of that city. This identification may be safely allowed, resting as it does on the double ground of close verbal resemblance in the two names, and complete agreement as to the situation. The *Eulæus* has been by many identified with the *Choaspes*, which is undoubtedly the modern *Kerkhah*, an affluent of the Tigris, flowing into it a little below Kurnah. By others it has been regarded as the *Kuran*, a large river considerably farther to the eastward, which enters the Khor Bamishir, near Mohammerah. Some have even suggested that it may have been the *Shapur* or *Sha'ur*, a small stream which rises a few miles N. W. of Susa, and flows by the ruins into the Dizful stream, an affluent of the Kuran.

1. The general grounds on which the *Eulæus* has been identified with the *Choaspes*, and so with the *Kerkhah* (Salmasius, Rosenmüller, Wahl, Kitto, etc.), are the mention of each separately by ancient writers as "the river of Susa," and, more especially, the statements made by some (Strabo, Pliny) that the water of the *Eulæus*, by others (Herod., Athenæus, Plutarch, Q. Curtius) that that of the *Choaspes*, was the only water tasted by the Persian kings. Against the identification it must be noticed that Strabo, Pliny, Solinus, and Poly-clitus (ap. Strabo, xv, 3, 4) regard the rivers as distinct, and that the lower course of the *Eulæus*, as described by Arrian (*Exp. Al.* vii, 7) and Pliny (*H. N.* vi, 26), is such as cannot possibly be reconciled with that of the *Kerkhah* river.

2. The grounds for regarding the *Eulæus* as the *Kuran* are decidedly stronger than those for identifying it with the *Kerkhah* or *Choaspes*. No one can compare the voyage of Nearchus, in Arrian's *Indica*, with Arrian's own account of Alexander's descent of the *Eulæus* (vii, 7) without seeing that the *Eulæus* of the one narrative is the *Pasitigris* of the other, and that the *Pasi-*

**tigris** is the Kuran is almost universally admitted. Indeed, it may be said that all accounts of the *lower Eulæus*—those of Arrian, Pliny, Polyclitus, and Ptolemy—identify it, beyond the possibility of mistake, with the *lower Kuran*, and that so far there ought to be no controversy. The difficulty is with respect to the *upper Eulæus*. The Eulæus, according to Pliny, surrounded the citadel of Susa (vi, 27), whereas even the Dizful branch of the Kuran does not come within six miles of the ruins. It lay to the west, not only of the Pasitigris (Kuran), but also of the Coprates (river of Dizful), according to Diodorus (xix, 31). So far, it might be the *Shapur*, but for two objections. The Shapur is too small a stream to have attracted the general notice of geographers, and its water is of so bad a character that it could never have been chosen for the royal table (*Geograph. Journ.* ix, 70). There is also an important notice in Pliny entirely incompatible with the notion that the short stream of the Shapur, which rises in the plain about five miles to the N.N.W. of Susa, can be the true Eulæus. Pliny says (vi, 31) the Eulæus rose in *Media*, and flowed through Mesobabene. Now, this is exactly true of the upper Kerkhah, which rises near Hamadan (Ecbatana), and flows down the district of Mahabadan (Mesobabene).

The result is that the various notices of ancient writers appear to identify the upper Eulæus with the upper Kerkhah, and the lower Eulæus, quite unmistakably, with the lower Kuran. A recent survey of the ground has suggested a satisfactory explanation. It appears that the Kerkhah once bifurcated at Pai Pul, about twenty miles north-west of Susa, sending out a branch which passed east of the ruins, absorbing into it the Shapur, and flowing on across the plain in a S.S.E. direction till it fell into the Kuran at Ahwaz (Loftus, *Chaldæa and Susiana*, p. 424, 425). Thus, the upper Kerkhah and the lower Kuran were in old times united, and might be viewed as forming a single stream. The name Eulæus (Ulai) seems to have applied most properly to the eastern branch stream from Pai Pul to Ahwaz; the stream above Pai Pul was sometimes called the Eulæus, but was more properly the Choaspes, which was also the sole name of the western branch, or present course, of the Kerkhah from Pai Pul to the Tigris. The name Pasitigris was proper to the upper Kuran from its source to its junction with the Eulæus, after which the two names were equally applied to the lower river. The Dizful stream, which was not very generally known, was called the Coprates. It is believed that this view of the river names will reconcile and make intelligible all the notices of them contained in the ancient writers. It follows from this that the water which the Persian kings drank, both at the court and when they travelled abroad, was that of the Kerkhah, taken probably from the eastern branch, or proper Eulæus, which washed the walls of Susa, and (according to Pliny) was used to strengthen its defences. This water was, and still is, believed to possess peculiar lightness (Strabo, xv, 3, 22; *Geograph. Journ.* ix, 70), and is thought to be at once more wholesome and more pleasant to the taste than almost any other.

See Porter, *Travels*, ii, 412; Kinneir, *Persian Empire*, p. 100-106; Sir H. Rawlinson, in *Geograph. Journ.* ix, 84-93; Layard, *ibid.* xvi, 91-94; Loftus, *Chaldæa and Susiana*, p. 424-431.

**U'lam** (Heb. *Ulam'*, אֱלָם, *porch*; Sept. Οὐλάμ v. r. occasionally Αἰλέμ), the name of two Hebrews.

**1.** First named of the two sons of Sheresh and father of Bedan in the Gileadite posterity of Manasseh (1 Chron. vi, 16, 17). B.C. cir. 1618.

**2.** The first-born of Eshek among the descendants of king Saul, and the ancestor of one hundred and fifty valiant archers (1 Chron. viii, 39, 40). B.C. cir. 588.

**Ulber**, CHRISTIAN SAMUEL, a Protestant theologian of Germany, was born Aug. 26, 1714, at Landsbut, in Silesia. He studied at Jena; was appointed pastor

at Heinersdorf, in Silesia, in 1737; in 1741 he was called to his native place, and in 1757 to Hamburg, where he died Aug. 27, 1776. Ulber was not only a man of great learning, but also a good pulpit orator. His numerous writings are more of an ascetical nature, valuable indeed for their time, but less so now. They are enumerated in Döring, *Gelehrte Theologen Deutschlands*, iv, 547 sq. (B. P.)

**Ulenberg**, CASPAR, a Roman Catholic priest of Germany, was born of Lutheran parents in 1549, at Lippstadt. He studied at Wittenberg. At Cologne he succeeded in bringing back a cousin of his, who had become a Roman Catholic, to the Lutheran Church; but in 1572 they both joined the Catholic Church, and Ulenberg was appointed teacher at Cologne. In 1575 he received holy orders, was appointed pastor at Kaiserswerth, and in 1583 was made canon of the Church of St. Swibertus. From 1593 to 1615 he stood at the head of the gymnasium in Cologne, where he died as pastor of St. Cuniberts, Feb. 16, 1617. He is the author of *Die Psalmen Davids in allerlei deutsche Gesangsreimen gebracht* (Cologne, 1582; 5th ed. 1709). See Koch, *Gesch. des deutschen Kirchenliedes*, ii, 442 sq. (B. P.)

**Ulfilas** (**Ulphilas**, **Ulfila**, or **Wulfila**, prob. = *Vulfila*, or "wolfkin"), a Gothic bishop, was born among the Goths in 310 (or 311, or 313), and is believed to have belonged to a family of Cappadocian Christians whom the Goths had carried into captivity (Philostorg. *Hist. Eccles.* ii, 5). Having mastered the Gothic, Greek, and Hebrew languages, he became bishop of the Goths in 341, and (according to Auxentius) in 348 settled, with permission of the emperor Constantius, in Mæsan territory, near Nicopolis. He propagated among his people the love of letters, formed an alphabet of twenty-four characters, based on the Greek, and translated into Mæso-Gothic the whole Bible, excepting Kings. Ulfilas was a semi-Arian, subscribed to the Creed of Rimini in 359, was at the Synod of Constantinople in 360, and died while attending the Œcumenical Council of 381. Ulfilas's Bible was constantly used by the Gothic people so long as they maintained their nationality, but in the 9th century it disappeared. In the latter part of the 16th century, Arnold Mercator discovered in the Abbey of Werden a fragment containing the four gospels. It was the so-called *Codex Argenteus*, written with silver letters on purple parchment. It is now preserved at Upsala, Sweden. Another fragment, containing nearly all the epistles of St. Paul, was discovered in 1818 on some palimpsests by cardinal Mai and count Castiglioni in the Lombardian monastery of Bobbio, and published at Milan (1819-39). See **GOthic VERSION**. Among its recent editors and commentators are Gabelenz, Löbe, Massmann, and Stamm. A new edition by Bernhardt appeared at Halle in 1876. See Bessel, *Ueber das Leben des Ulfilas und die Bekehrung der Gothen* (1860); Waitz, *Ueber das Leben und die Lehre des Ulfila* (1840).

**Ulfuna**, in Norse mythology, was one of the nine beautiful giant-maidens, and became mother of the god Heimdal, the guard of heaven.

**Ulin**, JOHN, a minister of the Methodist Episcopal Church, was born in Virginia in 1792 or 1798. After preaching ten or eleven years as a local preacher, he was admitted to the Ohio Conference in 1826. He died of the cholera, near New Richmond, O., July 13, 1833. Success attended his ministry. See *Minutes of Annual Conferences*, ii, 276.

**Ullius**, in Greek mythology, was a surname of *Apollo*. It is uncertain whether he carried this name as a god of destruction or preservation. To him Theseus made an oath conditioned upon his safe return from Crete.

**Ull'la** (Heb. *Ulla'*, אֱלָלָה, *yoke or burden*; Sept. Οὐλά v. r. Οὐλά; Vulg. *Olla*), a descendant of Asher (perhaps the son of Jether or Ithran), and the father of four sons esteemed among the valiant chiefs of the tribe (1 Chron. vii, 39). B.C. apparently cir. 1014.

**Ullan Machaitæ**, in the religion of the Lamaïtes, was a sect calling themselves the *Red-caps*. They do not recognise Dalai-Lama as their head, but have their own chief, Bogdo Lama. The sovereignty belongs to the emperor of China.

**Uldra**, in the superstition of the Norwegians, was the name of the river deity upon whom depended success and blessing in fishing. His favor was sought in like manner to that of Nipen.

**Uller**, in Norse mythology, was the son of the beautiful golden-haired Sif, second wife of Thor; not by Thor, however, but through a former union. Uller is renowned as a good protector and an excellent hunter, and walks upon scales, which are indispensable in Norway, with great alacrity, so that no one is competent to keep up with him, for which he is called Weida As, the hunting Asa. In the legend of Uller, that he was made king subsequent to Odin's banishment from Asgard, eventually, however, was himself banished, and slain by the victoriously returning Odin, the latest appendix is quite evident.

**Ullmann, KARL**, an eminent German doctor and professor of theology, was born March 15, 1796, at Effenbach, in the Palatinate, and studied at the University of Tübingen, where he formed an intimate friendship with Uhland, Pfizer, and Schwab. In 1819 he took his degree as doctor of philosophy, and commenced his professional career at Heidelberg with lectures on exegesis and Church history. For ten years he stayed at Heidelberg and published during this period, *Der zweite Brief Petri kritisch untersucht* (Heidelb. 1821):—*Ueber den durch W. Fr. Rinck aus armen. Uebersetzung bekannt gemachten dritten Brief Pauli an die Corinther* (ibid. 1823):—*De Hypsistariis* (ibid. eod.):—*Gregory of Nazianzum* (Darmstadt, 1825; 2d ed. 1867), which, as Dr. Schaff says, is "the most complete work on the life and doctrines of this eminent divine of the ancient Greek Church, who, for his able defence of the Nicene faith and the divinity of Christ, was emphatically styled the 'Theologian.'" In 1828, together with his friend Umbreit (q. v.), he also commenced the publication of the well-known *Studien und Kritiken*, which has been before the public ever since, and is still one of the ablest and most learned theological journals of Germany. For the first volume of this journal Ullmann wrote an essay on the *Sinlessness of Jesus*, which was afterwards printed separately, and published in its seventh edition in 1863 (Engl. transl. by S. Taylor, Edinb. 1870). "In its improved form," says Dr. Schaff, "it must certainly be numbered among the most valuable contributions to the apologetic literature of the Church, and is better calculated, in our judgment, to satisfy an inquiring and well-cultivated mind on the claims of our holy religion than many large volumes on the evidences of Christianity. It shows the way by which the author himself found the truth, and by which many a theological student of Germany has since escaped the whirlpool of rationalism and pantheism. . . . It is impossible to read this book attentively without being edified as well as instructed, and overwhelmed with the glory of the only begotten of the Father that shines through the veil of his flesh upon the eye of faith and enlightened reason." In 1829 Ullmann was called to Halle, and for about seven years he lectured, besides Church history, on symbolics and dogmatics; and in 1836 he returned again to Heidelberg as professor of ecclesiastical history and Church councillor, and spent there the best years of his manhood. When, in 1853, Ullmann was elected to the prelate, or the highest ecclesiastical dignity of the Evangelical Church, in the grand-duchy of Baden, he withdrew from the academic chair and took his residence at Carlsruhe, devoting his whole energy to the affairs of the Church. In connection with his like-minded colleague, the learned Dr. Bähr, author of *Symbolism of the Mosaic Worship*, he faithfully

endeavored to build up the Protestant Church of Baden, which was deeply undermined by theological rationalism and political red-republicanism. When, however, the liberal element became too strong, he retired in 1861 from all public affairs, and died Jan. 12, 1865.

Ullmann, starting from the school of Schleiermacher and Neander, was at first somewhat latitudinarian in doctrine and too compromising in disposition, but he grew with the better spirit of the age in orthodoxy and evangelical sentiment. Thus he not only took part, while at Halle, in the efforts made against the still existing remnant of rationalism, but also used all means at the General Synod, which met at Carlsruhe in 1855, to have the rationalistic catechism heretofore in use replaced by a better one constructed on the basis of the small Lutheran and Heidelberg catechisms. Similar reforms he introduced with regard to the liturgy and the common school-books. But more than through his ecclesiastical reforms, he acquired a lasting reputation by a number of works "equally distinguished for solid and well-diffused historical information, comprehensive views, calm and clear reflection, dignified and conciliating tone, and masterly power of exhibition." Besides those already mentioned, we name his *Historisch oder Mythisch* (Hamburg, 1838), in which he brings out the signification of Christ's personality under a historical point of view, as an unanswerable argument to the infidel work of Strauss on the life of Jesus:—*Das Wesen des Christenthums* (ibid. 1845; 5th ed. 1865), with a critical appendix on Feuerbach's infamous book on the essence of Christianity:—*De Beryllo Bostreno ejusque Doctrina Commentatio* (ibid. 1835). But his main work, which has assigned to him a rank among the first Church historians of the present century, is his *Reformers before the Reformation* (1841-42, 2 vols., forming also a part of Clark's *Foreign Theological Library*). This work "is certainly one of the strongest historical arguments for the Reformation that have yet been presented. . . . What Flacius attempted in a crude form in the infancy of Protestant historiography, and with an unmeasured polemical zeal against the Romanists of his age, Ullmann has carried out with all the help of modern erudition, in the calm, truth-loving spirit of an impartial historian, and with full acknowledgment of the great and abiding merits of Catholicism as the Christianizer and civilizer of the barbarian nations of the Dark Ages. With him the Reformation is not so much a rebellion as the flower and fruit rather of the better and deeper life of Christianity that slumbered in the maternal bosom of mediæval Catholicism. This, it seems to us, is the noblest and strongest historical vindication of it" (Schaff). In these two volumes special attention is paid to the German and Dutch forerunners of the Reformation from the 13th to the 15th century, who are treated with exhaustive minuteness of detail. Here we find trustworthy and carefully sifted information on the life and theology of John Goch, John Wessel, the Brethren of the Common Life, and the various schools of the mystics, Ruysbroek, Suso, Tauler, Thomas à Kempis, the anonymous author of the curious tract on German theology, and Staupitz, the patron and early friend of Luther. The latter and principal part of the second volume contains the author's former monograph on John Wessel (Hamburg, 1834) in an improved form which leaves but little to be added. "But the work of Ullmann, although very satisfactory as far as it goes, does not exhaust the general subject, which would require two or three additional volumes. He leaves out of view the important preparatory movement of Wycliffe and the Lollards in England, of Huss and the Hussites in Bohemia, of Savonarola in Italy, and of what is generally called the Revival of Letters and Classical Learning by such men as Erasmus, Reuchlin, Agriola; not to speak of the more negative preparation of the Reformation by the anti-Catholic sects of the Middle Ages, es-

pecially the Waldenses and Albigenses" (Schaff). Besides these works there are a number of essays from his pen in the *Studien und Kritiken*, and other treatises published separately. See Zuchold, *Bibl. Theol.* ii, 1365 sq.; Herzog, *Real-Encyklop.* s. v.; *Theologisches Universal-Lexikon*, s. v.; Schaff, *Germany, its Universities*, etc., p. 345 sq.; Beyschlag, *Dr. Carl Ullmann* (Gotha, 1867); Schenkel, *Allgemeine kirchliche Zeitschrift* (1867), p. 87 fol.; Kurtz, *Lehrbuch der Kirchengeschichte* (Mittau, 1874), ii, 384 sq. (B. P.)

**Ulphilas.** See **ULFILAS**.

**Ulric of Augsburg**, in the 10th century, occupied a noteworthy position among his contemporaries both as a prince and a prelate. He was born about A.D. 890 at Augsburg, educated at St. Gall, and ordained to his bishopric Dec. 28, 923. In accordance with the custom of his time, he followed with his retainers the standards of the emperors Henry I and Otto I. He was influential in securing an armistice between Henry and his revolted son duke Liutulf in 954, and in the following year he won great fame by a successful defence of Augsburg against the Magyars. He was equally zealous in the erection and adorning of churches and chapels, and in the restoration of cities, castles, dwellings, and lands. His bounty was long the only support of impoverished priests and retainers. In the administration of his diocese he was accustomed to make journeys of visitation to dispense justice, confer absolution, and examine the official conduct and private life of his clergy. He greatly increased the number of festivals and the pomp with which they were observed, and he was eminently zealous in the collection of relics. He was, in brief, a thorough exponent of the piety of his age, and also a fine specimen of the militant churchman. Towards the close of his life he became more thoroughly an ascetic than before, and assumed the Benedictine habit. He died July 4, 973. Soon after his decease, it was reported that miracles were wrought upon persons who visited his grave, and his memory and remains were accordingly highly venerated in Augsburg and vicinity. Provost Gerhard, who had been Ulric's constant companion in the closing years of the bishop's life, wrote a *Life*, in which many of these wonders are mentioned; and Ulric's successor in the bishopric, Liutulf, persuaded pope John XV to canonize their author. The bull to this effect was issued in February, 993, and is noteworthy as the first clearly authenticated document which marks the transition from a saint-worship which grew naturally out of the excellences of character in Christians, to a saint-worship established by decree of the pope.

Ulric's name is mentioned in connection with the authorship of several writings, but without satisfactory proof. The first is entitled *Nicolaus Domino et Patri S. Rom. Eccl. Provisori V.* [some MSS. have *G.*] *solo Nominis Episc. Amorem ut Filius, Timorem ut Servus*, in Martene et Durand, *Amplias. Collectio*, p. 449-454. It was first printed by Flacius in 1550, and afterwards incorporated with his *Catalogus Testium Veritatis*. The second is a *Sermo Synodalis Paroch. Presbyt. in Synod. Enuntiandus*, on which comp. Vogel, *Ratherius von Verona* (Jena, 1854), i, 343, note. The last is an *Epist. de Vita Notingi Episc. Constantiensis*. The best source on Ulric is the biography translated by Gerhard (983-993), and published by Waitz in *Monum. Scriptores*, iv, 377 sq. The latter also gives a list of later and dependent lives. Comp., in addition, Mabillon, *Acta SS. Ord. S. Bened. Sec. V.*; and Braun, *Gesch. d. Bischöfe v. Augsburg* (Augsb. 1813), pt. i. See Herzog, *Real-Encyklop.* s. v.

**Ulrich**, the name of a Swiss family noted for the theological learning of several of its members.

1. **JEAN JACQUES** (1) was born at Zurich in 1569, and died there in 1638. He was educated at the schools of his own country, and afterwards at Middelburg, Leipsic, Wittenberg, and Tübingen, and occupied different chairs of theology at Zurich, where he published various Biblical and historical works in Latin.

2. **JEAN JACQUES** (2) was born at Zurich in 1683, and died there in 1731. He studied at his native schools, and also at Bremen, Franeker, and Leyden, and afterwards occupied a chair in the University of Zurich. He wrote, besides sermons and commentaries, two or three historical works in Latin.

3. **JEAN GASPAR** was born at Zurich in 1768, and died there in 1795. He studied at his native place, and at Utrecht and Bremen, and, after travelling in Germany and the Netherlands, was engaged in ecclesiastical labors and Oriental studies. Besides sermons and dissertations, he wrote one or two historical works in French.

4. **JEAN RODOLPHE** was born at Zurich in 1728, and died there in 1795. He was professor in the gymnasium there from 1763, and pastor in 1769, and was eminent for his piety and public sentiment. He left several sermons and ascetic works. See *Biographie Universelle*, s. v.

**Ulrick, HENRY**, a German engraver, who flourished at Nuremberg from about 1590 to 1628. He engraved some portraits, etc., among which were twelve circular prints, one of them a *Crucifixion*. See Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Ulster**, **SYNOD OF**, the chief body of Presbyterians in the North of Ireland. See **PRESBYTERIAN CHURCHES**, No. 7.

**Ultimate Appeal to SCRIPTURE AUTHORITY.** It is the opinion of some persons that a considerable portion of the essentials of Christianity is not to be found in Scripture, but in a supplementary tradition, which is to be sought in the works of those early fathers who were orthodox. Others, again, utterly oppose such notions; and, independently of the consideration that upon such a theory the foundations of a Christian's faith and hope become inaccessible to nearly the whole of the laity, and to much the greater part of the clergy, they reject the system on its own account. They acknowledge the *authority* of no private individual, ancient or modern, in a question of doctrine. With true respect for all who are entitled to it, and with a just acknowledgment of the valuable instruction to be derived from their works, they yet consider that, be they of what age or of what country they may, anti-Nicene or post-Nicene, Popish or Protestant, they are not to stand with them, as Christians, in place of the Holy Scriptures; or, as Christian ministers, in place of their own Church. See **FAITH**, **RULE OF**.

**Ultor** (the *Avenger*), in Roman mythology, was a surname of *Mars*, in whose honor a temple was built by Augustus for the revenge upon the murderers of Julius Caesar.

**Ultramontanists** (from *ultra montes*, "beyond the mountains"), the name applied to those who recognise the papal claim of supremacy over every part of the Church, as well as over every sovereign within its boundaries; and also, since 1870, to those who accept the decrees of the Vatican Council. Ultramontanism dates from Gregory VII, who propounded the following claims: "Quod solus papa possit uti imperialibus insigniis; quod solius papæ pedes omnes principes deosculentur; quod illi liceat imperatores deponere; quod a fidelitate iniquorum subjectos potest absolvere." These views are principally maintained in the Italian peninsula, but it is the tone generally adopted by English seceders. The free action of national churches is wholly superseded by such pretensions. The theory has apparently grown up from the feudal relations of the papacy as a temporal power. An assertion of authority so incompatible with catholic liberty aroused opposition on the other side of the Alps, in the Gallican and German churches, and in the Swiss cantons. Belarmino's statements are important as regards papal infallibility. He sets forth the opinion of divines in four propositions: (1) "The Roman pontiff ruling any

point, even in an œcumenical council, may be guilty of heresy, and of teaching others heresy—which has *de facto* happened;" (2) "The Roman pontiff may be heretical and teach heresy, if he rule anything apart from synodical assistance, and this has happened *de facto*;" (3) "The pope cannot be in any way heretical, nor teach heresy publicly, even though he rule any point on his own responsibility alone;" (4) That "whether the pope can be heretical or not, he can rule nothing heretical as a point to be believed by the whole Church." After the Council of Constance the question of the direct or indirect power of the papacy over states and sovereigns became the chief point of dispute, and everywhere assumed a national character. In Germany Febronius (bishop Hontheim) wrote a powerful work against Ultramontaniam; and in 1786, at the Convention of Ems, the archbishops of Mentz, Treves, Cologne, and Salzburg denounced it. In Italy its chief opponent in the last century was Scipione Ricci, bishop of Pistoja, who convened a synod in that city, September, 1786, and promulgated disciplinary decrees and a doctrinal exposition favoring extreme Gallicanism and Jansenism. These were partially confirmed, April 23, 1787, by an assembly of the bishops of Tuscany, but were condemned by Pius VI. in the dogmatic bull *Auctorem fidei*, Aug. 28, 1794.

The practical influence of Ultramontane theories was greatly reduced during the reconstruction of southern Europe that attended the career of Napoleon I, who paid little regard to the papal claims; but the principles were still maintained, and on the Bourbon restoration they were reasserted.

Among modern assertors of the Ultramontane theory the most strenuous are English Romanists, especially neophytes. Among Continental writers are bishop Ziegler, *Das katholische Glaubensprincip*; Carové, *Die alleinseigmachende Kirche*; *Der Papst im Verhältniss zum Katholicismus*; and the abbé Lamennais in his journal *L'Avenir*. Perhaps the work of greatest influence is Möhler's *Symbolik* (1832). For a fuller account of the controversies to which the claims of Ultramontaniam have given rise, see IMMACULATE CONCEPTION; INFALLIBILITY; PAPACY.

**Umā**, in the epic and Purānic mythology of India, is one of the principal names of the consort of Siva. She is also called *Durgā*, *Devī*, *Kālī*, *Parvātī*, *Bhuvānī*; while there are many more belonging to her of less frequent occurrence, as *Katyayani*, *Ambika*, *Haimavati*, *Siva*, etc. She was the younger of two sisters (Ganga being the older), and was so beautiful that she remained thirty-six thousand years in the embrace of Siva, her husband. She was, however, barren, and inflicted upon all the gods the curse of remaining childless. She also cursed the earth, making it constantly subject to change, and to be the wife of many husbands. In great anxiety, the gods now all turned to Brahma, who promised that heaven should not be depopulated, and that Uma's elder sister, Ganga, should, by Siva, become mother of a son who should command the heavenly hosts in the great Dæmon-war. Thus it happened that Ganga became pregnant by Siva, and so also Uma, whereupon the latter became reconciled and withdrew the curse. Though the popular creed regarded Uma far more as the type of destruction than as that of divine wisdom, yet the works devoted to her praise never fail to extol her also as the personification of the highest knowledge. The myths relating to this goddess, who is worshipped in various parts of India—particularly in Bengal—are met with in the great epic poems and Purānas, in poetical works such as the *Kumarasambhava*, and in modern popular compositions. She is as Kālī (q. v.) the favorite divinity of the Thugs. See Moor, *Hindū Pantheon*; Muir, *Original Sanscrit Texts* (Lond. 1863), vol. iv.; the *Harivansa*, translated by Langlois (Paris, 1834-35); and the *Markandeya Purāna*, in the *Bibliotheca Indica*, edited by Rev. K. M. Banerjea (Calcutta, 1862).

Kālī (after the figure in Coleman's *Mythology of the Hindus*).

**Umbracūlum** (a little shade), an altar canopy, more generally called the *ciborium* (q. v.).

**Umbreit**, FRIEDRICH WILHELM CARL, an eminent doctor and professor of theology of Germany, was born April 11, 1795, at Sonneborn, near Gotha. He studied at Göttingen, where Eichhorn instructed him in Oriental languages. In 1818 he took his degree as doctor of philosophy, and commenced his academical career as a private lecturer at Göttingen. In 1820 he was called to Heidelberg as professor of theology and philosophy, where he became intimately connected with Ullmann, Rothe, and others; and where he also died, April 26, 1860. Umbreit possessed a poetical nature, and was, as he himself acknowledged, unfit for ecclesiastico-political questions. His piety had nothing to do with dogmatical hairsplitting; his faith in the living personal God, as he revealed himself in Christ, his Son, and in the immortality—these were the only positions which he would not suffer to be attacked. He wrote, *Commentatio exhibens Histor. Emirorum al Omrah ex Abulfeda* (Gott. 1816):—*Kohleth's, des weisen Königs, Seelenkampf* (Gotha, 1818):—*Cohleth's Scepticus de Summo Bono* (ibid. 1820):—*Was bleibt? Zeitgemässe Betrachtungen des Königs und Predigers Salomo*, etc. (Hamburg, 1849):—*Salomons Lied von der Liebe* (Gött. 1820; 2d ed. Heidelberg, 1828):—*Erinnerung an das Hohelied* (Heidelberg, 1839):—*Das Buch Hiob* (ibid. 1824; 2d ed. 1832):—*Commentar über die Sprüche Salomos* (ibid. 1826):—*De Veteris Testam. Prophetis, Chariss. Antiquiss. Temporibus Oratoribus* (ibid. 1833):—*Christl. Erbauung aus dem Psalter* (Hamburg, 1835; 2d ed. 1848):—*Der Knecht Gottes* (ibid. 1840):—*Practischer Commentar über die Propheten des alten Bundes* (ibid. 1841-46, 4 vols.; Daniel and Jonah are wanting):—*Die Sünde, Beitrag zur Theologie des A. T.* (Gotha, 1853):—*Der Brief an die Römer, auf dem Grunde des A. T. ausgelegt* (ibid. 1856). Besides these works, he wrote contributions to the *Studien und Kritiken*, Herzog's *Real-Encyclop.*, etc. See Zuchold, *Bibl. Theolog.* ii, 1867; Fürst, *Bibl. Jud.* iii, 459; Kitto, *Cyclop.* s. v.; Herzog, *Real-Encyclop.* xvi, 628 sq.; *Theolog. Universal-Ler.* s. v.; Schenkel, *Allgem. kirchliche Zeitschrift*, 1860, vi,

11 sq.; Mühlhäuser, in the *Neue evangel. Kirchenzeitung*, 1860, p. 23; Zittel, in the *Allgemeine Kirchenzeitung*, 1860, p. 54; Winer, *Handbuch der theolog. Literatur*, i, 11, 82, 206, 212, 213, 215; ii, 355; Diestel, *Geschichte des A. T. in der christl. Kirche* (Jena, 1869), p. 658, 666, 668 sq., 774, 784; Kurtz, *Lehrbuch der Kirchengeschichte* (Mittau, 1874), ii, 316. (B. P.)

**Umbrella**, in ecclesiastical ceremony, is borne over bishops and priests during solemn processions at councils, and at other high solemnities, especially during processions of the blessed sacrament. The name was also applied to a kind of *baldachino* of red velvet, with golden summits, erected in 1550 over the altar of Winchester College. See Lee, *Gloss. of Liturg. Terms*, s. v.; Walcott, *Sac. Archaeol.*, s. v.

**Um'mah** (Heb. *Ummah'*, עֲמָה, *union*, as often; Sept. Ἀμμή v. r. Ἀρχώβ or Ἀρχόβ, Vulg. *Amma*), a town of the tribe of Asher, mentioned between Achizib and Aphek (Josh. xix, 30). Its site was evidently unknown to Eusebius and Jerome (*Onomast.* s. v. "Amma"). Dr. Thomson suggests (*Bibliotheca Sacra*, 1855, p. 822) that it may be the modern village *Aolun*, situated on the coast about five miles E.N.E. of Ras en-Nakurah, and described by him as a large ruin with excellent water and fig-trees (*Land and Book*, ii, 156). The *Kefr Ammish* suggested by Keil (*Comment.* ad loc.) is quite beyond the boundaries of the tribe.

**Umuruk**, a title of the Chaldean goddess *Belit*.

**Umvin**, JOHN HARDING, a Welsh Congregational minister, was born at Meldrith, Jan. 6, 1818, and commenced his ministry with village preaching. Finding Belthom a prosperous field for labor, he settled with that people, erected a commodious chapel, and built up a large congregation. His uprightness of character and consistent walk in life won for him a large circle of true friends. He died April 11, 1867. See (Lond.) *Cong. Year-book*, 1868, p. 297.

**Unam Sanctam** (*the one holy*, i. e. Church) is the name of the famous papal bull published Nov. 18, 1302, so called from its first two words. In this the memorable statement occurs, "We declare, define, and pronounce that subjection to the Roman pontiff is for every hu-

man being altogether of necessity for salvation." It also affirms that there are two swords, a spiritual and material—the one to be employed by the Church, and the other for the Church under the direction of its head; and that to deny the subservience of the latter to the former is to maintain the doctrine of two principles, and to fall into the heresy of the Manichæans. See Trench, *Medieval Church Hist.* p. 282.

**Naturalistic unbelief** is that which is indifferent and opposed to revelation. The *unbelief of reason* is the making our reason independent of its own needs—the renunciation of the faith of reason. See Charnock, *Works*, ii, 601; Case, *Sermons*, ser. 2; Porteus, *Sermons*, vol. i, ser. 2; Owen, *Reasons of Faith*; Hannam, *Compendium*, ii, 26; Churchill, *Essay on Unbelief*; Buck, *Theol. Dict.* s. v.; Fleming and Krauth, *Vocab. of Phil. Sciences*, s. v.

**Unbloody Sacrifice**, a theological term to designate the holy sacrifice of the altar.

**Unchangeableness of God.** See ATTRIBUTES OF GOD; IMMUTABILITY.

**Uncial Letters**—so called as being an inch (Lat. *uncia*) long—characters of a large and round form used in some ancient MSS. The earliest form of an alphabet is its capitals, and the oldest Greek and Latin MSS. are written entirely in capitals. Uncial letters, which began to take the place of capitals in the middle of the 5th century, differ from them in being composed of rounded and not straight lines, and exhibiting a tendency towards greater expedition in style. Uncial writing arose as writing on papyrus or vellum became common, the necessity for more rapid execution leading to the practice of curving the lines. Its being more easily learned than the cursive style was probably the cause of its becoming the favorite mode of writing books of importance among the monkish scribes; while legal instruments, which required greater despatch, were executed by professional scribes in a corrupted form of the Roman cursive hand. Uncial writing prevailed from the 6th to the 8th, or even 10th, century. The following specimens of uncial Greek and Latin writing are from a MS. of the four gospels and Acts of the Apostles in both languages, written early in the 6th century, and presented to the University of Cambridge by Theodore Beza in 1581. The passage is from John xxi, 19—"signifying by what death he should glorify God."

man being altogether of necessity for salvation." It also affirms that there are two swords, a spiritual and material—the one to be employed by the Church, and the other for the Church under the direction of its head; and that to deny the subservience of the latter to the former is to maintain the doctrine of two principles, and to fall into the heresy of the Manichæans. See Trench, *Medieval Church Hist.* p. 282.

**Unbelief**, the refusing assent to testimony, the withholding of due belief. According to Kant, it is the withholding of assent to that which, though objectively insufficient as a ground of cognition, is subjectively sufficient as a ground of faith. Moral unbelief is the rejection of that which, though we cannot know it, is yet morally necessary, as faith in God, freedom, and immortality. "It includes," says Dr. Guyse, "disaffection to God, disregard to his word, prejudices against the Redeemer, readiness to give credit to any other than him, inordinate love to the world, and preferring of the applause of men to the approbation of God." "Unbelief," says Charnock, "is the greatest sin, as it is the foundation of all sin: it was Adam's first sin; it is a sin against the Gospel, against the highest testimony; a refusal to accept of Christ upon the terms of the Gospel. It strikes peculiarly at God; is the greatest re-

proach of him, robs him of his glory, is a contradiction to his will, and a contempt of his authority." The causes of unbelief are Satan, ignorance, pride, and sensuality. The danger of it is great; it hardens the heart, fills with presumption, creates impatience, deceives with error, and finally exposes to condemnation (John iii, 11).

During the 6th and 7th centuries a transitional style of writing prevailed in Italy, and to some extent elsewhere, in which the letters approximated more nearly to the Roman cursive hand: this passed by a gradual transition into the *minuscule* manner, or small hand, which, from the beginning of the 10th century, became usual in MSS. See Silvestre, *Universal Palæography* (transl. and edit. by Sir F. Madden, Lond. 1850); *Traité de Diplomatique*, par deux Religieux Bénédictins de la Congrégation de St-Maur (Paris, 1755). See MANUSCRIPTS.

**Uncircumcised** (עָרֵל, i. e. having a foreskin, ἀκροβυστιαν ἔχων; and so ἀκροβυστία, *the prepuce*, alone, for "uncircumcision"), a word literally denoting a heathen among the Jews. So also it is sometimes used figuratively "of uncircumcised lips," i. e. dull of speech, stammering, one whose lips still have, as it were, the foreskin, and are therefore too thick and large to bring out words easily and fluently (Exod. vi, 12, 30). So, likewise, "their ear is uncircumcised," shut up by a foreskin (Jer. vi, 10); also "their uncircumcised heart," to which the precepts of religion and piety cannot penetrate (Lev. xxvi, 41; Deut. x, 16; Jer. iv, 4; Ezek. xlv, 9; Isa. vi, 10; Acts vii, 51; James i, 21; Col. ii, 13). So, also, "the foreskin of a tree," i. e. uncircumcised

fruit, the fruit of the first three years, which by the law was to be regarded as unclean (Lev. xix, 23). See CIRCUMCISION.

**Unclean** (usually some form of the verb טָמַא, which is the technical term for ceremonial pollution; ἀκάθαρτος, *impure*; but occasionally טָמַא, *naked*; שָׁמַר, *consecrated*; נִדָּה, *filth*; κοινός, *common*). In this article we treat of food prohibited by the Mosaic law, reserving defilements of the person for the following article. See CLEAN.

The Jews were forbidden to eat things strangled, or dead of themselves, or through beasts or birds of prey; whatever beast did not both part the hoof and chew the cud; and certain other smaller animals rated as "creeping things" (שָׂרָץ); certain classes of birds mentioned in Lev. xi and Deut. xiv, twenty or twenty-one in all; whatever in the waters had not both fins and scales; whatever winged insect had not besides four legs the two hind-legs for leaping; besides things offered in sacrifice to idols; and all blood or whatever contained it (save perhaps the blood of fish, as would appear from that only of beast and bird being forbidden [Lev. vii, 26]), and therefore flesh cut from the live animal; as also all fat, at any rate that disposed in masses among the intestines, and probably wherever discernible and separable among the flesh (iii, 14-17; vii, 23). The eating of blood was prohibited even to "the stranger that sojourneth among you" (xvii, 10, 12, 13, 14), an extension which we do not trace in other dietary precepts; e. g. the thing which died of itself was to be given "unto the stranger that is in thy gates" (Deut. xiv, 21). As regards blood, the prohibition indeed dates from the declaration to Noah against "flesh with the life thereof which is the blood thereof," in Gen. ix, 4, which was perhaps regarded by Moses as still binding upon all Noah's descendants. The grounds, however, on which the similar precept of the Apostolic Council, in Acts xv, 20, 21, appears based, relate not to any obligation resting still unbroken on the Gentile world, but to the risk of promiscuous offence to the Jews and Jewish Christians, "for Moses of old time hath in every city them that preach him." Hence this abstinence is reckoned among "necessary things" (τὰ ἐπ' ἀνάγκης), and "things offered to idols," although not solely, it may be presumed, on the same grounds, are placed in the same class with "blood and things strangled" (ἀπὸ ἐκτεταγμένων καὶ αἵματος καὶ πνικτοῦ, ver. 28, 29). Besides these, we find the prohibition twice recurring against "seething a kid in its mother's milk." It is added, as a final injunction to the code of dietary precepts in Deut. xiv, after the crowning declaration of ver. 21, "for thou art an holy people unto the Lord thy God;" but in Exod. xxiii, 19; xxxiv, 26, the context relates to the bringing first-fruits to the altar, and to the "angel" who was to "go before" the people. To this precept we shall have occasion further to return.

The general distinction of clean and unclean is rightly observed by Michaelis (*Smith's Transl.* art. ccii, etc.) to have its parallel among all nations, there being universally certain creatures regarded as clean, i. e. fit for food, and the rest as the opposite (comp. Lev. xi, 47). With the greater number of nations, however, this is only a traditional usage based merely, perhaps, either on an instinct relating to health, or on a repugnance which is to be regarded as an ultimate fact in itself, and of which no further account is to be given. Thus Michaelis (as above) remarks that in a certain part of Germany rabbits are viewed as unclean, i. e. are advisedly excluded from diet. English feelings as regards the frog and the snail, contrasted with those of Continentals, supply another close parallel. Now, it is not unlikely that nothing more than this is intended in the distinction between "clean" and "unclean" in the directions given to Noah. The intention seems to have been that creatures recognised, on whatever ground, as unfit for human food,

should not be preserved in so large a proportion as those whose number might be diminished by that consumption. The dietary code of the Egyptians, and the traditions which have descended among the Arabs, unfortified, certainly down to the time of Mohammed, and in some cases later, by any legislation whatever, so far as we know, may illustrate the probable state of the Israelites. If the law seized upon such habits as were current among the people, perhaps enlarging their scope and range, the whole scheme of tradition, instinct, and usage so enlarged might become a ceremonial barrier, having a relation at once to the theocratic idea, to the general health of the people, and to their separateness as a nation.

The same personal interest taken by Jehovah in his subjects, which is expressed by the demand for a ceremonially pure state on the part of every Israelite as in covenant with him, regarded also this particular detail of that purity, viz. diet. Thus the prophet (Isa. lxvi, 17), speaking in his name, denounces those that "sanctify themselves (consecrate themselves to idolatry), eating swine's flesh, and the abomination, and the mouse," and those "which remain among the graves and lodge in the monuments, which eat swine's flesh, and broth of abominable things is in their vessels" (lxvi, 4). It remained for a higher lawgiver to announce that "there is nothing from without a man that entering into him can defile him" (Mark vii, 15). The fat was claimed as a burnt-offering, and the blood enjoyed the highest sacrificial esteem. In the two combined, the entire victim was by representation offered, and to transfer either to human use was to deal presumptuously with the most holy things. But, besides this, the blood was esteemed as "the life" of the creature, and a mysterious sanctity beyond the sacrificial relation thereby attached to it. Hence we read, "whatsoever soul it be that eateth any manner of blood, even that soul shall be cut off from his people" (Lev. vii, 27; comp. xvii, 10, 14); whereas the offender in other dietary respects was merely "unclean until even" (xi, 40; xvii, 15). Blood was certainly drunk in certain heathen rituals, especially those which related to the solemnization of a covenant, but also as a pledge of idolatrous worship (Psa. xvi, 4; Ezek. xxxiii, 25). Still there is no reason to think that blood has ever been a common article of food, and any lawgiver might probably reckon on a natural aversion effectually fortifying his prohibition in this respect, unless under some bewildering influence of superstition. Whether animal qualities, grosser appetites, and inhuman tendencies might be supposed by the Hebrews transmitted into the partaker of the blood of animals, we have nothing to show: see, however, Josephus, *Ant.* iii, 11, 2. See BLOOD.

It is noteworthy that the practical effect of the rule laid down is to exclude all the *carnivora* among quadrupeds, and, so far as we can interpret the nomenclature, the *raptores* among birds. This suggests the question whether they were excluded as being not averse to human carcasses, and in most Eastern countries acting as the servitors of the battle-field and the gibbet. Even swine have been known so to feed; and, further, by their constant runcation among whatever lies on the ground, suggest impurity, even if they were not generally foul feeders. Among fish, those which were allowed contain, unquestionably, the most wholesome varieties, save that they exclude the oyster. Probably, however, sea-fishing was little practiced by the Israelites; and the Levitical rules must be understood as referring backward to their experience of the produce of the Nile, and forward to their enjoyment of the Jordan and its upper lakes. The exclusion of the camel and the hare from allowable meats is less easy to account for, save that the former never was in common use, and is generally spoken of in reference to the semi-barbarous desert tribes on the eastern or southern border-land, some of whom certainly had no insuperable repugnance to his flesh; although it is so impossible to substitute any other

creature for the camel as the "ship of the desert" that to eat him, especially where many other creatures give meat much preferable, would be the worst economy possible in an Eastern commissariat—that of destroying the best, or rather the only, conveyance in order to obtain the most indifferent food. The hare was long supposed, even by eminent naturalists, to ruminate, and certainly was eaten by the Egyptians. The horse and the ass would be generally spared from similar reasons to those which exempted the camel. As regards other cattle, the young males would be those universally preferred for food, no more of that sex reaching maturity than were needful for breeding, while the supply of milk suggested the copious preservation of the female. The duties of draught would require another rule in rearing neat-cattle. The laboring steer, man's fellow in the field, had a life somewhat ennobled and sanctified by that comradeship. Thus it seems to have been quite unusual to slay for sacrifice or food, as in 1 Kings xix, 21, the ox accustomed to the yoke. And perhaps, in this case, as being tougher, the flesh was not roasted, but boiled. The case of Araunah's oxen is not similar, as cattle of all ages were useful in the threshing-floor (2 Sam. xxiv, 22). Many of these restrictions must be esteemed as merely based on usage, or arbitrary. Practically, the law left among the allowed meats an ample variety, and no inconvenience was likely to arise from a prohibition to eat camels, horses, and asses. Swine, hares, etc., would probably, as nearly as possible, be exterminated in proportion as the law was observed, and their economic room filled by other creatures. Wunderbar (*Biblich-talm. Medizin*, ii, 50) refers to a notion that "the animal element might only with great circumspection and discretion be taken up into the life of man in order to avoid debasing that human life by assimilation to a brutal level, so that thereby the soul might become degraded, profaned, filled with animal affections, and disqualified for drawing near to God." He thinks, also, that we may notice a meaning in "the distinction between creatures of a higher, nobler, and less intensely animal organization as clean and those of a lower and incomplete organization as unclean," and that the insects provided with four legs and two others for leaping are of a higher or more complete type than others, and relatively nearer to man. This seems fanciful, but may, nevertheless, have been a view current among Rabbinical authorities. As regards birds, the *raptores* have commonly tough and indigestible flesh, and some of them are, in all warm countries, the natural scavengers of all sorts of carrion and offal. This alone begets an instinctive repugnance towards them, and associates them with what was beforehand a defilement. Thus to kill them for food would tend to multiply various sources of uncleanness. Porphyry (*Abstin.* iv, 7, quoted by Winer) says that the Egyptian priests abstained from all fish, from all quadrupeds with solid hoofs, or having claws, or which were not horned, and from all carnivorous birds. Other curious parallels have been found among more distant nations. See ANIMAL.

But as Orientals have minds sensitive to teaching by types, there can be little doubt that such ceremonial distinctions not only tended to keep Jew and Gentile apart, but were a perpetual reminder to the former that he and the latter were not on one level before God. Hence, when that economy was changed, we find that this was the very symbol selected to instruct Peter in the truth that God was not a "respector of persons." The vessel filled with "fourfooted beasts of the earth, and wild beasts, and creeping things, and fowls of the air," was expressive of the Gentile world, to be put now on a level with the Israelite, through God's "purifying their hearts by faith." A sense of this, their prerogative, however dimly held, may have fortified the members of the privileged nation in their struggle with the persecutions of the Gentiles on this very point. It was no mere question of which among several means of sup-

porting life a man chose to adopt, when the persecutor dictated the alternative of swine's flesh or the loss of life itself; but whether he should surrender the badge and type of that privilege by which Israel stood as the favored nation before God (1 Macc. i, 63, 64; 2 Macc. vi, 18; vii, 1). The same feeling led to the exaggeration of the Mosaic regulations, until it was "unlawful for a man that was a Jew to keep company with, or come unto, one of another nation" (Acts x, 28); and with such intensity were badges of distinction cherished that the wine, bread, oil, cheese, or anything cooked by a heathen was declared unlawful for a Jew to eat. Nor was this strictness, however it might at times be pushed to an absurdity, without foundation in the nature of the case. The Jews, as, during and after the return from captivity, they found the avenues of the world opening around them, would find their intercourse with Gentiles unavoidably increased, and their only way to avoid an utter relaxation of their code would lie in somewhat overstraining the precepts of prohibition. Nor should we omit the tendency of those who have no scruples to "despise" those who have, and to parade their liberty at the expense of these latter, and give piquancy to the contrast by wanton tricks, designed to beguile the Jew from his strictness of observance, and make him, unguardedly, partake of what he abhorred, in order to heighten his confusion by derision. One or two instances of such amusement at the Jew's expense would drive the latter within the intrenchments of a universal repugnance and avoidance, and make him seek the safe side at the cost of being counted a churl and a bigot. Thus we may account for the refusal of the "king's meat" by the religious captives (Dan. i, 8), and for the similar conduct recorded of Judith (xii, 2) and Tobit (Tob. i, 11); and in a similar spirit Shakspeare makes Shylock say, "I will not eat with you, drink with you, nor pray with you" (*Merchant of Venice*, act i, sc. iii). As regards things offered to idols, all who own one God meet on common ground; but the Jew viewed the precept as demanding a literal objective obedience, and had a holy horror of even an unconscious infraction of the law: hence, as he could never know what had received idolatrous consecration, his only safety lay in total abstinence; whereas Paul admonishes the Christian to abstain, "for his sake that showed it and for conscience' sake," from a thing said to have been consecrated to a false god, but not to parade his conscientious scruples by interrogating the butcher at his stall, or the host in his guest-chamber (1 Cor. x, 25-29); and to give opposite injunctions would doubtless, in his view, have been "compelling the Gentiles to live as did the Jews" (*ἰσχυρίζεσθαι*, Gal. ii, 14). See ALISGEMA.

The prohibition to "seethe a kid in its mother's milk" has caused considerable difference of opinion among commentators. Michaelis (art. ccx) thought it was meant merely to encourage the use of olive-oil instead of the milk or butter of an animal, which we commonly use in cookery, where the Orientals use the former. This will not satisfy any mind by which the clue of symbolism, so blindly held by the Eastern devotee, and so deeply interwoven in Jewish ritual, has once been duly seized. Mercy to the beasts is one of the under-currents which permeate that law. To soften the feelings and humanize the character was the higher and more general aim. When Paul, commenting on a somewhat similar precept, says, "Doth God care for oxen, or saith he it altogether for our sakes?" he does not mean to deny God's care for oxen, but to insist the rather on the more elevated and more human lesson. The milk was the destined support of the young creature: viewed in reference to it, the milk was its "life," and had a relative sanctity resembling that of the forbidden blood (comp. Juvenal, xi, 68, "Qui plus lactis habet quam sanguinis," speaking of a kid destined for the knife). No doubt the abstinence from the forbidden action in the case of a young creature already dead, and a dam unconscious probably of its loss, or whose consciousness such a use of her milk could in

nowise quicken, was based on a sentiment merely. But the practical consequence, that milk must be foregone or elsewhere obtained, would prevent the sympathy from being an empty one. It would not be the passive emotion which becomes weaker by repetition, for want of an active habit with which to ally itself. And thus its operation would lie in indirectly quickening sympathies for the brute creation at all other times. The Talmudists took an extreme view of the precept, as forbidding generally the cooking of flesh in milk (*Mishna, Cholin*, viii; Hottinger, *Leg. Hebr.* p. 117, 141).

It remains to mention the sanitary aspect of the case. Swine are said to be peculiarly liable to disease in their own bodies. This probably means that they are more easily led than other creatures to the foul feeding which produces it; and, where the average heat is great, decomposition rapid, and malaria easily excited, this tendency in the animal is more mischievous than elsewhere. A *meazel* or *mezel*, from whence we have "measled pork," is the old English word for a "leper," and it is asserted that eating swine's flesh in Syria and Egypt tends to produce that disorder (*Bartholinus, De Morbis Bibl.* c. viii; *Wunderbar*, p. 51). But there is an indefiniteness about these assertions which prevents our dealing with them scientifically. *Meazel* or *mezel* may well, indeed, represent "leper," but which of all the morbid symptoms classed under that head it is to stand for, and whether it means the same, or at least a parallel, disorder in man and in pig are indeterminate questions. See *LEPER*. The prohibition on eating fat was salubrious in a region where skin diseases are frequent and virulent, and that on blood had, no doubt, a similar tendency. The case of animals dying of themselves needs no remark: the mere wish to insure avoiding disease, in case they had died in such a state, would dictate the rule. Yet the beneficial tendency is veiled under a ceremonial difference, for the "stranger" dwelling with the Israelite was allowed it, although the latter was forbidden. Thus is their distinctness before God, as a nation, ever put prominently forward, even where more common motives appear to have their turn. As regards the animals allowed for food, comparing them with those forbidden, there can be no doubt on which side the balance of wholesomeness lies. Nor would any dietetic economist fail to pronounce in favor of the Levitical dietary code as a whole, as insuring the maximum of public health, and yet of national distinctness, procured, however, by a minimum of the inconvenience arising from restriction.

*Literature.*—Bochart, *Hierozycon*; Forskål, *Descriptiones Animalium*, etc., *quæ in Itinere Orientali Observavit*, with his *Icones Rerum Naturalium*; and Rosenmüller, *Handbuch der bibl. Alterthumskunde*, vol. iv, *Natural History*, may be consulted on some of the questions connected with this subject; also, more generally, Maimonides, *De Cibus Vetitis*; Reinhard, *De Cibus Hebræorum Prohibitis*. See *FOOD*.

**Uncleanness** (chiefly טָמֵא, used in the almost technical sense of Levitical defilement) is the term by which, in the law of Moses, is indicated that condition which caused the temporary suspension of a Hebrew man or woman from religious and social privileges as a subject of the Theocracy.

1. About seventy specific cases of possible uncleanness are described, and others implied. Various modes of classifying them have been resorted to. The old Jewish writers made two classes, according to the length of the ceremonial suspension. The lighter class embraced the instances of uncleanness for the day; the heavier class, those of a longer period (*Pesictha*, in Ugol. xv, 1148; Maimonides, *Constitutiones*, in Ugol. viii, 58, where the contaminated of the lighter class is called טָמֵא יוֹם, *de die lavandus*; comp. Lightfoot, *Harm. of O. T.* [Works by Pitman, ii, 122]; although he gives four classes, according to time). Other writers (see Cornelius à Lapide on Lev. xv, 22) make also two classes,

but on a different principle: "Duplex fuit immundities Hebr. Una erat peccatum, quia præcepto Dei vetita, talis erat comedere carnes immundas. Talis etiam erat pati lepram, etc. Altera non erat vetita, sed solum indicata et statuta, talis erat tangere leprosum, etc. Hæc non erant peccata, sed tantum inducebant irregularitatem quandam." Modern Jews profess to be bound only by the former of these classes. The threefold classification, however, which is indicated in the law of Moses itself seems to be most convenient, and is most commonly adopted—(a) "Every leper;" (b) "Every one that hath an issue;" (c) "Whosoever is defiled by the dead" (see Numb. v, 2). The lawgiver, no doubt, here refers to his own enactments in Leviticus, and under the three generic phrases includes all the instances of uncleanness.

(1.) He begins with leprosy, the gravest of all instances. A minute diagnosis of this terrible malady in its ceremonial character, and the purification which the law prescribed, are given in Lev. xiii. See *LEPROSY*.

(2.) Under the second head, of uncleanness from "issues," are included all those physical emanations or bodily discharges to which either sex is liable. They are described in their several details in the following passages: [1.] The woman's periodical issues in Lev. xv, 19-24, and irregular issues in ver. 25-27. These were alike unclean in themselves (the former for seven days, the latter during the irregularity), and communicated uncleanness during the day alike to "whosoever touched her," "her bed," or "anything that she sat on;" from which uncleanness they escaped "at even" by washing their clothes and bathing. Any man who so far forgot decency as to lie with her and be stained with her menstrual taint incurred an equally long defilement as the woman herself, and like her communicated uncleanness to the bed whereon he lay. On the day after the cessation of her issue (the eighth) the woman, for her purification, was to bring two turtle-doves or two young pigeons, one for a sin-offering and the other for a burnt-offering, to the priest, who was to make atonement for her before the Lord. [2.] The issues of males, two sorts of which are mentioned in Lev. xv, 3, produced uncleanness with effects precisely similar to those of women (see ver. 4-12). This is not the place to discuss the nature of these male fluxes; Michaelis adduces strong reasons for disputing the general opinion, which denies that the *Gonorrhæa virulenta* is referred to in the passage before us (*Laws of Moses* [Smith's transl.], art. ccxii). See *ISSUE*. The purification prescribed for men under this defilement is identical with that for women (ver. 13-15). [3.] Sexual copulation, including conjugal intercourse, caused to both man and woman uncleanness "until the even," from which they were to cleanse themselves and their garments by bathing and washing (ver. 16-18). [4.] The final result of the sexual act in childbirth produced a still more marked defilement (see Lev. xii). The mother's uncleanness in this her puerperal state, on the birth of a boy, was identical in duration with that of her menstrual issues. Seven days was she unclean (ver. 2); on the eighth the child was circumcised (ver. 3); after which the mother remained in private, excluded from the sanctuary, during thirty-three days more (ver. 4). This period of forty days' defilement was doubled in the case of the birth of a maid child (ver. 5). The purification rites of the mother, however, were the same, whether observed at the end of the forty or of the eighty days. She brought a yearling lamb for a burnt-offering, and a young pigeon or turtle-dove for a sin-offering, unto the priest, that he might make atonement for her before the Lord, and she might be cleansed. In case of inability to bring the lamb, the substitution of another young pigeon or turtle-dove by the mother was allowed (ver. 6-8; comp. the Virgin Mary's humbler offering in her "low estate," Luke ii, 22-24). In our general article on the *LAW OF MOSES*, we had occasion to remark on the probable substratum

of moral and religious mystery which underlies much of the ceremonial enactments. The havoc made by sin on our human race seems most strongly indicated by the fact that the normal and inevitable conditions of our natural life are affected with uncleanness. The gradations of pollution from conception to parturition, and their remarkable culmination in the birth of the female child, are wonderfully significant of the original "transgression," and of woman's first and heavier share in it (1 Tim. ii, 14; comp. with Gen. iii, 6, 16, 17).

The two periods in the mother's purification are, however, different in character. "For seven days, immediately after she is brought to bed, she lies בְּדָמֵי נִטְמָאוֹתָהּ, 'in the blood of her uncleanness; but the three-and-thirty following, בְּדָמֵי טָהוֹרָה, 'in the blood of her purifying.' Although the privacy continued to the mother, she was after the seven days released from the ban of uncleanness, and did not communicate defilement to others, as in the previous period of her perfect isolation and disability. The old Jewish authorities are as usual very dogmatic on the point: 'In *Pe'richa*, col. 4, it is written, בְּדָמֵי טָהוֹרָה, "in the blood of her purifying": אִפְּלוּ שִׁפְצַת דָּם כְּנָחַר טָהוֹרָה, "though she issue blood like a flood, yet is she clean." Nor doth she defile anything by touching it but what is holy" (Lightfoot, *Exercit. on St. Luke* [ed. Pitman], xii, 37).

(3.) Equally noticeable, as might be expected, are the traces of this havoc as displayed in the various uncleannesses of death—the third and last of our chapters of classification; and herein we recognise the deeper implication of our human race in the ruin, above all other living beings. "By the law of Moses," says Lightfoot, "nothing was unclean to be touched while it was alive, but only man: a man in leprosy was unclean to be touched, and a woman in her separation; but dogs, swine, worms, etc., were not unclean to be touched till they were dead; and there were also different degrees herein; while touching a dead beast brought uncleanness for a day, touching a dead man produced the uncleanness of a week," etc. (*Harm. of O. T.* as above). This gradation of defilement from contact with death is described—(a) In Lev. xi, 8, 11, 24, 26, 27, 31–35, 39, 40; xvii, 15. (b) In Lev. xxii, 4–8. (c) In Numb. xix, 11, 14, 16. (d) In Numb. vi, 9. In the first of these four sections, the uncleanness arises from the dead bodies of animals, fishes, birds, and reptiles. It was the shortest in duration, lasting in every case only "until even;" and it was to be terminated uniformly by the washing of the clothes. The last statute, Lev. xvii, 15, prescribed ablution of the person also for "every soul that eateth that which died of itself, or that which was torn with beasts." In the second section, the same defilement is described as incidental to the priests, no less than to the laity, from which they must free themselves by ablution. So much for the minor uncleannesses from the dead. Our third and fourth sections contain the instances where the major disability of seven days is occasioned by contact with human dead: "Whosoever toucheth one that is slain with a sword in the open fields, or a dead body, or a bone of a man, or a grave, shall be unclean seven days." As the defilement was deeper, so was the mode of purification more elaborate and solemn. For the details of the ceremony—the sacrifice of the red heifer without the camp; the sevenfold sprinkling of her blood before the tabernacle; the utter consumption by fire of the slain animal; the cedar-wood, hyssop, and scarlet cast into the burning mass; the gathering-up of the ashes; their mixture in running water for "the water of separation;" the sprinkling of this water over the unclean person, on the third and the last of the seven days; his own washing of his clothes and bathing of his person, and his final cleansing on the evening of the seventh day—the reader will consult the 19th chapter of Numbers. Our fourth section

describes the interruption of the Nazarite's vow by any sudden death happening in his presence. This mortality "lost him" all the days of his vow which had transpired, and required for its own expiation also the usual hebdomad, on the last day of which he was to shave his head, and on the morrow bring two young pigeons or two turtles to the priest, that he might present them as a sin-offering and a burnt-offering as an atonement for the polluted. See PURIFICATION.

2. A few stray instances remain of a peculiar kind, which we proceed to class in a supplementary notice. (1.) We have then under this head, first, the cases of what may be called official uncleanness. [a.] The priest who superintended the holocaust of the red heifer was rendered unclean until evening by the part he took in the sacred rite; from this defilement he purified himself by the washing of his clothes and the ablution of his person (Numb. xix, 7). This uncleanness was the more remarkable from the precautionary character of the law, which in other cases seemed strongly to aim at preserving the priests, as far as might be, from the incidence of ceremonial pollution (see Lev. xxi, 1–4). [b.] The man that burned the heifer was involved in the same defilement as the priest, from which he was also extricated by a similar purification (Numb. xix, 8). [c.] So, again, the man who gathered the ashes of the consumed heifer was unclean until evening; but from this disability he was released by the lesser ceremony of simply washing his clothes (ver. 10). Similar instances of uncleanness, arising out of official routine, occur in the ordinances of the Day of Atonement. [d.] The man who dismissed the scape-goat was to wash his clothes and bathe himself before returning to the camp (Lev. xvi, 26), and a like purification was required of him who burned the bullock and the goat of the sin-offering (ver. 28). [e.] Under this head of official uncleanness, we may perhaps place the abnormal case of the Israelitish soldiers who slew the Midianites at the command of Moses (Numb. xxxi, 17). They were to remain outside the camp seven days; purify themselves on the third and on the seventh day; cleanse their raiment, etc., with either fire or the water of separation, as the case might require, and on the last day wash their clothes (ver. 19, 20, 23, 24).

(2.) Besides these cases of official uncleanness, we find one instance *sui generis* occurring in Deut. xxiii, 10, 11, which, with its purification, is thus described: "If there be among you any man that is not clean by reason of uncleanness that chanceth him by night, then shall he go abroad out of the camp . . . but when evening cometh he shall wash himself with water, and when the sun is down, he shall come into the camp again." It may be observed that this case is not designated by the usual term טָמֵא; the phrase merely denotes its accidental character, לֹא-טָהוֹר מִקֶּרֶךְ-לַיְלָה.

(3.) Our enumeration, to be complete, should include the aggregate uncleanness of the priest and his household, and the nation (Lev. xvi); this was expiated by the grand ritual of the great Day of Atonement, for the imposing details of which ceremony we must refer the reader to our article on that subject.

3. Some few historical instances of uncleanness, and more of purification, are mentioned both in the Old Test. and the New Test. As being, however, applications only of some of the statutes which we have given above, we shall refrain from adducing them here, except one case, which is important because it led to the enactment of a proviso in the law. "There were certain men, who were defiled by the dead body of a man, that they could not keep the Passover on that day." They stated their difficulty to Moses and Aaron, the former of whom referred it to the Lord, and obtained from him a statute allowing a supplemental celebration of the Passover for such as were incapacitated in the manner in question or on a distant journey (Numb. ix, 6–12). See PASSOVER.

In contrast with this relief was the inflexible penalty threatened against all wilful neglect of the various rites of purification prescribed in the law. The fullest formula of this penalty occurs in Numb. xix, 20: "The man that shall be unclean and shall not purify himself, that soul shall be cut off from among the congregation [or, as it runs in ver. 13, 'from Israel'], because he hath defiled the sanctuary of the Lord." That this *excision* meant death is evident from Lev. xv, 31, and xx, 9 (see Michaelis, *Laws of Moses* [Smith's transl.], iv, 43, and Keil on Gen. xvii, 14). Jehovah, the theocratic king and holy God, who had his own ways of "cutting off" the disobedient, is pleased to include in his sentence of excision the reason for its infliction—"because he hath defiled the sanctuary of the Lord." This is in direct accordance with the principle by which the Divine Legislator repeatedly sanctions his laws: "Ye shall be holy; for I the Lord your God am holy" (Lev. xix, 2, and frequently elsewhere), and it was the recognition of these saintly duties which always characterized the pious Israelite. "God" (says the psalmist, Psa. lxxxix, 7) "is greatly to be feared in the assembly of the saints [קְדוֹשִׁים], which is likewise the word used in the formula of Leviticus; the phrase בְּקֶהֱל קְדָשִׁים also, which occurs in ver. 5 of this psalm, is the frequent designation of the political organization of the Israelites], and to be had in reverence of all them that are about him."

The Mosaic ritual on uncleanness illustrates much of the phraseology of the Psalms and the prophets, and (what is more) many statements in the New Test., not only in obvious comparisons, as in the Epistle to the Hebrews, but in oblique phrases, such as in Eph. v, 26, 27, where the apostle, "speaking of Christ's washing the Church, that he might present it to himself 'without spot or wrinkle,' etc., seemeth to allude to the Jews' exceeding great curiousness in their washings for purification" (Lightfoot, who quotes Maimonides in *Mikva'oth*, III, iii, 297).

In conclusion, we must refer to the notices of purification which occur in the New Test. These are of three kinds—(a) the *legitimate* instances, such as that of the Virgin Mary (Luke ii, 22), the leper (Mark i, 44), the Nazarite (Acts xxi, 23, 24), all of which make express reference to the law; (b) the *unauthorized* cases, such as the traditional and Pharisaical washings of the hands (Matt. xv, 2), and of tables, cups, and platters (Mark vii, 4), all which the Lord condemned in strong terms as superstitious encroachments on the divine law; (c) the *doubtful* cases, such as the case of those who came to Jerusalem to purify themselves before the Passover (John xi, 55), and the discussion mentioned in John iii, 25. "Their controversy," says Lightfoot, "was partly about the pre-eminence of the Judaical washings and the evangelical baptism—and here the Jews and John's disciples were at opposition, and partly about the pre-eminence of John's baptism and Christ's—and here the Jews would hiss them on in the contestation" (*Works* [ed. Pitman], v, 67).

4. Our object in this article has been to collect the *scriptural* laws on uncleanness and purification, we have avoided the Jewish traditional doctrines. These may be discovered by the curious on such subjects by a careful use of the indexes to the works of Lightfoot, Schöttgen (*Horæ Heb. et Talmud.*), and Surenhusius (*Mishna*). Dr. Wotton, in his work on the Mishna (i, 160–170), has analyzed the *Seder Taharoth*, or *Order of Purifications*, which contains the authorized tradition on the subject of our article. "In this order," says Wotton, "more than in any of the rest, the true Pharisaical spirit which our blessed Lord so severely reprehends in Matt. xv and Mark vii is plainly and fully seen." We subjoin the names of the chief "titles" or sections of this order: 1. *Kelm*, vessels; 2. *Ohaloth*, tents—treating of pollutions from the dead; 3. *Nega'im*, plagues—of leprosy; 4. *Parah*, the red heifer; 5. *Taha-*

*roth*, purifications—relating to lesser uncleannesses which last but a day; 6. *Mikva'oth*, collections of water for the cleansing baths, etc.; 7. *Niddah*, menstrual pollutions; 9. *Zabim*, men that have seminal uncleannesses; 10. *Tibbul Yom*, washed by day (see above); and 11. *Yada'im*, hands—the constitutions in which title have no foundation in the written law. See TALMUD.

**UNCLES, JOSEPH**, a Methodist Episcopal minister, was born Feb. 17, 1812, in Anne Arundel County, Md. He was converted when about eighteen years old; followed school-teaching for some time in Eastern Pennsylvania; graduated at Alleghany College in 1838; labored two years as professor of moral science in Madison College, Uniontown, Pa., and subsequently as principal of Woodfield Academy, O., and at Meadville. In 1843 he joined the Erie Conference, and labored successively at Greenville, Randolph, Forestville, Portland, Jamestown, Silver Creek, Northeast, and Painesville. In 1854 Mr. Uncles was prostrated by disease, and retired to Meadville, where he spent two years as a superannuate, and where, after two years' labor at Sharon, he died, Nov. 12, 1858. He was devout, energetic, and eminently successful. See *Minutes of Annual Conferences*, 1859, p. 198; Simpson, *Cyclop. of Methodism*, s. v.

**Unconditioned Election.** See ELECTION OF GRACE.

**Unction** (*anointing*), an ecclesiastical ceremony which consists in the application of sacred oil to a person or thing. In the Roman Catholic Church there are several of these ceremonies, which are described below. See ANOINTING.

1. *Unction of an Altar*.—This consists in anointing with holy oil the five crosses of an altar-slab by the bishop who consecrates it. The Latin formula is as follows: "Consecratur et sanctificetur hoc sepulchrum. In nomine Patris, et Filii, et Spiritus Sancti. Pax huic domui." This rite has been abolished in the Church of England since the Reformation. See CHRISM.

2. *Unction of the Baptized*.—Some, but not all, of the ancient ritualists mention an unction preceding baptism, and used by way of preparation for it. It was called *χρίσις μυστικού ἑλαίου*, the "unction of the mystical oil." It was consecrated by the bishop, with the prayer that "God would sanctify the oil in the name of the Lord Jesus, and grant it spiritual grace and efficacious power, that it might be subservient to the remission of sins, and the preparation of men to make their profession in baptism, that such as were anointed therewith, being freed from all impiety, might become worthy of the initiation according to the command of his only begotten Son." Men were thus anointed that they might be partakers of the true olive-tree, Jesus Christ; and the exorcised oil was a symbol of their partaking of the fatness of Christ, and an indication of the flight and destruction of the adverse power. See Bingham, *Christ. Antiq.* bk. xi, ch. ix, § 2, 3. See BAPTISM.

3. *Unction of the Confirmed*.—This is anointing with holy oil those confirmed. In the Roman Church the formula runs thus: "Signo te signo crucis; et confirmo te chrismate salutis. In nomine Patris, et Filii, et Spiritus Sancti. Amen." In the Church of England this rite was abolished at the Reformation, and in the Scottish Episcopal Church, as well as the Protestant Episcopal Church of the United States, no unction is now used. See CONFIRMATION.

4. *Unction of a Priest*.—This is anointing with holy oil a person promoted to the priesthood. This rite is peculiarly Latin. When using the holy oil, the bishop who ordains prays thus: "Consecrare et sanctificare digneris, Domine, manus istas per istam unctionem et nostram benedictionem. Amen. Ut quæcumque benedixerint benedicantur, et quæcumque consecraverint consecrentur, et sanctificentur, in nomine Domini nostri Jesu Christi. Amen." There is no such consecration in the

Greek form for bestowing the priesthood. See CONSECRATION.

5. *Unction of the Sick*. See EXTREME UNCTION.

UNCTION, EXTREME. See EXTREME UNCTION.

UNCTION IN PREACHING is that gracious assistance of the Holy Spirit which quickens the mental powers, gives a glow to the feelings, and imparts such a spiritual tone to the preaching of the Word as renders it efficacious in making the truth convincing and authoritative. See SPIRIT (HOLY), BAPTISM OF.

**Undergird** (ὑποζώννυμι, lit. to gird under the breast, 2 Macc. iii, 19; comp. *Ælian*, *V. H.* x, 22), a naval term employed (Acts xxvii, 17) to designate the act of passing cables around the middle of a ship in order to strengthen it (so Polybius, xxvii, 3, 3; Appian, *Bell. Civ.* v, 91; Plato, *Rep.* p. 616). See SHIP.

**Underhill**, JAMES EVAN, an English Wesleyan missionary, was a native of Staffordshire. He was appointed to Jamaica, W. I., by the Conference of 1817. His diligence in study and knowledge of Methodist doctrine and discipline qualified him to give instruction and manage wisely the affairs of his charges. He died of fever at Morant Bay, Jamaica, Sept. 24, 1821, in the twenty-seventh year of his age. He was much beloved by his people. See *Minutes of Wesleyan Conference*, 1822.

**Undersetter** (כַּתֵּף, *kathêph*, a shoulder, as usually rendered), an appendage to the laver (q. v.) in the Temple of Solomon (1 Kings vii, 30, 31), consisting, according to Keil (*Comment.* ad loc.) of props running up from the body of the vehicle and holding the basin between them.

**Underwood, Alvan**, a Congregational minister, was born at West Woodstock, Conn., Sept. 8, 1777. He graduated at Brown University in 1798, studied theology with Rev. Dr. Sanger, and was ordained pastor in his native place in 1801, dismissed in 1833, and thereafter supplied for nearly ten years vacant churches, particularly those in Westford and South Killingly, and finally, for a year or more, his former charge in Woodstock, where he died, April 4, 1858. He published a few sermons and tracts. See *Cong. Quarterly*, 1861, p. 355.

**Underwood, Henry Beman**, a Congregational minister, son of Rev. Almon Underwood, was born at Poughkeepsie, N. Y., Dec. 25, 1839. He studied at Monson Academy, Mass., graduated from Williams College in 1862, and from Andover Theological Seminary in 1865, after having spent two years in the Union Theological Seminary. He was ordained at Ringwood, Ill., Jan. 19, 1866, and was acting pastor there until the following year, when he began preaching at East Longmeadow, Mass., remaining two years. His next field of labor was Marlborough, N. H.; then Baxter Springs, Kan. In 1871 he was installed pastor of the church at Hillsborough Bridge, N. H., in which position he remained for one year and four months. The last charge which he filled was at Algona, Ia., where he became acting pastor in 1873, and died Sept. 2, 1875. See *Cong. Quarterly*, 1876, p. 436.

**Underwood, Joseph**, a Congregational minister, was born at Bradford, Vt., Oct. 2, 1796. He acquired his preliminary education at Kimball Union Academy from 1817 to 1820, and at Chesterfield Academy in 1821, and graduated from Bangor Theological Seminary in 1824. His ordination occurred at New Sharon, Me., and he was pastor there from 1826 to 1831. During 1827-30 he was also serving as acting pastor at Industry. In this latter office he served the Church at North Augusta from 1832 to 1833. He was installed pastor at Williamsburgh, Me., in 1833, and remained there two years, during which time he was also acting pastor at Sebec. The two years following he served as a home missionary in Foxcroft, Dover, Atkinson, Milo, and Bradford, when he was reinstalled at New Sharon, Feb. 22, 1837, remaining there two and a half years. At Millport and Veteran, N. Y., he was installed pastor in

1841, and was dismissed in 1843. As acting pastor, he preached at Hardwick, Vt., for two years, and then, in December, 1846, he was installed there, continuing in charge until February, 1858. During the following year he was acting pastor at Burke, Vt.; from 1860 to 1866 at Barnet; and from 1870 to 1872 he again served the Church at Burke. After the last date he resided, without charge, at Hardwick, of which town he was a representative in the Vermont Legislature in 1856, 1868, and 1869. He died July 27, 1876. See *Cong. Quarterly*, 1877, p. 426.

**Undine** (from *unda*, "wave"), in mediæval superstition is a water-sprite, corresponding nearly to the nymphs of classical mythology. Paracelsus has given several minute rules what to do and how to act when one has happened to marry an Undine, and Friedrich de la Motte Fouqué has treated the subject in a German tale entitled *Undine*.

**Ungal**. Several of the water-gods of the ancient Accadian mythology have names beginning with Ungal, as *Ungal-aba*, "the king of the wave;" *Ungal-abbā*, "the king of the sea;" *Ungal-ariada*, "the king of the river." See Lenormant, *Chald. Magic*, p. 184.

**Ungchan**, JOHN. See JOHN, PRESTER.

**Unger**, SALOMON GOTTLÖB, a Protestant divine of Germany, was born April 25, 1752, at Nieder-Pöllnitz, near Weida, and died June 16, 1818, at Cölleda, in Thuringia. He wrote, *Anmerkungen über den Horus oder von der Weissagung Davids und der Stärke ihres Beweises für die Göttlichkeit und Messianität Jesu* (Leips. 1784):—*De Auctoritate Librorum V. T. in Familia Dei* (ibid. 1785):—*Die Schriften des alten Bundes*, etc. (ibid. 1787):—*De Thermis Sidonis Jos. xi, 8, et xiii, 6, Memoratis Pauca Disp.* (ibid. 1803):—*Lutherus Auctoritatem Librorum Mosis apud Christianos Vindex* (ibid.). See Fürst, *Bibl. Jud.* iii, 461; Winer, *Handb. der theol. Literatur*, i, 820, ii, 811. (B. P.)

**Ungewitter**, REINHARD CHRISTOPH, a Protestant theologian of Germany, was born at Marburg, Jan. 25, 1715. He studied in his native place, and when twenty-one years old he publicly defended his dissertation *De Studio Prophetico sobre Instituendo*. After completing his studies, he went to Cassel in 1736, and until the year 1778 he was actively engaged in pastoral duties. While on a visitation in his function as superintendent and member of consistory, he was paralyzed, and was thus deprived of the power of speech. Although unable to preach, yet he performed the duties connected with his ecclesiastical position, and died Dec. 31, 1784. He published, *Erklärung des Briefes des heiligen Jakobs* (Lemgo, 1754):—*Commentatio de Theologo Tempori Serviente* (Hersfeldia, 1755):—*Versuch einer freien Uebersetzung der beiden Briefe Petri und der drei Briefe Johannis* (Frankfort, 1757):—*Predigten über wichtige Glaubenswahrheiten und Lebenspflichten* (Cassel, 1780-81, 2 vols.). See Döring, *Gelehrte Theologen Deutschlands*, iv, 551 sq. (B. P.)

**Unhallowed Uses**. In the consecration of a church or chapel among the Episcopalians, the building is said to be separated henceforth "from all unhallowed, ordinary, and common uses." The word "unhallowed," as here used, does not mean simply such things as are morally evil, impure, and contrary to the spirit of religion, which is the popular sense, but strictly all such purposes as are not hallowed, made sacred, and consecrated to holy purposes.—Stanton, *Dict. of the Church*, s. v.

**Uniates** are Eastern Christians in external communion with the see of Rome, and are most numerous in those provinces which formerly belonged to Poland. When Sigismund III was elected to the crown of Poland, being a zealous agent of the Jesuits, he at once took measures for reconciling the Polish Church to Rome. His plans were so successful that the archbishop of Kiev summoned a synod at Brest, in Lithuania, to

whom he presented the necessity and advantages of a union with Rome. The clergy favored the project, but it met with a strong opposition from the laity, and could not then be carried into effect. At a synod which met at the same place Dec. 2, 1594, the archbishop and several bishops gave their assent to the scheme of union which had been proposed at the Council of Florence, thus recognising the *Filioque*, or double procession of the Nicene Creed, and acknowledging the supremacy of the pope. They stood out, however, for retaining the use of the vernacular Slavonic in the celebration of divine service for the ritual and discipline of the Eastern Church. On the return of the bishops sent to Rome to announce this event, the king, in 1596, convened the synod at Brest for the publication and introduction of the union. This was met by a public protest on the part of the opposite party, which repudiated the acts of the Uniates, and declared their unaltered attachment to the ancient Church of their country and to the patriarch of Constantinople. Sigismund deprived them of their churches and convents, and forbade the promulgation of Greek doctrines in his dominions. This division of the Church continued in full force until the partition of Poland, in 1772, at which time between two and three millions of the Uniates gave up their allegiance to Rome, and returned to the Eastern Church. In 1839 2,000,000 more were reconciled; but there are still about 300,000 in Russia and 3,000,000 in Austria. See Krasinski, *Reform in Poland*; Mouravief, *Hist. of the Church of Russia*; Neale, *Patriarchate of Alexandria*.

**Unicorn** is the invariable but unfortunate rendering in the A. V. of a Heb. word which occurs nine times in three slightly varied forms (רֶעִם, *rēm*, Numb. xxiii, 22; xxiv, 8; plur. רֶעִמִּים, *re'imim*) Psa. xxix, 6; Isa. xxxiv, 7; רֶעִם, *re'ym*, Psa. xlii, 10; רֵיִם, *reym*, Job xxxix, 9, 10; and רֶם, *rēm* [only with plur. רֶעִמִּים, *re'imim*], Psa. xxii, 21; never with the article; Sept. *μωκορώς* or *ἀδρός*; Vulg. *rhinoceros* or *unicornis*) as the name of some large wild animal. More, perhaps, has been written on the subject of the unicorn of the ancients than on any other animal, and various are the opinions which have been given as to the creature intended. The etymology of the Heb. term (according to Gesenius, from רָם = רֵיִם, *to be high*; but according to Fürst, from an obscure root רָם, *to roar*) affords no clear indication of the animal, and hence we must resort to indirect means for elucidating the subject.

1. *Scriptural Characteristics*.—The great strength of the *rēm* is mentioned in Numb. xxiii, 22; Job xxxix, 11; his having two horns in Deut. xxiii, 17; his fierce nature in Psa. xxii, 21; his indomitable disposition in Job xxxix, 9–11; the active and playful habits of the young animal are alluded to in Psa. xxix, 6; while in Isa. xxxiv, 6, 7, where Jehovah is said to be preparing “a sacrifice in Bozrah,” it is added, “*Re'imim* shall come down, and the bullocks with the bulls.” The following is a close rendering of Job's famous description of this animal (xxxix, 9–12):

“Will Reym be disposed to serve thee?  
Would he perchance lodge on thy stall?  
Canst thou tie Reym in a furrow [with] his braid?  
Will he perchance harrow valleys after thee?  
Wilt thou trust in him, because vast [is] his force;  
Or leave to him thy labor?  
Wilt thou believe in him, that he will return [home]  
thy seed,  
Or [unto] thy threshing-plat gather [it]?”

II. *Modern Attempts at Identification*.—1. The *rēm* of the Hebrew Bible has little at all to do with the one-horned animal mentioned by Ctesias (*Indica*, iv, 25–27), Ælian (*Nat. Anim.* xvi, 20), Aristotle (*Hist. Anim.* ii, 2, 8), Pliny (*H. N.* viii, 31), and other Greek and Roman writers (Solin. 55; Niceph. *H. E.* ix, 19), as is evident from Deut. xxiii, 17, where, in the blessing of Joseph, it is said, “His glory is like the firstling of his bullock,

and his horns are like the horns of a unicorn” (רֶעִם וְקַרְנֵי אֶיִל, not, as the text of the A. V. renders it, “the horns of unicorns.” The two horns of the *rēm* are “the ten thousands of Ephraim and the thousands of Manasseh”—the two tribes which sprang from one—i. e. Joseph, as two horns from one head. This text puts a one-horned animal entirely out of the question, and, in consequence, disposes of the opinion held by Bruce (*Trav.* v, 89) and others, that some species of rhinoceros is denoted, or that maintained by some writers that the *rēm* is identical with some one-horned animal said to have been seen by travellers in South Africa and in Tibet (see Barrow, *Travels in South Africa*, i, 312–318; *Asiatic Journal*, xi, 154), and identical with the veritable unicorn of Greek and Latin writers.

Little, however, can be urged in favor of the rhinoceros, for, even allowing that the two-horned species of Abyssinia (*R. bicornis*) may have been an inhabitant of the woody districts near the Jordan in Biblical times, this pachyderm must be out of the question, as one which would have been forbidden to be sacrificed by the law of Moses; whereas the *rēm* is mentioned by Isaiah as coming down with bullocks and rams to the Lord's sacrifice. “*Omnia animalia*,” says Rosenmüller (*Schol. in Is.* loc. cit.), “ad sacrificia idonea in unum congregantur.” Again, the skipping of the young *rēm* (Psa. xxix, 6) is scarcely compatible with the habits of a rhinoceros. Moreover, this animal, when unmolested, is not generally an object of much dread, nor can we believe that it ever existed so plentifully in the Bible lands, or even would have allowed itself to be sufficiently often seen so as to be the subject of frequent attention, the rhinoceros being an animal of retired habits.

2. Bochart (*Hieroz.* ii, 335) contends that the Hebrew *rēm* is identical with the Arabic *rim*, which is usually referred to the *Oryx leucoryx*, the white antelope of North Africa, and at one time, perhaps, an inhabitant of Palestine. Bochart has been followed by Rosenmüller, Winet, and others.

But with regard to the claims of the *Oryx leucoryx*, it must be observed that this antelope, like the rest of the family, is harmless unless wounded or hard pressed by the hunter; nor is it remarkable for the possession of any extraordinary strength. Figures of the oryx frequently occur on the Egyptian sculptures, “being among the animals tamed by the Egyptians and kept in great numbers in their preserves” (Wilkinson, *Anc. Egypt.* i, 227, ed. 1854). Certainly this antelope can never be the fierce indomitable *rēm* mentioned in the book of Job (see Lichtenstein, *Ueb. d. Antilopen des nördl. Africa* [Berl. 1826]). See ANTELOPE.

3. Arnold Boet (*Animad. Sacr.* iii, 8 [Lond. 1644]), with much better reason, conjectures that some species of *Urus*, or wild-ox, is the *rēm* of the Hebrew Scriptures. He has been followed by Schultens (*Comment. in Jobum xxxix*, 9, who translates the term by *Bos sylvestris*: this learned writer has a long and most valuable note on this question), Parkhurst (*Heb. Lex.* s. v. רֶעִם), Maurer (*Comment. in Job.* loc. cit.), Dr. Harris (*Nat. Hist. of the Bible*), and by Cary (*Notes on Job*, loc. cit.).

Considering that the *rēm* is spoken of as a two-horned animal of great strength and ferocity, that it was evidently well known and often seen by the Jews, that it is mentioned as an animal fit for sacrificial purposes, and that it is frequently associated with bulls and oxen, we think there can be no doubt that some species of wild-ox is intended. The allusion in Psa. xcii, 10, “But thou shalt lift up, as a *re'ym*, my horn,” seems to point to the mode in which the *Bovidae* use their horns, lowering the head and then tossing it up. But it is impossible to determine what particular species of wild-ox is signified. At present there is no existing example of any wild bovine animal found in Palestine; but negative evidence in this respect must not be interpreted as affording testimony against the supposition that wild

cattle formerly existed in the Bible lands. The lion, for instance, was once not unfrequently met with in Palestine, as is evident from Biblical allusions; but no traces of living specimens now exist there. Dr. Roth found lions' bones in a gravel bed of the Jordan some few years ago; and it is not improbable that some future explorer may succeed in discovering bones and skulls of some huge extinct *Urus*, allied, perhaps, to that gigantic ox of the Hercynian forests which Cæsar (*Bell. Gall.* vi, 20) describes as being of a stature scarcely below that of an elephant, and so fierce as to spare neither man nor beast should it meet with either. "Notwithstanding assertions to the contrary," says Col. Hamilton Smith (Kitto, *Cyclop.* art. "Reem"), "the urus and the bison were spread anciently from the Rhine to China, and existed in Thrace and Asia Minor; while they, or allied species, are still found in Siberia and the forests both of Northern and Southern Persia. Finally, though the buffalo was not found anciently farther west than Aracoria, the gigantic *Gaur* (*Bibos gaurus*) and several congeners are spread over all the mountain wildernesses of India and the Sheriff al-Wady; and a further colossal species roams with other wild bulls in the valleys of Atlas. We figure *Bibos carifrons*, a species which is believed to be still found south-west of the Indus, and is not remote from that of the Atlas valleys." See WILD BULL.

Wild Bull (*Bibos carifrons*).

4. Russell (*Aleppo*, ii, 7), Robinson (*Bibl. Res.* ii, 412), and Gesenius (*Thestur.* s. v.) have little doubt that the buffalo (*Bubalus bubalus*) is the *reem* of the Bible; and this opinion is shared by Umbreit, Hitzig, Ewald, Hengstenberg, and other commentators. Although the *Chainsa*, or tame buffalo, was not introduced into Western Asia until the Arabian conquest of Persia, it is possible that some wild species (*Bubalus arnee*, or *B. brachycerus*) may have existed formerly in Palestine. See BUFFALO.

III. *The Unicorn Proper.*—1. *Legendary Notices.*—Throughout classical antiquity (as seen above) vague notions of a true unicorn prevailed. In the *ὄνοι ἀγριοί* of Ctesias, which were larger than horses—white, with a horn on the forehead a cubit long, which were very swift and strong, not ferocious unless attacked, and then irresistible, so that they could not be taken alive—we can trace the original of the familiar form that figures in the English national heraldic shield. Aristotle and Herodotus follow Ctesias, and Strabo gives the unicorn a deer-like head. Oppian makes it a bull with undivided hoofs and a frontal horn; and Cæsar, who puts it in the Hercynian forest, gives its single horn palmate branches like those of a deer. Pliny draws the portrait with the greatest attention to details. It was a most savage beast, generally like a horse, with the head of a deer, the feet of an elephant, the tail of a boar, a deep belching voice, and a single black horn, two cubits long, projecting from the middle of its forehead. See the *Ann. and Mag. of Nat. Hist.* Nov. 1862.

Although the medallie history of the

kings of Macedon (Havercampus, *Gen. Hist.* [in the Dutch language]) furnishes no coins bearing a single-horned goat, it is still asserted by Maillot and others that such was to be found among their ensigns; but this was most probably after the Macedonian conquest; for a single-horned ibex appears on the bas-reliefs of Che el-Minar; another occurs on a cylinder; and one cast in brass, supposed to have been the head of a Macedonian standard, was found in Asia Minor, and presented to the Antiquarian Society of London. If mysterious names were resolvable by the canons of pictorial definition, the practice of imagining horns to be affixed to the most sublime and sacred objects would be most evident from the radical meaning of the word cherub, where the notion of horns is everywhere blended with that of "power and greatness." See CHERUBIM. There were also horns at the corners of altars—the beast with ten horns in Daniel, etc. (ch. vii). In profane history we have the goat-head ornament on the helmet of the kings of Persia, according to Ammianus, more probably Ammon horns: such Alexander the Great had assumed; and his successors in Egypt and in Persia continued a custom even now observed by the chief cabossiers of Ashantee, who have a similar ram-head of solid gold on the front of their plumed war-caps. Indeed, from early antiquity Greek and Ionian helmets were often adorned with two horns; among others the head of Seleucus I (Nicator) appears thus on his coins. The practice extended to metal horns being affixed to the masks or chaffrons of war-horses (so coins of Seleucus Nicator) and of elephants (Antiochus Soter); and they form still, or did lately, a part of the barbed horse-armor in Rajahstan. Triple-horned and bicorn helmets are found on early Gallic and Iberian coins; they were again in use during the chivalrous ages; but the most remarkable, the horn of strength and dominion, is seen elevated on the front of the helmet impressed on the reverse of the coins of the tyrant Tryphon, who, in his endeavors to obtain Syria, was at war with Antiochus Sidetes during the æra of the Maccabees, and was not likely to omit any attribute that once belonged to its ancient kings. See HORN.

2. *Scientific Descriptions.*—In later times the fancy ran riot in describing and figuring the unicorn, and no one who attempted a *Historia Naturalis* thought his work complete without full particulars concerning this interesting beast. As some of the descriptions of the ancients were a little inconsistent with each other, and as the materials were too valuable to allow any to be sacrificed, different species of unicorn were established, in the copiousness of which the most fastidious student might satisfy his choice. Thus there were the wald-esel, the meer-wolf, the ox-hoofed unicorn, the camel-hoofed unicorn, the sea-unicorn (not the cetacean so named), the two-horned wald-esel (one horn behind the other), and several others, all of which are duly

Unicorn (*Rhinoceros simus*).

figured by the indefatigable Johnston (*Hist. Nat.* 1657).

Admitting that there is abundance of chaff in all this, naturalists have for some time been inclining to admit that there may be some little wheat also (see Meyer, *Ueb. d. Säugthier Reim* [Leips. 1796]). The rhinoceroses of India and Africa showed that a single central horn was not in itself unnatural; and the discovery of several species of this huge pachyderm in the southern parts of the latter continent has brought out some features of the old descriptions which had been assumed to be fabulous. Some years since the missionary Campbell excited much interest by sending home from South Africa the head of a rhinoceros which came much nearer that of the traditionary unicorn than anything as yet known to naturalists. It bore a single straight slender horn, projecting from the face to the height of three feet, with a small tubercle-shaped horn immediately behind this. The zoological researches of Dr. Andrew Smith, and the exploits of not a few naturalist sportsmen in the wild-beast regions lying to the north of the Cape Colony, have made us familiar with this species (*Rhinoceros simus*), as well as others with a similar arrangement of horns.

**Uniculus**, a Low-Latin term for an alms-box with a perforated cover.

**Uniformity.** The ecclesiastical use of this word is to denote the use of one and the same form of public prayers, administration of sacraments, and other rites, etc., prescribed by the Acts of Uniformity. The first of these was issued by Parliament during the reign of Elizabeth, and provided—for the first offence, forfeiture of one year's profits and six months' imprisonment; for the second offence, deprivation of all spiritual promotions and imprisonment for one year; and for the third offence, deprivation of all spiritual promotions and imprisonment for life (see stat. 1 Eliz. c. 2, § 4-8). According to the act passed in the reign of Charles II, 1662, every person obtaining preferment in the Church or universities must declare his assent to everything contained in the *Book of Common Prayer*. See CONFORMITY.

**Unigenitus** (so called from its first word, referring to the *only-begotten Son*), THE BULL, was an instrument which was issued by pope Clement XI, and made its appearance on Sept. 8, 1713. It was directed against the French translation of the New Test. with notes, published by Quesnel, a celebrated Jansenist. In consequence of the disputes which this book had occasioned, it had previously been condemned in 1708; but, this step being found ineffectual, Clement proceeded to condemn one hundred and one propositions contained in the notes. The following may be taken as a specimen of the opinions denounced by this bull: "No graces are given except through faith." "The reading of the Sacred Scriptures is for all." "The obscurity of the Sacred Word is no reason for laymen to dispense themselves from reading it." "The Lord's day ought to be sanctified by Christians for works of piety, and, above all, for the reading of the sacred Scripture. It is damnable to wish to withdraw a Christian from this reading." This bull, procured by Louis XIV and the Jesuits, produced great commotions in France. Forty Gallican bishops accepted it; but it was opposed by many others, especially by Noailles, bishop of Paris. Sixteen bishops suspended the bull in their dioceses. They were supported by the universities of Paris, Rheims, and Nantes, and by the Paris faculties of theology, law, and arts. Many of the prelates and other persons appealed in vain to a general council, and were for this reason called Appellants. A persecution was raised against those who adopted the principles of the Jansenist Quesnel, and many of them were obliged to flee

their country. This bull was, however, overruled for good. It tended to confirm Protestants in their separation from Rome; and it affords a full and satisfactory answer to the falsehood put forth by popish priests, that they do not hide the Scriptures from the people. See Blunt, *Dict. of Theol.* s. v.; Farrar, *Eccles. Dict.* s. v.

**Unio Mystica** (*mystical union*) is a theological term applied to that intimate union between God and man that results through the exercise of saving faith. See Hagenbach, *Hist. of Doctrines* (1869), i, 188; ii, 288.

**Union American Methodist Episcopal Church.** THE, was founded by Rev. Peter Spencer, in Wilmington, Del., June, 1813, and was composed of seceding colored members of the Methodist Episcopal Church. It was chartered under the title of "The African Union Church," which it retained until after the war, when its present name was adopted. Originally the ministers served without compensation, and without any limit to their term of service. The societies, though, adopting common articles of religion, usages, and discipline, were distinct from each other. In 1871 a convention was called, which adopted an itinerant ministry, limiting the pastoral term to two years; and permitting compensation. The doctrines are precisely those of the Methodist Episcopal Church, as are also the general features of the government. They have a general conference, meeting once in four years; annual conferences, of which there are now five; quarterly conferences; love-feasts; and class-meetings. A general superintendent is elected by the General Conference, who holds his office for four years, and is eligible to re-election. The general superintendent in 1878 was Rev. Edward Williams, and two superintendents, Rev. John C. Ramsey and Rev. A. S. Sandford, D.D. The statistics in 1876 are given as follows:

Conferences.	Preachers.	Members.	S. S. Scholars.	Church Property.
Delaware and Pennsylvania.	60	1347	2180	\$50,000
New England.....	25	600	200	45,000
New Jersey.....	6	300	103	35,000
Canada West.....	5	300	50	5,000
Arkansas.....	25	315		5,000
Total.....	121	2862	2533	\$140,000

**Union WITH CHRIST**, that act of divine grace by which we are joined to Christ; and is considered, 1. As *virtual*, or that which was formed from all eternity (Eph. i, 4); 2. *Vital*, or *spiritual*, formed in the moment of our regeneration (John xvii, 26; 1 John iv, 13). It is represented in the Scripture by the strongest expressions language can admit of, and even compared to the union between the Father and the Son (John xvii, 11, 21, etc.). It is also compared to the union of a vine and its branches (xv, 4, 5); to the union of our food with our bodies (vi, 56, 57); to the union of the body with the head (Eph. iv, 15, 16); to the conjugal union (v, 23, 30); to the union of a king and his subjects (Matt. xxv, 34, 40); to a building (1 Pet. ii, 4, 5; Eph. ii, 21, 22). It is also represented by an identity or sameness of spirit (1 Cor. vi, 17); by an identity of body (xii, 12, 27); by an identity of interest (Matt. xxv, 40; John xx, 17). This union must be considered, not as a mere mental union only in comfort or notion; nor a physical union, as between the head and the members; nor as an essential union, or union with the divine nature; but as a mystical union (Eph. v, 32); an honorable union (1 John iii, 1, 2); a supernatural union (1 Cor. i, 30); holy (1 John iii, 24); necessary (John xv, 4); inviolable (Rom. viii, 38, 39). Some state it thus: 1. A union of natures (Heb. ii, 11); 2. Of actions, Christ's obedience being imputed to us, and our sins reckoned to him (2 Cor. v, 21); 3. Of life (Col. iii, 4); 4. Of sentiment (2 Cor. v, 17); 5. Of interest (Matt. xxv, 34, etc.); 6. Of affection (2 Cor. v, 14); 7. Of residence (John xvii, 24). The *advantages* of it are knowledge (Eph. i, 18), fellowship (1 Cor. i, 9), security (John xv,

felicity (1 Pet. i, 8), spirituality (John xv, 8); and, indeed, all the rich communications of spiritual blessings here and hereafter (Col. i, 22). The evidences of union with Christ are: light in the understanding (1 Pet. ii, 9); affection to him (John xiv, 21); frequent communion with him (1 John i, 3); delight in his word, ordinances, and people (Psa. xxvii, 4; cxix); submission to his will, and conformity to his image (1 John ii, 5). See Dickinson, *Letters*, let. 17; Flavel, *Method of Grace*, ser. 2; Polhill, *On Union*; Brown, *Compend*, V, i.

UNION OF CHURCHES, in English law, is the combining and consolidating of two churches into one. It is also where one Church is made subject to another and one man is rector of both, and where a conventual Church is made a cathedral. In the first case, if two churches were so mean that the tithes could not afford a competent provision for each incumbent, the ordinary, patron, and incumbents might unite them at common-law before any statute was made for that purpose; and in such case it was agreed which patron should present first; for though, by the union, the incumbency of one Church was lost, yet the patronage remained, and each patron might have a *quære impedit*, upon a disturbance, to present it in his turn. The license of the king is not necessary to a union, as it is to the appropriation of advowsons; because an appropriation is a mortmain, and the patronage of the advowson is lost, and, by consequence, all first-fruits and tenths; whereas in a union these consequences do not follow. The three statutes in existence relating to union of churches are the 87 Henry VIII, c. 21; the 17 Charles II, c. 3; and the 4 and 5 William and Mary, c. 12.

UNION, CONGREGATIONAL. Conder says of such unions, "The recent formation of the Congregational and Baptist unions has given rise to the notion that there exists among the Nonconformists of the present day a disposition to abandon the principles of strict Independency, and to adopt a new species of machinery or organization more nearly approaching to Presbyterianism. For this idea there is no foundation. These unions differ in no other respect than in their more extended or comprehensive character from the county unions and associations of churches which have always existed in both denominations for similar objects. They have no relation to a scheme of Church government; their object is not to set up a Church or to create a jurisdiction, but simply to facilitate a general co-operation for common and public objects of a religious nature." See INDEPENDENTS.

UNION, HYPOSTATICAL, is a theological term devised by the old divines to express the union of the human nature of Christ with the divine in one person. It must be observed that this union is not consubstantial, as of the three persons in one Godhead; nor physical, as soul and body united in one person; nor mystical, as between Christ and believers; but so that the manhood subsists in the second person, yet without making confusion, both forming but one person. See Arianism; HYPOSTATICAL UNION; PERSON OF CHRIST; SABELLIANS.

Unitarianism, belief in the unity of God. In a comprehensive sense it includes, with a part of Christendom, Jews, Mohammedans, Deists, and all who worship God as one. For this use, however, the accepted term is *Monotheism*. Within the ranks of Christendom the name *Unitarian* is given to those who reject the dogma of the Trinity in its varying phases of a three-fold or tripersonal Deity, whether three in substance or only in name and form, and who maintain the essential unity of God as Creator and Father, and the created nature and subordinate rank of Jesus Christ. Within this range opinions about Jesus vary from those that assign him a pre-existent and superangelic rank to an estimate purely human. While the name strictly touches this doctrine only, it is vitally related and gives character to the whole system of belief concerning human nat-

ure and need, human life and its purpose, this world and its meaning, and the future world and man's destiny.

I. *History of the Belief*.—1. *In the Early Church*.—Unitarianism has accompanied Christianity from the beginning, at least as one form of its faith. Unitarians maintain that their faith is that of the early Church as taught by Jesus Christ and his apostles. They appeal to Jesus as the supreme teacher of Christianity, finding in his word and character the essence of the Gospel. They state their chief tenets in the language of the New Test. without note or comment, "To us there is but one God, the Father;" "This is life eternal to know thee, the only true God, and Jesus Christ whom thou hast sent." They hold that the doctrine of the Trinity, so startling to Jews trained in the worship of one God and expecting a Messiah of human lineage, would have required a statement more explicit than any found in the Bible record. They hold that the doctrine, at best, is an inference from texts of obscure meaning or doubtful genuineness, every one of which is separately abandoned by prominent Trinitarian scholars as not expressly teaching the doctrine; while the Roman Catholic holds it on the authority of the Church, deeming it not clearly taught in the Bible.

Unitarians consider the doctrine of the Trinity a gradual development, as Gentiles came into the Church and subjected the Gospel to the influence of Oriental speculations and Greek philosophy. The followers of Zoroaster and Plato, teaching the eternal antagonism of spirit and matter, filled the time with speculations concerning God as a superior essence creating the world by inferior divinities. In the Platonic doctrine of the Logos began the gradual deification of Jesus, consummated only by votes of successive councils of the 4th century. A succession of testimonies meanwhile show the continued existence of faith in the undivided unity of God. In the latter half of the 2d century, Justin Martyr says, "Some there are among ourselves who admit that Jesus is Christ while holding him to be man of men." Still later, Tertullian says, "Common people think of Christ as a man." About the year 200 Tertullian was himself the first to introduce into Christian theology the word "Trinitas." The unity of God was expressly taught by a sect called the "Monarchians." Some held that God the Father himself was born and suffered in human form, and hence were called "Patripassians." Of these were Beryllus, bishop of Bostris in Arabia; Praxeas, who came from Asia Minor to Rome; Noetus, of Smyrna; and, still later, Sabellius, a presbyter in the Church about A.D. 250, the most original and profound mind among the Monarchians. The teachings of Sabellius are variously represented by friend and foe, and are not now very accurately to be known. He had followers as late as the 5th century in Mesopotamia and in Rome. Others held that Christ was in nature purely human, but exalted by his superior measure of divine wisdom and inspiration. Of these were Theodotus of Byzantium, Artemon of Rome, and Paul of Samosata. This noted teacher, bishop of Antioch from the year 260, makes prominent the human personality of Christ, teaching that "Christ was a man," "exalted to peculiar union with the divine nature by the illumination of divine wisdom." Deposed in 269, his name became a synonym for heresy; and in the next century the celebrated historian Eusebius confirms the testimony that he taught "that Christ was in nature but a common man." Speculation and controversy thus went forward until, in the beginning of the 4th century, the relation of God and Christ had become a question of substance or resemblance. In the famous theological struggle over the terms *homo-* and *homoio-ousion*, whether God and Christ were of the same or only similar nature, Arius maintained that Jesus was a created being. He was opposed by the bishop Alexander, aided by Athanasius; and the controversy waxed hot and opinion was divided, until Constantine, recently come to the throne as the first Christian emperor, summoned in A.D. 325 the

Council of Nice, in which the angry storm of the three hundred theologians was allayed and Arius and his doctrine condemned. The historian Eusebius naively says, "The emperor succeeded in bringing them into similarity of judgment and conformity of opinion on all controverted points." For another century controversy continued as to the Holy Spirit, the double nature of Christ, and Mary as Mother of God, all of which were gradually settled by majority votes of successive councils, culminating in the Creed long attributed to Athanasius, but now believed to have been written a hundred years after his death.

In surveying the opinions of the early Church, it thus becomes clear that Unitarianism existed from the beginning; that the belief in the Trinity and the Deity of Christ was three or four centuries gradually forming; that during this period the range of opinions concerning Jesus was as widely varied as at the present time; that two or three hundred years after the death of Christ it was still doubtful, and settled only by the majority of a council, whose decision was secured through the influence of a newly converted emperor, whether the Christian Church should regard Jesus as a person in the Godhead, or, as the apostle Peter declared him, a man approved by signs and wonders which God did by him. The Unitarian deems the whole question a corruption of the pure Gospel by philosophic speculation, and seeks, as the essence of Christianity, the practical religion taught by Jesus Christ—of love to God and man.

It may be added as a fact of interest, and one significant of the aid rendered to Christianity by this branch of the Church, that one of the chief lights of Arianism, the Gothic Ulfilas, born near the Lower Danube at about the time of the Council of Nice, and consecrated bishop at the age of thirty, devoting himself to the religious and social development of his people, familiar with the Latin, Greek, and Gothic languages, rendered his name forever to be honored by his translation of the Bible into his native tongue, which at once helped to give lasting form to the Gothic language and to perpetuate Christianity among the Gothic people. For four centuries the Goths were accompanied in their migrations by this sacred national work, portions of which still remain in the University Library of Upsal, in Sweden. The sect of the Nestorians, also, who may fairly be counted on the Arian side, at about the 7th century, were the first to carry Christianity to the far East, into Persia and China.

2. *The Reformation* reveals Unitarianism existing, and awakens it to renewed life. It accompanied Protestantism from its cradle, as it had accompanied primitive Christianity. Before Luther's death it had appeared in Italy, Hungary, Poland, Switzerland, Germany, and England. In the contest with the pope and his hierarchy, the majority of Protestants, absorbed in the struggle for freedom, accepted, unchallenged, as their hereditary belief, the substance of doctrine of the Romish Church. Yet in every Protestant confession the doctrine of the Trinity is reiterated as if on the defensive; while the testimonies of Calvin, Melancthon, and others against the Unitarian heresy reveal its strength. Among the many who, before and after the Reformation, bore witness to their faith in persecution and death, Unitarianism has its own list of confessors and martyrs. In bishop Mant's *History of Ireland* is a brief account of Adam Duff, who for his denial of the Trinity was burned alive, near Dublin, in 1326. The early theological repositories make record of a priest, William Taylor, put to death as an Arian, in England, in 1422.

Conspicuous among the Reformers were the Unitarians Servetus and the Socini. Michael Servetus, born in Villanueva, Aragon, in 1509, the year of Calvin's birth, while studying law at Toulouse, heard of the contest, left his home and his profession, and sought the Reformers (Ecolampadius, at Basle, Bucer and Capito, at Strasburg, and Calvin, at Paris. His bold genius pushed past them in seeking a rejuvenated Christiani-

ty. Skilled in mathematics and the Oriental languages, in law, medicine, and theology, his fearless spirit of inquiry and eager thirst for truth gave the highest interest to his religious speculations. "Your trinity," he declares, "is a product of subtlety and madness. The Gospel knows nothing of it. The old fathers are strangers to these vain distinctions. It is from the school of Greek sophists that you, Athanasius, prince of tritheists, have borrowed it." Such sentiments provoked bitter hostility. Zwingli denounced him as "that wicked and cursed Spaniard;" Calvin spoke of him as the "frantic" Servetus, who "has thrown all things into confusion." When Servetus published his *Seven Books on the Errors of the Trinity*, and his more noted work on the *Restoration of Christianity*, severely criticising Calvin's views, his doom was sealed. On his flight from persecutors at Vienne, as he stopped at Geneva, Calvin caused his arrest and trial. The flames of Protestant persecution dismissed into eternity, through frightful agony, this brave soul that dared assert the absolute unity of God. The leading Reformers expressed no regret, but silently or openly approved it. See SERVETUS.

Lælius Socinus, born in Siena in 1525, of distinguished ancestry, familiar with Biblical languages, an able critic, a member of the famous Vicenza Secret Religious Society of Forty, on their dispersal fled to France, England, Poland, and at last to Zurich, where he died at the age of thirty-seven. A student rather than reformer or controversialist, he yet left behind him a deep impress of his free and original thought. His nephew, Faustus Socinus, born also in Siena in 1539, was expelled from Italy at twenty, studied at Basle, visited Poland and Transylvania, where, carrying forward his uncle's thought and work until his death in 1604, he became the more active and noted leader of Socinianism (q. v.).

Less conspicuous, but with these, may be named in Germany, Cellarius, Capito, Johann Denk, Sebastian Frank, and the scholarly Ludwig Hetzer, one of the earliest, who, for writing against the Deity of Christ, was imprisoned by the magistrates of Constance, and suffered death in 1529; also Claudius of Savoy, George Blandrata in Transylvania, Gonesius and Farnovius in Poland, Stephen Dolet, friend and disciple of Servetus, who, at the age of thirty-seven, was tried for heresy and burned alive in Paris in 1546; and John Valentine Gentilis, who preached in France and Switzerland, and suffered death at Berne in 1566, saying, as he laid his head on the block, "Many have suffered for the glory of the Son, but none have died for the glory and supremacy of the Father."

3. *In Italy*, before the Reformation, the doctrine of the Trinity encountered dissent, the advocates of which were driven from the country, or were attracted by the larger freedom farther North. Thus went forth many to Switzerland, Germany, Hungary, and Poland; among whom were the famous Socini and the celebrated preacher Bernardo Ochino. Hundreds also were put to death, among whom were James Paleologus, burned at Rome, and Segna and Guirlanda, drowned at Venice. It was in this interest of reforming the faith that the society was formed in Vicenza, of forty persons of talents and learning, discarding the Trinity, meeting in secret, of whom, after 1546, many were imprisoned and others suffered death. From that time there has been no recognised or organized Unitarian body of any strength in Italy, although it is believed there are many who hold this faith. The advocate Magnani has for years conducted Unitarian service at Pisa. The astronomer Filopanti has lectured in Bologna, Milan, Rome, and Naples upon Channing, the distinguished American Unitarian leader, of whom further mention will be made below. Professor Ferdinando Bracciforti has translated Channing's works into Italian, and has for years conducted Unitarian service at Florence and at Reggio. Professor Sbarbaro, in the *Rivista Europa* of October, 1879, argues that Channing supplies the form and spirit of the religion needed by the

craving heart of thoughtful Italy. He there says, "I have made choice of Channing as the most eloquent witness and an irrefragable proof of the new evolution of Christian thought in the world, and of the reform which is in process of initiation in human religiousness; because in the story of his career, and in the fortunes of his books, in the marvel of their rapid diffusion in all corners of the civilized earth, is to be seen the most luminous and triumphant proof of the reality of that movement which is inwardly transforming European society, and bringing it, little by little, to worship under the roof of a new temple, that Church really catholic, whose frontal shall bear, without untruth, the inscription 'To the One God,' which Mazzini hailed on the façades of the Unitarian churches of Hungary."

4. In France, reporting two million Protestants, since the martyrdom of Dolet in Paris, no specific Unitarian movement has been known. But during the last fifty years, in the Reformed Church, which is mostly Trinitarian, has been a growing liberal party; among whom the Coquerels, father and son, Martin Paschoud, Fontanes, Colani, Vincent, and the present liberal Parisian pastor Auguste Dide have substantially represented Unitarianism. Their papers were formerly *Le Réformateur*, and *Le Disciple de Jésus*, and at present *La Renaissance*. Says Renan, in a brilliant essay on Channing in 1863, "France has rejected Protestantism. She is the most orthodox country in the world, because she is the most indifferent in religious matters."

5. In Switzerland, where the early Unitarian martyrs (Hetzer, at Zurich, in 1529, and Servetus, at Geneva, in 1553) paid the penalty of their lives, the spirit of liberty in Church as in State has prevailed; and, without separate formal organization, Unitarian sentiments, from the first, have been steadily held. The Swiss Church has been committed to no dogmatic declaration, but only "to preach purely and fully the Word of God as contained in the Holy Scriptures." The Genevan Church, in general, denies the equality of the Son with the Father, and the Godhead of the Messiah. The correspondent of the *Evangelical Christendom*, Feb. 1, 1875, says, "The Grand Council of Basle, on the question of the Deity of Christ, on May 2, 1871, decided in the negative by a vote of sixty-three voices against forty-eight." Étienne Chastel, professor of ecclesiastical history at Geneva, is among Channing's most ardent admirers. French Switzerland has itself produced two great liberals, Samuel Vincent and Alexander Vinet, who were largely in sympathy with Unitarian thought.

6. Holland, like Switzerland and America, always hospitable to those who are exiles for conscience, has never been wanting in representatives of a free theology. Of its two and a half million Protestants, about four fifths belong to the Reformed Church; which, again, has its two parties of Orthodox and Moderns. Since the burning of Flekwyk, a Dutch Baptist, for his denial of the Trinity in 1569, there has been continued progress. In a popular religious work by Dr. Matthes, it is a significant fact that the chapter on God has no allusion to the Trinity; but at the close occurs a foot-note in which, with the calm spirit of the historian rather than that of the controversialist, he speaks of "the antiquated doctrine of the Trinity." The creed adopted at the Synod of Dort in 1618 has given place to the acceptance of the Bible as the standard of faith, together with the toleration and diversity of sentiment which are sure to follow.

7. Germany, that gave the world, along with Luther, some of the first Unitarian reformers, during the succeeding three and a half centuries, without any distinctly organized Unitarian movement, has, with its noted scholarship and philosophy, produced all shades of rationalism, from extreme orthodoxy to extreme unbelief. In South Germany, governmental statistics of 1861 report 325,000 Unitarians. Says Dr. Beard, "The Trinity subsists among the learned of Germany only in name. The patristical doctrine has been attenuated to a shadow or reduced to nothing; if brought down into

scriptural form it is abandoned; if converted into three 'somewhats,' it is no longer such as the creeds declare or their advocates recognise. The doctrine once taught and held for an essential article of Christian faith is virtually repudiated and silently disowned." A translation of Channing's complete works, by Sydow and Schultze, was published in Berlin in 1850. After that, the chevalier Bunsen, in his *God in History*, speaks of Channing as "a grand Christian saint and man of God—nay, also a prophet of the Christian consciousness regarding the future." The Protestanten-Verein of Germany, established at Eisenach in 1865, a free Union Association, holding annual conference sessions, though not organized on a dogmatic basis and not professedly Unitarian, welcomes and cherishes fellowship and sympathy with the Unitarians of England and America.

8. In Poland the Unitarian faith early took a firm hold and spread rapidly, aided by refugees who there found a hospitable asylum. Yet it was not without persecution at the start. In 1539, in the market-place in Cracow, was burned Katharine Vogel at the age of eighty, wife of a goldsmith and alderman, condemned for denying the Deity of Christ and affirming the divine unity. In 1552 the Bible was translated, chiefly by Unitarian scholars, into the Polish language. Hither came Faustus Socinus, around whom flocked converts from all ranks and classes of society, among them many of the nobility. These, protected from persecution by the privileges of their rank, proved especially favorable to a movement which, more than any other of the time, seemed destructive of the traditions and prestige of the Romish Church. The prosperous commercial city of Racow, with its large printing establishment publishing many of the best books of the day, became its headquarters. Here was issued the famous Racovian Catechism, which became widely known and influential, and was afterwards signally burned in London. King Sigismund II became a convert, and during his reign this party of reformers grew strong enough to form a church of their own. For a century it flourished, till, in 1660, prince Casimir, a cardinal and a Jesuit, coming to the throne, with unrelenting persecution burned the homes of its adherents, drove them into silence, exile, or death. So effectually did he exterminate it, and with it the spirit of liberty in the state as in religion, that it may fairly be said that Jesuit tyranny at once obliterated a church and a nation.

9. In Transylvania, Unitarianism was earliest declared by Francis David, first Unitarian pastor and bishop; and afterwards by Socinus and by Georgio Blandrata, an Italian from Piedmont, who became court physician to Sigismund. In 1540 David preached to a multitude in the open streets of Thorda, asserting the Father to be the only God. By his preaching from place to place large numbers were converted, including the king himself, and nearly the whole city of Klausenburg, and many Unitarian churches were established. While persecution was rife in the rest of Europe, Transylvania was early conspicuous for religious liberty. Four forms of Christianity—the Roman Catholic, the Reformed Evangelical, the Lutheran, and the Unitarian—were recognised by law with equal rights, with penalties for those only who should infringe the rights of others. Under this broad tolerance, Unitarianism, which was, indeed, instrumental in producing it, gained a strong foothold, which, under subsequent persecution, it has never wholly lost. Unhappily, the early tolerance was of short duration. The bishop, Francis David, himself became a martyr to his faith, dying in prison in November, 1579, an event, the tercentenary anniversary of which, in 1879, was celebrated in the land of his martyrdom. The Unitarians of Transylvania are said to have at one time possessed four hundred church buildings, eleven colleges, and three universities. Through the last two centuries the iron hand of Austrian and Jesuit oppression has largely dispossessed them of churches, schools, lands, and even of civil as well as religious

rights. They were robbed of their churches, which were transferred to the Jesuits. During the present century, they are regaining privileges and strength, and are reported as having a population of 60,000, now increasing, with 126 churches; a university at Klausenburg with 12 professors and 300 students; two smaller colleges at Thorfa and St. Kerezstur; a newspaper, *The Seed-sower*; and many distinguished scholars and literary men, preachers and civilians, in their ranks. Their Church government is that of Episcopacy, strongly modified by Congregationalism, their present bishop being Joseph Ferencz. A special intimacy of fellowship has recently been cherished and growing between them and the Unitarians of England and America. With their aid the translation of Channing's writings has been widely circulated among the people of Hungary of all sects.

10. *England*, though later than the Continent in receiving the Unitarian faith, was visited by Ochino, Socinus, and other reformers. In 1548, the priest John Asheton was cited to Lambeth for Arian sentiments, and saved his life only by recanting. Under a similar charge occurred several martyrdoms. George von Paris, a devout German surgeon, for denying the Trinity was burned at Smithfield in 1551, during the brief reign of Edward VI. During the reigns of Mary and Elizabeth, Hammont, Lewes, Ket, Wright, and many others met a similar fate. In the reign of James I, in 1611, the Unitarian Bartholomew Legate became the last of the Smithfield martyrs; and in 1612, at Lichfield, Edward Wightman, a Unitarian Baptist, was the last martyr who was burned for heresy in England. In the time of Cromwell, John Biddle formed in London the first English Unitarian Church, and gained the title of the father of the English Unitarians, but perished in prison for his faith. In 1640 the synods of London and York deemed it worth while to issue a special canon against Socinianism. And in 1652 the Racovian Catechism, which had been translated into English and actively circulated, was burned in London. To such strength and influence had Socinianism grown there during the century that in 1655 Dr. Owen writes of it, "The evil is at the door; there is not a city or town, scarce a village, in England wherein some of this poison is not poured forth." Before the close of the 17th century, London had houses of Unitarian worship. Milton was an Arian, as has been proved since his death. Sir Isaac Newton is now known to have written anonymously on the Unitarian side. Locke wrote a work on *The Reasonableness of Christianity*, which is substantially Unitarian. The scholarly Lardner, author of *The Credibility of the Gospel History*, one of the ablest defences ever written, held Unitarian opinions. That these views had notably invaded the Established Church is testified by Palmer in 1705 writing that there were "troops of Unitarian and Socinian writers, and not a Dissenter among them." Rev. Thomas Emlin preached the Unitarian faith in Dublin and London. The Act of Uniformity in 1662 expelled from the Church of England two thousand ministers, mostly Calvinistic Presbyterians. Free from dogmatic tests, many of these ministers and their followers gradually became Arminian, and ultimately Unitarian. After the passing of the Toleration Act in 1689 legalizing Nonconformity, the way was opened by which the prevailing faith largely passed into Unitarianism. Half the Unitarian churches in England to-day are of this Presbyterian origin. Until 1813 the law made it blasphemy to speak against the Trinity; but a more tolerant public sentiment had long rendered the law a dead letter. Unitarianism as an organized movement was most distinctly initiated by Dr. Theophilus Lindsey, who in 1774 resigned his charge in the Established Church and became pastor of a Unitarian congregation in Essex Street, London. A still more important apostle was the noted Dr. Joseph Priestley. Born in 1733, educated a Calvinist, distinguished for his scholarship and scientific attainments, in 1755 he became pastor of a small Dissenting

congregation in Suffolk, and a conspicuous champion of the humanitarian theology. Believing in the Bible as a divine revelation, and in the miracles as credentials of Christ's authority, while continuing to hold some tenets of Calvinism, he rejected the Trinity and vicarious atonement as unscriptural, wrote to show how these dogmas came in as later corruptions of primitive Christianity, and held that Christ himself claimed to be simply a man. His views brought upon him obloquy and persecution; and, at the hands of a mob losing his books, manuscripts, and philosophical instruments, he was virtually banished from his native land. In 1792 he removed to America, gave courses of lectures in Philadelphia, which added fresh stimulus to the rising Unitarianism, but retired for his closing years to the small neighboring village of Northumberland, where he died in 1804. In 1813 the Unitarians were first placed by law on an equality with other Dissenters. For some years sharp controversy continued as to the proprietary rights in certain Church properties held by them, but claimed by orthodox Dissenters. These claims were finally silenced in favor of the Unitarian occupants by the Dissenters' Chapels Act of 1844. At the present time there are reported about 350 Unitarian churches in England, mostly Congregational in Church government, and of which one fourth have been formed within the last twenty-five years. In Northern Ireland there is a Unitarian population of about 10,000, still Presbyterians in Church government.

In Scotland there are in the larger cities and towns about ten Unitarian churches. In that country occurred the last execution for blasphemy against the Trinity in the person of a young student, Thomas Aikenhead, hanged near Edinburgh in 1696. The present Unitarian Church of Edinburgh, originally strictly Calvinistic, having adopted the principle of free inquiry, became Arian and finally humanitarian under the pastorate of Dr. Southwood Smith in 1812. In Wales about thirty-four churches of this faith are reported; and there are several strong societies at Montreal, Sydney, Melbourne, Adelaide, and other places in the British colonies in Canada, India, and Australia. The English Unitarians maintain a missionary college in Manchester, a Presbyterian college at Carmarthen which educates Unitarian and Independent ministers, and the larger unsectarian institution of Manchester New College, removed recently to London. In their interest are conducted several weekly religious papers: *The Inquirer*, *The Christian Life*, *The Unitarian Herald*, and the new periodical *The Modern Review*. Their representative missionary society is the British and Foreign Unitarian Association, formed in London, May 25, 1825. Among the leading writers may be named (besides Priestley, Lindsey, and Belsham early in the century), more recently, Revs. John James Tayler, Charles Beard, John Hamilton Thom, and James Martineau, one of the greatest living exponents of the higher philosophy of the spirit *versus* modern materialism. It may be truthfully added that the movement of English Unitarianism is outgrowing the legalism and literalism of a philosophy which narrowed its earlier faith, and is reaching a broader and deeper spirituality.

11. In *America*, the free inquiry and open field of thought from the beginning have been favorable to Unitarian views, and the movement for spiritual liberty found special stimulus in the public sentiment following the Revolution. The Pilgrims, bringing to America the parting injunction of their pastor, John Robinson, of Leyden, that there was "more light to break out from God's Word," organized the first Congregational churches in New England at Plymouth, Salem, and Boston upon covenants so broad and undogmatic that these have required no change in accepting the Unitarian faith. Without doubt, the prevailing sentiment was mainly Calvinistic at the start, yet with a measure of Arminianism intermingled that grew imperceptibly, until for the last century and a half the progress of Unitarianism

rian sentiments may be distinctly traced. Dr. Gay, of Hingham, ordained in 1717, is supposed to have been the first American preacher of Unitarianism. Before the Revolution, many lawyers, physicians, tradesmen, and farmers were Unitarians, according to the testimony of the elder president Adams, himself a Unitarian; and not the laity only, but many of the clergy, prominent among whom was Mayhew, of the West Church, Boston. In 1768 the famous Hopkins prepared a sermon especially against what he deemed the heresy of the Boston ministers. In 1783, under the lead of their young minister, Rev. James Freeman, then recently ordained, the Episcopal Church of King's Chapel in Boston expunged from its *Book of Common Prayer* all reference to the Trinity and the worship of Christ, and thus became the first distinctively Unitarian Church in America. Its liturgy and Church organization continue substantially the same at the present time. Priestley's coming gave fresh impulse to this faith, and the writings of Lindsey and Belsham found their way hither. In a letter to Dr. Lindsey, in London, Rev. James Freeman writes that there were "many churches in which the worship was strictly Unitarian, and some of New England's most eminent clergymen openly avowed that creed." In 1801 the oldest Puritan Church in America, the original Church of the Mayflower, established at Plymouth in 1620, by a large majority vote declared itself Unitarian; and with no change in its covenant, using the identical statement of faith drawn up by its Pilgrim founders, it to-day accepts the Unitarian name and fellowship. Free from restraints of dogmatic creeds and tests, the New England Congregational churches were especially hospitable to inquiry and progress. By imperceptible degrees change came. In 1805 the Unitarian Rev. Dr. Ware was made professor of divinity at Harvard University, Cambridge. This fact excited opposition and controversy. In 1815 a controversy between Dr. Channing and Dr. Worcester resulted in open rupture between the Trinitarian and Unitarian Congregationalists. In 1816 the Divinity School at Cambridge was established by Unitarians. Harvard College was in their hands, and chiefly by their influence has maintained the undenominational position which it claims to-day. For ten years, from 1815 to 1825, the controversy waxed hot; lines of separation were drawn, and churches and men took sides. As the churches divided the majority carried their name and property to Trinitarian or Unitarian ranks. Meanwhile the seceding minorities organized anew on one side or the other. Thus the ancient parishes, each coextensive with its town, were divided; and in many New England towns the oldest church, retaining its ancient Congregational liberty and usages, became in faith and fellowship Unitarian.

II. *Organization and Present Condition.*—During the eventful decade just reviewed, Rev. William Ellery Channing (born in Newport, R. I., April 7, 1780), then in the prime of manhood, with early ripeness of spiritual fruitage, became, by eloquence of tongue and pen, the conspicuous leader of the Unitarian movement. At the ordination of Jared Sparks, in 1819, as minister of the Unitarian Church in Baltimore, his discourse expounding Unitarian Christianity made a profound impression. His intense dislike and dread of sectarianism gave to his preaching an emphasis of individualism and spiritual liberty. Never permitting himself to become the devotee of a sect, to him Unitarianism owes much of its freedom from sectarian and dogmatic trammels. Less a controversialist than a devout and practical preacher, he fearlessly, yet reverently, sought the truth, brought into prominence the spiritual elements of human nature, subjected religious systems to the test of the soul's best instincts and sentiments, and made it his supreme aim to kindle the aspiration for holiness. His testimony was chiefly borne to the fatherhood of God and the brotherhood of man, to the worth of human nature and blessedness of human life, to the dignity of labor and the elevation of the working classes, to spiritual

freedom and the divine mission and authority of Jesus Christ. He has come to be recognised by all sects as one of the foremost of American preachers and writers, a leading champion of religious and civil freedom, of education and philanthropy, a seeker for truth, a lover of mankind, and a devoted advocate of Christianity. In April, 1880, the centenary of his birth was celebrated in London and in several of the larger cities in America, many persons of other denominations joining, and the corner-stone was laid of a memorial church at Newport, his birthplace. See CHANNING.

The division in the Church was not of Unitarian seeking. The Unitarian leaders were willing, in the large fellowship and free faith of Congregationalism, to maintain the unity of the Church unbroken. They would have borne their testimony to truth as they saw it, urging all others freely to do the same. The necessity of separation was enforced by fellowship withdrawn, controverted opinions put forward as tests, and by charges made that rendered it impossible to stay. After the break had come, it was with no desire to build a new sect or to prolong the bitterness of controversy—it was to do their own part in the vineyard that the Unitarians went apart and worked in their own way. But, from the first, their attitude has never ceased to be that Church unity is to be found, not in identity of opinion, but in personal freedom and in brotherly love; and they have declared their readiness on this broad basis to join in fellowship with all who claim to hold the Christian faith and who prove their discipleship by consistent lives. In the exercise of freedom there have always been within the Unitarian fold varieties of individual opinion, while in the same freedom a few have gone into the Trinitarian household and others into a position antichristian or non-Christian.

On May 24, 1825, was formed in Boston "The American Unitarian Association." Its first article declares its purpose to be "to diffuse the knowledge and promote the interests of pure Christianity." It was incorporated in 1848, with the right to hold trust funds, and has at the present time about \$200,000. Without ecclesiastical authority, it is purely a missionary organization, using annual contributions from the churches for publishing and distributing books and tracts, sustaining missionaries, aiding feeble churches, and planting new ones. Its operations are mainly in the home-field of America. For forty years its activities were small, the missionary spirit of the denomination being checked by dread of the sectarian spirit, and the benevolent gifts of the people taking more the direction of education and general philanthropy. But within the last fifteen years its income has greatly increased, in 1866 and 1872 exceeding \$100,000, although it by no means receives all of the denominational gifts for religious missionary purposes.

On April 5, 1865, a convention, consisting of the pastor and two delegates from each church or parish in the Unitarian denomination, met in the city of New York and organized a National Conference, "to the end of energizing and stimulating the denomination with which they are connected to the largest exertions in the cause of Christian faith and work." Its preamble declared that "the great opportunities and demands for Christian labor and consecration at this time increase our sense of the obligations of all disciples of the Lord Jesus Christ to prove their faith by self-denial, and by the devotion of their lives and possessions to the service of God and the building-up of the kingdom of his Son." It is a representative body of pastors and delegates, chosen and meeting biennially, purely advisory in character, for counsel and fellowship. Its meetings are held in September at Saratoga, open to the public, and are steadily increasing in the numbers attending, also in interest and in practical purpose and value. Since its formation, the Unitarian churches of America have given more for missionary purposes than in all their previous history. Within smaller and more convenient

territorial districts have been formed also local conferences with more frequent meetings, which have been successful in fostering fellowship and co-operation, and a more devout and earnest religious life.

Without other ecclesiastical authority, the government of the churches and their usages and modes of worship are purely Congregational. The rites of baptism and of the Lord's supper are recognised and observed, not as having mystic value or binding authority, but as having spiritual worth and influence. The denominational *Year-book* for 1880 reports 340 churches, of which 240 are in New England, chiefly in Massachusetts, and 100 mainly in the West; 400 ministers, 20 local conferences, besides a number of organizations of purely benevolent aim and purpose. Two theological schools are sustained—one at Cambridge, founded in 1816, having four professors and about twenty students, and a library of 18,500 volumes, while the large University library of 240,000 volumes is also open to its use. About \$140,000 have recently been added to its endowment fund to increase its corps of professors. The Theological School at Meadville, Pa., was formed in 1844, and has four resident professors, 15,000 volumes in its library, and about twenty students.

The periodicals of the denomination are the *Unitarian Review*, the *Christian Register*, now in its fifty-ninth year; *The Dayspring*, a Sunday-school paper, all published in Boston, while several smaller organs are published elsewhere. The denomination is rich in its literature, especially in the direction of practical and devout religious sentiment. The works of Channing, now widely circulated among English-speaking people all over the world, are translated in part or entire into the Dutch and German, French, Italian, Swedish, Hungarian, Icelandic, and Russian languages. There may also be mentioned as leading Unitarian preachers and writers, Henry Ware (father and son), James Walker, Theodore Parker, Edmund H. Sears, Orville Dewey, William H. Furness, Henry W. Bellows, James Freeman Clarke, Frederick H. Hedge, and Andrew P. Peabody. Unitarian writers are also largely represented in the walks of history and literature in America as in England. It may be added that Unitarian sentiments are held substantially by "Universalists," "Christians," "Hicksite Quakers," and "Progressive Friends."

III. *Doctrinal Views.*—In seeking the present form of Unitarian faith, it is needless to recount the speculations of earlier times. The tenets of Sabellius and Paul of Samosata and Arius, also of Servetus and the Socini, in their special forms sharing the crudities of contemporaneous thought, have largely passed away. They are not to be quoted as authority. They are simply in the line of historical progress, agreeing only in the single fundamental thought that God is one, and Jesus Christ a created and subordinate being. Unitarianism is characteristically not a fixed dogmatic statement, but a movement of ever-enlarging faith. It welcomes inquiry, progress, and diversity of individual thought in the unity of spiritual fellowship. With faith in the unity of God as its key-note, it asserts the unity of all truth in nature, history, experience, and the Bible; the unity of the Church as based on character, not on dogma; and the unity of spiritual life in this world and the next. Its leading principles are, first, the freedom of every individual soul to seek the highest truth and to obey it; and, second, that character is the test of Christian discipleship. Unitarians declare life, not dogma, to be the essence of Christianity. They deem Christianity to be essentially a reasonable religion, according with the truths of nature, instructing reason and appealing to it as interpreter and judge. They hold it to be a progressive religion; that its principles, like the axioms of mathematics, are eternally true, but that its germs unfold with the increasing intelligence of mankind. Right belief they deem important for right living, and they emphasize the value of righteousness as establishing the kingdom of God on earth, and as alone

fitting the soul for his kingdom above. They refuse to formulate their belief in fixed creeds of ecclesiastical and exclusive authority; because these never settle open questions, but only start fresh controversy; because they limit inquiry and hinder progress; and because they make dogma instead of character, and opinion instead of spiritual purpose, the bases and tests of fellowship. Yet, while refusing any authoritative creed statement, there is an unwritten consensus of faith in which Unitarians are substantially agreed. They believe in the one God as the Creator of the universe and Father of all souls; a Father who wills man's welfare, desiring that not even the least shall perish; the Fatherly Friend in all worlds, who does not wait for forgiveness and favor to be purchased, but freely pours forth blessing on all who will accept it; Father of the sinner as of the saint, seeking every wanderer with his pursuing love, and punishing the erring not for his pleasure, but for their profit, that they may become partakers of his holiness. Unitarians believe in man as naturally neither saint nor sinner; that his nature is not corrupt and ruined, but undeveloped and incomplete; that he inherits tendencies to good as well as to evil, and that he is sinful only as he knowingly and wilfully does wrong; that he needs regeneration, the unfolding and renewal of his spiritual nature, which he experiences through obedience to the truth, under that divine influence which is called the Holy Spirit; that, as a child of the Infinite, allied to the Supreme Goodness by ties that cannot be sundered, having in him a spark of divinity that makes his ultimate redemption an inextinguishable hope, he yet needs to be taught and inspired of God, but with the aid of the divine grace, which is his birthright privilege, he is able to climb to celestial summits. Unitarians believe in Jesus Christ, as the four evangelists describe him, as at once Son of God and Son of man. They care little for metaphysical speculation about the mystery of his nature, but emphasize his word and life as a practical help for human salvation. They hold that he is our Saviour as he becomes to us the Light of the World, the Fountain of Living Water, and the Bread of Life; our Saviour by illustrating the eternal principles of right, inspiring his followers to holiness, and imparting to them true life more abundantly; our Saviour so far as he leads and helps us to be large-hearted, truth-seeking, pure, loving, and devout; that he came into the world to bear testimony to the truth, and was here not to be ministered unto, but to minister, and that he proved himself humanity's Lord and Leader by his divine helpfulness. Under the influence of elevated views of man's spiritual nature, affirming his innate power of apprehending religious truth, Unitarianism, in declaring the humanity of Christ, does not bring Jesus down, but lifts humanity up. It asserts that Jesus was purely human only to show that human nature itself is, in the phrase of Athanasius, *homouousian*, of the same substance with God, and that Jesus is the best expression of that divine humanity which is the birthright and promised destiny of all souls. While they are jealous of ecclesiastical authority or dictation, and perpetually refuse to limit their belief by formula, the Unitarians have, in public assembly of the American Unitarian Association, and in representative meetings of their national and local conferences, repeatedly reaffirmed their attitude of Christian discipleship, and shown that they hold themselves to be a body of believers upon the Christian foundation and within the Christian Church. They deem the mind of Christ the best index of Christianity. For the sources of Unitarian thought, therefore, they refer to Unitarian literature, more especially to the New Test., and supremely to the word and life of Jesus Christ. (R. R. S.)

**Unitarians**, a general name for those bodies of professed Christians who do not fully recognise the equality of the three Persons in the Godhead. The essential errors of Unitarianism, as evangelical Trin-

itarians regard them, are a denial (a) of the true divinity of Jesus Christ; and (b) of the inherent and total moral depravity of human nature. These two are claimed to be not simply *dogmas*, but *facts* sustained by observation and history as well as by the plain and constant teachings of the Holy Scriptures. They are intimately correlated to each other; for if Christ be not truly divine, then there is no adequate atonement for human sin; and, conversely, if man be not essentially a sinner, he needs no such divine Saviour. Hence our Lord in treating with Nicodemus announced the necessity of a radical, moral change as the first and all-important condition of Christianity (John iii, 1-13). Accordingly the doctrine of a spiritual and fundamental *regeneration* will be found to be the true touchstone of all evangelical orthodoxy, and those branches of Christendom who lay most stress upon it prove to be the most efficient in the moral renovation of mankind. Humanitarianism alone can never be more than a negative and powerless, because a really false, view of the actual condition and relation of the race as respects their Creator and Redeemer. See HUMANITARIANS.

In the same summary manner, Unitarians reject, as being to them unphilosophical and unintelligible, the divinity of the Holy Spirit, a doctrine which all who have passed through the pangs of true contrition into the joys of conscious pardon and heavenly communion find so comforting and necessary to the explanation of their own religious experience (Rom. v, 1-5; 1 Cor. ii, 10-14). See TRINITY.

While pointing out these, as we deem, radical defects in Unitarianism as a system of Christian faith, we nevertheless are bound to bear witness to the literary culture, social refinement, and moral virtues which Unitarians as a body have exhibited, and to their amenity and ameliorating influence in the defence of civil rights and the general cause of philanthropy. These we attribute, however, not so much to their creed as to the hereditary effect of early Puritan training and the power of a sound Christianity diffused through the community in the midst of which they live and operate. See UNITARIANISM.

**Unitas Fratrum.** See MORAVIANS.

**United Armenians**, a name applied to those Armenian Christians who acknowledge the pope; the orthodox Armenians being called Gregorians. The Armenian rite in the Roman Catholic Church has one patriarch and primate (in Cilicia), four archbishops (at Constantinople, Aleppo, Seleucia or Diarbekir, and Lemberg), besides two *in partibus*, and sixteen bishops. Their union took place from 1314 to 1344. They number some 100,000, of whom 78,000 are in Turkey and Persia (20,000 under the archbishop of Constantinople, 56,000 under the patriarch of Cilicia, and 1000 in Mount Lebanon). Austro-Hungary, in 1870, had 8279 United Armenians; Russian Caucasus and Siberia, in 1869, had 13,722. In 1872 a very considerable part of the Turkish United Armenians left the Roman Catholic communion and joined the Old Catholic movement. See ARMENIAN CHURCH.

**United Brethren in Christ**, the full title of a body of evangelical Christians in this country.

**I. Origin.**—In the year 1752, the Rev. Philip William Otterbein (q. v.), a distinguished scholar and missionary in the German Reformed Church, emigrated from Dillenbergh, in the Duchy of Nassau, Germany, to America. Not long after his arrival in his new field of labor, he became deeply impressed with the necessity of a more thorough work of grace in his heart than he had ever before experienced. Lancaster, Pa., was his first pastoral charge, and, early in his ministry there, on a certain occasion, he passed from his pulpit to his study, and there remained in earnest prayer until God, in his mercy, poured upon his soul the spirit of grace and power. Mr. Otterbein, from this time forth, preached with an unction which neither he nor his people had

realized before. Having now entered, as it were, upon a new life, he was eminently fitted for a leader. He was calm, dignified, humble, and devout. After six years of service at Lancaster Mr. Otterbein transferred his labors to Tulpohocken, Pa., at which place he introduced evening meetings, and in them read portions of the Bible and exhorted the people to flee from the wrath to come. At this time there was not a Methodist society in America. The German churches of the land, especially, were sunk in lifeless formality. The "new measures" of Mr. Otterbein brought upon him severe criticisms, if not actual persecution.

While Mr. Otterbein was engaged in enforcing experimental godliness at Tulpohocken, the Rev. Martin Boehm, a zealous Mennonite, was led into the light of a new life. These men were ministers of churches widely different in doctrines and modes of worship. Two awakenings were now in progress—one under the labors of Mr. Otterbein in Tulpohocken, the other led by Mr. Boehm in Lancaster County, Pa. During a "great meeting" held in a barn in that county, these two ministers met for the first time. Mr. Boehm preached the opening sermon in the presence of Mr. Otterbein. As the heart of the preacher warmed with his theme, it kindled a flame in the soul of the other. At the close of the sermon, and before Mr. Boehm could resume his seat, Mr. Otterbein arose, and, embracing the preacher in his arms, exclaimed aloud, "*We are brethren.*" These words afterwards suggested the name which the denomination now bears.

From this time these godly men became co-laborers, and travelled extensively through Eastern Pennsylvania, Maryland, and Virginia. In the meantime other German ministers of "like precious faith" were raised up through their labors, and numerous societies were formed in the states mentioned. It seems to have been no part of Mr. Otterbein's purpose to organize a new church. He only sought to impress upon the consciences of the people generally, and of formalists in particular, that a vital union with Christ is essential to a religious life. Providence so shaped circumstances that Mr. Otterbein, without his own seeking, was placed at the head of a new denomination.

The eminently Christian character of Mr. Otterbein, and his usefulness in founding this Church, make it proper that a few sentences more be written of him. He was born at Dillenbergh, Germany, March 6, 1726, and resided in his native land twenty-six years, and in America sixty-one years, dying Nov. 17, 1813, having continued his ministry to the close of his long life. He was an eminent scholar in classical attainments, and in philosophy and divinity. He was held in high esteem by bishops Asbury and Coke of the Methodist Church, and assisted, by special request, at the ordination of the former. On hearing of his death, bishop Asbury said of him, "Great and good man of God! An honor to his Church and country; one of the greatest scholars and divines that ever came to America, or who were born in it."

As the work thus begun grew to considerable proportions, it became very important to consider the best means of perpetuating and extending it. Conferences were therefore annually held for this purpose, beginning at Baltimore in the year 1789. In 1800 the societies gathered were united in one body, under the name of the "United Brethren in Christ," and elected Mr. Otterbein and Martin Boehm their superintendents or bishops. At that time there was little uniformity among them as to doctrine. Some were German Reformed, others were Mennonites or Lutherans, and a few were Methodists. In regard to the mode of baptism, probably to meet the wishes of the Mennonites, they agreed that each man should act on his own convictions. From 1800 to 1815, the growth of the Church was steady, but not speedy. Several new conferences were formed, and the work extended westward of the Alleghany Mountains.

# UNITED BRETHREN IN CHRIST 648 UNITED BRETHREN IN CHRIST

At a conference held in Ohio in 1814 it was resolved to call a general council for the purpose of agreeing upon some system of discipline. It was also determined that the members of this council should be elected from among the preachers by the vote of the people throughout the whole Church. Under this order the first General Conference was convened on June 6, 1815, at Mount Pleasant, Pa.

II. *Doctrines.*—At this conference the following summary of doctrines was adopted, and remains unchanged to the present time:

In the name of God, we declare and confess before all men that we believe in the only true God, the Father, the Son, and the Holy Ghost; that these three are one—the Father in the Son, the Son in the Father, and the Holy Ghost equal in essence or being with both; that this triune God created the heavens and the earth, and all that in them is, visible as well as invisible, and furthermore sustains, governs, protects, and supports the same.

We believe in Jesus Christ; that he is very God and man; that he became incarnate by the power of the Holy Ghost in the Virgin Mary, and was born of her; that he is the Saviour and Mediator of the whole human race, if they with full faith in him accept the grace proffered in Jesus; that this Jesus suffered and died on the cross for us, was buried, arose again on the third day, ascended into heaven, and sitteth on the right hand of God, to intercede for us; and that he shall come again at the last day to judge the quick and the dead.

We believe in the Holy Ghost; that he is equal in being with the Father and the Son, and that he comforts the faithful, and guides them into all truth.

We believe in a holy Christian Church, the communion of saints, the resurrection of the body, and life everlasting.

We believe that the Holy Bible, Old and New Testament, is the word of God; that it contains the only true way to our salvation; that every true Christian is bound to acknowledge and receive it, with the influence of the Spirit of God, as the only rule and guide; and that without faith in Jesus Christ, true repentance, forgiveness of sins, and following after Christ, no one can be a true Christian.

We also believe that what is contained in the Holy Scriptures—to wit, the fall in Adam, and redemption through Jesus Christ—shall be preached throughout the world.

We believe that the ordinances, viz. baptism, and the remembrance of the sufferings and death of our Lord Jesus Christ, are to be in use and practiced by all Christian societies; and that it is incumbent on all the children of God particularly to practice them; but the manner in which ought always to be left to the judgment and understanding of every individual. Also the example of washing feet is left to the judgment of every one, to practice or not; but it is not becoming for any of our preachers or members to traduce any of their brethren whose judgment and understanding in these respects are different from their own, either in public or private. Whosoever shall make himself guilty in this respect shall be considered a traducer of his brethren, and shall be answerable for the same.

III. *Organization and Government.*—The polity of the Church is outlined by the following constitution, established in 1841:

We, the members of the Church of the United Brethren in Christ, in the name of God, do, for the perfecting of the saints, for the work of the ministry, for the edifying of the body of Christ, as well as to produce and secure a uniform mode of action, in faith and practice, also to define the powers and the business of quarterly, annual, and general conferences, as recognised by this Church, ordain the following articles of constitution:

Art. I. § 1. All ecclesiastical power herein granted to make or repeal any rule of discipline is vested in a general conference, which shall consist of elders elected by the members in every conference district throughout the society; provided, however, such elders shall have stood in that capacity three years in the conference district to which they belong.

§ 2. General Conference is to be held every four years; the bishops to be considered members and presiding officers.

§ 3. Each annual conference shall place before the society the names of all the elders eligible to membership in the General Conference.

Art. II. § 1. The General Conference shall define the boundaries of the annual conferences.

§ 2. The General Conference shall, at every session, elect bishops from among the elders throughout the Church who have stood six years in that capacity.

§ 3. The business of each annual conference shall be done strictly according to Discipline; and any annual conference acting contrary thereto shall, by impeachment, be tried by the General Conference.

§ 4. No rule or ordinance shall at any time be passed to change or do away the Confession of Faith as it now stands, nor to destroy the itinerant plan.

§ 5. There shall be no rule adopted that will infringe upon the rights of any as it relates to the mode of baptism, the sacrament of the Lord's supper, or the washing of feet.

§ 6. There shall be no rule made that will deprive local preachers of their votes in the annual conferences to which they severally belong.

§ 7. There shall be no connection with secret combinations, nor shall involuntary servitude be tolerated in any way.

§ 8. The right of appeal shall be inviolate.

Art. III. The right, title, interest, and claim of all property, whether consisting in lots of ground, meeting-houses, legacies, bequests, or donations of any kind, obtained by purchase or otherwise, by any person or persons, for the use, benefit, and behoof of the Church of the United Brethren in Christ, are hereby fully recognised and held to be the property of the Church aforesaid.

Art. IV. There shall be no alteration of the foregoing constitution unless by request of two thirds of the whole society.

Membership in the Church is conditioned upon a belief in the Bible as the Word of God, the experience of pardon of sins, a determination by grace and a good life to save the soul, and a pledge to obey the discipline of the Church.

Only one order of ministers is recognised by the Church, viz. that of elders. The bishops of the Church are only elders elected for a term of four years as superintendents of the whole field.

Her ecclesiastical bodies consist of official boards, quarterly, annual, and general conferences. The latter meet quadrennially. Her officers are, superintendents of Sabbath-schools; stewards, who attend to the finances of the churches; class-leaders, or subpastors, who have charge of classes for spiritual instruction and worship; preachers in charge, who have the pastoral care of a mission, circuit, or station; presiding elders, who are elected by the Annual Conference from among the ordained elders, and who travel over a certain number of fields of labor, preside at the quarterly conferences, and see that all the laborers in their respective districts faithfully perform their duties; and bishops, or general superintendents of the whole Church, who preside at all the annual and general conferences.

The method of supplying the churches of the denomination with pastors is that known as "the itinerant system." Pastors in charge are subject to removal or reappointment at the end of each conference year by a committee constituted by the Annual Conference, composed of the bishop, the presiding elders of the past and the present year, and an equal number of local elders or preachers. A minister cannot remain in the same charge more than three years, except by the consent of two thirds of the members of the Annual Conference.

Presiding elders have no limit as to the time they may serve on a district, subject only to the option of the Annual Conference. Bishops may be re-elected every four years indefinitely by the General Conference.

The General Conference of 1877 made provision for lay representation in the annual conferences, leaving it to the will of the several annual conferences to accept or not. A considerable number of conferences have adopted it, and its introduction is believed to be advantageous.

IV. *Numbers, Operations, and Sphere.*—The statistics of the denomination in 1879 show 47 annual conferences, 3 mission districts, 2217 ministers, 4356 organized churches, 154,796 members, 2152 houses of worship, 319 parsonages, 3268 Sabbath-schools, 187,203 officers, teachers, and scholars in Sabbath-schools. During the year 1879 the Church contributed for the support of the Gospel and for connectional purposes \$661,662.56.

During the past thirty years the denomination has been active in the educational work, and has now thirteen colleges and seminaries and one theological school. The latter is located at Dayton, O., and wholly under the management of the General Conference.

The Missionary Society of the Church is thoroughly organized, and since its origin, in 1853, has gathered

and expended for the spread of the Gospel nearly two millions of dollars. The missionaries of the Church are scattered over many portions of the United States and territories, in Canada, Germany, and Western Africa. There are in the foreign work 12, in the frontier department 140, and on home missions 240 missionaries.

A Women's Missionary Society was established in 1877, and has founded one mission in Germany and one in Africa.

A Church Erection Society was organized in 1869 by the General Conference. The object of this organization is to aid feeble churches in erecting houses of worship. Already many congregations have been assisted by funds raised by this society.

A Sabbath-school Association was established in 1869, and gathers by systematic annual collections a liberal sum each year to aid Mission Sabbath-schools in all parts of the denomination and in heathen lands. The Church is deeply interested in the work of saving the children, and no appliance useful to this end is withheld from them.

The literature of the Church is found chiefly in strictly denominational books and periodicals. It has a publishing house at Dayton, O., under the supervision of the General Conference. Its net capital on the 1st of April, 1880, was \$144,606.10. It is out of debt, and has a handsome balance of cash in the treasury. Its periodical literature is of a high moral tone, and compares well with the best of its kind everywhere. The house issues nine periodicals, with an average aggregate circulation of 175,000 copies.

The Church of the United Brethren in Christ is not an offshoot of any other Church or churches, but bears the impress of a providential upraising for the accomplishment of a special mission. It presents no new doctrine, and is distinguished mostly as an organization in which the ministry and people have an equal proportion of power, and the rulers hold office only by the authority and consent of the governed. Its history has been marked by radical reformatory ideas, which have doubtless in some degree retarded its growth in numbers. Slavery, the use of intoxicating drinks as a beverage, and the making and trading in ardent spirits, Freemasonry, and other secret societies are entirely prohibited on pain of excommunication. Its field thus far has been mainly among the rural populations of the land. Its ministers and people are striving to maintain the old landmarks of a vital and experimental religion, insisting upon the witness of the Spirit and a holy heart and life. (W. J. S.)

**United Christians** of ST. THOMAS, a body of East Indian Roman Catholics, chiefly found in Travancore, at the southern extremity of India. In 1599 the Synod of Diamper (Udiampoor) compelled the ancient Church of St. Thomas Christians to conform to the Church of Rome, conceding to them a modern Syrian rite. In 1653 nearly all fell away, but were soon after induced in great numbers to return, chiefly by the labors of the Barefooted Carmelites. At present more than one half are of the Latin rite, but a portion retain the Oriental rite. They are chiefly in the vicariate apostolic of Verapoli (Latin rite), reported in 1868 as having 295 priests and 233,000 members. See THOMAS (St.), CHRISTIANS OF.

**United Copts** are those who, since 1732, have acknowledged the authority of the pope. They are of two rites—the Egyptian, and the Ethiopic or Abyssinian—and in Egypt they number 12,000. In 1855 the pope appointed one of their priests vicar apostolic and bishop *in partibus*. See COPTS.

**United Evangelical Church**, a denomination in Germany, formed in 1817 by a union of the Lutheran and Reformed churches. Attempts at uniting these churches were made as early as 1529, when leading theologians of both schools held a conference at Marburg. Other conferences were held at Leipsic in 1631, and at

Cassel in 1661. In 1703 Frederick I of Prussia convened several Lutheran and Reformed theologians at Berlin to discuss the practicability of a union, but was successfully opposed by the Lutheran clergymen. A "Plan of Union," proposed by Klemm and Pfaff, theologians of Tübingen (1710–22), met with little favor. About the beginning of the 19th century, however, a voluntary union of the two communities was established in some parts of South Prussia, which extended in 1805 to many congregations at Cologne, Würzburg, and Munich. In 1810, king Frederick William took up the subject warmly, and in 1814 drew up, chiefly with his own hands, a liturgy, which was adopted in the Royal Chapel, and authorized for use elsewhere. A royal proclamation followed, dated Sept. 27, 1817, in which the king requested the Lutherans and the Reformed throughout his dominions to unite in one community, and expressed his intention of taking part in a united celebration of the holy communion in the Royal Chapel at Potsdam, on Oct. 31, the occasion of the tercentenary of the Reformation. A synod assembled on Oct. 1 at Breslau, and another subsequently at Berlin; both of them readily adopting the proclamation, as did most of the ministers and laity throughout Prussia. A general assent was given to the movement on the day mentioned by the king, viz. Oct. 31, and not long after it was ordered that the distinctive names "Lutheran" and "Reformed" should be disused in all official documents, and the United Evangelical Church alone recognised as the national religion. It soon spread beyond the boundaries of Prussia, and was adopted in Nassau, Hanover, and Bavaria in 1818, in Hesse-Cassel in 1822, and in Württemberg in 1827; but it did not extend either to Lutheran Austria, on the one hand, or to Calvinistic Switzerland, on the other. Even in Prussia the revised Service-book which the king set forth in 1821 was rejected by many congregations, and uniformity was far from being established even within the bounds of the united body. On June 25, 1830, the king directed that the Service-book should be used in all churches; but a number of the Lutheran clergy refused to adopt it, and were suspended, some of them being treated with great severity, and even imprisoned.

Three parties arose in the Church. One, generally called the Confederalists, under the leadership of Prof. Hengstenberg and Dr. Stahl, maintained that the union consisted in a mere external confederation and subjection to the same general Church government; and that the individual churches remained Lutheran, Reformed, or United. A second party, commonly called the Consensus party, took for its doctrinal basis the Bible and the common dogmas of the Lutheran and Reformed confessions. It controlled the theological faculties of most of the universities, and had among its leading men Nitzsch, Twisten, Hoffmann, Niedner, Tholuck, Julius Müller, Jacobi, Dörner, Lange, Stier, Herzog, and Rothe. The third, or Union, party rejected the authoritative character of the old symbolical books of both the Lutheran and the Reformed denomination, and based themselves on the Bible simply, claiming, at the same time, the right of subjecting the authenticity of the Old and New Testaments to critical examination. This party included many of the disciples of Tübingen, and liberal divines of different shades of opinion.

The persecution of the "Old Lutherans" was kept up until the death of Frederick William. A milder policy was introduced by his son, who succeeded him in 1840; and in 1845 the Old Lutherans were allowed to organize into a separate community, but did not receive any share of the public funds. In 1873 laws were passed substituting the principle of ecclesiastical self-government for that of the consistorial administration theretofore exercised by the State. In January and February, 1875, provincial synods met in all the eight old provinces of Prussia, and in November and December an extraordinary general synod met at Berlin, to make all necessary preparations for a transfer of the government

# UNITED METHODIST CHURCH 650 UNITED SOCIETY OF BELIEVERS

of the Church to a regular general synod. United Evangelical churches were also formed in other German states; in Nassau, 1817; the Bavarian Palatinate, 1818; Baden, 1821; and in Württemberg, 1827. In Austria and France a fusion of the Lutheran and Reformed churches has also many friends, but nothing practical has been as yet accomplished. In the United States a branch of the United Evangelical Church was established at St. Louis in 1840, when six German ministers organized an ecclesiastical body called *Evangelischer Kirchenverein des Westens* (Evangelical Church-Union of the West). This body, in 1856, was divided into three districts, and in 1866 changed its name to "German Evangelical Synod of the West." In 1870 it reported, at the General Assembly held in Louisville, as follows:

Ministers.	Congregations.	Voting Members.	Communicants.	Total Population.
162	300	12,000	about 20,000	about 50,000

Another branch of the United Evangelical Church was constituted in 1848, under the name of "Evangelical Synod of North America." In May, 1859, it split into two independent bodies, one of which assumed the name "United Evangelical Synod of the North-west," and the other "United Evangelical Synod of the East." Both of them united in 1872 with the "German Evangelical Synod of the West," constituting the fourth and fifth districts of this body. In 1874 the Church was redivided by the General Conference held in Indianapolis into seven particular synods. It then numbered about 300 ministers and 40,000 communicants. The Church has a theological seminary in Warren County, Mo.; another educational institution at Elmhurst, Ill.; and three denominational papers. See Bunsen, *Signs of the Times*:

Protestantism*; Müller, *Die evangelische Union* (Leips. 1854); Nitzsch, *Urkundenbuch der evangelischen Union* (Bonn, 1853); Schaff, *Germany, its Theology*, etc. (Phil. 1857); Stahl, *Die lutherische Kirche und die Union* (Berlin, 1858).

**United Methodist Free Church**, an English branch of the Methodists which was formed in 1857, when the Wesleyan Methodist Association and the larger portion of Wesleyan Reformers amalgamated. The origin of this Church dates back to 1827, when

to establish a theological seminary. The Wesleyan Methodist Association retained its separate identity till 1857, when, by uniting with the Wesleyan Reformers, it became merged in the United Methodist Free churches. The union was completed, and the name adopted, in the town of Rochdale. This body is the third in numerical importance of English Methodist denominations, having its seat principally in England. Only three of its circuits are in Scotland, and it has no footing in Ireland. It has missionary stations in Jamaica, Victoria, Queensland, New Zealand, Eastern Africa, and China.

The constitution of the body is democratic, the members of its annual assembly being freely chosen representatives. This assembly does not regulate the internal affairs of circuits, they being independent, except on matters of connectional import. The home circuits are divided into districts; but the district meetings do not wield any important functions. The various schemes, funds, and institutions of the body are intrusted during the year to committees which are, for the most part, elected annually. It is so with the Connectional Committee (which may be regarded as the executive of the body), with the Foreign Missionary Committee, the Chapel Fund Committee, the Superannuation Committee, and the Book-room Committee. Ashville College is governed by a body of trustees elected for life, and a committee of six elected for three years, but so arranged that two retire each year. The Theological Institute is governed by a body of trustees elected for life, and nine others chosen annually. The connectional officers are the president of the assembly, the connectional secretary, the connectional treasurer, and the corresponding secretary.

In 1877 their statistical report showed as follows:

RIAN CHURCHES, 5.

**United Presbyterian Church.** The genea-  
logical descent of the existing body may be best ex-  
hibited by the following pedigree [see PRESBYTERIAN  
CHURCHES, 2, 14]:

## SECESSION OR ASSOCIATE SYNOD, SEPARATED FROM THE SCOTTISH ESTABLISHMENT, A.D. 1738.

trouble arose in Leeds in reference to the introduction of an organ into Brunswick Chapel. This resulted in the organization of the Protestant Methodists, who had a separate existence until 1836, when they became merged in the denomination formed in that year, and known subsequently as the Wesleyan Methodist Association. The immediate occasion of the formation of the latter body was the determination of the conference

**United Secession Church.** THE, was formed in Scotland in 1820 by a reunion of the Associate (or Burghers) and the General Associate (or Antiburghers) Synod. In 1847 it was united to the present United Presbyterian Church.

**United Society of Believers in CHRIST'S SECOND APPEARING**, the name given to themselves by the Shakers (q. v.).

**United States** OF AMERICA is the full title of the principal nation on the Western continent, occupying the whole central portion of North America. See AMERICA. In this article we propose to treat our country only in its general religious aspects, leaving its other features to the secular cyclopedias. For the religious beliefs and customs of the aborigines, see INDIANS (NORTH AMERICAN).

**I. Church History.**—1. *Religious Character of the Original Settlers.*—New England was originally settled by the Puritans (q. v.) from England. These were a band of dissenters from the faith and practice of the Established Church of England who were persecuted for their dissent and granted no rest in their own land. Accordingly they decided to leave their own country for one that would permit them liberty of conscience in religious worship, and, after one unsuccessful attempt at departure, finally set out from the coast of Lincolnshire in the spring of 1608 for Holland. They reached Amsterdam in safety, where they passed one winter; and then removed to Leyden. Here they enjoyed that religious liberty for which they were seeking; but they were in a strange land, among a strange people, who used a strange language. The love of country was still warm in their hearts notwithstanding their persecution at home, and during the ten years they remained in Holland they became thoroughly anxious to return to the allegiance of their mother country. With this desire in their hearts, they sent John Carver and Robert Cushman to England to ask permission of the government for the Pilgrims at Leyden to settle in America. After some hesitation on the part of the king and the ministry, they obtained from the former an informal promise that he would not disturb them in America if they should decide to go there. Arrangements were completed for their removal to America, and they landed on Plymouth Rock on Monday, Dec. 11 (old style), 1620. Their arrival occurred in the dead of winter, and they were obliged during the long and severe season that followed to undergo great privation and suffering. Diseases engendered by the rigors of the climate swept away one half of their number. But the spirit which had brought the Pilgrim Fathers to New England caused them to remain undaunted by opposition, from whatever source. These were a vigorous and determined people, with strong convictions on all questions of morals and religion. They took possession of the new country and held it. They increased in number and gradually extended their borders over our present New England, and became as zealous for their religion as had been the English government before they left England. If the Church was not under the control of the State, the State was under the control of the Church; for a man could not hold office except he were a member of the Church; and religion lay at the basis of their political system. Notwithstanding their own bitter experience in their old home, they were intolerant of all dissent in their new abode, and they sometimes ran to great extremes of fanaticism against so-called heretics. Puritanism, however, has exerted a powerful influence for good in the development of American institutions by holding out sternly for the right in government as well as in private life.

—Rhode Island was settled originally by the Baptists, followers of Roger Williams (q. v.). In 1636, along with a few companions, Roger Williams, seeking for a refuge beyond the limits of the Plymouth colony, founded Providence Plantation, and made it a resort for all the distressed and persecuted of whatever name or faith. Notwithstanding this liberality on the part of the founder, the colony was settled chiefly by those of the Baptist communion.

Connecticut was contested ground between the English settlers of Plymouth and the Dutch of New Netherlands. The Dutch, finding that the English were about to establish a colony in the valley of the Connecticut River, built a fort at Hartford called the House

of Good Hope; but this was not regarded by the English as of any right belonging to the Dutch, and they proceeded to settle the country from Plymouth. In 1635 a colony of sixty persons left Boston for Connecticut, where they arrived in due time, and settled at Hartford, Windsor, and Wethersfield. A little later other settlements were formed, and in 1639 the leading men of New Haven adopted the Bible as their political constitution. At the Restoration in England, Connecticut obtained a royal charter, and thus became a colony free and independent in all except the name. Puritan influence was in the ascendancy, and the colony enjoyed great prosperity and freedom from invasion.

New York was settled originally by the Dutch as a trading-post. A colony was planted on Manhattan Island (the present site of New York city), and the village was called New Amsterdam. In 1623 a considerable addition was made to the numbers of the colony by the arrival of thirty families of Dutch Protestant refugees from Flanders, called *Walloons*. They came to America to escape the persecutions which they had to undergo at home. The settlements were extended rapidly, even to the present site of Albany. In 1626 Manhattan Island was purchased from the Indians for *twenty-four dollars*. There was a bond of sympathy between the Walloons and the Pilgrims of Plymouth in that they were alike refugees from persecution at home, and, furthermore, the English remembered their kind treatment in Holland. Visits were exchanged and a friendly intercourse was kept up. The English notified their neighbors of their own claim to the territory of the Hudson, and advised them to make good their titles by accepting deeds from the council of Plymouth. In 1664 the Dutch power in America was completely broken. All the territory possessed by Holland in this country had been granted by Charles II to his brother James, duke of York, who made haste to secure the land thus granted. A squadron was sent against New Netherlands, and easily subdued the country. Thereafter the country and city passed under the name of New York. English settlers were brought in, but they lived at peace with the Dutch; even the strifes of the two home governments failed to embroil the colonists of New York in a contest. From the time of the English conquest of the territory, the Episcopal Church was established by law, and was supported by the usual taxation and grants of land. Traces of both the Dutch and English forms of worship are abundant in New York at the present time. (Dutch) Reformed churches and societies are numerous, as also are the Protestant Episcopal.

New Jersey was at first a part of New Netherlands, and was settled by the Dutch, especially in the northern part in the vicinity of New Amsterdam (New York). But, on the reduction of the Dutch power to submission to the English, that portion of the territory likewise passed under the control of the duke of York. It was assigned, however, to lord Berkeley and Sir George Carteret. A liberal government was provided, and in the first assembly, held in 1668, the Puritans were in the ascendancy, and the customs of New England were largely adopted in New Jersey. In 1676 the colony was divided into two sections by a line starting at the southern point of land on the east side of Little Egg Harbor, and extending north-northwest to a point on the Delaware River in latitude  $41^{\circ} 40'$ . The territory lying east of this line was to be known as East Jersey, and remain under the control of Sir George Carteret; while that lying between the line and the Delaware was called West Jersey, and had been assigned to certain Quakers (William Penn and others) in trust for Edward Byllinge. The western section, being under the control of the Quakers, became a place of refuge for the persecuted of that name. Many Friends found homes here, and enjoyed great prosperity. In 1682 William Penn and some other Quakers purchased the territory of East Jersey from

the heirs of Sir George Carteret, and extended their control over the whole province. Robert Barclay, an eminent Scotch Quaker, was chosen governor for life, and continued to administer the government until 1690, when he died. During this period East Jersey received a large accession of Scotch Quakers, and a still larger accession of Scotch Presbyterians. The northern section of the state retains a large number of the followers of the early Dutch Protestants, while the central and southern portions have the descendants of the Scotch Quakers and Presbyterians.

[William Penn (q. v.) was greatly pleased with the success of the Quaker colonies in New Jersey, and formed the project of establishing a free state on the banks of the Delaware, founded on the principle of universal brotherhood. After a vigorous effort, seconded by powerful friends in Parliament, he obtained a charter in 1681 by which he became proprietor of Pennsylvania. Emigrants flocked to the new colony, a liberal government was planned, the land was purchased from the Indians, and relations of friendship were established with the savages which lasted for a long period of time. It is a pleasure to look back upon the history of Pennsylvania. It is one continued reign of peace and prosperity, resulting from the righteous principles upon which the colony was founded and maintained. Immigration was encouraged by the liberal policy of the proprietors, and thousands of German Protestants, who fled from persecutions at home, came and settled to the westward of the English communities. Their descendants remain to this day, and are among the most industrious and thrifty people in the whole land. Many Huguenots also came from France and formed settlements, and Irish Protestants occupied lands still farther west. From these different classes of emigrants have sprung the various prevailing religious bodies of Pennsylvania; but the Quakers and Germans have made the deepest impression upon the country, and they have had more to do in shaping the religious sentiment and policy of the people than any other.

[Delaware was settled by the Swedes. Gustavus Adolphus, as early as 1626, had formed a plan of colonization, but was prevented from carrying it out by difficulties at home, and the plan was put into execution by Oxenstiern, the Swedish minister. In the early part of 1638 a company of Swedes arrived in Delaware Bay. They purchased from the Indians the country lying to the west of the bay, from Cape Henlopen to Trenton Falls, and named it New Sweden. This territory comprised the present state of Delaware and a part of Pennsylvania. But the colony of New Sweden was of short duration. In 1655 the country was entirely subdued by the Dutch of New Netherlands.

[The colony of Maryland was founded as a home for persecuted Catholics. Sir George Calvert, of Yorkshire, England, a man of liberal education, large experience, and a devoted Catholic, was desirous of founding a colony which should afford a home for the persecuted Catholics of his own land, and should grant equal toleration to all creeds. About the year 1630 he obtained from king Charles I a charter for a new colony on the Chesapeake, but died before the colonization began. His son, Cecil Calvert, received the charter June 20, 1632, and named the new province Maryland. His brother, Leonard, was sent out with the colony as governor. The provisions of the charter were the most liberal that had yet been granted. Christianity was the religion of the State, but no preference was expressed for any creed. Free-trade was guaranteed, and arbitrary taxation forbidden. The power of making the laws of the colony was conceded to the colonists or their representatives. Under these liberal provisions, and the prudent conduct of the officers and the colonists themselves, the enterprise was very prosperous, and the colony grew very rapidly. Religious toleration and freedom of conscience were reiterated in the legislation of the colonial Assembly, and Maryland, along with

Rhode Island and Connecticut, went far beyond the other colonies in securing liberty of conscience. In 1691 the patent of the Baltimores was taken away by king William III. During the following year Sir Lionel Copley assumed the government of the province, and a revolution was speedily effected. The Episcopal Church was established by law, and supported by taxation; religious toleration was abolished, and the former liberal policy entirely swept away.

On April 10, 1606, king James I granted a patent to an association of nobles, gentlemen, and merchants residing in London, called the London Company, assigning to them all the region between the thirty-fourth and thirty-eighth degrees of north latitude. The affairs of the company were intrusted to the management of a superior council, residing in England, and an inferior council, residing in the colony. To carry out the purpose for which the charter was granted, a fleet of three vessels was fitted out, to be under the command of Christopher Newport. On Dec. 9, 1606, the vessels set sail, and in May following landed on the banks of the James River, in Virginia, fifty miles from Chesapeake Bay. Here they immediately laid the foundations of Jamestown, the oldest English settlement in America. The first settlers of Jamestown were idle, improvident, and dissolute. While a few were laborers and artisans, the great majority were enrolled as *gentlemen*. John Smith, the best and most energetic man of the colony, was accused of conspiracy and sedition, but was able to defend his name against the accusations. The colony was organized by making known the names of the inferior council, and the election of Edward Wingfield as governor of Virginia. The new colony had a hard struggle for its existence. The idleness and dissolute habits of the settlers, the treachery of some of the leaders, and the civil dissensions which arose in the community threatened to break up the settlement in the very beginning. But, after various disasters and discouragements, Smith was elected president, and began a vigorous administration which added new life to the enterprise. By the undaunted courage of the officers from this time onward, and the encouragement given by the arrival of new accessions to their number from time to time, the colony was able to maintain its existence. The settlements were extended, and the colony grew into a flourishing province. The Episcopal Church was established by law and supported by taxation; churches were built in various parts of the province, and remained for many years. Along with the English revolution came religious intolerance in Virginia. In March, 1643, a law was enacted by the Assembly declaring that no person who did not assent to the doctrines of the Established Church should be allowed to teach, or to preach the Gospel, within the limits of Virginia. Their persecution of the Puritans within their borders brought upon the Virginians the distrust of the colonists of New England for many years.

The attempt to form settlements in the Carolinas was for a long time unsuccessful. In 1663 began the first colonial settlements in North Carolina on the Chowan River and Albemarle Sound. The colony passed through many vicissitudes of fortune, but the settlers remained in possession of the territory. In 1704 an attempt was made by Robert Daniel to establish the Church of England. George Fox, the founder of the Quakers, at one time (1672) made a visit to the settlements of Carolina, and obtained many hearers to his instructions. Other Quakers came from New England and Delaware, and made their homes in this colony. In 1707 a band of French Huguenots were added to the settlers; a hundred German families from the banks of the Rhine came to find a home on the banks of the Neuse; and a number of Swiss peasants founded New Berne, at the mouth of the River Trent. Little attention was paid to questions of religion at first. There was no minister in the colony until 1708, and no church

until 1705. But the largest liberty of conscience was allowed, and a field opened for the sowing of precious seed.

South Carolina was colonized in 1670, and Old Charleston founded. The present city of Charleston was laid out and a beginning made in building ten years later. In 1686 South Carolina began to receive the Huguenots (q. v.) from France, and in a short time had more of these French refugees than any other American colony. The proprietors pledged them protection and citizenship, but, owing to the unsettled condition of their political plan, the Huguenots were kept in suspense for many years. The first general act of enfranchisement was passed in their favor in May, 1691, and their full political rights were established in 1697. In 1695 began the administration of John Archdale as governor. He was a Quaker of distinction, and ruled with such wisdom and moderation that the colony greatly prospered. He was instrumental in procuring the passage of a law by which all Christians, except the Catholics, were fully enfranchised; and the exception was made against his earnest protest. The policy of South Carolina, as well as that of her northern sister, had been one of religious toleration and civil liberty; consequently no church was established by law, but Christians of all denominations were welcomed to her shores. The Dutch came from the banks of the Hudson, the French vine-dressers were sent by king Charles; Churchmen and Dissenters from England, Irish peasants, Scotch Presbyterians, and Huguenots, all found a home and welcome under the genial sun of South Carolina.

The colony of Georgia was founded as an asylum for the oppressed poor of England and the distressed Protestants of other lands. James Oglethorpe, an English cavalier and member of Parliament, obtained a charter from George II, by which the territory between the Savannah and Altamaha rivers was organized and granted to a corporation for twenty-one years in trust for the poor. This charter was dated June 9, 1732, and the new province was named Georgia, in honor of the king. The organization of the colony was on a liberal basis. Oglethorpe, who was the first governor, was a High-Churchman, but made no distinction among the immigrants who came. Swiss peasants, Scotch Highlanders, and German Protestants from Salzburg came and made their home with the English. Then came the Moravians with their vital religion, and the Methodists, in the persons of John and Charles Wesley and George Whitefield. The labors of the Wesleys were not productive of any permanent results, but those of Whitefield were more successful.

The colonization of Florida was first effected in 1565. Pedro Melendez, a Spanish soldier of a wicked disposition and evil habits, was commissioned by Philip II to explore the coast of Florida, conquer the country, and plant a colony in some favorable site. Melendez arrived in sight of land on St. Augustine's day, but did not land until Sept. 2. The harbor and the river which enters it were named in honor of that saint. On the 8th of the same month, after the proclamation of the Spanish sovereignty and the celebration of mass, the foundations of St. Augustine were laid. This is the oldest town in the United States, having been founded seventeen years before Santa Fé, and forty-two years before Jamestown. The founders were Catholics, and their dastardly leader was a cruel monster who hoped to regain the favor of his countrymen by murdering the members of a Huguenot settlement about thirty-five miles above the mouth of the St. John's River. The work was done in a most heartless manner, and the French settlement entirely broken up. The outrage was subsequently avenged by Dominic de Gourges, a soldier of Gascony, who attacked successively three Spanish forts on the St. John's, captured the inmates, and afterwards hanged the principal of them.

When La Salle visited the lower Mississippi valley in 1682 he took possession of the country in the name of

Louis XIV of France, giving it the name of Louisiana. A settlement was attempted by Iberville and his followers at Biloxi, in 1699. He died before the project was fairly successful, and was succeeded in command by Bienville, who was driven from his post by the Indians and compelled to take up his abode at the present site of New Orleans. Others succeeded Bienville in the governorship of the new territory, but he was reappointed in 1718, and began to build a town on the site he had formerly selected as headquarters, and named the city New Orleans, in honor of the Duke of Orleans. In 1723 it was made the capital of the province. A large tract of country was ceded by France to Spain in 1762, and remained under control of that power for thirty-eight years, but was restored in 1800, and in 1803 sold by Napoleon Bonaparte to the United States for \$11,250,000 and the assumption of certain claims due from the French government to citizens of the United States, amounting to \$3,750,000. Thus was purchased, at a cost of \$15,000,000, nearly all the territory included in the present states of Louisiana, Arkansas, Missouri, Iowa, Minnesota, Dakota Territory, Nebraska, most of Kansas, Indian and Wyoming territories, part of Colorado, and the whole of Montana, Idaho, Oregon, and Washington Territory. This was afterwards divided up from time to time as the wants of the population required. The Mississippi valley, while under the control of the French, had many settlements of French Catholics, which have left their impress upon the country to a greater or less extent.

The first attempt to colonize Texas was by the French under La Salle in 1687; but this great explorer lost his life in returning towards the Mississippi during the same year, and the men who were left to hold the post established were either killed or driven away. In 1690 a trading-post and a mission were established by the Spanish, and subsequently other settlements were made by the same power. Then in 1735 a French colony was sent into Texas from the Red River. But neither the French nor the Spanish held possession of the country unmolested. After the Louisiana purchase, difficulty arose between Spain and the United States as to the boundary, the United States claiming the territory west to the Rio Grande, while Spain claimed it east as far as the Sabine. This was finally settled by treaty, in which the United States guaranteed to Spain her territory west of the Sabine. Mexico became independent in 1821, and Texas formed a part of it, being united under one government with Coahuila. But while Coahuila was exclusively Mexican, Texas was settled largely by colonists from the United States, generally under grants of land from the Mexican government. Thus there existed a natural barrier between the Texans and the Mexicans, and, after much dissatisfaction with the government of the latter, the former fought for and gained their independence in 1836. Texas was annexed to the United States in 1846.

Tennessee was originally a part of North Carolina, and was settled mainly by emigrants from that State. Kentucky belonged to Virginia, and was settled likewise by Virginians. The other Western States lying east of the Mississippi were included in the *Territory north-west of the Ohio*. The French under La Salle had explored this region, laid claim to it, and established trading-posts guarded by forts in various parts of it, but they finally relinquished their claim to it. A considerable part of this territory was claimed by Virginia, Pennsylvania, New York, and New England under their original territorial grants; but these claims were all relinquished except a part belonging to Connecticut, called the Western Reserve, and a Virginia reservation, now a part of Indiana, each including about 3,700,000 acres. Emigration extended into this section from the older states, as a rule, on the lines of latitude, although there were many exceptions, and each new settlement partook of the characteristics of the region from which it was peopled. The first settlement in Ohio was at Ma-

rietta in 1788, formed by a colony from New England. Many localities in Southern Ohio were settled by emigrants from Virginia, while the northern section was peopled by New-Englanders. The oldest settlements in Indiana were made by the French at Vincennes, Corydon, and other places in that vicinity, in 1702. Michigan and Illinois, as well as Wisconsin and Minnesota, had numerous settlements which were formed by the French Catholics in the 16th and 17th centuries. Subsequently these states, especially Michigan, Minnesota, and Wisconsin, were filled up largely from the New England States and New York.

Like the rest of the Mississippi valley, Iowa was explored and claimed by the French, but was a part of the Louisiana purchase, and so became the property of the United States government. The first white settlements under the authority of this government were made in 1833-34 at Fort Madison, Burlington, and Dubuque. The inhabitants of Iowa have always taken high ground on all questions of civilization, education, and morals.

The Pacific Slope has received its population in recent times. The southern portion extending far towards Texas was formerly a Spanish possession, and there yet remain many Spaniards and Mexicans within those states and territories. The population of California grew up very rapidly after the discovery of gold in 1848. Miners, speculators, and adventurers rushed thither from all parts of the country, and formed a very motley crowd. Many of these remained, but by far the larger portion returned to their former homes or wandered to other lands. Oregon was included in the Louisiana purchase, and began to be settled by emigrants from the States about 1832. In 1834 the missionary colony of Dr. Marcus Whitman and Rev. Mr. Spalding entered Oregon, and in 1842 the emigration to that region was large.

The settlement of Utah constitutes a remarkable chapter in the history of our country. The Mormons (q. v.), under the leadership of Joseph Smith, made their first settlement in Missouri, where they grew to be a body of considerable numbers; but their theories and habits were distasteful to the people of that state, and they were compelled to remove in 1840. They found their way across the Mississippi into Illinois, where they founded the city of Nauvoo. Here they increased to ten thousand in number, but were obliged to leave this place also on account of the dissatisfaction of the people among whom they lived. In 1846 they removed beyond the Rocky Mountains to the basin of the Great Salt Lake, and founded Utah Territory. In this territory they have held sway during all the succeeding years, and have lived in defiance of the laws of the United States, with, seemingly, no power to check them. A new æra seems to be dawning. Law-abiding and Christian people are finding homes within the limits of the territory, and a population is fast growing up whose influence will secure the execution of the laws of the land.

New Mexico was colonized by the Spaniards about the close of the 17th century. Many missions were established by the Roman Catholics and many of the Indians were converted to that faith. The mineral wealth of the country was discovered, the colonists opened and worked the mines, and enslaved the Indians for that purpose. At length the Indians shook off the power of their oppressors and drove the Spaniards from their territory; but near the close of the 17th century the latter regained a part of their former power. In 1821, along with the rest of Mexico, New Mexico became independent of Spain, and was a part of that republic until 1848, when it was ceded to the United States. The Gadsden purchase was added in 1853, when it included all of Arizona and part of Colorado. Arizona was set off from it in 1863, and a portion of Colorado in 1865. The inhabitants are largely Mexican, Spanish, and Indians, with an ever-increasing number of emigrants from the United States.

2. *Effects of more Recent Immigration.*—The United States are peculiar among all the nations of the earth, as being composed of a population entirely foreign in its origin. While other countries have been invaded and the lands occupied by conquerors, largely to the exclusion of the natives, yet the old stock has not been entirely rooted out, but has become the basis of the succeeding race. In English history, the Anglo-Saxon united with the old Celtic stock, and the Norman with the Saxon, forming the Anglo-Norman race of the present. But in America the aborigines have always been treated as aliens and intruders, and are fast declining towards extermination. The great breadth of our unoccupied lands, and the excellent opportunities for obtaining cheap homes, have rendered America a favorite resort for emigrants from all parts of the world, so that at the present time more than *thirteen per cent.* of our population are foreign-born. The aggregate immigration from 1820 to 1840 was 750,949; from 1841 to 1850 it was 1,713,251; from 1851 to 1860 it was 2,598,214; from 1861 to 1870 it was 2,491,451; and from 1871 to 1878 it was 2,177,108—making a total of 9,731,073; in the year ending June 30, 1880, it was 457,243 persons. Of this vast number about one fifth have been from Ireland, one fourth from England, one tenth from Scotland and Wales, four fifteenths from Germany, one thirtieth from France, the remainder (nearly one sixth) from Scandinavia, Switzerland, Italy, Austria, Spain, Portugal, Russia, Holland, Belgium, China, etc. More than *one twentieth* of this immigration has been from Roman Catholic countries, and, in addition to this, a large proportion of those from other countries are of the same faith. Thus we have added to our population from foreign countries a large Catholic element, besides the natives who are of that faith, and the rapid increase of their numbers by the ordinary methods of propagation. Among these Catholics have come many Jesuits (q. v.), some from choice, others because of their expulsion from their European homes, who have used their influence so far as it was in their power to mould the government to their own ideas. Officers have been elected at the dictation of the priesthood, political parties and municipal governments have been under their control, and vast wealth has been amassed at the expense of the public. They have maintained their own schools, and have waged an unceasing warfare upon the public-school system of our states. They have sought hard to exclude the Bible from the public schools, and, when it was accomplished in a few instances, denounced them as godless schools. Under pretext of the right of conscience, they have sought and obtained a division of the public-school funds in a few instances.

Protestant immigrants, as a rule, have been in sympathy with our institutions from the first, and have readily fallen in with American ideas and practices. The recent accessions from the British isles have found the institutions and customs established by their ancestors, and have easily accommodated themselves to the new order. German Protestants as well as Roman Catholics have less readily Americanized. They continue, as far as possible, to use their native language and retain their German habits. They gather into communities of their own, and thus, in a degree, isolate themselves from American society. Of the great mass of Protestant immigrants who arrive here from European countries, by far the larger part are poor; but in so far as they honestly endeavor to adapt themselves to their new surroundings they make good citizens. The Jews who come among us are mainly from Germany. They still continue to be a despised race, and are compelled to seek their society among their own numbers. They live together in communities, and have but little sympathy with American customs. With our Sabbath and the prevailing religion they are utterly at variance. A few infidels arrive from time to time, and join with those of our own country in antagonizing so much of our present system as is designed to restrain

\* Including negroes, Indians, Chinese, etc.

Sabbath-desecration and preserve a wholesome regard for the laws of God. The Mormons of Utah find it to their interest to add to their numbers by means of converts secured in European countries. These, however, make their homes within the limits of the Mormon territory, and their influence is not felt except in the increased strength of the sect with which they have united. There have been considerable accessions to our population in late years from China, mainly on and near the Pacific coast. The Chinese, however, do not come to remain here, but simply to improve their temporal condition, and then return to their former home. There are certain kinds of labor in which they excel, and their services may be had at a lower price than those of any other people. Hence "Chinese cheap labor" has become a proverb among us, and has been the occasion of serious disturbances in various parts of California, loafers and politicians making it the pretext for deeds of violence and shame.

The general influence of foreign immigration upon our institutions has been most noticeable in large cities and towns, and in respect to the observance of the Sabbath and temperance. Very many who come to us from foreign lands have been addicted to the use of strong drinks at home, and their improved financial condition and the absence of restraint give them opportunities for indulging their appetites to an extreme. They are thus plunged into excesses which exert a very baleful influence upon our country. The traffic in lager beer is almost entirely dependent upon our German population for its maintenance. With them the Sabbath is a holiday, and is spent in visiting beer-saloons, parks, and gardens, and picnic excursions of various kinds. Wherever they exist in sufficient numbers to exert a controlling influence, their shops are kept open on the Sabbath, and the traffic is carried on nearly as on any other day. Their example is contagious. Many Americans who first looked upon the practice with horror, in time have become so accustomed to it that they no longer feel any annoyance, and finally begin to purchase goods upon the Sabbath. In this way the former reverence for the sacred day, so nearly universal in our country, is fast passing away, so that to-day more people are found pleasure-seeking, or engaged in labor, on the Sabbath than are found in churches in many localities. These evils are more especially apparent in large cities. Many of these, or at least whole wards in them, are made up almost entirely of foreigners. These become citizens while yet ignorant of the duties of citizenship, and fall under the control of unprincipled politicians, by whom the design of a free government is perverted, and the principles of morality are disregarded.

3. *Denominational Organization.*—The early colonists, who had never known any other relation between the Church and State than the control of the latter over the former, naturally began with the old order of things; but they soon perceived that the liberty which they sought was not consistent with such control, and they gradually abandoned it. The effort soon came to be, not to control the Church by law, but to emancipate conscience; and at the organization of the Federal government all were ready for a Church free from State control. See CHURCH AND STATE. The early settlers of Virginia brought with them the Episcopal form of service [see ENGLAND, CHURCH OF], and it was carried to other parts of the land. Out of this grew the Protestant Episcopal Church (q. v.) of this country. The Reformed (Dutch) Church (q. v.) was the outgrowth of the Dutch settlements in New York and New Jersey. The Puritans of New England retained their peculiarities, which have come down to us in the Congregationalists (q. v.). The Presbyterian churches (q. v.) of this country originated from parties of immigrants from England, Ireland, and Scotland, who settled within the limits of various colonies. These united subsequently according to their former organizations on the other side of the Atlantic. The Baptists (q. v.) originated among the Puritans and were banished from their midst. Their history is well given under the appropriate heads. Methodism (q. v.) in this country was propagated by the followers of Wesley. Their zeal and energy were great, and their growth rapid in consequence. The Roman Catholics of Maryland were from England, those of Florida from Spain, those of the

Lake region and the Mississippi valley from France. See ROMAN CATHOLIC CHURCH IN THE UNITED STATES. The Quakers (q. v.) originated in England, and found their way among the American colonists. They founded large and flourishing colonies of their own, and propagated their doctrines with unprecedented zeal.

II. *Ecclesiastical Statistics*.—These are given in detail under each denominational head in this *Cyclopædia*. Their aggregates are substantially given under the various denominations in this *Cyclopædia*, made up from the latest accessible information.

**United Synod of the Presbyterian Church.** See PRESBYTERIAN CHURCHES, 16.

**United Syrians**, one of the Syrian churches which dates from the 17th century, when a numerous party under Andreas Achigian, their first patriarch, seceded from the Jacobites, and acknowledged the authority of the pope. They have a patriarch at Aleppo, styled patriarch of Antioch; and archbishops of Aleppo, Babylon, Damascus, and Seleucia, besides eleven bishops. They number about 30,000. See SYRIAN CHURCHES.

**Unity**, as a philosophical term, signifies *oneness*. Aristotle makes it the element of number, and defines it as indivisibleness. In the Kantian philosophy it is defined as "that mental representation in the understanding by which the manifold is thought of as linked together." It is by the same authority classified as *analytic*, or unity of a logical connection; and *synthetic*, or unity of intentions in the concept of an object.

As a theological term, unity is employed to signify a oneness whether of sentiment, affection, or behavior (Psa. cxxxiii, 1). The "unity of the faith" is an equal belief of the same great truths of God, and the possession of the grace of faith in a similar form and degree (Eph. iv, 13). The "unity of the spirit" is that union between Christ and his saints by which the same divine spirit dwells in both, and they have the same disposition and aims; and that unity of the saints among themselves by which, being joined to the same head, and having the same spirit dwelling in them, they have the same graces of faith, hope, love, etc., and are rooted and grounded in the same doctrine of Christ, and bear a mutual affection to each other. When Christian unity is spoken of in the New Test., it generally means the unity of dispensation for the various classes of converts. It is expressive of the great principle that all were to be under one fold and one Shepherd.

**UNITY OF THE CHURCH** is a phrase employed to denote that all true believers are "one body in Christ." The Church is not to be considered as one on account of the common origin of the different societies, but because they were formed on common principles. There is no necessity for a visible head, as is now claimed by the Church of Rome, in order to unite all parts of the universal Church into one communion; nor is it necessary that the whole Church should agree in all rites, ceremonies, and observances in order to the same result. The circumstance of its having one common head, Christ, one Spirit, one Father, are points of unity which no more make the Church one society on earth than the circumstance of all men having the same Creator, and being derived from the same original pair, renders the human race one political community. The scriptural representations of this unity of believers in Christ is thus summarized by Chrysostom: "He is the head, we are the body; he is the foundation, we are the building; he is the vine, we are the branches; he is the bridegroom, we are the bride; he is the shepherd, we are the sheep; he is the way, we are the travellers; we are the temple, he the inhabitant; he is the first-born, we are the brothers; he is the heir, we are the co-heirs; he is the life, we are the living. These things are manifestly one." The unity of the Church is not so much an accomplished fact as the original design would have it, nor as must be in the future. The intimacy of this union is indicated in our Saviour's intercessory prayer,

in which he asks that the members of this body may be one, as he and the Father are one. See Neander, *Hist. of the Church*, i, 180, 181; Hagenbach, *Hist. of Doct.*, i, 195; Bingham, *Ch. Antiq.* bk. vi, ch. iii; bk. xvi, ch. i.

**UNITY OF GOD** is a term used to denote that there is but one God or self-existent being. The unity of God is argued from his self-existence, his independence, the perfection of his nature, his omnipotence, and the unity of design in the works of nature. The doctrine was lost sight of by heathens, and maintained by Israel and in the Gospel. The Scriptures make no attempt to prove the doctrine, but assert it unequivocally. See Exod. xx, 3; Deut. iv, 35; vi, 4; Psa. lxxxvi, 10; 1 Cor. viii, 4, 6, etc. When the doctrine of the Trinity (q. v.) was formulated, it became necessary for the Church to declare that this does not conflict with the doctrine of his unity. See Hagenbach, *Hist. of Doct.*, i, 102, 330; Van Oosterzee, *Christian Dogmatics*, i, 250.

**UNITY OF THE HUMAN RACE.** See ADAM.

**Universal Bishop**, a title assumed by the Roman prelates succeeding Gregory I (590-604). The patriarchs of the Eastern Church, particularly John Jejunator, had claimed the title of *ecumenical patriarch*. This Gregory denounced as arrogant and anti-Christian. The title, however, was adopted by the successors of Gregory in its original signification. See Trevor, *Rome*, p. 104; Schaff, *Hist. of the Christian Church*, ii, 328 sq. See ECUMENICAL BISHOP.

**Universal Friends**, a sect which arose in Yates County, N. Y., near the close of the last century, professing to be followers of Jemima Wilkinson (q. v.), a Quakeress, who professed to work miracles, and assumed the title of "the universal friend of mankind." The sect is now almost extinct, and the Universal Friends are sometimes called *Wilkinsonians* (q. v.).

**Universal German Library** is a work begun in 1765, under the direction of Frederick Nicolai, with about fifty writers, afterwards increased to one hundred and thirty. It became at once the public organ of all those who felt called upon to lift their voice against superstition, fanaticism, and prejudice, as well as everything which was spiritually elevated or that was related to a more lively imagination and a deeper feeling. It was the high tribunal of rationalism. Not alone the orthodox, nor supposed enthusiasts and pietists, nor Lavater, but Goethe, and even poetry, and philosophy wherever it arose above arbitrary and secular discussion (e. g. Kant and Fichte), were spurned by this inquisitorial court as folly, flattery, and secret Jesuitism. The much-lauded tolerance was immediately converted into intolerance and bigotry. All the articles in the *Library*, however, were not colored by Nicolai's scepticism, for there were also many weighty opinions of worthy scholars. The work served an important purpose in bringing to the knowledge of the world literary productions of value, and in fostering and encouraging a taste for reading. See Hagenbach, *Hist. of the Church in the 18th and 19th Centuries*, i, 307 sq.

**Universal Redemption.** See ATONEMENT; REDEMPTION.

**Universalism.** The ultimate restoration of all sinners to happiness and the favor of God is maintained by Universalists (q. v.) on the ground that the final exclusion of any soul from heaven would be contrary to the illimitable love of God; that the wrath of God is only exercised against sin—repentance, even in the future life, bringing about a restoration to his love. But this supposes a distinction between sin and the sinner which is not only without foundation in the Holy Scriptures, but is contradictory to their statements. We are nowhere told, as regards a future state, that God's wrath against sin will only continue so long as sin remains, but that the sinner himself who dies impenitent will be eternally punished.

Again, it is asserted that Scripture has no plain dog-

matic statements at all as to the possibility or impossibility of repentance after death (i. e. in hell). There are terrible threats of divine vengeance which will overtake the ungodly; but there are some distinct utterances of a hope embracing all times, existence, and states, and the specific question at issue does not seem to be raised by Scripture. Such utterances are supposed to be contained in 1 Cor. xv, 22-28; Eph. i, 9, 10; Phil. ii, 9-11; Col. i, 19, 20. Now it may fairly be admitted that the passages cited *do* appear to favor Universalism, and they might have been so understood, had it been elsewhere taught in Scripture; but they are of no weight whatever in opposition to its clearest and most emphatic declarations. The apostle here says that God will be all in all—that all things shall be subdued unto Christ, reconciled unto him, and that every tongue shall confess that he is Lord of all. But such statements must be viewed in connection with other passages of Scripture which contradict the doctrine of universal salvation, and also according to scriptural usage and the meaning which can only be given to many parallel passages. For example, our Lord says that when lifted up on the cross (referring to the present efficacy of his atonement) he will draw all men unto him (John xii, 32). No declaration can be more positive and unequivocal than this; and yet, literally understood, it is not merely untrue, but contradictory to other statements of Scripture, e. g. that no man can come to Christ except the Father draw him, and that they only are drawn who hear and learn of the Father (vi, 44, 45)—certainly not all men. Such is the usage of Scripture language; a thing is spoken of as being really effected to indicate the certainty of the purpose, and that every provision has been made for its accomplishment, though eventually through man's sinfulness God's benevolence may be frustrated. See PURGATORY.

Again, Christ died for all men, and God would have all men to be saved—statements obviously leading to the supposition, at least, that all mankind will at last be saved. Yet in other passages of Scripture there is an apparently discordant statement that Christ died for "many," laid down his life for "the sheep," and the object of redemption is said to be to "gather together in one the children of God which are scattered abroad" (Blunt, *Dict. of Theol.* s. v.). These passages are to be reconciled by the ready answer that *provision* indeed is made for the salvation of all, but its actual effect will depend upon the voluntary embracing or rejecting of it on the part of men individually. See REDEMPTION.

Dr. Chauncy's arguments in favor of Universalism (*Salvation of All Men*) are these: 1. Christ died not for a select number of men only, but for mankind universally, and without exception or limitation, for the Sacred Scriptures are singularly emphatic in expressing this truth (John i, 29; iii, 16, 17; Rom. v, 6; 1 Cor. xv, 3; 1 Thess. v, 10; Heb. ii, 9; 1 Pet. iii, 18; 1 John ii, 2). 2. It is the purpose of God according to his good pleasure that mankind universally, in consequence of the death of his son Jesus Christ, shall certainly and finally be saved (Rom. v, 12, etc.; viii, 19-24; Eph. i, 9, 10; iv, 10; Col. i, 19, 20; 2 Tim. i, 4). 3. As a means in order to men's being made meet for salvation, God will sooner or later, in this state or another, reduce them all under a willing and obedient subjection to his moral government (Psa. viii, 5, 6; Matt. i, 21; John i, 29; 1 Cor. xv, 24-29; Phil. ii, 9-11; Heb. ii, 6, 9; 1 John iii, 8). 4. The Scripture language concerning the reduced or restored, in consequence of the mediatory interposition of Jesus Christ, is such as leads us into the thought that it is comprehensive of mankind universally (Rev. v, 13). The opponents, however, of Dr. Chauncy and this doctrine observe, on the contrary side, that the Sacred Scriptures expressly declare that the punishment of the finally impenitent shall be eternal (Matt. xii, 31, 32; xvii, 8; xxv, 41, 46; xxvi, 24; Mark iii, 29; ix, 43; Luke xii, 10; Eph. ii, 17; 2 Thess. i, 9; Heb. i, 4, 6; x, 26, 27; 1 John v,

16; Jude xiii; Rev. ix, 3; xiv, 11; xx, 20). See HELL.

In short, severe as may seem the doctrine of eternal punishment, and however much we may naturally wish to avoid its acceptance, this is not a question for us to solve according to our inclination. We must ask, with reference to all matters connected with the future world, What has God revealed? what has *he* declared? The Scriptures are the ultimate appeal, and these to candid and thoughtful minds have ever been plain and positive on the subject. Moreover, the same abstract arguments which are often adduced against the *everlasting* punishment of sin apply to its present punishment, and, indeed, against the fact of sin itself. If God loves man and loves holiness, why does he suffer him to sin at all? We are thus brought back to Butler's immortal argument, and constrained to bow to the sovereign will of the Almighty. The following judicious remarks are from Van Oosterzee, *Christian Dogmatics*, ii, 438:

"The duration of future punishment is most definitely represented in Holy Scripture as absolutely endless (Mark ix, 44-50; Rev. xiv, 11, etc.). Even if the word *eternal* does not in itself denote absolute endlessness, it is surely a different matter when eternal pain is without any limitation associated with eternal life (Matt. xxv, 46). We will here only call to mind the fact that those who maintain the contrary of restorationism can bring forward numerous and plain statements of the Lord and his witnesses; at any rate, the possibility of an endless misery is most distinctly declared in Matt. xii, 31, 32; and such words as those in Luke xvi, 26; Matt. xxv, 10, 41; xxvi, 24 could hardly be vindicated from a charge of exaggeration if he who spoke them had himself seen even a ray of light in the outer darkness, and been able and willing to kindle it before others' eyes. In no case could such a ray be seen without previous contrition and conversion; but, viewed even psychologically, this latter is certainly nowhere to be looked for less than in a hell of sorrow and despair, not to say that the Gospel nowhere opens up to us a certain prospect of the continuance of the gracious work of God on the other side of the grave. He who here talks of harshness must by no means forget that sinful man is a very partial judge in his own case; that nothing less than the highest grace is boldly and stubbornly set at naught in the case here supposed; and that there always will be, according to the teaching of Scripture, an equitable distinction in the rewards as well as in the punishments of the future (Luke xii, 47, 48; Rom. ii, 12 sq.). Ay, even if men might flatter themselves with a diminution or postponement of the punishment, there still would always be a remembrance of the incalculable mischief which they had done to themselves and others, and this would be a dark cloud before the sun of an eventual happiness. Least of all could they hope for such an end who have known the great salvation, and all their lives ungratefully despised it (Matt. xi, 24; Heb. ii, 9). As to the heathen and others who, entirely without their own fault, have missed the way of life, Holy Scripture nowhere compels us to believe that these should summarily, and on that account alone, be the victims of an eternal damnation. While there is only one way of salvation (Acts iv, 12), the Merciful One will make it known to men in some way (1 Pet. iii, 19). We can safely leave to God the justification, even in this respect, of his own government of the world; but we must take careful heed that we do not try to be more merciful and wise than he to whom sin, as long as it continues to be sin, is thoroughly damnable. Even in preaching the Gospel, his servants are not free to leave this darker side entirely unmentioned. The statement of it should always be joined with that of the friendly light of grace, and let the preacher take care that he does not lead his hearers in the way of despairing fear or unbelieving doubt by yielding to the desire to paint hell as black as possible. The best statement of the prospect of the sinner is that of 'going to his own place,' i. e. to the land of his own choice, where he may still continue to dwell."

#### See PUNISHMENT, FUTURE.

**Universalists**, a Christian sect believing in the final destruction of sin and the reconciliation of all souls to God through the Lord Jesus Christ. They claim that there is proof of the existence of their doctrine, Universalism, and of the activity of its advocates under various names, from the introduction of Christianity to the present time.

**I. Origin and History.**—(I.) *Informal*.—1. *In Former Centuries*.—The earliest notices now to be found of Universalism after the days of the apostles are in the writings of some of the more prominent Gnostic

sects, as the Basilidians, Carpocratians, and Valentini-ans, about A.D. 130. The ultimate purification of the race was, according to their theories, by means of the discipline of the souls of the wicked through transmigration. In the *Sibylline Oracles*, which appeared A.D. 150, Universalism is taught as resulting from the prayers of the saints affected by the miseries of the damned. The Almighty is represented as granting this favor to the redeemed on account of the great love which he bears to them for their fidelity. In 195 Clemens Alexandrinus, who was president of the Catechetical School at Alexandria, advocated Universalism on the ground of the remedial character of all punishment. His pupil and successor in the school, Origen Adamantius, famous alike for his learning, piety, and zeal, taught Universalism on the ground of the ever-continuing freedom of the will, the deep mental and spiritual anguish occasioned by the light and knowledge of the truth until it leads to repentance, and then the harmony of the soul with God. Origen's position, abilities, and untiring efforts for the spread of the Gospel gave him great influence with his pupils, and with the Church at large, in whose behalf he became a voluminous writer. In addition to his position and work in the school of Alexandria, he also had care for several years, in connection with Pamphilus, of the theological school at Casarea, one of whose distinguished pupils was the celebrated Gregory Thaumaturgus, a great admirer of his master's theories, and finally, about A.D. 235, his strong defender and ardent eulogist. Pamphilus, and Eusebius, the first Church historian, also defended Origen's doctrines from charges brought against them by the Western Church, and in answering the complaint that he denied all future punishment they quote from his writings in contradiction thereof, not only his positive assurances of future and severe punishment, but his equally positive assertion that such correction is purifying and salutary. In A.D. 364, Titus, bishop of Bostra, wrote in advocacy of Universalism, contending that, although there are torments in the abyss of hell, they are not eternal, but that their great severity will lead the wicked to repentance and so to salvation. Gregory of Nyssa, A.D. 380, also advocated Universalism on the same grounds. Contemporary with him was the justly celebrated defender of orthodoxy, Didymus the Blind, a successor of Origen in the school at Alexandria, and a zealous Universalist. Prominent among his scholars was Jerome, eminent alike for his abilities, his inconsistencies, and instability. Universalism as taught by Origen is clearly and ably set forth by Jerome in his commentaries on the epistles, and in his letters. John, bishop of Jerusalem at this period, was also an advocate of Universalism on Origen's theory. Another contemporary, Diodorus, a teacher of great repute in the school at Antioch, and afterwards bishop of Jerusalem, was also a Universalist, who, in opposition to the then general prevalence of allegorical interpretation, strictly adhered to the natural import of the text in his many commentaries on the Scriptures. He defended Universalism on the ground that the divine mercy far exceeds all the effects and all the deserts of sin. His pupil and successor in the school, Theodore of Mopsuestia, A.D. 420, called "the crown and climax of the school of Antioch," and by the Nestorians, whose sect he founded, "the interpreter of the Word of God," and whose writings were text-books in the schools of Eastern Syria, was a prominent and influential Universalist. His theory was that sin is an incidental part of the development and education of the human race; that, while some are more involved in it than others, God will overrule it to the final establishment of all in good. He is the reputed author of the liturgy used by the Nestorians, a Church which at one time equalled in its membership the combined adherents of both the Greek and Latin communions, and which has had no rival in military zeal. In the addresses and prayers of this liturgy Universalism is distinctly avowed. The-

odore, A.D. 430, bishop of Cyprus in Syria, a pupil of Theodore of Mopsuestia, was also a Universalist, holding the doctrine on the theory advocated by the Antiochian school.

For some time prior to this, certain opinions of Origen on pre-existence and on the salvation of the devil had been in dispute and pronounced heretical by a synod; but his doctrine of the universal salvation of the human race had not been involved in this condemnation. At a local council called by the emperor Justinian at Constantinople, A.D. 544, Origen's doctrine of universal salvation was declared heretical. Nine years later another council was held by the same authority at the same place, when condemnation was pronounced on the Nestorians, although their belief in Universalism was not mentioned. It has been common to call this an œcumenical council, but without warrant (see the action of the Latin Church in refusing to recognise it or to send a legate to it). Döderlein, in his *Institutes of Christian Theology*, after quoting the decree of Justinian against Origen, says, "That was not the belief of all, and in proportion as any one was eminent in learning in Christian antiquity, the more did he cherish and defend the hope of the termination of future torments." Drexelius, in his defence of eternal punishment, gives this testimony: "That God should doom the apostate angels and men at the day of retribution to eternal torments seemed so hard and incredible a doctrine to some persons that even Origen himself, who was mighty in the Scriptures, and no less famous for his admirable wit and excellent learning, presumed to maintain in his book of principles that both the devils and the damned, after a certain period of years, the fire having purged or cleansed them from their pollutions, should be restored to grace. Augustine and others set forth his error and condemned him for it. But, notwithstanding their condemnation, this error has found a great many in the world who have given it a kind of civil reception. The *Aniti*, heretics so called, dispersed this error throughout all Spain under various interpretations." Gieseler, the ecclesiastical historian, says, "The belief in the inalienable capacity of improvement in all rational beings, and the limited duration of future punishment, was so general, even in the West, and among the opponents of Origen, that, even if it may not be said to have arisen without the influence of Origen's school, it had become entirely independent of his system." And Augustine bears this testimony: "Some—nay, very many—from human sympathy commiserate the eternal punishment of the damned and their perpetual torture without intermission, and thus do not believe in it; not, indeed, by opposing the Holy Scriptures, but by softening all the severe things according to their own feelings, and giving a milder meaning to those things which they think are said in them more terribly than truly."

Universalism almost wholly disappeared during the period known as the Dark Ages, although there are occasional glimpses of it even in the mutilated records which the papal Church has permitted to descend to us. In the 7th century, Maximus, the Greek monk and confessor, taught Universalism; in the 8th, Clement of Ireland was deposed from the priesthood for teaching that when Christ descended into hell he restored all the damned; while in the 9th, John Scotus Erigena, a famous philosopher who stood at the head of the learned of the court of France, was a bold defender of Universalism. In the 11th century, the Albigenses were, according to papal authorities, Universalists; in the 12th, Raynold, abbot of St. Martin's, in France, was charged before a council with holding "that all men will eventually be saved;" in the 13th, Solomon, bishop of Bassorah, discussed the question of universal salvation, answering it in the affirmative. The Lollards in the 14th century taught Universalism in Bohemia and Austria; and at the same period a council convened by Langman, archbishop of Canter-

bury, gave judgment against Universalism as one of the heresies then taught in that province. In the early part of the 15th century, a sect called "Men of Understanding" taught Universalism in Flanders, advocating it on the ground of the German Mystics, as did Tauler of Strasburg, and John Wessel, who, with others, have been called "the Reformers before the Reformation," whose writings Luther industriously studied and greatly admired.

2. *In Modern Times.*—With the Reformation, Universalism made a fresh appearance early in the 16th century, chiefly among some of the Anabaptist sects. The seventeenth article of the Augustine Confession, 1530, was expressly framed to "condemn the Anabaptists, who maintain that there shall be an end to the punishments of the damned and of the devils." Denk, Hetzer, and Stanislaus Pannionius were the most eminent defenders of Universalism at this period. Later in the century, Samuel Huber, divinity professor at Wittenberg, taught Universalism, it is alleged by Spanheim; and because, says Mosheim, he would not go back to the old methods of teaching, "he was compelled to relinquish his office and go into exile." Early in the 17th century, Ernest Sonner, professor of philosophy at Altorf, published "a theological and philosophical demonstration that the endless punishment of the wicked would argue, not the justice, but the injustice, of God." John William Petersen, at one time court preacher at Lutin, and subsequently superintendent at Lunenburg, adopted and defended Universalism with such zeal that he was cited before the consistory, and, as he could not conscientiously renounce his convictions, was deprived of his office and forced into private life. In his retirement he wrote and published three folio volumes on Universalism, entitled *Musterion Apokatastaseōs Puntōn*, in which he mentions many who had defended that doctrine. The volumes appeared between the years 1700 and 1710. They opened a century of spirited controversy, of which Mosheim says, "The points of theology which had been controverted in the 17th century were destined to excite keener disputes in the 18th, such 'as the eternity of hell torments, and the final restoration of all intelligent beings to order, perfection, and happiness.'" Dietelmair, an opponent of Universalism, wrote on its history about the middle of this century. In the preface to his work he speaks of the "contests which raged vehemently enough within the very bounds of the orthodox Church in the end of the last century and the beginning of the present." Among the defences of Universalism contained in the first volume of Petersen's work was the *Everlasting Gospel*, attributed to Paul Siegvolk, which was but an assumed name of George Klein-Nicolai, deposed for his Universalism as preacher of Friesdorf. He published other works in defence of Universalism, but the most rapid and lasting popularity belonged to the *Everlasting Gospel*, which in forty-five years passed through five editions in Germany. In 1726 John Henry Haug, professor at Strasburg, having procured the assistance of Dr. Ernest Christoph Hochman, Christian Dippel, Count De Marcey, and others, commenced the publication of the *Berleburger Bibel*, an entirely new translation and commentary of the Holy Scriptures. They made themselves familiar with all the writings of the Mystics, and in their great work taught and defended Universalism from the Mystical standpoint. Their work fills eight large folio volumes, the last of which was published in 1742. Strong persecution assailing them, and no printer being willing to risk his office in doing their work, they were compelled to purchase their own type and a small press. When the Church they had established was at last broken up by their enemies, the members fled to America, taking their press with them, and it was set up by Christopher Sower in Germantown, Pa. One of De Marcey's intimate friends was George De Benneville, born of French parents in London in 1703. Before he was twenty years of age he

commenced preaching in France, where he was arrested and condemned to die, but was reprieved on the scaffold by Louis XV. Making his way into Germany, he there preached Universalism several years, and then came to America. In 1727 appeared Ludvig Gerhard's *Complete System of the Everlasting Gospel of the Restoration of All Things, together with the Baseless Opposite Doctrine of Eternal Damnation*. The author was at one time professor of theology in the University of Rostock; and his publication called forth, according to Walch, no less than fourteen volumes in reply. Jung-Stilling, in the latter part of the 18th century, an able defender of Christianity against German rationalism, was an ardent and eminent Universalist. Prof. Tholuck wrote, in 1835, that this doctrine "came particularly into notice through Jung-Stilling, that eminent man who was a particular instrument in the hand of God for keeping up evangelical truth in the latter part of the former century, and at the same time a strong patron to that doctrine." During the present century, Universalism has made rapid progress in Germany. Olshausen says of it that it "has, no doubt, a deep root in noble minds, and is the expression of a heart-felt desire for a perfect harmony of the creation." Dr. Dwight wrote in 1829 "The doctrine of the eternity of future punishment is almost universally rejected." Similar testimony was borne by Prof. Sears in 1834: "The current hypothesis is that in the middle state, intervening between death and the resurrection, the righteous will gradually attain to perfection; and that to all the wicked, whether men or angels, the Gospel will be preached, and that they will ultimately accept it and be restored."

In Switzerland Universalism was advocated in the last century by Marie Huber, whose *World Unmasked* was translated and republished both in England and America. In 1786 Ferdinand Oliver Petitpierre promulgated Universalism in a work entitled *Thoughts on the Divine Goodness*, of which several English and American editions have been published. Lavater, the great physiognomist, and the intimate friend and correspondent of Jung-Stilling, was a Universalist. Later J. H. D. Zschokke advocated Universalism in his *Stunden der Andacht*, the favorite book with the late prince Albert, and after his death translated into English by request of queen Victoria for general circulation among her subjects. In France, in the last century, Rev. Thomas Cuppe wrote in defence of Universalism. Later in the same century, Chais de Sourceol wrote and published in its defence. In the present century the Coquerels—father and sons Athanase and Étienne—have advocated it in the pulpit and from the press. In Scotland Rev. James Purves wrote in defence of the doctrine, and established a Universalist society about 1770; Rev. Neil Douglass founded another about 1800; and within twenty-five years four or five others were started, largely through the instrumentality of Mr. Douglass and his successor, Rev. William Worrall. These societies are either disbanded or merged in the Unitarian churches, which in Scotland are all Universalist in their views of destiny. Prominent among the Scotch Unitarian Universalists was Dr. T. Southwood Smith, who published, in 1816, *Illustrations of the Divine Government*, a book that has passed through several editions. Thomas Erskine, recently deceased, was also an able writer on Universalism. At present there are a few distinctive Universalist churches and a convention in Scotland. In Wales Universalism was preached as early as 1782. In 1783 Rev. Thomas Jones, who had been educated at lady Huntingdon's school, became a Universalist. He subsequently came to America, and after being the successor of Winchester at Philadelphia for about eight years, he removed to Gloucester, Mass., and was the successor of Murray for forty-five years.

In England the Protestants, in drawing up their Forty-two Articles of Religion, in 1552, condemned Universalism. Ten years later, when the convocation

revised the doctrines of the Church, the number of articles was reduced to thirty-nine, omitting, among others, the one condemning Universalism. Since that time Universalism has not been a forbidden doctrine in the Church of England, but has been advocated and defended by some of the most eminent members of its communion—such men as Dr. Henry More, Sir George Stonehouse, Bp. Thomas Newton, Dr. David Hartley, William Whiston, Dr. Thomas Burnet, Revs. Frederick W. Robertson, Charles Kingsley, Stopford Brooke, and canon Farrar, and indirectly by archbishop Tillotson. The Presbyterian Parliament of 1648, which temporarily overthrew Episcopacy, passed a law against all heresies, punishing the persistent holders of some with death, and of others with imprisonment. "That all men shall be saved" was among the heresies punishable in the latter manner. This law was not long operative, for the Independents, headed by Cromwell, soon overthrew the law-makers. Gerard Winstanley published a work in advocacy of Universalism only a few days after the passage of the law, which was soon followed by similar works from his pen. William Earbury fearlessly preached Universalism. Richard Coppin was active in its advocacy, publishing largely in its exposition and defence, and was several times tried for his offence. Samuel Richardson, an eminent Baptist, also wrote strongly in its behalf. Sir Henry Vane (the younger), member of the Parliament dissolved by Cromwell, and in 1636 governor of Massachusetts, was a Universalist. Jeremy White, one of Cromwell's chaplains, preached Universalism, and published a work which has passed through several editions. Jane Lead, a Mystic, was the author of several Universalist books. Henry Brooke, a literary writer, avowed his belief in Universalism in his *Fool of Quality*, and in a poem on the Messiah. William Law, author of the *Serious Call*, declared in his *Letters*, "As for the purification of all human nature, I fully believe it, either in this world or some after-ages." The English literary reviews of the last century contain many notices of works in defence of Universalism.

In 1750 James Rely, who had been a preacher in Whitefield's connection, shocked at the doctrine of reprobation, was by meditation and study led into another scheme of redemption, some of the peculiarities of which may be said to have had their origin with him. Accepting as true the common theory that all men, having sinned in Adam, justly incurred eternal damnation, and that Christ had borne this infinite guilt and punishment in behalf of all who should be saved, Rely was moved to find, if possible, some ground of justice in such a scheme. The divine law explicitly declares that "the soul which sinneth, it shall die," and that the innocent shall not suffer for the guilty. How could a transfer of human sin and penalty to Christ be consistent with that law? How could it be reconciled with equity? The divine sovereignty, without regard to inherent justice in the plan, could not account for it; for the absoluteness that could set justice aside might just as easily, and more mercifully, have gone straight to its aim by remitting instead of transferring sin and its deserts. To say that the sufferings of Christ were merely accepted as satisfaction for human deserts, only reckoned as such, by God's sovereign pleasure, was no adequate explanation, since they were thus only a fictitious, not a real, satisfaction; and, further, any sufferings whatsoever, even those of a man, would have answered just as well as an arbitrary acceptance of the coequal of God. The perfect consistency of God's procedure, its absolute harmony with justice and equity, Rely found, as he claimed, in such a real and thorough union of Christ with the human race as made their acts his, and his theirs. All men, he held, were really in Adam and sinned in him, not by a fictitious imputation, but by actual participation; equally so are all men in the second Adam, "the head of every man," and he is as justly accountable for what they do as is the head in the natural body ac-

countable for the deeds of all the members united to that head. Accordingly Christ, in his corporate capacity, was truly guilty of the offence of the human race, and could be, as he actually was, justly punished for it; and the race, because of this union, really suffered in him all the penalty which he endured, and thus fully satisfied justice. There is no more punishment, therefore, due for sin, nor any further occasion for declaring the demands of the law, except to make men feel their inability to obey, and thus compel them to an exclusive reliance on Christ the head. He has effected a complete and finished justification of the whole world. When man believes this he is freed from the sense of guilt, freed also from all doubt and fear. Until he believes it he is, whether in this world or in another, under the condemnation of unbelief and darkness, the only condemnation now possible to the human race. In illustration and defence of this theory, Rely wrote and published several books, preached zealously in London and vicinity, and gathered a congregation in the metropolis. After his death in 1778, two societies were formed from his congregation; but both have now ceased to exist, as has the society gathered by Winchester about 1789, and the Church founded by David Thom, D.D., in Liverpool in 1825. The Unitarians in England are all believers in Universalism, as are also many of the Congregationalists.

3. In America Universalism is the result of the proclamation of a variety of theories, some of them at a very early date, all resulting in one conclusion—the final holiness of the human race. Sir Henry Vane, as was said above, was a Universalist. It is not known that while in America he made any public avowal of that belief; but the presumption is that he did not stand alone. In July, 1684, Joseph Gatchell, of Marblehead, Mass., was brought before the Suffolk County Court for discoursing "that all men should be saved," and, being convicted, was sentenced "to the pillory and to have his tongue drawn forth and pierced with a hot iron." Dr. George De Benneville, also mentioned above, came to America in 1741, expressly called of God, as he believed, to preach the Gospel in the New World. For more than fifty years he preached in various parts of Pennsylvania, Maryland, Virginia, and the Carolinas. He was not an organizer, but simply a preacher, and quite a voluminous writer, though only a few of his productions were published. For several years he was welcomed to the pulpits of the "Brethren" (Dunkers). It was no doubt at his suggestion that Siegvolk's *Everlasting Gospel* was translated into English, and published by Christopher Sower, printed, probably, on the identical press on which the *Berleburger Bibel* had been struck off. This edition was reviewed by Rev. N. Pomp, a German minister in Philadelphia. Alexander Mack, an eminent preacher among the Dunkers, replied to Pomp, defending Siegvolk's views. This work was never published, but the MS. is still preserved. There was found among Dr. De Benneville's papers, after his death, in 1793, a *Commentary on the Apocalypse*, which was printed in German, at Lebanon, Pa., in 1808. There was also *Universalism in the Episcopal Church*. Rev. Richard Clarke, rector of St. Philip's in Charleston, S. C., from 1754 to 1759, was a pronounced advocate of it; as was Rev. John Tyler, rector of the Church in Norwich, Conn., who wrote a work in its defence, which was published by some one to whom he had loaned his MS., about 1787. Some of the Congregationalists of New England were believers in Universalism; among them Dr. Jonathan Mayhew, minister of the West Church in Boston from 1747 to 1766, who distinctly avowed his belief in it in a published *Thanksgiving Sermon*, Dec. 9, 1762. Dr. Charles Chauncy, minister of the First Church in Boston from 1727 to 1787, issued a pamphlet on the subject in 1782, which was reviewed by Dr. Samuel Mather. In 1784 his larger work *The Salvation of All Men* was published, a second edition following in 1787. Dr. Joseph Huntington, minister in Coventry, Conn., from 1762 to

1794, left a work in favor of Universalism, entitled *Calvinism Improved*, which was published in 1796.

(II.) *Formal*.—In 1770 John Murray (q. v.), who had formerly been a Methodist in Ireland and England, but more recently a convert to the views of James Rely, came to America and commenced the proclamation of Universalism on the Relyan theory. After itinerating a few years in various parts of the country, from Virginia to Massachusetts, he made his home in Gloucester, Mass., where, in 1779, he organized a society of Universalists, under the name of "The Independent Christian Church." With the exception of a few months spent in the army, as chaplain of the Rhode Island Brigade, he ministered to the society in Gloucester, making occasional missionary tours through the country till 1793, when he removed to Boston, where a society had been formed in 1785, and remained there as its pastor till his death, in 1815.

In 1781 Elhanan Winchester, who had been an eminent Baptist clergyman in Philadelphia, became a Universalist, and gathered a Universalist society in that city, which took the name of "Universal Baptists." As a Baptist his views were moderately Calvinistic, if not wholly Arminian, and his Universalism differed in little or nothing from the present so-called evangelical doctrines, except in regard to the duration and design of future punishment and the final restoration of all lost men and angels. Fifty thousand years, which would bring in the great jubilee, was the extreme limit in his theory of the punishment of the most sinful. Mr. Winchester itinerated extensively, as far south as the Carolinas and north to Massachusetts. Like De Benneville, he was for a time welcomed to the pulpits of the Dunkers, who, from their first coming to America in 1719, have been believers in universal restoration, although, in the main, holding it privately. Some of their preachers were bold in its advocacy; and it was proclaimed and defended in several of their published works, notably so by James Bolton, who, in 1793, published a pamphlet at Ephrata, Pa., in which he censures the "Brethren" for not giving greater publicity to it, asserting that "the German Baptists (Dunkers) all believe it." About the year 1785 the Dunkers became alarmed by the preaching of some persons, now unknown, against future punishment, and finally took action that cut off John Ham, one of their preachers of this theory, and his followers from the Church, and forbade the proclamation of Universalism in any form. In 1786 Mr. Winchester went to England, where he preached and published books in defence of his views and established a society. He returned to America in 1795 and died in 1796.

Contemporary with Murray and Winchester was Caleb Rich, of Massachusetts, who gathered a Universalist society in the towns of Warwick and Richmond. Mr. Rich may be said to have anticipated many of the views afterwards more fully elaborated by Hosea Ballou, and probably had great direct influence in forming the opinions of the latter.

In New Jersey several Baptist preachers and their congregations became Universalists. In Pennsylvania there was a congregation of Relyan Universalists, and the "Universal Baptists" before mentioned, in Philadelphia, while societies had been organized in Bucks and Washington counties. Rev. Abel Sarjent, minister in the latter locality, organized Universalist churches on the basis of the doctrine of the divine unity, in opposition to the Trinity, publishing the creed of those churches in the *Free Universal Magazine*, edited by him in 1793-94. Of the existence of these churches the Universalists in the eastern portion of the country were for a long time ignorant. Relyanism made but little progress, Mr. Murray complaining in 1787 that he knew of but one public advocate of Universalism in America who fully sympathized with him in his views. This was the Rev. John Tyler before mentioned.

Rev. Hosea Ballou commenced his career as a Uni-

versalist preacher in 1790. Originally a Calvinistic Baptist, he was a Trinitarian Universalist until 1795, when he avowed his belief in Unitarian views of God and Christ; and in 1805 published his *Treatise on Atonement*, in which he combated the doctrine of vicarious sacrifice, contending that the life and death of Christ were for the reconciling, not of God, but of man, and avowed his belief that the punishment of the sins of mortality was confined to this life, and that if punishment were experienced in the life beyond the grave, it would be for sins committed there. In 1818 he had satisfied himself that there is no sin beyond the grave, and consequently no punishment after death. By 1830 Mr. Ballou's views were quite extensively held in the denomination, and some of the believers in future limited punishment seceded from the Universalist Convention and established the denomination of Restorationists. Although this secession was led by a few eminent men, it was not considered expedient nor in any sense called for by quite as many and as eminent believers in future retribution who remained in the old organization. The position of these latter was that Universalism was not, and never had been, the belief in no future punishment, nor the belief in a brief or long-continued retribution hereafter; but the belief that God would, through Christ, in his own good time, "restore the whole family of mankind to holiness and happiness." As there had never been entire unity of sentiment as to the time when this result would be reached, but had been tolerance of opinion on that as on other differences, they saw no occasion for a division on account of present differences. The "Restorationist Association" existed about eleven years, its last session being held in 1841, at which time the publication of its organ, *The Independent Christian Messenger*, ceased, and it became extinct as a sect. Some of its preachers returned to the fellowship of the Universalist Convention, some affiliated with the Unitarians, and others wholly withdrew from the ministry. Mr. Ballou died in 1852. His work and memory are held in reverent esteem by the entire denomination, and by none more ardently than by the many who do not accept his theory of sin and retribution. See BALLOU.

(III.) *Sources of History*.—Döderlein, *Institutio Theolog. Christianæ* (1787), ii, 199, 202; Berti, *Breviarium Hist. Eccl.* cent. viii-xii, c. 3; Priestley, *Hist. of the Christian Church*, per. xviii, lect. ix, p. 136, 137; Assemani, *Bibliotheca Orientalis*, III, i, 323, 324; Du Pin, *Eccl. Hist.* vol. xii, ch. viii, p. 113, 115; Mosheim, *Eccl. Hist.* cent. xv, pt. ii, ch. v; cent. xvi, sec. iii, pt. ii, ch. i; cent. xviii, sec. 20; Ballou, *Ancient History of Universalism* (2d ed. 1872); Beecher, *Scriptural Doctrine of Retribution*; Dunster, *Translation of Drzezlin's Considerations on Eternity* (1710); Davidson, *Translation of Gieseler's Compendium of Ecclesiastical History* (1849), i, 320, 321; Augustini *Enchiridion ad Laurentium*, c. cxii; Olshausen, *Comm. on Matt.* xii, 31, 32; Law, *Collection of Letters* (1762), letter xii, p. 172; *Account of the Berleburg Bible*, in *The Universalist* (Boston, Nov. 8, 1878); Whittemore, *Modern History of Universalism* (ibid. 1860); Dalcho, *Hist. of the Prot. Ep. Ch. in South Carolina* (1820); Eddy, *Papers on Universalist Conventions and Creeds*, in *Universalist Quarterly*, 1874-80; Thomas, *A Century of Universalism*; Eddy, *M.S. History of Universalism in Gloucester, Mass.*, 1774-1874; Whittemore, *Memoir of Rev. Hosea Ballou* (4 vols.); *Life of Rev. Nathaniel Stacy* (autobiography); Smith, *Historical Sketches of Universalism in the State of New York*.

II. *Organization and Government*.—In the early history of Universalism in America, the first form of organization was simply into legal societies; afterwards into churches within the societies. The only exception to this was, commencing with 1790, in Pennsylvania, where the Church became both the legal organization and the religious body of communicants. The Universalists in Gloucester, Mass., the first to organize, banded

themselves together by an agreement of association in 1779, which they changed to a charter of compact in 1785, and were incorporated in 1792. Members of the society and their property being seized for payment of taxes to the first parish in Gloucester, the Universalists entered suits in the courts in 1783 to establish their right to exemption from taxation for the support of any other than their own minister. By reason of various delays and appeals the case did not reach a final decision till 1786, when the rights of the Universalists were established. Meanwhile congregations and societies gathered in other parts of Massachusetts and in Rhode Island, desiring counsel and advice, united with the society in Gloucester in holding an association at Oxford, Mass., in 1785. The charter of compact, which was the basis of organization in Gloucester, was taken to this association, and, on being slightly amended, was recommended to the societies represented, who were also requested to take on themselves the name of "Independent Christian Society, commonly called Universalists;" to keep up a correspondence with each other; and to meet annually, by delegates, for conference. The legal rights secured the following year by the decision of the Gloucester suit seem to have accomplished all that the association aimed at, and no session was held after 1787. In 1790 the congregations organized in Philadelphia by Murray and Winchester became one, and, feeling the necessity of a more perfect organization of the believers at large, issued a call for a convention, which was held in May of that year in Philadelphia, at which time a profession of faith and platform of government for the churches was drawn up and recommended to all the churches for their adoption. Five churches were represented in this convention, and seven preachers were in attendance. The annual meetings of this convention were all held in Philadelphia; but the distance from that city to New England was so great, and the inconveniences of making the journey were then so numerous, that in 1792 the Universalists of Boston asked and obtained permission to organize another convention for the Eastern States. This convention held its first session at Oxford, Mass., in 1793, and adopted, the following year, the Philadelphia profession and platform, and recommended them to all their churches. In 1802, churches and associations of churches having increased, and a diversity of speculative opinion prevailing, the New England convention deemed it best to unite, if possible, on a profession of faith, and to establish well-defined rules of government, ordination, fellowship, and discipline for the use of that body. This was accomplished in 1803, by the adoption at the session held in Winchester, N. H., of such definite rules, and of the following Profession of Belief:

"Art. 1. We believe that the Holy Scriptures of the Old and New Testaments contain a revelation of the character of God, and of the duty, interest, and final destination of mankind.

"Art. 2. We believe that there is one God, whose nature is love, revealed in one Lord Jesus Christ, by one Holy Spirit of Grace, who will finally restore the whole family of mankind to holiness and happiness.

"Art. 3. We believe that holiness and true happiness are inseparably connected, and that believers ought to be careful to maintain order and practice good works; for these things are good and profitable unto men."

This has remained unchanged to the present time. The Philadelphia convention ceased to exist in 1809; but the New England convention, though with changes both in form of government and in name, has continued to the present, and is now "the Universalist General Convention." It is composed of clerical and lay delegates from the state conventions, and from the parishes and churches in states and territories where no state organization exists. Every parish, to be counted in the basis of representation, must maintain its legal existence and support public worship; and every minister must be actually engaged in the work of the ministry unless disabled by age or sickness. Preachers and parishes must assent to the Profession of Belief; and no parish

can settle a minister not in fellowship, nor can a minister settle over a parish not in fellowship. The convention establishes uniform rules for fellowship, ordination, and discipline, and is the final court of appeal in all cases of difficulty between conventions, or between conventions and parishes, or ministers, not otherwise settled by subordinate bodies; but it has no power to interfere with the affairs of a parish in the settlement or dismissal of a minister in fellowship; nor can it, under any circumstances, do more than to withdraw fellowship from those who are convicted of offences. State conventions are composed of ministers in fellowship, and of delegates from parishes and churches. They can make any regulations and adopt any policy not in conflict with the constitution and laws of the General Convention; provide for the enforcement of the rules on fellowship, ordination, and discipline; and raise and disburse funds for local missionary work. In several states associations still exist composed of counties or of neighboring parishes extending over larger territory; but, under the present laws, these have no ecclesiastical authority, and are only a medium of local conference and encouragement in religious growth. Parishes are local legal organizations for the purpose of holding property and conducting the business necessary to the maintenance of religious worship. Aside from a required assent to the Profession of Faith, and their obtaining the fellowship of the State Convention, or, in localities where no such organization exists, the direct fellowship of the General Convention, all parishes are Congregational in the management of their affairs, and are subject only to the civil laws of the state or territory where they are located. Churches, with the exception of those in Pennsylvania, as before noted, are the religious organizations created within the legal parish. In them the ordinances of the Gospel are administered; and the purpose of their existence is the union of believers and the quickening and increase of their religious life, obedient to the command of the Lord and his apostles. Sunday-schools are also established in the parishes, and are, while independent in the management of their affairs, chiefly watched over and directed by the Church.

III. *Doctrines.*—The Winchester Profession (given above) is regarded as a sufficiently full and explicit statement of the belief required in order to fellowship in the Universalist Church, and as affording the greatest latitude in differences on all minor points. But a more particular statement of the general belief of Universalists of the present day may be briefly set forth as embracing the following particulars:

1. *Of God.*—That he is infinite in all his perfections, the Creator and Preserver of all worlds, and of all the beings that inhabit them; revealed to man in all that nature teaches of wisdom and design; in conscience, which discriminates between right and wrong; and in the Holy Scriptures, and especially in his full perfection in Jesus Christ. That it is fundamental in the revelation through Christ that God is the Father of the spirits of all flesh, who brought men into being with a fixed and loving purpose that their existence should prove a final and endless blessing to them; and that while he is strictly just in his dealings with all, he never loses sight of his great purpose in their creation; and that, without violation of their moral freedom, he will, through the gracious influences of the Gospel, subdue and win all souls to holiness. That his government, laws, and purpose are the same in all worlds, death in no way affecting his attitude towards men; but that he is to be found wherever sought, and will always accept and forgive all who call upon him in sincerity and truth.

2. *Of Christ.*—That he is not God, but God's highest and only perfect representative, sent by the Father not for the purpose of affecting God's attitude to man, but of reconciling man to God; that he lived, taught, wrought miracles, suffered, died, and was raised from the dead and ascended into heaven, according to the Scriptures; that he alone can lead men to the Father, and is the

only perfect way, truth, and life for man; that he is Lord both of the dead and the living, able to save to the uttermost, i. e. in all places and under all circumstances, all who come to God by him; and that he must reign till every creature in heaven and in earth, and under the earth, confesses him Lord, to the glory of God the Father, and God is all in all.

3. *Of the Holy Spirit.*—That while it is not now to be expected that God's Spirit will, as in apostolic days, be manifest in conferring miraculous power on believers, the promise of its assistance is still fulfilled in the souls of believers, to whom the Spirit comes as the Comforter, and, as testified to by the apostle, helps their infirmities, inspires their prayers, and pours into their souls the peace of God which passeth all understanding.

4. *Of Man.*—That "a man is the image and glory of God;" and that whatever tendencies may be inherited, or by whatever sins man may defile himself, the divine image is never wholly destroyed, but that under the care of the appointed refiner and purifier, the stains, defilement, and dross can all be removed, and the divine likeness be manifest; that the human will, which consents to sin, can also determine on holiness, and use all the means appointed for its attainment.

5. *Of Sin.*—That it is never transferable, but consists in personal disobedience to the divine law, and is the greatest evil in the universe; that no necessity for it is laid on any mortal, yet that it is incidental to the career of a being who can be drawn away of his own lusts and enticed, and who is created with the ability of choosing good and evil.

6. *Of Rewards and Punishments.*—That obedience to the divine law, the attainment of holiness, piety, and the Christian graces, are their own exceeding great reward, and are manifest in the soul's consciousness of nearness to God and of approval by him; that punishment is in like manner the natural fruit of sin, alienation, a cloud between us and God, the burden and sorrow of an unreconciliation and enmity. That while the reward is intended to keep us in love with obedience, the punishment is designed to make us feel that it is an evil and bitter thing to sin against God, and to incline us to repent and turn to our peace, possible only in holiness.

7. *Of Conversion.*—That conversion, regeneration, the new birth, or whatever else the turning from sin to holiness may be called, is the change effected in the will and heart of man, when, wrought upon by the gracious influences of the Gospel, he turns from his sinful loves and ways, and, drawn by the Spirit of God, seeks to consecrate all his powers to holiness and duty; that while the commencement of such a change must of necessity be instantaneous, it is only by patient continuance in well-doing that it is completed.

8. *Of Salvation.*—That salvation is deliverance from the practice and love of sin, the bringing of the soul out of its bondage of error and evil into the liberty of obedience to the truth, and love to God and man; that Christ saves when he turns men away from iniquity, and that his saving work will not be completed till God's law is written in and obeyed by every heart.

9. *Of Forgiveness.*—That the forgiveness which God promises to all who confess and forsake their sins is the covering of past offences from sight, and bringing them no more to remembrance against the penitent; and that this is the forgiveness which Jesus teaches us that we ought to exercise towards all who are penitent for any wrong which they have done to us.

10. *Of Immortality.*—That God has implanted in all men "the power of an endless life;" and that what is called the resurrection is not simply the fitting of man with a spiritual body, but also his rising up into a progressive life. That death effects no moral change, but that in many respects the entrance on the life immortal must work a change on man's ignorance and error; that all sensual temptations, peculiar to a life in flesh and blood, will be absent from the world of spirits; and

that whatever discipline any may need for past offences, or to overcome the effects of sin on the soul, will be administered in love, and will be efficacious for their salvation.

IV. *Usages and Worship.*—The usages of the Universalist churches do not differ much from those of other denominations that conduct their parish affairs on Independent or Congregational principles. The following are perhaps peculiar:

1. *Ordination, Transfer, and Discipline.*—For the ordination of a minister, the rule is for the parish desiring that ordination may be conferred to make formal application to the convention Committee on Fellowship, Ordination, and Discipline, who, if there is no ground for objection, give permission to the parish to call a council, consisting of ten ordained ministers and lay delegates from ten parishes, who, on assembling, organize by the appointment of a moderator and clerk, and proceed to an examination of the fitness and qualifications of the candidate. If these are found satisfactory, the request for ordination is granted, and the parish are authorized to hold the ordination service at their convenience, which being done, the clerk of the council forwards to the convention committee a certified statement of the doings of the council, and of the fact that ordination has been conferred, whereupon the committee furnishes the new minister with a certificate of his ordination. On removing from the jurisdiction of one state convention to another jurisdiction, it is a minister's duty to request of the convention committee in the state where he has been residing a letter of transfer, which, if he is in good standing, is granted, and is of the nature of a recommendation to the convention into whose bounds he is removing. This transfer it is his duty to present to the committee of that convention, who thereupon grant him its fellowship. Should a minister neglect to seek such transfer, he is subject to discipline by the convention from which he removed, and will in time be disfellowshipped by having his name dropped from the roll of ministers. A minister disfellowshipped for this or any other cause must, if he desires to be restored to fellowship, seek his restoration from the convention which punished his offence; but if denied restoration there, he may appeal to the General Convention.

2. *The Dedication of Children.*—When John Murray began to preach in America, he was frequently importuned by parents to baptize their children; but, believing that adults were the only proper subjects for Christian baptism, he refused. As, however, he regarded children as the gift of God and members of the body of Christ, he felt that some ceremonial recognition of this fact would be appropriate and salutary, and originated a rite which he called the "dedication of children." Either in the church or elsewhere, as was most convenient, parents brought their children to him, who, if infants, he took in his arms; if older children, they stood by his side, and he, placing his hand on the child's head and pronouncing its name, declared it gratefully received as God's gift, and solemnly dedicated to his loving service, pronouncing on it the blessing which Moses was directed to command Aaron to pronounce on the children of Israel: "The Lord bless thee and keep thee. The Lord make his face shine upon thee, and be gracious unto thee. The Lord lift up his countenance upon thee, and give thee peace." This service is now very generally observed among Universalists, the second Sunday in June being set apart for it, and designated "Children's Sunday." It is customary on this occasion to decorate the churches with flowers; and as no very general objection to infant baptism now exists among Universalists, baptism is in most cases a part of the ceremonial.

3. *Christmas, Easter, and Memorial.*—Christmas has always been a day of special notice with Universalists, and of late Easter is appropriately celebrated. A Sunday in October is set apart in most Universalist churches as Memorial Sunday, the services being made

appropriate to a loving remembrance of the members of the Church and congregation who have died during the year. On this day the churches are decorated with fall flowers and leaves.

4. *Public Worship.*—The public worship of God is conducted by Universalists in much the same manner as by Protestants generally. It consists of reading of the Scriptures, prayers, singing, and sermon. A few churches make use of a liturgy, of which several have been prepared, but most congregations have an extempore service. Baptism and the Lord's supper are observed in all Universalist churches. The mode of the former is left to the choice of the candidate. The invitation to the latter is extended to all who may feel it to be either a duty or a privilege thus to remember the Lord Jesus Christ. Sunday-schools and conference and prayer meetings are regularly held in most of the churches.

V. *Statistics.*—The Universalists have one General Convention and twenty-four subordinate conventions, the latter being located in Alabama, Connecticut, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Vermont, Wisconsin, Canada, and Scotland. Parish organizations exist in California, Colorado, Dakota, District of Columbia, Florida, Idaho, Louisiana, Maryland, Mississippi, Nebraska, North and South Carolina, Tennessee, Texas, Virginia, and West Virginia. The total number of parishes is 959, with which 42,500 families are connected; 733 churches, with a membership of 37,825; Sunday-schools, 699; teachers and pupils, 59,633; church edifices, 784; total value of parish property above indebtedness, \$6,417,757; ministers, 724; licensed lay preachers, 9.

The General Convention is incorporated and empowered to "hold real and personal estate to the value of \$500,000, to be devoted exclusively to the diffusion of Christian knowledge by means of missionaries, publications, and other agencies." The "Murray Centenary Fund," raised in 1870, and named in honor of Rev. John Murray, the centennial anniversary of whose coming to America was then observed, amounted, at the session of the convention in 1879, to \$121,794.54. A "Ministerial Relief Fund," founded by the bequest of the late John G. Gunn, amounted at the same time to \$8077.94. The "Theological Scholarship Fund," consisting of returned scholarship loans, amounted to \$5439.32. The treasurer's receipts from all sources, in 1879, were \$19,540.74. The income of the Murray Centenary Fund is designed to aid in the education of the clergy, the circulation of denominational literature, and in church extension. About forty theological scholarships are continued in force each year, aggregating nearly \$6000. These are expected to be repaid, without interest, at the earliest convenience of the beneficiaries after graduation and settlement, and the amounts thus returned are invested, the income to be appropriated to future loans.

Several of the state conventions are incorporated, and in a few of them permanent funds are established. Either as held by the conventions directly, or by organizations existing in their jurisdiction, the aggregate amount of such funds, the incomes of which are devoted to missionary work, Sunday-school aid, and ministerial relief, is \$89,578.65.

The "Woman's Centenary Association," now incorporated, was organized in 1869 to assist in raising the Murray Centenary Fund, to which it contributed \$35,000. In addition to this, it has raised about \$120,000, with which it has helped colleges and schools, given relief to aged and infirm ministers and ministers' widows, started a Memorial Chapel at Good Luck, N. J., where Murray preached his first sermon in America, and supported a missionary in Scotland. It has also put in circulation 3,000,000 pages of tracts, besides a large number of denominational books and papers.

The "Universalist Historical Society" was organized in 1834 for the collection and preservation of facts pertaining to the history and condition of Universalism, together with books and papers having reference to the same subject. It has a library of over 2000 volumes, now at Tufts College, College Hill, Mass. The collection embraces a complete set of the writings of the Greek and Latin fathers, many French and German works, and a nearly complete line of modern books both for and against the doctrine of Universalism.

VI. *Institutions.*—1. *Colleges, Theological Schools, and Academies.*—There are four colleges, two theological schools, and six academies under the auspices and patronage of Universalists. Tufts College, located on College Hill, Middlesex Co., Mass., was incorporated in 1852, and opened for students in 1855. Its assets are about \$900,000; number of professors and teachers, 12; students, 62. Lombard University, located at Galesburg, Ill., was incorporated in 1852, and opened for students in 1855. Assets, \$175,000; professors and teachers, 6; students, 58. St. Lawrence University, at Canton, St. Lawrence Co., N. Y., was incorporated in 1856; assets, \$234,350; professors and teachers, 7; students, 44. Buchtel College, Akron, O., was incorporated in 1871; assets, \$250,000; professors and teachers, 10; students, 108. St. Lawrence Theological School, a department of St. Lawrence University, was opened in 1857. It has 3 professors and 24 students. Tufts Divinity School, a department of Tufts College, was opened in 1869, and has 4 professors and 32 students. Clinton Liberal Institute, established at Clinton, Oneida Co., N. Y., in 1831, and recently removed to Fort Plain, N. Y., has \$100,000 assets, 10 teachers, and 100 students. Westbrook Seminary, Stevens Plains, Me., was opened for students in 1834. Its assets are \$100,000; number of teachers, 7; of students, 80. Green Mountain Perkins Academy, at South Woodstock, Vt., was opened in 1848; assets, \$15,000; teachers, 8; students, 55. Goddard Seminary, Barre, Vt., was opened in 1863; assets, \$60,000; teachers, 7; students, 76. Dean Academy, at Franklin, Mass., was incorporated in 1865; assets, \$240,000; teachers, 8; students, 70. Mitchell Seminary, at Mitchellville, Ia., was opened in 1872; assets, \$25,000; teachers, 9; students, 95. Total amount invested by the twelve educational institutions, \$2,099,350.

2. *Publishing House.*—The Universalist Publishing House, located at Boston, Mass., was incorporated in 1872. Its trustees are elected by the state conventions of Maine, New Hampshire, Vermont, Massachusetts, and Rhode Island. The net assets of the house, consisting of periodicals, books, plates, etc., are about \$31,000. The number of volumes which it has published, and of which it owns the title and copyright, is one hundred and thirty. It also issues five of the twelve periodicals published by the denomination.

3. *Missions.*—Missionary work is performed in the bounds of the several state conventions; in some directly by agents or superintendents in the employ of the conventions, in others by means of local associations, and in still others by the voluntary labors of the ministry. The only foreign mission is the one sustained by the Woman's Centenary Association in Scotland.

VII. *Literature.*—American Universalist literature dates from the publication of a translation of Siegvolk's *Everlasting Gospel* in Pennsylvania in 1753. William Pitt Smith, M.D., of New York, published a small book entitled *The Universalist* in 1787. Joseph Young, M.D., also of New York, wrote and published *Calvinism and Universalism Contrasted* in 1793. Rev. Elhanan Winchester's *Dialogues on Universal Restoration*, published in London in 1788, were republished in Philadelphia in 1791. A *Treatise on Atonement*, by Rev. Hosea Ballou, was published in 1805. Since that time the Universalist press has issued hundreds of volumes. Some of the more prominent in the various departments of denominational literature are,

i. In *Polemics*: Smith, *On Divine Government*; Ballou, *Inquiries into the Scriptural Import of the Words Sheol, Hades, Tartarus, and Gehenna, and the Words Satan and Devil*; *Discussion between Ezra Stiles Ely, D.D., and Rev. Abel C. Thomas*; *Debate between Rev. David Holmes and Rev. J. M. Austin*; Rogers, *Pro and Con of Universalism*; Harrison, *Aion-Aionios*; *Discussion between Rev. E. Manford and Rev. J. S. Sweeney*; Thayer, *Origin and History of the Doctrine of Endless Punishment*; Miner, *The Old Forts Taken*; Sawyer, *Endless Punishment in the Very Words of its Advocates*.

ii. *Doctrinal and Expository*: Ballou, *Lecture Sermons and Select Sermons*; Whittemore, *Notes on the Parables*; Cobb, *Compend of Christian Divinity*; Thayer, *The Theology of Universalism*; Williamson, *Rudiments of Theological Science and Philosophy of Universalism*; Steere, *Footprints Heavenward*; Mayo, *The Balance, or Moral Arguments for Universalism*; Brooks, *Universalism in Life and Doctrine*; *The Latest Word of Universalism*, thirteen essays by thirteen clergymen.

iii. *Commentaries*: Mauley, *Biblical Review* (5 vols. on the Old Test.); Cobb, *Explanatory Notes and Practical Observations on the New Test.*; Paige, *Commentary on the New Test.* (except the book of Revelation), 6 vols.; Whittemore, *Commentary on the Revelation of St. John*.

iv. *Works in Defence of Christianity*: Winchester, *Reply to Paine's Age of Reason*; Ballou, *Letters in Defence of Revelation*; Pickering, *Lectures on Divine Revelation*; Smith, *Causes of Infidelity Removed*; Thayer, *Christianity against Infidelity*; Williamson, *An Argument for Christianity and Sermons for the Times and People*.

v. *Practical Religion and Consolation*: Chapin, *Discourses on the Lord's Prayer, Lessons of Faith and Life, Hours of Communion, The Crown of Thorns*; Adams, *The Universalism of the Lord's Prayer*; Bacon, *The Pastor's Bequest* (sermons); Ballou, *Counsel and Encouragement* (discourses on the conduct of life); Thomas, *The Gospel Liturgy* (a prayer-book for churches and families); Hanson, *Manna* (a book of daily worship); Quimby, *Heaven our House* (a comfort to all who mourn); Thayer, *Over the River* (a book of consolation for the sick, the dying, and the bereaved).

vi. *History and Biography*: Ballou, *Ancient History of Universalism from the Time of the Apostles to the Reformation*; Whittemore, *Modern History of Universalism from the Time of the Reformation*; Thomas, *A Century of Universalism in Philadelphia and New York*; Smith, *Historical Sketches of Universalism in the State of New York*; *Life of Rev. John Murray*, commenced by himself and completed by his wife; Stone, *Biography of Rev. Elhanan Winchester*; Rogers, *Memoiranda*; *Memoir* (autobiography) of Rev. Nathaniel Stacey; *Memoirs of Rev. Hosea Ballou*, by Maturin M. Ballou (1 vol.), and by Whittemore (4 vols.); Sawyer, *Memoir of Rev. Stephen R. Smith*; *Autobiography of Rev. Abel C. Thomas*; Cook [T. D.], *Memoir of Rev. James M. Cook*; Bacon [Mrs. E. A.], *Memoir of Rev. Henry Bacon*; Adams, *Memoir of Rev. John Moore*; Gillette and Grosh, *Life of Rev. E. M. Wooley*; Adams, *Memoir of Thomas Whittemore, D.D.*

vii. *Periodicals*: The first Universalist periodical was probably that started by Rev. Elhanan Winchester, in London, England, in 1787, entitled *The Philadelphia Magazine*. It was continued several years by Rev. William Vidler, and finally merged in the *Monthly Repository*. The first American Universalist periodical was *The Free Universalist Magazine*, published in New York and Baltimore by Rev. Abel Sarjent (1793-94). Rev. John Murray's friends published in Boston two volumes of a small magazine called *The Berean*, commenced in 1802. Several others followed, and from first to last a great many have been put before the public.

The periodical publications at present are the following: Weekly papers, seven, viz. *The Christian Leader* (successor to the *Universalist Magazine*, started in Bos-

ton in 1819, and the *Utica Magazine*, commenced at Utica, N. Y., in 1827), published by the Universalist Publishing House, Boston, G. H. Emerson, D.D., editor; the *Star in the West*, established in 1827, published at Cincinnati, O., J. S. Cantwell, D.D., editor; the *Gospel Banner*, started in 1836, published at Augusta, Me., G. W. Quimby, D.D., editor; the *New Covenant*, commenced in 1847, published at Chicago, Ill., edited by J. W. Hanson, D.D.; the *New Religion*, published at Norway, Me., Rev. J. A. Seitz editor; the *Atlanta Universalist*, at Atlanta, Ga., Rev. W. C. Bowman editor; and *The Myrtle*, an illustrated Sunday-school paper, issued by the Universalist Publishing House, Mrs. E. M. Bruce editor. There are two papers published once in two weeks—the *Universalist Herald*, at Natasulga, Ala., edited by Rev. John C. Burrus; and the *Guiding Star*, an illustrated Sunday-school paper, at Cincinnati, O., Mrs. Caroline M. Soule editor. The *Sunday-school Helper*, devoted to Sabbath-school teaching, is published monthly by the Universalist Publishing House, edited by Rev. G. L. Demarest. *Manford's Magazine*, commenced in 1857, is published monthly at Chicago, Ill., Rev. E. Manford and Mrs. H. B. Manford editors. The *Universalist Quarterly*, commenced in 1844, is issued in January, April, July, and October by the Universalist Publishing House, edited by T. B. Thayer, D.D. The *Universalist Register*, a statistical year-book, has been issued regularly since 1836; published by the Universalist Publishing House, and edited by Mrs. C. L. F. Skinner. (R. E.)

**Universality of GRACE**, a doctrine introduced into the French Reformed theology, under the influence of John Cameron, in the early part of the 17th century, and advocated by Amyraldus (Amyraut), Placeus, and Pajon. Cameron himself taught the imputation of Christ's passive obedience alone, and advocated the hypothetic universalism of divine grace, which was more fully developed by Amyraut. "The peculiarity of Amyraldism," says Schweizer, "is in the combination of real particularism with a merely ideal universalism." See Hagenbach, *Hist. of Doct.* ii, 180, 275. See ATONEMENT.

**Universals**, a term used in philosophical language, and divided into three classes, viz.:

1. *Metaphysical*, or "universalia ante rem," denoting those archetypal forms according to which all things were created. As existing in the divine mind, and furnishing the patterns of the divine working, these may be said to correspond with the *ideas* of Plato.

2. *Physical*, or "universalia in re," by which are meant certain common natures which, one in themselves, are diffused over or shared in by many—as *rationality* in men.

3. *Logical*, or "universalia post rem," denoting general notions framed by the human intellect, and predicated of many things on the ground of their possessing common properties—as *tree*, which may be predicated of the oak, maple, birch, willow, etc.

In ancient philosophy the universals were called *predicables*, and were arranged in five classes, *genus, species, differentia, proprium*, and *accidens*.

In the system of Aquinas universals are thus treated: 1. *A parte mentis*, or *a parte intellectus*, involve the theory that universals are mental only—subjective. 2. *A parte rei* involve the theory that universals correspond with objective things. See Krauth and Fleming, *Vocab. of Phil. Science*, s. v.

**Universe**, as defined by Dr. Porter (*Human Intellect*, p. 646), is the collective whole, the totality of being as a unit; the world, in its philosophical or universal sense. For its origin, see CREATION; WORLD.

**University**, a universal school; an assembly of students of all countries, students in every branch of learning, in one general society, having their own seal and place of business. Camden says the term was generally used in the reign of Henry III (of England). Dur-

ister of the Independent Congregation, St. Heliers, Jersey. In both spheres of labor he adorned his profession by the consistency of his life, and benefited his people by the earnestness of his preaching. Being eminently fitted by his attainments and predilections for educational work, he was, in 1848, appointed by the Congregationalists principal of the Training Institution, first established in Liverpool Street, and afterwards removed to Homerton College. In these two places, with quiet industry, unflagging zeal, conscientious attachment to Congregational principles, and fervent devotion to the Church, he labored until 1875, when failing health obliged him to relinquish his favorite employment. Numerous works useful for elementary schools proceeded from his pen; also an able letter on *Education the Work of the People*. Dr. Unwin was remarkable for his conscientiousness, integrity, his vigorous mind, accurate scholarship, firm purpose, and domestic affections. He died in 1877. See *Evangelical Magazine*, April, 1877, p. 223.

**Unwritten Word.** "That authority to which the Romish Church could lay no claim from the purity of its members it endeavored to support during the Dark Ages by its arrogant pretensions. The Scriptures, even in the Latin version, had long become a sealed book to the people; and the Roman see, in proportion as it extended its supremacy, discouraged or proscribed the use of such vernacular versions as existed. This it did, not lest the ignorant and half-informed should mistake the sense of Scripture, nor lest the presumptuous and the perverse should deduce new errors in doctrine, and more fatal consequences in practice, from its distorted language, but in the secret and sure consciousness that what was now taught as Christianity was not to be found in the written Word of God. In maintenance of the dominant system, tradition, or the unwritten Word, was set up. This had been the artifice of some of the earliest heretics, who, when they were charged with holding doctrines not according to Scripture, affirmed that some things had been revealed which were not committed to writing, but were orally transmitted down. The Pharisees before them pleaded the same supposititious authority for the formalities which they added to the law, and by which they sometimes superseded it, 'making the Word of God of none effect,' as our Saviour himself reproached them. Upon this ground the Romish clergy justified all the devices of man's imagination with which they had corrupted the ritual and the faith of the Western Church" (Southey, *Book of the Church*). See TRADITION.

**Unxia**, a surname of *Juno* in Roman mythology, was the goddess of anointing. The young women in Rome are said to have anointed the doors of their future dwellings with salve before entering them, in order that nothing evil should enter their house. From this, *Juno*, the directress of marriages, received the above name.

**Unzer**, JOHANN AUGUST, a German physician, born April 29, 1727, and died April 2, 1799, was distinguished by his works on physiological and psychological subjects, among which may be mentioned, *A New Doctrine concerning the Movements of the Soul and the Imagination*:—*Thoughts on Sleep and Dreams*:—*On the Sensitive Faculties of Animated Bodies*:—*The Physiology of Animated Nature*:—*and Physiological Researches* (1727–99). See Hoefer, *Nouv. Biog. Générale*, a. v.

**Upanishad** (from *upa*, "beneath" or "near;" *ni*, "in;" and *śad*, "to sit") is the name of those Sanscrit works belonging to the Vedic literature which contain the mystical doctrine of the Hindûs on the nature of a Supreme Being, its relation to the human soul, and the process of creation. The object of the Upanishads is to impress the mind with a belief in one Supreme Spirit; to show that this Supreme Spirit is the creator of the world; that the world has no reality if thought of besides **Brahman**; and that the human soul is identical in

nature with that same Spirit whence it emanates. They are looked upon as inspired writings. See Müller, *Hist. of Anc. Sanscrit Lit.*; Muir, *Original Sanscrit Texts*.

**Upfold**, GEORGE, M.D., D.D., LL.D., a Protestant Episcopal clergyman, was born at Shemley Green, near Guilford, England, May 7, 1796. He came to America in 1802, and settled at Albany, N. Y. In 1814 he graduated at Union College, Schenectady. In 1816 he graduated in medicine in New York, and commenced practice in Albany soon after. He soon, however, entered upon the study of theology, and was ordained minister in 1818. He was minister at Lansingburg, N. Y., from 1818 to 1820; rector of St. Luke's, New York city, from 1820 to 1828, and a portion of this time (1821–25) assistant minister of Trinity Church; rector of St. Thomas's Church, New York city, from 1828 to 1831; rector of Trinity Church, Pittsburgh, Pa., from 1832 to 1850; and was consecrated bishop of Indiana in 1849. He died at Indianapolis, Aug. 26, 1872.

**Upham, Charles Wentworth**, an American author and Unitarian minister, was born in St. John's, N. B., May 4, 1802. He graduated at Harvard College in 1821, and at the Cambridge Divinity School in 1824, and was colleague of Dr. Prince, pastor of the First Unitarian Church in Salem, from 1824 to 1844. He then left the profession on account of bronchial weakness, and engaged in various pursuits. He edited the *Christian Register*, travelled as agent of the Massachusetts Board of Education, was member of the Massachusetts House of Representatives in 1849, of the State Senate from 1850 to 1851, was mayor of Salem in 1852, member of the National Congress from the Sixth District from 1854 to 1855, State senator in 1858, and representative from 1859 to 1860. He died at Salem, June 15, 1875. He wrote, *Letters on the Logos* (1828):—*Prophecy as an Evidence of Christianity* (1835):—*Lectures on Witchcraft, comprising a History of the Salem Delusion of 1692* (1831; enlarged ed. 1867, 2 vols. 8vo.):—*Life of Sir Henry Vane* (in Sparks's *Amer. Biog.* 1835):—*Life of John C. Fremont* (1856):—*Memoirs of Francis Peabody* (1869):—*Life of Timothy Pickering* (1867–72).

**Upham, Thomas Cogswell**, D.D., an American divine and author, was born at Deerfield, N. H., Jan. 30, 1799. He graduated at Dartmouth College in 1818, and at Andover Theological Seminary in 1821, when he became assistant teacher of Hebrew in the seminary, and translated Jahn's *Biblical Archaeology*. In 1823 he became associate pastor of the Congregational Church in Rochester, N. H., and in 1825 professor of mental and moral philosophy in Bowdoin College, in which position he remained until 1867. He died in New York, April 2, 1872. Among his numerous works may be mentioned, *Manual of Peace* (1830):—*Elements of Mental Philosophy* (1839, 2 vols.; abridged ed. 1864):—*Outlines of Disordered Mental Action* (1840):—*Life and Religious Experience of Madame Guyon* (1847):—*Life of Faith* (1848):—*Principles of the Interior or Hidden Life* (ed.):—*Philosophical and Practical Treatise on the Will* (1850):—*Treatise on the Divine Union* (1851):—*Religious Maxims* (1854):—*Life of Madame Catherine Adorna* (1856):—*Letters, Aesthetic, Social, and Moral, written from Europe, Egypt, and Palestine* (1857):—*Method of Prayer* (1859):—also *The Absolute Religion* (published posthumously in 1872).

**Upham, William D.**, a Baptist minister, was born at Weathersfield, Vt., Feb. 13, 1810. He developed early in life a strong love for literary pursuits, and at the age of eighteen he determined to devote himself to the study of law. With this object in view, he entered Brown University in the autumn of 1831. He seems to have imbibed sceptical views, and with that conceit which not unfrequently accompanies pride of intellect in young men in a course of study, he regarded Christianity as, on the whole, hardly worthy of his notice. While engaged in teaching at Dedham, Mass., the winter succeeding his entrance into college, the Spirit of God ar-

rested his attention, and, after a severe struggle, he accepted Christ as his Saviour. By his conversion, all his life-plans were changed, and he resolved to devote himself to the service of the Lord. He became a member of the First Baptist Church in Providence, R. I., in the fall of 1832, and the Church gave him its approval in his purpose to enter the Christian ministry. Want of means compelled him to leave college at the close of his second year, and he spent the next three years in teaching in Wickford, R. I. Here he labored not only in his special vocation as a teacher, but as a Christian, and the existence of the Church in Wickford is largely owing to his toils and sacrifices. He removed to Ludlow, Vt., in 1836, and was for a time principal of the Black River Academy. He was ordained to the Gospel ministry in Ludlow in November, 1837, and in December of the following year he became pastor of the Second Baptist Church in Townshend, Vt. He secured from the outset the affections of his people, and his labors were greatly blessed. A few years only of service in the cause he so much loved were allotted to him. Four years and a few months he remained in the pastoral office, and then was called to a better world. His death occurred June 30, 1843. See *Baptist Memorial*, ii, 269. (J. C. S.)

**Uphar'sin** (Dan. v, 25). See MENE.

**U'phaz** (Heb. *Uphaz*, *וּפָאז*, signif. uncertain; Sept. *Μωφάζ*, *Ὠφάζ*; Vulg. *Ophaz, obryzum*), the name of a gold region (Jer. x, 9; Dan. x, 5), like Tarshish and Ophir (comp. *Psa.* xiv, 10; 1 Chron. xxxix, 4), and hence thought by most expositors to be a corruption of the latter name (so the Targum, Syriac, and Theodotion). Fürst, however, suggests (*Heb. Lex.* s. v.) that it may be compounded of *וַשׁ*, *wash*, and *וַז*, *pure gold*; and that since it is interchanged with Sheba (*Psa.* lxxii, 15), it may be regarded as the name of a gold wash in Southern Arabia. Its resemblance to *Muphaz* (*וּמְפָאז*; A. V. "best") in 1 Kings x, 18 is perhaps not accidental. See OPHIR.

**Upis**, in Greek mythology, was a surname of *Diana*. A certain tutress was also called so, and likewise a nymph of *Diana*. *Upis* was, likewise, the name of a Hyperborean woman who, with *Arge*, paid a tribute to *Delos* for *Diana*, according to an oath respecting the birth of *Apollo*. Again, *Upis* was the name of the father of *Diana*, husband of *Glauce*. Lastly, it was a surname of *Nemesia*.

**Upper Chamber (or Room)** (*אֲלִיָּא*, *aliyah*, as in modern Arabic; 2 Kings i, 2; xxiii, 12; 1 Chron. xxviii, 11; 2 Chron. iii, 9; "summer-parlor," *Judg.* iii, 23; "loft," 1 Kings xvii, 19, 23; "chamber over the gate," 2 Sam. xviii, 33; elsewhere "chamber" simply; *ἀνώγειον*, *Mark* xiv, 15; *Luke* xxii, 12; *ὑπερίθρον*, *Acts* i, 13; ix, 37, 39; xx, 8), a sort of guest-chamber not in common use, in the upper part of the house, where the Orientals received company and held feasts, and where at other times they retired for prayer and meditation

Front View of the Balcony of a "Chamber on the Wall."

(*Mark* xiv, 15; *Luke* xxii, 12). Among the Hebrews it seems to have been on, or connected with, the flat roofs of their dwellings; in Greek houses it occupied the upper story (1 Kings xvii, 19, 22; 2 Kings iv, 10; *Acts* i, 13; ix, 37, 39; x, 9; xx, 8). Robinson describes the "upper room of a respectable house at Ramleh as a large airy hall, forming a sort of third story upon the flat roof of the house" (*Bibl. Res.* iii, 26). Jowett describes the chief room in the houses of *Havali* (opposite *Lesbos*) as in the upper or third story, secluded, spacious, and commodious, "higher and larger than those below, having two projecting windows, and the whole floor so much extended in front beyond the lower part of the building that the projecting windows overhung the street" (*Christ. Res.* p. 67). From such a chamber, *Eutyclus*, who was sitting on the window, or on an elevated divan, fell through the window into the street (*Acts* xx, 6-12). In 2 Kings i, 2 we are told that *Ahaziah* "fell down through a lattice in his upper chamber that was in *Samaria*." Indeed, it is likely that those accidents were by no means rare in the East. A person accommodated here can go in and out with perfect independence of the main building of the inner court, into which he probably never enters, and does not in the least interfere with the arrangements of the family. A visitor or friend is almost never accommodated anywhere else, and certainly never in the interior court (*Kitto, Pict. Bible*, note in 2 Kings iv, 10). Rich luxurious men are charged with sinfully multiplying chambers of this sort (*Jer.* xxii, 13, 14). As spoken of by the prophet, they would seem to have been both large and built for the purposes of comfort and luxury. We find accordingly frequent mention made of them in connection with kings, who appear to have used them as summer-houses for their coolness (*Judg.* iii, 20; 2 Kings i, 2; xxiii, 12). The summer-house spoken of in Scripture was very seldom a separate building. The lower part of the house was the winter-house, the upper room was the summer-house. If they are on the same story, the outer apartment is the summer-house, the inner is the winter-house (*Thomson, Land and Book*, i, 235; *Robinson, Bibl. Res.* iii, 417). We find the upper rooms allocated to the use of those prophets whom it was wished to honor particularly (1 Kings xvii, 19; 2 Kings iv, 10). They were also used

House with an *Allyah*.

on account of their size and coolness as places for assembly (Acts i, 13; xx, 8), and for similar reasons the dead were laid out in them (ix, 39). There appears to have been an upper room over the gateways of towns (2 Sam. xviii, 33), and on their roofs, as being the highest part of the house, idolatrous worship was paid to Baal (2 Kings xxiii, 12). In allusion to the loftiness of the upper room, the psalmist beautifully describes God as laying the beams of his *upper chambers* in the waters, and from thence watering the hills (Psa. civ, 3, 13). See CHAMBER; HOUSE.

**Upsal**, a town of Sweden, forty-five miles northwest of Stockholm, was, during the Middle Ages, the stronghold of paganism. It has a beautiful Gothic cathedral, built from 1258 to 1435. Its interior is magnificent and richly decorated, but its exterior has suffered much from fire, notably in the conflagration of 1702. It is the finest cathedral in that region. See Neander, *Hist. of the Church*, iii, 292 sq.

**Upton**, JAMES, a learned schoolmaster and divine of the Church of England, and editor of classical works, was born in 1670, and died in 1749.

**Ur**, the name of a place and of a man. There is apparently no direct connection between the titles, perhaps not even kinship of dialect.

1. The original seat of Abraham's family, whence he set out for Canaan (Gen. xi, 28, 31; xv, 7; Neh. ix, 7). See ABRAHAM.

I. *The Name*.—This is invariably "Ur of [the] Chaldees" (אֲרָם כַּדְאִי, *Ur Kasdim*; Sept. ἡ χώρα τῶν Χαλδαίων; Vulg. *Ur Chaldeorum* [but in Neh. *ignis Chaldeorum*]). The oldest derivation of the word אֲרָם is from the Heb. אֵשׁ, or אֶשׁ, *light*, in the sense of *fire* (so the Targum and Jerome). This derivation is no doubt connected with the legends in the Koran and Talmud, which represent Abraham as escaping by miracle from the flames into which Nimrod or other idolatrous persecutors had thrown him (see Wagner, in the *Thesaur. Theol.-philol.* i, 173). Various other etymologies have been proposed: some taking the word as אֶרֶץ, *a mountain*; some as denoting the *east*, or the *light-giving region*; while Ewald, from the Arabic, makes it "place of sojourn," and others look to the Zendic *vara*, *a fort* (Gesen.), or the Sanscrit *ur*, *a town*, or even the Heb. יָרֵא, *a city* (Bononi, *Nineveh*, p. 41). The name, however, was probably indigenous, and belongs to the old Chaldee of the first empire, the Assyrian *Uru*, and the cuneiform *Hur*.

II. *Sites Proposed*.—1. One tradition identifies Ur with the modern *Orfah*, in the north-west part of Mesopotamia. There is some ground for believing that this city, called by the Greeks *Edessa*, had also the name of *Orhha* as early as the time of Isidore (B.C. cir. 150); and the tradition connecting it with Abraham is perhaps not later than Ephraem (A.D. 330-370), who makes Nimrod king of *Edessa*, among other places (*Comment. in Gen.*, in *Opp.* i, 58, B.). According to Pococke (*Description of the East*, i, 159), that Ur is *Edessa* or *Orfah*, is "the universal opinion of the Jews;" and it is also the local belief, as is indicated by the title "Mosque of Abraham," borne by the chief religious edifice of the place, and the designation "Lake of Abraham the Beloved," attached to the pond in which are kept the sacred fish (Ainsworth, *Travels in the Track*, etc., p. 64; comp. Niebuhr, *Voyage en Arabie*, p. 330).

2. A second tradition, which appears in the Talmud and in some of the early Arabian writers, finds Ur in *Warka*, the *Opōn* of the Greeks, and probably the *Erech* of Holy Scripture (called *Opix* by the Sept.). This place bears the name of *Huruk* in the native inscriptions, and was in the country known to the Jews as "the land of the Chaldeans."

3. A third tradition, less distinct than either of these,

but entitled to at least equal attention, distinguishes Ur from *Warka*, while still placing it in the same region (see *Journal of Asiatic Society*, xii, 481, note 2). There can be little doubt that the city to which this tradition points is that which appears by its bricks to have been called *Hur* by the natives, and which is now represented by the ruins at *Mugheir*, or *Umgher*, on the right bank of the Euphrates, nearly opposite to its junction with the Shat el-Hie. The oldest Jewish tradition which we possess, that quoted by Eusebius from Eupolemus (*Præp. Ev.* ix, 17), who lived about B.C. 150, may be fairly said to intend this place; for by identifying Ur (*Uria*) with the Babylonian city, known also as *Camarina* and *Chaldæopolis*, it points to a city of the Moon, which *Hur* was—*Kamar* being "the moon" in Arabic, and *Khaldi* the same luminary in the Old Armenian.

4. An opinion unsupported by any tradition remains to be noticed. Bochart, Calmet, Bunsen, and others identify "Ur of the Chaldees" with a place of the name mentioned by a single late writer (Ammianus Marcellinus) as "a castle" existing in his day in Eastern Mesopotamia, between *Hatra* (El-Hadhr) and *Nisibis* (Amm. Marc. xxv, 8). The chief arguments in favor of this site seem to be the identity of name and the position of the place between *Arrapachitis*, which is thought to have been the dwelling-place of Abraham's ancestors in the time of *Arphaxad*, and *Haran* (*Harran*), whither he went from Ur.

5. It may be added that Tuch regards Ur as a Median town called *Oûipa* by Strabo (xi, 523), a view followed to some extent by Ewald, Lengerke, Ritter, and Knobel.

III. *Probable Identification*.—It will be seen that of the four or five localities thought to have a claim to be regarded as Abraham's city, two (or three) are situated in Upper Mesopotamia, between the *Mons Masius* and the *Sinjar* range, while the other two are in the alluvial tract near the sea, at least four hundred miles farther south. Let us endeavor first to decide in which of these two regions Ur is more probably to be sought.

That *Chaldæa* was, properly speaking, the southern part of *Babylonia*, the region bordering upon the Gulf, will be admitted by all. Those who maintain the northern emplacement of Ur argue that, with the extension of *Chaldæa* power, the name travelled northward, and became coextensive with *Mesopotamia*; but, in the first place, there is no proof that the name *Chaldæa* was ever extended to the region above the *Sinjar*; and, secondly, if it was, the Jews at any rate mean by *Chaldæa* exclusively the lower country, and call the upper *Mesopotamia*, or *Padan-Aram* (see Job i, 17; Isa. xlii, 19; xliiii, 14, etc.). Again, there is no reason to believe that Babylonian power was established beyond the *Sinjar* in these early times. On the contrary, it seems to have been confined to *Babylonia Proper*, or the alluvial tract below *Hit* and *Tekrit*, until the expedition of *Chedorlaomer*, which was later than the migration of Abraham. The conjectures of *Ephraem Syrus* and *Jerome*, who identify the cities of *Nimrod* with places in the upper Mesopotamian country, deserve no credit. The names all really belong to *Chaldæa Proper*. Moreover, the best and earliest Jewish authorities place Ur in the low region. *Eupolemus* has been already quoted to this effect. *Josephus*, though less distinct upon the point, seems to have held the same view (*Ant.* i, 6). The Talmudists also are on this side of the question; and local traditions, which may be traced back nearly to the *Hegira*, make the lower country the place of Abraham's birth and early life. If *Orfah* has a Mosque and a Lake of Abraham, *Cutha*, near *Babylon*, goes by Abraham's name, as the traditional scene of all his legendary miracles.

Again, it is really in the lower country only that a name closely corresponding to the Hebrew אֲרָם is found. The cuneiform *Hur* represents אֲרָם letter for letter, and only differs from it in the greater strength of the aspirate. *Isidore's Orhha* (Ὀρῆα) differs from Ur consid-

erably, and the supposed Ur of Ammianus is probably not Ur, but Adur. The Orchoë ('Ορχοή) of Southern Mesopotamia (Ptolemy, *Geogr.* v, 20; comp. Strabo, xvi, 1, 6), noted by later writers (Cellarius, *Geogr.* ii, 760; Bonomi, *Nineveh*, p. 41, 399), is probably different from the Οὐρη of Josephus and the Οὐριν of Eupolemus.

The argument that Ur should be sought in the neighborhood of Arrapachitis and Seruj, because the names Arphaxad and Serug occur in the genealogy of Abraham (Bunsen, *Egypt's Place*, iii, 366, 367), has no weight till it is shown that the human names in question are really connected with the places, which is at present assumed somewhat boldly. Arrapachitis comes probably from *Arapkha*, an old Assyrian town of no great consequence on the left bank of the Tigris, above Nineveh, which has only three letters in common with Arphaxad (אַרְפַּכְשָׁד); and Seruj is a name which does not appear in Mesopotamia till long after the Christian æra. It is rarely, if ever, that we can extract geographical information from the names in a historical genealogy; and certainly in the present case nothing seems to have been gained by the attempt to do so.

On the whole, therefore, we may regard it as tolerably certain that "Ur of the Chaldees" was a place situated

in the real Chaldæa—the low country near the Persian Gulf. The only question that remains in any degree doubtful is whether Warka or Mugheir is the true locality. These places are not far apart, and either of them is sufficiently suitable. Both are ancient cities, probably long anterior to Abraham. Traditions attach to both, but perhaps more distinctly to Warka. On the other hand, it seems certain that Warka, the native name of which was *Huruk*, represents the Erech of Genesis, which cannot possibly be the Ur of the same book. See ERECH. Mugheir, therefore, which bore the exact name of 'Ur or Hur, remains with the best claim, and is entitled to be (at least provisionally) regarded as the city of Abraham.

If it be objected to this theory that Abraham, having to go from Mugheir to Palestine, would not be likely to take Haran (*Hurran*) on his way, more particularly as he must then have crossed the Euphrates twice, the answer would seem to be that the movement was not that of an individual, but of a tribe travelling with large flocks and herds, whose line of migration would have to be determined by necessities of pasturage, and by the friendly or hostile disposition, the weakness or strength, of the tribes already in possession of the regions which had to be traversed. Fear of Arab plunderers (Job i, 15) may very probably have caused the emigrants to cross the Euphrates before quitting Babylonia, and having done so, they might naturally follow the left bank of the stream to the Belik, up which they might then proceed, attracted by its excellent pastures, till they reached Harran. As a pastoral tribe proceeding from Lower Babylonia to Palestine must ascend the Euphrates as high as the latitude of Aleppo, and perhaps would find it best to ascend nearly to Bir, Harran was but a little out of the proper route. Besides, the

whole tribe which accompanied Abraham was not going to Palestine. Half the tribe were bent on a less distant journey; and with them the question must have been, where could they, on or near the line of route, obtain an unoccupied territory. They could not directly cross the open desert between Babylonia and Palestine. Even caravans travelling from Bagdad to Damascus are obliged to take the route by Harran.

#### IV. Description of the Modern Locality.

—'Ur or Hur, now *Mugheir*, or *Um-Mugheir*, "the bitumen-ed," or "the mother of bitumen," is one of the most ancient, if not the most ancient, of the Chaldean sites hitherto discovered. It lies on the right bank of the Euphrates, at the distance of about six miles from the present course of the stream, nearly opposite the point where the Euphrates re-

Plan of Mugheir Ruins.

Points at which excavations were made by Mr. Loftus. f f f f. Comparatively open space of very low mounds.

ceives the Shat el-Hie from the Tigris. It is now not less than 125 miles from the sea; but there are grounds for believing that it was anciently a maritime town, and that its present inland position has been caused by the rapid growth of the alluvium. The remains of the buildings are generally of the most archaic character. They cover an oval space 1000 yards long by 800 broad, and consist principally of a number of low mounds enclosed within an *enceinte*, which on most sides is nearly perfect. The most remarkable building is near the northern end of the ruins. It is a temple of the true Chaldean type, built in stages, of which two remain, and composed of brick, partly sun-burned and partly baked, laid chiefly in a cement of bitumen. It is in the form of a right-angled parallelogram, the longest sides of which are the north-east and south-west. One angle points due north. The lower story is supported by buttresses thirteen inches deep, and, with the exception of those at the angles, eight feet wide. The building measures 198 feet in length and 133 in breadth. The lower story is twenty-seven feet high, and has but one entrance, which is eight feet wide. The outer surface is faced with "red kiln-baked bricks" to a thickness of ten feet; but the whole interior is of sun-dried bricks. In each of the angles of this building, six feet inward, near the foundation, an inscribed cylinder was discovered, which appears to have served the same purpose as the documents at present deposited beneath the foundation-stones of our great buildings. These cylinders are now in the British Museum. The bricks of this building bear the name of a certain *Uruk*, who is regarded as the earliest of the Chaldean monumental kings, and the name may possibly be the same as that of Orchamus of Ovid (*Metam.* iv, 212). His supposed date is B.C. 2000, or a little earlier. 'Ur was the capital of this monarch, who had a dominion extending at least as far north as Niffer, and who, by the grandeur of his constructions, is proved to have been a wealthy and powerful prince. The great temple appears to have been founded by this king, who dedicated it to the moon-god, *Hurki*, from whom the town itself seems to have derived its name. Ilgi, son of Uruk, completed the temple, as well as certain other of his father's buildings, and the kings who followed upon these continued for several generations to adorn and beautify the city. The tablets of the Chaldeans discovered at Mugheir are among the most interesting ever brought to light. These records bear the names of a series of kings from Uruk (B.C. 2230) to Nabonidus (B.C. 540), the last of the series. Among others is that of Kudurmapula, or Chedorlaomer (Gen. xiv, 1). The temple was dedicated to *Sin*, or "the moon," which element was preserved by the Greeks in the name *Mesene*, applied by them to the surrounding region. "The cylinder inscriptions of Mugheir are invaluable documents in confirming the authenticity and truth of Scripture. They not only inform us that Nabonidus, last king of Babylon, repaired the great temple of the moon at Hur,

but they also explain who Belshazzar was, concerning whom the early Bible critics have in vain endeavored to reconcile conflicting statements. In the book of Daniel (v, 30) he is alluded to as the king of the Chaldees when Babylon was taken by the united armies of the Medes and Persians. The account of Berosus does not, however, agree with that of Scripture. It states that Nabonidus, after being utterly routed in the open plain by Cyrus, shut himself up in the city of Borsippa, but was soon obliged to surrender his person to the conqueror. From Daniel, therefore, we are led to conclude that Belshazzar was the last Chaldean monarch; while Nabonidus is represented in the same capacity by Berosus. . . . Sir Henry Rawlinson's reading of the Mugheir cylinders entirely reconciles these discrepancies. The records distinctly state that *Belshazzar was the eldest son of Nabonidus*, and that he was admitted to a share of the government" (Loftus, *Chaldea and Susiana*, p. 13; comp. *Journal of Asiatic Society*, xv, 260 sq.). See BELSHAZZAR.

'Ur retained its metropolitan character for above two centuries, and even after it became second to Babylon was a great city, with an especially sacred character.

Ruins of Temple at Mugheir.

The notions entertained of its superior sanctity led to its being used as a cemetery city, not only during the time of the early Chaldean supremacy, but throughout the Assyrian and even the later Babylonian period. It is in the main a city of tombs. By far the greater portion of the space within the *enceinte* is occupied by graves of one kind or another, while outside the enclosure the whole space for a distance of several hundred yards is a thickly occupied burial-ground. It is believed that 'Ur was for 1800 years a site to which the dead were brought from vast distances, thus resembling such places as Kerbela and Nejif, or Meshed Ali, at the present day. The latest mention that we find of 'Ur as an existing place is in the passage of Eupolemus already quoted, where we learn that it had changed its name, and was called *Camarina*. It probably fell into decay under the Persians, and was a mere ruin at the time of Alexander's conquests. Perhaps it was the place to which Alexander's informants alluded when they told him that the tombs of the old Assyrian kings were chiefly in the great marshes of the lower country (Arrian, *Exp. Alex.* vii, 22). The mounds that mark the site of its great temples are bare; the whole country around it is a dismal swamp. In regard to 'Ur,

Perhaps it was the place to which Alexander's informants alluded when they told him that the tombs of the old Assyrian kings were chiefly in the great marshes of the lower country (Arrian, *Exp. Alex.* vii, 22). The mounds that mark the site of its great temples are bare; the whole country around it is a dismal swamp. In regard to 'Ur,

as well as to Babylon, the words of Isaiah are true, "The beauty of the Chaldees' excellency shall be as when God overthrew Sodom and Gomorrah" (xiii, 19). See Loftus, *Chaldaea*, ch. xii; Rawlinson, *Ancient Monarchies*, i, 15 sq., 27, 108, 153; *Jour. Royal Geogr. Soc.* xxvii, 185. See CHALDEA.

2. (אֵלִיפַל, *Ur, light*; Sept. Ὀπά v. r. Ὀπο[φάπ], etc.; Vulg. *Ur*.) The father of Eliphaz or Eliphalet, one of David's warriors (1 Chron. xi, 35). B.C. ante 1043. In the parallel list of David's warriors (2 Sam. xxiii, 34) we have the son's name thus stated, "Eliphalet the son of Ahasbai, the son of the Maachathite," or the Maachathite simply, as it should doubtless be made to read; while the above passage still more corruptly gives two persons, "Eliphaz the son of Ur, Hephher the Mecherathite," which should probably be corrected so as to refer to one individual, either by the rejection of the name Hephher altogether, or its identification with one of the preceding; for the personages named before and after these in the two accounts are evidently the same, and the subjoined sum is full by counting these as one. See DAVID.

**Uraettir**, in Norse mythology, denotes the entire dynasty of the Trolles, Thusses, serpent-like dwarfs and giants, the Jotes, Schwarzelfs, and Dockelfs.

**Uranus**, a Nestorian of Syria who applied the precepts of Aristotle to the Eutychian controversies and propagated his doctrines in Persia. He succeeded in convincing Chosroes on many points, and was so popular with this ruler that he always had him at his table. See Mosheim, *Eccl. Hist.* i, 388.

**Urānus** (Lat. *Cælus*), the heaven, in Greek mythology, was the progenitor of the whole line of Grecian gods. His first children were the Hecatonchires (Centimanes). Afterwards he begot, through Gæa, the Cyclopes. These were imprisoned in Tartarus because of their great strength. This so moved their mother to anger that she incited her subsequently born children, the Titans, against the father, who drove him from the throne of the earth, after Kronus (Saturnus), his younger son, had, with a diamond sickle, disqualified him for the further production of children. The sea received the mutilated organs, which gave life to Venus. From the blood which was spilled there sprang the Giants, the Furies, and the Melian nymphs. See Smith, *Dict. of Gr. and Rom. Biog. and Mythol.* s. v.

**Urban I**, pope from A.D. 223 to 230, was a native of Rome, but tradition mentions nothing worthy of note concerning him except that he persuaded several Romans to suffer the martyr's death, and was finally martyred himself under Alexander Severus. May 25 is dedicated to his celebration.

**Urban II**, pope from A.D. 1088 to 1099, previously named *Odo of Lagny*, was born in Chatillon-sur-Marne, and became successively canon of Rheims, prior of Clugny, bishop of Ostia, and legate to the court of the emperor Henry IV. In the latter station he labored efficiently to insure the papal prerogative in connection with the *Investiture* controversy. He followed Victor III as pope, and represented the Gregorian party in his administration. He succeeded in maintaining himself against pope Clement II, who was elected by the imperial party, and also in greatly extending the influence and reputation of the papacy throughout the West. In 1089 he convened a council at Rome which denounced the ban upon the emperor, his pope, and their adherents. At the *Concilium Melfitanum*, in 1090, he enunciated the decree that the laity could possess no right whatsoever against the clergy (see Mansi, *Collectio Concil.* xx, canon 11, 723 [Venet. 1775]). He was driven from Rome by the emperor, and compelled to seek a refuge with count Roger, upon whom he had conferred the districts of Apulia and Calabria. He retaliated by renewing the ban over his enemy (1091) and forming an alliance with Conrad, the emperor's son, who rebelled and made himself king of Italy. Ur-

ban returned to Rome (1093) and from that time interfered most notably in the affairs of the world. He excommunicated Philip of France, who had driven away his queen and married Bertrada, consort of count Fulco of Anjou. At the Council of Clermont (1095) he forbade the investiture of bishops by the hands of the laity of any rank whatever, and also the assumption of feudal obligations to king or other layman by any clergyman. He was not successful, however, in compelling the princes to give up their sovereignty in ecclesiastical affairs, and was even compelled to create count Roger of Sicily, his own protégé, legate to Sicily, in order that he might be able to enforce his decree without alienating the count from his side. The Council of Clermont was also specially important as furnishing the occasion for the organization of the *Crusades* for the conquest of the Holy Sepulchre. Urban delivered a fiery address, which gave the stimulus for the first crusade; and the new movement so increased his own power that he became able to expel his rival from Rome and utterly destroy his influence. Other councils were held in France under his direction, in one of which, at Nismes, he released Philip of France from the ban, in recognition of his separation from Bertrada. Something of regard was also paid by him to the politically important reunion of the Greek and Latin churches. In England William Rufus proved an obstinate opponent to the papal plans, but in Spain these plans resulted in a large extension of the power of the Church. Urban's influence over matters of doctrine was less pronounced than over matters of administration; but he nevertheless caused the teachings of Berengar (q. v.) to be condemned at the Council of Piacenza, and at Clermont the practice of dipping the bread used in the sacrament in wine. In the latter council he also pronounced a general and complete absolution—a measure which from that time became pre-eminently a privilege of the pope. He assured to all Christians who should take up arms against the infidels entire forgiveness of sins, and also blessedness and inclusion among the number of martyrs, if they should fall during the campaign. The power of the complete absolution was therefore based on the idea of the sin-extirpating power of martyrdom. Urban died June 20, 1099. See *Vita et Epist. Urb. II*, in Mansi, *ut supra*, 642-719, and the literature in Gieseler, *Lehrb. d. Kirchengesch.* ii, 2 (4th ed. Bonn, 1848), p. 39 sq., 508.—Herzog, *Real-Encyklop.* s. v.

**Urban III**, previously *Lambert* or *Hubert Crivelli*, of Milan, was archdeacon at Bourges and later at Milan, archbishop of Milan, and cardinal. He was made pope in 1185, and is noteworthy only because of his interrupted and unprofitable quarrels with the emperor Frederick, for which see *Gesta Trevirorum* (Trev. 1836), vol. i; and Gieseler, p. 96 sq. Urban died Oct. 19, 1187. See Herzog, *Real-Encyklop.* s. v.

**Urban IV**, pope from A.D. 1261 to 1264, named *Jacob Pantaloon*, the son of a shoemaker at Troyes, studied at Paris and became canon of Troyes, and afterwards bishop of Liege. Innocent IV sent him as legate to Germany, and Alexander IV nominated him patriarch of Jerusalem. His brief pontificate was disturbed by political agitations growing out of his determination to destroy the influence of the Sicilian king Manfred in the affairs of Italy, and his interference with the disputed succession of the German throne. He appointed fourteen cardinals to serve as counsellors, forbade the election of Conradin, the last representative of the house of Hohenstaufen, to the German throne, under pain of excommunication, and cited Richard of Cornwall and Alfred of Castile, the competitors for that throne, to Rome, that they might await his decision. He also despatched a cardinal-legate to England to assert the authority of the papacy in the administration of that country; and he summoned Manfred before his tribunal, and when that king disregarded the summons,

transferred his kingdom to duke Charles of Anjou. Manfred, however, resisted, and subjugated by force of arms a larger portion of the States of the Church. Urban was compelled to flee for safety to Orvieto, and afterwards to Perugia, where he died, Oct. 2, 1264. He is notable for having brought about a general observance of the Feast of Corpus Christi. His literary remains include, besides a number of bulls, a small collection of *Epistole*. See Mansi, *Concil.* xxiii, 1076 sq.; Gieseler, p. 166 sq.; and Herzog, *Real-Encyklop.* s. v.

**Urban V**, the last of the Avignon popes, reigned from 1362 to 1370. His name was *William Grimward*, and he had been a Benedictine monk, abbot at Auxerre in 1353, and at St. Victor's, in Marseilles, in 1358. He was rated as a most capable canonist, and had officiated as teacher of canon and civil law in Montpellier, Avignon, Toulouse, and Paris. He succeeded Innocent VI in the pontificate, and found himself at once in difficult circumstances. In Italy Bernabo Visconti had rebelled and taken possession of several cities belonging to the Church, which could only be recovered through a treaty by which the pope pledged himself to the payment of a ransom amounting to half a million gold florins. England had refused to pay the customary tribute, and Edward III had even caused a very resolute denial of such revenues to be opposed by the Parliament to the pope's demand. The Turks were threatening danger to Cyprus. Urban sought to advance the papal interests amid these complications by means of legates, the preaching of a new crusade against the Turks, and a removal of the papal seat to Rome. Greatly to the dissatisfaction of many cardinals, the latter project was executed in 1367, the pope leaving Avignon April 30, and reaching Rome Oct. 16. He was received by queen Joanna of Naples, on whom he conferred a golden rose and a consecrated sword. The emperor John Paleologus came over to the faith of Rome and promised fealty to the papal authority, Oct. 18, 1369. But, urged by the French cardinal, the pope returned to Avignon in September, 1370. Soon afterwards he died (Nov. 13), and was buried, according to his request, at Marseilles. It is to be added that Urban cultivated a strict morality, required bishops to reside in their dioceses, and zealously combated the growing simony and accumulation of benefices in the hands of individual prelates. Several of his bulls condemn, in addition, the formation of unions and the incorporation of benefices. See Mansi, xxvi, 422 sq.; Gieseler, ii, 3, 92 sq., 117 sq.; and Herzog, *Real-Encyklop.* s. v.

**Urban VI**, the first to ascend the papal chair in the period of the "great schism," was previously named *Bartholomew of Prignano*, and was a native of the city of Naples. He became archbishop of Bari and followed Gregory XI, April 8, 1378, the people of Rome having demanded an Italian pope. He attempted to reform the many and scandalous abuses which had grown up during the absence of the popes at Avignon, and did not hesitate to assail even bishops and cardinals; and having offended the clergy, he was unfortunate enough to alienate the good-will of many influential laymen, also, by his haughty and arbitrary manner. The cardinals, therefore, proceeded to elect a new pope on the plea that the election of Urban was not freely made, but was forced on the cardinals by the people. Count Robert of Geneva was the new choice, and he assumed the title of Clement VII; and as Urban retained a large body of adherents, the great schism was at once consummated. Urban was supported by Italy, England, Germany, and Poland. Queen Joanna of Naples and Sicily had acknowledged him, but was driven into an alliance with Clement by his pride and obstinacy; and he thereupon induced the heir to her throne, duke Charles of Durazzo, to invade her territories. Soon afterwards he quarrelled with Charles also, and excommunicated that prince. The cardinals, who had conspired with Charles against him, were imprisoned and

tortured, and, after a time, five of them were put to death. To Ladislaus, the heir of Charles, Urban denied the possession of Naples, claiming that it was a papal fief, and he organized an expedition to defend his claim; but when his soldiers deserted his standard, he returned to Rome, October, 1388, and employed himself thenceforward more especially with ecclesiastical affairs. He ordered that the Jubilee should be observed once every thirty-three years, and that its next celebration should take place in 1390. He also introduced the Feast of the Visitation of Mary, and decreed that divine worship might be celebrated on Corpus Christi Day, even during the enforcement of an interdict. He died Oct. 15, 1389, as many supposed, of poison. See Mansi, p. 609; Gieseler, p. 132 sq.; Herzog, *Real-Encyklop.* s. v.

**Urban VII**, of Genoese extraction, though born at Rome, was previously named *John Baptist Castagna*. He was archbishop of Rossano, member of the Council of Trent, repeatedly a legate to Germany and Spain, and, finally, a cardinal. He was elected to the papacy as the successor of Sixtus V, but died twelve days after the election, and before his consecration, Sept. 27, 1590. See Ranke, *Die röm. Päpste*, etc. (Berl. 1836), ii, 219 sq.; Herzog, *Real-Encyklop.* s. v.

**Urban VIII**, pope from 1623 to 1644, was a native of Florence named *Maffeo Barberini*, and a pupil of the Jesuits. He developed a fondness for poetry, and entered the service of the curia, in which he filled many positions of great importance. His most influential work was perhaps the promotion of the restoration of the Jesuits to France. After he had become cardinal-priest and archbishop of Spoleto, he was elected to succeed Gregory XV in the pontificate, Aug. 6, 1623. His tastes were altogether those of an Italian secular prince, and he gave attention chiefly to the erection of fortifications, the enlisting of soldiers, the collecting of arms, etc. Amid the complications of the time, he at first supported the interests of France against Austria and Spain, and, in connection with Richelieu, was led even to the cultivation of relations with Protestants, so that he was not in sympathy with the Jesuitical method of enforcing the Edict of Restoration of 1629 in Germany, and directed his legate to the Diet of Ratisbon in 1630 to oppose the wishes of Austria. Complaints against this tendency were naturally raised by the Catholic princes and clergy, and found expression in the assembled Consistory itself. A number of cardinals even harbored the idea of convoking a council in opposition to the pope. In 1631 he inherited the duchy of Urbino, but thereby became involved in difficulties with the duke of Parma and his allies. His nepotism also contributed towards the troubles of his pontificate. Despite his dislike of the governments which were most zealously devoted to the interests of Rome, Urban was an unwavering defender of the traditional theory of the papacy within the Church itself. He gave effect to the canonization of the founders of the orders of Jesuits and Oratorians; beatified Francis Borgia and others; added the Collegium de Propaganda Fide (also Collegium Urbanum) to the Congregatio de Fide Cathol. Propaganda; gave to the bull *In Cenu Domini* its present shape; abolished the order of female Jesuits; caused the publication of a new edition of the Breviary; condemned Galileo and his teachings; and in the bull *De Eminentissimi* declared himself against Jansen (q. v.). He forbade the clergy to use snuff in church on pain of excommunication. Urban was not, upon the whole, illiterate. His poems consist in part of paraphrases of Psalms and passages of the Old and New Tests. in Horatian measures, and in part of hymns on the Virgin and different saints. They were published in Antwerp, 1634; Paris, 1642; Oxford, 1726. He was also the author of *Epigrams* which were published with comments by Dormulus (Rome, 1643). Urban died July 29, 1644. See Simonin, *Sylva Urbaniana s. Gesta Urbani* (Antw. 1637); Ranke, *Die röm. Päpste* (Appendix), iii, 408 sq.,

433 sq.; Gieseler, *Lehrb. d. Kirchengesch.* (Bonn, 1855), iii, 2, 592; Herzog, *Real-Encyklop.* s. v.

**Ur'bane** [some *Ur'banè*, others *Urba'nè*] or rather **URBAN** (*Οὐρβανός*, Grecized from the Lat. *Urbanus*, i. e. of the city, or urban), a Christian at Rome saluted by Paul as having been his associate in labor (*τὸν συνεργόν μου ἐν Χριστῷ*) in the list of those addressed (Rom. xvi, 9). A.D. 55.

**Urbanenses**, one of the numerous small sects of the Donatists in Numidia, mentioned by Augustine (*Crescom.* iv, 70).

**Urbanis**, GIULIO, an Italian painter, of San Danielo, studied with Pomponio Amalteo, and followed his manner. Lanzi mentions a fresco by him at San Daniello representing the *Virgin with the Infant Christ*, seated upon a throne, surrounded by Thomas the apostle, Valentine, and other saints, signed "Opus Julii Urbanis, 1574." See Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Urbino**, SALOMON BEN-ABRAHAM, a Jewish writer who flourished in 1480, is the author of a lexicon on the synonyms of the Old Test., entitled *מדר אורחל*, *The Tabernacle of the Congregation*, in allusion to Exod. xxxiii, 7, "because therein are congregated expressions which differ in sound, but are like in sense" (*מדר חיותו כית*). The synonyms are divided into groups, the alphabetical order of which is determined by its most important word. Each group commences with the formula *המלה אשר הונחה להירדה*, i. e. the word which is put down is to teach, being made up from the abbreviation of the title of the work, viz. *המדר*, and is illustrated by quotations from the Old Test. and the corresponding passages from the Targum, as well as by quotations from Saadia Gaon's Arabic translation of the Pentateuch, the works of Dunash ibn-Librat, Hai Gaon, Ibn-Ganach, Ibn-Giath, Nathan ben-Jechiel, Ibn-Balaam, Nachmanides, Ibn-Saruk, etc. The lexicon was published at Venice in 1548, and is now very rare. See Fürst, *Bibl. Jud.* iii, 461; De' Rossi, *Dizionario Storico*, p. 823 (Germ. transl.); Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodl.* p. 2391; Kitto, *Cyclop.* s. v.; Geiger, in *Zeitschrift für deutsch. morgenl. Gesellsch.* (Leips. 1863), xvii, 321; Wolf, *Bibl. Hebr.* i, 1037, etc. (B. P.)

**Urbs Beāta Hierusalem**. This rugged but fine old hymn, composed in *dedicatione ecclesie*, and of which the author is not known, belongs to the 8th or 9th century. Trench calls it "a hymn of degrees ascending from things earthly to things heavenly, and making the first to be interpreters of the last. The prevailing intention in the building and the dedication of a church, with the rites thereto appertaining, was to carry up men's thoughts from that temple built with hands, which they saw, to that other built of living stones in heaven, of which this was but a weak shadow." This fine hymn, the first lines of which run thus,

"Urbs beata Hierusalem, dicta paucis visio,  
Quæ constructur in cælis vivis ex lapidibus,  
Et ab angelis ornata, velut sponsa nobilis:  
Nova veniens ex cælo, nuptiali thalamo  
Preparata, ut sponsata coupletur Domino;  
Plateæ et muri ejus ex auro purissimo,"

has proved the source of manifold inspiration in circles beyond its own. To it we owe the

"Jerusalem, my happy home;"

or the same in a less common but still more beautiful form,

"O mother, dear Jerusalem!"

It has also inspired some of the singers of Protestant Germany. In the German language we have two noble hymns which at least had their first motive here. The one is that by Meyfahrt,

"Jerusalem, du hochgebaute Stadt;"

the other by Kosegarten,

"Stadt Gottes, deren diamant'nen Ring."

In English our hymn is found in *Lyra Mystica* (Lond. 1869), p. 409:

"Blessed city, holy Salem,  
Home of peace, by seers descried;  
Rising in the courts of heaven,  
Built of living stones and tried;  
By angelic hands adorned,  
As her fellows deck a bride.  
Coming newly formed from heaven,  
Ready for the nuptial bower,  
Wedded to the Lamb forever,  
As a bride in blissful hour.  
All her streets have golden pavement,  
Golden ramparts round her tower," etc.

Our hymn has been translated into German by Schlosse, Simrock, Rambach, and others. The original is given by Trench, *Sacred Latin Poetry*, p. 311; Bässler, *Auswahl altchristlicher Lieder*, p. 201; Rambach, *Anthologie christl. Gesänge*, p. 179; Simrock, *Lauda Sion*, p. 322. (B. P.)

**Urd**, in Norse mythology, was the destiny of the past, who, with her two sisters, Waranda and Skuld, sits under the tree Ygdrasil, where they daily receive advice.

**Urdaborn**, in Norse mythology, is the spring of the past, at which the three deities sit; from which clear spring they daily draw for themselves new wisdom, and with whose waters they moisten the roots of the tree Ygdrasil.

**Urgel**, COUNCIL OF. Seo de Urgel is a city of Spain on a plain among the Pyrenees, containing an ancient cathedral and other ecclesiastical buildings. A council was held here in 799 by Leidrade, archbishop of Lyons, whom Charlemagne had sent, together with Neofridius of Narbonne, the abbot Benedict, and several other bishops and abbots, to Felix, bishop of Urgel. They succeeded in persuading him to present himself to the king, promising him full liberty to produce in his presence those passages from the fathers which he believed to favor his notions.

**Urglier**, in Thibetan mythology, is one of the supreme deities of the Lamaites, generated from a flower.

**Urgiaffa**, in Norse mythology, was one of the nine-giant maidens who were mothers of Heimdal.

**U'ri** (Heb. *Uri'*, אורי, *fiery* [comp. *Φωτίζος*]), the name of three Israelites.

1. (Sept. *Ὀὐρί* or *Ὀὐρία*.) The father of Bezaleel, one of the architects of the tabernacle (Exod. xxxi, 2; xxxv, 30; xxxviii, 22; 1 Chron. ii, 20; 2 Chron. i, 5). B.C. ante 1637. He was of the tribe of Judah, and grandson of Caleb ben-Hezron, his father being Hur, who, according to tradition, was the husband of Miriam.

2. (Sept. *ʿAdai*.) The father of Geber, Solomon's commissariat officer in Gilead (1 Kings iv, 19). B.C. ante 1010.

3. (Sept. *Ὀδούβ* v. r. *Ὀδούβ*.) One of the gate-keepers of the Temple, who divorced his wife after the exile (Ezra x, 24). B.C. 458.

**Uri'ah** (Heb. *Uriyah'*, אורייה, *light* [or *fire*] of *Jehovah*; occasionally [in Jer. only] in the prolonged form *Uriyah'hu*, אורייהו; Sept. usually *Ὀὐρία*, and so the New Test. and Josephus; A. V. in some cases "Urijah" [q. v.]), the name of several Hebrews.

1. The last named of the principal thirty warriors of David's army (1 Chron. xi, 41; 2 Sam. xxiii, 39). Like others of David's officers (Ittai of Gath; Ishbosheth the Canaanite, 2 Sam. xxiii, 8, Sept.; Zelek the Ammonite, 2 Sam. xxiii, 37), he was a foreigner—a Hittite. His name, however, and his manner of speech (xi, 11) indicate that he had adopted the Jewish religion. He married Bathsheba, a woman of extraordinary beauty, the daughter of Eliam—possibly the same as the son of Ahithophel, and one of his brother officers (xxiii, 34); and hence, perhaps, as professor Blunt conjectures (*Coincidences*, II, x), Uriah's first acquaintance with Bathsheba. It may be inferred from Nathan's parable (2

Sam. xii, 3) that he was passionately devoted to his wife, and that their union was celebrated in Jerusalem as one of peculiar tenderness. He had a house at Jerusalem underneath the palace (xi, 2). In the first war with Ammon (B.C. 1035) he followed Joab to the siege, and with him remained encamped in the open field (ver. 11). He returned to Jerusalem, at an order from the king, on the pretext of asking news of the war—really in the hope that his return to his wife might cover the shame of David's crime. The king met with an unexpected obstacle in the austere, soldier-like spirit which guided all Uriah's conduct, and which gives us a high notion of the character and discipline of David's officers. He steadily refused to go home, or partake of any of the indulgences of domestic life, while the ark and the host were in booths and his comrades lying in the open air. He partook of the royal hospitality, but slept always at the gate of the palace till the last night, when the king at a feast vainly endeavored to entrap him by intoxication. The soldier was overcome by the debauch, but still retained his sense of duty sufficiently to insist on sleeping at the palace. On the morning of the third day, David sent him back to the camp with a letter (as in the story of Bellerophon) containing the command to Joab to cause his destruction in the battle. Josephus (*Ant.* vii, 7, 1) adds that he gave as a reason an imaginary offence of Uriah. None such appears in the actual letter. Probably to an unscrupulous soldier like Joab the absolute will of the king was sufficient. The device of Joab was to observe the part of the wall of Rabbath-Ammon where the greatest force of the besieged was congregated, and thither, as a kind of forlorn-hope, to send Uriah. A sally took place. Uriah and the officers with him advanced as far as the gate of the city, and were there shot down by the archers on the wall. It seems as if it had been an established maxim of Israelitish warfare not to approach the wall of a besieged city; and one instance of the fatal result was always quoted, as if proverbially, against it—the sudden and ignominious death of Abimelech at Thebez, which cut short the hopes of the then rising monarchy. This appears from the fact (as given in the Sept.) that Joab exactly anticipates what the king will say when he hears of the disaster. Just as Joab had forewarned the messenger, the king broke into a furious passion on hearing of the loss, and cited, almost in the very words which Joab had predicted, the case of Abimelech. (The only variation is the omission of the name of the grandfather of Abimelech, which, in the Sept., is Ner instead of Joash.) The messenger, as instructed by Joab, calmly continued, and ended the story with the words "Thy servant also, Uriah the Hittite, is dead." In a moment David's anger is appeased. He sends an encouraging message to Joab on the unavoidable chances of war, and urges him to continue the siege. It is one of the touching parts of the story that Uriah falls unconscious of his wife's dishonor. She hears of her husband's death. The narrative gives no hint as to her shame or remorse. She "mourned" with the usual signs of grief as a widow, and then became the wife of David (2 Sam. xi, 27). See DAVID.

2. A priest during the reign of Ahaz (B.C. cir. 738), whom Isaiah took as a witness to his prophecy concerning Maher-shalal-hash-baz, with Zechariah, the son of Jeberachiah (Isa. viii, 2). He is probably the same as Urijah the priest, who built the altar for Ahaz (2 Kings xvi, 10). If this be so, the prophet summoned him as a witness probably on account of his official position, not on account of his personal qualities; though, as the incident occurred at the beginning of the reign of Ahaz, Uriah's irreligious subservience may not yet have manifested itself. When Ahaz, after his deliverance from Rezin and Pekah by Tiglath-pileser, went to wait upon his new master at Damascus, he saw there an altar which pleased him, and sent the pattern of it to Uriah at Jerusalem, with orders to have one made like it against the king's return. Uriah zealously executed

the idolatrous command, and when Ahaz returned, not only allowed him to offer sacrifices upon it, but basely complied with all his impious directions. The new altar was accordingly set in the court of the Temple, to the east of where the brazen altar used to stand; and the daily sacrifices, and the burnt-offerings of the king and people, were offered upon it; while the brazen altar, having been removed from its place and set to the north of the Syrian altar, was reserved as a private altar for the king to inquire by. It is likely, too, that Uriah's compliances did not end here, but that he was a consenting party to the other idolatrous and sacrilegious acts of Ahaz (see 2 Kings xvi, 17, 18; xxiii, 5, 11, 12; 2 Chron. xxviii, 23-25).

Uriah or Urijah was apparently the high-priest at the time, but of his parentage we know nothing positive. He probably succeeded Azariah, who was high-priest in the reign of Uzziah (or else Amariah III, otherwise called Jothan), and was succeeded by that Azariah who was high-priest in the reign of Hezekiah. Hence it is probable that he was son of the former and father of the latter, it being by no means uncommon among the Hebrews, as among the Greeks, for the grandchild to have the grandfather's name. Probably, too, he may have been descended from that Azariah who must have been high-priest in the reign of Asa. But he has no record in the sacerdotal genealogy (1 Chron. vi, 4-15), in which there is a great gap between Amariah in ver. 11, and Shallum, the father of Hilkiah, in ver. 13. Josephus, however, says that he was the son of Jothan and the father of Neriah (*Ant.* x, 8, 6). See HIGH-PRIEST.

3. Urijah the son of Shemaiah of Kirjath-jearim; he prophesied in the days of Jehoiakim concerning the land and the city, just as Jeremiah had done, and the king sought to put him to death; but he escaped, and fled into Egypt. His retreat was soon discovered: Elnathan and his men brought him up out of Egypt, and Jehoiakim slew him with the sword, and cast his body forth among the graves of the common people (Jer. xxvi, 20-23). B.C. 608. The story of Shemaiah appears to be quoted by the enemies of Jeremiah as a reason for putting him to death; and as a reply to the instance of Micah the Morasthite, which Jeremiah's friends gave as a reason why his words should be listened to and his life spared. Such, at least, is the view adopted by Rashi.

4. One of the priests (being of the family of Hakkoz, A. V. "Koz") who stood at Ezra's right hand when he read the law to the people ("Urijah," Neh. viii, 4). B.C. 458. He is probably the same with the father of Meremoth, one of the priests who aided Nehemiah in rebuilding the walls of Jerusalem (Ezra viii, 33; Neh. iii, 4, 21).

Uri'as (Ὀυρίας), the Greek form of the name of URIAH the priest in Ezra's time (1 Esdr. ix, 43; comp. Neh. viii, 4), and of URIAH the husband of Bathsheba (Matt. i, 6).

U'ri'el (Heb. *Uri'el*, אֱרִיאֵל, *fire* [or *light*] of God; Sept. *Ουριήλ*), the name of three Hebrews.

1. A Kohathite Levite, son of Tahath, and father of Uzziah (1 Chron. vi, 24 [9]; apparently the same in Zephaniah (ver. 36). B.C. cir. 1550. See SAMUEL.

2. Chief of the Kohathites of the family of Korah in the reign of David, who assisted, together with one hundred and twenty of his brethren, in bringing up the ark from the house of Obed-edom (1 Chron. xv, 5, 11). B.C. 1043.

3. Uriel of Gibeah was the father of Maachah, or Michaiah, the favorite wife of Rehoboam, and mother of Abijah (2 Chron. xiii, 2). B.C. ante 973. In xi, 20 she is called "Maachah the daughter of Absalom;" and Josephus (*Ant.* viii, 10, 1) explains this by saying that her mother was Tamar, Absalom's daughter. Rashi gives a long note to the effect that Michaiah was called Maachah after the name of her daughter-in-law, the mother of Asa, who was a woman of renown, and that

her father's name was Uriel Abishalom. There is no indication, however, that Absalom, like Solomon, had another name, although in the Targum of R. Joseph on Chronicles it is said that the father of Maachah was called Uriel, that the name of Absalom might not be mentioned. See MAACHAH.

4. Uriel is also named in the Apocrypha (2 Esdr. iv, 1, 36; v, 20; x, 28) as an angel or archangel; and in the book of Enoch he is described as "the angel of thunder and lightning" (ch. xx), and as being "placed over all the lights of heaven" (lxxxv, 3).

Urii, in Slavonic mythology, was a deity among the Wends, worshipped mainly by magicians as their protector.

Uri'jah (a. 2 Kings xvi, 10, 11, 15, 16; b. Jer. xxvi, 20, 21, 23; c. Neh. iii, 4, 21). See URIAH.

URIM AND THUMMIM (Heb. *Urim ve-Thummim*, אֲרִימִים וְתֻמִּימִים), the Anglicized form of two Hebrew words used (always together [except in Numb. xxvii, 21; 1 Sam. xxviii, 6, where the former occurs alone; in Deut. xxxiii, 8, they are in the reverse order] and with the article [except in Ezra ii, 63; Neh. vii, 65]) with reference to some obscure mode of divination in connection with the sacerdotal regalia (Exod. xxviii, 30; Lev. viii, 8), but concerning which both ancient and modern interpreters have greatly differed. The latest elucidation of the subject may be found in Strong's *Tabernacle in the Wilderness* (Providence, 1888), p. 69, 95.

I. *Etymological Import.*—These words are Hebrew plurals, not proper names, but appellatives of frequent occurrence in the singular. They are generally considered to be *plurales excellentiae*, denoting by a metonymy the things or modes whereby the revelation was given and truth declared.

1. In *Urim*, Hebrew scholars, with hardly an exception, have seen the plural of אֵר (ʾĒr, *light* or *fire*). The Sept., however, appears to have had reasons which led its authors to another rendering than that of *φῶς* or its cognates. They give ἡ δῆλωσις (Exod. xxviii, 30; Eccles. xlv, 10), and δῆλοι (Numb. xxvii, 21; Deut. xxxiii, 8; 1 Sam. xxviii, 6); while in Ezra ii, 63, and Neh. vii, 65, we have respectively plural and singular participles of *φωρίζω*. In Aquila and Theodotus we find the more literal *φωτισμοί*. The Vulg., following the lead of the Sept., but going further astray, gives *doctrina* in Exod. xxviii, 30 and Deut. xxxiii, 8; omits the word in Numb. xxvii, 21, paraphrases it by *per sacerdotes* in 1 Sam. xxviii, 6, and gives *judicium* in Eccles. xlv, 10, as the rendering of δῆλωσις. Luther gives *Licht*. The literal English equivalent would of course be "lights;" but the renderings in the Sept. and Vulg. indicate, at least, a traditional belief among the Jews that the plural form, as in Elohim and other like words, did not involve numerical plurality. Bellarmine, wishing to defend the Vulg. translation, suggested the derivation of *Urim* from *ור*, "to teach" (Buxtorf, *Diss. de Ur. et Th.*).

2. *Thummim*. Here also there is almost a consensus as to the derivation from *תָּמ* (*Tōm*, *perfection*, *completeness*); but the Sept., as before, uses the closer Greek equivalent *τέλειος* once (Ezra ii, 63), and adheres elsewhere to ἀλήθεια; and the Vulg., giving *perfectus* there, in like manner gives *veritas* in all other passages. Aquila more accurately chooses *τελειώσεις*. Luther, in his first edition, gave *Völligkeit*, but afterwards rested in *Recht*.

What has been said as to the plural of *Urim* applies here also. Bellarmine (*ut sup.*) derives *Thummim* from *תָּמ*, *to be true*. By others it has been derived from *תָּמִים*, contr. *תָּמ*—"a twin," on the theory that the two groups of gems, six on each side the breastplate, were what constituted the *Urim* and *Thummim* (R. Azarias, in Buxtorf, *loc. cit.*). "Light and perfection" would probably be the best English equivalents. The as-

sumption of a hendiadys, so that the two words—"perfect illumination" (Carpzov, *App. Crit.* i, 5; Bähr, *Symbolik*, ii, 135), is unnecessary, and, it is believed, unsound. The mere phrase, as such, leaves it therefore uncertain whether each word by itself denoted many things of a given kind, or whether the two taken together might be referred to two distinct objects, or to one and the same object. The presence of the article *וְ*, and yet more of the demonstrative *אֵלֶּה* before each, is rather in favor of distinctness. *Thummim* never occurs by itself, unless with *Zullig* we find it in Psa. xvi, 5.

II. *Scriptural Statements.*—1. The mysterious words meet us for the first time, as if they needed no explanation, in the description of the high-priest's apparel. Over the ephod there is to be a "breastplate of judgment" (אֶפְדֹּד וְחֹשֶׁן דִּיּוּכָן, Sept. λογίον κρίσεως, Vulg. *rationale judicii*), of gold, scarlet, purple, and fine linen, folded square and doubled, a "span" in length and width. In it are to be set four rows of precious stones, each stone with the name of a tribe of Israel engraved on it, that Aaron may "bear them upon his heart." See EPHOD. Then comes a further order. Inside the breastplate, as the tables of the covenant were placed inside the ark (the preposition *בֵּין* is used in both cases, Exod. xxv, 16; xxviii, 30), are to be placed "the *Urim* and the *Thummim*," the light and the perfection; and they, too, are to be on Aaron's heart when he goes in before the Lord (ver. 15-30). Not a word describes them. They are mentioned as things already familiar both to Moses and the people, connected naturally with the functions of the high-priest, as mediating between Jehovah and his people. The command is fulfilled (Lev. viii, 8). They pass from Aaron to Eleazar with the sacred ephod and other *pontificalia* (Numb. xx, 28). When Joshua is solemnly appointed to succeed the great herolawgiver, he is bidden to stand before Eleazar, the priest, "who shall ask counsel for him after the judgment of [the] *Urim*," and this counsel is to determine the movements of the host of Israel (xxvii, 21). In the blessings of Moses, they appear as the crowning glory of the tribe of Levi ("thy *Thummim* and thy *Urim* are with thy Holy One"), the reward of the zeal which led them to close their eyes to everything but "the law and the covenant" (Deut. xxxiii, 8, 9). Once, and once only, are they mentioned by name in the history of the Judges and the monarchy. Saul, left to his self-chosen darkness, is answered "neither by dreams, nor by [the] *Urim*, nor by prophet" (1 Sam. xxviii, 6). There is no longer a priest with *Urim* and *Thummim* (Sept. τοῖς *φωρίζουσι καὶ τοῖς τελείοις*, Ezra ii, 63; ὁ *φωτισμὸν*, Neh. vii, 65) to answer hard questions. When will one appear again? The son of Sirach copies the Greek names (δῆλοι, ἀλήθεια) in his description of Aaron's garments, but throws no light upon their meaning or their use (Eccles. xlv, 10).

2. Besides these direct statements, there are others in which we may, without violence, trace a reference, if not to both, at least to the *Urim*. When questions precisely of the nature of those described in Numb. xxvii, 21 are asked by the leader of the people, and answered by Jehovah (Judg. i, 1; xx, 18)—when like questions are asked by Saul of the high-priest Ahiah, "wearing an ephod" (1 Sam. xiv, 3, 18)—by David, as soon as he has with him the presence of a high-priest with his ephod (1 Sam. xxiii, 2, 12; xxx, 7, 8), we may legitimately infer that the treasures which the ephod contained were the conditions and *media* of his answer. The questions are in almost all cases strategical, "Who shall go up for us against the Canaanites first?" (Judg. i, 1; so xx, 18), "Will the men of Keilah deliver me and my men into the hand of Saul?" (1 Sam. xxiii, 12), or, at least, national (2 Sam. xxi, 1). The answer is, in all cases, very brief; but more in form than a simple yes or no. One question only is answered at a time.

3. It deserves notice, before we pass beyond the range

of scriptural data, that, in some cases of deflection from the established religious order, we find the ephod connected not with the Urim, but with the Teraphim, which, in the days of Laban, if not earlier, had been conspicuous in Aramaic worship. Micah, first consecrating one of his own sons, and then getting a Levite as his priest, makes for him "an ephod and teraphim" (Judg. xvii, 5; xviii, 14, 20). Throughout the history of the northern kingdom, their presence at Dan made it a sacred place (ver. 30), and apparently determined Jeroboam's choice of it as a sanctuary. When the prophet Hosea foretells the entire sweeping-away of the system which the ten tribes had cherished, the point of extremest destitution is that "they shall be many days . . . without an ephod, and without teraphim" (Hos. iii, 4), deprived of all counterfeit oracles, in order that they may in the end "return and seek the Lord." It seems natural to infer that the teraphim were, in these instances, the unauthorized substitutes for the Urim. The inference is strengthened by the fact that the Sept. uses here, instead of teraphim, the same word (*δῆλων*) which it usually gives for Urim. That the teraphim were thus used through the whole history of Israel may be inferred from their frequent occurrence in conjunction with other forms of divination. Thus we have in 1 Sam. xv, 23 "witchcraft" and "teraphim" (A. V. "idolatry"), in 2 Kings xxiii, 24 "familiar spirits," "wizards, and teraphim" (A. V. "images"). The king of Babylon, when he uses divination, consults them (Ezek. xxi, 21). They speak vanity (Zech. x, 2). See TERAPHIM.

III. *Theories of Interpreters.*—When the Jewish exiles were met on their return from Babylon by a question which they had no data for answering, they agreed to postpone the settlement of the difficulty till there should rise up "a priest with Urim and Thummim" (Ezra ii, 63; Neh. vii, 65). The inquiry what those Urim and Thummim themselves were seems likely to wait as long for a final and satisfying answer. On every side we meet with confessions of ignorance—"Non constat" (Kimchi), "Nescimus" (Aben-Ezra), "Difficile est invenire" (Augustine), varied only by wild and conflicting conjectures.

1. Among these may be noticed the notion that, as Moses is not directed to *make* the Urim and Thummim, they must have had a supernatural origin, specially created, unlike anything upon earth (R. ben-Nachman and Hottinger in Buxtorf, *Diss. de Ur. et Th.* in Ugolino, xii). It would be profitless to discuss so arbitrary an hypothesis.

2. A favorite view of Jewish and of some Christian writers has been that the Urim and Thummim were identical with the twelve stones on which the names of the tribes of Israel were engraved, and the mode in which an oracle was given was by the illumination, simultaneous or successive, of the letters which were to make up the answer (*Jalkut Sifre, Zohar in Exod. f. 105; Maimonides, R. ben-Nachman, in Buxtorf, loc. cit.; Drusius, in Crit. Sac. on Exod. xxviii; Chrysostom, Grotius, et al.*). Josephus (*Ant. iii, 7, 5*) adopts another form of the same story, and, apparently identifying the Urim and Thummim with the sardonyxes on the shoulders of the ephod, says that they were bright before a victory, or when the sacrifice was acceptable, dark when any disaster was impending. Epiphanius (*De XII Gemm.*) and the writer quoted by Suidas (s. v. *Ἐφοῦδ*) present the same thought in yet another form. A single diamond (*ἀδάμας*) placed in the centre of the breastplate prognosticated peace when it was bright, war when it was red, death when it was dusky. It is conclusive against such views (1) that, without any evidence, without even an analogy, they make unauthorized additions to the miracles of Scripture; (2) that the former identify two things which in Exod. xxviii are clearly distinguished; (3) that the latter makes no distinction between the Urim and the Thummim, such as the repeated article leads us to infer.

3. A theory involving fewer gratuitous assumptions

is that in the middle of the ephod, or within its folds, there was a stone or plate of gold on which was engraved the sacred name of Jehovah, the *Shem-hammephorash* (q. v.) of Jewish Cabalists; and that by virtue of this, fixing his gaze on it, or reading an invocation which was also engraved with the name, or standing in his ephod before the mercy-seat, or at least before the vail of the sanctuary, he became capable of prophesying, hearing the divine voice within, or listening to it as it proceeded, in articulate sounds, from the glory of the Shechinah (Buxtorf, *loc. cit.* 7; Lightfoot, vi, 278; Braunius, *De Vestitu Hebr. ii; Saalschütz, Archäolog. ii, 368*). A wilder form of this belief is found in the Cabalistic book *Zohar*. There the Urim is said to have had the divine name in forty-two, the Thummim in seventy-two letters. The notion was probably derived from the Jewish invocations of books like the *Clavicula Salomonis*. See SOLOMON.

Another form of the same thought is found in the statement of Jewish writers that the Holy Spirit spake sometimes by Urim, sometimes by prophecy, sometimes by the Bath-Kol (*Seder Olam, c. xiv, in Braunius, loc. cit.*), or that the whole purpose of the unknown symbols was "ad excitandam prophetiam" (R. Levi ben-Gershon, in Buxtorf, *loc. cit.*; Kimchi, in Spencer, *ut inf.*). A more eccentric form of the "writing" theory was propounded by the elder Carpov, who maintained that the Urim and Thummim were two confessions of faith in the Messiah and the Holy Spirit (Carpov, *App. Crit. i, 5*).

4. Spencer (*De Ur. et Th.*) presents a singular union of acuteness and extravagance. He rightly recognises the distinctness of the two things which others had confounded. Whatever the Urim and Thummim were, they were not the twelve stones, and they were distinguishable one from the other. They were placed inside the folds of the doubled *chošhen*. Resting on the facts referred to, he inferred the identity of the Urim and the Teraphim. This was an instance in which the divine wisdom accommodated itself to man's weakness, and allowed the debased superstitious Israelites to retain a fragment of the idolatrous system of their fathers, in order to wean them gradually from the system as a whole. The obnoxious name of Teraphim was dropped. The thing itself was retained. The very name Urim was, he argued, identical in meaning with Teraphim (Urim = "lights, fires;" Seraphim = "the burning, or fiery ones;" and Teraphim is but the same word, with an Aramaic substitution of *ṭ* for *š*). It was therefore a small image probably in human form. So far, the hypothesis has, at least, the merit of being inductive and historical; but when he comes to the question how it was instrumental oracularly, he passes into the most extravagant of all assumptions. The image, when the high-priest questioned it, spoke by the mediation of an angel, with an articulate human voice, just as the Teraphim spoke, in like manner, by the intervention of a demon! In dealing with the Thummim, which he excludes altogether from the oracular functions of the Urim, Spencer adopts the notion of an Egyptian archetype, which will be noticed further on.

5. Michaelis (*Lucas of Moses, v, 52*) gives his own opinion that the Urim and Thummim were three stones, on one of which was written Yes, on another No, while the third was left blank or neutral. The three were used as lots, and the high-priest decided according as the one or the other was drawn out. He does not think it worth while to give one iota of evidence; and the notion does not appear to have been more than a passing caprice. It obviously fails to meet the phenomena. Lots were familiar enough among the Israelites (Numb. xxvi, 55; Josh. xiii, 6 sq.; 1 Sam. xiv, 41; Prov. xvi, 33), but the Urim was something solemn and peculiar. In the cases where the Urim was consulted, the answers were always more than a mere negative or affirmative.

6. The conjecture of Züllig (*Comm. in Apoc. Exc. ii*), though adopted by Winer (*Realw.*), can hardly be looked on as more satisfying. With him the Urim are bright, i. e. cut and polished, diamonds, in form like dice; the Thummim perfect, i. e. whole, rough, uncut ones, each class with inscriptions of some kind engraved on it. He supposes a handful of these to have been carried in the pouch of the high-priest's *choshen*, and when he wished for an oracle, to have been taken out by him and thrown on a table, or, more probably, on the ark of the covenant. As they fell, their position, according to traditional rules known only to the high-priestly families, indicated the answer. He compares it with fortune-telling by cards or coffee-grounds. The whole scheme, it need hardly be said, is one of pure invention, at once arbitrary and offensive. It is at least questionable whether the Egyptians had access to diamonds, or knew the art of polishing or engraving them. See DIAMOND. A handful of diamond cubes, large enough to have words or monograms engraved on them, is a thing which has no parallel in Egyptian archaeology, nor, indeed, anywhere else.

7. The latest Jewish interpreter of eminence (Kalisch, on *Exod. xxviii*, 31), combining parts of the views (2) and (3), identifies the Urim and Thummim with the twelve tribal gems, looks on the name as one to be explained by a hendiadys (light and perfection = perfect illumination), and believes the high-priest, by concentrating his thoughts on the attributes they represented, to have divested himself of all selfishness and prejudice, and so to have passed into a true prophetic state. In what he says on this point there is much that is both beautiful and true. Lightfoot, it may be added, had taken the same view (ii, 407; vi, 278), and that given above in (3) converges to the same result. See TRANCE.

8. Philo, the learned contemporary of Josephus, represents the Urim and Thummim as two images of the two virtues or powers—*δήλωσιν τε καὶ ἀλήθειαν*. The full quotation is: *Τὸ δὲ λογεῖον (the pectoral, or breast-plate); τετραγώνον, διπλοῦν κατασκευάζεται, ὡς ἀνὴρ βάσις, ἵνα δύο ἀρετὰς ἀγαματοφορῇ (that they might carry the image of the two powers); δὴλωσιν τε καὶ ἀλήθειαν (De Vita Mosie, lib. iii, p. 152, t. 2, ed. Mangey).* He also uses the following words (*De Monarch. lib. ii, p. 824; Orp. ii, 226*): *Ἐπὶ τοῦ λογείου διττὰ ὄψασματα καταποικίλλει, προσαγορεύων τὸ μὲν δὴλωσιν, τὸ δ' ἀλήθειαν.* This statement of Philo has been thought by many recent interpreters to be supported by certain external evidence. It had been noticed by all the old commentators that a remarkable resemblance existed between the Urim and Thummim of the Jewish high-priest and the custom recorded by Ælian (*Var. Hist. xiv, 347*) of the Egyptian archjudge, who was always a priest venerable for age, learning, and probity, and who opened judicial proceedings by suspending, by a gold chain hung round his neck (comp. *Gen. xli, 42*), an image made of a sapphire stone, which was called *Ἀλήθεια*, i. e. "truth," and with which Diodorus Siculus (i, 48, 75) says he touched (*προσέειρο*) the party who had gained the cause. Certain traces of a similar custom among the Romans had also been adverted to—namely, that among the Vestal Virgins, at least she that was called *Maxima*, and who sat in judgment and tried causes as the Pontifex Maximus did, wore a similar *antepectoral* (Lipsius, *De Vesta et Vestalibus Syntagma* [Antv. 1603, ap. Plant.], cap. ult.). But these resemblances among the Egyptians were considered to have been derived by them from the Jews, in consequence of their correspondence with them after Solomon's marriage with Pharaoh's daughter (Patrick, on *Exod. xxviii*, 30). Subsequent discoveries, however, among the antiquities of Egypt lead to the conclusion that these resemblances belong to a much earlier period. Sir G. Wilkinson says the figure of Truth which the Egyptian archjudge suspended from his neck was, in fact, a representation of the goddess who was worshipped under the *dual*, or double, character of 'Truth and Justice,

Ancient Egyptian Standing Figures of the Goddess of Truth and Justice.

and whose name, Thmei, the Egyptian or Coptic name of Justice or Truth (comp. the Greek *Θέμις*), appears to have been the *origin* of the Hebrew Thummim—"a word," he remarks, "according to the Sept. translation, implying truth, and bearing a further analogy in its plural termination." He also remarks that the word Thummim, being a plural or dual word, corresponds to the Egyptian notion of the "two Truths," or the double capacity of this goddess. "This goddess," he says, "frequently occurs in the sculptures in this double capacity, represented by two figures exactly similar," as in the

Ancient Egyptian Sitting Figure of the Goddess of Truth and Justice.

above cut. "It is," he adds, "further observable that the chief-priest of the Jews, who, before the election of a king, was also the judge of the nation, was alone entitled to wear this honorary badge. Does the *touch* of the successful litigant with the figure, by the Egyptian archjudge, afford any illustration of such passages as Isa. vi, 7; Jer. i, 9; Esth. v, 2, or of those numerous instances in which touching is represented as the emblem or

means of miraculous virtue?" Our authority for these Egyptian antiquities adds that the ancient (Sept.) interpretation of the Urim and Thummim, as signifying "light and truth," presents a striking analogy to the two figures of *Rê, the sun*, and *Thmei, truth*, in the breastplate worn by the Egyptians. Here Thmei is represented, as she frequently is, by a single figure wearing two ostrich feathers, her emblem, because all the wing-feathers of this bird were considered of equal length, and hence meant true or correct" (*Anc. Egypt.* [Lond. 1842], ii, 27, etc.; v, 28, etc. See also other remarks on the dual offices of Thmei, in *Gallery of Antiquities*, selected from the British Museum by F. Arundale and J. Bonomi). Upon a view of the preceding facts, even so orthodox an antiquarian as Hengstenberg (*Egypt and the Book of Moses*, ch. vi) adopts Mr. Mede's opinion,

Figures on Egyptian Breast-plates.

that the Urim and Thummim were "things well known to the patriarchs," as divinely appointed means of inquiring of the Lord (Gen. xxv, 22, 23), suited to an infantine state of religion; that the originals were preserved, or the real use at least, among the Abrahamidae, and, at the reformation under Moses, were simply recognised; that the resemblances to them among the Egyptians were but imitations of this primeval mode of divine communication, as were the heathen auspices of similar means originally connected with the sacrifice of animals.

In opposition to this view of a direct Egyptian origin of the objects in question, it has been forcibly urged (1) that the words *Urim* and *Thummim* do not, in fact, mean *Truth* and *Justice*; (2) that, with the exception of the single and undistinctive use of the term "judgment" (שֹׁפֵט) in connection with the *choshen*, or pontifical pectorale, there is no *magisterial* function of the high-priest in the cases of consultation, like that of the Egyptian archjudge; and (3) that, if such an image were intended, it is strange that no description is given to identify it, nor any prescription made as to its form or structure in the Mosaic account, as there is of all the other articles of the priestly regalia (see Keil, *Commentary*, ad loc.).

IV. *Oracular Use*.—The process of consulting the Lord by Urim and Thummim, and the form in which the answer was returned, are not explained in Scripture, and all we can say on the subject is from Rabbinical tradition. The rabbins say that the manner of inquiring was as follows: the priest put on his robes, and went (not into the sanctuary, where he could go but once a year), but into the sanctum, or holy place, and stood before the curtain or vail that divided the sanctuary from the sanctum. There he stood upright, facing towards the ark of the covenant, and behind him stood the person for whom he inquired, in a right line with the priest, facing the back of the latter, but outside the sanctum. Then the priest inquired of God concerning the matter required, in a low voice, like one praying half audibly, and, keeping his eyes upon the breastplate, he received by Urim and Thummim the answer to his question. Maimonides says it was not lawful to inquire by this mode for private individuals, but only for the king, or for him on whom the affairs of the congregation lay.

With respect to the mode in which the answer was returned, Prideaux, and some other Christian commentators, think that when the high-priest inquired of the Lord, standing in his robes before the vail, that an audible answer was returned from within. But the rabbins say that the answer was given by certain letters engraved on the stones in the breastplate becoming peculiarly, prominently lustrous, in proper order, so as to be read by the high-priest into words. For instance, when David inquired of God whether he should go up to one of the cities of Judah (2 Sam. ii, 1), the answer was, "Go up," עֲלֶה, *alah*; the letters א, ל, and ה became in order prominently lustrous, and thus formed the word. These explanations evidently depend upon the Talmudic theories above recited as to the form and nature of the objects themselves. See DIVINATION.

V. *Typical Significance*.—The office of the high-priest and his dress, as well as the tabernacle and its furniture and service, were all typical of the Christian dispensation, or of the office and person of Christ; in whom, also, the Urim and Thummim, as well as the other types and foreshadowings, were fulfilled. He was Light, Perfection, Manifestation, and Truth. He was the "true Light, that lighteth every man that cometh into the world" (John i, 9). "Being made perfect, he became the Author of salvation to all that obey him" (Heb. v, 9). He was "God manifest in the flesh" (1 Tim. iii, 16). He was "the Way, the Truth, and the Life" (John xiv, 6), and he "came to bear witness to the Truth" (xviii,

37). By Urim and Thummim a measure of the Holy Ghost was granted to the Jewish high-priest; Christ is a high-priest in whom are all the gifts of the Holy Ghost without measure (iii, 34). "He put on righteousness as a breastplate" (Isa. lix, 19); and by his merits and intercession as our continual High-priest, he has given to us to "put on the breastplate of faith and love" (1 Thess. v, 8). Some have seen the Urim and Thummim the object alluded to by John as "the white stone" (λίθος λευκὴ) of the Christian mysteries (Rev. ii, 17). See TYPE.

VI. *Literature*.—In addition to the works cited above, and those referred to by Winer (*Realwörterb.* s. v.) and by Darling (*Cyclop. Bibliograph.* col. 231 sq.), there are monographs on this subject in Latin by Calov (Viteb. 1675), Wolf (Lips. 1740), Schröder (Marb. 1741), and Stiebriz (Hal. 1753); and in German by Bellermann (Berl. 1824) and Saalschütz (Königsb. 1849). See HIGH-PRIEST.

Urius, in Greek mythology, was a surname of Jupiter, who sends good winds to those at sea.

**Uriya (or Orissa) Version.** Uriya, the vernacular dialect of Orissa (q. v.), is a tolerably pure dialect of the Sanscrit, possessing some Persian and Arabic terms, borrowed through the medium of the Hindustani, with others of doubtful origin. It is closely connected with Bengali, but greatly differing in pronunciation, for an effeminate style of articulation is prevalent in Bengal, while the inhabitants of Orissa have a broad and almost rustic accent. The Uriya has also a written character peculiar to itself.

The first version of the Scriptures in this dialect was commenced by the Serampore missionaries in 1803, and an edition consisting of one thousand copies of the New Test. was printed in 1811. The first edition of the Old Test., also consisting of one thousand copies, was printed in 1819. The New Test. was soon exhausted, and a second edition of four thousand copies left the press in 1822, in the same year in which a mission by the General Baptist Society was established at Cuttack, the capital of Orissa. In 1832 a second edition of the Old Test. left the press, together with a separate edition of the Psalms. In 1838 the Rev. Messrs. Sutton and Noyes undertook a new version of the Scriptures in Uriya. Dr. Sutton commenced with the book of Genesis, and when the translation was completed he carried on both the printing and binding at Cuttack. An edition of the Old Test. he completed for the Bible Society in 1844. In 1854 an edition of two thousand copies of the Gospel of St. Luke, from Dr. Sutton's version, was issued from the Cuttack press at the instance of the Bible Society. In the *Report* for 1863 we read that the New Test. has been revised, but the Old Test. has been reprinted as before. Whether Dr. Sutton completed his version or not we are unable to state. The only notice we find again concerning the Uriya version since 1863 is the statement made in the *Annual Report* of the British and Foreign Bible Society for the year 1873 that "the Rev. Dr. Buckley has completed the printing of a revised version of the Old Test. at the society's expense." From the *Report* for the year 1879 we see that up to March 31, 1879, the British and Foreign Bible Society had disposed of 4000 Bibles and Old Test., 34,000 copies of portions of the Old Test., and 2000 copies of portions of the New Test., or altogether of 40,000 copies, in part or in whole, of the Uriya version. (B. P.)

**Urlsperger, Johann August**, a German theologian and controversialist, was born Nov. 25, 1728, and during most of his public life was pastor and senior at Augsburg. He was possessed of great learning and penetration, and was a fearless and earnest thinker. He was also a foremost champion of evangelical truth against the attacks of the philosophical and rationalizing neologies of his country, and contributed several trenchant works to the literature of that controversy,

among them, *Versuche einer genauen Bestimmung des Geheimnisses Gottes* (1769-74, 4 pts. 4to):—*Kurzgefasstes System der Dreieinigkeitslehre*:—*Traktat vom göttlichen Ebenbilde*. He founded the "Deutsche Christenthums-Gesellschaft" (German Society for Christianity), the idea for which he took from the British Society for Promoting Christian Knowledge (founded 1698) and the Swedish society "De Fide et Christianismo." The society was first established in Basle, but failed to undertake the work for which Urlsperger had called it into being—the advocacy and defence of pure doctrine—and devoted its efforts rather to the promotion of true piety. Though disappointed, Urlsperger gave his services repeatedly to the society, and continued to travel over the Continent and to England in its behalf, until he died at Hamburg, Dec. 1, 1806. See Herzog, *Real-Encyklop.* s. v.: Lat comp. Smith's Hagenbach, *Hist. of Doctrines*, § 295, p. 3.

**Urlspurger, Samuel**, a Protestant divine of Germany, father of the preceding, was born Aug. 31, 1685, at Kirchheim, in Württemberg. He belonged to a Hungarian Protestant family, which with many others was obliged to leave the country during the Thirty Years' War. He studied at Tübingen, where he publicly spoke on *Ratio et fides collata contra Zuckium et Poiretum*. He continued his studies at Erlangen from 1708, and after a short stay at Jena and Halle, he went to Leyden, Utrecht, London, Oxford, and Cambridge. After his return to Germany, he was appointed pastor in 1713 at Stettin. In 1714 he went to Stuttgart as court preacher and member of consistory. Deposed from his office in 1718, he was appointed in 1720 superintendent at Herrenburg, and three years later he was called to Augsburg, where he died, April 21, 1772. Besides a number of sermons, he published, *Aufgeführte Nachrichten von den salzburgischen Emigranten, die sich in Amerika niedergelassen haben* (Halle, 1735-52, 3 vols.):—*Amerikanisches Ackerwerk Gottes oder zuverlässige Nachrichten von dem Zustande der von den salzburgischen Emigranten erbauten Stadt Eben-Ezer* (ibid. 1754-66). See Döring, *Gelehrte Theologen Deutschlands*, iv, 559 sq.; Koch, *Gesch. des deutschen Kirchenliedes*, v, 71 sq. (B. P.)

**Urquhart, John**, a graduate of the University of St. Andrew's, Scotland, and a youth of singular promise and piety, was born in Perth, June 7, 1808. In April, 1824, he made a decided profession of piety, and consecrated his powers entirely to the service of his Redeemer. He left the university in 1826 with the reputation of being by far the most eminent of his class, although then but seventeen years of age. He decided to become a missionary to the heathen, but, on account of his youth, was induced to wait a while before entering upon the arduous duties of that station. He died Jan. 10, 1827, at the age of eighteen. See his *Memoirs, Letters, and Select Remains*, by Orme.

**Urquhart, John F.**, a minister in the Methodist Episcopal Church, South, was born in Montgomery County, Ala., Sept. 15, 1841. He experienced religion when about nine years old, moved with his parents to Florida in 1852, joined the Florida Conference in 1860, and labored in it faithfully until his death, Aug. 19, 1864. Mr. Urquhart was a young man of lively spirit, refined and elevated by grace, and very promising. See *Minutes of Annual Conferences of the M. E. Church, South*, 1864, p. 522.

**Ursacius**, bishop of Lugidunum, in Mœsia, during the 4th century, is noted as being a disciple of Arius, and one of the prominent leaders of the Arian court-party. See Neander, *Hist. of the Church*, ii, 404 sq.

**Ursicinus**, antipope, was a deacon of Rome, and claimed the election as successor of Tiberius over Damasus (q. v.), who was elected (A.D. 366) by a larger party of the clergy and the Roman people, and was recognised by the emperor Valentinian I. After a pro-

tracted conflict, Ursicinus was driven out of Italy, and went to Cologne. He returned to Italy in 381, and renewed the agitation, but was finally banished by the Council of Aquileia. He is not included in the lists of popes. See Herzog, *Real-Encyklop.* s. v.

**Ursins** (*Orains*), the name of a French family eminent, from the 15th century, for its services in State and Church and historical literature. Two of them are appropriate here.

1. **JACQUES JOUVENEL DES**, brother of the succeeding, was born in Paris, Oct. 14, 1410, and became successively archdeacon of the Cathedral of Paris (1441) and archbishop of Rheims (Sept. 25, 1444); but in 1449 he resigned the latter position in favor of his brother, receiving the two dioceses of Poitiers and Fréjus. He died at Poitiers, March 12, 1457. He was occupied in several political and ecclesiastical negotiations of the time.

2. **JEAN JUVÉNAL** (or *Jouvenel des*, Jr., a prelate and historian, was born in Paris, Nov. 23, 1388, and, after studying at Orleans and Paris, became *doctor in utroque jure*, and enjoyed some minor offices; but was driven into exile with his parents in 1418. In 1425 he returned as advocate-general under Charles VII, and soon rose through lower ecclesiastical positions to the bishopric of Beauvais (1431). In 1444 he was transferred to the see of Laon, and in 1449 he became archbishop of Rheims, where he died, July 14, 1473. He was engaged in several diplomatic embassies, and wrote a number of ecclesiastical works, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

**Ursinus, Johann Heinrich**, a Protestant theologian of Germany, was born at Spire, Jan. 26, 1608, and died at Ratisbon, May 14, 1667, where he had been superintendent since 1655. He is the author of *Analectorum Sacrorum Libri Duodecim* (Frankf. 1668-70, 2 vols.):—*Compendium Histor. de Ecclesiis Germanicis. Origine et Progressu ab Adveniente Domini usque ad Carolum Magnum* (Nurem. 1664):—*Ecclesiastice sive de Sacris Concionibus* (Frankf. 1659):—*Sacrar. Concionum juxta Diversas Tractandi Methodos Paradigmata* (ibid. eod.). See Wiener, *Handb. der theol. Literatur*, i, 30, 778; ii, 58; Fürst, *Bibl. Jud.* iii, 462. (B. P.)

**Ursinus (BEER), Zacharias**, a German theologian of the 16th century, the friend and pupil of Melancthon, the friend of Calvin and Peter Martyr, and one of the two authors of the *Heidelberg Catechism*, was born at Breslau, July 18, 1534. He accompanied Melancthon to the religious colloquy of Worms in August, 1557; afterwards visited Calvin at Geneva; and, finally, went to Paris, where he studied Hebrew under Jean Mercier. On his return he was called to the service of his native city, and became fourth professor of the *Collegia Primi Ordinis* in September, 1558; but the mildness of his views respecting the eucharist having excited controversy, he solicited a release from that office, which was granted April 26, 1560. In this dispute he wrote the *Theses de Sacramentis* (in *Tract. Theol.* an. 1584, p. 339-382). He went to Zurich, and became the companion and pupil of Peter Martyr, with the result that he discovered himself to be no Lutheran, and not even a mere Philipist, but altogether a supporter of the views of Calvin, Beza, and Peter Martyr.

Ursinus was soon afterwards called to the *Collegium Sapientie* in Heidelberg, and to its duties afterwards added the chair of dogmatics. He began his theological prelections Sept. 1, 1562, and in the following year undertook also the delivery of the Sunday-afternoon sermon on the catechism. To these various duties he added the formation of a constitution for the churches of the Palatinate, in which he was aided by Olevian, but whose defence devolved on him alone. It was in the prosecution of this work that he began his active literary life. He wrote a *Verantwortung* against criticisms and perversions of the *Heidelberg Catechism*, which

formed the principal element in the new constitution; an *Antwort auf etlicher Theologen Censur*, and other works. When the Maulbronn Convention grew out of these discussions [see MAULBRONN], Ursinus was one of the colloquutors for the Palatinate, and demonstrated by his readiness and keenness that he was one of the ablest disputants of the time. The Württembergers having violated the agreement to refrain from publishing the proceedings, the Heidelbergers were obliged to respond; and the duty of correcting the perversions which had gone out before the public devolved again on Ursinus. From this time onward he was involved in the controversy about the correct interpretation of Art. x of the *Augsburg Confession*, in which the strict Lutherans insisted that Luther's writings, especially his polemical writings, should be considered the only guide, and endeavored to deprive all who did not hold their view of the legal standing assured to those who accepted the *Confession* as a statement of their faith. Weary of the endless dispute, Ursinus closed his share in the controversy in 1566, with the determination to write no more. He was worn out. His health was impaired, and he was obliged to seek relief from excessive labors by resigning the chair of dogmatics to Hieronymus Zanchius, Feb. 10, 1568. A few months later, however, a new conflict demanded his attention. George Withers, an Englishman, had defended in a disputation at Heidelberg the thesis that the administration of ecclesiastical discipline in all its extent belongs properly to the ecclesiastical ministerium in connection with an organized presbyteriate; and Olevian had endorsed that opinion, while Erastus opposed it. Each side gained adherents without being able to intimidate its opponents. Beza and Bullinger were called on for advice, and, eventually, Ursinus was required by the elector to state his views. He did this in 1569, in so candid and kindly a manner as to win approval even from those who did not accept his conclusions. The elector finally decreed the erection of presbyteries and the execution of discipline.

The accession of the elector Louis inaugurated a new order of things in the Palatinate, under which Lutheranism was able to regain its predominance. The *Collegium Sapientiae* was closed in September, 1577, and Ursinus was dismissed from his post. A professorship in Lausanne was at once offered him, but he declined it, and accepted, instead, a call to Neustadt, where the theology of the Reformed Church found a refuge in the *Collegium Illustre Casimirianum*. He had previously published, in Latin and German, the confession of faith appended to the late elector's will (1577), and was soon afterwards commissioned, in connection with Zanchius, to draw up for the Frankfort Synod (September, 1578) a confession which should be accepted in the Reformed churches of all European countries. This office he declined on the grounds of ill-health and distrust of his ability. He began his lectures on Isaiah May 26, 1578, and subsequently participated in the conflict over the acceptance of the *Formula Concordiae*, having contributed the most powerful argument in opposition to that measure. He died March 6, 1583, at Neustadt. His literary remains were intrusted to Prof. Jüngnitz, and he, with other friends of the departed scholar, collected and published many works which, until then, existed only in MS., and gave the author's name to others which had previously been anonymously published. The *Heidelberg Catechism*, with notes, and *Lectures on the Organon of Aristotle*, etc., were published at Neustadt. Pareus, at a later day, issued a corrected edition of the *Exposition of the Catechism* (Brem. 1623, 8vo); and a complete edition of Ursinus's works was issued by Reuter, his pupil and immediate successor in the *Sapientiae*.

vol. viii; Gillet, *Crato von Crafftheim* (Frankf. 1860); Herzog, *Real-Encyclop.* s. v.; Smith's Hagenbach, *Hist. of Doctrines*, ii, § 222, and § 223 a, 4.

**Urstier**, in Chinese and Persian mythology. There is said to be erected in China, at Miako, in a large pagoda, a statue of a bull entirely of gold. If the reports of the Holland expeditions are true, it is marvellous what a similarity there is in the fable of this bull and that worshipped by the Persians and Egyptians. He is represented as in the act of springing, with the intention of breaking an egg that lies swimming in the water close by a rock. The Chinese, Egyptians, and Persians agree in saying that in this egg the world lay hidden. This egg was swimming about the water until a rock appeared in the water, against which it leaned itself. Then the Urstier came, cracked the shell with his horns, and from this egg there sprang the world and all that is in the world, and the breath of the bull gave man life.

**Ursula** (St.) and *The Eleven Thousand Virgins*. The legend states that Ursula was the daughter of Theonotus, or Diognetus, of Britain. She was demanded in marriage by a heathen prince named Holofernes, and consented to his demand on condition that he should become a Christian and allow her three years before the marriage in which to make a pilgrimage. He conformed to her will, and, with his religion, changed his name into Ætherius; and she took ship with eleven thousand virgins. They went first to the port of Tila, in Gaul, and thence up the Rhine to Cologne and Basle, afterwards continuing the pilgrimage by land as far as Rome. When they returned, pope Cyriacus, with a retinue of clergy, joined the immense procession; and at Basle the bishop Paul, or Pantulus, likewise. At Cologne the returning pilgrims were attacked, while disembarking, by hordes of wild Hunnish barbarians and were all massacred, though the heathen king, Attila (Etzel), admired the beauty of Ursula and desired to spare her, that she might

St. Ursula. (From a picture by St. Cattarina de' Vigri, in the Bologna Gallery.)

become his wife. She fell pierced with an arrow, which has become her peculiar attribute in artistic representations of this saint. Immediately after the massacre heavenly hosts, equal in number to the murdered virgins, appeared and put the barbarians to flight. The delivered inhabitants of the city thereupon buried the fallen pilgrims, and erected to each one a stone bearing her name—the names having been obtained from James, a bishop, who was in the train of the pilgrims and who had found a refuge in a cave from the fate of his companions. Soon afterwards Clemanthus, a pilgrim from Greece, having been urged in repeated dreams, erected a church among the graves in honor of Ursula and her eleven thousand companions. The sanctity of this place of burial is apparent from the fact that no other interments, even though they be of the bodies of baptized children, can be performed in its hallowed soil.

The origin of the Ursula legend is probably to be found in the ancient martyrologies and saints' chronicles of a date earlier than the 12th century, the legend having been current in this form in Germany since that period, while a somewhat different version has prevailed in England. This rehearses that Maximus, the usurper in Gaul (383-388) and former commander in Britain, had required of king Dionotus of Cornwall a number of marriageable girls for his legionaries, and that the king at once forwarded sixty thousand virgins of common and eleven thousand of noble rank, among them his own daughter Ursula. They were driven by storms, "ad barbaras insulas appulsæ," and murdered by the Huns and Picts (?). The earliest mention of any similar event is found in the poetical martyrology (ad Oct. 21) of Wandelbert of Prüm, who died in 870 (see D'Achery, *Spicileg.* ii, 54). The martyrology of the monk Usuard of St. Germain, written about 875, mentions two virgins of Cologne, "Martha et Saula, cum aliis pluribus" (*Acta SS.* [Boll.] Jun. 7, 613), and various ecclesiastical calendars of Cologne of scarcely more recent date mention eleven virgins and give their names. The massacre itself is with great unanimity attributed to the Huns, under the command of Attila. For a thorough discussion of the extent to which the legend involves credible truth we refer to Zöckler, in Herzog's *Real-Encyclop.* s. v. See Crombach, *Ursula Vindicata*, etc. (Col. 1647, fol.), the most extensive work; id. *Auct. sive Lib. XII S. Ursule Vindic.* (4to); also Vadian, *Oratio de XI Milibus Virginum* (Vien. 1510); Usher in *Antiq. Eccles. Britan.* (Lond. 1687), p. 107 sq.; Baronius, *Martyrol. Rom.* ad Oct. 21; id. *Annales*, ad an. 383, No. 4, etc.; Jameson [Mrs.], *Legendary Art*, ii, 501 sq.

**Ursulines**, the name borne by the nuns and Theatines of a charitable order in the Church of Rome, which was founded Nov. 25, 1535, at Brescia by Angela Merici (q. v.), and became prominent among the benevolent orders instituted in the 16th century to impede the progress of the Protestant Reformation. Their original rule did not require ascetical retirement from the world nor the wearing of a peculiar dress. Even the obligation to chastity was rather recommended than imposed. But, after the papal confirmation of the order had been obtained (June 9, 1544), the rule became more strict. Formal congregations were organized, whose members, for the most part, lived together in convents. A girdle of leather to symbolize virginity was added to the garb. More extended measures to uniform and regulate the order were taken under the direction of cardinal Borromeo, who was from the first its zealous patron. By the end of the 16th century the order had become established in France, and rapidly increased the number of its convents. The single congregation of Paris possessed over eighty such houses. In time this congregation devised a new rule which was approved by pope Paul V, and has become the model for the rules of the congregations of Bordeaux, Dijon, and Lyons (see *Constitut. d. Religieuses de S. Urs. de la Congrég. de Paris*, 1648, and *Règlement*,

1673). It adds to the three solemn vows of Augustine a fourth, which requires the instruction of female youth. The garb consists of gray skirt, black robe, leathern girdle with iron buckle, black cloak without sleeves, a head-cloth with short white veil, and a large black thin veil over all. The French congregations originated the Ursuline order in Germany. In the time of its greatest extension the order consisted of about twenty loosely connected congregations, having, perhaps, 350 convents and 15,000 to 20,000 nuns, the maximum number of inmates being 60 nuns and 20 lay-sisters to a convent. The Ursulines are distinguished by a conscientious performance of the obligation to instruct the young. In Italy and Switzerland the *congregated* or non-regulated Ursulines compose the body of the order, and they observe a more ascetical rule than the regulated nuns. They devote eight days annually to the spiritual exercises prescribed by Loyola, teach young girls daily, catechise adults on Sunday, visit the sick, dispense alms, and hold conferences every Friday. Their novitiate extends over three years. The different houses are almost everywhere under the direction of the diocesan bishops. See *Les Chroniques de l'Ordre des Ursulines* (Paris, 1676), vol. ii; *Journal des Illustr. Religieuses de l'Ordre de S. Urs.* iv, 1690; Mayer, *Ursul.-Orden* (Würzburg, 1692); Helyot, *Geschichte aller Kloster- u. Ritter-Orden*, iv, 178 sq.; Crome, *Gesch. d. Mönchs-Orden*, ch. iv.—Herzog, *Real-Encyclop.* s. v. The first Ursuline colony in America was founded by Marie Guyart at Quebec in 1639; and there are now convents of this order also at Trois Rivières and Chatham, in Canada; and in the United States at Morrisania, N. Y.; at Cleveland, Toledo, and Fayetteville, O.; at Springfield and Alton, Ill.; at Columbia, Savannah, and Augusta, Ga.; at New Orleans, San Antonio, Galveston, Louisville, and St. Louis. But they have ceased to exist in Italy, Switzerland, and Germany since 1871.

Ursuline of Trois Rivières, Canada.

**Urued**, a title of the god *Bilgi* in Chaldean mythology, signifying "protector of the house." See Lenormant, *Chald. Magic*, p. 186.

**Uruker**, in Chaldean mythology, was the name of a wicked demon, "enormous" and "multifold." See Lenormant, *Chald. Magic*, p. 3, 10.

**Uru Sukhar**, in Chaldean mythology, was a title of the god *Bilgi*, signifying "protector of the family." See Lenormant, *Chald. Magic*, p. 186.

**Urwick**, WILLIAM, D.D., an Irish Congregational minister, was born at Shrewsbury, Dec. 8, 1791. He graduated at Hoxton College, and settled at Sligo; became interested in important discussions with the Roman Catholic divines, and by the brilliancy of his arguments and the overpowering force of his mind won for himself a place among the foremost defenders of the Gospel of Christ. In 1826 Dr. Urwick accepted the pastorate of York Street Chapel, Dublin, and during the long period of his public ministry was recognised as an able advocate of the religion of Christ. He was intimately associated with the Irish Evangelical Socie-

ty, Home Mission, and the Evangelical Alliance. He died July 19, 1868. See (Lond.) *Cong. Year-book*, 1869, p. 285.

**Usagers** and **COLLEGERS**, two parties existing in the Church of Scotland in the reigns of George I and George II. As the bishops who had been ejected from their sees during the Revolution were gradually removed by death, others were consecrated in their stead, without diocesan authority, to preserve the apostolic succession until the former condition of affairs should be restored. On the death of bishop Rose of Edinburgh, in 1720, the last of the old diocesan prelates, it was proposed that the Church should henceforth be governed by a college of bishops. The proposal was supported by the lay party and opposed by the clergy. Another cause of division arose in view of the fact that some of the diocesan party favored the adoption of certain *usages* into the Church of Scotland which had been lately revived in England, viz.: (1) mixing water with the wine; (2) commemorating the faithful departed; (3) the invocation in the prayer of consecration; (4) oblation before administration. Bishop Gadderar, one of the defenders of the usages, being subsequently chosen bishop of Aberdeen, the party opposed to the college system became identified with the usages. Hence the terms *Usagers* and *Collegers*.

**Use**, the form of external worship peculiar to any Church; also the ritual of a Church or diocese arranged by authority and generally followed. In England each bishop formerly had the power of making some improvements in the liturgy of his Church; in process of time different customs arose which were so distinct as to receive the name of "uses." We thus have the uses of Sarum, Bangor, York, Hereford, Durham, Lincoln. The Use of Sarum became the most general. All were practically abolished in the 16th century.

**Ushas**, in Hindû mythology, is one of the female deities of the Vedas—the Dawn. She is represented as possessing very pleasing attributes, such as the bringer of opulence, the giver of food, endowed with intellect, truth, and the like.

**Usher** (or **Ussher**), **James**, an illustrious prelate, and a great luminary of the Irish Church, was born at Dublin, Jan. 4, 1580. He was educated at Trinity College, Dublin, being one of the first three scholars matriculated. In 1601 he was ordained; in 1603 he became chancellor of St. Patrick's, and soon after professor of divinity at the university; in 1619 he was made bishop of Meath; and in 1624 he became archbishop of Armagh and primate. During the troubles arising out of the war between Charles I and the Parliament, Usher had to leave Ireland, and was subjected to much hardship, his property being seized and his revenues distrained. He obtained the see of Carlisle (*in commendam*), but from that but little emolument accrued to him. He afterwards became preacher at Lincoln's Inn, and was one of the six divines allowed by Parliament to confer with Charles at Carisbrook. No man could be matched against him in debate, and during the Civil War he preached many bitter sermons against the Independents. In 1642 he removed to Oxford, but, the king's power declining, he retired to Cardiff. He was recognised as one of the greatest scholars of his time. Richelieu is said to have offered him a high position in France. He declined a professorship at Leyden. His later years were spent in the family of lady Peterborough at Reigate, where he died, March 21, 1656. Usher was a laborious student, and amassed vast learning. His *Annales Vet. et Novi Test.* (1650-54, fol.) established his fame as a scholar and a chronologist, and fixed the Biblical chronology which has since been generally followed in this country, and which is adopted in the A. V. He wrote also *De Græca LXX. Versione Syntagma* :—

*Epistola ad L. Capellum de Variis Text. Heb. Lectionibus* (1652);—*Britannicarum Ecclesiarum Antiquitates* (1639, fol.; enlarged ed. 1677);—and a multitude of works on the ecclesiastical controversies of the day, and on some questions in theology. His library, for which he collected books and MSS. from all quarters, was, after his death, presented to the Dublin University, where it remains. He succeeded in obtaining six copies of the Samaritan Pentateuch and several MSS. of the Syriac version. His collected works have been edited by Dr. Elrington (1847, 16 vols. 8vo), with a life of the author.

**Usher, John** (1), an American Episcopal minister, was born in 1689; graduated at Harvard College in 1719; studied theology; went to England for holy orders, and returned as missionary of the Society for Propagating the Gospel in Foreign Parts; and was appointed to the mission at Bristol, R. I. He died at Bristol, April 30, 1775. See Sprague, *Annals of the Amer. Pulpit*, v, 48-50.

**Usher, John** (2), son of the preceding, was born at Bristol, R. I., 1722; graduated at Harvard College in 1743; practiced law for many years; commenced reading service, after the death of his father, in 1775; was ordained by bishop Seabury in 1793, and rector of the parish until 1800. He died July, 1804. See Sprague, *Annals of the Amer. Pulpit*, p. 49.

**Usous**, in Phœnician mythology, was, according to tradition, handed down by Sanchoniathon as a brother of Hypsuranius, who at first protected his body with hides of animals which he had killed; and when rains and winds came, and fire broke out through friction of the trees one with another, he risked himself upon a tree, whose branches he had cut off, out upon the treacherous sea. He dedicated two pillars to fire and wind, and sacrificed the blood of the animals he had slain.

**Usque**, **ABRAHAM**, whose Christian name was *Duarte Pinel*, belonged to those unhappy Jewish exiles who were driven from the Spanish peninsula in 1492. He sought refuge at Ferrara, in Italy, where he established, under the name of Abraham Usque, a great printing establishment, in order to supply the Marranos with Hebrew books. He not only edited various Rabbinical works, but also published the celebrated Spanish translation of the Hebrew Scriptures entitled *Biblia en Lengua Española, traduzida Palabra por Palabra de la Verdadera Hebraica, por muy excelentes letrados. Vista y examinada por el Oficio de la Inquisicion*, which he dedicated to Hercules II and Donna Gracia Nasi (Ferrara, 5313 = 1553). There is a great deal of dispute about this Bible, since two editions of it were simultaneously printed—the one edited by Duarte Pinel, at the expense of Gerónimo de Varjas, and the other edited by Abraham Usque, at the expense of Jom Tob Athias. But the difficulty is easily removed by identifying Usque with Pinel, De Vargas with Athias; Duarte Pinel being the Portuguese name and Abraham Usque the Jewish, and so Gerónimo de Varjas being the Spanish and Jom Tob Athias the Jewish name. There is no doubt that both were Marranos, and used their Christian name in the edition which was printed for the Spanish-speaking Christians; while in the edition for their Jewish brethren they used their Jewish name, under which they have become known. Usque, or Pinel, began this version in 1543 and completed it in 1553, after ten years of diligent labor. And though the names of the translators are not given, it being simply remarked "made by very excellent scholars" ("por muy excelentes letrados"), yet there can be but little doubt that he was the principal author of it. He adopted the literal translation of the Pentateuch published in the Constantinople Pentateuch Polyglot (1547), which was commonly in use by the Jews in Spain in the middle of the 16th century, and which is most probably the early Spanish translation of the Middle Ages falsely attrib-

uted to David Kimchi (see Steinschneider, *Jewish Literature*, p. 132). There were two editions, published simultaneously, as has already been intimated: one was intended for the Jews, and the other was designed to acquaint Spanish-speaking Christians with the Old Test. New editions of the former appeared at Ferrara, 1630; Amsterdam, 1611; Venice, 1617; and with corrections, improvements, and an introduction by Manasseh ben-Israel, Amsterdam, 1630; with tables of the Haphtaroth, indices of chapters, judges, kings, and prophets of Israel according to the סדר עולם, as well as with an elaborate introduction by Gillis Joost (ibid. 1646), and with a new preface and corrections by Sam. de Cazeris (ibid. 1661). See Fürst, *Bibl. Jud.* iii, 463 sq.; De Rossi, *Dizionario Storico*, p. 324 (Germ. transl.); id. *De Typographia Hebraeo-Ferrarensi*, p. 28-46; Steinschneider, *Catalog. Libr. Hebr. in Bibl. Bodl.* col. 195; Etheridge, *Introduction to Hebrew Literature*, p. 453; Ticknor, *History of Spanish Literature*, i, 41, note (Amer. ed.); Finn, *Sephardim*, p. 468 sq.; Lindo, *History of the Jews in Spain*, p. 361; Da Costa, *Israel and the Gentiles*, p. 394 sq.; Kitto, *Cyclop.* s. v.; Kayserling, *Gesch. d. Juden in Portugal*, p. 268; Grätz, *Gesch. d. Juden*, ix, 344 sq.; Rosenmüller, *Handbuch für die Literatur der bibl. Kritik und Exegese*, iv, 268 sq.; Simon, *Histoire Crit. du V. T.* p. 811. (B. P.)

**Ussermann, Æmilian**, a Roman Catholic divine of Germany, was born at St. Ulrich, in Baden, Oct. 30, 1737, occupied the chair of theology at Salzburg from 1767 to 1769, and died Oct. 27, 1798, as doctor of theology and capitulary in the monastery of the Benedictines of Sanct Blasien. He is the author of, *Episcopatus Wirceburg. sub Metropoli Moguntina Chronol. et Diplomat. Illustratus* (Sanct Blasien, 1794):—*Episcopatus Bamberg. . . . Illustr.* (ibid. 1801):—*Succincta Explicatio Locorum quorundam Difficiliorum Pentateuchi quoad Sensum Literalem, Moralem, Polemicum, Allegoricum et Antilogicum ex Contextu præcipue Locis Parallelis ac Linguis Adornata* (Munich, 1767):—*Compendium Syn-taxeos Hebraicæ, una cum Analysis Libri Geneseos*, etc. (Salzburg, 1769). See Fürst, *Bibl. Jud.* iii, 465; Winer, *Handbuch der theol. Literatur*, i, 779, 787. (B. P.)

**Usteri, Leonhard**, a Swiss theologian, was born Oct. 22, 1799, at Zurich. He studied in his native place, and having been ordained in 1820, he went to Berlin to attend the lectures of Schleiermacher. In 1823 he returned to his native city, and commenced a course of private lectures on the Pauline epistles. In 1824 he was called to Berne as professor and director of the gymnasium, and died there Sept. 18, 1833. He combined exact scholarship with philosophic depth and acumen. He wrote, *Commentatio Critica, in qua Joannis Evangelium Genuinum esse, ex Comparatis IV Evangeliorum de Cæna Ultima et de Passione Jesu Christi Narrationibus Ostenditur* (Turici, 1823), written against Bretschneider:—*Entwickelung des Paulinischen Lehrbegriffes in seinem Verhältnisse zur biblischen Dogmatik des Neuen Testaments*, etc. (Zurich, 1824; 6th ed. 1851):—*Commentar über den Brief Pauli an die Galater* (ibid. 1833). He also published some essays in the *Stud. u. Krit.* See *Theolog. Universal-Lex.* s. v.; Zuchold, *Bibl. Theolog.* ii, 1373; Winer, *Handbuch der theol. Literatur*, i, 32, 88, 261, 294; ii, 812. (B. P.)

**Ustick, Hugh Stewart**, a Presbyterian minister, was born at Bloomingburgh, O., Sept. 9, 1832. He pursued his academical studies in Salem Academy, Ross Co., O., and graduated at Miami University in 1853. He studied theology in New Albany Seminary; was licensed to preach by Chillicothe Presbytery in 1855; employed by the American Tract Society during 1856; and ordained as pastor of the Presbyterian Church at Hamilton, O., in May, 1857. He died Oct. 31, 1857. See Wilson, *Presb. Hist. Almanac*, 1864, p. 200.

**Ustick, Stephen C.**, a prominent Baptist layman, son of the Rev. Thomas Ustick, was born in New

York city in 1773. He was a printer by trade, and devoted himself to his secular calling with great activity. For many years he was a deacon in the Burlington, N. J., Baptist Church, and took a deep interest in all plans for religious work, both at home and abroad. For some time his home was in Washington, D. C. He removed to Batavia, O., in which place he died, Nov. 11, 1837. Mr. Ustick was one of the founders of the Baptist Triennial Convention, formed in 1814 with special reference to carrying on the work of foreign missions. See the *Missionary Jubilee*, p. 119. (J. C. S.)

**Ustur**, in Chaldean mythology, was a class of protecting genii with the face of a human being, and referred to in Ezekiel's (i, 10; x, 14) vision by the river Chebar. See Lenormant, *Chaldean Magic*, p. 121.

**Usuard**, a French hagiographer of the 9th century, was a monk of Saint-Germain-des-Prés at Paris. He wrote a *Martyrology* under the countenance of Charles the Bald, which was first printed at the end of *Rudimentum Novitiorum* (1475), and afterwards served as the basis of the *Martyrologium Romanum*. He died Jan. 8, 876 or 877. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Usurpation of a Benefice** is the act (by a stranger who has no right to do so) of presenting a clerk, who is thereupon admitted to, and instituted in, a Church benefice. Anciently such an act deprived the legal patron of his advowson; but now no usurpation can displace the estate or interest of the patron, but the true patron may present upon the next avoidance, as if no such usurpation had occurred.

**Usury** (אִשְׁתָּה, *néskek*, lit. a biting, i. e. extortion; *rókos*, yield; twice [Neh. v, 7, 10] מַשְׁחָה, *mashshá*, debt) is used in the A. V. in the Old-English sense of interest for money loaned, and not necessarily in the odious and later signification, an unlawful contract for the loan of money, to be returned again with exorbitant increase. By the laws of Moses the Israelites were forbidden to take usury from their brethren upon the loan of money, victuals, or anything else, not, it has been observed by Michaelis, as if he absolutely and in all cases condemned the practice, for he expressly permitted interest to be taken from strangers, but only out of favor to the poorer classes. In other words, he did not mean to represent that the taking of interest for the loan of money was in itself sinful and unjust; but as at that period the Israelites were comparatively a poor people and strangers to commerce, they borrowed, not with a view to profit, but from poverty, and in order to procure the common necessities of life. It would therefore have been a hardship to have exacted from them more than was lent. The Israelites were, however, permitted to take usury from strangers, from the Canaanites and other people devoted to subjection. This was one of the many means they adopted for oppressing and ruining the Canaanites who remained in the land. The Israelites were not a commercial people, nor were the laws and regulations under which they were placed framed with a view to encourage them to become such, but rather to preserve them in the possession of their family inheritances, and in the cultivation of a simple, unostentatious, frugal mode of life. Among themselves, therefore, only such lending as ministered help to the struggling poor, and served to tide them over trials and difficulties, was consistent with the spirit of the old economy; not such as tended to embarrass their circumstances, and at their expense enabled a grasping neighbor to enrich himself. This last is the only kind of usury forbidden in the law, and the avoiding of this is sometimes given among the characteristics of the upright and godly man (Psa. xv, 5; Jer. xv, 10). It is also that which when practiced was denounced as a crying iniquity, and exposed

those who did it to judicial condemnation (Prov. xxviii, 8).

The practice of mortgaging land, sometimes at exorbitant interest, grew up among the Jews during the Captivity, in direct violation of the law (Lev. xxv, 36, 37; Ezek. xviii, 8, 13, 17). We find the rate reaching 1 in 100 per month, corresponding to the Roman *centesimæ usuræ*, or 12 per cent. per annum—a rate which Niebuhr considers to have been borrowed from abroad, and which is, or has been till quite lately, a very usual or even a minimum rate in the East (Niebuhr, *Hist. of Rome*, iii, 57; Engl. transl.; Volney, *Trav.* ii, 254; note; Chardin, *Voy.* vi, 122); but under Turkish misrule it now often reaches 40 or 50 per cent. (Conder, *Tent Work in Palest.* ii, 268). Yet the law of the Koran, like the Jewish, forbids all usury (Lane, *Mod. Egypt.* i, 132; Sale, *Koran*, c. 30). The laws of Menu allow 18 and even 24 per cent. as an interest rate; but, as was the law in Egypt, accumulated interest was not to exceed twice the original sum lent (*Laus of Menu*, viii, 140, 141, 151; Jones [Sir W.], *Works*, iii, 295; comp. Diod. Sic. i, 9, 79). This Jewish practice was annulled by Nehemiah, and an oath exacted to insure its discontinuance (Neh. v, 3–13; comp. Selden, *De Jur. Nat.* vi, 10; Hoffmann, *Lex. s. v.* “*Usura*”). Our Saviour denounced all extortion, and promulgated a new law of love and forbearance: “Give to every man that asketh of thee, and of him that taketh away thy goods, ask them not again.” “Love ye your enemies, and do good, and lend, hoping for nothing again” (Luke vi, 30, 35).

The practice of usury was severely censured by the ancient Church and strictly forbidden to the clergy. One law prohibited a usurer from ordination. Many of the ancient canons condemned it in unmeasured terms. One of the canons of Nice says, “Forasmuch as many clerks, following covetousness and filthy lucre, and forgetting the Holy Scriptures (which speak of the righteous man as one that hath not given his money upon usury), have let forth their money upon usury, and taken the usual monthly increase, it seemed good to this great and holy synod that if any one, after this decree, shall be found to take usury, or demand the principal with half the increase of the whole, or shall invent any such methods for filthy lucre’s sake, he shall be degraded from his order, and have his name struck out of the roll of the Church.” The same practice is censured by the Apostolical Canons; the Council of Eliberis; the first and second councils of Arles; the first and third of Carthage; the Council of Laodicea and of Trullo. Usury was of various kinds; sometimes it was called *centesimæ*, the hundredth part of the principal being paid every month. This was allowed by the civil law, but it was generally condemned by the Church. Another form of usury was called *scescuplum*; that is, the whole and half as much more. This was condemned by a law of Justinian and reprobated by the Church. Other forms of lower interest were allowed, such as half or third of the centesimal interest. See Bingham, *Ecc. Antiq.* p. 200–201, 1014, etc.

But the taking of usury in the sense of receiving a reasonable rate of interest for the use of money employed in merchandise belongs to a different category, and is nowhere forbidden; nor is it more contrary to the law of love than the plying of merchandise itself for the sake of gain. Hence it is referred to in New-Test. Scripture as a perfectly understood and allowable practice (Matt. xxv, 27; Luke xix, 23)—a practice which the Jews of all ages, from the time of the Exile, when they began to be in a manner driven to commerce for their support, have felt themselves at liberty to carry on. That it may be, and often has been, carried on by them as well as others in a way far from consistent with the great principles of equity, there can be no doubt; but this belongs to the abuse, not to the use, of the liberty in question, and is to be condemned on commercial as well as moral grounds. Applied to Christian times, the spirit of the old enactments regarding usury

finds its fulfilment in the frank and timely ministration of pecuniary help from those who can give it to persons on whom misfortune and poverty have fallen, and, as regards commercial transactions, in the maintenance of upright and honorable dealings.

The exaction of an exorbitant rate of interest for the loan of money was first prohibited in England during the reign of Edward the Confessor; but that law is considered to have become obsolete, as in 1126 usury was forbidden only to the clergy, and in 1138 it was decreed by the Council that “such of the clergy as were usurers and hunters after sordid gain, and for the public employment of the laity, ought to be degraded.” In 1199, the last year of the reign of Richard I, the rate of interest for money was restricted to 10 per cent., which continued to be the market rate until the reign of Henry VIII. In 1311, Philip IV fixed the interest that might be exacted in the fairs of Champagne at 20 per cent. James I of Arragon, in 1242, fixed it at 18 per cent. In 1490 the rate of interest in Placentia was 40 per cent. Charles V fixed the rate of interest in his dominions at 12 per cent. In 1546 the rate in England was fixed at 10 per cent.; in 1624 it was reduced to 8; in 1651 to 6; and in 1714 to 5 per cent., at which it remained until 1833. By 3 and 4 William IV, c. 98, bills not having more than three months to run were exempted from the operation of the laws against usury, and by 1 Victoria, c. 80, the exemption was extended to bills payable at twelve months. By 2 and 3 Victoria, c. 37, it was enacted that bills of exchange and contracts for loans or forbearance of money above £10 shall not be affected by the usury laws. Five per cent. is still left as the legal rate of interest for money, unless it shall appear that any different rate was agreed upon between the parties. In most of the United States a certain rate (now generally six per cent.) is fixed by law, and penalties are imposed for exacting a higher rate. See LOAN.

**U'ta** (*Ovra*; Vulg. *Utha*), a corrupt Greek form (1 Esdr. v, 30) of the Heb. name (Ezra ii, 45) **AKKUB** (q. v.).

**Utanubaden**, in Hindû mythology, is the eldest son of king Suayambhu, the progenitor of the entire generation of men. He was married to Sunadi, by whom he had a son, Druwen, who already in his fifth year was a saint endowed by Vishnu with wisdom, and ruled the kingdom of his father through a period of twenty-six thousand years, and was finally transplanted into the polar star.

**Utenheim**, CHRISTOPH VON, bishop of Basle in the æra of the Reformation, and an unconscious agent in preparing the way for that change in his diocese, was born about 1450 of an ancient and noble family, and in time became a representative of the views of Gerson (q. v.). He was made a canon at Strasburg, and afterwards provost; became rector of the newly founded University of Basle, master, doctor of canon law, and, it is said, general of the Order of Cluniacensians. In A.D. 1500 he was made administrator of the diocese of Basle, and in 1502 bishop. He introduced an economical administration, which enabled him to liquidate the debts of his diocese, and in time to promote the interests of learning, but which, to some extent, offended his clergy, and caused the Council of Basle to suspect him of entertaining ambitious designs in the direction of recovering rights over the town which his predecessors had alienated for money. This dispute ended eventually in the refusal on the part of the town to pay the *bishop's penny*, which formed the last evidence of episcopal authority in secular matters. In spiritual and ecclesiastical matters, Utenheim also placed himself at once on the side of reform. In obedience to the directions of the Council of Basle, he framed synodal statutes, and convened a synod, Oct. 23, 1503, which he addressed in words of earnest exhortation and warning, to the end that a purer life among the clergy might restore

the Church to respect among the laity, and might introduce a purer morality among the people. The statutes he had prepared were then adopted; the clergy promised to conform to them, and pledged themselves to hold two synods annually, at which reports should be rendered concerning their own conduct and the moral and religious state of the people, and measures for further improvement should be devised. This endeavor was nevertheless fruitless, because opposition and disobedience from his clergy soon appeared in measure too great for him to control; but it led to the inception of a new plan for reforming the diocese, which has given this bishop a noteworthy place among the forerunners of the Reformation. In 1512 he called Capito (q. v.) to become preacher in the cathedral, and three years afterwards Ecolampadius, neither of them representatives of rigid Romanism, and both destined soon to become leaders in the tendency away from Rome. Erasmus was also valued by the bishop, and invited (June 13, 1517) to make Basle his home; and when Luther began his work, Utenheim rejoiced in his boldness, and read his writings with avidity. So late as 1519 Capito wrote to Luther that a learned and very upright bishop had promised a refuge to the Reformer in case of need, which bishop was certainly none other than Utenheim. It soon became apparent, however, that Luther's work was causing material damage to the bishop and bishopric of Basle, and the prelate thereupon began to take retrograde steps. He first demanded and received a coadjutor in his office. A public and notorious violation of the fast on Palm-Sunday furnished him with a desired occasion to issue a mandate forbidding the public mention of Luther and threatening punishment for all further transgressions of the law of fasting. Erasmus responded to that mandate in a circular letter addressed to the bishop, which may have restrained the latter from extreme measures, but which, nevertheless, caused his own expulsion from the town soon after Easter, 1522. It is certain that Utenheim always remained accessible to the evangelicals; but, on the other hand, he advised the Church of Zurich not to risk the second disputation set down for September, 1523, and joined the association of German bishops for giving effect to the Edict of Worms. He retained the friendship of Erasmus to the last, and permitted the latter to express his views respecting the Church very frankly. Worn out with age, ill-health, and anxiety, he retired in 1524 to Bruntrut. In February, 1527, he asked to be released from his official duties, and died March 16 of that year. See Sudanus, *Basilea Sacra*, etc. (Bruntrut, 1668); Ochs, *Gesch. d. Stadt Basel*, ch. iv; Erasmus, *Vlateno*, Th. Moro, etc.; Scultetus, *Annales ad A. 1519*; Wirz, *Helvet. Kirch.-Gesch.* v, 284; Wursten, *Basler Chronik*, p. 564; *Letters* of Herm. Busch and Glareau to Zwingli (ed. Schuler and Schulthess), vii, 1, 195-197; Ranke, *Deutsche Gesch. im Zeitalter d. Reformation*, ii, 518; Herzog, *Leben Ecolampadi's* (i, 9 sq.); *Beiträge zur Gesch. Basels* (1839), and *Real-Encyklop.* s. v.; also Tonjola, *Basilea Sepulta Detecta*, Appendix, p. 25.

**Utgard**, in Norse mythology, is the realm of Utgardsloki, lying at the end of the world, and is the land of giants and magicians. It became known from Thor's journey to Utgard.

**U'thai** [many U'thai] (Heb. *Uthay'*, *וּתַי*, help-ful), the name of two Hebrews.

1. (Sept. *U'wāṭi* v. r. *U'wāṭi*; Vulg. *Othei*.) A person (called "the son of Ammihud") of the family of Pharez, who resided at Jerusalem after the return from Babylon (1 Chron. ix, 4). B.C. 536. He is usually thought to be identical with **ATHAIAH** (q. v.) of the somewhat parallel passage (Neh. xi, 4); but none of the names in his ancestry (except Pharez) agree.

2. (Sept. *Oiṣai* v. r. *Oiṣai*; Vulg. *Uthai*.) First named of the two "sons of Bigvai," who returned with seventy males from Babylon with Ezra (Ezra viii, 14). B.C. 459.

**U'thi** (*Oēṣi*), the Greek form (1 Esdr. viii, 40) of the Heb. name (Ezra viii, 14) **UTHAI** (q. v.).

**Utilitarianism**, a term first applied to the doctrine of utility (q. v.) by John Stuart Mill, and adopted by very many since that time. The term *utility* was first employed to distinguish the doctrine by Jeremy Bentham. See Mill, *Utilitarianism*.

**Utility**, in ethico-philosophical terminology, is the doctrine that actions are right because they are useful or tend to promote happiness. It is thus defined by Mill (*Utilitarianism*, p. 9): "The creed which accepts as the foundation of morals utility, or the greatest happiness principle, holds that actions are right in proportion as they tend to promote happiness, wrong as they tend to produce the reverse of happiness. By happiness is intended pleasure and the absence of pain: by unhappiness, pain and the privation of pleasure." The fundamental objection to the doctrine is thus stated by Dr. Reid (*Active Powers*, essay v, ch. v): "Agreeableness and utility are not moral conceptions, nor have they any connection with morality. What a man does, merely because it is agreeable, is not virtue." See Fleming and Krauth, *Vocab. of Philos.* s. v.

**Utino**, LEONARDO DA, an Italian Dominican, rector of a gymnasium at Bologna, chaplain to Eugene IV, and provincial of his order for Lombardy, flourished in A.D. 1444. His works consist of two series of sermons and two treatises—*De Locis Communibus Prædicatorum* and *De Legibus*. See Mosheim, *Church Hist.* bk. iii, cent. xv, pt. ii, ch. ii.

**Utraquists**, a name at first given to all those members of the Western Church in the 14th century who contended for the administration of the eucharist to the laity *sub utraque specie*, i. e. in both kinds. The name was applied especially to the Calixtines (q. v.) in the 15th century. See Fisher, *Hist. of the Ref.* p. 178 sq. See **TABORITES**.

**Utrecht**, PEACE OF. Utrecht is a city of the Netherlands, capital of the province of the same name, and noted for the treaties which were signed there to close the War of the Spanish Succession. The preliminary terms of the treaty between Great Britain and France were signed Oct. 8, 1711. A congress was opened at Utrecht Jan. 12, 1712. Arrangements between the two powers were completed in August of the same year. Agreement was also reached with Holland, Portugal, Prussia, and Savoy soon afterwards. Each of the contracting parties treated in its own name, and hence there were as many as nine different treaties signed April 11, 1713. Many changes were made in the possessions of the powers named, and Protestantism made substantial gain on the continent of Europe.

**Utug**, in Chaldean mythology, is the generic name of the inferior and malevolent spirits properly called dæmons. They are said to inhabit the desert and to cause diseases of the forehead. See Lenormant, *Chaldean Magic*, p. 24 sq.

**Uua**, in Egyptian mythology, is the name of the bark or vessel in which the image of the deity Ra (the sun) was carried by the priests. See Lenormant, *Chaldean Magic*, p. 83.

**Uwienon**, COUNCIL OF (*Concilium Unienoriense*), was held in 1875, under Jaroslav, archbishop of Gnesen. Several statutes were drawn up for the reformation of ecclesiastical discipline, and a subsidy granted by the clergy towards the expenses of the war against the Turks. See Mansi, *Concil.* xi, 2043.

**Uytenbogaert** (*Uytenbogard*, *Wytembogard*), HANS, one of the most prominent and influential adherents of Arminius, after the death of that scholar a leader of the Remonstrants—an independent and earnest and yet a moderate and considerate man, everywhere maintaining a firm and upright character, and inces-

santly engaged in promoting peace among the parties of Protestantism—was regarded as the ablest and most distinguished preacher of his time among the Remonstrants. His custom was to avoid, as far as possible, the application of scholastic forms, and to base his discourses directly on the Scriptures. He was born at Utrecht in 1557, studied at Geneva under Beza, and became pastor in his native town in 1584. From this post he was dismissed in 1589, because of the moderate views he held respecting the already controverted doctrine of predestination. In 1590 he was called to the Hague, where he became chaplain to the court of the prince of Orange and tutor to his son, and acquired great reputation and influence. He united with Arminius in petitioning the States-General to convoke a synod at which they might defend their party and views against the charges continually urged against them by the Gomarists. An interview between Arminius and Gomarus was the only result of this effort, and the dispute was afterwards continued without any relaxation of its bitterness. Uytenbogaert carried himself with dignity throughout. He delivered an address before the States, in which he set before them the rights and duties they were bound to observe. He showed the inadmissibility of compulsory support of a symbol, demonstrated that the clergy itself had occasioned the troubles in the Church, and that its object was to enforce the principle of the independence of the spiritual power. He demanded that the States should examine the questions in dispute themselves and bring them to a conclusion; that in the event of a synod being convened no decisions should be reached before the opposing party should have had opportunity to be heard; and, finally, that if fraternity between factions could not be attained, mutual toleration at least should be insured. After the death of Arminius, in 1609, Uytenbogaert was associated with Episcopius in the leadership of his party and in the *Remonstrance* through which they presented their doctrinal system to the view of the States of Holland and West Friesland (1610). He accompanied an embassy to Paris as its chaplain about this time, and in the following year participated with Episcopius and others in a colloquy with their opponents at the Hague in the vain hope of securing peace. In 1616, Henry Roseus entered legal complaint against him on account of a particular exposition given by him of the five points of the *Remonstrance*. In 1619 he presided over a Remonstrant synod at Walwyck, which fact intensified the hostility to which he was exposed. He thereupon retired to Antwerp until 1622, during which time sentence of banishment and confiscation of property was pronounced against him, and afterwards to Rouen, in France. In 1626 he came back to Rotterdam and lived in secrecy, endeavoring to secure a revocation of his sentence and aiding with counsel and act in the measures of his party. His goods were restored to him in 1629, and in 1631 he was permitted to be present during public worship at the Hague. He was even allowed to preach a few times, but his enemies succeeded in compelling him to finally desist from exercising the functions of the ministry. He died Sept. 24, 1644. His writings are chiefly in the Dutch language. Among them are a *Church History* (Rotterdam, 1646):—a treatise *De Auctoritate Magistratus in Rebus Eccles.* (ibid. 1647):—and a translation of the *Confessio sive Declaratio Sententia Pastorum*. See Schröckh, *Christl. Kirchengesch. seit d. Reform.* (Leips. 1806), v. 226–276, and the literature there given; also Gieseler, *Kirchengesch.* (Bonn, 1852), iii, 21, 33; Herzog, *Real-Encyclop.* s. v.

**Uythage**, CONRAD CORNELIS, a Dutch scholar of the 17th century, is the author of *בלרי הנקודות, Revelatio Punctuationis sive Dissertatio de Antiquorum sine Punctis Legendi Ratione deque Vocalium Novitate* (Lugd. Bat. 1680):—*קריה בלרי נקודות, De Lectione Scripturæ S. Scriptorumque Rabbiorum absque Punctis*

(ibid. 1680):—*Artificium Investigand. Radd. Hebr. Brevis. Præceptis Comprehensum Exemplisque Illustratum et Consilium de Studio Rabb.*, etc. (ibid. 1682):—*Artificium Cognoscendarum Radicum Hebr. in Nominibus seu Derivatis Absolutis* (ibid. eod.):—*Explicatio R. Mosi Maimonidis super Patrum, s. Seniorum Judeor. Sententias complect. VIII Capita, ubi Præclara Multa, cum in Theologia tum Philosophia doctissime Explicantur* (ibid. 1683). All these writings are now very scarce. See Fürst, *Bibl. Jud.* iii, 466; Steinschneider, *Bibliog. Handb.* s. v.; Müller, *בית הספר, or Catalogue of Hebrew and Jewish Works* (Amst. 1868), p. 323. (B. P.)

**Uz** (Heb. *Úz*, עֶז, wooded), the name of three men, and also of a region.

1. (Sept. *Óz* v. r. *ʾŪc*, Vulg. *Us* or *Hus*.) First named of the four sons of Aram (Gen. x, 23), and grandson of Shem (1 Chron. i, 17, where the lineage is condensed). B.C. post 2500.

2. (Sept. *Óz*, Vulg. *Hus*, A. V. "Huz.") The oldest of the eight sons of Nahor by Milcah (Gen. xxii, 21). B.C. cir. 2000.

3. (Sept. *ʾŪc*, Vulg. *Hus*.) First named of the two sons of Dishan the Horite chieftain (Gen. xxxvi, 28; 1 Chron. i, 42). B.C. post 1950.

4. THE LAND OF UZ was the country in which Job lived (Job i, 1; Sept. *Αὐστρις*, Vulg. *Hus*). As the genealogical statements of the book of Genesis are undoubtedly ethnological, and in many instances also geographical, it may fairly be surmised that the coincidence of names in the above cases is not accidental, but points to a fusion of various branches of the Shemitic race in a certain locality. This surmise is confirmed by the circumstance that other connecting-links may be discovered between the same branches. For instance, Nos. 1 and 2 have in common the names Aram (comp. Gen. x, 23; xxii, 21) and Maachab as a geographical designation in connection with the former (1 Chron. xix, 6), and a personal one in connection with the latter (Gen. xxii, 24). Nos. 2 and 4 have in common the names Buz and Buzite (ver. 21; Job xxxii, 2), Chésed and Chasdim (Gen. xxii, 22; Job i, 17, A. V. "Chaldeans"), Shuah, a nephew of Nahor, and Shubite (Gen. xxv, 2; Job ii, 11), and Kedem, as the country whither Abraham sent Shuah, together with his other children by Keturah, and also as the country where Job lived (Gen. xxv, 6; Job i, 3). Nos. 3 and 4, again, have in common Eliphaz (Gen. xxxvi, 10; Job ii, 11), and Teman and Temanite (Gen. xxxvi, 11; Job ii, 11). The ethnological fact embodied in the above coincidences of names appears to be as follows: Certain branches of the Aramaic family, being both more ancient and occupying a more northerly position than the others, coalesced with branches of the later Abrahamids, holding a somewhat central position in Mesopotamia and Palestine, and again with branches of the still later Edomites of the south, after they had become a distinct race from the Abrahamids. This conclusion would receive confirmation if the geographical position of Uz, as described in the book of Job, harmonized with the probability of such an amalgamation. As far as we can gather, it lay either east or south-east of Palestine (Job i, 3) [see BENE-KEDDEM]: adjacent to the Sabæans and the Chaldeans (Job i, 15, 17), consequently northward of the Southern Arabians, and westward of the Euphrates; and, lastly, adjacent to the Edomites of Mount Seir, who at one period occupied Uz, probably as conquerors (Lam. iv, 21), and whose troglodytic habits are probably described in Job xxx, 6, 7. The position of the country may further be deduced from the native lands of Job's friends, Eliphaz the Temanite being an Idumaean, Elihu the Buzite being probably a neighbor of the Chaldeans, for Buz and Chésed were brothers (Gen. xxii, 21, 22), and Bildad the Shubite being one of the Bene-Kedem. Whether Zophar the Naamathite is to be connected with Naamah in the tribe of Judah (Josh. xv, 41) may be regarded as

problematical: if he were, the conclusion would be further established. From the above data we infer that the land of Uz corresponds to the *Arabia Deserta* of classical geography, at all events to so much of it as lies north of the 30th parallel of latitude. This district has in all ages been occupied by nomadic tribes, who roam from the borders of Palestine to the Euphrates, and northward to the confines of Syria. See JOB.

"The land of Uz" is mentioned only in two other passages of Scripture. Jeremiah in one passage (xxv, 20; Sept. *Oûz*, Vulg. *Ausitis*) groups it with Egypt, Philistia, Edom, and Moab; and in another he appears either to identify it with a portion of Edom, or to affirm that some of the Edomites in his days inhabited Uz (Lam. iv, 21; *Oûz*, *Hus*). These various statements show that Uz was closely connected with Edom, and thus in general corroborate the above position. See IDUMÆA.

As to later opinions, Josephus says that Uz founded Trachonitis and Damascus (*Ant.* i, 6, 4). The former province lies in Bashan, and extends as far south as Bostra. It may have formed part of the land of Uz. Jerome appears to identify Uz with Damascus and Trachonitis, following Josephus (*Quæst.* in *Gen.* x, 25; comp. *Onomast.* s. v. "Uz"). Bochart makes no less than three places of this name: 1. The *Ghutah* of Damascus, confounding the Arabic *Ghutah* with the Heb. *ḡṭṭā*; words which are altogether dissimilar; 2. The region of *Ausitis*, named from Uz, the son of Nahor (*Gen.* xxii, 21); 3. Uz of Edom, the land of the patriarch Job (*Opera*, i, 80). There seems to be no sufficient authority for this threefold division. The general opinion of Biblical geographers and critics locates "the land of Uz" somewhere in *Arabia Petrea*. Whether the name of Uz survived to classical times is uncertain: a tribe named *Æsitis* (*Αἰσιταί*) is mentioned by Ptolemy (v, 19, 2); this Bochart identifies with the Uz of Scripture by altering the reading into *Αἰσιταί* (*Phaleg*, ii, 8); but, with the exception of the rendering in the Sept. (*ἡ χώρα τῆς Αἰσιτῶν*, Job i, 1; comp. xxxii, 2), there is nothing to justify such a change. Gesenius (*Thesaur.* p. 1003) is satisfied with the form *Æsitis* as sufficiently corresponding to Uz, without any such change; as also Winer (*Realw.* s. v.) and most others. See Spanheim, *Hist. Jobi*, iv, 10 sq.; Buddei *Hist. V. T.* i, 370; Carpov, *Introd.* ii, 42; Müller, *De Terra Jobi*, in the *Thea. Vet. Test.* i, 540; Fries, in the *Stud. u. Krit.* 1854, vol. ii; and the commentaries on Job. See ARABIA.

Uza, in Oriental mythology, was an idol of the ancient Arabians which Mohammed destroyed, ordering its priests to be strangled.

**U'zai** [most *U'zai*] (Heb. *Uzay*, *זְאִי*, *strong*; Sept. *Εὐζαί* v. r. *Εὐέ*, Vulg. *Ozi*), the father of Palal, which latter was one of those who aided in the reconstruction of the walls of Jerusalem after the Captivity (Neh. iii, 25). B.C. ante 446.

**U'zal** (Heb. *Uzal*, *זֶזַל*, perhaps *separate*; Sept. *Αἰζήλ* and *Αἰζήν*, v. r. *Αἰζήλ* and *Αἰσήλ*; Vulg. *Uzal* and *Huzal*), the sixth named of the thirteen sons of Joktan among the descendants of Shem (*Gen.* x, 27; 1 Chron. i, 21). B.C. post 2400. See JOKTAN.

Abraham Zakuth, a learned Jewish writer, states that *Sanaa*, the metropolis of Yemen, is by the Jews called *Uzal* (Bochart, *Opera*, i, 114); and in the *Kamûs*, *Uzal* (or *Uzal*) is said to be the ancient name of Sanaa (Goli-us, *Lex. A. rab.* s. v.). This was still further confirmed by Niebuhr, who heard, when travelling in Yemen, the same statement made by Mohammedan natives (*Description de l'Arabie*, iii, 252). It was originally *Awzâl* (Ibn-Khaldûn, ap. Caussin, *Essai*, i, 40, note; *Marâsid*, s. v.; Gesen. *Lex.* s. v.; Bunsen, *Bibelwerk*, etc.). The printed edition of the *Marâsid* writes the name *Uzâl*, and says, "It is said that its name was *Uzâl*; and when the Abyssinians arrived at it, and saw it to be beautiful, they said 'San'â,' which means beautiful: therefore it was called San'â." The Hebrew name probably appears

in the *Ausara* (*Αὐσαρα* or *Αὐζαρα*) of Ptolemy (*Geogr.* vi, 7), and the *Ausaritis* of Pliny, a city of Arabia Felix, celebrated for its myrrh (*Hist. Nat.* xii, 36). See ERNOLOGY.

*Sanaa* is situated in a mountainous region in the centre of Yemen, about 150 miles from Aden and 100 from the coast of the Red Sea. Its commanding position, its strong fortifications, the number of its mosques and minarets, and the size of its houses render it one of the most imposing cities in Arabia. It has a citadel on the site of a famous temple called Beit-Ghumdân, said to have been founded by Shurabîl, which was razed by order of Othman. It is abundantly watered by mountain streams; and the gardens, orchards, and fields around it are said to rival in luxuriance and beauty the famous plain of Damascus. In the town of Sanaa there are still some 15,000 Jews, while in the various parts of Yemen their numbers are supposed to amount to 200,000. See Michaelis, *Spicileg.* ii, 164-175; Forster, *Geogr. of Arabia*, i, 143; Ritter, *Erskunde*, xii, 815-840. See ARABIA.

Ezekiel, in his description of Tyre, says, as rendered in the A. V.: "Dan and Javan going to and fro (Heb. *Meizâi*, *מֵיזַי*; Sept. *ἰξ* 'Ασιήλ; Vulg. *Mosel*), occupied in thy fairs; bright iron, cassia, and calamus were in thy market" (xxvii, 19). The structure of the passage unquestionably favors the translation, "Dan, and Javan of *Uzal* (*זֶזַל*), conveyed to your markets wrought iron, cassia," etc. There can be little doubt, therefore, that the prophet alludes to the great city of Yemen, the neighborhood of which is known to have been famous for its spices and perfumes. This view is strengthened by the fact that Javan occurs in the *Kamûs*, and is said to be a town of Yemen. The expression Javan of Uzal is thus appropriate, for the latter was the name of the capital and of a district connected with it. The names Dedan, Arabia, Kedar, and Sheba, following immediately in the prophetic narrative, indicate the country to which the eye of the sacred writer was directed. See JAVAN.

**Uz'za** (Heb. *Uzza*, *זְזָא*, *strength*), the name of three Hebrews. See also UZZAH.

1. (Sept. *A'za*; Vulg. *Oza*.) First named of the two sons of Ehud the Benjamite, born to him after the removal of his former children (1 Chron. viii, 7). B.C. ante 1612. See SHAHARAIM.

2. (Sept. *O'za*; Vulg. *Aza*.) Apparently the proprietor of a garden in which Manasseh and Amon were buried (2 Kings xxi, 18, 26). B.C. ante 642. See below.

3. (Sept. *A'za* v. r. *A'zû*, *A'zi*, etc.; Vulg. *Aza*.) The head of a family of Nethinim who returned from Babylon with Zerubbabel (*Ezra* ii, 49; Neh. vii, 51). B.C. ante 536.

UZZA, THE GARDEN OF (Heb. *gan Uzzâ*, *זֶזַא גֶּן*; Sept. *κηπος* 'Οζά; Vulg. *hortus Aza*), the spot in which Manasseh, king of Judah, and his son Amon, were both buried (2 Kings xxi, 18, 26). It was the garden attached to Manasseh's palace (ver. 18; 2 Chron. xxxiii, 20), and therefore presumably was in Jerusalem. The fact of its mention shows that it was not where the usual sepulchres of the kings were. Josephus (*Ant.* x, 3, 2) simply reiterates the statement of the Bible. It is ingeniously suggested by Cornelius a Lapide that the garden was so called from being on the spot at which Uzzah died during the removal of the ark from Kirjath-jearim to Jerusalem, and which is known to have retained his name for long after the event (2 Sam. vi, 8). See OBEID-EDOM. The scene of Uzzah's death was itself a threshing-floor (ver. 6), and the change of the word from this, *gôren*, *גֶּרֶן*, into *gan*, *גֶּן*, garden, would not be difficult or improbable.

Bunsen (*Bibelwerk*, note on 2 Kings xxi, 18), on the strength of the mention of "palaces" in the same paragraph with Ophel (A. V. "forts") in a denunciation of

Isaiah (xxxii, 14), asserts that a palace was situated in the Tyropœon valley at the foot of the Temple mount, and that this was in all probability the palace of Manasseh and the site of the Garden of Uzzah! See UZZAH.

**Uz'z'ah** (Heb. *Uzzah'*, *וִּזְזָה*, strength, i. q. *Uzza*, which in a few passages stands instead of it; Sept. *Oz'á* [and so Josephus] v. r. *A'zá*; Vulg. *Oza*), the name of two Hebrews.

1. A Merarite Levite, son of Shimei (q. v.) and father of Shimea (1 Chron. vi, 29 [Heb. 14]; A. V. "Uzza"). B.C. ante 1043. For a refutation of some arbitrary hypotheses of interpreters on this genealogy, see Keil *ad loc.*

2. One of the sons of Abinadab, in whose house at Kirjath-jearim the ark rested for twenty years. In 2 Sam. (vi, 3 in the A. V.; and in verses 6, 7, 8 in the Heb. also) he is invariably called "Uzzah;" but in 1 Chron. (xiii, 7, 9, 11) as invariably "Uzza." The eldest son of Abinadab (1 Sam. vii, 1) seems to have been Eleazar, who was consecrated to look after the ark. Uzzah, probably, was the second, and Ahio (q. v.) the third. The latter two accompanied its removal when David first undertook to carry it to Jerusalem. B.C. 1043. Ahio apparently went before the cart—the new cart (1 Chron. xiii, 7)—on which the ark was placed, and Uzzah walked by its side. The procession, with all manner of music, advanced as far as a spot variously called "the threshing-floor" (ver. 9); "the threshing-floor of Chidon" (ibid.); "the threshing-floor of Nachon" (2 Sam. vi, 6, Sept. "Nachor"). At this point—perhaps slipping over the smooth rock—the oxen (Sept. "the calf") stumbled (Sept. "overturned the ark"). Uzzah caught it to prevent its falling. He died immediately by the side of the ark. His death, by whatever means it was accomplished, was so sudden and awful that, in the sacred language of the Old Test., it is ascribed directly to the divine anger. "The anger of the Lord was kindled against Uzzah, and God smote him there." "For his error," *וְעַל חַטָּאתוֹ*, adds the Hebrew text, "because he put his hand to the ark" (1 Chron. xiii, 10). Josephus (*Ant.* vii, 4, 2) makes the sin to be because he touched the ark not being a priest (see below). But the narrative seems to imply that there was a rough, hasty handling of the sacred coffer. The event produced a deep sensation. David, with a mixture of awe and resentment, was afraid to carry the ark farther; and the place, apparently changing its ancient name [see UZZA, GARDEN OF], was henceforth called "Perez-Uzzah" (q. v.), the "breaking" or "disaster" of Uzzah (2 Sam. vi, 8; 1 Chron. xiii, 11). See DAVID.

Josephus distinctly says that Uzzah was of a Levitical family (*Ant.* vi, 1, 4). It was because Abinadab, his father, was a Levite, no doubt, that the ark was taken into his house at Kirjath-jearim, as it was afterwards taken into the house of Obed-edom, the Gittite, for the same reason. Nor can it be very well understood how, if Abinadab was not a Levite, his son Eleazar should have been consecrated to take charge of the ark (1 Sam. vii, 2). It is possible that Abinadab (Sept. *Ἀμινάδαβ*, Josephus, *Ἀμινάδαβος*) was the same as *Aminadab*, spoken of in 1 Chron. xv, 10 as one of the chiefs of the Levites appointed by David to bring up the ark from the house of Obed-edom to Jerusalem. It is most reasonable to suppose that the person who had entertained the ark at Kirjath-jearim should have the honor of attending its coming-up afterwards from the house of Obed-edom to Jerusalem; and Aminadab was a son of Uzziel, and therefore of the family of Kohath, who were the persons appointed to bear the ark (vi, 18; Numb. iv, 15). But they were forbidden to touch the ark. It was only a priest of Aaron's family, i. e. of the high-priest's family, that was allowed to touch the ark (ver. 5, 15). The sin of Uzzah, therefore, was not, as commonly represented, that of a layman or an undedicated person presuming to encroach upon the office of

X.—X x

the ministry, but, if an irregularity at all in this respect, the sin of those who, being ministers, dare to arrogate to themselves powers and prerogatives which belong only to higher officers.—Fairbairn. The whole proceeding was very disorderly, and contrary to the distinct and far from unmeaning regulations of the law, which prescribed that the ark should be carried on the shoulders of the Levites (Exod. xxv, 14), whereas here it was conveyed in a cart drawn by oxen. The ark ought to have been enveloped in its coverings, and thus wholly concealed before the Levites approached it; but it does not appear that any priest took part in the matter, and it would seem as if the ark was brought forth, exposed to the common gaze, in the same manner in which it had been brought back by the Philistines (1 Sam. vi, 13–19). It was the duty of Uzzah, as a Levite, to have been acquainted with the proper course of proceeding; he was therefore the person justly accountable for the neglect, and the judgment upon him seems to have been the most effectual course of insuring attention to the proper course of proceeding, and of checking the growing disposition to treat the holy mysteries with undue familiarity. That it had this effect is expressly stated in 1 Chron. xv, 2, 13. See ARK.

**Uz'sen-she'rah** (Heb. *Uzzen' She'rah*, *וִּזְזֵן שֶׁרָה*, ear [i. e. point] of *Sherah*; Sept. *vioi' O'z'án* *Σερρά*; Vulg. *Ozenera*), a place in the vicinity of Beth-horon, founded or rebuilt by Sherah (q. v.), an Ephraimitess (1 Chron. vii, 24). The name appears to indicate some salient feature of the surface or position. It has been thought to correspond with the present *Beit Sira*, which is shown in the maps of Van de Velde and Tobler as on the north side of the Wady Suleiman, about three miles south-west of Beitúr et-Tahta. It is mentioned by Robinson (in the lists in Appendix to vol. iii of *Bibl. Res.* [1st ed.], p. 120), and also by Tobler (*Dritte Wanderung*, p. 188). It is doubtful, however, if the boundary of Ephraim ever extended so far south, and hence perhaps we should prefer *Beit Sira*, a village with two fountains in Wady Budrus, two and a half miles east of Beitúr el-Fohka; or if both these identifications fail, possibly the modern village *Suffa*, in Wady Budrus, about one mile north-west of Beitúr et-Tahta (Robinson, *Bibl. Res.* ii, 250).

**Uz'zi** (Heb. *Uzzi'*, *וִּזְזִי*, strong [or my strength, or contr. for *Uzziah*]; Sept. *O'zi*, with occasional v. rr.; Vulg. *Ozi* or *Azzi*), the name of six Hebrews.

1. First named of the six sons of Tola son of Issachar (1 Chron. vii, 2), and father of five sons who became military chiefs (ver. 3). B.C. post 1874.

2. Second named of the five sons of Bela son of Benjamin, and, like the preceding one, chief warrior (1 Chron. vii, 7). B.C. post 1874.

3. A high-priest, son of Bukki and father of Zerachiah (1 Chron. vi, 5, 6, 51; Ezra vii, 4). B.C. cir. 1400. Josephus in one passage (*Ant.* v, 11, 5) gives his name and position correctly (*O'zig, Ozis*); but in another (*Ant.* viii, 1, 3) he calls either him or his son Joatham (*Ἰωάθαμος*).

4. Son of Michri and father of Elah among the ancestors of a Benjamite family in Jerusalem after the Exile (1 Chron. ix, 8). B.C. ante 536.

5. Son of Bani, chief of the Levites at Jerusalem after the Captivity (Neh. xi, 22). B.C. 536.

6. A priest, head of the "course" of Jedaiah in the time of the high-priest Joiakim (Neh. xii, 19). B.C. cir. 500. He was probably the same with one of the priests who sang at the consecration of the new walls of Jerusalem (ver. 42).

**Uzzi'a** (Heb. *Uzziya'*, *וִּזְזִי'א*, prob. for *Uzziah* [q. v.]; Sept. *O'zia*; Vulg. *Ozia*), one of David's subordinate warriors, called an "Ashterathite" (q. v.), probably as having come from Ashtaroth beyond the Jordan. B.C. 1053. See DAVID.

**Uzzi'ah** (Heb. *Uzziyah'*, *זְצִיָּה*, *strength of Jehovah* [but in the prolonged form *Uzziya'hu*, *זְצִיָּהּ*, except in 2 Kings xv, 13, 30; 1 Chron. vi, 24; Ezra x, 21; Neh. xi, 4; Hos. i, 1; Amos i, 1; Zech. xiv, 5]; Sept. usually *O'ziac*, but with many v. rr.; Vulg. *Ozias* or *Azias*), the name of five Hebrews. See also UZZIA.

1. A Kohathite Levite, son of Uriel and father of Shaul among Samuel's ancestors (1 Chron. vi, 24 [Heb. 19]). B.C. cir. 1515. He is apparently the same with AZARIAH (q. v.) the son of Joel and father of Zephaniah in the parallel list (ver. 36).

2. The father of Jehonathan, David's overseer of depositories in kind (1 Chron. xxvii, 25). B.C. cir. 1053.

3. The tenth king of the separate kingdom of Judah, B.C. 808-756. Like No. 1 above, he is sometimes called AZARIAH (q. v.). By Josephus (*Ant.* ix, 10, 3 sq.), and in the New Test. (Matt. i, 8, 9), the name occurs in the same Greek form as in the Sept. (*O'ziac*). The date of the beginning of Uzziah's reign (2 Kings xv, 1) in the twenty-seventh year of Jeroboam II is reconciled by Usher and others with the statement that Uzziah's father, Amaziah, whose whole reign was twenty-nine years only, came to the throne in the second year of Joash (xiv, 1); and by the supposition that Jeroboam's reign had two commencements, the first not mentioned in Scripture, on his association with his father, Joash, during the Syrian war, B.C. 835. Keil, after Capellus and Grotius, more violently supposes that the number 10 is an error of the Hebrew copyists for 11, 12, or 13, so that instead of twenty-seventh of Jeroboam we ought to read thirteenth, fourteenth, etc.

After the murder of Amaziah, his son Uzziah was chosen by the people to occupy the vacant throne, at the age of sixteen; and for the greater part of his reign of fifty-two years he lived in the fear of God, and showed himself a wise, active, and pious ruler. He began his reign by a successful expedition against his father's enemies, the Edomites, who had revolted from Judah in Jehoram's time, eighty years before, and penetrated as far as the head of the Gulf of Akaba, where he took the important place of Elath, fortified it, and probably established it as a mart for foreign commerce, which Jehoshaphat had failed to do. This success is recorded in 2 Kings (xiv, 22), but from 2 Chron. (xxvi, 1, etc.) we learn much more. Uzziah waged other victorious wars in the South, especially against the Mehumim (q. v.), or people of Maân, and the Arabs of Gurbal. A fortified town named Maân still exists in Arabia Petraea, south of the Dead Sea. The situation of Gurbal (q. v.) is unknown. (For conjectures more or less probable, see Ewald, *Gesch.* i, 321.) Such enemies would hardly maintain a long resistance after the defeat of so formidable a tribe as the Edomites. Towards the west, Uzziah fought with equal success against the Philistines, levelled to the ground the walls of Gath, Jabneh, and Ashdod, and founded new fortified cities in the Philistine territory. Nor was he less vigorous in defensive than offensive operations. He strengthened the walls of Jerusalem at their weakest points, furnished them with formidable engines of war, and equipped an army of 307,500 men with the best inventions of military art. He was also a great patron of agriculture, dug wells, built towers in the wilderness for the protection of the flocks, and cultivated rich vineyards and arable land on his own account. He never deserted the worship of the true God, and was much influenced by Zechariah, a prophet who is only mentioned in connection with him (2 Chron. xxvi, 5); for, as he probably died before Uzziah, he is thought not to have been the same as the Zechariah of Isa. viii, 2. So the southern kingdom was raised to a condition of prosperity which it had not known since the death of Solomon; and as the power of Israel was gradually falling away in the latter period of Jehu's dynasty, that of Judah extended itself over the Ammonites and Moabites, and other tribes beyond Jordan, from whom Uzziah exacted tribute. See

2 Chron. xxvi, 8, and Isa. xvi, 1-5, from which it would appear that the annual tribute of sheep (2 Kings iii, 4) was revived either during this reign or soon after.

The end of Uzziah was less prosperous than his beginning. Elated with his splendid career, he determined to burn incense on the altar of God, but was opposed by the high-priest Azariah and eighty others. (See Exod. xxx, 7, 8; Numb. xvi, 40; xviii, 7.) The king was enraged at their resistance, and, as he pressed forward with his censor, was suddenly smitten with leprosy, a disease which, according to Gerlach (*ad loc.*), is often brought out by violent excitement. In 2 Kings xv, 5 we are merely told that "the Lord smote the king, so that he was a leper unto the day of his death, and dwelt in a several house;" but his invasion of the priestly office is not specified. This catastrophe compelled Uzziah to reside outside the city, so that the kingdom was administered till his death by his son Jotham as regent. Uzziah was buried "with his fathers," yet apparently not actually in the royal sepulchres (2 Chron. xxvi, 23). During his reign an earthquake (q. v.) occurred, which, though not mentioned in the historical books, was apparently very serious in its consequences, for it is alluded to as a chronological epoch by Amos (i, 1), and mentioned in Zech. xiv, 5 as a convulsion from which the people "fled." Josephus (*Ant.* ix, 10, 4) connects it with Uzziah's sacrilegious attempt to offer incense, and this is likely, as it agrees with other chronological data. See AMOS.

The first six chapters of Isaiah's prophecies belong to this reign, and we are told (2 Chron. xxvi, 22) that a full account of it was written by that prophet. Some notices of the state of Judah at this time may also be obtained from the contemporary prophets Hosea and Amos, though both of these labored more particularly in Israel. We gather from their writings (Hos. iv, 15; vi, 11; Amos vi, 1), as well as from the early chapters of Isaiah, that though the condition of the southern kingdom was far superior, morally and religiously, to that of the northern, yet that it was by no means free from the vices which are apt to accompany wealth and prosperity. At the same time, Hosea conceives bright hopes of the blessings which were to arise from it; and though doubtless these hopes pointed to something far higher than the brilliancy of Uzziah's administration, and though the return of the Israelites to "David their king" can only be adequately explained of Christ's kingdom, yet the prophet, in contemplating the condition of Judah at this time, was plainly cheered by the thought that there God was really honored, and his worship visibly maintained, and that therefore with it was bound up every hope that his promises to his people would at last be fulfilled (Hos. i, 7; iii, 3). It is to be observed, with reference to the general character of Uzziah's reign, that the writer of the second book of Chronicles distinctly states that his lawless attempt to burn incense was the only exception to the excellence of his administration (2 Chron. xxvii, 2). See JUDAH, KINGDOM OF.

4. Son of Zechariah and father of Athaiah, the last descendant of Perez the son of Judah resident in Jerusalem after the Exile (Neh. xi, 4). B.C. ante 536.

5. A priest of the "sons" of Harim who renounced his Gentile wife married after the return from Babylon (Ezra x, 21). B.C. 458.

**Uzzi'el** [some *Uz'ziel*] (Heb. *Uzziel'*, *זְצִיֵּל*, *my strength is God*, or perh. simply *strength of God* = *Uzziah* [q. v.]; Sept. *O'zēl* or *O'zēl*, with some v. rr.; Vulg. *Oziel*), the name of six Hebrews.

1. Third named of the five sons of Bela son of Benjamin, heads of valiant families (1 Chron. vii, 7). B.C. post 1874.

2. Last named of the four sons of Kohath (Exod. vi, 18; 1 Chron. vi, 2), also father of four sons (Exod. v, 22; 1 Chron. xxiii, 12, 20; xxiv, 24), and uncle of Aaron (Lev. x, 4). B.C. ante 1658. His descendants

were called after him (Numb. iii, 19, 27; 1 Chron. xxvi, 23), Elizaphan being their chief in Moses' time (Numb. iii, 30), and Amminadab in David's (1 Chron. xv, 10).

3. Third named of the fourteen "sons" of Heman appointed by David as Levitical musicians (1 Chron. xxv, 4); the same with AZAREEL (q. v.) the head of the eleventh band of orchestral performers (ver. 18).

4. Second named of the two sons of Jeduthun among the Levites, who, in the days of king Hezekiah, took an active part in cleansing and sanctifying the Temple after all the pollutions introduced by Abaz (2 Chron. xxix, 14). B.C. 726.

5. Last named of the four "sons" of Ishi, Simeonitish chieftains who, after the successful expedition of the

tribe to the valley of Gedor, went at the head of five hundred men, in the days of Hezekiah, to Mount Seir, and smote the remnant of the Amalekites who had survived the previous slaughter of Saul and David, and took possession of their country, and dwelt there "unto this day" (1 Chron. iv, 42). B.C. cir. 712.

6. A "son of Hashaiah, of the goldsmiths," who repaired part of the walls of Jerusalem after the Captivity (Neh. iii, 8). B.C. 446.

**Uzzi'elite** (Heb. *Uzzieli*, *עֲזִיִּלִּי*, with the art., a patronymic; Sept. *Ōziḗl*; Vulg. *Ozielites* or *Ozielites*), the family designation (Numb. iii, 27; 1 Chron. xxvi, 23) of the descendants of Uzziel (q. v.) the Levite. In David's time they numbered 112 adult males (xv, 10).

## V.

**Vacant See**, the territory under the control of a bishop which has become vacant by the death or resignation of the episcopal head. In the ancient African Church it was under the control of an *inventor* or *intercessor* (q. v.), who was required to fill the vacancy within one year or give place to another. But by the 25th canon of the General Council of Chalcedon (q. v.) the metropolitan was required to fill the vacant see within three months, if possible, under pain of ecclesiastical censure. It devolved upon the metropolitans to care for these sees during the vacancy, but the Council of Chalcedon provided that the revenues should be cared for by the *æconomus*, or steward of the Church. See Bingham, *Christ. Antiq.* bk. ii, ch. xi; xv; xvi.

**Vacant Sundays**, in liturgical phrase, are the four Sundays after Ember weeks (q. v.) which have no proper office, owing to the protracted service of ordination on the previous night; the Sunday between Christmas and Jan. 1, because preoccupied with another office; and the fourth Sunday in Advent, because the pope gave himself to almsgiving, as on Vacant Saturday, the day before Palm-Sunday.

**Vacantivi** (Græcized *βακάντιβοι*) is a name applied to wandering clergymen, in ancient times, who deserted their own churches and would fix on no other, but wandered about from place to place. Such persons, having neither letters dismissory nor letters commendatory, and to be suspected either as deserters or as persons guilty of some misdemeanor who fled from ecclesiastical censure, were not allowed by the laws of the Church to be admitted either to ecclesiastical or lay communion. So strict were the laws of the ancient Church in reference to the inferior clergy that they might not, upon any account, remove from the Church to which they were first appointed without the consent of the bishop who ordained them. See Bingham, *Christ. Antiq.* bk. vi, ch. iv. See VAGANTES.

**Vacation**, in clerical phrase, is the time from the death, resignation, or removal in any other way, of a bishop or other ecclesiastical officer, until the office is filled by another person; also the season of rest given to a minister during some part of the year.

**VACATION OF A BENEFICE** is the act of making vacant a rectory, vicarage, or other ecclesiastical benefice by the death, resignation, or deprivation of its legal holder.

**VACATION OF A BISHOPRIC.** See VACANT SEES.

**Vaccaro, Andrea**, an Italian painter who was born at Naples in 1598. He studied with Massimo Stanzioni, after whose death he was considered the ablest artist of the Neapolitan school, and was without a rival until the return of Luca Giordano from Rome with a new style. In the contest for the large altarpiece in the new church of Santa Maria dei Pianti, representing the Virgin liberating the city from pestilence,

Vaccaro was successful. But Giordano soon carried all before him in art, and Vaccaro, attempting to compete with him in fresco, which he had not studied in his youth, lost his reputation. One of his best works is a *Holy Family*, at Naples. He died at Naples in 1670. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Vaccaro, Domenico Antonio**, an Italian sculptor and architect, born at Naples in 1680. After receiving a good education he studied architecture, and attained considerable eminence. His principal works are, at Naples, the church called Di Monte Calvino, the Teatro Nuovo, the Church of San Michele Arcangelo, and other buildings; in other parts of Italy, the Tarcia Palace, at Portici; the Church of San Giovanni, at Capua, and others. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Vaccary** (Lat. *vacca*, "a cow"), an old monastic term for a cow-house.

**Vach** (Sanskrit, *speech*), another name of *Savasvati* (q. v.), the wife, or female energy, of the Hindû god Brahma.

**Vachaspâti** (Sanskrit, *vach*, "speech," and *pati*, "lord"), in Hindû mythology, is one of the usual names of *Vrihaspati* (q. v.), the instructor of the gods.

**Vachery**, a term frequently found in monastic inventories and domestic MSS., denoting a pen or enclosure for cows.

**Vacûna**, in ancient Italian mythology, was a goddess of agriculture, who was worshipped after harvesting time, and was honored by rest.

**Vade-mecum** (Lat. *vade*, "go," and *mecum*, "with me"), a book of prayers which a person carries with him as a constant companion.

**Vaeck**, ALARDUS, a Lutheran theologian of the 17th century, is the author of *Tractatus de Principio Primæ Theologiæ Jesuiticæ:—De Judice Controversiarum:—Contra Pontifices de Reducenda Unione Ecclesiastica*. See Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Vaga**, PIERINO DEL, an Italian artist, was born at a small village near Florence in 1500. His true name was *Pietro Buonmacorsi*, but he was called by the above name after Del Vaga, one of his instructors, who led him to Rome, and introduced him into the school of Raphael. At an early age he was employed to assist in the decorations of the Vatican (q. v.), executing a number of the finest frescos from the designs of Raphael. One of the earliest works of his own design and execution was the *Creation of Eve*, in the Church of San Marcello, which Lanzi pronounces a "most finished performance." He fled from Italy at the sacking of Rome by the Spaniards in 1527, and in 1528 arrived, in a state of distress, at Genoa, where he was employed by prince Doria in decorating his magnificent palace. It was here that he achieved his greatest distinction. He executed many works in Lucca, Pisa, Genoa, and elsewhere. Late in life he returned to Rome, where he was much employed

by the pope, Paul III, who gave him an annuity of three hundred ducats. About 1543 he undertook the direction of the paintings for the Sala Regia [see VATICAN], but before the completion of this work he died, in 1547. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Vagantes** (CLERICI), or **Vagi**. This title was, in the language of the ancient canon law, applied to clergymen who were not employed in and supported by a definite office in the Church. Such "acephalous," wandering clergymen were at times very numerous, especially in countries which were not fully converted to Christianity. It was not always possible to assign a definite parish to the missionary who was sent forth to labor among a heathen population. But the *Vagantes* were found also in Christian lands. Sometimes they were persons ordained in order to do missionary work whom persecution or fear had compelled to return; and often they were impostors who had fraudulently secured ordination at the hands of some careless prelate. This class of persons was always disposed to traffic with its ministerial functions, not only in the way of assisting regularly inducted clergymen in their work, for pay, but also, and much more frequently, by accepting service as chaplains in the retinue of nobles, and stooping to the performance of the most menial and degrading offices. Decrees against such clergymen were issued, in occasional instances, as early as the 4th and 5th centuries. The Council of Chalcedon positively prohibited the *ordinatio absoluta s. vaga* (can. 6, *ὑποροσὶν ἀπολύτως*), and the older canons enforced the principle "Ne quis vage ordinetur." Complaints against the *Vagantes* became especially numerous in the Carolingian period, and were often renewed. See the *Capitularies* of 789 and 794 by Charlemagne, and comp. Concil. Mogunt. An. 847, and C. Ticinense, An. 850, in Mansi, *Concil.* xiv, 906, 938; Agobard of Lyons, *De Privilegio et Jure Sacerdotii*; the *Vita* of Godehard of Hildesheim, iv, 26; Gerhoh of Reichersberg, *Liber de Corrupta Eccles.* in Baluz, *Miscell.* v, 89 sq., and *Tractat. ad. Simoniacos*, in Martene and Durand, *Thes. Nov. Anecd.* v, 1459 sq. Bishops in the Church of Rome are forbidden to confer superior orders on a clergyman who has no definite *titulus beneficii*, on penalty of becoming personally responsible for his support (c. 4 et 16, x, *De Præb. et Dignit.* iii, 5; Conc. Trid. Sess. xxiii, c. 23, *De Ref.*). The *Vagantes* may now be considered as having ceased to exist in that Church. See Bingham, *Orig. Eccl.* ii, 387 sq.; Planck, *Gesch. d. christl. Gesellschaftsverf.* i, 375; ii, 100 sq.; Neander, *Church Hist.* vol. ii; Du Cange, *Glossar. Med. et Inf. Latinit.* vi, 1392; Herzog, *Real-Encyclop.* s. v. See VACANTIVL.

**Vagnucci**, FRANCESCO, an Italian painter, was a native of Assisi, where he flourished in the first part of the 16th century. There are some of his works in the churches of that city, which Lanzi says are "executed in the spirit of the old masters," i. e. somewhat dry and hard. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Vagrants.** See GYROVAGI.

**Vagum Ministerium**, a name applied to the minister who is ordained without any fixed congregation of which to take the oversight.

**Vaiano** (or **Vajano**), ORAZIO (sometimes written *Vaiani*), an Italian painter, born at Florence about 1550. He resided a long time at Milan, where he executed many works for the churches and for individuals. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Vail**. In the A. V. of the Holy Scriptures this orthography is found indiscriminately together with "veil," both for the piece of female apparel and for the holy screen of the Tabernacle and Temple. In this art. we propose, for the sake of convenience, to consider the latter only, leaving the dress for the heading VEIL.

The word exclusively and invariably employed for the "vail" between the holy and most holy places is פָּרֹכֶת, *parôketh*, a fem. gerundial form from פָּרַךְ, to

*debar*; and hence signifying *separation*, or screen. The Sept. renders it by *καταπέτασμα*, which is adopted in the New Test. (Matt. xxvii, 51; Mark xv, 38; Luke xxiii, 45; Heb. vi, 19; ix, 3; x, 20). Josephus employs (*Ant.* iii, 6, 5) the corresponding Greek verb *καταπέτασεν*. The Heb. term occurs in Exod. xxvi, 31, 33, 35; xxvii, 21; xxx, 6; xxxv, 12; xxxvi, 35; xxxviii, 27; xxxix, 34; xl, 8, 21, 22, 26; Lev. iv, 6, 17; xvi, 2, 12, 15; xxi, 23; xxiv, 2; Numb. iv, 5; xviii, 7; 1 Chron. iii, 14.

We learn from these passages (especially Exod. xxvi, 31) that the screen in question was a heavy piece of cloth, composed of white linen striped across with woollen threads of "blue, purple, and scarlet," either in a triple strand or more probably in alternate bands, and further ornamented with figures of cherubim, embroidered apparently with the needle, on one or both sides, with gold thread. This was suspended by means of silver hooks and rods upon the top of the pillars placed for that purpose in the Tabernacle, and doubtless likewise in the Temple. In the Herodian structure, as we learn from the Talmudists, the vail was double, and of very great thickness, so as to hang vertically by its own weight, and impenetrably close the interior from view. It was this piece of tapestry that was rent by the earthquake at Christ's crucifixion (Matt. xxvii, 51, and parallels) to signify, no doubt, that the way of access to God was then opened to all (see the monographs on the event in Volbeding, *Index Programmaticum*, p. 65). This explanation corresponds with the apostle's key to the symbolism of the vail, which he says represented our Lord's human flesh torn by the atonement (Heb. x, 20). See Brachius, *De Velis Tabernaculi et Templi* (Vitemb. 1718). See TABERNACLE; TEMPLE.

**Vail, Edward J.**, a Presbyterian minister, was born in 1811. He entered the New York University, and after finishing the course graduated in 1841. He soon after entered the Union Theological Seminary, and graduated in 1844. In 1845 he became a stated supply in the Church at Oriskany, N. Y., where he was ordained. After remaining a year at this place, he removed to Brooklyn, N. Y., where he was without charge until 1847, when he was called to supply the pulpit of the Church at Jamesville, N. Y. In 1848 he was called to the pastorate of the Church in Babylon, L. I. He remained in this charge until 1851, when he accepted a call to Uniontown, Cal., where he remained three years, and removed to San Francisco, and was without charge three years. He was then called to Crescent City, and supplied the pulpit four years, when he returned to San Francisco, and died Nov. 22, 1876. (W. P. S.)

**Vail, Solomon T.**, a Methodist Episcopal minister, was born in 1814, in Saratoga County, N. Y. He was converted in 1845; received on trial by the Iowa Conference in 1849; and after serving at Anamosa and Big Woods missions, he was, in 1851, admitted into full connection, ordained deacon, and reappointed to Big Woods mission, where he died, July 28, 1852. Mr. Vail was intellectual, pious, and a young man of great promise. See *Minutes of Annual Conferences*, 1852, p. 127.

**Vail, Joseph** (1), a Congregational minister, was born at Litchfield, Conn., July 14, 1751. He graduated with honor at Dartmouth College in 1778; studied theology privately; was licensed to preach by Litchfield Association in May, 1779; and ordained pastor of the Church in Hadlyme, Conn., Feb. 9, 1780, in which relation he continued fifty-nine years. He died Nov. 21, 1838. He was a good scholar, an excellent preacher, and distinguished for conscientiousness and untiring devotedness to his work. Besides frequent contributions to periodicals, he published a poem entitled *Noah's Flood* (1796);—another poem entitled *An Address to a Deist*;—and an *Ordination Sermon* (1814). See Sprague, *Annals of the Amer. Pulpit*, iv, 26, note.

**Vaill, Joseph** (2), D.D., a minister of the Congregational Church, son of the preceding, was born

at Hadlyme, Conn., July 28, 1790. He graduated from Yale College in 1811, and immediately began to teach. For six months he was principal of Morris Academy in Litchfield, Conn., and for the same period had charge of a high-school in Salisbury, Conn. Meanwhile he was studying theology. His first pastorate was in Brimfield, Conn., where he was ordained and installed Feb. 2, 1814. In 1834 he accepted a call to the Second Church of Portland, Me., where he was installed Oct. 15. About this time Amherst College was pecuniarily involved, and it was necessary to appoint some one to collect funds in aid of it. Mr. Vaill was unanimously chosen. For a long time he had been a trustee of the institution. At this time (1841) he was again pastor at Brimfield, having returned to that charge in 1837, and was loath to accept the agency, but finally consented and removed to Somers, Conn., where he resided nine and a half years, and served the Church there as pastor. At the age of sixty-four he left Somers and settled as pastor of the Second Congregational Church in Palmer, Mass., and he remained in this pastorate until Oct. 13, 1867, nearly thirteen years. His published sermons, addresses, etc., were about ten in number. His manner in preaching was energetic, and he employed gesture and emphasis effectively. In Brimfield and Somers he was chairman of the school committee. For nearly forty years he was a trustee of Monson Academy. While in Portland, he belonged to corporations of Bangor Theological Seminary and of Gorham Academy. The last year of his life he was elected to the Massachusetts House of Representatives, and was named a member of the joint committee on the License Law, before which he read a paper on the subject. He died at Palmer, Feb. 21, 1869. See *Cong. Quar.* 1870, p. 1.

**Vaill, William Fowler**, a Congregational minister, the son of Rev. Joseph and the father of the Rev. Thomas Scott Vaill, was born at Hadlyme, Conn., June 7, 1783. He was prepared for college by his father, and, mainly by his own exertions, supported himself at Yale College, where he graduated in 1806. He studied theology with Rev. Asahel Hooker, was licensed to preach in 1808, and for twelve years was pastor at North Guilford, Conn. In 1820 he was appointed by the United Foreign Missionary Society superintendent of a mission among the Osage Indians, then occupying the Arkansas country, where, amid trials and hardship, hope and fear, he labored fourteen years, or until the abandonment of the mission on account of the removal of the Indians farther west. He returned to New England, where he preached in various places, until he accepted a commission from the Home Missionary Society of Connecticut as missionary to Illinois. He at once went to Wethersfield, Ill., where he was pastor seven years, and where for twenty-seven years he made his headquarters for constant and faithful missionary toil. He died with the harness on at Wethersfield, Feb. 24, 1865. Mr. Vaill loved his work intensely, and his ardent piety carried him forward in it in labors most exhausting. See *Cong. Quar.* 1865, p. 422.

**Vaillant, Wallerant**, a Flemish painter and engraver, who was born at Lisle in 1623, and died at Amsterdam in 1677, is the author of several prints of sacred subjects from various masters, for which see Spooner, *Hist. Dict. of the Fine Arts*, s. v.

**Vainglory.** See VANITY.

**Vairagis** is a Hindû term denoting persons devoid of passion, and applied to all religious mendicants who profess to have separated themselves from the interests and emotions of the world. It is used in particular to designate the mendicant *Vaishnavas* (q. v.) of the Ramananda class.

**Vaisheshika** is the name of one of the two great divisions of the Nyaya school of Hindû philosophy, agreeing with the Nyaya itself in its analytical method of treating the subjects of human research, but differing

from it in the arrangement of its topics, and in its doctrine of atomic individualities, or *viseshas*, from which the name is derived. Kanada (*kana*, minute, and *ada*, eating) is the reputed founder of the school, although nothing is known as to his history or date. He arranges the subject-matter of his works under six *padarthas*, or topics, as follows: (1) substance, (2) quality, (3) action, (4) generality, (5) atomic individuality, and (6) coincidence. Later writers of the school add to these a seventh, viz. non-existence. According to this system, understanding is the quality of soul, and the instruments of right notion (knowledge from the contact of sense with its object, and inference) are treated of under the head of *buddhi*, or understanding. See *Bibliotheca Indica* (Calcutta, 1850); Colebrooke, *Miscell. Essays* (Lond. 1837), vol. i; Müller [Max], in *Zeitschrift der deutschen morgenl. Gesellschaft*.

**Vaishnavas** is the name of one of the three great divisions of Hindû sects, designating the worshippers of Vishnu, from which the word is derived. The common link of all the sects comprised under this name is their belief in the supremacy of Vishnu over the gods Brahma and Siva. Their difference consists in the character which they assign to this supremacy, and to the god Vishnu himself, in their religious and other practices, and in their sectarian marks. The following are some of the principal sects of the Vaishnavas:

1. The *Ramanujas*, or *Sri Vaishnavas*, or *Sri Sampradayins*, who derive their origin from Ramanuja, a celebrated reformer, native of Perumbur, in the south of India. He was born about the middle of the 12th century, and is considered by his followers as an incarnation of Seshha, the serpent of Vishnu. The most striking peculiarity of this sect is the preparation as well as the scrupulous privacy of their meals; for should the meal, during its preparation, or while they are eating, attract even the looks of a stranger, the operation is instantly stopped, and the viands buried in the ground. The marks by which they are distinguished from other sects are two perpendicular lines drawn with white earth from the root of the hair to the commencement of each eyebrow, and a transverse streak connecting them across the root of the nose; in the centre is a perpendicular streak of red, made with red sanders, besides other marks painted on the breast and arms.

2. The *Ramanandas*, or *Ramavats*, who derive their name from Ramananda, a descendant by discipleship from Ramanuja, who probably lived about the close of the 14th century. They are by far the most numerous class of sectaries in Gangetic India, especially in the district of Agra, where they constitute seven tenths of the ascetic population. They belong chiefly to the poorer and inferior classes, with the exception of the Rajputs and military Brahmins. The most important difference between them and the Ramanujas consists in the fact that Ramananda abolished the distinction of caste among the religious orders, and taught that one who quitted the ties of nature and religion shook off all personal distinction.

3. The *Kabir Panthis*, founded by Kabir, the most celebrated of the twelve disciples of Ramananda, belonging, therefore, to the end of the 14th century. They believe in one God, the creator of the world, but in opposition to the Vedanta (q. v.), they assert that he has a body formed of the five elements of matter, and a mind endowed with the three *gunas*, or qualities; he is eternal and free from the defects of human nature, but in other respects does not differ from man. The pure man is his living resemblance, and after death becomes his equal and associate. They have no peculiar mode of dress, and the sectarian marks are not considered important, though worn by some.

4. The *Vallabhacharyas*, or *Rudra Sampradayins*, founded by Vallabha Swamin, or Vallabha Acharya, born in 1479. The principles of the sect, as laid down by Vallabha, are as follows: (1) To secure the firm support of Vallabhacharya; (2) To exercise chiefly the

worship of Krishna (incarnation of Vishnu); (3) To forsake the sense of Vaidik opinion, and be a suppliant to Krishna; (4) To sing praises with feelings of humility; (5) To believe that Vallabha is a Gopi, or mistress of Krishna; (6) To swell the heart with the name Krishna; (7) To forsake his commands not for a moment; (8) To put faith in his words and doings; (9) To adopt the society of the good, knowing them divine; and (10) To see not the faults, but speak the truth. They are very ignorant and superstitious.

5. The *Madhwacharyas*, or *Brahma Sampradayins*, founded by a Brahmin named Madhwacharya, who was born in 1199. The distinguishing doctrine of this sect is the identification of Vishnu with the Supreme Soul as the pre-existent cause of the universe; and this primeval Vishnu they affirm to be endowed with real attributes, and, although undefinable, to be most excellent and independent. There is also a dependent principle, a living soul dependent on the Supreme. They deny the absorption of the human soul into the universal spirit, and the loss of independent existence after death.

6. The *Vaishnavas of Bengal*, founded by Chaitanya, who was born at Nadiya in 1485. The most important innovation of this sect, in respect to doctrine, is the dogma of *bhakti*, or faith, which they declare to be infinitely more efficacious than abstraction, than knowledge of the Divine nature, than the subjugation of the passions, or anything deemed most meritorious. The *bhakti*, or faith, comprehends five stages: quietism, as that of sages; servitude, which every votary takes upon himself; friendship for the Deity; tender affection for the Deity, of the same nature as love of parents for their children; and the highest degree of affection, such passionate attachment as the Gopis felt for their beloved Krishna.

Besides these, there are many other sects of less importance. Those enumerated above are divided into smaller sects or divisions. See Wilson, *Sketch of the Relig. Sects of the Hindus*, in *Works* (Lond. 1862), vol. i; Karsandas Mulji, *History of the Sect of the Mahajanas* (ibid. 1865).

**Vaishya** is one of the Hindû castes said to have sprung from the thigh of Brahma. They are the productive capitalists, and their duties are to keep cattle, carry on trade, lend on interest, cultivate the soil, and turn their attention to every description of practical knowledge. See INDIAN CASTE.

**Vaison**, COUNCIL OF (*Concilium Vassense*). Vaison is a village of France, in Vaulcure, fifteen miles north-east of Orange, on the Ouvèze. Two ecclesiastical councils were held there, as follows:

I. Was held Nov. 13, 442, under the bishop Auspicius. Nectarius, bishop of Vienne, was present, and publicly maintained that the Father, Son, and Holy Spirit are but one nature, one power, one divinity and virtue. Ten canons were published.

1. Declares that it shall not be necessary to examine the Gallican bishops before receiving them to communion, but that it shall be enough to be assured that they are not excommunicated.

2. Declares that the offerings of penitents dying suddenly without receiving the communion may nevertheless be received, and that mention is to be made of their names at the altars. It permits them burial.

3. Orders priests and deacons to receive the holy chrism at Easter from their own bishops.

6. Forbids all intimacy with the enemies of religion.

9 and 10. Are for the protection of the reputation of those who, out of charity, take charge of deserted children.

See Mansi, *Concil.* iii, 1456.

II. Was held Nov. 5, 529. Twelve bishops attended, among whom were St. Cæsarius of Arles, who presided. Five canons were published.

1. Enjoins that parish priests shall receive into their houses young readers (being single), according to the excellent custom in Italy; that they shall provide for them, and teach them to chant the Psalms, and make them read and study the Holy Scriptures.

2. Declares that a priest may preach in his own parish, but that when he is ill, the deacons shall read the Homilies of the fathers.

3. Orders the frequent repetition of the *Kyrie Eleison* at matins, mass, and vespers; and that the *Sanctus* be sung three times at mass even in Lent, and in masses for the dead.

4. Orders that mention be made of the pope at every mass.

6. Orders that the verse "As it was in the beginning," etc., shall be chanted after the *Gloria Patri*.

See Mansi, *Concil.* iv, 1679.

**Vajez'atha** [some *Vajeza'tha*] (Heb. *Vayezatha'*, נָעַזְתָּה, prob. from Pers. *vayu*, "wind," and *zatha*, "strong;" Sept. Ζαβουθαίος, v. r. Ζαβουθαΐα and Ζαβουθεΐα; Vulg. *Jezatha*), last named of the ten sons of Haman slain by the Jews at Shushan (Esth. ix, 9). B.C. 474.

**Val**, ANDRÉ DU, a French theologian, was born Jan. 18, 1564, at Pontoise. In 1594 he was made doctor of theology at the Sorbonne, and died Sept. 9, 1638, as general-superior of the Carmelite Order at Paris. He wrote, *De Suprema Romani Pontificis in Ecclesiam Potestate Disputatio*:—*Elenchus Libelli de Ecclesiastica et Politica Potestate*:—*Commentarii in Primam Secundæ Partis et Secundam Secundæ Partis Summæ D. Thomæ*. See Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; Winer, *Handbuch der theol. Literatur*, i, 671. (B. P.)

**Valadon**, le Père ZACHARIE, a French Capuchin and missionary, was born about 1680. He labored in Asia Minor, but is especially noted for his devotion to the suffering people during the plague at Marseilles. He died in 1746. See Michaud, *Biographie Universelle* (Paris, 1843-66).

**Valckenaer**, LODEWIJK CASPAR, a Friesian philologist, born at Leeuwarden in 1715. He studied at Franeker and Leyden; became co-rector of the gymnasium of Camper; professor of Greek at Franeker (1741); removed to Leyden as professor of the Greek language and antiquities, and died there, March 14, 1785. Among his works are, *De Aristobulo Judæo*:—*Selecta e Scholiis L. C. Valckenarii in Libros quosdam N. T.*, published by Wassenbergh (Amst. 1815, 2 vols. 8vo).

**Valdes** (Ital. *Valdesso*), **Alfonso** and **Juan** de, were twin brothers from the town of Cuenca, in Castile, and born about A.D. 1500, who in their early years became attached to the Castilian court, and, at a later day, sustained relations of some practical importance towards the Reformers of the 16th century and their work.

1. ALFONSO accompanied the court, in 1520, to the coronation of the emperor Charles V at Aix-la-Chapelle, and thence to Worms. From the latter town he wrote letters to friends in Spain, in which he deprecated the course which the pope had adopted towards Luther. He had just witnessed the burning of Luther's writings at Worms when he wrote. In 1524 Alfonso was an imperial secretary of state under the grand-chancellor Gattinara; and in 1527 he began an epistolary correspondence with Erasmus, the great humanist, whose writings had shortly before been committed to the flames in Spain, and in whose defence he had been a most ardent advocate, as against the fanatical mob of excited monks. In the same year (1527) occurred the storming of Rome and the capture of the pope by the imperial army under the constable Bourbon; and on this event Valdes composed a dialogue intended to set forth the sentiment of the court respecting the case. The emperor could not deny his responsibility for the catastrophe, and his secretary accordingly proceeded to show that the pope himself had brought about the devastation of his capital by warlike agitations and disregard of the sanctity of his own word, and also by his refusal to be guided by the warning counsels of judicious friends or by the indications of Providence. This composition excited considerable interest, and led the papal nuncio Castiglione to lodge a complaint against its author with the emperor; but Valdes was safe under the protection of the chancellor, and suffered no harm.

In 1530 Valdes was present with the court at the Diet of Augsburg. The bearers of the famous *Protest* were recommended to him, among others, and found him inclined to promote harmony and friendliness above any of his associates. He met with Melancthon and discussed the religious situation, and was unwearied in the work of judicious mediation between the heads of the contending parties. After the public reading of the *Confession* he prepared a translation for the emperor's use (see Campeggio, in Lämmer, *Monum. Vatic.* p. 45); and afterwards he labored zealously to furnish him with the fullest information which the Protestants could supply in behalf of their cause. He has, nevertheless, been suspected of hostility to the Reformation because he judged that the *Confession* was written in too harsh a tone, and yet more because he wrote the emperor's letter of congratulation to the Romish Switzers (Brussels, Oct. 1531) on the occasion of their victory at Cappel over the Zwinglians; but, on the other hand, the nuncio Alexander complains (*ibid.* Dec. 30, 1531) that certain persons at court are practically in sympathy with Luther and desirous that his cause should succeed, and that they laud Erasmus to the skies only because they are not allowed to speak their thoughts respecting Luther. Among these courtiers Valdes was unquestionably the first. It would seem, however, that Valdes left the court in 1531, though he remained in the imperial service as late as 1533. He never returned to Spain, possibly because he could not be there in safety. Francisco Enzinas (q. v.) wrote to Melancthon in 1545, "If the excellent Alfonso Valdes had returned to Spain, even the emperor would have been unable to save him from the death which the monks, the satellites of the holy fathers, were preparing for him on account of his *doctrina* and *auctoritas*." The time and place of his death are thus far wholly unknown.

On Alfonso Valdes, see Raumer, *Gesch. Europa's seit d. 15. Jahrh.* i, 264; *Docum. Inedit. para la Hist. de España*, vol. xxiv; Müller, *Hist. von d. Protestation u. Appellation*, etc. (Jena, 1705), p. 18-190; Saubert, *Wunderwerck d. Augspurg. Confession* (Nuremb. 1631), p. 220, etc.; Jonas, in *Niedner's Zeitschrift*, 1861, p. 630; Herzog, *Real-Encyclop.* s. v.

2. JUAN (1) was, physically and intellectually, strikingly like his twin brother Alfonso; and, like him, he first came before the public with a dialogue, published anonymously and, at the same time, as his brother's production—probably in 1529. His piece was entitled *A Dialogue between Mercury and Charon*. It begins with the narration by Mercury of the emperor's attempt to settle his quarrel with king Francis of France by a duel (see La Fuente, *Hist. de España*, xii, 497 sq.); but the narration is repeatedly interrupted by the introduction of newly deceased persons, who enter into the conversation, and through whom the whole obtains a political and religious character. The general corruption of the Church is censured. The ignorance and immorality of the clergy and the superstition of the people are plainly characterized, and the Scriptures and the grace of God are extolled above the adoration of relics and the Virgin Mary. The use of force as a means of conversion is condemned. Part second of the work is chiefly political, and is a sort of Anti-Machiavel. The whole reveals the simplicity of a truly noble mind and the tact of a courtier. In 1531 Juan was at Rome, having come thither from Naples, and was engaged in the study of natural history. He planned a collection of Spanish proverbs, and wrote a *Diálogo de la Lengua* (2d ed. Madrid, 1860), which is highly commended by writers on the literature of Spain. His chief interest, however, centred in religious reform. For it he labored incessantly with tongue and pen, and in its interest he became the centre of an association of Christians who endeavored to lay the foundations of an independent kingdom of God without directly assailing the Church of the State.

In 1536 the emperor issued an edict at Naples which

forbade association with persons infected with or suspected of the Lutheran heresy, under pain of death and the confiscation of property. After the emperor's departure, March 22, the viceroys forbade the preaching of Ochino (q. v.), though he was afterwards induced to permit its continuation to the end of Lent. But during this same Lenten period Valdes had a conversation with Giulia Gonzaga, the childless widow of Vespasian Colonna, duke of Traietto, who had been powerfully awakened under the preaching of Ochino; and he had the courage to commit the substance of their conversation to paper, under the title *Alfabeto Cristiano* (1st ed. in Italian [Venice, 1546]; 2d ed. Italian, English, and Spanish [Lond. 1860 sq.], consisting of only 150 copies for private distribution). In this dialogue he teaches that the law shows what we are to do, while the Gospel gives the Spirit by which to do it. He insists that the soul must choose between God and the world, and declares that persons whose outward life is entirely correct may need a reformation of the inward feelings and dispositions. Christian perfection consists in loving God supremely and our neighbor as ourselves. Monks and non-monks have only so much of Christian perfection as they have of faith and love to God. As the fire cannot refrain from giving forth heat, so faith cannot avoid the performing of works of love. The soul may have full assurance of the forgiveness of sins and of salvation in Christ. The evil of sin requires a radical cure, applied at the seat of the disease, and cannot be overcome by any mere surface remedy. Giulia insists, however, upon rules by which to regulate the use of institutions of the Church, and Valdes responds that benefit may be derived from the adoration of the sacrament, from the reading of the Epistles and Gospels, and from the prayers in the mass; that masses ought to be heard except when they would interrupt works of charity; that the preaching of the Word should be humbly received. He discountenances the repetition of a given number of psalms and paternosters. Of confession he says that God does not forgive sins because of the confession, but because the sinner believes in Christ. The result was that Giulia entered the Franciscan convent of Santa Chiara, though she did not take the vows of the order nor exclude herself wholly from society.

It was perhaps in the same year (1536) that Valdes dedicated to the duchess Gonzaga his version of the *Psalms*, after the Hebrew (a work never published and now lost), and in the following year *The Epistle to the Romans* and *The First Epistle to the Corinthians* (1st ed. Geneva, 1556 sq.; 2d ed. 1856), which works reveal faithful research and sincere modesty in the author, and possess both scientific and practical value. Other works by Valdes have, almost without exception, been lost to posterity, the exception being *Consideraciones Divinas*, an Italian edition of which appeared in 1550 at Basle, and translations of which were made into Spanish, French, English, and Dutch during the 16th and 17th centuries.

Juan Valdes was a theologian of the first rank in ability, though largely self-trained, and though he never entered into orders. Sand, the editor of the *Bibliotheca Antitrinitariorum* (1684), places him at the head of his catalogue on the authority of a passage in a Unitarian publication of 1567, said to be cited from Valdes, but which certainly does not prove the charge of anti-trinitarianism; and very different sentiments are expressed by Valdes in the *Alfabeto Christ.* p. 37, and the *Commentary on First Corinthians*, p. 281, etc. In his *Consideraciones*, No. 109, he confesses that the relation existing between the Father and the Son exceeds his comprehension. In personal intercourse Valdes possessed extraordinary influence, especially among the nobles, with whom his rank brought him into contact. His manners were polished, his conversation attractive, his entire bearing full of charm. Assisted by Peter Martyr (Vermigli) of Florence, the Augustinian abbot of St. Peter ad Aram at Naples, and by Ochino and others,

he was able to beget such enthusiasm for the study of the Bible that a contemporary Neapolitan writer states that certain tanners were in the constant habit of discussing the Pauline epistles and their most difficult passages. Among his friends were also the poet Flaminio and the Reformer Pietro Carnesecchi (q. v.). Valdes died in 1540 or 1541.

See Böhmer, *Cenni Biografici sui Fratelli Giovanni e Alfonso di Valdesso*, 1861, in the appendix to his edition of the *Considerazioni*; and id. in Herzog, *Real-Encyklop.* s. v.

**Valdes, Don Juan** (2) DE LEAL, a Spanish painter, descended from an ancient family of Austria, was born at Cordova in 1680. He studied in the school of Antonio del Castillo, and afterwards removed to Seville, where he became one of the most distinguished painters of that city. He was one of the founders of the Academy there, and at the death of Murillo became its president, and was esteemed as the head of his profession. Among his numerous works may be mentioned, *The Triumph of the Cross*, at Seville;—*The Martyrdom of St. Andrew*;—and *The History of the Prophet Elias*, at Cordova. He died in 1691. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Valdes, Don Lucas** DE, a Spanish painter, son of the preceding, was born at Seville in 1611. He was instructed by his father, and painted history and portraits with considerable reputation. Some of his works remain in the churches and public edifices of his native city. He died in 1724. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Valdes, Don Sebastian** LLANOS DE, a Spanish painter, flourished at Seville about 1660. He studied under Francisco de Herrera the elder; aided greatly in establishing the Academy of Seville, in the presidency of which he succeeded Juan de Valdes. Among his large historical works are a *Magdalen*, in the Church of the Recolets at Madrid;—and a picture of the *Virgin surrounded by Saints and Angels* (1669), in the Church of St. Thomas, Seville. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Valdo.** See WALDO.

**Vale.** See VALLEY.

**Valence, COUNCILS OF** (*Concilia Valentina*). Valence is a town of Dauphiny, France, on the Rhone, fifty-seven miles south of Lyons. Five ecclesiastical councils have been held there, as follows:

I. Was held July 12, 374. Thirty bishops attended, of whom the names of twenty-two have reached us. It is supposed to have been a general Gallican council, or at least collected from the chief part of Narbonnesian Gaul. The object of this council was to remedy the disorders which had crept into the discipline of the Church. Four canons were published.

1. Forbids the ordination in future of men who have had two wives, or who have married widows, but it does not insist upon the deposition of those who have been already ordained.

2. Forbids to grant penance too easily to young women who, after consecrating themselves to God, voluntarily embrace the married state.

3. Forbids absolution until death to those who, after baptism, fall back into idolatry, or who have received a second baptism.

4. Orders that all bishops, priests, and deacons falsely accusing themselves of any crimes in order to be deposed, and so escape the responsibility and weight of their orders, shall be, in fact, so deposed, and considered as guilty of the crimes wherewith they charge themselves.

See Mansi, *Concil.* ii, 904.

II. Was held about 530, in defence of the doctrines of grace and free-will, against the Semi-Pelagians. See Mansi, *Concil.* iv, 1678.

III. Was held Jan. 8, 855, by order of the emperor Lothaire. Fourteen bishops, with the metropolitans, attended from the three provinces of Lyons, Vienne, and Arles. The object of the council was to investigate the conduct of the bishop of Valence, who was ac-

cused of various crimes. Twenty-three canons were published.

The first six relate to the subjects of grace, free-will, and predestination, and reject the four canons of Quercy upon the matter.

7. Relates to the elections of bishops with the unanimous consent of the clergy and people of the see.

12. Forbids, under pain of excommunication, the singular combats to which accused persons had recourse in those times in order to prove their innocence. Directs that he who shall kill or wound his adversary shall be treated as a murderer, and excommunicated; and that the man killed shall be regarded as a suicide, and forbidden Christian burial.

14. Enjoins bishops not to give their clergy or people cause to complain against them on account of their vexations.

15. Recommends them to lead an exemplary life.

16. Orders them to preach and instruct their people both in town and country.

17. Bids them be careful to make their visitations without burdening any one.

18. Orders the re-establishment of schools for teaching religion, literature, and ecclesiastical chanting.

20. Orders care in the preservation of the Church ornaments, etc., and forbids their being put to any but their proper use.

22. Forbids bishops to exact their visitation dues when they do not make their visitations.

See Mansi, *Concil.* viii, 183.

IV. Was held in 1100 to examine the charge brought by the canons of Autun against Norigaudus, or Norgaud, bishop of Autun, whom they accused of having got possession of the see by simony, and of having squandered the property belonging to it. The pope's legates, John and Benedict, cited the bishop to appear at this council, in spite of the protest of the canons, who declared that the legates had no authority to take him beyond the province, and in spite of the opposition of the archbishop of Lyons, who complained of the legates having taken the judgment of the case out of his hands. The question accordingly came before the council, and was discussed, but the further consideration of it was reserved for the Council of Poitiers. In the meantime the bishop was suspended from the exercise of all his functions. Hugo, abbot of Flavigny, accused likewise of simony, was declared to be innocent. See Mansi, *Concil.* x, 717.

V. Was held on the Saturday after the Feast of St. Andrew. The legates Peter, cardinal-bishop of Albano, and Hugo, cardinal-priest of St. Sabine, convoked this council, consisting of four archbishops and fifteen bishops from the provinces of Narbonne, Vienne in Dauphiny, Arles, and Aix. Twenty-three canons were published.

3. Forbids clerks in holy orders, cathedral canons, and other benefited persons to exercise any secular office.

6, 7, and 8. Enjoin the punishment and public denouncement of perjured persons.

9, 10, and 11. Relate to the Inquisition.

12. Gives to bishops the correction of sorcerers and persons guilty of sacrilege, and, in the event of their refusing to amend, enjoins perpetual imprisonment, or whatever punishment the bishops may deem right.

13. Enacts penalties against those who lay aside the cross, which they have assumed upon their dress as a token of having renounced their heresy, or who escape from prison, or despise the sentence of excommunication.

The five next refer to excommunications.

22 and 23. Fulminate excommunications against the emperor Frederick and all his adherents.

See Mansi, *Concil.* ix, 676.

**Valencia, COUNCIL OF** (*Concilium Valentinum*). Valencia is a town of Spain, capital of the province of the same name, situated on the Guadalaviar, 190 miles E.S.E. of Madrid. An ecclesiastical council was held here in 524, under king Theodoric. Six bishops attended, and six canons were published.

1. Orders that, previous to the presentation of the oblations and the dismissal of the catechumens, the Gospel shall be read after the Epistle, in order that the catechumens, penitents, and even the heathen may hear the words of Christ and the preaching of the bishop.

4. Exhorts bishops to visit their sick brethren in the episcopate, in order to assist them in settling their af-

fairs, and to attend to their funerals. In case of a bishop dying suddenly with no one of his brother bishops near him, it is ordered that the body shall be kept until a bishop can come to celebrate his obsequies.

5. Excommunicates vagabond clerks who desert their calling.

6. Forbids to ordain a clerk belonging to another diocese, and any person whatever who will not promise to remain in the diocese.

See Mansi, *Concil. iv*, 1617.

**Valencia, Fray Matias de**, a Spanish painter, was born at Valencia in 1696. His name was *Lorenzo Chafrión*. He studied at Rome, returned to Valencia, afterwards went to Granada, where, being reduced to distress, he took refuge in a convent. There are some of his cabinet pictures in the collections at Valencia, and a picture of the *Last Supper* in the refectory of his convent. He was drowned in 1749. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Valencia, Jacobo Perez de**, an anchorite, commonly called bishop of Christopolitanus, was born about 1420 at Valencia, in Spain, whence he derived his name. He became a hermit of the Order of St. Augustine, and is the author of *Questiones Quinque contra Judeos de Christo Reparatore Generis Humani*: —*Expositio Psalmorum Davidis* (Leyden, 1512, 1514, 1517). In his *Proleg. in Psalmos*, tract. vi, he gives an amusing account of the origin of the vowel-points: "Post conversionem Constantini Magni videntes Rabbinos omnes Gentiles cum tanta devotione ad fidem Christi converti per totum orbem, et ecclesias tanto favore prosperari et etiam quod infinita multitudo Judæorum videntes manifestam veritatem per experientiam et miracula, pariter convertebantur, et sic deficiebant quæstus et redditus et tributa Rabbinorum, hac iniquitate commotos magna multitudo congregatos fuisse apud Babyloniam Egypti, quæ dicitur Cayre; ibique quanto majis caute potuerunt, conatos fuisse falsificare et pervertere Scripturas a vero sensu et significatione. Inde confinxisse supra quinque vel septem puncta loco vocalium, quorum punctorum inventores fuisse Ravina et Ravasse duos doctores eorum. Addit istos Rabbinos confinxisse libros Talmud." He died Aug. 1, 1491. See Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. "Perez;" Fürst, *Bibl. Jud.* iii, 466; Hody, *De Bibliorum Textibus Originalibus* (Oxford, 1705), III, ii, 442. (B. P.)

**Valens**, in Roman mythology, according to Cicero, was the name of the second Mercury. Some declared him to be the father of Trophonius.

**Valens**, the Roman emperor, the brother and co-Augustus of Valentinian I, is important to Church history as the last political representative of Arianism in the East. He was nominated to the throne by Valentinian, March 28, 364, and assigned to the rule of the East. His first efforts were directed towards the securing of his rule against the pretensions of Procopius, whom the late emperor Julian had selected to become his successor. It is not certain that other than political motives were at work in this campaign, though Milman, basing his remark on a fragment by Eunapius, says, in Gibbon, *Decline and Fall*, iii, 25, "It may be suspected that the heathen and philosophic party espoused the cause of Procopius" (but comp. Ammian. Marcell. xxvi, 6-9). The next campaign of Valens was directed against the Goths, who had operated along the Danube in behalf of Procopius; but before entering on that undertaking, the emperor sought to conciliate the favor of Heaven by receiving Christian baptism; and as the rite was performed by Eudoxius, the Arian bishop of Constantinople, the event became decisive of the future course of the administration of Valens by identifying him with the Arian party and bringing him into direct conflict with the Catholic and semi-Arian sections of the Church and empire. The Gothic war was successfully completed, and was followed by a systematic persecution of the orthodox and semi-orthodox party throughout the East. A special edict was

issued against monks, and military bands were sent to traverse the wilderness in which they dwelt to compel them to enter the service of the State and contribute to its support. Orthodox bishops everywhere were exiled, and historians speak of many who were drowned or otherwise put to death. The persecution was most severe where the emperor was himself present; and as the operations of the Persian king compelled his presence at Antioch, that province became the scene of the most thorough and extensive persecution. The most horrible incident of the persecution was the destruction of eighty presbyters who had been deputed to protest against the instalment of the Arian Demophilus as the bishop of Constantinople, instead of Evagrius, the choice of the Catholics, and whom the præfect Methodius embarked in a vessel which he caused to be burned on the high seas. Curiously enough, the persecution resulted in the placing of Christian orthodoxy and heathen superstition under the same category of enemies to the emperor. The heathens had appealed to an oracle to obtain the name of the next emperor, when Valens discovered their action, and at once proceeded to enforce against them the edicts of the empire. His ragings were, however, brought to a close by the progress of events on the northern boundary of his State, where the migrating nations involved him in a war which became fatal to himself and the country. His army suffered an unexampled defeat near Adrianople (Aug. 9, 379), and he was slain. During his reign of fifteen years he had done all he could to intensify the hatred of religious parties within the empire, and he now achieved the un-

Coin of Valens.

enviable distinction of being the first to show to foreign invaders the way into the heart of his country. The political history of his reign is, upon the whole, given with great thoroughness and fidelity by Ammian. Marcellinus and Zosimus, while the ecclesiastical may be gathered from the writings of Basil the Great and the two Gregories, Nyssa and Nazianzen. See also Tillemont, *Hist. des Empereurs*, v, 33-39; Gibbon, *ut sup.*; Schlosser, *Universalhistor. Uebersicht*, etc., iii, 2, 370; the ancient histories of the Church, Socrates, Sozomen, etc.; Smith, *Dict. of Gr. and Rom. Biog.* s. v.; and Herzog, *Real-Encyklop.* s. v.

**Valentia**, in Roman mythology, was a goddess of health, similar to Hygeia, venerated by the city Oriculum, in Umbria, as a protecting goddess.

**Valentia, Gregorio de**, a Spanish Jesuit, was born in 1551 at Medina del Campo, in Old Castile, and died at Rome, April 25, 1603. He is the author of *De Rebus Fidei hoc Tempore Controversiis* (Leyden, 1591; Paris, 1610, fol.). —*De Trinitate Libri V* (Ingolstadt, 1586): —*De Transsubstant. Panis et Vini in Corpus et Sanguinem Christi* (ibid. 1587): —*Disput. de Legitimo Usu Eucharistiæ in Altera tantum Specie* (ibid. eod.). See Winer, *Handb. der theol. Literatur*, i, 341, 419, 455, 456, 853. (B. P.)

**Valentin, Pierre**, a French painter, was born at Coulommiers-en-Brie, near Paris, in 1600. He studied painting, and went to Rome at an early age, where he remained during the rest of his life. He painted the *Martyrdom of Sts. Processo and Martiniano* (thought to be his best performance): —*Decollation of St. John*: —*St. Peter Denying Christ*: —*Judith with the Head of Holofernes*: —*The Judgment of Solomon*: —and many others. He was an artist of great promise, but died in the flower of his life, in 1632. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Valentine, Sr.**, a Roman bishop (or presbyter), was beheaded in the reign of the emperor Claudius, A.D. 270, and was early canonized. He is said to have been a man of admirable qualities, and noted for his love and charity. Feb. 14 is celebrated in his honor. The custom of choosing Valentines on that day is accounted for in various ways. By some it is said to have arisen from the fact that birds select their mates at that season; by others, from a practice prevalent at the ancient Roman festival of the Lupercalia, during the month of February, of placing the names of young women in a box, from which they were drawn by young men as chance directed. A similar custom was followed throughout Europe on the eve of Feb. 14 until recently, the person chosen becoming Valentine to the one choosing for a year. See Chambers, *Book of Days*, i, 255. See VALENTINUS, ST.

**Valentine, George M.**, a clergyman of the Church of England, of whose birth or early life no record remains, distinguished himself in the University of Cambridge, and graduated at Trinity College in 1829. He was ordained in the same year to the curacy of Portishead, near Bristol, where he gave himself wholly to pastoral labors for eight years. In 1837 he offered himself to the missionary committee, and in the following year sailed for Bombay, began the study of the native language, and taught a small English school. In 1839 he was married. He soon entered upon general missionary duties, and thus continued until his last sickness, which in a few weeks terminated in his death, July 23, 1846. See *Christian Guardian*, 1847, p. 433.

**Valentine, Jesse M.**, a minister of the Methodist Episcopal Church, South. His early life is unknown. He was transferred from the Tennessee to the Florida Conference in 1850, and served faithfully about one year, when failing health necessitated his superannuation. He then studied medicine, and became quite successful in its practice. He entered the army of the Confederates some time in 1861, and was soon after taken sick, and died at Gainesville, Florida, in 1862. Mr. Valentine was a graduate of West Point, a fine scholar, characterized by strong, logical reasoning powers, and pure language as a preacher, and as a pulpit orator was surpassed by few. See *Minutes of Annual Conferences of M. E. Church, South* (1862), p. 410.

**Valentinian I**, Roman emperor, was the son of Comes Gratianus, and born in A.D. 321 at Cibela, in Pannonia. He succeeded Jovian on the throne in 361, and, having associated his brother Valens with himself in the empire, he assumed the government of the West. He protected the State against the incursions of the Germanic tribes, simplified and improved the internal administration of affairs, and promoted the advancement of science and general culture, thereby winning for himself an honorable place in the estimation of the world, despite the cruelties with which his life was stained. He died Nov. 17, 375. He had been reared amid Christian surroundings, and had drawn upon him the disfavor of the emperor Julian by his unflinching fidelity to his faith. On assuming the control of government he issued an edict of universal toleration in religious matters (see *Cod. Theod.* IX, xvi, 1, 9, ad A.D. 371), though he found it necessary to prohibit the offering of nocturnal sacrifices, as affording opportunity for political agitations, and also to forbid the practice of magic; and the execution of the Edict of Toleration contributed greatly towards the advancement of Christianity and

the decline of paganism. The expression *religio paganorum*—the religion of peasants—occurs for the first time in a law of Valentinian of the year 368 (*ibid.* XVI, ii, 18). Valentinian was also tolerant towards the different parties in the Christian Church, though himself an adherent of the Nicene faith. See Ammian. Marcell. vi and xxx, 9; Smith, *Dict. of Gr. and Rom. Biog.* s. v.; also Herzog, *Real-Encyklop.* s. v.

**Valentinian II**, Roman emperor, was successor to his brother Gratian. The only noteworthy incident of his reign which requires mention in this place was the attempt of the heathen party, in the year 384, to recover the position it had lost. Symmachus, the *præfectus urbis*, demanded the retraction of the laws issued by Gratian against paganism, and insisted that the *religio urbis* should be kept distinct from the private religion of the emperor. He also asserted that, inasmuch as man has no knowledge of divine things, it would be best to

Coin of Valentinian II.

rely on the authority of antiquity; that heathenism had made ancient Rome the mistress of the world; and that the famine of the year 383 must be regarded as a consequence of the renunciation of the ancient religion. The emperor was induced, however, chiefly through the efforts of Ambrose of Milan, to reject the demand. He was murdered by Arbogastes, May 15, 392. His mother, Justina, was a zealous adherent and defender of the Arian party. See Smith, *Dict. of Gr. and Rom. Biog.* s. v.; and Herzog, *Real-Encyklop.* s. v.

**Valentinian III**, Roman emperor, obtained notoriety by issuing the edict of A.D. 445, which contributed materially to the elevation of the papacy, for which see the articles LEO I and PAPACY. He also issued laws against the Manichæans. His mother, Pla-

Coin of Valentinian III.

cidia, administered the government for him until the year 450, and afterwards he gave himself up wholly to sensual indulgences, and left the control of affairs in the hands of a eunuch. He was murdered in 455. See Smith, *Dict. of Gr. and Rom. Biog.* s. v.; and Herzog, *Real-Encyklop.* s. v.

**Valentinians**, the followers of the Gnostic heretic Valentinus (q. v.).

**Valentinus, Sr.**, the reputed apostle of Rhætia and bishop of Passau, is first mentioned, in an authentic manner, by Pez, in the biography of the younger St. Severin, § 35, in *Scriptores Rer. Austriacar.* i, 88. A presbyter, Lucillus, is there made to relate that a Valentine who was his abbot and teacher had ministered as bishop of Rhætia early in the 5th century, and had died on Jan. 6 of some unmentioned year. Lucillus was accustomed to observe that day in his honor. In one of the poems of Venantius Fortunatus (cir. 600) it is said that a number of churches of St. Valentinus were then planted along the Inn. One hundred years later Corbinian visited the grave of the saint, near the Castle of Mais, in the Tyrolean Alps; and soon afterwards (in 730; see Aribio, in *Vita Corbin.* 18, in Meichelbeck, *Histor. Frising.* I, ii, 12) the Bavarian duke Thassilo caused Val-

Coin of Valentinian I.

entinus's bones to be removed to Passau. The diocese and Church of Passau have since claimed the saint as their earliest incumbent and representative. The *Acts of Saints* from which the Bollandists give a description of this saint are not older than the 11th century; while a leaden tablet said to have been found with his relics when they were exhumed can scarcely date further back than the 12th century. See *Acta SS. Bolland.* ad d. 7 Jan. i, 368; Raderi *Bavaria Sancta*, i, 32; Rettberg, *Kirchengesch. Deutschlands*, i, 220 sq.; comp. ii, 133.

Other Valentines, of Rome, Interamna, Africa, and Belgium, are mentioned in the *Acta SS.* under Feb. 13. See also under March 16, April 14 and 29, June 2, July 16, Sept. 29, etc.—Herzog, *Real-Encyklop.* s. v. It is to one of these latter, doubtless, that the popular custom of *St. Valentine's Day* is to be assigned. See VALENTINE, *St.*

**Valentinus, THE Gnostic, and the Valentinians.** The birthplace and descent of this most famous of Gnostics are not known. Epiphanius states that he had learned that Valentinus was an Egyptian, and had received a Hellenic training at Alexandria (*Hær.* xxxi, 2). The opinion that he was of Jewish extraction is a bare surmise. He came to Rome in the reign of Antoninus Pius, probably soon after A.D. 140, while Hyginus was bishop, and he remained until after Anicetus succeeded to the bishopric (Irenæus, iii, 4, 3; comp. Eusebius, *H. E.* iv, 10 sq.). Epiphanius says (*Hær.* xxxi, 7) that he went from Rome to Cyprus, and there first became an open enemy to the Church and the head of a heretical sect, with which statement should be compared that of Tertullian, in *Prescript.* c. 30, that Valentinus and Marcion had in the beginning adhered to the orthodox belief. Tertullian retains them in full membership with the Roman Church as late as the bishopric of Eleutheros (with which comp. Irenæus, *ut sup.*). The further story (*Adv. Valent.* c. 4) that Valentinus, conscious of his intellectual strength and oratorical power, had hoped to be made bishop of the Church, and had turned against the Church and the truth because a confessor was preferred to him, does not compel the assumption that disappointed ambition determined him to become a heretic.

The Valentinian system is very obscure with respect to many of its details, but its general structure and material contents are quite comprehensible. It constructs a Pleroma of *æons*, and in the process sets forth an idealistic view of the entire course of the creation and redemption of the world. The great first cause (*Βυθός, πρῶτον, προαρχή, προπάτερ*) produced the *Nous*, or *Monogenes*, who became the principle of all subsequent emanations (*ἀρχὴ τῶν πάντων*), and who was equal and similar to the Father. The *Nous* also manifests the Bythos, who is otherwise incomprehensible, and is in comparison with the latter the revealed God, through whom the generation and formation of the *æons* are mediated. With the Bythos was associated a feminine principle (*σὺζυγος*) named *Sige* (silence), though some hold that the Bythos was both masculine and feminine in himself, or exalted above all syzygies; and with the *Nous* was associated Truth (*ἀλήθεια*). These formed a productive quaternity which became the origin of all things. *Nous* and *Aletheia* produced *Logos* and *Zoe*, and *Logos* became the father of the remainder of the Pleroma. He expressed what existed seminally in the consciousness of *Nous*, and it thereby received life, and obtained concrete form, in the syzygy *Anthropos* (primeval man) and *Ecclesia*. The quaternity thus became an octave (*Ogdoas*); and this *Ogdoas*, which constitutes the centre of *æonic* developments, was reinforced by a group of ten *æons* emanated, according to Irenæus, from *Logos* and *Zoe*, and another of twelve from *Anthropos* and *Ecclesia*, or, according to Hippolytus, the ten from *Nous* and *Aletheia* and the twelve from *Logos* and *Zoe*. The derived *æons* were necessarily subject to limitations, as they could have no other recognition

of the Bythos than that mediated by the *Nous*, and as they were subject to the law of syzygies; and this necessity caused them to experience a feeling of deficiency and want, which ultimately found expression in *Sophia*, the last of the female *æons*. She vehemently desired to unite herself with the Bythos, but was prevented by *Horos* (the principle of limitation and differentiation in the Pleroma), and thereupon she laid aside the thought (*ἐνθύμησις*) previously entertained and the passion resulting from her attempt. This *ἐνθύμησις* σὺν τῇ ἐπιγενομένῳ πάθει became an abortion (*ἐκρῶμα*), or formless being (*οὐσία ἀμορφος*), produced without the co-operation of the male syzygos. To guard against a recurrence of the unnatural event, the Father caused a new pair of *æons*, Christ and the Holy Ghost, to be brought forth by the *Nous*, who restored harmony to the Pleroma—Christ by teaching the *æons* that it must suffice them to know the nature of the syzygies and the idea of the unoriginated, and that the Great Father of all is infinite and incomprehensible save as he is manifested by the *Nous* (they thus obtained a clear understanding of their relation to the Father, and learned that the immoderate desire to be united with the Bythos was threatening to their own separate existence); the Holy Spirit by imparting to them rest and contentment, in giving them similarity of form and disposition, and making each of them to be, at the same time, what all the others were. This constitutes the completion of the Pleroma. The representation of Hippolytus varies somewhat from that given above. The emanation of the abortion from the *Sophia* brought confusion, i. e. darkening of the intellect (*ἄγνοια*) and formlessness (*ἀμορφία*), into the Pleroma. To remove this, Christ and the Holy Ghost were produced, while *Horos*, or *Stauros*, was brought forth to be the guard and protector of the Pleroma. To celebrate the restored harmony of the Pleroma, each of the *æons* contributes the most beautiful and precious it contains to produce the perfect beauty, Jesus the Soter. This forms the conclusion of the heavenly drama; but in the expelled abortion the condition for a real world-process has been given. Christ gives to this abortion the form of a lower or external *Sophia* (*μόρφωσις κατ' οὐσίαν* as contrasted with the *μόρφωσις κατὰ γνῶσιν*), or *Achamoth*, a *Sophia* of nature, but not of knowledge. Contact with Christ has given her no permanent ability beyond a confused desire for light; she becomes the prey of sorrow, fear, and despair, all of which are the result of *ἄγνοια*, a lack of clear, gnostical consciousness. In response to her prayers, the Soter Jesus is sent for her support (Paraclete), and by him she is delivered from her hurtful affections and endowed with gnostical qualities. She thereupon receives into herself the light of the angels who accompany the Soter, and brings forth *pneumatical* fruit in their image. A second process of alienation and reconciliation is completed at this point, and, as in the former instance, in such a way that the affections eliminated from the *æonic* nature become the basis of a further development, while that *æonic* nature itself becomes the guiding principle of the new development. These eliminated affections existed in the first instances as an incorporeal *hyle* (ὕλη), but were soon incorporated in two substances, the hylic and the psychical. Fear became specifically psychical, sorrow hylic, despair *dæmoniacal*; and the *Achamoth* thus becomes the mother of all living things and the highest cosmical principle, and in her is reflected the *Ogdoas* of the *æonic* world, which is the prototype of the cosmical. *Achamoth* makes use of the Demiurge, who is the father of the psychical, the former of the hylic, and the king of all, but whose merely psychical nature deprives him of the power to comprehend the thoroughly pneumatical purpose of the cosmical development. The Demiurge forms the entire visible world, and is called *Hebdomas*, from the seven heavens. He is the fiery God of Deut. iv, 24, because he, as the principle of cosmical life, at the same time represents the might of

transitoriness. He constitutes man out of psychical and hylic elements, but he is not aware that the psychical has implanted in it pneumatical germs which the Sophia designs for further development. Such development receives a decisive impulse through the intervention of the Redeemer, whose office it is to spread gnostical light wherever any degree of receptivity exists. The Demiurge had promised his people, the Jews, a Messiah, and in due time causes him to be born (a psychical Messiah) from Mary, through whom he passes like water through a channel. The Messiah receives pneumatical endowments from the Sophia, but has in himself no hylic elements which are not capable of being saved. His psychical body is, however, so marvellously constructed that it may be seen and touched, and that it may suffer. At this point the Valentinians divided into two schools—the one of which included Heracleon and Ptolemy, and is known as the *Italiotic*, which held to the psychical body and seemed to make the pneumatical endowment dependent on the Messiah's baptism; while the *Anatolic* school, to which Axionicus and Ardesianes belonged, held to a pneumatical body formed by the descent of the Spirit (i. e. the Sophia) upon Mary and the co-operation of the Demiurge. The passion and crucifixion of our Lord likewise receive a symbolical interpretation, though the heavenly Soter is not usually allowed to participate in them. The saving process consists in the exaltation of the pneumatical element in man, and the end of all things is the separation of the pneumatical and the psychical from the hylic. Achamoth is thereby fully released from her pain, and she returns with the Soter, who becomes her husband, and with all perfect pneumatical natures who have been married to the angels of the Soter, into the Pleroma to the eternal marriage feast. The Demiurge, with all righteous psychical natures, is lifted up to the intermediate place near to, but not in, the Pleroma, and afterwards the concealed fires break forth and consume matter and themselves.

The influence of Platonic ideas is unmistakable in the structure of this system. Compare, e. g., the *κένωμα* or *ὀσρίπμα* with Plato's conception of matter as the *μὴ ὄν*. The *κένωμα* is conceived of as the negation of existence or being, and thus serves to show the monistic character of the system, though all gnosis involves the dualistic principle of connecting with the process of the absolute, as related to the process of the world, a negation of itself, an element of finiteness, and of effecting the necessary reconciliation only through the development of the world-process.

See Irenæus, particularly bk. i and ii; Hippolytus, *Adv. Hær.* vi, 21 sq.; Tertullian, *Adv. Valentin.*; Clem. Alex. *Strom.*, and other works, *pussim*; Origen, especially in *Joannis xiii*; Epiphanius, *Hær.* xxxi, xxxii, xxxv; Theodoret, *Hær. Fub.* i, 7; see also Buddæus, in *Appendix to Introd. ad Hist. Rev.* 1880, p. 567 sq.; and Herzog, *Real-Encyklop.* s. v. See GNOSTICISM.

**Valerian** (fully PUBLIUS LICINIUS VALERIANUS), Roman emperor from A.D. 253 to 259, was at first friendly towards Christians, but in 257 began a violent persecution of them, which continued to the end of his reign. Its object was chiefly to destroy the leaders of the Church, especially the bishops. They were at first forbidden to convoke religious gatherings under pain of imprisonment and similar punishments; afterwards were sentenced, together with their lay adherents, to the mines; and, finally, were condemned to execution, in company with all priests and deacons, while all such senators, knights, etc., as would not renounce the Christian religion were threatened with confiscation of property and loss of life. The most noted victims of this persecution were Sixtus I of Rome and Cyprian of Carthage. In the year 259 Valerian attempted an invasion of the Persian kingdom, but was taken prisoner by the Sassanide

king Sapor, and held in captivity until he died, ten years later. His son and successor, Gallienus, issued an edict of toleration in 260, which inaugurated a period of forty years of comparative peace and rest for Christianity. See Cyprian, *Epp.* 82, 83; Eusebius, *Hist. Eccl.* vii, 10, 11; Neander, *Church Hist.* ad loc.; Smith, *Dict. of Gr. and Rom. Biog.* s. v.; Herzog, *Real-Encyklop.* s. v.

Coin of Valerian.

**Valerian, St.**, was a bishop of Cemele, in the Maritime Alps, now in the archbishopric of Embrun. He belonged to the 5th century. He attended a synod at Riez in 439, signed the address of the Gallican bishops to Leo I in 451 (see Leonis M. *Opp.* i, 998, 1110 sq.), and took sides with the monastery of Lerins, in 454, in its dispute with the bishops of the neighborhood. The year of his death is not known. He left twenty-nine *Sermones*, or *Homilies*, and an *Epistola ad Monachos*, which were published by Sirmond (Par. 1612) and Raynaud (Lugd. 1633). Raynaud's edition is given also in Migne, *Patrolog.* (Par. 1845), lii. Galland furnished an additional edition of Valerian, together with a *Petrus Chrysologus*, in the *Bibl. Max. Patr.* (1774), c. 10. See Cave, *Script. Eccl. Hist. Lit.* i, 427; Herzog, *Real-Encyklop.* s. v.

**Valeriani, DOMENICO and GIUSEPPE**, two Italian painters, brothers, who flourished at Rome about 1730. They were pupils of Marco Ricci, and were jointly employed in decorating churches and other public buildings.

Another Giuseppe Valeriani was a Jesuit, and painted under Clement VIII several religious pictures, the best of which are in the Chiesa del Gesù.

**Valerio, SAMUEL**, a Jewish physician who flourished in the island of Corfu in the 16th century, is the author of *יר המלך*, or a commentary on the book of Esther (Ven. 1586), in which he made use of the Talmud, of Jewish and Christian exegetical works, of the philosophical writings among Jews and Arabs; *חזון לבניד*, or a commentary on Daniel (*ibid.* eod.). See First, *L. B. des Orient*, 1845, col. 566, 606; *Bibl. Jud.* iii, 467; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 325. (B. P.)

**Valerius**, a Spanish monk and abbot who flourished in Galicia about 680. His *Life of St. Fructuosus* is extant in Mabillon, *Acta Sanctor. Ord. Bened.* tom. ii. Some other works exist in MS. See Mosheim, *Church History*, bk. ii, cent. vii, pt. ii, ch. ii.

**Valerius, Augustinus.** See VALIERO AGOSTINO.

**Valesians**, a sect or community of ascetics said to have been founded by Valens of Bacacha Metrocomia, an episcopal city spoken of by Epiphanius and Nicetas as being in "Arabia beyond Jordan." They were said by Epiphanius to hold some Gnostic opinions, and by St. John of Damascus to be profligate Antinomians. They practiced self-mutilation, and enforced the practice on all their adherents. See Epiphanius, *De Hæresibus*, lviii; St. John of Damascus, *De Hæresibus*, lviii.

**Valesio, Francesco**, an Italian painter and engraver, flourished at Venice about 1612. Little is known of his paintings, but his most important work is a set of plates of hermits, engraved for a work entitled *Illustrium Anchoretorum Elogia*, by Jacobus Cavacus, which was published at Venice in 1612. His plates are sometimes marked *Franciscus Valesius*. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Valesio, Giovanni Luigi**, an Italian painter and engraver, was born at Bologna in 1561. He studied in the school of the Caracci and executed several works for the churches of his native city, such as *The Scourging of Christ*, in the Church of San Pietro; *The Annunciation*, at the Church of the Meudicanti; and *St. Roch Curing the Sick of the Plague*, in the Church of San Rocco. He went to Rome, where he enjoyed great reputation, and where he died in 1640. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Valesius** (properly *De Valois*), HENRY, a French antiquarian and critic, was born in Paris, Sept. 10, 1603, and educated in the Jesuit College at Verdun and at Paris. He formed a connection with Petavius and Simond which existed while they lived. In 1622 he went to Bourges for the study of jurisprudence, and on his return spent seven years in the practice of law; but subsequently gave himself wholly to learned studies, the earliest fruit of which was his edition, with critical notes, of the excerpta from Polybius, Diod. Sic., etc., made by order of the emperor Constantine Porphyrogenitus, entitled *Excerpta Polyb., Diod. Sic., Nicol. Damasc., App. Alexandr.* etc. (Par. 1634-48). Then followed his valuable critical edition of Ammianus Marcellinus (ibid. 1636; 2d improved ed. by his brother Hadrian, 1681). These works so advanced his reputation that he was received into the circle of the foremost scholars of his time, as D'Achery, Mabillon, cardinal Barberini, Leo Allatius, Grotius, and others. He was, however, troubled with weak eyes, and threatened with total blindness; but, a reader having been provided, he was enabled to prosecute his studies of the ancient Church writers, and he was instructed in 1650 by the French bishops to publish a new and critical edition of their works, for which he received an annual pension of 600, and after a time 800, livres. He published in consequence, *Eusebii Historia Ecclesiastica*:—*De Vita Constantini Lib. IV*:—*Oratio Constantini ad Sanctos*:—and the treatises *De Donatistis*, *De Anastasi*, *De Translatione LXX Interpretum*, *De Rosvendi Martyrologio* (Par. 1659, 1678). In 1660 Louis XIV appointed him historiographer with a salary of 1200 livres, and cardinal Mazarin also gave him tokens of favor. In 1664, at the ripe age of sixty-one years, he married Margaret Chesneau, a young girl, and became the father of seven children. He continued to employ his time in literary pursuits until he died, in Paris, May 7, 1676. His later works included editions of Socrates and Sozomen; treatises on Athanasius, Paul of Constantinople, the sixth canon of the Council of Nice (Par. 1668); an edition of Theodoret, one of Evagrius, with extracts from Philostorgius, and of Theodore Lector (ibid. 1673; Mogunt. 1679; Amstel. 1695). He was planning new editions of the Latin historians of the Church when death surprised him. In Burmann, *H. Vales. Emend. Libr. Quinque et de Critica Libr. Duo*, are given several smaller works of Valesius, some of which had not been previously published, and also *H. Valesii Vita* (Par. 1677, by his brother). In Paris (1694) were also published *Valesiana*. See Herzog, *Real-Encyclop.* s. v.

**Valette, Louis**, a Protestant theologian, was born May 24, 1800, in Savoy. For a number of years he was chaplain to the ambassador at Naples. In 1851 he was called to the Lutheran Church des Villettes at Paris, where he also acted as chaplain to the duchess of Orleans. He was soon called to the presidency of the Lutheran Consistory at Paris, which position he occupied till his death, Oct. 20, 1872. (B. P.)

**Valhalla**. See WALHALLA.

**Vali**, in Norse mythology, was a son of Odin, who was destined to reappear in the new heavens which the All-Father should create after the fall of Walhalla. In all other respects the name remained vague, and received no distinct form in the popular imagination.

**Valliero, Agostino**, an Italian prelate, was born at Leniaco, near Venice, April 8, 1530, of a patrician family,

being nephew of cardinal Navagero, who directed him in his studies at Padua. He made such progress in them that he was appointed in 1556 professor of philosophy at Venice, and in 1562 he accompanied cardinal Nageurius, whose secretary he was, to the Council of Trent. In 1565 he succeeded Nageurius as bishop of Verona, and in 1579 pope Gregory XIII sent him to Dalmatia to visit the churches there. In 1583 he was made cardinal, and in 1585 he was appointed abbot of Forli by pope Sixtus V. In 1590 he was a member of the conclave which appointed pope Gregory XIV. After the death of Innocent IX, the cardinals contemplated the election of Valerius to the papal throne. Clement VIII, however, who was elected in his stead, appointed him examiner of the bishops and member of the *Congregatio Rituum et Indicis*. In 1600 Leo XI made him bishop of Palestrina. The difficulties between the pope and the republic of Venice caused his death, which took place May 21, 1606. His writings are numerous, and are enumerated in Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; see also Winer, *Handbuch der theol. Literatur*, ii, 61; Hoefer, *Nouv. Biog. Générale*, s. v. (B. P.)

**Valla, Lorenzo**, a Roman priest and controversialist, was born about 1410. He was ordained a priest in 1431, and taught rhetoric and philosophy at Pavia and Milan, where he had bitter controversies with the Aristotelian scholastics. In 1443 he left Rome and went to Naples, where he was patronized by Alfonso I, but for whose protection the inquisitors would have burned him at the stake. He became reconciled to the pope, Nicholas V, by whom he was restored as canon of St. John Lateran. He returned to Rome and remained there until his death, in 1456. He wrote many important works, among which are *De Falso Credita et Ementita Constantini Donatione Declaratio*:—*Elegantiarum Lingue Latine Lib. VI*:—*In Novum Testamentum Annotationes*:—*De Collationibus Novi Testamenti*:—Notes on Sallust, Livy, and Quintilian:—and Translations of the *Iliad*, Herodotus, Thucydides, etc.; besides several controversial works and treatises on logic. His principal works were published at Basle in 1543.

**Valladier, André**, a learned French ecclesiastic, was born about 1565, at St. Paul, near Montbrison, of an ancient family which took its name from the village where it had lived. Having finished his early education at Billom, in Auvergne, he went to Avignon to study theology, and entered the Order of the Jesuits (1586), where he was appointed to teach the humanities. Jealousy at his success in sermonizing led him to leave Avignon, and he preached for a time in Moulins, Dijon, and Lyons. Henry IV, hearing of his talents, called him to Paris as historiographer of his reign (1605); but the Jesuits secreted the royal missive, and Valladier, in disgust, left their order, and went first to Paris and thence to Rome, where he obtained of Paul V letters which secured him from further persecution (July, 1608). He preached in Paris before the court with great acceptance, and in 1609 was appointed by cardinal Grévy his canon, and in 1611 he received the abbey of St. Arnould. He again became involved in trouble, however, but in 1621 he was restored to his office. He died at Metz, Aug. 13, 1638. He wrote a number of secular and religious treatises, which are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v.

**Valladolid, COUNCIL OF** (*Concilium apud Vallemolletum or Vallum Oletum*). Valladolid is a well-known town of Spain (anciently called *Pintia*), capital of a province of the same name, situated on the left bank of the Pisuerga. An ecclesiastical council was held there in 1322 by cardinal William, bishop of Savina, and legate of pope John XXII. A preface and twenty-seven canons were published by his direction, and with the approbation of the council.

1. Orders that provincial councils be held every two years, and diocesan synods annually.

2. Orders all curates to read four times a year, in the vulgar tongue, to their parishioners the articles of belief,

the decalogue, the number of the sacraments, and the different virtues and vices.

4. Orders that Sundays and festivals be kept holy.
  10. Orders that bishops shall assign limits to parishes.
  11. Excommunicates monks who fraudulently evade payment of tithes.
  13. Exhorts curates to exercise hospitality.
  14. Forbids to present to churches before a vacancy, or to present infants.
  16. Declares those to be excommunicated, *ipso facto*, who eat or sell meat on any fast-day.
  17. Forbids secular meetings within churches, fairs, etc., in church-yards, or to fortify churches as places of defence.
  20. Grants to clerks three years for study, during which time they may receive the fruits of their benefices without residence.
  - 23 and 24. Excommunicate those who seize men and sell them to the Saracens; also all wizards, enchanters, and those who consult them.
- See Mansi, *Concil.* xi, 1682.

**Vallarsi, DOMENICO**, an Italian antiquarian, was born at Verona, Nov. 13, 1702, and studied the humanities with the Jesuits with such success that at the age of twelve he maintained a public thesis on philosophy. He afterwards entered the order, and applied himself to the study of Hebrew, Greek, and ecclesiastical history. He finally went to Rome as reviser of the ancient languages, and there became a noted authority on the antiquities of the Middle Ages, a subject on which he wrote several works. He also edited the *Opera Omnia* of Jerome (Verona, 1734, 12 vols. fol.), and those of Tyrannius Rufinus (ibid. 1745, 4to). He died at Verona, Aug. 14, 1771. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Valle, ANDREA DELLA**, an Italian architect of the 16th century, was born at Padua. His principal work was the Carthusian monastery, two miles from Padua. This structure, from its beautiful design, has been attributed to Palladio. He published an edition of the unprinted works of Palladio, in which he inserted five plates. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Vallée, Geoffroi**, a French deist of the latter part of the 16th century, was the son of the controller of the public domain. He gave himself up to philosophical speculations, which ended in rejecting all religious belief. In consequence of an infidel work which he wrote, entitled *La Béatitude des Chrétiens* (2d ed. 1770, 8vo), he was imprisoned, and, after trial, was hanged, and his body burned at Paris, Feb. 9, 1574. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Vallée (or Valée), Simon**, a French engraver, is said to have been born at Paris about 1700. He studied under P. Drevet, and executed several plates in a neat and tasteful style. Among them are the following: *The Transfiguration* (Raphael):—*St. John in the Desert* (id.):—*The Flight into Egypt* (Carlo Maratti):—*The Resurrection of Lazarus* (Girolamo Muziano):—*The Finding of Moses* (Francesco Romazelli):—and others. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Vallemont, PIERRE le Lorraine, abbé de**, a French writer, was born at Pont-Audemer, Sept. 10, 1649, of a Norman family. He entered the religious order; was made doctor of theology; lived successively at Rouen, where his peculiar views encountered opposition; at Paris, where he superintended the education of a young nobleman; at Versailles, as prior of St. James de Bressuire; and finally returned to his native place, where he died, Dec. 30, 1721. It is not known for what reason he took the surname of Vallemont. His writings, which are of a philosophico-religious character, are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v.

**Vallensis, Johannes**, of Autun, France, who lived in the 16th century, is the author of *Grammatica Hebraica* (Paris, s. a.):—*Opus de Prosodia Hebræorum in IV Libros Divisum* (ibid. 1545): the first book contains *Accentuum Inventio*; the second, *Grammat. et Musici Locus*; the third, *Rhetorici Accent. Offic.* etc.; the fourth, *Natural. Accent. Locus*. See First, *Bibl. Jud.* iii, 468; Steinschneider, *Bibl. Handb.* No. 2055. (B. P.)

**Vallensis, Theophilus**, who lived in the 17th century, is the author of *Enchiridion Lingue Sanctæ s. Hebrææ Grammatica* (Lips. 1631). See First, *Bibl. Jud.* iii, 468; Steinschneider, *Bibl. Handb.* No. 2057. (B. P.)

**Vallet (or Valet), GUILLAUME**, a French engraver, was born in Paris in 1636. After some study of his art he went to Rome, where he resided many years. His plates were executed with the graver, and his prints possess considerable merit. He died in 1704. Among his prints the following deserve mention: *The Nativity*; *The Holy Family*; *Melchizedek bringing Presents to Abraham*; *The Last Supper*—all after Raphael:—*The Holy Family*, after Guido, also after Albano:—and several others. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Vallette, WILLIAM**, a Methodist Episcopal minister, studied medicine early in life; joined the Illinois Conference in 1839; was transferred to Rock River Conference in 1840; and in the following year was ordained deacon. In 1846 hæmorrhage of the lungs incapacitated him for further ministerial labor, and caused his retirement to Elgin as a superannuate, where he spent the remainder of his days in the practice of medicine. He died in 1871. See *Minutes of Annual Conferences*, 1872, p. 113.

**Valley (also Vale)**, a hollow sweep of ground between two more or less parallel ridges of high land. Vale is the poetical or provincial form. It is in the nature of the case that the centre of a valley should usually be occupied by the stream which forms the drain of the high land on either side, and from this it commonly receives its name. Valley is distinguished from other terms more or less closely related—on the one hand, from “glen,” “ravine,” “gorge,” or “dell,” which all express a depression at once more abrupt and smaller than a valley; on the other hand, from “plain,” which, though it may be used of a wide valley, is not ordinarily or necessarily so. It is to be regretted that with this quasi-precision of meaning the term should not have been employed with more restriction in the A. V. See TOPOGRAPHICAL TERMS.

The structure of the greater part of the Holy Land does not lend itself to the formation of valleys in our sense of the word. The abrupt transitions of its crowded rocky hills preclude the existence of any extended sweep of valley; and where one such does occur, as at Hebron, or on the south-east of Gerizim, the irregular and unsymmetrical positions of the enclosing hills rob it of the character of a valley. The nearest approach is found in the space between the mountains of Gerizim and Ebal, which contains the town of Nablûs, the ancient Shechem. This, however, by a singular chance, is not mentioned in the Bible. Another is the “valley of Jezreel,” the undulating hollow which intervenes between Gilboa (Jebel Fukuas) and the so-called Little Hermon (Jebel Duhay). See PALESTINE.

Valley is employed in the A. V. to render the following Heb. and Gr. words. See DALE; PLAIN.

1. *Bik'ah* (בִּקְעָה), from בָּקַע, to cleave; (Sept. πεδιον) appears to mean rather a plain than a valley, wider than the latter, though so far resembling it as to be enclosed by mountains, like the wide district between Leb-anon and Antilebanon, which is still called the *Beka'a*. It denotes a wide alluvial bottom, and its levelness is plainly referred to in Isa. xl, 4. It is usually rendered “valley” (Deut. viii, 7; xi, 1; xxxiv, 3; Josh. xi, 8, 17; xii, 7; 2 Chron. xxxv, 22; Psa. civ, 8; Isa. xli, 18; lxiii, 14; Ezek. xxxvii, 1, 2; Zech. xii, 11); elsewhere “plain” (Gen. xi, 2; Neh. vi, 2; Isa. xl, 4; Ezek. iii, 22, 23; viii, 4; Amos i, 5). This Heb. term is applied to the following places:

(1) *The Valley of Shinar* (בִּקְעַת שִׁנְאָר), the rich plain of Babylonia (Gen. xi, 2). See SHINAR.

(2) *The Valley of Jericho* (בִּקְעַת יֶרִיכוֹ), the lower end of the Ghôr, or plain, through which the Jordan

treated as integral parts of the books. A few MSS. of the Bible faithfully preserved the "Hebrew canon," but the great mass, according to the general custom of copyists to omit nothing, included everything which had held a place in the Old Latin. In the New Test. the only important addition which was frequently interpolated was the Apocryphal epistle to the Laodiceans. The text of the gospels was in the main Jerome's revised edition; that of the remaining books his very incomplete revision of the Old Latin. Thus the present Vulgate contains elements which belong to every period and form of the Latin version—(1.) *Unrevised Old Latin*: Wisdom, Ecclesiasticus, 1 and 2 Macc., Baruch. (2.) *Old Latin revised from the Sept.*: Psalter. (3.) *Jerome's free translation from the original text*: Judith, Tobit. (4.) *Jerome's translation from the original*: Old Test. except Psalter. (5.) *Old Latin revised from Greek MSS.*: Gospels. (6.) *Old Latin cursorily revised*: the remainder of the New Test.

2. *Revision of Alcuin*.—Meanwhile the text of the different parts of the Latin Bible was rapidly deteriorating. The simultaneous use of the Old and New versions necessarily led to great corruptions of both texts. Mixed texts were formed according to the taste or judgment of scribes, and the confusion was further increased by the changes which were sometimes introduced by those who had some knowledge of Greek. From this cause scarcely any Anglo-Saxon Vulgate MS. of the 8th or 9th century, in all probability, is wholly free from an admixture of old readings. Several remarkable examples are noticed below; and in rare instances it is difficult to decide whether the text is not rather a revised *Vetus* than a corrupted *Vulgata nova* (e.g. Brit. Mus. Reg. i, E. vi; *Addit.* 5463). As early as the 6th century, Cassiodorus attempted a partial revision of the text (Psalter, Prophets, Epistles) by a collation of old MSS. But private labor was unable to check the growing corruption, and in the 8th century this had arrived at such a height that it attracted the attention of Charlemagne. Charlemagne at once sought a remedy, and intrusted to Alcuin (cir. A.D. 802) the task of revising the Latin text for public use. This Alcuin appears to have done simply by the use of MSS. of the Vulgate, and not by reference to the original texts (Porson, *Letter vi to Travis*, p. 145). The passages which are adduced by Hody to prove his familiarity with Hebrew are, in fact, only quotations from Jerome, and he certainly left the text unaltered—at least in one place where Jerome points out its inaccuracy (Gen. xxv, 8). The patronage of Charlemagne gave a wide currency to the revision of Alcuin, and several MSS. remain which claim to date immediately from his time. According to a very remarkable statement, Charlemagne was more than a patron of sacred criticism, and himself devoted the last year of his life to the correction of the gospels "with the help of Greeks and Syrians" (Van Ess, p. 159, quoting Theganus, *Script. Hist. Franc.* ii, 277).

However this may be, it is probable that Alcuin's revision contributed much towards preserving a good Vulgate text. The best MSS. of his recension do not differ widely from the pure Hieronymian text, and his authority must have done much to check the spread of the interpolations which reappear afterwards, and which were derived from the intermixture of the Old and New versions. Examples of readings which seem to be due to him occur: Deut. i, 9, add. *solitudinem; venissemus, for etis*; ver. 4, add. *ascendimus, for ascendemus*; ii, 24, in *manu tua, for in manus tuas*; iv, 33, *vidisti, for vixisti*; vi, 13, *ipsi, add. soli*; xv, 9, *oculos, om. tuos*; xvii, 20, *filius, for filii*; xxi, 6, add. *veniet*; xxvi, 16, *at, for et*. But the new revision was gradually deformed, though later attempts at correction were made by Lanfranc of Canterbury (A.D. 1089, Hody, p. 416), Card. Nicolaus (A.D. 1150), and the Cistercian abbot Stephanus (cir. A.D. 1150). In the 13th century *Correctoria* were drawn up, especially in France, in which varieties of reading were

discussed; and Roger Bacon complains loudly of the confusion which was introduced into the "common, that is, the Parisian, copy;" and quotes a false reading from Mark viii, 38, where the correctors had substituted *confessus* for *confusus* (Hody, p. 419 sq.). Little more was done for the text of the Vulgate till the invention of printing; and the name of Laurentius Valla (cir. 1450) alone deserves mention, as of one who devoted the highest powers to the criticism of Holy Scripture, at a time when such studies were little esteemed.

V. *History of the Printed Text*.—1. *Early Editions*.—It was a noble omen for the future progress of printing that the first book which issued from the press was the Bible; and the splendid pages of the Mazarin Vulgate (Mainz—Gutenberg and Fust) stand yet unsurpassed by the latest efforts of typography. This work is referred to about the year 1455, and presents the common text of the 15th century. Other editions followed in rapid succession (the first with a date, Mainz, 1462, Fust and Schoeffer), but they offer nothing of critical interest. The first collection of various readings appears in a Paris edition of 1504, and others followed at Venice and Lyons in 1511, 1513; but cardinal Ximenes (1502–1517) was the first who seriously revised the Latin text ("contulimus cum quamplurimis exemplaribus venerandæ vetustatis; sed his maxime, quæ in publica Complutensis nostræ universitatis bibliotheca reconduntur, quæ supra octingentesimum abhinc annum litteris Gothicis conscriptæ, æ sunt sinceritate ut nec apicis lapsus possit in eis deprehendi" [*Præf.*]), to which he assigned the middle place of honor in his Polyglot between the Hebrew and Greek texts. The Complutensian text is said to be more correct than those which preceded it, but still it is very far from being pure. This was followed in 1528 (2d ed. 1532) by an edition of R. Stephens, who had bestowed great pains upon the work, consulting three MSS. of high character and the earlier editions; but as yet the best materials were not open for use. About the same time various attempts were made to correct the Latin from the original texts (Erasmus, 1516; Pagninus, 1518–28; Card. Cajetan; Seuechius, 1529; Clarus, 1542), or even to make a new Latin version (Jo. Campensis, 1533). A more important edition of R. Stephens followed in 1540, in which he made use of twenty MSS. and introduced considerable alterations into his former text. In 1541 another edition was published by Jo. Benedictus at Paris, which was based on the collation of MSS. and editions, and was often reprinted afterwards. Vercellone speaks much more highly of the *Biblia Ordinaria*, with glosses, etc., published at Lyons, 1545, as giving readings in accordance with the oldest MSS., though the sources from which they are derived are not given (*Varie Lect.* xcix). The course of controversy in the 16th century exaggerated the importance of the differences in the text and interpretation of the Vulgate, and the confusion called for some remedy. An authorized edition became a necessity for the Romish Church, and, however gravely later theologians may have erred in explaining the policy or intentions of the Tridentine fathers on this point, there can be no doubt that (setting aside all reference to the *original* texts) the principle of their decision—the preference, that is, of the oldest Latin text to any later Latin version—was substantially right.

2. *The Sixtine and Clementine Vulgates*.—The first session of the Council of Trent was held on Dec. 13, 1545. After some preliminary arrangements, the Nicene Creed was formally promulgated as the foundation of the Christian faith on Feb. 4, 1546, and then the council proceeded to the question of the authority, text, and interpretation of Holy Scripture. A committee was appointed to report upon the subject, which held private meetings from Feb. 20 to March 17. Considerable varieties of opinion existed as to the relative value of the original and Latin texts, and the final decree was intended to serve as a compromise. This was made on April 8, 1546, and consisted of two parts—the first of which con-

tains the list of the canonical books, with the usual anathema on those who refuse to receive it; while the second, "On the Edition and Use of the Sacred Books," contains no anathema, so that its contents are not articles of faith. The wording of the decree itself contains several marks of the controversy from which it arose, and admits of a far more liberal construction than later glosses have affixed to it. In affirming the authority of the "Old Vulgate," it contains no estimate of the value of the original texts. The question decided is simply the relative merits of the current Latin versions ("si ex omnibus Latinis versionibus quæ circumferuntur"), and this only in reference to *public* exercises. The object contemplated is the advantage (*utilitas*) of the Church, and not anything essential to its constitution. It was further enacted, as a check to the license of printers, that "Holy Scripture, but especially the old and common [Vulgate] edition [evidently without excluding the original texts], should be printed as correctly as possible." In spite, however, of the comparative caution of the decree, and the interpretation which was affixed to it by the highest authorities, it was received with little favor, and the want of a standard text of the Vulgate practically left the question as unsettled as before. The decree itself was made by men little fitted to anticipate the difficulties of textual criticism, but afterwards these were found to be so great that for some time it seemed that no authorized edition would appear. The theologians of Belgium did something to meet the want. In 1547 the first edition of Hentenius appeared at Louvain, which had very considerable influence upon later copies. It was based upon the collation of Latin MSS. and the Stephanic edition of 1540. In the Antwerp Polyglot of 1568-72 the Vulgate was borrowed from the Complutensian (Vercellone, *Var. Lect.* ci); but in the Antwerp edition of the Vulgate of 1573-74 the text of Hentenius was adopted, with copious additions of readings by Lucas Brugensis. This last was designed as the preparation and temporary substitute for the papal edition; indeed, it may be questioned whether it was not put forth as the "correct edition required by the Tridentine decree" (comp. Lucas Brug. ap. Vercellone, cii). But a papal board was already engaged, however desultorily, upon the work of revision. The earliest trace of an attempt to realize the recommendations of the council is found fifteen years after it was made. In 1561 Paulus Manutius (son of Aldus Manutius) was invited to Rome to superintend the printing of Latin and Greek Bibles (Vercellone, *Var. Lect.* etc., i, prol. xix, note). During that year and the next several scholars (with Sirletus at their head) were engaged in the revision of the text. In the pontificate of Pius V the work was continued, and Sirletus still took a chief part in it (1569-70) (*ibid.* loc. cit. prol. xx, note), but it was currently reported that the difficulties of publishing an authoritative edition were insuperable. Nothing further was done towards the revision of the Vulgate under Gregory XIII, but preparations were made for an edition of the Sept. This appeared in 1587, in the second year of the pontificate of Sixtus V, who had been one of the chief promoters of the work. After the publication of the Sept., Sixtus immediately devoted himself to the production of an edition of the Vulgate. He was himself a scholar, and his imperious genius led him to face a task from which others had shrunk. "He had felt," he says, "from his first accession to the papal throne (1585), great grief, or even indignation (*indigne ferentes*), that the Tridentine decree was still unsatisfied;" and a board was appointed, under the presidency of cardinal Carafa, to arrange the materials and offer suggestions for an edition. Sixtus himself revised the text, rejecting or confirming the suggestions of the board by his absolute judgment; and when the work was printed, he examined the sheets with the utmost care, and corrected the errors with his own hand. The edition appeared in 1590, with the famous constitution *Aeternus*

*ille* (dated March 1, 1589) prefixed, in which Sixtus affirmed with characteristic decision the plenary authority of the edition for all future time. "By the fullness of apostolical power" (such are his words), "we decree and declare that this edition . . . approved by the authority delivered to us by the Lord, is to be received and held as true, lawful, authentic, and unquestionable, in all public and private discussion, reading, preaching, and explanation." He further forbade expressly the publication of various readings in copies of the Vulgate, and pronounced that all readings in other editions and MSS. which vary from those of the revised text "are to have no credit or authority for the future" ("ea in iis quæ huic nostræ editioni non consenserint, nullam in posterum fidem, nullamque auctoritatem habitura esse decernimus"). It was also enacted that the new revision should be introduced into all missals and service-books, and the greater excommunication was threatened against all who in any way contravened the constitution. Had the life of Sixtus been prolonged, there is no doubt that his iron will would have enforced the changes which he thus peremptorily proclaimed; but he died in August, 1590, and those whom he had alarmed or offended took immediate measures to hinder the execution of his designs. Nor was this without good reason. He had changed the readings of those whom he had employed to report upon the text with the most arbitrary and unskilful hand; and it was scarcely an exaggeration to say that his precipitate "self-reliance had brought the Church into the most serious peril." During the brief pontificate of Urban VII nothing could be done, but the reaction was not long delayed. On the accession of Gregory XIV, some went so far as to propose that the edition of Sixtus should be absolutely prohibited, but Bellarmine suggested a middle course. He proposed that the erroneous alterations of the text which had been made in it ("quæ male mutata erant") "should be corrected with all possible speed, and the Bible reprinted under the name of Sixtus, with a prefatory note to the effect that errors (*aliqua errata*) had crept into the former edition by the carelessness of the printers." This pious fraud, or rather daring falsehood—for it can be called by no other name—found favor with those in power. A commission was appointed to revise the Sixtine text, under the presidency of the cardinal Colonna (Columna). At first the commissioners made but slow progress, and it seemed likely that a year would elapse before the revision was completed (Ungarelli, in Vercellone, *Proleg.* lviii). The mode of proceedings was therefore changed, and the commission moved to Zagarolo, the country-seat of Colonna; and, if we may believe the inscription which still commemorates the event, and the current report of the time, the work was completed in *nineteen* days. But even if it can be shown that the work extended over six months, it is obvious that there was no time for the examination of new authorities, but only for making a rapid revision with the help of the materials already collected. The task was hardly finished when Gregory died (October, 1591), and the publication of the revised text was again delayed. His successor, Innocent IX, died within the same year, and at the beginning of 1592 Clement VIII was raised to the papedom. Clement intrusted the final revision of the text to Toletus, and the whole was printed by Aldus Manutius (the grandson) before the end of 1592. The preface, which is moulded upon that of Sixtus, was written by Bellarmine, and is favorably distinguished from that of Sixtus by its temperance and even modesty. The text, it is said, had been prepared with the greatest care, and though not absolutely perfect, was at least (what is no idle boast), more correct than that of any former edition. Some readings, indeed, it is allowed, had, though wrong, been left unchanged to avoid popular offence; but yet even here Bellarmine did not scruple to repeat the fiction of the intention of Sixtus to recall his edition, which still disgraces the front of

the Roman Vulgate by an apology no less needless than untrue. Another edition followed in 1593, and a third in 1598, with a triple list of errata, one for each of the three editions. Other editions were afterwards published at Rome (comp. Vercellone, civ), but with these corrections the history of the authorized text properly concludes.

The respective merits of the Sixtine and Clementine editions have often been debated. In point of mechanical accuracy, the Sixtine seems to be clearly superior (Van Ess, *Gesch.* 365 sq.); but Van Ess has allowed himself to be misled in the estimate which he gives of the critical value of the Sixtine readings. The collections lately published by Vercellone place in the clearest light the strange and uncritical mode in which Sixtus dealt with the evidence and results submitted to him. The recommendations of the Sixtine correctors are marked by singular wisdom and critical tact; and in almost every case where Sixtus departs from them he is in error. This will be evident from a collation of the readings, in a few chapters, as given by Vercellone. Thus in the first four chapters of Genesis the Sixtine correctors are right against Sixtus: i, 2, 27, 31; ii, 18, 20; iii, 1, 11, 12, 17, 21, 22; iv, 1, 5, 7, 8, 9, 15, 16, 19; and, on the other hand, Sixtus is right against the correctors in i, 15. The Gregorian correctors, therefore (whose results are given in the Clementine edition), in the main simply restored readings adopted by the Sixtine board and rejected by Sixtus. In the book of Deuteronomy the Clementine edition follows the Sixtine correctors where it differs from the Sixtine edition: i, 4, 19, 31; ii, 21; iv, 6, 22, 28, 30, 33, 39; v, 24; vi, 4; viii, 1; ix, 9; x, 3; xi, 3; xii, 11, 12, 15, etc.; and every change (except, probably, vi, 4; xii, 11, 12) is right; while, on the other hand, in the same chapters there are apparently only two instances of variation without the authority of the Sixtine correctors (xi, 10, 32). But in point of fact the Clementine edition errs by excess of caution. Within the same limits it follows Sixtus against the correctors wrongly in ii, 33; iii, 10, 12, 13, 16, 19, 20; iv, 10, 11, 28, 42; vi, 3; xi, 28; and in the whole book admits in the following passages arbitrary changes of Sixtus: iv, 10; v, 24; vi, 13; xii, 15, 32; xviii, 10, 11; xxix, 23. In the New Test., as the report of the Sixtine correctors has not yet been published, it is impossible to say how far the same law holds good; but the following comparison of the variations of the two editions in continuous passages of the gospels and epistles will show that the Clementine, though not a pure text, is yet very far purer than the Sixtine, which often gives Old Latin readings, and sometimes appears to depend simply on patristic authority (i. e. pp. II.):

	SIXTINE.	CLEMENTINE.
Matt. i, 23,	vocabitur (pp. II.).	vocabunt.
ii, 5,	Juda (gat. mn. etc.).	Jude.

3. *Later Editions.*—While the Clementine edition was still recent, some thoughts seem to have been entertained of revising it. Lucas Brugensis made important collections for this purpose; but the practical difficulties were found to be too great, and the study of various readings was reserved for scholars (Bellarmine, *ad Lucam Brug.* 1606). In the next generation use and controversy gave a sanctity to the authorized text. Many, especially in Spain, pronounced it to have a value superior to the originals, and to be inspired in every detail (comp. Van Ess, *Gesch.* p. 401, 402; Hody, III, ii, 15); but it is useless to dwell on the history of such extravagancies, from which the Jesuits, at least, following their great champion Bellarmine, wisely kept aloof. It was a more serious matter that the universal acceptance of the papal text checked the critical study of the materials on which it was professedly based. At length, however, in 1706, Martianay published a new, and, in the main, better, text, chiefly from original MSS., in his edition of Jerome. Vallarsi added fresh collations in his revised issue of Martianay's work; but in both cases the collations are imperfect, and it is impossible to determine with accuracy on what MS. authority the text which is given depends. Sabatier, though professing only to deal with the Old Latin, published important materials for the criticism of Jerome's version, and gave at length the readings of Lucas Brugensis (1743). More than a century elapsed before anything more of importance was done for the text of the Latin version of the Old Test., when at length the fortunate discovery of the original revision of the Sixtine correctors again directed the attention of Roman scholars to their authorized text. The first-fruits of their labors are given in the volume of Vercellone, already often quoted, which has thrown more light upon the history and criticism of the Vulg. than any previous work. There are some defects in the arrangement of the materials, and it is unfortunate that the editor has not added either the authorized or corrected text; but still the work is such that every student of the Latin text must be deeply interested in it.

The neglect of the Latin text of the Old Test. is but a consequence of the general neglect of the criticism of the Hebrew text. In the New Test. far more has been done for the correction of the Vulg., though even here no critical edition has yet been published. Numerous collations of MSS., more or less perfect, have been made. In this, as in many other points, Bentley pointed out the true path which others have followed. His own collation of Latin MSS. was extensive and important (comp. Ellis, *Bentley Critica Sacra*, xxxv sq.). Griesbach added new collations, and arranged those which others had made. Lachmann printed the Latin text in his larger edition, having collated the *Codex Fuldensis* for the purpose. Tischendorf has labored among Latin

MSS., only with less zeal than among Greek. Tregelles has given in his edition of the New Test. the text of *Cod. Amiatinus* from his own collation with the variations of the Clementine edition. But in all these cases the study of the Latin was merely ancillary to that of the Greek text. Probably, from the great antiquity and purity of the *Codd. Amiatinus* and *Fuldensis*, there is comparatively little scope for criticism in the revision of Jerome's version; but it could not be an unprofitable work to examine more in detail than has yet been done the several phases through which it has passed, and the causes which led to its gradual corruption.

A full account of the editions of the Vulg. is given by Masch (Le Long), *Bibliotheca Sacra* (1778-90). The variations between the Sixtine and Clementine editions were collated by T. James, *Bellum Papale, s. Concordia Discors* (Lond. 1600), and more completely, with a collation of the Clementine editions, by H. de Bukentop, *Lux de Luce*, iii, 315 sq. Vercellone, correcting earlier critics, reckons that the whole number of variations between the two revisions is about three thousand (*Prolegg.* xlviii, *nota*).

VI. *Principal MSS. of the Vulgate.*—These may briefly be enumerated as follows: 1. *Cod. Amiatinus*, of the middle of the 6th century, the oldest and best extant; in the Laurentian Library at Florence; it contains the

Old Test., except Baruch, and the New Test.: the latter has been edited from it by Tischendorf (Leips. 1850, 4to). See AMIATINE MANUSCRIPT.

2. *Biblia Gothica Toletana Ecclesie*, of the 8th century, containing all the books except Baruch (Vercellone, *Var. Lect.* i, 84).

3. *Cod. Cavensis*, of the 8th century, if not earlier; contains the Old and New Test.; belongs to the monastery of La Cava, near Salerno; examined by Tischendorf.

4. *Cod. Paullinus*, of the 9th century, wants Baruch; at Rome (Vercellone, *loc. cit.*).

5. *Cod. Statianus* *hod. Vallicellanus*, of the 9th century; at Rome (Vercellone, *l. c.*).

6. *Cod. Ottobonianus*, of the 8th century, contains the Octateuch; in the Vatican (Vercellone, *l. c.*).

7. *Biblia Carolina*, of the 9th century; wants Baruch, and the two last leaves are by a later hand; in the cantonal library at Zurich.

8. *Biblia Bambergensis*, of the 9th century, wants the Apocalypse; it has Jerome's Epistle to Paulinus prefixed in large uncials, the rest of the MS. is minuscular; in this MS. 1 John v, 7 appears (Kopp, *Bilder u. Schriften der Vorzeit*, i, 184).

9. *Cod. Alcuini*, of the 9th century, containing the Old and New Test. (except Baruch); supposed to be

that offered to Charlemagne at his coronation; formerly in the possession of the recluses at Montier de Grandval, now in the British Museum (*Addit.*, 10, 546).

10. A MS. on very clean parchment, probably of the 13th century; formerly at Altdorf, now at Erlangen (Niederer, *Nachrichten zur Kirchen-, Gelehrten- und Bücher-Geschichte*, x, 125).

11. A MS. of the 13th century, described in Eichhorn's *Repertorium*, xvii, 183 sq.

12. *Cod. Fuldensis*, of the 6th century, contains the New Test., with the gospels in the form of a harmony; used by Lachmann in his edition of the Latin subjoined to his Greek New Test.; a specimen was published by Ranke (*Marb.* 1860, 4to).

13. *Cod. Forojuliensis*; contains the four gospels; edited along with fragments of Mark's gospel from the Prague MS. (previously edited by Dobrowski, *Fragmentum Pragense Er. S. Marci*, etc. [Prag. 1778, 4to]), and other remains of the same gospel from MSS. preserved at Venice, by Bianchini, *Append. ad Evangel. Quadrupl.*

14. *Cod. Sangallensis*; a Græco-Latin MS. of the 9th century; contains the four

Specimens of MSS. of the Vulgate: 1. Brit. Mus. (*Addit.* 5403), Uncial; 2. Stonyhurst (St. Cuthbert's), Semi-uncial; 3. Harleian (Brit. Mus. 1602), Cursive; 4. Hereford Gospels, Cursive.

gospels in Greek, with an interlineary translation; edited in fac-simile by Rettig (Turin, 1836, 4to). There is another *Cod. Sangallensis* containing fragments of the gospels, of the 6th century, described by Tischendorf in the *Deutsche Zeitschrift für christl. Wissenschaft*, 1857, No. 7, and esteemed by him of great value for the text of the Vulgate (Tischendorf, *Proleg.* p. 249 sq.). See GALL (St.) MANUSCRIPT.

Besides these, many codices exist both in British and Continental libraries. See MANUSCRIPTS, BIBLICAL.

VII. *Critical Value of the Latin Versions.*—1. *In the Old Test.*—The Latin Version, in its various forms, contributes, as has already been seen, more or less important materials for the criticism of the original texts of the Old and New Tests., and of the Common and Hexaplaric texts of the Sept. The bearing of the Vulg. on the Sept. will not be noticed here, as the points involved in the inquiry more properly belong to the history of the Sept. Little, again, need be said on the value of the translation of Jerome for the textual criticism of the Old Test. As a whole, his work is a remarkable monument of the substantial identity of the Hebrew text of the 4th century with the present Masoretic text; and the want of trustworthy materials for the exact determination of the Latin text itself has made all detailed investigation of his readings impossible or unsatisfactory. The passages which were quoted in the premature controversies of the 16th and 17th centuries, to prove the corruption of the Hebrew or Latin text, are commonly of little importance so far as the text is concerned. It will be enough to notice those only which are quoted by Whitaker, the worthy antagonist of Bellarmine (*Disputation on Scripture* [ed. Park. Soc.], p. 163 sq.).

Gen. i, 30, *om.* all green herbs (in Vet. L.): *ill, 15, ipse conteret caput tuum.* There seems good reason to believe that the original reading was *ipse*. Comp. Vercellone, *ad loc.* See also Gen. iv, 16.

*ill, 17, in opere tuo.* בעבורך בכבודך.  
ix, 16, *om.* *Nod*, which is specially noticed in Jerome's *Quæst. Hebr.*

vi, 6, *add.* *et præcavens in futurum.* The words are a gloss, and not a part of the Vulgate text.

viii, 4, *vicesimo septimo for septimo decimo.* So Sept. viii, 7, *egrediebatur et non revertebatur.* The *non* is wanting in the best manuscripts of the Vulgate, and has been introduced from the Sept.

xi, 13, *trecentis tribus for quadringentis tribus.* So Sept.

ix, 1, *fundetur sanguis illius.* *Om.* "by man."  
xxxvii, 2, *sedecim for septemdecim.* Probably a transcriptional error.

xxxix, 6, *om.* "Wherefore he left—Joseph."

xl, 5, *om.* "the butler—prison."

xlix, 10. Comp. Vercellone, *ad loc.*

xlx, 33, *om.*

In xxiv, 6: xxvii, 5: xxxiv, 29, the variation is probably in the rendering only. The remaining passages, ii, 8; iii, 6; iv, 6, 13, 26; vi, 3; xiv, 3; xvii, 16: xix, 18: xxi, 9: xxiv, 22: xxv, 34: xxvii, 33: xxxi, 32: xxxviii, 5, 23: xlix, 22, contain differences of interpretation; and in xxxvi, 24, xli, 45, the Vulgate appears to have preserved important traditional renderings.

2. *In the New Test.*—The examples which have been given show the comparatively narrow limits within which the Vulgate can be used for the criticism of the Hebrew text. The version was made at a time when the present revision was already established; and the freedom which Jerome allowed himself in rendering the sense of the original often leaves it doubtful whether in reality a various reading is represented by the peculiar form which he gives to a particular passage. In the New Test. the case is far different. In this the critical evidence of the Latin is separable into two distinct elements, the evidence of the Old Latin and that of the Hieronymian revision. The latter, where it differs from the former, represents the received Greek text of the 4th century, and so far claims a respect (speaking roughly) equal to that due to a first-class Greek MS.; and it may be fairly concluded that any reading opposed to the combined testimony of the oldest Greek MSS. and the true Vulgate text either arose later than the 4th

century, or was previously confined within a very narrow range. The corrections of Jerome do not carry us back beyond the age of existing Greek MSS., but, at the same time, they supplement the original testimony of MSS. by an independent witness. The substance of the Vulgate, and the copies of the Old Latin, have a more venerable authority. The origin of the Latin version dates, as has been seen, from the earliest age of the Christian Church. The translation, as a whole, was practically fixed and current more than a century before the transcription of the oldest Greek MS. Thus it is a witness to a text more ancient, and, therefore, *ceteris paribus*, more valuable, than is represented by any other authority, unless the Peshito in its present form be excepted. This primitive text was not, as far as can be ascertained, free from serious corruptions (at least in the synoptic gospels) from the first, and was variously corrupted afterwards. But the corruptions proceeded in a different direction and by a different law from those of Greek MSS., and, consequently, the two authorities mutually correct each other. What is the nature of these corruptions, and what the character and value of Jerome's revision and of the Old Latin, will be seen from some examples to be given in detail.

Before giving these, however, one preliminary remark must be made. In estimating the critical value of Jerome's labors, it is necessary to draw a distinction between his different works. His mode of proceeding was by no means uniform; and the importance of his judgment varies with the object at which he aimed. The three versions of the Psalter represent completely the three different methods which he followed. At first he was contented with a popular revision of the current text (the *Roman* Psalter); then he instituted an accurate comparison between the current text and the original (the *Gallican* Psalter); and in the next place he translated independently, giving a direct version of the original (the *Hebrew* Psalter). These three methods follow one another in chronological order, and answer to the wider views which Jerome gradually gained of the functions of a Biblical scholar. The revision of the New Test. belongs, unfortunately, to the first period. When it was made, Jerome was as yet unused to the task, and he was anxious not to arouse popular prejudice. His aim was little more than to remove obvious interpolations and blunders; and in doing this he likewise introduced some changes of expression which softened the roughness of the old version, and some which seemed to be required for the true expression of the sense (e. g. Matt. vi, 11, *supersubstantialem for quotidianum*). But while he accomplished much, he failed to carry out even this limited purpose with thorough completeness. A rendering which he commonly altered was still suffered to remain in some places without any obvious reason (e. g. *μυστήριον, δοξάζω, ἀφανίζω*); and the textual emendations which he introduced (apart from the removal of glosses) seem to have been made after only a partial examination of Greek copies, and those probably few in number. The result was such as might have been expected. The greater corruptions of the Old Latin, whether by addition or omission, are generally corrected in the Vulgate. Sometimes, also, Jerome gives the true reading in details which had been lost in the Old Latin: Matt. i, 25, *cognoscebat*; ii, 23, *prophetas*; v, 22, *om. eikē*; ix, 15, *lugere*; John iii, 8; Luke ii, 33, *ὁ πατήρ*; iv, 12. But not rarely he leaves a false reading uncorrected (Matt. ix, 28, *vobis*; x, 42), or adopts a false reading where the true one was also current: xvi, 6; xviii, 29; xix, 4; John i, 3, 16; vi, 64. Even in graver variations he is not exempt from error. The famous pericope, John vii, 53; viii, 11, which had gained only a partial entrance into the Old Latin, is certainly established in the Vulgate. The additions in Matt. xxvii, 35; Luke iv, 19; John v, 4; 1 Pet. iii, 22, were already generally or widely received in the Latin copies, and Jerome left them undisturbed. The same may be said of Mark xvi, 9-20; but the "heavenly tes-

timony" (1 John vi, 7), which is found in the editions of the Vulgate, is, beyond all doubt, a later interpolation, due to an African gloss; and there is reason to believe that the interpolations in Acts viii, 37; ix, 5, were really erased by Jerome, though they maintained their place in the mass of Latin copies.

Jerome's revision of the gospels was far more complete than that of the remaining parts of the New Test. It is, indeed, impossible, except in the gospels, to determine any substantial difference in the Greek texts which are represented by the Old and Hieronymian versions. Elsewhere the differences, as far as they can be satisfactorily established, are differences of expression, and not of text; and there is no sufficient reason to believe that the readings which exist in the best Vulgate MSS., when they are at variance with other Latin authorities, rest upon the deliberate judgment of Jerome. On the contrary, his commentaries show that he used copies differing widely from the recension which passes under his name, and even expressly condemned as faulty in text or rendering many passages which are undoubtedly part of the Vulgate. Thus in his commentary on the Galatians he condemns the additions, iii, 1, *veritati non obedire*; v, 21, *homicidia*; and the translations, i, 16, *non acquievi carni et sanguini* (for *non contuli cum carne et sanguine*); v, 9, *modicum fermentum totam massam corrumpit* (for *modicum fermentum totam conspersionem fermentat*); v, 11, *evacuatum est* (for *cessavit*); vi, 3, *seipsum (seipse) seducit* (for *mentem suam decipit*). In the text of the epistle which he gives there are upwards of fifty readings that differ from the best Vulgate text, of which about ten are improvements (iv, 21; v, 13, 23; vi, 13, 15, 16, etc.), as many more inferior readings (iv, 17, 26, 30, etc.), and the remainder differences of expression: *nulo for nequam, recto pede incedunt for recte ambulant, rursum for iterum*. The same differences are found in his commentaries on the other epistles: *ad Ephes.* i, 6; iii, 14; iv, 19; v, 22, 31; *ad Tit.* iii, 15. From this it will be evident that the Vulgate text of the Acts and the epistles does not represent the critical opinion of Jerome, even in the restricted sense in which this is true of the text of the gospels. But still there are some readings which may with probability be referred to his revision: Acts xiii, 18, *mores eorum sustinuit for nutrit (aluit) eos*; Rom. xii, 11, *Domino for tempori*; Eph. iv, 19, *illuminabit te Christus for continges Christus*; Gal. ii, 5, *neque ad horam cessimus for ad horam cessimus*; 1 Tim. v, 19, add. *nisi sub duobus aut tribus testibus*.

3. *The Vetus Latina*.—The chief corruptions of the Old Latin consist in the introduction of glosses. These, like the corresponding additions in the *Codex Bezae* (D<sub>1</sub>), are sometimes indications of the venerable antiquity of the source from which it was derived, and seem to carry us back to the time when the evangelic tradition had not yet been wholly superseded by the written gospels. Such are the interpolations at Matt. iii, 15; xx, 28; Luke iii, 22 (comp. also i, 46; xii, 38); but more frequently they are derived from parallel passages, either by direct transference of the words of another evangelist or by the reproduction of the substance of them. These interpolations are frequent in the synoptic gospels: Matt. iii, 8; Mark xvi, 4; Luke i, 29; vi, 10; ix, 43, 50, 54; xi, 2; and occur also in John vi, 56, etc. But in John the Old Latin more commonly errs by defect than by excess. Thus it omits clauses certainly or probably genuine: iii, 31; iv, 9; v, 36; vi, 23; viii, 58, etc. Sometimes, again, the renderings of the Greek text are free: Luke i, 29; ii, 15; vi, 21. Such variations, however, are rarely likely to mislead. Otherwise the Old Latin text of the gospels is of the highest value. There are cases where some Latin MSS. combine with one or two other of the most ancient witnesses to support a reading which has been obliterated in the mass of authorities: Luke vi, 1; Mark v, 3; xvi, 9 sq.; and not unfrequently it preserves the true text which is lost in the Vulgate: Luke xiii, 19; xiv, 5; xv, 28.

But the places where the Old Latin and the Vulgate have separately preserved the true reading are rare, when compared with those in which they combine with other ancient witnesses against the great mass of authorities. Every chapter of the gospels will furnish instances of this agreement, which is often the more striking because it exists only in the original text of the Vulgate, while the later copies have been corrupted in the same way as the later Greek MSS.: Mark ii, 16; iii, 25 (?); viii, 13, etc.; Rom. vi, 8; xvi, 24, etc. In the first few chapters of Matthew, the following may be noticed: i, 18 (*bis*); ii, 18; iii, 10; v, 4, 5, 11, 30, 44, 47; vi, 5, 13; vii, 10, 14, 29; viii, 32 (x, 8), etc. It is useless to multiply examples which occur equally in every part of the New Test.; Luke ii, 14, 40; iv, 2, etc.; John i, 52; iv, 42, 51; v, 16; viii, 59; xiv, 17, etc.; Acts ii, 30, 31, 37, etc.; 1 Cor. i, 1, 15, 22, 27, etc. On the other hand, there are passages in which the Latin authorities combine in giving a false reading: Matt. vi, 15; vii, 10; viii, 28 (?), etc.; Luke iv, 17; xiii, 23, 27, 31, etc.; Acts ii, 20, etc., 1 Tim. iii, 16, etc. But these are comparatively few, and commonly marked by the absence of all Eastern corroborative evidence. It may be impossible to lay down definite laws for the separation of readings which are due to free rendering, or carelessness, or glosses; but in practice there is little difficulty in distinguishing the variations which are due to the idiosyncrasy (so to speak) of the version from those which contain real traces of the original text. When every allowance has been made for the rudeness of the original Latin and the haste of Jerome's revision, it can scarcely be denied that the Vulgate is not only the most venerable, but also the most precious, monument of Latin Christianity. For ten centuries it preserved in Western Europe a text of Holy Scripture far purer than that which was current in the Byzantine Church, and at the revival of Greek learning guided the way towards a revision of the late Greek text, in which the best Biblical critics have followed the steps of Bentley, with ever-deepening conviction of the supreme importance of the coincidence of the earliest Greek and Latin authorities.

4. Of the *interpretative* value of the Vulgate little need be said. There can be no doubt that in dealing with the New Test., at least, we are now in possession of means infinitely more varied and better suited to the right elucidation of the text than could have been enjoyed by the original African translators. It is a false humility to rate as nothing the inheritance of ages. If the investigation of the laws of language, the clear perception of principles of grammar, the accurate investigation of words, the minute comparison of ancient texts, the wide study of antiquity, the long lessons of experience, have contributed nothing towards a fuller understanding of Holy Scripture, all trust in Divine Providence is gone. If we are not in this respect far in advance of the simple peasant or half-trained scholar of North Africa, or even of the laborious student of Bethlehem, we have proved false to their example, and dishonor them by our indolence. It would be a thankless task to quote instances where the Latin version renders the Greek incorrectly. Such faults arise most commonly from a servile adherence to the exact words of the original, and thus that which is an error in rendering proves a fresh evidence of the scrupulous care with which the translator generally followed the text before him. But while the interpreter of the New Test. will be fully justified in setting aside without scruple the authority of early versions, there are sometimes ambiguous passages in which a version may preserve the traditional sense (John i, 3, 9; viii, 25, etc.) or indicate an early difference of translation, and then its evidence may be of the highest value. But even here the judgment must be free. Versions supply authority for the text and opinion only for the rendering.

VIII. *Linguistic Character and Influence of the Latin Versions*.—1. The characteristics of Christian Latinity

have been most unaccountably neglected by lexicographers and grammarians. It is, indeed, only lately that the full importance of provincial dialects in the history of languages has been fully recognised, and it may be hoped that the writings of Tertullian, Arnobius, and the African fathers generally will now at length receive the attention which they justly claim. But it is necessary to go back one step further, and to seek in the remains of the Old Latin Bible the earliest and the purest traces of the popular idioms of African Latin. It is easy to trace in the patristic writings the powerful influence of this venerable version; and, on the other hand, the version itself exhibits numerous peculiarities which were evidently borrowed from the current dialect. Generally it is necessary to distinguish two distinct elements both in the Latin version and in subsequent writings—(1) provincialisms and (2) Græcisms. The former are chiefly of interest as illustrating the history of the Latin language; the latter as marking, in some degree, its power of expansion. Only a few remarks on each of these heads, which may help to guide inquiry, can be offered here; but the careful reading of some chapters of the Old version (e. g. *Psa.*, *Ecclus.*, *Wisd.*, in the modern Vulgate) will supply numerous illustrations.

(1) *Provincialisms*.—One of the most interesting facts in regard to the language of the Latin version is the reappearance in it of early forms which are found in Plautus or noted as archaisms by grammarians. These establish in a signal manner the vitality of the popular as distinguished from the literary idiom, and, from the great scarcity of memorials of the Italian dialects, possess a peculiar value. Examples of words, forms, and constructions will show the extent to which this phenomenon prevails.

(a.) *Words*.—*Stultiloquium*, *multiloquium*, *vaniloquus* (Plautus); *stabilimentum* (id.); *datus* (subst. id.); *conignus* (id.); *aratiuncula* (id.); *versipellis* (id.); *naturitas* (id.); *stacte* (id.); *cordatus* (Ennius); *custoditio* (Festus); *idecupula*, *dejero* (Plautus); *exentero* (id.); *acius* (Pac.); *minio* (to drive, Festus).

(b.) *Forms*.—Deponents as passive: *consolor*, *hortor*, *promoveor* (Heb. xlii, 16); *misistur*. Irregular inflections: *partibor abaconus*; conversely: *ezies*, etc.; *tapytia* (Plautus); *hæc* (fem. plur.). Unusual forms: *pacua* (fem.); *murmur* (masc.); *sal* (neut.); *retia* (sing.); *certor*, *odio*, *cornum*, *placor* (subst.), *dulcor*.

(c.) *Constructions*.—*Enigro* with acc. (*Psa.* lxi, 7, "emigrabit te de tabernaculo"); *dominor* with gen.; *noco* with acc.; *sui*, *suis* for *ejus*, etc.; *non* for *ne* prohibitive; *capit* impers.

In addition to these, there are many other peculiarities which evidently belong to the African (or common) dialect, and not merely to the Christian form of it.

Such are the words *minorare*, *minoratio*, *improperium*, *framea* (a sword), *ablactatio*, *annualia*, *alleviare*, *pectusculum*, *antemurale*, *panifica*, *paratura*, *tortura*, *tribulare*, (met.), *tribulatio*, *valefacere*, *veredarium*, *viare*, *victualia*, *virectum* (viretum), *vitelamen*, *volatilia* (subst.), *quaternio*, *reclinatorium*, *scrutinium*, *spomare*, *stratoria* (subst.), *sufferentia*, *insufficientia*, *superabundantia*, *mutinentia*, *cartalbus*, *cassidie*, *collectaneum*, *condulcare*, *gentmen*, *grossitudo*, *refectio* (κατάλυσις), *extermintum*, *defunctio* (decease), *substantia* (abs.), *incolatus*.

New verbs are formed from adjectives: *peccinare*, *proximare*, *approximare*, *aviduare*, *piaritari*, *salvare* (salvator, *salvatio*), *obviare*, *jucundare*, and especially a large class in -*ficio*: *mortifico*, *vivifico*, *nancifico*, *glorifico*, *clarifico*, *beatifico*, *castifico*, *gratifico*, *fructifico*.

Other verbs worthy of notice are: *appropriare*, *appretiare*, *tenebreare*, *indulcare*, *implanare* (plānus), *manicare*. In this class may be reckoned also many—

(1.) New substantives derived from adjectives: *possibilia*, *præclariora*, *paterntas*, *præscientia*, *religiositas*, *nativitas*, *supervacuitas*, *mamalia*.

New verbs formed in like manner: *requietio*, *respectio*, *creatura*, *substitutio*, *extollentia*.

(2.) New verbals: *accensibilia*, *acceptabilia*, *docibilia*, *prodicibilia*, *passibilia*, *receptibilia*, *reprehensibilia*, *suadibilia*, *subiectibilia*, *arrepitibus*; and participial forms: *pudoratus*, *angustatus*, *timoratus*, *sensatus*, *disciplinatus*, *mag-natus*, *linguatus*.

(3.) New adjectives: *animæqueus*, *temporaneus*, *unigenitus*, *querulonus*; and adverbs: *terribiliter*, *unanimitèr*, *spiritualiter*, *cognoscibiliter*, *fiducialiter*.

The series of negative compounds is peculiarly worthy of notice: *immemoratio*, *increditi*, *inconsummatio*; *inhonore*; *incausiliatus*, *indeficiens*, *inconfusibilia*, *importabilia*.

Among the characteristics of the late stage of a language must be reckoned the excessive frequency of compounds, especially those formed with the prepositions. These are peculiarly abundant in the Latin version; but in many cases it is difficult to determine whether they are not direct translations of the late Sept. forms, and not independent forms: e. g. *addectinare*, *advenire* -ntio, *adincrecere*, *perefluere*, *perminuere*, *propurgare*, *superzeallare*, *superinvalecere*, *supererogare*, *reincitare*, *remonerare*, *propitiari*, *subinferre*. Of these many are the direct representatives of Greek words: *superadulta* (1 Cor. vii, 36), *superseminare* (Matt. xlii, 26), *comparticipes*, *concaptivus*, *complantatus*, etc. (supersubstantialis, vi, 11); and others are formed to express distinct ideas: *subcinericius*, *subnervare*, etc.

(2.) *Græcisms*.—The "simplicity" of the Old version necessarily led to the introduction of very numerous Septuagintal or New-Test. forms, many of which have now passed into common use. In this respect it would be easy to point out the difference which exists between Jerome's own work and the original translation, or his revision of it.

Examples of Greek words are: *zelare*, *perizoma*, *python*, *pythionisa*, *proselytus*, *prophetæ* -tisa -tizare -tare, *poderis*, *pompaticæ*, *thesaurizare*, *anathematizare*, *agonizare*, *agonia*, *aromatizare*, *angelus* -icus, *peribolus*, *pisticus*, *probatica*, *pappirio*, *pastophoria*, *telonium*, *eucharis*, *acharis*, *romphæa*, *bravium*, *dithalassus*, *doma* (thronus), *thymiatorium*, *tristeja*, *scandalum*, *aitarcia*, *blasphemare*, etc., besides the purely technical terms *patriarcha*, *Paraceve*, *Pascha*, *Paracletus*. Other words based on the Greek are: *aportior*, *angario*, *apostolare*, *apostolatus*, *accedior* (ἀκκείω).

Some close renderings are interesting: *amodo* (ἀπό τούτου), *propitiatorum* (ἱλαστηρίων), *indignum* (ἐν τῷ αὐτοῦ), *rationale* (λογεῖον, Exod. xxviii, 15, etc.), *seminifactorius* (Acts xviii, 3), *seminivertibus* (xvii, 18), *subintroduxit* (Gal. ii, 4), *supercelestis* (Jude 8), *civilitas* (Acts xxii, 28), *intentalor* *malorum* (James i, 15). To this head must also be referred such constructions as *zelare* with *accesu* (ζηλοῦν τινα); *facere* with *inf.* (ποιεῖν . . . γένεσθαι); *potestas* with *inf.* (ἐξουσία ἀρρίναι); the use of the *inf.* to express an end (Acts vii, 45, ἐποίησας προσκυνεῖν) or a result (Luke i, 28, ἐπεὶ εὐδελείη, *respetit asperre*); the introduction of *quæ* for *quæ* in the sense of *that* (ver. 58, *audierunt* . . . quia), or for *quæ* *recitativum* (Matt. vii, 23, *Confitebor illis quia*); the dat. with *anegui* (Luke i, 3, παρακολουθεῖς Vet. L.); the use of the *gen.* with the comparative (John i, 50, *maiora horum*); and such Hebraisms as *vir mortis* (1 Kings ii, 26).

Generally it may be observed that the Vulg. Latin bears traces of a threefold influence derived from the original text; and the modifications of form which are capable of being carried back to this source occur yet more largely in modern languages, whether in this case they are to be referred to the plastic power of the Vulg. on the popular dialect, or, as is more likely, we must suppose that the Vulg. has preserved a distinct record of powers which were widely working in the times of the Empire on the common Latin. These are (1) an extension of the use of prepositions for simple cases; e. g. in the renderings of *ἐν* (Col. iii, 17), *facere* in *verbo*, etc.; (2) an assimilation of pronouns to the meaning of the Greek article; e. g. i John i, 2, *ipsa vita*; Luke xxiv, 9, *illis* undecim, etc.; and (3) a constant employment of the definitive and epithetic genitive, where classical usage would have required an adjective; e. g. Col. i, 13, *filius caritatis sue*; iii, 12, *viscera misericordie*.

The peculiarities which have been enumerated are found in greater or less frequency throughout the Vulg. It is natural that they should be most abundant and striking in the parts which have been preserved least changed from the Old Latin—the Apocrypha, the Acts, Epistles, and Apocalypse. Jerome, who, as he often says, had spent many years in the schools of grammarians and rhetoricians, could not fail to soften down many of the asperities of the earlier version, either by adopting variations already in partial use, or by correcting faulty expressions himself as he revised the text. An examination of a few chapters in the Old and New versions of the gospels will show the character and extent of the changes which he ventured to introduce:

Luke i, 60, οὐκί, non, Vet. L., nequaquam, Vulg.: ver. 65, ἐν ὅλῃ τῇ ὀρεινῇ, in omni montana, Vet. L., super omnia montana, Vulg.: ii, 1, *profiteretur*, *professio*, Vet. L., *describeretur*, *descriptio*, Vulg.: i, ver. 13, *exercitus celestis*, Vet. L., *militie celestis*, Vulg.: ver. 34, *quod contradicetur*, Vet. L.,

*cui contr.* Vulg.; ver. 49, in *propria Patria mei*, Vet. L., in *his quæ patria mei sunt*. Vulg. Some words he seems to have changed constantly, though not universally: e. g. *obauditio*, *obaudio* (obedientia, obedio); *mensurare* (metiri); *dilectio* (caritas); *sacramentum* (mysterium), etc. Many of the most remarkable forms are confined to books which he did not revise: *elucidare*, *inaltare* (jucundari); *fumigabundus*, *illamentatus*, *indisciplinatus*, *insusceptibilis*; *exsacramentum* (extermium), *gaudinium*, *extolentia*, *honorificentia*; *horripilatio*, *inhonoratio*.

2. Generally it may be said that the scriptural idioms of our common language have come to us mainly through the Latin; and in a wider view the Vulg. is the connecting-link between classical and modern languages. It contains elements which belong to the earliest stage of Latin, and exhibits (if often in a rude form) the flexibility of the popular dialect. On the other hand, it has furnished the source and the model for a large portion of current Latin derivatives. Even a cursory examination of the characteristic words which have been given will show how many of them, and how many corresponding forms, have passed into living languages. To follow out this question in detail would be out of place here; but it would furnish a chapter in the history of language, fruitful in results and hitherto unwritten. Within a more limited range the authority of the Latin versions is undeniable, though its extent is rarely realized. The vast power which they have had in determining the theological terms of Western Christendom can hardly be overrated. By far the greater part of the current doctrinal terminology is based on the Vulg., and, as far as can be ascertained, was originated in the Latin version. *Predestination*, *justification*, *supererogation* (*supererogo*), *sanctification*, *salvation*, *mediator*, *regeneration*, *revelation*, *visitation* (met.), *propitiation*, first appear in the Old Vulg. *Grace*, *redemption*, *election*, *reconciliation*, *satisfaction*, *inspiration*, *scripture*, were devoted there to a new and holy use. *Sacrament* (*μυστήριον*) and *communion* are from the same source; and though *baptism* is Greek, it comes to us from the Latin. It would be easy to extend the list by the addition of *orders*, *penance*, *congregation*, *priest*. But it can be seen from the forms already brought forward that the Latin versions have left their mark both upon our language and upon our thoughts; and if the right method of controversy is based upon a clear historical perception of the force of words, it is evident that the study of the Vulg., however much neglected, can never be neglected with impunity. It was the version which alone they knew who handed down to the Reformers the rich stores of mediæval wisdom; the version with which the greatest of the Reformers were most familiar, and from which they had drawn their earliest knowledge of divine truth.

In more important respects, likewise, the influence which the Latin versions of the Bible have exercised upon Western Christianity is scarcely less than that of the Sept. upon the Greek churches. But both the Greek and the Latin Vulgates have long been neglected. The revival of letters, bringing with it the study of the original texts of Holy Scripture, checked for a time the study of these two great bulwarks of the Greek and Latin churches—for the Sept., in fact, belongs rather to the history of Christianity than to the history of Judaism—and, in spite of recent labors, their importance is even now hardly recognised. In the case of the Vulgate, ecclesiastical controversies have still further impeded all efforts of liberal criticism. The Romanist (till lately) regarded the Clementine text as fixed beyond appeal; the Protestant shrank from examining a subject which seemed to belong peculiarly to the Romanist. Yet, apart from all polemical questions, the Vulgate should have a very deep interest for all the Western churches. For many centuries it was the only Bible generally used; and, directly or indirectly, it is the real parent of all the vernacular versions of Western Europe. The Gothic version of Ulphilas alone is independent of it, for the Slavonic and modern Russian versions are necessarily not taken

into account. With England it has a peculiarly close connection. The earliest translations made from it were the (lost) books of Bede, and the glosses on the Psalms and gospels of the 8th and 9th centuries (ed. Thorpe, Lond. 1835, 1842). In the 10th century Ælfric translated considerable portions of the Old Test. (*Heptateuchus*, etc., ed. Thwaites, Oxford, 1698). But the most important monument of its influence is the great English version of Wycliffe (1324–84, ed. Forshall and Madden, Oxford, 1850), which is a literal rendering of the current Vulgate text. In the age of the Reformation the Vulgate was rather the guide than the source of the popular versions. The Romanist translations into German (Michaelis, ed. Marsh, ii, 107), French, Italian, and Spanish were naturally derived from the Vulgate (Simon, *Hist. Crit. N. T.* c. 28, 29, 40, 41). Of others, that of Luther (New Test. in 1523) was the most important, and in this the Vulgate had great weight, though it was made with such use of the originals as was possible. From Luther the influence of the Latin passed to our own A. V. Tyndale had spent some time abroad, and was acquainted with Luther before he published his version of the New Test. in 1526. Tyndale's version of the Old Test., which was unfinished at the time of his martyrdom (1536), was completed by Coverdale, and in this the influence of the Latin and German translations was predominant. A proof of this remains in the Psalter of the Prayer-book, which was taken from the "Great English Bible" (1539, 1540), and this was merely a new edition of that called Matthew's, which was itself taken from Tyndale and Coverdale. This version of the Psalms follows the Gallican Psalter, a revision of the Old Latin made by Jerome and afterwards introduced into his new translation, and differs in many respects from the Hebrew text (e. g. *Psa.* xiv). It would be out of place to follow this question into detail here. It is enough to remember that the first translators of our Bible had been familiarized with the Vulgate from their youth, and could not have cast off the influence of early association. But the claims of the Vulgate to the attention of scholars rest on wider grounds. It is not only the source of our current theological terminology, but it is, in one shape or other, the most important early witness to the text and interpretation of the whole Bible. The materials available for the accurate study of it are unfortunately at present as scanty as those yet unexamined are rich and varied.

IX. *Modern Versions of the Vulgate.*—The versions used in the Church of Rome have all been made from the Vulgate, of which the first German translation was printed in 1466, the Spanish in 1478, and the Italian in 1471. Our limits will allow us only to refer to that in use in English, of which the Old Test. was printed at Douai in 1609, and the New at Rheims in 1582. This is greatly inferior in strength and elegance of expression to the A. V. of 1611, but is highly commendable for its scrupulous accuracy and fidelity, which cannot be predicated of all translations from the Vulgate into other languages. It was altered and modernized by bishop Challoner in 1749, when the text was conformed to that of the Clementine edition. It has since undergone various alterations under the care of the Irish Roman Catholic hierarchy, and has been in some respects conformed to the A. V., even in passages which controversialists of a bygone age had stigmatized as heretical. But this has been done without any departure from the text. The original translators, however, adhered so severely to this as to employ such barbarous words and phrases as *sindom* (*Mark* xv, 46), *zealators* (*Acts* xx, 20), *præfinition* (*Eph.* iii, 11), *contristate* (*iv*, 30), *agnition* (*Phil.* 16), *repropiate* (*Heb.* ii, 17), with such hosts God is *promerited* (*xiii*, 16), etc. "Yet, in justice, it must be observed that no case of wilful perversion of Scripture has ever been brought home to the Rhemish translators" (Scrivener, *Supplement to the Authorized Version*). Mr. Scrivener adds that "the Rhe-

nish divines [who were evidently men of learning and ability] may occasionally do us good service by furnishing some happy phrase or form of expression which had eluded the diligence of their more reputable predecessors" (*ibid.*).

The translators observe in their preface that they religiously keep the phrases word for word, "for fear of missing or restraining the sense of the Holy Ghost to the fantasie;" in proof of which they refer to such phrases as *αἱ ἐμοὶ καὶ σοί, γύναι* (John ii, 4) which they render "What to me and thee, woman?" explaining it in the note by the phrase "What hast thou to do with me?" But in some of the modern editions of the Rhemish version this rule has been departed from and the text altered into "What is *that* to me or thee?" (Dublin ed. 1791, 1824), or "What is *it* to me and thee?" (*ibid.* 1820); a reading inconsistent with the translation of the same words in Luke viii, 28. The interpolation has been removed in Dr. Murray's edition of 1825. In the *New Version of the Four Gospels*, by a Catholic (Dr. Lingard), the words are rendered, "What hast thou to do with me?" The whole passage is thus rendered and commented on by Tittmann (*Meletemata Sacra*): "*Misum me fuc, o mea*, 'Leave that to my care, good mother.' It is not the language of reproof or refusal, but rather of consolation and promise. This appears from the words which follow, 'mine hour is not yet come.' For in these words he promises his mother that at the proper time he will gratify her wish. . . . But our Lord purposely delayed his assistance, that the greatness of the miracle might be the better known to all. The appellation *γύναι*, which was employed by our Lord on other occasions also (John xix, 26; xx, 15), was very honorable among the Greeks, who were accustomed to call their queens by this title, and may be rendered 'my beloved.'"

Prof. Moses Stuart (*Commentary on the Apocalypse*, i, 119) conceives that "in the translation of *μετανοεῖτε* by *agite penitentiam* (Matt. iii, 2), the same spirit was operating which led one part of the Church in modern times to translate *μετανοεῖτε* by *do penance*." But the Latin phrase "*agere penitentiam*," which is also found in the old Italic, is evidently synonymous with *μετανοεῖν*, "to repent." "*Agite penitentiam*," says Campbell, "was not originally a mistranslation of the Greek *μετανοεῖτε*." Dr. Lingard (*ut sup.*) renders it "repent."

We refer to one passage more, often objected to as proving that the Vulgate was altered to serve a purpose. In Heb. xi, 21, the Vulgate reads, as the translation of *προσεκύνησεν ἐπὶ τὸ ἄκρον ῥαβδου αὐτοῦ*: *adoravit fastigium virgæ ejus*, "worshipped the top of his [Joseph's] rod." If the present pointing of the Hebrew *נִשְׁכָּן* (Gen. xlvii, 31) be correct, the Seventy, who read it *נִשְׁכָּן*, "a staff" or "sceptre," must have been in error, wherein they were followed by the Syriac. Tholuck (*Commentary on Heb.*) is of opinion that the Latin translators did not (as some suppose) overlook *ἐπὶ*, "upon," and he considers that this preposition with the accusative might easily lead to the acceptance in which it is taken by the Vulgate, which is also that adopted by Chrysostom and Theodoret, who explain the passage as if Jacob had foreseen Joseph's sovereignty, and gave a proof of his belief in it by the act of adoration in the direction of his sceptre. This is, in Tholuck's opinion, further confirmed by the generally spread reading *αὐτοῦ* (his), not *αὐτοῦ* (his own); and he doubts if the inspired writer of the epistle did not himself so understand the passage in the Sept. as being the more significant. But should it be admitted, with Tholuck, that "the Protestant controversialists have very unjustly designated this passage of the Vulgate as one of the most palpable of its errors," it must be borne in mind that Onkelos, Jonathan, Symmachus, and Aquila follow the present reading; to which Jerome also gives a decided preference, observing (on Gen.

xlvii, 31), "In this passage some vainly assert that Jacob adored the top of Joseph's sceptre; . . . for in the Hebrew the reading is quite different. Israel adored at the head of the bed (*adoravit Israel ad caput lectuli*)." See ENGLISH VERSIONS.

X. *Literature*.—The chief original works bearing on the Vulgate generally are, Simon, *Histoire Critique du V. T.* 1678-85; id. *N. T.* 1689-98; Hody, *De Bibliorum Textibus Originalibus* (Oxon. 1705); Martianay, *Hieron. Opp.* (Paris, 1693), with the prefaces and additions of Vallarsi (Verona, 1734) and Maffei (Venice, 1767); Bianchini (*Blanchinus*, not *Blanchini*), *Vindicia Canon. SS. Vulg. Lat. Edit.* (Rome, 1740); Bukentop, *Lux de Luce* (Bruxellis, 1710); Sabatier, *Bibl. SS. Lat. Vers. Ant.* (Remis, 1743); Van Ess, *Pragmatisch-kritische Gesch. d. Vulg.* (Tüb. 1824); Vercellone, *Varie Lectiones Vulg. Lat. Bibliorum* (tom. i, Romæ, 1860; tom. ii, pars prior, 1862). In addition to these, there are the controversial works of Mariana, Bellarmine, Whitaker, Fulke, etc., and numerous essays by Calmet, D. Schulz, Fleck, Riegler, etc.; and in the New Test. the labors of Bentley, Sanftl, Griesbach, Schulz, Lachmann, Tregelles, and Tischendorf have collected a great amount of critical materials. But it is not too much to say that the noble work of Vercellone has made an epoch in the study of the Vulgate, and the chief results which follow from the first instalment of his collations are here for the first time incorporated in its history. See also Riegler, *Gesch. der Vulgata* (Sulzb. 1820); Brunati, *De Vulgata* (Vien. 1825); Kaulen, *Gesch. der Vulgata* (Mentz, 1869); Rönisch, *Itala und Vulgata* (Marb. 1869). See LATIN VERSIONS.

**Vulgivāga**, in Roman mythology, is a surname of *Venus*, as the lowly, in contrast with *Urania*, the heavenly. She favored the longings and desires of men which were wrongfully designated by the name of love.

**Vulture** is the rendering, in the A. V., of two Heb. words: 1. *דַּאֵחַ*, *da'ah* (only in Lev. xi, 14; Sept. *γύψ*; Vulg. *milvus*); the parallel passage, Deut. xiv, 13, has in the corresponding position *רָאֵחַ*, *ra'ah*, which may be an erroneous transcription; Sept. *γύψ*; Vulg. *izion*; A. V. "glede"), or *דַּיָּאֵחַ*, *day'ah* (only Deut. xiv, 13, *יָעוּז*; Vulg. *milvus*; Isa. xxxiv, 34, *ἄλφος*; *milvus*); and 2. *אֵיָא*, *ay'ah* (only in Job xxviii, 7, *γύψ*; *vultur*; Lev. xi, 14, *יָעוּז*; *vultur*; A. V. "kite"; Deut. xiv, 13, Sept. omits; Vulg. *milvus*; A. V. "kite").

I. There seems to be no doubt that the A. V. translation is incorrect, and that the original words refer to some of the smaller species of raptorial birds, as kites or buzzards. *דַּיָּאֵחַ* (*day'ah*) is evidently synonymous with Arab. *h'dayah*, the vernacular for the "kite" in North Africa, and without the epithet "red" for the black kite especially. Bochart (*Hieroz.* ii, 195) explains it *Vultur niger*. The Samaritan and all other Eastern versions agree in rendering it "kite." *אֵיָא* (*ay'ah*) is yet more certainly referable to this bird, which, in other passages, it is taken to represent. Bochart (*ibid.* ii, 193) says it is the same bird which the Arabs call *yaya* from its cry; but does not state what species this is, supposing it, apparently, to be the magpie, the Arab name for which, however, is *el-agaag*.

There are two very different species of bird comprised under the English term vulture: the griffon (*Gyps fulvus*, Sav.), Arab. *nesr*; Heb. *נֶשֶׁר*, *nesher*; invariably rendered "eagle" in the A. V.; and the *percnopter*, or Egyptian vulture (*Neophron percnopterus*, Sav.), Arab. *rakhma*; Heb. *רָחַם*, *racham*; rendered "gier-eagle" in the A. V. The identity of the Hebrew and Arabic terms in these cases can scarcely be questioned. However degrading the substitution of the ignoble vulture for the royal eagle may at first sight appear in many passages, it must be borne in mind that the griffon is in all its movements and characteristics a majestic and royal bird,

Egyptian Vulture (*Neophron percnopterus*).

the largest and most powerful which is seen on the wing in Palestine, and far surpassing the eagle in size and power. Its only rival in these respects is the bearded vulture, or *Lammergeyer*, a more uncommon bird everywhere, and which, since it is not, like the griffon, bald on the head and neck, cannot be referred to as *nésher* (see Mic. i, 16). Very different is the slovenly and cowardly Egyptian vulture (*Neophron percnopterus*), the familiar scavenger of all Oriental towns and villages, protected for its useful habits, but loathed and despised, till its name has become a term of reproach, like that of the dog or the swine. The species of vulture, properly so called, have the head naked or downy, the crop external, and very long wings; they all have an offensive smell, and we know of none that even the scavenger-ants will eat. When dead they lie on the ground untouched till the sun has dried them into mummies. Late Western commentators, anxious to distinguish eagles from vultures, have assumed that the first-mentioned never feed on carcasses; and, judging the whole family of vultures by the group of carrion-eaters alone, have insinuated that the latter do not attack a living prey. In both cases they are in error; with some exceptions, eagles follow armies, though not so abundantly as vultures; and vultures attack living prey provided with small means of defence or of little weight; but their talons having no means of grasping with energy, or of seriously wounding with the claws, they devour their prey on the spot, while the eagle carries it aloft, and thence is more liable to be stung by a serpent not entirely disabled than the vulture, who crushes the head of all reptiles it preys upon. See EAGLE.

If we take the Heb. *nyáh* to refer to the red kite (*Milvus regalis*, Temm.), and *dayáh* to the black kite (*Milvus ater*, Temm.), we shall find the piercing sight of the former referred to by Job (xxviii, 7), and the gregarious habits of the latter by Isaiah (xxxiv, 15). Both species are inhabitants of Palestine, the red kite being found all over the country, as formerly in England, but nowhere in great numbers, generally soaring at a great height over the plains, according to Dr. Roth, and apparently leaving the country in winter. The black kite, which is so numerous everywhere as to be gregarious, may be seen at all times of the year hovering over the villages and the outskirts of towns, on the lookout for offal and garbage, which are its favorite food. Vulture-like, it seldom, unless pressed by hunger, attacks living

animals. It is therefore never molested by the natives, and builds its nest on trees in their neighborhood, fantastically decorating it with as many rags of colored cloth as it can collect. See GLENE.

II. There are three species of so-called vulture known to inhabit Palestine:

1. The Lammergeyer (*Gypætos barbatus*, Cuv.), which is rare everywhere, and only found in desolate mountain regions, where it rears its young in the depth of winter among inaccessible precipices. It is looked upon by the Arabs as an eagle rather than a vulture; for, though properly neither a vulture nor an eagle, it is the largest bird of prey of the old continent, and is armed, like the eagle, with formidable claws. The head is wholly feathered; its courage is equal to its powers; and it has a strength of wing probably superior to all raptorial birds, excepting the condor. It is consequently found, with little or no difference, from Norway to the Cape of Good Hope, and from the Pyrenees to Japan. This is perhaps the black species, which is often figured on Egyptian monuments as the bird of victory, hovering over the head of a national hero in battle, and sometimes with a banner in each talon. See OSSIFRAGE.

2. The Griffon (*Gyps fulvus*, Sav.), mentioned above, remarkable for its power of vision and the great height at which it soars. Aristotle (*Anim. Hist.* vi, 5) notices the manner in which the griffon scents its prey from afar, and congregates in the wake of an army. The same singular instinct was remarked in the Russian war, when vast numbers of this vulture were collected in the Crimea, and remained till the end of the campaign in the neighborhood of the camp, although previously they had been scarcely known in the country. "Wheresoever the carcass is, there will the eagles be gathered together" (Matt. xxiv, 28); "Where the slain are, there is she" (Job xxxix, 30). Travellers have observed this bird universally distributed in all the mountainous and rocky districts of Palestine, and especially abundant in the south-east. Its favorite breeding-places are between Jerusalem and Jericho, and all round the Dead Sea.

Griffon Vulture (*Gyps fulvus*).

3. The third species is the above Egyptian vulture (*Neophron percnopterus*, Sav.), often called Pharaoh's hen, observed in Palestine by Hasselquist and all subsequent travellers, and very numerous everywhere.

Two other species of very large size, the eared and cinereous vultures (*Vultur nubicus*, Smith, and *Vultur cinereus*, L.) although inhabitants of the neighboring countries, and probably also of the south-east of Palestine, have not yet been noted in collections from that country.

Most of the above-named species are occasionally seen in the north of Europe. The voice varies in

different species; but those of Egypt, frequenting the Pyramids, are known to bark in the night like dogs. Excepting the *percnopterine* (or carrion) vultures, all the other species are of large size; some superior in bulk to the swan, and others a little less. The Nubian species has been figured in Kitto's *Palæstine*; the *fulvus* in Harris's *Dict. of the Nat. Hist.*

of the Bible. See also Tristram, *Nat. Hist. of the Bible*, p. 173 sq.; Wood, *Bible Animals*, p. 340 sq. See Krrk.

**Vulturius** (Gr. *Γυπαῖος*), in Greek mythology, is a surname under which a temple was built for *Apollo*, by a shepherd, because the god had saved him, by vultures, from death in a large deep cave.

## W.

**Waajen** (or **Waasen**, or **Waeyen**), **Hans van der** (1), a Dutch theologian, was born at Amsterdam, July 12, 1639. He began his studies at Utrecht, whence he proceeded successively to Heidelberg, Geneva, and Basle, and returned in 1662 to his native country, as doctor of divinity, to preach in Sparendam. In 1665 he was called to Leeuwarden, and in 1672 to Middelburg, but in 1677 he was forced by the intrigues of William Momma to retire from the latter place. The same year he was made professor of Hebrew in Franeker, to which office he added (in 1680) that of university preacher and state historian. He resided with the prince of Orange as councillor until his death, Nov. 4, 1701. He enjoyed the reputation of being one of the first controversialists of Holland, and wrote, *Summa Theologiæ Christianæ:—Enchiridion Theologiæ Christianæ:—De Antiquitate Litterarum Judaicarum:—Biblia Veritatis et Rationes de Verbo Dei, Libræ Ritæ tangeli Obversæ:—De λόγῳ Dissertatio contra Clericum*, etc. See Vriemoet, *Series Professorum Franequeranorum*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; Fürst, *Bibl. Jud.* iii, 490; *Biographie Universelle*, s. v. (B. P.)

**Waajen, Hans van der** (2), son of the preceding, was born Oct. 20, 1677, at Middelburg, and succeeded his father in his literary and clerical positions. He died Dec. 9, 1716, leaving no original works. See *Biographie Universelle*, s. v.

**Waast** (or **Wast**, Lat. *VEDASTUS*), *St.*, a French ecclesiastic, was born, according to some, on the borders of Périgord and Limousin, and, according to others, at Toul. After living a hermit life near the latter place, he was ordained as priest by its bishop and made catechist of Clovis, who had just embraced Christianity (496). That prince took him to Rheims and recommended him to Remi, who nominated him as bishop of Arras (about 499), and afterwards of Cambrai (about 510). He abolished the idolatrous customs of both sees, and built chapels, etc. He died at Arras, Feb. 6, 540. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Wabst**, **CHRISTLIEB GOTTWALD**, a Lutheran theologian of Germany, was born Oct. 14, 1694, at Dresden. He studied at Wittenberg, was appointed deacon at Oederan in 1726, pastor at Döbeln in 1733, superintendent at Rochlitz in 1735, where he died, June 25, 1743, having in 1737 been honored with the doctorate of divinity by the Wittenberg University. He wrote, *Täglicher Denkwortel in geistlichen Betrachtungen:—Disputatio de Divina Essentia nunc Masculinum et Fæmininum Admittat:—De Intellectu Humano contra Jo. Lockium*. See *Neue Zeitungen von gelehrten Suchen*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Wächler**, **LUDWIG**, a Protestant theologian of Germany, was born April 15, 1767, at Gotha. In 1790 he was rector at Herford, in 1794 professor of theology at Rinteln, in 1802 professor of history at Marburg, and died April 4, 1838, at Breslau, as member of consistory and professor of history. He wrote, *Die Pariser Bluthochzeit* (Leips. 1826):—*Müncher's Leben u. nachgelassene Schriften* (Frankfort, 1817):—*Dissertatio Inauguralis de Pseudo-Phoclyde* (Rinteln, 1788). See Fürst, *Bibl. Jud.* iii, 488; Winer, *Handb. der theol. Lit.* i, 10, 161, 537, 821, 865. (B. P.)

**Wachsmuth**, **ERNST WILHELM GOTTLIEB**, a Ger-

man historian, was born Dec. 28, 1784, at Hildesheim. In 1825 he was appointed professor of history at Leipsic, and died Jan. 23, 1866. He wrote, *Hellenische Alterthumskunde* (2d ed. Halle, 1843, 4 vols.):—*Europäische Sittengeschichte* (Leips. 1831–39, 5 vols.):—*Der deutsche Bauernkrieg zur Zeit der Reformation* (ibid. 1834):—*Geschichte Frankreichs im Revolutionszeitalter* (Hamburg, 1840–44, 4 vols.):—*Geschichte des Zeitalters der Revolution* (Leips. 1846–48, 4 vols.):—*Allgemeine Culturgeschichte* (ibid. 1850–52, 3 vols.). See Zuchold, *Bibl. Theol.* ii, 1407. (B. P.)

**Wächter**, **JOHANN**, a Protestant theologian of Germany, was born in 1768. In 1807 he was appointed evangelical member of consistory and superintendent at Vienna; in 1819 he became director of the Protestant Theological Lutheran Seminary; and died April 26, 1827. In connection with K. Cleyermann, he published *Allgem. prakt. Bibliothek für Prediger u. Schulmänner* (Vienna, 1801–3, 2 vols.). His own *Sermons* were published after his death by some friends (ibid. 1828, 2 vols.). See Winer, *Handb. der theol. Literatur*, ii, 37, 143. (B. P.)

**Wächtler**, **JAKOB**, a Lutheran theologian of Germany, was born at Grimma, Sept. 17, 1638. He studied at Wittenberg, where, in 1665, he became adjunct to the philosophical faculty. In 1666 he was made archdeacon at Oschatz, and in 1679 superintendent at Gommern. For the same position he was called in 1687 to Beltzig, was in 1698 created doctor of divinity, and died Nov. 4, 1702. He wrote, *Chiliasice Vanitatis Demonstratio contra J. Spenerum:—De Cathedra Confessionali contra Spenerum:—Harmonia Sacra Paracletica*, etc. See Pipping, *Memorie Theologorum*; Ranft, *Leben der chursächsischen Gottesgelehrten*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Wack**, **CASPER**, a German Reformed minister, was born at Philadelphia in 1752. He began the study of theology under Dr. Weyberg in his eleventh year, and received calls at the age of eighteen; but his licensure and ordination were deferred until the Classis in Holland could be consulted, which occurred soon after. He labored extensively among the Germans who had fled from Rhenish Prussia to Holland in 1705 and in 1707 sailed to Philadelphia, afterwards settling in New Jersey and Pennsylvania. He was pastor at Tobicon, Indian Field, and Great Swamp, Pa., from 1771 to 1773; the same, with the addition of Nacomixen, from 1773 to 1782; German Valley, Fox Hill, and Rockaway, N. J., from 1782 to 1809, including services at Stillwater, Hardwick, and Knowlton; pastor at Germantown and Whitmarsh, Pa., from 1809 to 1821; Whitmarsh, from 1821 to 1823. During the Revolution he was a warm patriot. He died July 19, 1839. See Harbaugh, *Fathers of the German Ref. Church*, ii, 173 sq.

**Wack**, **CHARLES P.**, a (Dutch) Reformed minister, grandson of Casper Wack, graduated at the New Brunswick Theological Seminary in 1829. He was pastor at Caroline, N. Y., in 1831; Bellona from 1831 to 1835; Lebanon, N. J., from 1835 to 1840; Trenton (First Church) from 1841 to 1844; German Reformed Church, at the same place, from 1845 to 1852. He died in 1866. He left a large amount of MS. containing sketches of prominent ministers of the Reformed (Dutch) Church, which was used by Mr. Sprague in the preparation of

his *Annals of the Amer. Pulpit*. See Corwin, *Manual of the Ref. Church in America*, s. v.

**Wack, George**, a minister of the German Reformed Church, was born in Bucks County, Pa., March 1, 1776. After having pursued a course of classical studies, he was taught theology by his father, then pastor in Rockaway, N. J. He was licensed and ordained in 1801. In 1802 he became pastor of churches in Montgomery and Bucks counties. In this charge he spent a long life. In 1846, in the seventieth year of his age, he was compelled by increasing infirmities to quit the active duties of the ministry. He died Feb. 17, 1856, after a ministry of fifty-nine years. He was a man of great simplicity of heart, which with age made him a patriarch in the Church. He was able to preach in German and English.

**Wack, John J.**, an American minister of the German Reformed Church whose churches finally joined the Dutch communion, was born in Philadelphia, June 14, 1774, and studied theology with his brother, Casper Wack. He was pastor at Amwell, N. J., from 1798 to 1803; supplied Knowlton and Hardwick from 1798 to 1805; pastor at Canajoharie and Stone Arabia, N. Y., from 1803 to 1814; suspended on account of intemperance in 1816; preached as an independent at Canajoharie and Stone Arabia from 1816 to 1827; also preached in the Independent Church of Tillaborough for several years. He died at Ephratah, N. Y., May 26, 1851. See Corwin, *Manual of the Ref. Church in America*, s. v.

**Wackernagel, Karl Eduard Philipp**, a German Protestant hymnologist of great note, was born at Berlin, June 28, 1800, where also he studied natural sciences and philology. In 1820 he was promoted at Erlangen as doctor of philosophy, and in 1861 the University of Breslau conferred on him the degree of doctor of divinity. He died June 20, 1877, at Dresden, where he had resided from 1860. Wackernagel was a member of different learned societies of Germany and Holland. Besides a number of works on mathematics and natural sciences, he published very important contributions to German hymnology, which made him an authority in that department. We name, *Das deutsche Kirchenlied* (Stuttgart, 1841):—*Bibliographie zur Gesch. d. deutschen Kirchenliedes im 16. Jahrhundert* (Frankfort-on-the-Main, 1855):—*Lieder der niederländischen Reformierten aus der Zeit der Verfolgung im 16. Jahrhundert* (1867):—*Das deutsche Kirchenlied von den ältesten Zeiten* (Leips. 1864-73, 4 vols.). Besides these, he published the hymns of Paul Gerhard, Martin Luther, and Johann Hermann. See Zuchold, *Bibl. Theol.* ii, 1408; *Theologisches Universal-Lex.* s. v.; Koch, *Gesch. d. deutschen Kirchenliedes*, vii, 47 sq. (B. P.)

**Waddel, James, D.D.**, a Presbyterian divine, celebrated for his eloquence, and immortalized by the pen of William Wirt as "The Blind Preacher," was born at Newry, in the North of Ireland, in July, 1739. He came with his parents at an early age to America, was educated at Dr. Finlay's Nottingham Academy, studied theology with the Rev. John Todd, was licensed to preach by the Presbytery of Hanover April 2, 1761, and was ordained and installed pastor of the churches of Lancaster and Northumberland, Va., Oct. 7, 1762. In 1778 he took charge of the Tinkling Spring congregation, Va.; in 1783 he organized a congregation at Staunton, to whom he preached on alternate Sabbaths; in 1785 he removed to Louisa County, Va., to an estate which he had purchased, and while there he lost his sight from cataract, but still continued to preach. It was during this period that Mr. Wirt was thrilled by his eloquence in the secluded little church in Orange County. In 1792 the degree of D.D. was conferred upon him by Dickinson College, Pa. He died in great triumph, Sept. 17, 1805. The testimonies to Dr. Waddel's surpassing eloquence are numerous and unquestionable. His oratory was simple, majestic, and impassioned.

It glowed with the peculiar fire of the South. Patrick Henry himself pronounced Davies and Waddel the greatest orators of the age. In him were blended "the poet's hand and prophet's fire." Dr. Waddel published nothing during his life, and gave orders that all his MSS. should be burned after his death. Several of his ten children occupied important positions in society. See Sprague, *Annals of the Amer. Pulpit*, iii, 235; Thomas, *Pronouncing Biog. Dict.*; Foote, *Sketches of Virginia*, vol. i; *Life of Rev. Dr. Alexander*; *Watchman of the South*, and *Prot. and Her.* Oct. 24, 1844; Davidson, *Hist. of the Presb. Church in Kentucky*, p. 26; *Letters of a British Spy*, let. vii. (J. L. S.)

**Waddel, Moses, D.D.**, a Presbyterian divine, was born in Iredell County, N. C., July 29, 1770. He received a good academic education, graduated at Hampden Sidney College in 1791, and was licensed by Hanover Presbytery of Virginia in May, 1792. He taught school in Columbia County, Ga. (1793-1801); then in Vienna, Abbeville District, S. C. (1802-1804). He removed to Willington, S. C., in 1804, where he remained until May, 1819, when, having in the previous year been elected president of the University of Georgia, he entered upon the duties of that office. "The effect of his coming to this institution was almost magical; it very soon attained a measure of prosperity altogether unequalled in its previous history." He resigned this position in August, 1829, and then returned to Willington. His labors in the ministry he continued six or seven years longer. In September, 1836, he was visited with a stroke of the palsy, which incapacitated him for all active duties. He died July 21, 1840. Dr. Waddel was distinguished as an instructor. "He may be justly considered as the father of classical education in the upper country of South Carolina and Georgia." As a Christian, his character was unexceptionable. He was active and constant in the discharge of his ministerial duties, and he shrank from no labor which his ecclesiastical relations imposed upon him. His style of preaching was plain, simple, and earnest. He published *Memoirs of Miss Catharine Elizabeth Smell* (N. Y. 1810, 12mo). It was a highly interesting and popular work, as was indicated by the fact that it passed to a third edition in the United States, and was published twice in Great Britain. See Sprague, *Annals of the Amer. Pulpit*, iv, 63; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; *Memoirs, etc., of S. Grellet* (Phila. 1860), ii, 187. (J. L. S.)

**Waddham (or GODDAMUS), ADAM, D.D.**, an English Franciscan of Norwich, was professor at Oxford. He died in 1358. His *Commentary on the Sentences* was published at Paris in 1512. See Mosheim, *Hist. of the Church*, bk. iii, cent. xiv, pt. ii, ch. ii.

**Wadding, Luke**, a Roman Catholic ecclesiastic, was born at Waterford, Ireland, Oct. 16, 1588. He studied theology in Portugal; joined the Franciscan Order in 1605; became professor of divinity at the University of Salamanca; removed to Rome in 1618, where he founded in 1625 the College of St. Isidore for Irish Franciscans; took part with the Jansenists in the famous controversy of that name, but retracted his views upon the publication of the papal bull of condemnation; and was procurator of the Franciscans at Rome from 1630 to 1634; and vice-commissary from 1645 to 1648. He died at Rome Nov. 18, 1657. Among his works are, *The History and Bibliography of the Franciscans*, in the *Annales Ordinis Minorum*:—an edition of the *Works of Duns Scotus*:—and *Scriptores Ordinis Minorum*.

**Waddington, Edward, D.D.**, an English prelate, was bishop of Chichester from 1724 until his death, in 1731. He published some *Sermons* in 1718, 1721, and 1729.

**Waddington, George, D.D.**, an English divine, traveller, and historian, was born Sept. 7, 1793. He was educated at the Charter-house, London, and Trinity College, Cambridge, where he graduated in 1815; and he

was subsequently elected fellow of Trinity College. He devoted himself for a considerable period to Oriental travel, and was for some years vicar of Masham, Yorkshire. In 1840 he was installed dean of Durham, and in 1841 became first warden of the University of Durham. He was generous in his charities, and a strong supporter of liberal opinions. He died at Durham, July 20, 1869. His principal works are, *Journal of a Visit to Some Parts of Ethiopia* (1822):—*A Visit to Greece in 1823 and 1824* (1825):—*The Present Condition and Prospects of the Greek or Oriental Church*, etc. (1829):—*History of the Church from the Earliest Ages to the Reformation* (1835):—*History of the Reformation on the Continent* (1841):—*and Three Lectures on National Education* (1845).

**Waddle, Benjamin, D.D.**, a minister of the United Presbyterian Church, was born in Ohio County, Va., June 2, 1802. At twenty-one years of age he commenced making preparation for the ministry. He received his classical education at Wheeling Academy. At the solicitation of Rev. Dr. Samuel Findley, he went to Washington, O., to assist him in a grammar-school. In November, 1826, he entered the theological seminary at Pittsburgh, from whence he graduated. He was licensed to preach at Washington April 28, 1828, and accepted a call to Jonathan Creek, Rush Creek, Thornville, and Zanesville, and the following May was ordained. He remained over this charge seven years, when he accepted a call to Crooked Creek, where his labors were greatly blessed. He remained there six years, during which time he was instrumental in founding Muskingum College. He was sent with Dr. Findley as missionary to Indiana, Illinois, Iowa, and Missouri. In 1858 he labored as a missionary at Chicago. In 1859 he took charge of a Church in Kenton, O., where he remained until 1871, when he was elected by the friends of the Bible in common-schools to represent Hardin County in the Legislature of Ohio. He rendered satisfaction to his constituents, and maintained his character as a minister in his somewhat doubtful position. His name was a synonym of goodness. He died at Kenton in 1879. (W. P. S.)

**Waddy, Samuel Dousland, D.D.**, an English Wesleyan Methodist minister, son of Rev. Richard Waddy, was born at Burton-on-Trent, Aug. 5, 1804. He was educated at the Wesleyan Academy, Woodhouse Grove, Yorkshire (1813 to 1819). In 1820 he was apprenticed to a linen-draper in London—in an occupation uncongenial, and to a master unscrupulous. He and his fellow-apprentice—the late Samuel Warren, M.D., LL.D., author of *Ten Thousand a Year*, etc., and son of Dr. Samuel Warren, famous in Methodist history—had to sleep on the floor under the shop counter; and on account of his refusal to be implicated in the dishonesty of his master, young Waddy was soon banished to sell goods in a damp, cold, underground department, where, no customers appearing, he commenced, by the aid of a flickering lamp, the study of medicine. His indomitable spirit was leading the way to eminence as a medical man, when his conversion (1822) gave him to the ministry (1825). His charges were Cambridge, Lynn (1826), Birmingham (1827), Gateshead (1829), Northampton (1831), Sheffield (1836), Hull (1840), Bath (1841), governorship of Wesley College, Sheffield—an institution which he had founded, and now saved—(1844-62), Chelsea (1862), Lambeth (1865), and Clifton, Bristol (1867). In 1842 he publicly opposed Sir James Graham's Factories Education Bill, and received the thanks of Lord Duncan. In 1843 he had a remarkable escape from the shipwreck of the "Queen," on her way to Dublin, a thrilling account of which he published in London, and reprinted in his *Life*. The following spring he was again sent to Ireland on a missionary deputation. In 1859 he was elected president of conference, and received his doctorate from Wesleyan University, Conn. For many years he was treasurer of the Children's Fund. In 1870 Dr. Waddy became supernumerary, and retired

to Redland, Bristol. Like dean Swift, he "died at the top." The intellect, too active in life, lost its cunning, the memory its power. Finally, the great spirit passed away, Nov. 7, 1876.

"Seldom has a man been intrusted with an intellect at once so strong and so sprightly; seldom have the earnest student, the powerful preacher, and the effective administrator been so happily united in the same person. Waddy was a great and noble man, of strongly marked individuality, strict integrity, and high-toned honor, admirable alike in public and private life" (*Minutes*, 1877, p. 18). In a beautiful and masterly memorial, an inimitable piece of characterization, Rev. William Arthur thus speaks of Dr. Waddy as a preacher: "Those who best knew these private qualities also best knew that the gravity, depth, and elevation, which took up the whole man when he appeared in the pulpit, were as spontaneous as the rest. He was not now the friend among friends, but the servant in the presence of his Master, whose greatness and whose goodness put him and all his fellow-servants to shame, and, at the same time, gave them cause for adoration, of which the deepest tone can never fully note the depth. He was now a messenger fraught with words of import, and bound to make their sense understood and their weight and urgency felt. Then did thought sit supreme in every chamber of the spirit, and look out with a most manly earnestness from every window of the countenance. Calm, strong, reverent, and original; acute, lofty, rich, and often deep, he unfolded his Master's message, and laid his Master's will upon the soul" (see *Life*, p. 342 sq.). "Dr. Waddy was the brightest and most vivid of men in society. No one that ever passed a free hour in social intercourse with him could believe that even Sydney Smith was a wittier man or uttered more, or more pungent or more brilliant, *mots*. Every sentence sparkled; every repartee flashed. Now graceful, now caustic, now irresistibly comic and grotesque, the play of his wit was incessant and inexhaustible" (Dr. J. H. Rigg). "Like the flashing of steel, it never gave an impression of less than the strength of steel" (Arthur). "His humor was always brilliant, never cruel; like the flame of a diamond, bright but not burning" (Simpson, in *N. Y. Christian Advocate*, Nov. 18, 1880).

Of Dr. Waddy's writings there were published, *Exeter Hall Lecture on Sincerity* (Lond. 1853):—*Ex-presidential Charges* (ibid. 1860):—a volume of *Sermons*, issued by his family:—and several *Addresses, Letters*, etc., preserved in his *Life*. See particularly a *Letter to the London Times* (Sept. 8, 1849) in defence of the action of the Conference in re Everett, Griffith, and Dunn (*Life*, p. 209-219); and a *Lecture on Popery* (p. 364-405, Appendix). Waddy, like most of the British Wesleyan divines, could see no good in the Roman Catholic Church. He closes this able lecture with a highly rhetorical and unlimited denunciation of the hated Church, a denunciation repugnant alike to fact and charity. Dr. Waddy was the brother of Rev. Benjamin B. Waddy, and father of Samuel D. Waddy, Q.C., a prominent Liberal member of Parliament, and of Rev. John T. Waddy, of the British Conference. See *Minutes of Conference* (Lond. 1877), p. 17; *Life of S. D. Waddy, D.D.*, by his youngest daughter (ibid. 1878, 12mo), a beautiful and admirably written biography; Stevenson, *Hist. of City Road Chapel*, p. 226.

**Wade, Alpheus**, a Methodist Episcopal minister, was born at Pawlet, Vt., June 14, 1801. He was converted when about nineteen, and licensed as a local preacher in 1821. In 1838 he joined the Troy Conference, and was appointed to the Luzerne Circuit. Subsequently he served at Ticonderoga and Jay, N. Y.; Alburgh, Sheldon, and Monkton, Vt.; Northampton, N. Y. In 1847 he was supernumerated, and in 1852 was superannuated. He died at Amsterdam, N. Y., July 26, 1868. See *Minutes of Annual Conferences*, 1869, p. 117.

**Wade, Deborah B. Lapham**, an eminent Bap-

tist missionary, wife of Rev. Dr. Jonathan Wade, was born in Nelson, N. Y., June 10, 1801. She sailed for Burmah, the field of Christian labor to which she and her husband had been designated by the Baptist Triennial Convention, June 22, 1823, and arrived at Calcutta Oct. 19, and Rangoon Dec. 5, of the same year. Soon after they reached their station, the first Burmese war broke out, and Mr. and Mrs. Wade took up their residence in Doorgapoor, about five miles from Calcutta. Here they gave themselves to the work of studying the Burmese language and fitting themselves for the missionary labors upon which they proposed to enter whenever the providence of God should prepare the way. In 1826, the war having ended, they returned to Burmah, and took up their residence at Amherst, in the month of November. Mrs. Wade devoted herself for a time to the care of the infant left by the first Mrs. Judson, and on its decease she established and superintended a school for Burman girls, and performed missionary labor among the Burman women. Amherst not proving to be so hopeful a place for missionary work, Mr. and Mrs. Wade removed to Maulmain, and in 1830 to Rangoon. Subsequently they went to Mergin. In all these different stations Mrs. Wade devoted herself with great fidelity and perseverance to the work which she had undertaken. We have read of but few persons who were more thoroughly consecrated to the service of their Master, and lived as if immediately in his divine presence. She returned to the United States in 1833 on account of the ill-health of her husband. Wherever she went, her presence was an inspiration, and she was the means of arousing the deepest interest in the cause of foreign missions. She spent a year and a half in her native land, and then returned to the sphere of her labor, once more to devote herself to the service of her Lord. What she accomplished during the next fourteen years cannot be told in a sketch so brief as this. The records of the final day, alone, will disclose it. The health of her husband again broke down, and she once more went back to her native land, reaching Boston July 31, 1848, and remaining in her own country two years; as useful, perhaps, at home as she had been on foreign shores in the great work to which she had consecrated all her faculties. On July 25, 1850, she again set sail for the East, and in due time stood once more on the soil of Burmah. Her missionary labors were carried on in Maulmain and Tavoy, and continued up to within a few months of the close of her life. Some time before the end of her toils was reached, she wrote to a friend, "We are old, very old, for India; and we live daily looking for the bright messenger to call us home. The dear and more and more lamented Judson once exclaimed, when near the heavenly shore, 'Oh, the love of Christ! What a beautiful study for eternity!' And for some time past I have had views, as never before, of the length and breadth, and height and depth, of the riches of the grace of God through Christ our Saviour; and often does my heart exclaim, 'What a beautiful, what a sublime study for eternity!'" The anticipated close of life came, and she entered the better world Oct. 5, 1868. She occupies a conspicuous place among the ablest and most devout female missionaries of modern times. See *Baptist Missionary Magazine*, xlix, 9394. (J. C. S.)

**Wade, John**, a Congregational minister, was born at Ipswich, Mass. He graduated from Harvard College in 1693; was ordained pastor of the church in Berwick, Me., in November, 1702; and died in 1703. See Sprague, *Annals of the Amer. Pulpit*, i, 189.

**Wade, Jonathan, D.D.**, a distinguished Baptist missionary, was born in Otsego, N. Y., Dec. 10, 1798. He pursued his studies at Hamilton; was ordained at Broadalbin, N. Y., Feb. 13, 1823; set apart as a missionary to Burmah the following May, and arrived at Rangoon in December of the same year. The war between Burmah and the English seriously deranged missionary operations. In 1827 the mission was removed to Maulmain, where Mr. Wade labored until, in

1831, he began missionary work in Arracan. His missionary life, which was crowned with abundant success, covered a period of fifty years. Twice he visited his native land, in 1832 and 1847. Just before leaving the last time for the scene of his labors in the East, he said, "I have lived to see the baptism of fifteen thousand." He died at Rangoon, Burmah, June 10, 1872. See the *N. Y. Examiner and Chronicle*. (J. C. S.)

**Wade, Joshua**, an English Wesleyan minister, was born near Leeds in 1792. He was converted when fourteen years old; was sent in 1815 to Liskeard, his first charge; became a supernumerary at Banwell in 1844; removed to Kilhampton in 1845; and died at Tamerton, near Plymouth, Oct. 24, 1859. Distinguished success marked his labors in some circuits. See *Minutes of Wesleyan Conference*, 1860.

**Wadrakali** (*Patragali, Bhatragali, Pagodon*), in Hindû mythology, is a powerful goddess, a daughter of Siva, born in his middle eye by the power of Vishnu. She conquered the giant Darida, who could not be slain by any man; and she even became dangerous to her own father, who hid himself in the sea when she returned from her combat with the great dæmon.

**Wadsworth, Benjamin** (1), D.D., an American Congregational minister, uncle of John W. (below), was born at Milton, Mass., in 1669. He graduated at Harvard College in 1690; was ordained in 1696, and preached at the First Church, Boston, until 1725; was president of Harvard College from 1725 until his death, which occurred March 16, 1737. He published numerous *Sermons* and theological works. See Sprague, *Annals of the Amer. Pulpit*, i, 220.

**Wadsworth, Benjamin** (2), D.D., a Congregational minister, was born at Milton, Mass., July 18, 1750; graduated at Harvard College in 1769, and was ordained Dec. 23, 1772, as pastor in Danvers, where he remained until his death, Jan. 18, 1826. He published, *Eulogy on Washington* (1800);—and several occasional *Sermons*. See Sprague, *Annals of the Amer. Pulpit*, ii, 31.

**Wadsworth, George**, an English Wesleyan preacher, was sent out by the conference in 1770. He was a plain, pious man, and for twenty-five years labored in the vineyard. In 1797, being afflicted with the palsy, he retired from the active work. Some of his faculties were taken from him before his dissolution. He died June 12, 1797. See Atmore, *Meth. Memorial*, s. v.

**Wadsworth, John W.**, a Congregational minister, was born in Milton, Mass., Aug. 6, 1703. He was the grandson of captain Samuel Wadsworth, who fell at Bloody Brook. He graduated at Harvard College in 1723; was ordained at Canterbury, Conn., in 1729; and resigned in 1741 on account of a charge of immoral conduct brought against him. He retired to his native home, preached occasionally, and died there June 15, 1766. Tradition says that his death took place in the pulpit immediately after he had read a hymn containing this verse:

"Hosanna, with a cheerful sound,  
To God's upholding hand;  
Ten thousand snares beeter us round,  
And yet secure we stand."

See *Cong. Quar.* 1859, p. 353.

**Wadsworth, Lemuel**, a Congregational minister, was born at Stoughton, Mass., in 1769. He graduated from Brown University in 1793; was ordained pastor in Raby, now Brookline, N. H., Oct. 11, 1797; and died Nov. 25, 1817. See Sprague, *Annals of the Amer. Pulpit*, ii, 417.

**Wadsworth, Samuel**, a Congregational minister, brother of John W. (above), was born at Milton, Mass., July 23, 1720. In 1747 he was ordained over the Separate Church in Killingly (South), Conn., where he preached until his death, in 1762. He was "a man of an excellent gift in prayer, his conduct extraordin-

rily religious, and his conversation very heavenly." See *Cong. Quar.* 1861, p. 184.

**Wadsworth, Thomas**, an eminent Nonconformist divine, was born at St. Saviours, Southwark, England, in 1630, and educated in Christ's College, Cambridge. In 1652 he was appointed minister of Newington Butts, where he spent his time and a great part of his fortune. He lectured occasionally in various city churches, and was finally chosen to the living of St. Lawrence Pountney, whence he was ejected at the Restoration. He afterwards preached privately at Newington, Theobalds, and Southwark, for which he received no compensation. He died Oct. 29, 1676. He published various pious treatises.

**Wadsworth, William A.**, a Methodist Episcopal minister, was born at New Hartford, N. Y. He declined a flattering business offer when he entered the ministry; officiated some time as local preacher; studied theology in Boston University; and in 1855 joined the Oneida, now Wyoming, Conference; serving as pastor at Vernon Centre, Mount Upton, Norwich, Unadilla, and Cooperstown. He died March 9, 1875. Although Mr. Wadsworth was not a showy or brilliant speaker, yet his sound, instructive, practical sermons made him a great power in the Church. In his daily life he was peculiarly affectionate, faithful, and exemplary. See *Minutes of Annual Conferences*, 1875, p. 60.

**Wæhrwolf**, in Scandinavian mythology, is a spiritual being who still creates fear in many people's minds. Superstition teaches that Wæhrwolf is a human being (man or woman) that is capable of changing itself into a wolf. This wolf is unusually large and savage, and is known mainly by his riding-belt, an indispensable article, as it serves him in changing from one form to another, and which he seeks to hide, as well as he may, under his hair. As soon as he looses the belt he becomes a human being again. If the wolf is shot at and the belt is hit, their lies, instead of the animal, a naked man or woman. In this manner witches are said to have been caught who went out hunting for prey, and especially children.

**Wæinaemoeinen**, in the mythology of the Finns, is one of the supreme gods, who is said to be seen in the seven principal stars of the Great Bear constellation. He takes the souls of the departed up with him, and if it is possible for such a soul to strike the Great Bear, it becomes partaker of eternal happiness. He is related to Ilmarainen, god of air and water. The name of the father of both is Kawe, and he is the only being sprung from himself. The sons discovered and made the arts and sciences—Ilmarainen, the art of working iron; Wæinaemoeinen invented the *kandele* (a fiddle-like instrument), and with it poetry and song, hunting, fishing, and war, of which he was worshipped as the god generally. He was the spirit whence all life proceeded, the master of favorable spells, the adversary and the conqueror of all personifications of evil, and the sovereign possessor of all science. He sent the celestial fire to man, and invented incantations. Persons of all classes needed to invoke his protection. The sweat which dropped from his body was a balm for all diseases. He alone furnished efficacious assistance against the charms of the sorcerers, and an appeal to him was an effectual resource against the encroachments of demons. —Vollmer, *Wörterb. d. Mythol.* s. v.; Lenormant, *Chaldæan Magic*, p. 246 sq.

**Wæipaes** is a ghost of the earth among the Finns, who at one time made a long journey with his playfellow, and afterwards rested himself upon rocks. From their sweat snakes are said to have sprung.

**Wael** (or **Waal**), JOHN BAPTIST DE, a Flemish engraver of the 17th century, of whom little is known, is said to have executed some etchings, among which are

a set of prints representing the *History of the Prodigal Son*. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Waeyen**, JAN van der. See WAAJEN.

**Wafer** is the rendering, in the A. V., of *צפחית*, *tsaphichith* (from *צפץ*, to flatten), a *pancake* (Exod. xvi, 31), and of *רַקִּיק*, *rakik* (from *רָקַץ*, to make thin), a *cake* (xxix, 2, 23; Lev. ii, 4; vii, 12; viii, 26; Numb. vi, 15, 19; 1 Chron. xxiii, 29). See **BAKE**. We learn from the above passages that such thin cakes made of fine flour, usually without leaven, and anointed with oil, were used by the Hebrews in connection with their offerings. See **SACRIFICE**. The custom, to some extent, is still maintained by the Jews. See **PASSOVER**.

**WAFER**, in ecclesiastical terminology, is the bread used in the eucharist by the Romanists and Lutherans. In the ancient Church, so long as the people continued to make oblations of bread and wine, the elements for the use of the eucharist were taken out of them; and, consequently, so long as the common leavened bread in ordinary use employed for that purpose. The use of wafers and unleavened bread was not known in the Church until the 11th century. It has been conjectured that the change crept in from the people's leaving off their oblations, and the clergy being compelled to provide the bread themselves. Under pretence of decency and respect, they changed it from leaven to unleaven, and from a loaf that might be broken, to a nice and delicate wafer, which was formed in the figure of a *denarius*, or penny, either to represent the pence for which our Saviour was betrayed, or because the people, instead of offering a loaf of bread as formerly, were ordered to offer a penny, which was to be expended upon something pertaining to the sacrifice of the altar. This alteration in the eucharistical bread occasioned great disputes between the Eastern and Western churches, which separated about it; the Western Church going so far to the extreme as almost to lose the nature of the sacramental element by introducing a thing that could hardly be called bread, instead of that which our Lord had appointed to be the representative of his body in the eucharist. The wafer now in use in the Roman Church is a small thin portion of unleavened bread, bearing upon it either the figure of Christ or the initials I. H. S. In the Church of England wafers have been used from the earliest times of Christianity, and are still not uncommonly used; but the rubric of the present Prayer-book maintains that the best and purest wheaten bread that may be conveniently obtained will suffice.

**Wafthrudner**, in Norse mythology, is a giant, an inhabitant of the country of the Jotes. Odin had a combat with him.

**Wagenaar**, HANS, a Dutch historian, who was born at Amsterdam, Oct. 31, 1709, was chiefly occupied in commerce and literature, and died March 1, 1773, deserves notice here for several ecclesiastical monographs, for which see *Biog. Universelle*, s. v.

**Wagenseil, Christian Jakob**, a German writer, who was born Nov. 23, 1756, at Kaufbeuren, and died Jan. 8, 1839, at Augsburg, is the author of, *Beitrag zur Geschichte der Reformation, des dreissigjährigen Krieges, des westphälischen Friedens u. der Jesuiten, vom Jahre 1524 bis zu Ende des Jahres 1699* (Leipsic, 1830); —*Ulrich v. Hutten, nach seinem Leben, seinem Charakter u. seinen Schriften geschildert* (Nuremberg, 1832; new ed. 1858); —*Prälat J. Cp. v. Schmid zu Ulm, nach seinem Leben, Wirken u. Charakter* (Augsburg, 1828). See Winer, *Handbuch der theol. Lit.* i, 747, 867; Zuchold, *Bibl. Theol.* ii, 1408. (B. P.)

**Wagenseil, Johann Christoph**, a Protestant theologian of Germany, was born Nov. 26, 1633, at Nuremberg. In 1667 he was appointed professor of history at Altdorf; in 1674 he occupied the chair of Oriental languages, and from 1697 that of ecclesiastical law, and died Oct. 9, 1705. He is known as the author

of *Tela Ignea Satanae, sive Arcani et Horribiles Judæorum adversus Christum Deum et Christianam Religionem Libri* (Aldorf, 1681), a work containing the anti-Christian literature of the Jews in a Latin translation and refutation. He also translated into Latin the Talmudic treatise *Sotah*, מִסְכָּה סוֹתָה (ibid. 1674), with very valuable notes. Besides, he wrote, *Denunciatio Christiana ad Omnes Imperantes qui Judæos habent sub Jurisdictione sua* (ibid. 1703-4; reprinted in Schudt's *Jüdische Denkwürdigkeiten*, ii, 339):—*Disputatio Circularis de Judæis* (ibid. 1705):—*Exercitationes Sex Varii Argumenti* (ibid. 1698). See Fürst, *Bibl. Jud.* iii, 489; Winer, *Handbuch der theol. Lit.* i, 30, 380, 524. (B. P.)

**Wages** (usually some form of שכר, *sakdr*, "to hire" [especially in the Hithpael, Hag. i, 6, to "earn wages"], chiefly שכר, *sakdr* [Gen. xxxi, 8; Exod. ii, 9; Ezek. xxix, 18, 19; elsewhere "hire," "reward," etc.], and מִשְׁכָּרֶת, *misakreth* [Gen. xxxix, 15, 31, 41; "reward," Ruth ii, 12]; also פְּעֻלָּה, *peullah* [Lev. xix, 13; "reward," Psa. cix, 20], *work* [as elsewhere mostly rendered]; μισθός [John iv, 36, elsewhere "reward" or "hire"], *pay*; δούλιον [Luke iii, 14; vi, 23; 2 Cor. xi, 8; "charges," 1 Cor. ix, 7], strictly *rations*, according to the earliest usages of mankind, are a return made by a purchaser for something of value—specifically for work performed. Thus labor is recognised as property, and wages as the price paid or obtained in exchange for such property. In this relation there is obviously nothing improper or humiliating on the side either of the buyer or the seller. They have each a certain thing which the other wants, and, in the exchange which they in consequence make, both parties are alike served. In these few words lies the theory, and also the justification, of all service. The entire commerce of life is barter. In hire, then, there is nothing improper or discreditable. It is only a hireling—that is, a mercenary, a mean, sordid spirit—that is wrong. So long as a human being has anything to give which another human being wants, so long has he something of value in the great market of life; and whatever that something may be, provided it does not contribute to evil passions or evil deeds, he is a truly respectable capitalist, and a useful member of the social community. The scriptural usage in applying the term translated "wages" to sacred subjects—thus the Almighty himself says to Abraham (Gen. xv, 1), "I am thy exceeding great reward"—tends to confirm these views, and to suggest the observance of caution in the employment of the words "hire" and "hireling," which have acquired an offensive meaning by no means originally inherent in themselves, or in the Hebrew words for which they stand (xxx, 18, 32, 33). See **HIRELING**.

The earliest mention of wages is of a recompense, not in money, but in kind, to Jacob from Laban (Gen. xxix, 15, 20; xxx, 28; xxxi, 7, 8, 41). This usage was only natural among a pastoral and changing population like that of the tent-dwellers of Syria. Burckhardt mentions a case in Syria resembling closely that of Jacob with Laban—a man who served eight years for his food, on condition of obtaining his master's daughter in marriage, and was afterwards compelled by his father-in-law to perform acts of service for him (*Syria*, p. 297). In Egypt, money payments by way of wages were in use, but the terms cannot now be ascertained (Exod. ii, 9). Among the Jews wages in general, whether of soldiers or laborers, are mentioned (Hag. i, 6; Ezek. xxix, 18, 19; John iv, 36). The only mention of the rate of wages in Scripture is found in the parable of the householder and vineyard (Matt. xx, 2), where the laborer's wages are set at one denarius per day, probably = fifteen cents, a rate which agrees with Tobit v, 14, where a drachma is mentioned as the rate per day, a sum which may be fairly taken as equivalent to the denarius, and to the usual pay of a soldier (ten *asses* per diem) in the later days of the Roman republic (Tacitus, *Ann.* i, 17;

Polybius, vi, 39). It was perhaps the traditional remembrance of this sum as a day's wages that suggested the mention of "drachmas wrung from the hard hands of peasants" (Shakespeare, *Jul. Cæs.* iv, 3). In earlier times it is probable that the rate was lower, as until lately it was throughout India. In Scotland we know that in the last century a laborer's daily wages did not exceed sixpence (Smiles, *Lives of Engineers*, ii, 96). But it is likely that laborers, and also soldiers, were supplied with provisions (Michaelis, *Laws of Moses* [ed. Smith], § 130, ii, 190), as is intimated by the word δούλιον, used in Luke iii, 14, and 1 Cor. ix, 7, and also by Polybius, vi, 39. The Mishna (*Baba Metsia*, vi, 1, 5) speaks of victuals being allowed, or not, according to the custom of the place, up to the value of a denarius, i. e. inclusive of the pay.

The law was very strict in requiring daily payment of wages (Lev. xix, 13; Deut. xxiv, 14, 15); and the Mishna applies the same rule to the use of animals (*Baba Metsia*, ix, 12). The employer who refused to give his laborers sufficient victuals is censured (Job xxiv, 11), and the iniquity of withholding wages is denounced (Jer. xxii, 13; Mal. iii, 5; James v, 4). See **SERVANT**.

**Wagg**, JOHN D., a minister of the Methodist Episcopal Church, South, was born in Jefferson, N. C., July 8, 1835. He embraced religion in early life, and united with the Holston (E. Tenn.) Conference in 1858. In 1865 he was granted a superannuated relation, and died June 13, 1866. Mr. Wagg possessed more than ordinary preaching abilities, and for meekness and piety was worthy of imitation. See *Minutes of Annual Conferences of the M. E. Church, South*, 1866, p. 63.

**Waggoner**, SAMUEL, a Methodist Episcopal minister, was born in Stokes County, N. C., Oct. 24, 1788. He was converted in 1808, joined the Virginia Conference in 1811, and was appointed to Salisbury Circuit. He was ordained deacon in 1813, elder in 1815, and died April 13, 1816. Mr. Waggoner was laborious, intellectual, and faithful. See *Minutes of Annual Conferences*, 1817, p. 291.

**Wagl**, FRIEDRICH, a Roman Catholic theologian of Austria, was born in 1807 at Horn. In 1831 he was made a priest; in 1835, doctor of theology; in 1838, professor of exegesis at Grätz; and died Sept. 10, 1871, at Pötzleinsdorf, near Vienna. He published, *Der Priester und die Neuzeit* (Grätz, 1850):—*Der Religionsunterricht an der Volksschule* (ibid. eod.). See *Literarischer Handweiser*, 1866, p. 153; 1871, p. 525. (B. P.)

**Wagner**, DANIEL, a German Reformed minister, was born in the duchy of Nassau in 1750, and brought to this country by his parents when only two years of age. He studied the classics under Rev. John D. Gross, of New York city, and theology under Rev. William Hendel, of Lancaster, Pa. He was licensed by the German Cœtus in 1771; preached at Kreutz Creek, Pa., 1771-74; York and other places, 1774-86; Tulpehocken, Heidelberg, Bern, Berg, Summerberg, 1786-93; York, 1793-1802; and Frederick, Md., 1802-10, where he died, in 1810. See Harbaugh, *Lives of Fathers of the Germ. Ref. Church*, ii, 229 sq.

**Wagner**, FRIEDRICH, a Protestant minister of Germany, was born Jan. 21, 1693, at Caro, not far from Magdeburg. He studied theology and philosophy at Halle from 1712 to 1716. In the latter year he was appointed teacher there, and entertained the hope of being sent as a missionary to East India; but in 1719 he was called to Berlin, where he remained two years, when he went to Nauen as pastor primarius. A few years later he went to Stargard as provost and pastor of St. Mary's, at the same time occupying the chair of theology and Hebrew literature at the gymnasium there. In the year 1736 he was called to Hamburg, where he died, July 6, 1760, having received two years previously the degree of doctor of divinity from the Jena University.

His writings are given in Döring, *Die gelehrten Theologen Deutschlands*, iv, 612 sq. (B. P.)

**Wagner, Henry**, a German Reformed minister, was born in Berks County, Pa., April 3, 1802. He united with the Church at Aaronsburg, Pa., when about nineteen years of age; entered the Theological Seminary at Carlisle, Pa., in the spring of 1825, and remained about three years; began preaching in the Paradise charge in 1828, and was ordained by the synod in the autumn of the same year; labored extensively in this charge for several years, preaching to eight or more congregations; became pastor of the Lebanon charge, composed of Lebanon, Hill Church, Jonestown, Annville, and Campbellstown, in 1835; accepted a call from McConnellsburg charge, Fulton County, Pa., in 1851; preached at Mercersburg from 1853 to 1856; began his pastorate at Orwigsburg, Schuylkill Co., in the spring of 1856; resigned his pastoral charge, and relinquished the active duties of the ministry in 1865; and died at Lebanon, Pa., May 25, 1869. "As a theologian and as a preacher he stood high among his brethren. His sermons were always well prepared, and replete with sound doctrine and evangelical truth. As a pastor he was faithful and active; as a catechist he was thorough and earnest; as a father in the ministry he possessed the affections and regard of all. His labors in building up the Church were arduous and successful. His ministry has left a sweet savor, and will long be held in grateful remembrance." See Harbaugh, *Fathers of the Germ. Ref. Church*, iv, 224 sq.

**Wagner, Johann Jakob**, a German philosopher, was born at Ulm in 1775, and became professor at Würzburg. He died Nov. 23, 1841. His principal works are, *Philosophie der Erziehungskunst* (1802):—*Von der Natur der Dinge* (1808):—*System der Idealphilosophie* (1804):—*Grundriss der Staatswissenschaft und Politik* (1805):—*Religion, Wissenschaft, Kunst u. Staat in ihren gegenseitigen Verhältnissen* (Leips. 1819):—*Theodicee* (Bamberg and Würzburg, 1809):—*Ideen zu einer allgemeinen Mythol. der alten Welt* (Frankf. 1808):—*Math. Philosophie* (1811):—*Organon der menschlichen Erkenntnis* (1830):—and *Nachgelassene Schriften* (1853). See Rabus, *J. J. Wagner's Leben, Lehre, und Bedeutung*, etc. (Nuremberg, 1862); Adam and Kille, *J. J. Wagner's Lebensnachrichten und Briefe* (1848).

**Wagner, Joseph**, a Swiss engraver, was born at Thalendorf, on Lake Constance, in 1706. He first studied painting, at Venice, under Jacopo Amiconi, who advised him to devote himself to engraving. He then went to Paris, where he studied under Lawrence Cars. He also visited London in 1733, where he resided some time, and engraved several plates. He afterwards returned to Venice, where he established himself as an engraver, and carried on a trade in prints. He died at Venice in 1780. Among his best works are the following: *The Education of the Virgin*, after Amiconi:—*The Infant Christ Sleeping*, after the same:—*The Holy Family*, after Paul Veronese:—*The Interview between Jacob and Rachel*, after L. Giordano:—*Rebecca Receiving the Presents from Eleazar*, after the same:—*The Death of Abel*, after Benedetto Luti:—*Mary Magdalene in the House of the Pharisee*, after the same:—*The Virgin and Infant Christ*, after Solimena:—*The Assumption of the Virgin*, after Piazzetta:—and *St. John in the Desert*, after C. Vanloo. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Wagner, Tobias**, a noted German theologian, was born at Heidenheim, in Württemberg, Feb. 21, 1598. He pursued his studies at the convent of Maulbronn, and afterwards at the University of Tübingen, taking the degree of master of arts in 1618. He was made deacon in 1624, and eight years later pastor at Esslingen. His profound learning caused him to be invited to Tübingen, in charge of the magistracy; and in 1653 he was made professor of theology, in 1656 vice-chancellor, and chancellor in 1662. He died Aug. 12, 1680,

leaving a large number of theological works, important in their day, for which see *Biog. Universelle*, s. v.

**Wagnitz, Heinrich Balthasar**, a Protestant theologian of Germany, was born Sept. 8, 1755. In 1777 he was appointed fourth preacher at St. Mary's, in Halle; in 1786 he was made deacon there; and in 1809, professor of theology and superintendent and pastor. He died Feb. 28, 1838. He wrote, *Memorablen den Predigern des 19. Jahrhunderts gewidmet* (Halle, 1802-6, 2 vols.):—*Homiletische Abhandlungen und Kritiken* (ibid. 1783-85, 2 vols.):—*Liturgisches Journal* (ibid. 1801-9, 1812, 8 vols.):—*Religionslehren in Beispielen* (ibid. 1799, 1800, and often, 2 vols.):—*Ueber die Phänomene vor der Zerstörung Jerusalems* (ibid. 1780). See Fürst, *Bibl. Jud.* iii, 490; Zuchold, *Bibl. Theol.* ii, 1410; Winer, *Handbuch der theol. Lit.* i, 6; ii, 35, 36, 37, 58, 63, 161, 282, 362, 389, 398. (B. P.)

**Wagnoff**, in Norse mythology, was the god of war among the Danes, who often was mistaken for Fro or Odin, and was represented as similar to these, armed with helmet, shield, and sword.

**Wagon** (גָּזָלָה, *agaláh* [Gen. xlv, 19, 21, 27; xlv, 5; Numb. vii, 3, 6, 7, 8; elsewhere "cart"], from גָּזַל, *to roll*; or רֶכֶב, *rékeb* [Ezek. xxiii, 24; elsewhere "chariot"], from רָכַב, *to ride*). Among the Israelites in Palestine, we find in use from the time of the judges transport-wagons (1 Sam. vi, 7 sq.; 2 Sam. vi, 3; Amos ii, 13), as well as vehicles for persons, especially princely carriages (1 Sam. viii, 11; 2 Sam. xv, 1; comp. Isa. xxii, 18), for journeys (1 Kings xii, 18; xxii, 35; 2 Kings ix, 27). The former, or *carts*, were called גָּזָלָה (used for family transportation in the case of masses, Gen. xlv, 19, like the Greek *μαζα* and the Latin *plaustrum*), while those with seats (2 Kings x, 15) were designated as מִרְכָּבוֹת, *chariots*; and both eventually רֶכֶב simply. The צֶבַח גָּזָלָה of Numb. vii, 3 were probably (so Onkelos, Aquila, the Vulg., etc.), as in the A. V., "covered wagons," in which the sacred utensils were carried (Sept. *μαζαι λαμπηναὶ*, *vehicula tecta*; see Schleusner, *Thesaur. Philol.* iii, 432). See LITTEr. A travelling carriage is also mentioned in the New Test. (*μαζα*, Acts viii, 28 sq.). All these vehicles, whose construction we cannot particularly make out (see the Mishna [*Chelim*, xiv, 4], which mentions three kinds of wagon [*ibid.* xxiv, 2])—except that the wheels generally were called גָּלְגָלִים or גָּלְגָלִים, the hubs הַשְּׂרָרִים, the fellows גְּבִירִים or גְּבִירִים, and the axle יָד, while the gearing-up of the horses was denoted by אָסַר (*to bind*), once (Mic. i, 13) by רָחַם (of the like signification)—and which were sometimes drawn by oxen (1 Sam. vi, 7; 2 Sam. vi, 6), especially those for transport, and sometimes by horses (as equipage) or perhaps asses, appear nevertheless to have been customarily employed not so much in the mountain districts (which were ill adapted through lack of carriage roads) as in the southern and maritime regions; whereas in modern times the inhabitants are in the habit of riding (on the backs of horses, donkeys, or mules), leaving burdens to be borne by camels; and carriages (with the exception of a few foreign coaches) are rarely seen in the East (Korte, *Reisen*, p. 434), even in Egypt (Mayr, *Schicksale*, ii, 40), where they were anciently very numerous (Herod. ii, 108). The Canaanites had war-chariots before the arrival of the Hebrews (Josh. xi, 4; xvii, 16; Judg. iv, 3), like the Philistines (i, 19; 1 Sam. xiii, 5; comp. Jer. xlvii, 3) and later the Syrians (2 Sam. x, 18; 1 Kings xx, 1; xxii, 31; 2 Kings vi, 14 sq.); and the immense numbers of these (900 in Judg. iv, 3; 1000 in 1 Chron. xviii, 4; 30,000 in 1 Sam. xiii, 5; comp. the 1200 Egyptian chariots in 2 Chron. xii, 3) are confirmed by other ancient accounts (Xenoph. *Anab.* i, 7, 11; Diod. Sic. i, 54; comp. 2 Macc. xiii, 2). This gave the natives a great advantage at first (Josh. xvii, 16; but comp. Veget.

Ancient Assyrian Wagon. (From the bas-relief of Kuyunjik in the British Museum.)

*Milit.* iii, 24), which David at once effectually overcame in a pitched battle (2 Sam. viii, 4); and Solomon established cavalry stations (פָּרָה הָרֶכֶב, 1 Kings ix, 19; x, 26; comp. v, 6) as a defence (Ewald, *Isr. Gesch.* iii, 72 sq.). These foreign war vehicles are sometimes called *chariots of iron* (רֶכֶב בְּרֹזָה, Josh. xvii, 16, 18; Judg. i, 19; iv, 3), meaning either constructed wholly out of or simply strengthened by iron, or rather perhaps *scythe-armed* ("currus falcatus," Curtius, iv, 12, 6; xv, 3, 4; comp. iv, 9, 5; Livy, xxxvii, 41; Veget. *Milit.* iii, 24; ὑπὸ δρεπανηφόρα, Xenoph. *Anab.* i, 7, 10; Diod. Sic. xvii, 53; Appian, *Syr.* xxxii; see Schickedanz, *De Curribus Fulcatis* [Serv. 1754]; comp. the פָּלָדִיָה הָרֶכֶב of Nah. ii, 4). See Jahn, *Archäol.* II, ii, 439 sq.; Lydius, *De Re Milit.* (ed. Van Til, Dordr. 1698), p. 131 sq.; Wichmannshausen, *De Curribus Belli* (Viteb. 1722); Scheffer, *De Re Vehiculari* (Francof. 1671); Fabricy, *Recherches sur l'Epoque de l'Équitation* (Par. 1764); Ginzrot, *Die Wagen der Gr. und Röm.* (Munich, 1813). See CHARIOT.

With some small exceptions, it may be said that wheel carriages are not now employed in Africa or Western Asia; but that they were anciently used in Egypt, and in what is now Asiatic Turkey, is attested not only by history, but by existing sculptures and paintings. It would seem that they were not in early

times used in Palestine, as, when Jacob saw them, he knew they must have come from Egypt. Perhaps, however, he knew this by their peculiar shape. The covered wagons for conveying the materials of the tabernacle were probably constructed on Egyptian models. They were each drawn by two oxen (Numb. vii, 8, 8). Herodotus mentions a four-wheeled Egyptian vehicle (ὑμαξα) used for sacred purposes (Herod. ii, 63). Two-wheeled wagons, or rather carts, are frequently represented on the Assyrian sculptures, especially for the conveyance of (female and infantile) prisoners away from a sacked city (Layard, *Nineveh*, ii, 301). The only wheel carriages in Western Asia with which we are acquainted are, first, a very rude cart, usually drawn by oxen, and employed in conveying agricultural produce in Armenia and Georgia; and then a vehicle called an *arabah*, used at Constantinople and some other towns towards the Mediterranean. It is a light covered cart without springs; and, being exclusively used by women, children, and aged or sick persons, would seem, both in its use, and, as nearly as we can discover, in its make, to be no bad representative of the "wagons" in the Bible. No wheel carriage is, however, now used in a journey. The Oriental wagon, or *arabah*, is a vehicle composed of two or three planks fixed on two (sometimes four) solid circular blocks of wood, from two to five feet in diameter, which serve as wheels. To the floor are sometimes attached wings, which splay outwards like the sides of a wheelbarrow. For the conveyance of passengers, mattresses or clothes are laid in the bottom, and the vehicle is drawn by buffaloes or oxen (Arundell, *Asia Minor*, ii, 191, 235, 238; Olearius, *Trav.* p. 309; Ker Porter, *Trav.* ii, 535). See CART.

**Wagstaffe, John**, an English author of the 17th century, was educated in Oriel College, Oxford, where he remained, and died in 1677. He published, *Historical Reflections on the Bishop of Rome* (1660):—and *Questions of Witchcraft Debated* (1671). See Bliss's Wood, *Athen.* Oxon. iii, 1113.

**Wagstaffe, Thomas**, a learned Nonjuring divine, was born in Warwickshire, England, Feb. 15, 1645. He was educated at the Charterhouse School under Mr. Wood; took the degree of bachelor of arts in 1664, and that of master in 1667; was ordained deacon June 6, 1669, and priest Nov. 19, same year; rector of Martinshorpe, in the county of Rutland, from 1669 to 1676; curate of Stow, in the county of Bucks, from 1676 to 1684; chan-

Turkish Arabah.

cellor of the cathedral church, Lichfield, in 1684; and rector of St. Margaret Pattens, London, in the same year. Deprived of his preferments at the Revolution for not taking the new oaths, he practiced physic for several years in London with good success. In 1693 he was consecrated bishop, and afterwards became suffragan of Ipswich. He died Oct. 17, 1712. Besides his *Sermons*, he published several tracts in defence of Charles I.

**Wahabees**, a modern Mohammedan sect founded by sheik Mohammed, the son of Abd-el-Wahâb, for whom they were named. They preach no new doctrine, but have for their distinctive principle a desire to abolish the idolatrous practices which have connected themselves with the religion of Islam. They reject the worship of Mohammed as gross idolatry, and adhere strictly to the Koran; otherwise they observe all the rites and ceremonies of the Mohammedans—the number of the prayers, the genuflections, the fast of the Ramadan (q. v.), and abstinence from wine and all spirituous liquors. Abd-el-Wahâb, during his whole life, sought to gain converts by peaceable means, but his successors followed the example of Mohammed in disseminating their principles by the sword, and political interests were united with religious reform. They originated in the small tribe of Nedshi, in Yemen; but their founder undertook an expedition into Syria and the regions bordering on the Euphrates, and having collected a number of tribes from the Arabian desert, who became converts to his views, he formed them into a distinct nation, under the control of Eben Send as their civil governor, and himself as their imam, or spiritual ruler. This appears to have taken place soon after the middle of the last century; but no measures were taken against the Wahabees by the Porte until the year 1798, when they were attacked by the pasha of Bagdad, but without effect, which emboldened them to leave the desert; and in 1801–2 they met with signal success, took great booty from the neighboring Mohammedans, and captured Mecca itself, where they established their power in lieu of that of the grand sultan, in virtue of which he had hitherto been regarded as the head and protector of the faithful. The residence of Send was now fixed at Dreich, where he had a palace, and lived in all the pomp and splendor of an Eastern prince. In 1803–4 he made unsuccessful attacks on Bagdad and Busorah, but took Medina in 1804, and in 1805 Jidda, which had formerly baffled all his attempts to subdue it. The Porte was now obliged to pay a heavy tribute for permission to send an escort from Damascus with the caravans of pilgrims that annually proceeded to Mecca; and these caravans were no longer allowed to have weapons, flags, or music, or to enter the holy city on carpets, as formerly. In 1807 the Wahabees stood in the zenith of their power, since which time they have been repeatedly repulsed, especially in 1818, when their sheik Abdallah, the great-grandson of Saûd, the friend and protector of Abd-el-Wahâb, was compelled to surrender to Ibrahim Pasha, the son of Mehemet Ali, and was taken to Constantinople and executed. The sect still exists, and is paramount in Central Arabia, where the dominions of the sultan of the Wahabees embrace not only Nedjed proper, but the adjacent provinces, and include 316 towns or villages, with a population (in 1863) of 1,219,000. They are a great annoyance to the Turkish government, and a terror to the pilgrims who proceed from all parts of the East to visit the tomb of the prophet. See Palgrave, *Central and Eastern Arabia* (Lond. 1869); *Histoire des Wahabites depuis leur Origine jusqu'à l'An 1809* (Paris, 1810); Burckhardt, *Notes on the Bedouins and Wahabys* (Lond. 1830). See MOHAMMEDANISM.

**Wahl, Christian Abraham**, a Protestant theologian of Germany, was born at Dresden, Nov. 1, 1773. In 1808 he was called as pastor to Schneeberg. He was appointed in 1823 superintendent at Oschatz; in 1835, X.—H 11 11

member of consistory in his native place; and died Nov. 30, 1855, at Kötschenbroda. He wrote, *Historische Einleitung in die sämmtlichen Bücher der Bibel* (Leips. 1802):—*Historisch-praktische Einleitung in die bibl. Schriften* (ibid. 1820):—*Questiones Theologico-dogmaticæ Candidatis Theol. sese Subjecturis Propositæ* (ibid. 1806):—*Bibl. Handwörterbuch* (ibid. 1825):—*Commentatio de Particulæ ei et Præpos. eiç apud N. T. Scriptores Usu et Potestate* (ibid. 1827):—*Clavis Novi Testamenti Philologica* (ibid. 1822; 3d ed. 1843), which is the basis of Dr. E. Robinson's *Greek Lexicon of the N. T.*, the best extant:—*Clavis Librorum Vet. Test. Apocryphorum Philolog.* (ibid. 1853). See Furst, *Bibl. Jud.* iii, 490; Zuchold, *Bibl. Theol.* ii, 1410 sq.; id. *Theol. Universal-Lexikon*, s. v.; Winer, *Handbuch der theol. Lit.* i, 128; ii, 301, 304. (B. P.)

**Wahl, Samuel Friedrich Günther**, a Protestant linguist of Germany, was born Feb. 2, 1760, at Alach, near Erfurt. In 1784 he was appointed rector at Bückeburg; in 1788, professor of Oriental languages at Halle; and died June 29, 1834. He published, *Allgemeine Geschichte der orientalischen Sprachen u. Literatur* (Leips. 1784):—*Observationes Philolog.-criticæ super Psalterii Odario 133* (ibid. 1784):—*Magazin für alte, besonders morgenländische und bibl. Literatur* (Cassel, 1787–90):—*Orientalische Bibliothek* (Lemgo, 1788–92, 3 vols.):—*Elementarbuch für die arab. Sprache u. Literatur* (Halle, 1789):—*Beitrag zur Geschichte u. Statistik der Araber* (ibid. 1789):—*Übersetzung, Einleitung u. Anmerk. zu Habakuk* (Hanov. 1790):—*Arabische Anthologie* (Leips. 1791):—*Altes und neues Vorderasien* (ibid. 1795):—*Übersetzung des Korans* (Halle, 1828, and often). See Furst, *Bibl. Jud.* iii, 490; Winer, *Handbuch der theol. Lit.* i, 210, 229, 277, 527; id. *Theol. Universal-Lexikon*, s. v. (B. P.)

**Wahlers, F. H.**, a German Reformed minister, was born at Fähr, kingdom of Hanover, Sept. 10, 1844; emigrated to America; was licensed by the Indiana Classis at Lafayette in the spring of 1867; began preaching at Crothersville, Ind., where he died, March 18, 1868, from suffocation, having fallen in an epileptic fit with his face in the water. See Harbaugh, *Fathers of the Germ. Ref. Church*, iv, 502.

**Wähner, Andreas Georg**, a Protestant theologian of Germany, was born Feb. 24, 1693, at Rhida. He studied at Helmstädt, especially Oriental languages, from 1710 to 1716; and, as the result of his studies, he published during that time three dissertations: *De Mare Asphaltite*:—*De Regione Ophir*:—*De Fæsto Encæniorum*. In 1718 he was called, as professor of the Gymnasium, to Göttingen. When, in 1733, that institution was changed into a university, he was permitted to lecture there, and in 1735 he published his *Hebrew Grammar*, which is the more remarkable because being the first book which was published by that university. In the same city he studied the Talmud and the Rabbinical writings, his instructor being a learned Jew by the name of Ginzburger. In 1738 he was advanced to be ordinary professor of Oriental languages. He died Feb. 21, 1762. His most important work, which he published in two volumes, is his *Antiquitates Ebræorum de Israelitico Genio Origine, Factis, Rebus Sacris*, etc. (Gött. 1743), a very learned and instructive work, which may still be used with great advantage by the student. For his other writings, see Furst, *Bibl. Jud.* iii, 488 sq.; Döring, *Die gelehrten Theologen Deutschlands*, iv, 609 sq. (B. P.)

**Waidshayanta** (or **Vaidshayanta**), in Hindû mythology, is the palace of Indra, god of the sun, in India.

**Wail** (some form of וָיָהוּ or וָיָהוּ, ἀλαλάω. It is singular to observe the onomatopoeic forms of words used in most languages to express the sounds of grief, such as וָיָהוּ, ululare, howl, yell, etc.; all consisting essentially of the *l* sound). The Oriental forms of lamentation are much more expressive and vehement than with us. See MOURNING.

**Wainright, David**, an English Congregational minister, was born at Leeds, Jan. 28, 1835. He was educated at Airedale College, and became the minister of the Wesleyan Free Church, Great Horton. He was ordained, April 6, 1860, pastor of the Congregational Church at Chorley, Lancashire, and died Sept. 28, 1862. Mr. Wainright was a truth-seeker, and to find and communicate what he believed to be truth seemed to be the joy of his ministrations. See (Lond.) *Cong. Year-book*, 1863, p. 271.

**Wainright, William**, an English Congregational minister, was born in London, September, 1806. He was educated at Christ's Hospital, and while there became deeply impressed with religious things. He early engaged in Sabbath-school work and lay preaching, and in 1849 was ordained at Tarrant, Hampshire. Mr. Wainright labored successively at Wheathampstead and Cordicote, and was recognised by the Church as an earnest and zealous advocate of the religion of Jesus Christ. He died May 8, 1865. See (Lond.) *Cong. Year-book*, 1866, p. 286.

**Wainscot**. This term originally seems to have implied rough planks of oak timber, and subsequently to have been given to wooden panelling, to which they were converted for lining the inner walls of houses and churches. It was very extensively employed during the reigns of Queen Elizabeth and James I, and for a long period afterwards. The name has long ceased to be confined to oak panelling. It is also called *seel-ing-work*.

**Wainwright, JONATHAN MAYHEW, D.D.**, a bishop of the Protestant Episcopal Church, was born in Liverpool, England, Feb. 24, 1792. His parents were on a visit to England when he was born, and they remained there until he was eleven years old. During this period he spent several years at a school at Ruthin, in North Wales. When his parents returned to the United States, he was placed in Sandwich Academy, Mass., and in due time entered Harvard College, from which he graduated in 1812. For some time after his graduation he was proctor and teacher of rhetoric there, and meanwhile had resolved to enter upon the ministry. In 1816 he became a deacon, and not long after assumed charge of Christ Church, Hartford, Conn., where he was admitted to priest's orders; May 29, 1819, he was made rector of the parish; Nov. 25 he was called to be an assistant minister of Trinity Church, New York city, where he continued to serve until he was elected rector of Grace Church, in the same city, early in 1821. With this Church he spent thirteen years of his ministry. In 1834 he accepted the rectorship of Trinity Church, Boston, but remained only three years, when he returned to New York as assistant minister of Trinity Church, the congregation of St. John's Chapel becoming his more immediate charge, and in this relation he continued until the close of his life. He became involved in a controversy with the Rev. Dr. Potts, of New York, in 1844, which grew out of an assertion which he had made, that "there is no Church without a bishop." It was conducted in the form of letters in the *New York Commercial Advertiser*, and was afterwards published in pamphlet form. His health having become impaired, he travelled extensively in Europe and the East in 1848-49 for recreation; and after his return he published two large volumes on Egypt and the Holy Land. June 15, 1852, he was a representative of the Episcopal Church in America at the celebration in Westminster Abbey, at the close of the third jubilee year of the Society for the Propagation of the Gospel in Foreign Parts. On this occasion Oxford bestowed upon him the degree of D.C.L. Oct. 1, 1852, he was chosen provisional bishop of the diocese of New York, and was consecrated Nov. 9 following. Among the various offices which he had previously filled, it may be mentioned that he was a deputy from the diocese of New York to the General Convention of 1832; was a member of the Diocesan

Standing Committee from 1829 to 1833; was replaced on that committee in 1844, and was continued there by four successive conventions; from 1828 to 1834 was secretary of the Board of Trustees of the General Theological Seminary; for many years a trustee of Trinity School; a trustee of the Society for the Promotion of Religion and Learning in the State of New York; a vice-president of the New York Bible and Prayer-book Society; a trustee of the Tract Society; and, from the beginning, one of the executive committee and a member of the Board of the General Sunday-school Union. Dr. Wainwright died in New York city, Sept. 21, 1854. Among his literary productions are numerous published discourses and several books, viz.: *Pathways and Abiding Places of Our Saviour* (1850);—*Two Orders of Family Prayer* (1845, 1850);—*The Land of Bondage* (1851). He also edited two volumes of *Memoirs*, one of bishop Ravenscroft, of North Carolina, and one of bishop Heber. Dr. Wainwright was a lover of the fine arts, and his taste in these matters was excellent. His sermonic style was perspicuous, but there was little ornament and apparently little elaboration. His elocution evinced careful culture. He had a strong relish for social life, and attracted the refined by his urbane manners. See Sprague, *Annals of the Amer. Pulpit*, v, 610.

**Wairewert** (or **Vairevert**), in Hindû mythology, is the son of Siva, born from his breath to humble Brahma.

**Waishwanara** (or **Vaishvanara**), in Hindû mythology, is a surname of Agni (god of fire), and means the *all-permeating fire*.

**Wait, DANIEL GUILFORD, LL.D.**, an English divine, was born in 1789, and educated at St. John's College, Cambridge. He was for some time curate of Puckle Church, near Bristol, and in 1819 became rector of Blagdon, Somerset. He died in 1850. He published several works, in which he gives the results of his researches in the Hebrew and other Oriental languages and antiquities.

**Wait, LYING IN** (לִּיגָה, *lyegda*). The natives of Western and Central Asia have in all ages been infamous for their plundering propensities. Their daring in watching caravans can only be equalled by their patient watchings in ambuscade; they will remain sometimes for days and even weeks, with a very scanty supply of provisions, waiting to surprise the unguarded caravan or the unwary traveller. Homer aptly describes such characters (*Iliad*, xviii):

"A place for ambush fit they found, and stood  
Cover'd with shields beside a silver flood,  
Two spies at distance lurk, and watchful seem,  
If sheep or oxen seek the winding stream.  
Soon the white flocks proceeded o'er the plains,  
And steers slow moving, and two shepherd swains  
Behind them, piping on their reeds, they go,  
Nor fear an ambush, nor suspect a foe;  
In arms the glittering squadron rising round,  
Rush sudden; hille of slaughter heap the ground;  
Whole flocks and herds lie bleeding on the plains,  
And all amidst them, dead, the shepherd swaine!"

It appears from various parts of Scripture that Palestine and the adjoining regions were much infested by persons who lived by violence, and took refuge in the many large caves and mountain fastnesses which the country afforded them. In the civil wars which arose out of the usurpation of Abimelech, we find that the men of Shechem adopted the Canaanitish, or, as we should call it in modern times, the Oriental custom of employing "liers in wait." The sacred historian relates, "The men of Shechem set liars in wait for him in the top of the mountains, and they robbed all that came along that way by them: and it was told Abimelech" (Judg. ix, 25). The chapter from which we have quoted then proceeds to describe how Abimelech, by planting an ambush of "liers in wait," succeeded in surprising the city of Shechem, which he levelled to

the ground. See **AMBUSH**. During the Roman sway, the unsettled state of affairs, the frequent wars, and intestine divisions were very favorable to such banditti, who continued to increase, so that at last the road to Jericho from Jerusalem was so overrun by them that it was called "the bloody way." In the time of Antigonus, Herod, son of Antipater, was obliged to have recourse to the Roman soldiers to extirpate them. The robbers lived with their families in caves, on the steep faces of the mountain precipices, guarded with sharp rocks, and apparently inaccessible to invaders. Herod caused large wooden chests to be made, and let down by an iron chain from an engine on the top of the mountains, till they came on a level with the mouth of each cave. The chests contained soldiers, well armed, and provided with long hooks. They slew with their darts and spears as many of the robbers as they could reach at the entrance of the caves, and pulled out others with their hooks, and cast them down headlong; and they set fire to the bushes, etc., about the caves, and smothered many more; so by these means the mountain robbers were extirpated (Josephus, *Ant.* xxiv, 15). Dr. Thomson well describes such scenes (*Land and Book*, i, 487):

"The Arab robber lurks like a wolf among these sand-heaps, and often springs out suddenly upon the solitary traveller, robs him in a trice, and then plunges again into the wilderness of sand-hills and reedy downs, where pursuit is fruitless. Our friends are careful not to allow us to straggle about or lag behind, and yet it seems absurd to fear a surprise here—Khaifa before, Acre in the rear, and travellers in sight on both sides. Robberies, however, do often occur, just where we now are. Strange country! and it has always been so. There are a hundred allusions to just such things in the history, the Psalms, and the prophets of Israel. A whole class of imagery is based upon them. Thus, in *Pea*, x, 8-10: 'He sits in the lurking-places of the villages, in the secret places doth he murder the innocent. He lieth in wait secretly as a lion in his den; he lieth in wait to catch the poor; he doth catch the poor when he draweth him into his net; he croucheth and humbleth himself, that the poor may fall by his strong ones.' And a thousand rascals, the living originals of this picture, are this day crouching and lying in wait all over the country to catch poor helpless travellers. You observe that all these people we meet or pass are armed; nor would they venture to go from Acre to Khaifa without their musket, although the cannon of the castles seem to command every foot of the way. Strange, most strange land! but it tallies most wonderfully with its ancient story."

In modern times, the Kurds are the most distinguished among Asiatic nations for their inordinate and determined spirit of plunder, and they faithfully preserve all the habits which the Old Test. ascribes to the "liars in wait" of ancient times. A writer in the *Saturday Magazine* thus describes them:

"With them plundering is a natural occupation; and every unhappy stranger whom chance or curiosity throws

Kurdish Liars in Wait.

in their way they regard as their lawful prey. Should the unfortunate being happen to be poor and ragged, he is severely beaten for not having brought sufficient property to make him worth robbing. They are not only daring robbers, but skilful thieves; and their boldness is solely equalled by their address. Sir John Malcolm, on his mission to the court of Persia, in 1810, had scarcely set his foot in their territory when he was attacked, in spite of his imposing appearance and his numerous attendants. Captain Keppel was closely watched for several miles, and narrowly escaped a similar visitation. Mr. Buckingham was less fortunate; a contribution of 2500 piastres (about \$125) was levied on the caravan by which he journeyed, before it was allowed to proceed."

These marauders not only beset mountain passes and defiles, but frequently come into the neighborhood of cities for the purpose of kidnapping the unprotected and driving them off to be sold as slaves, or murdering and robbing those whom they suspect of carrying wealth about their persons. The Kurds usually place themselves in ambush near a well, in order to gain possession of the persons of young women who come to draw water; or near the groves planted round ponds, which are sometimes found in the vicinity of Oriental cities, and are favorite haunts of the merchants who come to enjoy the refreshment of pure air, coolness, and shade. See **ROBBER**.

**Waitana** (or **Waitana**), in Hindûism, is a ceremony by which water is made holy.

**Waite, Clarendon**, a Congregational minister, was born in Hubbardston, Mass., Dec. 12, 1830. After graduating from Brown University in 1852, he devoted one year to business, and then spent three years in the Andover Theological Seminary. For six months he was a student at the University of Halle, Prussia, when he was suddenly called home by the death of his father. His first pastorate was that of the Church in Rutland, Mass., where he was installed Feb. 25, 1858, and remained eight years. He was very much interested in the freedmen in the South, and for six months was superintendent of them at Newbern, N. C. In that same year he was installed pastor of Crombie Street Church, Salem, Mass., where, in the midst of his work, he was stricken down. He visited Cuba in the winter of 1866-67, and returned strengthened. In the fall of 1867 he was asked to temporarily fill the chair of English literature and belles-lettres in Beloit College, and consented, but before arriving there was attacked with typhoid fever, of which, soon after his arrival, he died, Dec. 16, 1867. His sermons were carefully prepared, and were earnestly directed towards the salvation of the people. See *Cong. Quar.* 1868, p. 286.

**Waite, John James**, an English Congregational minister, was born at Gloucester, Feb. 23, 1808. Mr. Waite's thirst for knowledge in all departments led him to pursue his studies with such avidity as ultimately to impair his eyesight, of which faculty he was en-

Robbers' Cave.

tirely deprived at the age of eighteen. This severe affliction served, under the blessing of God, to develop the more rapidly his intellectual and moral character. For ten years he was engaged entirely in ministerial labor, and at the end of this period Mr. Waite commenced his important life-work, the reformation of the Psalms. For several years he had the oversight of the Church at Ilminster; but so great was the growing appreciation of the value of his labors, and of the simplicity and general application of his system of teaching, that it became necessary for him to accede to the request of his ministerial brethren in London, and devote himself exclusively to his great work. Mr. Waite recognised the necessity for a purer taste and for a higher standard of music in the services of the sanctuary, and with the co-operation of the larger churches he was able to do much towards laying the foundation for a more extended knowledge of musical science. He died Oct. 25, 1868. See (Lond.) *Cong. Year-book*, 1869, p. 291.

**Waite, Thomas, LL.D.**, an English clergyman, was born in 1776. He became curate of Wellington; was principal of the grammar-school at Lewisham Hill from 1815 to 1833; rector of High Halden in 1833; of Great Chart in 1835; and died in 1841. He published several *Sermons, Explanatory and Critical, on the Thirty-nine Articles* (1826).

**Waite, William**, a minister of the Congregational Church, was born at Idle, England, Jan. 6, 1825. His first religious impressions were received under the ministry of Rev. J. Stringer, of Idle, whose Church he joined, and by whom, with the concurrence of the entire Church, he was sent to Airedale College, in January, 1847. He spent five years there in the acquisition of knowledge and in preparation for the work of the ministry. He left college at Christmas in 1851; settled at Bacup, Jan. 1; was ordained in May; and died in September, 1852. During a ministry of a little over one year the Church grew rapidly. His death was greatly regretted. "A most pious, devoted, laborious, intelligent, faithful man; he was a truly serious, earnest, and energetic preacher of the Gospel." See (Lond.) *Cong. Year-book*, 1853, p. 232.

**Waith, William**, a Presbyterian minister, was born in the parish of Preston-on-Wye, Herefordshire, England, April 17, 1796. He received his education in the country schools; became an attorney in the Mayor's Court; emigrated to the United States in 1832; was licensed to preach by the Buffalo Presbytery in 1835; and ordained as an evangelist in 1836. He preached as follows: in Burton, Napoli, Ellington, Silver Creek, and Ripley, N. Y., and died at the last-mentioned place, June 4, 1860. He was a good preacher, a laborious and faithful pastor, and a true Christian. See Wilson, *Presb. Hist. Almanac*, 1861, p. 165.

**Waits** were anciently minstrels or musical watchmen who sounded the watch at night. They have now degenerated into itinerant musicians, who give notice of the approach of Christmas. The term is also applied to angelic musicians with horns, represented on corbels and ceilings.

**Waiwassaden** (or **Vaivassaden**), in Hindû mythology, is the father of Nirkunden and grandfather of Budalsheet, a powerful monarch of India born in the dynasty of the Children of the Sun.

**Waiwaswâta** (or **Vaivasvâta**), in Hindû mythology, is the son of the god of the sun. He was saved by Vishnu as a fish, prior and subsequent to the great Flood. He, a son of the sun, gave his daughter to Buddha, a son of the moon, in marriage. Thus he is the progenitor of the mighty dynasties the Children of the Sun and the Children of the Moon.

**Waizganthos**, in Slavonic mythology, is the god of fruitfulness and land-tillage, worshipped mainly by the Lithuanians.

**Wake** (Anglo-Saxon, *waican*, "to watch"), a holy-

day festival once universally held in England. In early times the day was considered as beginning and ending at sunset; and on the eve of the holiday worshippers repaired to the churches for worship, while the following day was spent in amusement. Each church, when consecrated, was dedicated to a saint, and on the anniversary of that day the parish wake was kept. In many places there was a second wake on the birthday of the saint, sometimes called *Patron* or *Saint's Day*. On these occasions the floor was strewn with rushes and flowers, and the altar and pulpit were decked with boughs and leaves. Crowds resorted to the wakes from neighboring parishes; hawkers or merchants were attracted by the crowds; and ultimately the wakes became mere fairs or markets little under the influence of the Church, and disgraced by scenes of indulgence and riot. The scandal of these scenes became so great that in 1285 Edward I passed a statute forbidding fairs and markets to be held in country churchyards. In 1448 Henry VI ordained that all showing of goods and merchandise except necessary victuals should be discontinued on the great festivals of the Church. In 1536, Henry VIII, by an act of convocation, ordered the festival of the Saint's Day to be discontinued, and that of the dedication of the church in all parishes to be the first Sunday in October. This gradually fell into desuetude, the Saint's Day being the more popular festival, and it still subsists in the form of a village wake.

A *lyke-wake* is a watching all night of a dead body by the friends and neighbors of the deceased. In Ireland, upon the death of one in humble circumstances, the body, laid out and covered with a sheet except the face, and surrounded with lighted tapers, is *waked* by the friends and neighbors. After vociferous lamentations, food and whiskey are indulged in, commonly leading to noisy and even riotous demonstrations. The custom, no doubt, originated in superstitious fear either of passing the night alone with a dead body or of its being interfered with by evil spirits.

**Wake, William, D.D.**, a distinguished English prelate, was born at Blandford, in Dorsetshire, in 1657. He was educated at Christ Church, Oxford, where he received the degree of master of arts in 1679, when he decided to take orders in the Church, although his father designed him for a commercial life. In 1682 he went to Paris as chaplain with viscount Preston, envoy-extraordinary to the court of France. On his return to England, in 1685, he was elected preacher to Gray's Inn. Immediately after the Revolution he was appointed deputy-clerk of the closet to king William, and in June, 1689, was made canon of Christ Church, Oxford. In 1693 he obtained the rectory of St. James's, Westminster. In 1701 he was made dean of Exeter, and in 1705 bishop of London. In the earlier years of his episcopacy he adhered to the Low-Church party, but afterwards became alienated from it, though not becoming a High-Churchman. In January, 1716, he was made archbishop of Canterbury, which office he held until his death, which occurred at Lambeth, Jan. 24, 1737. Among his most important works are the following: *Exposition of the Doctrine of the Church of England* (1686):—*A Defence of the Doctrine of the Church of England* (ed.)—*A Second Defence of the Doctrine of the Church of England* (1688):—*An English Version of the Genuine Epistles of the Apostolic Fathers, with a Preliminary Discourse concerning the Use of those Fathers* (1693):—*The Authority of Christian Princes over their Ecclesiastical Synods Asserted* (1697):—and other tracts to the same effect. A collection of his *Sermons and Charges* was published after his death.

**Wakefield, Gilbert**, first a minister of the Church of England, then a Unitarian, was born at Nottingham, England, Feb. 22, 1756. He was educated at Jesus College, Cambridge, where he graduated

in 1776, and was elected to a fellowship the same year. He was ordained in the Church of England in 1778, and appointed curate of Stockport, in Cheshire. In August of the same year he left Stockport and became curate of St. Peter's at Liverpool, and in 1779 was chosen classical tutor of the Dissenting Academy at Warrington, in Lancashire, where he remained until 1783. In the latter year he removed to Bramcote, near Nottingham, and in 1790 went to Hackney as tutor in a Dissenting academy, where he remained one year. The remainder of his life was spent in literary pursuits. He died Sept. 9, 1801. Among his most important works are, *An Inquiry into the Opinions of the Christian Writers of the Three First Centuries concerning the Person of Christ:—Four Marks of Antichrist, etc.* (1778); *—Internal Marks of the Evidence of the Christian Religion* (1779); *—Translation of the New Testament, with Notes* (1791); *—The Spirit of Christianity Compared with the Spirit of the Times in Great Britain* (1796); *—and An Answer to the Age of Reason, by Thomas Paine* (eod.).

**Wakefield, Robert**, a learned English divine in the reign of Henry VIII, was born in the north of England. He was educated at the university and on the Continent; taught Greek, Hebrew, Chaldee, and Syriac in France and Germany; in 1519 left his Hebrew professorship at Louvain, returned to England, and became chaplain to Dr. Pace; opened a public lecture in Greek at Cambridge in 1524, being made B.D. by Henry VIII, whom he favored after opposing in the affair of his divorce from Catherine; was professor of Hebrew at Oxford in 1530; canon of Wolsey's College in 1532; saved Hebrew and Greek MSS. at the dissolution of the lesser monasteries in 1536; and died in London, Oct. 8, 1537. He left some learned works in language and controversy.

**Wake-ikatsu-taino-kami**, in Japanese mythology, is the god of flashes of lightning; a sublime god, resident in the main sanctuary at Kamo, near Mijako, and who guards the fate of the Mikado. In this sanctuary are yearly held several festivals, of which one, Obimatsuri, is especially remarkable, because the priests then appear in the most costly apparel, superseding even the splendor of the apparel of the choir of music. Besides festive processions, horse-races are a main feature of the occasion, in which only kami priests and court servants are permitted to participate.

**Wakeley, JOSEPH B., D.D.**, a Methodist Episcopal minister, was born at Danbury, Conn., in 1809. He was converted when about sixteen, and in 1833 joined the New York Conference, which he served successively at Salisbury, Conn.; Lee and Lenox, Canaan, Stockport, Claverack, and Bloomville, N. Y.; Seventh Street, New York city; and in 1843 at Birmingham and Milford, Conn. In 1844 he was transferred to New Jersey, in 1852 to New York East Conference, and two years later returned to the New York Conference. From 1866 to 1868 Dr. Wakeley was presiding elder of Poughkeepsie District, and for the next four years held the same office on the Newburgh District. He died in New York city, April 27, 1875. Dr. Wakeley was a remarkable man in many respects. His cast of mind was practical. He was a model pastor and a prudent counsellor. As an ecclesiastical antiquarian he had no equal in the Church. His writings were mainly historical and biographical memoirs of early Methodism, and embrace *Lost Chapters Recovered from the Early History of Methodism:—Anecdotes of the Wesleys:—Anecdotes of Whitefield:—Heroes of Methodism:—Life and Sermons of Beaumont:—and Boehm's Reminiscences*. See *Minutes of Annual Conferences*, 1876, p. 55; Sprague, *Annals of the Amer. Pulpit*, vol. vii; Simpson, *Cyclop. of Methodism*, s. v.

**Wakemanites**, a small party of fanatics existing at New Haven, Conn., in 1855, who regarded Rhoda Wakeman as a divinely commissioned prophetess that

had been raised from the dead, according to her own prediction. Their credulity was carried to an unusual extreme. The so-called prophetess claimed that a farmer named Justus Matthews was possessed by an evil spirit, and that it was necessary to put him to death in order to remove it. Her followers were ready to perform the deed, and even the man himself was willing to submit to be murdered as the only means of being rid of the evil spirit. Upon the commission of the crime the fanatical sect was soon extinguished.

**Waku-nawo-sonajo**, in Japanese mythology, is a festival in Dairi, held on the first rat-day of the second month, by the eating of fresh vegetables.

**Wala**, in Norse mythology, was a wise woman, an enchantress, endowed not with imaginary, but with real, supernatural powers, and able to fix the fate of men.

**Wala**, abbot OF CORBIE, was the son of Bernard (natural brother of Charlemagne) by a Saxon woman, and seems to have been born about 765. He studied at the palatine school, and received the name of *Arsène* (male) from his teacher, Alcuin, on account of his energy. Tudesque was his native tongue, but he well understood Latin and Greek. He was employed by his imperial brother in several distant embassies and home duties, but was neglected on the accession of Louis the Pious (814); and two years after he assumed the clerical habit at Corbie, where his brother Adalhard was abbot. He was banished by the royal disfavor, but was recalled in 822, and in 826 became abbot. He died in October, 835, of grief, at the civil commotions of the times. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Walæus, ANTHONY**, an eminent Dutch Protestant divine, was born at Ghent, Oct. 3, 1573. He officiated as pastor at several different places; declared in favor of the Counter-remonstrants, and was one of those who drew up the canons of the Synod of Dort. He afterwards became professor of divinity at Leyden, and died July 9, 1639. He wrote, *Compendium Ethicæ Aristotelicæ* (1636), and the greater part of the translation of the Flemish Bible. See Chalmers, *Biog. Dict.* s. v.; *Biog. Universelle*, s. v. "Wale."

**Walafisk STRABO.** See STRABO.

**Walaskialf**, in Norse mythology, was one of the palaces which Odin had in Asgard. It was covered entirely with silver, and in the main hall were thrones for all the higher deities, one, however, especially for Odin. It was also called Hlidskialf, and from it Odin could view the whole earth.

**Walburga, St.** See WALPURGIS.

**Walch, Christian Wilhelm Franz**, a theologian of Göttingen, was born Dec. 25, 1726, at Jena, where his father was professor of theology. He travelled with his elder brother, Johann, after completing his studies, and made the acquaintance of many of the foremost celebrities in the literary world of his time. On his return he was made extraordinary professor of philosophy at Jena, in 1750; and three years afterwards professor of the same branch in ordinary at Göttingen. In 1754 he began to teach theology as extraordinary professor, and in 1757 received the theological chair in the Göttingen faculty. His lectures covered the entire field of theology; and, when supplemented with the numerous learned works he wrote and the administrative duties he performed in the government of the university and other institutions, demonstrated his great industry and capacity for work. He was made a member of various learned societies, and an honorary consistorial councillor of Great Britain. He was married in 1763, and died of apoplexy in 1784.

Walch was rather an industrious compiler than a creative genius. His importance lies in the department of Church history; his theology being deficient in orthodox life, but pervaded by the historical spirit. His

earliest work, written at the age of twenty-seven, was a *History of the Lutheran Religion*, intended to prove the correctness of that faith, and also to demonstrate that the existence and perfections of God may be seen in history as well as in physics and other fields of study. He displayed a constant disposition to make thorough and critical examination of all available sources; but in all his works evinced an utter inability to attain to that philosophical comprehension of his theme by which he could combine his materials into a homogeneous whole. In perspicuity and taste he was not the equal of Mosheim, and in power to excite and stimulate he was very much inferior to Semler. His chief merit lay in exhaustless patience and great conscientiousness, as displayed in the examination of sources and helps. Many of his works are consequently still indispensable as aids in their special fields.

Walch's most important works are, *Antiquitates Patri Philos. Vet. Christ.* (Jena, 1746):—*Hist. Patriarch. Jud.* (1751):—*Wahrhafte Gesch. d. Cath. v. Bora* (Halle, 1751–54, 2 vols.):—*Gesch. d. ev.-luth. Rel. etc.* (Jena, 1758):—*Hist. Adoptionorum* (1755, given in revised form in vol. ix of the *Ketzergesch.*):—*Gedanken v. d. Gesch. d. Glaubenslehre* (1756; 2d ed. 1764):—*Entwurf einer vollst. hist. d. röm. Päpste* (Gött. 1756; 2d ed. 1758):—*Entw. einer vollst. Hist. d. Kirchewersammlungen* (Leips. 1759):—*Hist. Protoposchitarum* (1760):—*Grundsätze d. natürl. Gottesgelahrtheit* (1760, etc.):—*Grundsätze d. Kirchenhist. d. Neuen Testaments* (1761; in a 3d enlarged ed. by Schulz, 1792):—*Entwurf einer vollst. Hist. d. Ketzerien, Spaltungen u. Religionsstreitigkeiten*, etc. (Leips. 1762 sq., 11 pts., the concluding part, reaching down to the 9th cent., by Spittler), his principal work:—*Breviar. Symbol. Eccl. Luth.* (Gött. 1765, etc.):—*Biblioth. Symbol. Vetus* (Lemgo, 1770):—*Kritische Unters. v. Gebrauch. d. heil. Schrift . . . in den ersten drei Jahrh.* (Leips. 1779). Complete lists of Walch's works are given in Pütter, *Vers. einer akad. Gelehrtenesch. v. d. . . Universität zu Göttingen*, i, 121 sq.; ii, 28 sq.; Meusel, *Lex. verstorbener deutsch. Schriftsteller*, xiv, 345 sq.; Döring, *Theologen Deutschlands im 18. u. 19. Jahrh.* iv, 615 sq. For biographical notices of Walch, see Heumann and Less, *Memorial of the Gött. Faculty in Honor of C. W. F. Walch* (Gött. 1784); Heyne, *Eulog. Ven. Walchii* (1784, fol.); Winckler, *Nachr. v. niedersächsischen Leuten*, ii, 101. For a characterization, see Baur, *Epochen d. kirchl. Geschichtsschreibung* (Tub. 1852), p. 145 sq. See Herzog, *Real-Encyklop.* s. v.

**Walch, Johann Ernst Immanuel**, brother of Christian, and the first-born son of Johann Georg (q. v.), was born in 1725. In 1750 he became professor of philosophy, and later of oratory and poetry. He was a man of wide philological and antiquarian learning, and also versed in physics. He published, *Diss. in Acta Apostol.* (1756 sq.) in which his archæological knowledge was applied to the exposition of the New Test. After his death appeared *Observatt. in Matt. ex Græc. Inscript.* (Jena, 1779):—*Antiq. Symbol. quibus Symbol. Apost. Hist. Illustr.* (ibid. 1772):—*Progr. de Peccato in Spir. Sanct.* (ibid. 1751–60):—*Marmor Hisp. Antiq. Vex. Christ. Neron. insigne Docum.* (ibid. 1750, 4to):—and *Persecut. Christ. Neron. in Hisp.* etc. (ibid. 1753):—*Christian. sub Diocletiano in Hisp. Persecut.* etc. (1751). See Döring, *Theologen Deutschlands im 18. u. 19. Jahrhundert*, iv, 615 sq.; Herzog, *Real-Encyklop.* s. v.

**Walch, Johann Georg**, a Jena theologian, the father of Johann Ernst Immanuel and Christian Wilhelm Franz Walch (q. v.), was born in 1693. He entered the University of Leipsic in 1710, and became master in 1713. His earliest literary endeavors were philological. He edited the academical discourses of Cellarius, and a series of ancient Latin authors, including Ovid and Lactantius. In 1716 he wrote the valued *Historia Critica Lat. Lingue*. In the same year he established himself at Jena, where he became professor of

oratory in 1719, and afterwards of poetry also, and where he was associated with Buddeus, who bestowed on him his only daughter in marriage. In 1723 he entered the arena of philosophical discussion with his *Gedanken vom philosophischen Naturell*; and again, in 1724 and 1725, with rejoinders to Wolf's review of Buddeus's *Bedenken üb. d. Wolf'sche Philosophie*. In 1726 he published a *Philosophisches Lexikon*, which attained a fourth edition in 1775; and in 1727 an *Einl. in d. Philosophie, und Observatt. in Nov. Test. Libros, quarum I Pars ea Continet Loca quæ ex Hist. Philos. Illustr.* He united with Buddeus in holding fast to the old Lutheran orthodoxy, though his reception of natural theology had destroyed the old theoretical basis of that orthodoxy; and, at the same time, his views had received an infusion of Pietism, which prevented him from sustaining a hostile attitude towards that movement. In 1724 he was made theological professor extraordinary, doctor of theology in 1726, professor in ordinary in 1728, and professor primarius in 1750. Four years later he attained the rank of ecclesiastical councillor to the court of Saxe-Weimar. He wrote a number of compends for use in his lecture-rooms, which are distinguished by a comprehensive survey of the literature bearing upon his subjects; e. g. an introduction in Christian ethics; and others into systematic theology, polemical theology, and the theological sciences (the latter, 1737, 4to; 2d ed. much enlarged, 1753, 8vo). The history of theological literature is his debtor for valuable service, beginning with the publication of Bosii *Introd. in Notit. Scripturum Eccl.* (Jena, 1733). His *Biblioth. Theol. Selecta Litterar. Advot.* (ibid. 1757–65, 4 vols.) is still valuable, as is also the *Biblioth. Patrist. Litter. Annot. Instr.* (ibid. 1770; revised by Danz, 1834). The publication of Luther's complete works (1740–52, 24 vols.), and of the *Book of Christian Concord* (1750, Germ. and Lat. with historical notes), to which he added an *Introd. in Libr. Symb. Eccl. Luther.* (1752, 4to), is also worthy of note. The remaining more important works of Walch are two introductions to polemical theology, *Theol. Einl. in d. vornehmsten Religionsstreitigkeiten*, etc. (1724), intended to supplement the oral lectures of Buddeus, and *Hist. u. theol. Einl. in d. Religionsstreitigkeiten welche sonderlich ausser d. ev.-luth. Kirche entstanden* (1733–36, 5 vols.). An *Einleitung* to the religious controversies within the pale of the Lutheran Church (1730–39, 5 vols.) formed the complement to the last-named work. Other works deserving of mention are his *Miscell. Sacra s. Comm. ad Hist. Eccl. Sanctioresque Discipl. Pert.* (Amst. 1744):—his comprehensive *Hist. Eccl. N. T. Variis Observatt. Ill.* (1744) to the end of the 4th century:—and his *Hist. Controvers. Græc. et Lat. de Process. Spirit. Sancti* (Jena, 1761). Walch was a preacher as well as a scholar, and his interest in preaching is attested by a *Sammlung kleiner Schriften v. d. gottgefälligen Art zu predigen* (1746). Despite his growing decrepitude, he was able to complete his *Biblioth. Patr.* He died in 1775. See Walch [C. W. F.], *Leben u. Charakter von Dr. J. G. Walch* (Jena, 1777, 4to); Meusel, *Lexikon verstorbener deutscher Schriftsteller*, xiv, 360; Döring, *Theologen Deutschlands im 18. u. 19. Jahrhundert*, iv, 615.—Herzog, *Real-Encyklop.* s. v.

**Wald, Samuel Gottlieb**, a Protestant theologian of Germany, was born at Breslau, Oct. 17, 1762. He studied at Halle and Leipsic. In the latter place he received the degree of master on presenting a dissertation *Curarum in Historiam Textus Vaticanorum Danielis Specimen Primum*, and was thus entitled to lecture publicly. Being a pupil of Semler, Wald followed his master in the grammatico-historical interpretation of the Scriptures. In 1786 he was called as professor of Greek to Königsberg, and in 1793 the University of Erlangen made him doctor of theology on presenting a dissertation *De Vita, Scriptis et Systemate Mystico Sebastiani Franci*. For more than twenty years, Wald labored as teacher and preacher in Königsberg, and died Feb. 22, 1828. He published, *Progr. Spicilegium*

*Variarum Lectionum Codd. IV Veleris Testamenti Hebr. Vratislaviensium* (Lips. 1784):—*M. A. Flaminii in Librum Psalmorum Brevis Explanatio . . . Curavit et Præfatus est* (Hale, 1785):—*Progr. Controversio de Bonorum Operum Necessitate inter Musculum et Prætorium Agitata* (Lips. 1786):—*Theologie Symbolica Lutherana Descriptio* (Hale, eod.):—*De Vituperio Neologorum* (Regiom. 1787):—*Diss. de Vera Vi Vocabulorum ὁσιος et ἁγίου in Epistola Pauli ad Romanos* (ibid. 1788), etc. See Döring, *Die gelehrten Theologen Deutschlands*, iv, 647 sq.; Fürst, *Bibl. Jud.* iii, 491. (B. P.)

**Wald, Wilhelm**, a Protestant theologian of Germany, was born March 8, 1795, at Königsberg, where he also died, Nov. 6, 1879, as superintendent and doctor of theology. In 1826 he was appointed pastor of the Haberberger Church in his native place, where he labored for fifty-two years. His literary productions are some *Sermons*, which were printed by request. See *Neue evangel. Kirchenzeitung*, 1879, p. 739 sq. (B. P.)

**Waldau, Georg Ernst**, a Protestant theologian of Germany, was born March 25, 1745, at Nuremberg. He studied from 1763 to 1767 at Altdorf and Leipsic. After completing his studies, he returned to his native place, where he was appointed vicar of St. Clara's. In 1789 he was made professor of Church history, and occupied that position until his death, April 27, 1817. He wrote, *Dissertatio Exegetica ad Apoc. iii, 7* (Lips. 1767). *Usus Versionis Alexandrinae in Interpretatione Novi Testamenti* (Altdorf, 1770):—besides, he published sermons, ascetical works, etc. See Döring, *Die gelehrten Theologen Deutschlands*, iv, 650 sq.; Winer, *Handbuch der theol. Lit.* (Index in vol. ii); Koch, *Gesch. des deutschen Kirchenliedes*, vi, 224 sq. (B. P.)

**Waldegrave, Samuel**, an Anglican prelate, son of the eighth earl of Waldegrave, was born in 1817. He received a careful religious training; graduated at Balliol College, Oxford, in 1839, taking double first-class honors; and was admitted into holy orders in 1842 at Oxford, and ordained to the curacy of St. Ebbe's in that city. In 1849 he was elected fellow of All-Souls', and in 1853 was appointed Bampton lecturer. In 1857 he was appointed canon of Salisbury Cathedral, and in 1860 was called to preside over the diocese of Carlisle, which office he held until his death, Oct. 1, 1869. Bishop Waldegrave was humble and devoted, an excellent pastor, and an indefatigable worker. He published, among other works, *The Way of Peace, or Teaching of Scripture concerning Justification* (Lond. 1848), in four sermons at Oxford:—*New Testament Millenarianism* (1866):—and *Words of Eternal Life* (1864), eighteen sermons.

**Walden, Charles**, proceeded as a Wesleyan Methodist missionary to Western Africa in December, 1840. It was only for a brief season that the infant Church at Cape Coast enjoyed the advantage of his earnest ministry of the Word, his pastoral affection, and his pious example. He died July 29, 1841. See *Wesleyan Conference Minutes*, 1842.

**Waldenses, THE**, known also in ecclesiastical history as *Valdenses*, and sometimes as *Vaudois*. Two theories have been broached to account for the origin of the name—the one that it is derived from Peter Waldo, the Lyonnese reformer; and the other that it is derived from "vallis," a valley, the Valdenses or Waldenses being inhabitants of the valleys of Piedmont. Waddington, in his *History of the Church*, has given the authorities for both these theories.

I. *Doctrines*.—The doctrinal views of the Waldenses agree essentially with those of the Reformers of the 16th century. W. Carlos Martyn, in his *History of the Huguenots*, thus states their doctrinal tenets:

1. The Waldenses, or Vaudois, hold the Holy Scriptures to be the sources of faith and religion, without regard to the authority of the fathers or to tradition; and though they principally use the New Test., yet, as Usher proves from Reinier and others, they regard the

Old also as canonical Scripture. From their greater use of the New Test., their adversaries charged them, however, with despising the Old Test.

2. They hold the entire faith according to all the articles of the Apostles' Creed.

3. They reject all the external rites of the dominant Church excepting baptism and the sacrament of the Lord's supper; as, for instance, temples, vestments, images, crosses, pilgrimages, the religious worship of the holy relics, and the rest of the Roman sacraments; these they consider as inventions of Satan and of the flesh, full of superstition.

4. They reject the papal doctrine of purgatory, with masses or prayers for the dead, acknowledging only two terminations of the earthly state—heaven and hell.

5. They admit no indulgences nor confessions of sin, with any of their consequences, excepting mutual confessions of the faithful for instruction and consolation.

6. They hold the sacraments of baptism and of the eucharist to be only symbols, denying the real presence of Christ in the bread and wine, as we find in the authoritative book of the sect concerning antichrist, and as Ebrardus de Bethunia accuses them in his book *Antitheresis*.

7. They hold only three ecclesiastical orders—bishops, priests, and deacons; other systems they esteem mere human figments; that monasticism, now in great vogue, is a putrid carcass, and vows the invention of men; and that the marriage of the clergy is lawful and necessary.

8. Finally, they denounce Rome as "the whore of Babylon," deny obedience to the papal domination, and vehemently repudiate the notions that the pope has any authority over other churches, and that he has the power either of the civil or the ecclesiastical sword.

II. *History of their Persecutions*.—That Peter Waldo (q. v.) became intimately associated with the already existing Waldenses there is no doubt. Among the simple inhabitants of the Piedmont valleys, he found those who sympathized with him in his religious sentiments and practices. So general and wide-spread became the so-called heresy that Innocent III, one of the proudest and most bigoted of the Roman pontiffs, determined to crush it out—"exterminate the whole pestilential race" was the language of which he made use. The commission he gave to the authorities, who knew no law above that which went forth from St. Peter's, was to burn the chiefs of the Vaudois, to scatter the heretics themselves, confiscating their property, and consigning to perdition every soul who dared to oppose the haughty mandate of the pope. How these commands of his holiness were carried out history is a faithful witness. Joined with him in his relentless persecution of the Waldenses was Dominic, the father of the Inquisition, the prime article in whose creed came to be that it was a crime against God and the Church to keep faith with heretics. For many years, however, the inhabitants of the more secluded valleys and fastnesses escaped the storms of persecution, and it was not until towards the close of the 14th century that the vengeance of their relentless foes reached this class of the Waldenses, and multitudes perished, victims of the fierce storm of wrath which was poured out on their once peaceful homes. With but few intervals, all through the 16th and 17th centuries, Rome did not cease in her cruel endeavors to exterminate the hated rebels against her authority. Vast numbers of the sufferers from the papal policy of extirpating the Reformed faith, in France and other countries, fled to these secluded valleys of Piedmont, hoping, in places inaccessible to their enemies, to escape from their pitiless wrath. But the seasons of tranquillity were short; and when the tempest broke forth again, it seemed to be with tenfold fury. It was in vain that Protestant nations ap-

pealed to the dukes of Savoy to put a stop to the persecutions of the emissaries of the pope. They were appeals made to men who dared not face the ire of Rome.

In 1560 commenced one of those dreadful outbursts of the Church's rage against these humble, earnest Waldenses. We are told that, "the population of the valleys still remaining faithful to the religion of their forefathers, the sword was openly unsheathed and the scabbard thrown away. An armed force, commanded by a chief whose name was in terrible contrast with his character—the count de Trinité—poured into the proscribed territory. But a Spirit stronger than the sword upheld the Waldenses, and an arm more powerful than that which assailed them fought on their side. The villages near the plains were deserted; the women, the children, the feeble and the aged, were sent for refuge to the heights of the mountains, to the rocks, and to the forests. Every man and boy who could handle a weapon planted himself against the invaders, and a successful guerilla warfare was carried on by small brigades of peasants against the veteran troops that were let loose upon them. Greater exploits and instances of more enduring fortitude were never recounted than those which have immortalized the resistance offered by the Waldenses to their oppressors."

In 1655 the persecution raged again, and if all the Protestant powers of Europe had not interposed, a complete annihilation of the Waldenses would have been the result. The blood of John Milton was stirred by the story of the barbarous treatment to which they were subjected, and through his influence Cromwell issued one of those mandates which foreign powers had been compelled to respect. A few years of comparative rest were succeeded by another storm of persecution, which burst upon them under the administration of Victor Amadeus, the duke of Savoy, stirred up by France and Rome to make one more effort to exterminate the hated heretics; and the effort was well-nigh successful, for it is said that "during three years and a half the exercise of the ancient religion of the Waldenses had to all appearance ceased in Piedmont." But after the lapse of two or three years, in 1689 several hundreds of them, who had been driven into exile, returned, and the fortunes of the duke of Savoy having undergone a change, he now craved the help of those who had been such severe sufferers at his hands. The account of this campaign by their devoted pastor and leader, Henri Arnaud (q. v.), is one of the most thrilling passages of history in any age.

Such has been the history of the Waldenses all through the ages—subject to untold suffering from persecution; then enjoying, in the quiet valleys of Piedmont, comparative tranquillity for a time; then assailed by their ever-relentless foe, the Roman Catholic Church, which has spared no pains, by fire and slaughter, and the horrors of the Inquisition, to put an end to the unfortunate victims of their violence. While Napoleon was emperor, in common with all his subjects, they were tolerated in the exercise of their religious rights; but when the house of Savoy was again in possession of their ancestral domains, the old persecuting spirit was revived, for, however just and inclined they might be to be tolerant, there was a power behind the throne whose authority was supreme—the power of the ancient foe of the dwellers in the valleys of Piedmont, the pope of Rome.

III. *Present Condition.*—At last came what, to the down-trodden Waldenses, must have been their "year of jubilee"—the year 1848—when, for the first time in all their long and sadly eventful history, full liberty to worship God according to the dictates of their own conscience was accorded to them by Charles Albert. Everywhere they could settle in Italy, and not be molested in the enjoyment of their religious faith. From Turin, which had been the seat of their operations, they wished to remove to Florence. Ten years, however,

must elapse before they could take this step, but they were years of preparation to enter upon the evangelistic work which the Waldensian Church was to undertake in Italy. In 1859 the dominions of king Victor Emmanuel embraced nearly all Southern Italy, except the Papal States, and now toleration of religion was allowed everywhere, and the time had come when the Waldensian Church could establish its headquarters in Florence. Thither, in May, 1860, the Vaudois Synod decided to remove its theological school; and the next autumn the two professors, Revel (so well known in America) and Geymonet, with eight pupils, took up their residence in the Palazzo Salviati, once the mansion of an archbishop of Florence, and so utilized every part of the spacious building that they secured for their work not only a college with convenient class-rooms, but also a chapel capable of holding three or four hundred hearers, rooms for their families, rooms for preparatory school-work, and a suitable place to set up the printing-press which they had brought from Turin. From the Salviati Palace, as a centre of operation, the Waldensian Church has sent forth the missionaries of the Cross in all directions. The college and preparatory schools are still among the valleys of Piedmont. Students who propose to engage in missionary labors as fast as they are educated at La Tour, the seat of the Waldensian college, are transferred to the theological school at Florence, there to receive their special training for their future work. The press also has proved a most efficient helper in giving the pure Gospel to Italy. First of all, there was issued from it a stereotyped edition of Diodati's translation of the Bible in Italian in the 16th century. In 1862 there were sent out, under the direction of the Religious Tract Society, 53,967 copies of religious works, large and small. Among these were *Il Primato del Papa*, 3000; *Differenza fra il Protestantismo e Romanismo*, 2000; *Il Corpo di Grazia*, 10,000; and *Fischia ma non Bussi*, 7000. The next year the number was considerably more than doubled, being not far from 120,000 copies, including *Dialoghetti di De Sanctis*, 78,000; *Va a Gesù*, 3000; and *De Sanctis, Lettere al Cardinal Patrizi*, 3000. Among the books sent out in 1864 were *Sermoni del Rev. C. H. Spurgeon* (8 vols.), 3000 each. The total for the three years was nearly 224,000 copies. Standard English books translated into the Italian have a large circulation. In one year 10,000 copies of *The Pilgrim's Progress* were circulated in Italy. From the last available statistics, it appears that all the higher Waldensian seats of learning were in a prosperous condition. Four journals were published at Florence, one in French. There were 10 mission stations, with 50 out-stations which receive more or less attention. In the different churches are over 2000 converts. They have also their hospitals and schools. In Rome itself they have a place of worship and schools of various kinds. With the progress of religious freedom in all parts of Italy, and the toleration which is everywhere pledged to Christians of all names, it cannot be doubted that, with the blessing of Heaven, a prosperous future is before the Waldensian Church.

IV. *Literature.*—References to the Waldenses are very numerous. All writers of ecclesiastical history dwell more or less upon the record of their sufferings. See Baird, *The Waldenses, Albigenses, and Vaudois* (Phila. 1848); *L'Israel des Alpes* (Paris, 1851, 4 vols.); [Anonymous], *Sketches of the Evangelical Christians of the Valleys of Piedmont* (Phila. 1853); Wylie, *The Awakening of Italy and the Crisis of Rome* (a publication by the American Tract Society); Adam, *The Glorious Recovery by the Vaudois of their Own Valleys* (Lond. 1827, 8vo), from the original of Henri Arnaud; Beattie, *The Waldensian or Protestant Valleys of Piedmont* (illustr. by Bartlett and Brockdon, ibid. 1838, 4to); *Histoire des Vaudois, ou des Habitans des Vallées Occidentales du Piémont*, etc. (Paris, 1796, 2 vols. 8vo); Charvas, *Origine dei Valdesi e Cavarere delle Primitive Dottrine*, versione di G. F. Muratori (Torino, 1858, 8vo); Faber

*An Inquiry into the History and Theology of the Ancient Waldenses and Albigenses* (Lond. 1838, 8vo); Gilly, *Waldensian Researches, being a Second Visit to the Vaudois of Piedmont* (ibid. 1831, 8vo); Lowther, *Brief Observations on the Present State of the Waldenses* (ibid. 1821, 8vo); Martin, *Histoire des Vaudois des Vallées du Piémont et de leurs Colonies, depuis leur Origine jusqu'à nos Jours* (Paris, 1834, 8vo); Goll, *Verkehr der böhmischen Brüder mit den Waldensern* (Prague, 1877). (J. C. S.)

**Waldensis, THOMAS, D.D.**, a learned English Carmelite, was born at Walden, in Essex, about 1367. His father's name was *John Netter*, but he chose to be called from the place of his nativity. He became the champion of the Church against the Reformers of the reign of Henry IV; and in that of Henry V, whose favorite he was, he rose to be provincial of his order and a privy-councillor. Henry V died in his arms; and he himself died while attending the youthful monarch, Henry VI, in France, in 1430.

**Waldhausen, KONRAD VON**, an Augustinian monk of the 14th century, who ranks as one of the precursors of John Huss (q. v.). He was a native of Austria, and labored from 1345 to 1360 in Vienna as a preacher. His fame and influence as a powerful preacher of repentance led to his being called to Leitmeritz, in Bohemia, by the emperor Charles IV, acting in his capacity as king of that country. He soon afterwards began to hold services in the Church of St. Gall at Prague, and subsequently in the public market-place of the city. His efforts were directed towards a moral and religious improvement of the people, but did not assail either the doctrines or the fundamental rules of discipline of the Church. But as his influence increased, and multitudes thronged to his meetings to listen to his bold denunciations of all forms of sin, some opposition began to manifest itself; and when he attacked the orders of mendicant friars and uncovered the hypocrisy and depraved character of the monks, he drew down upon himself the vengeance of those powerful enemies. Twenty-nine charges were laid against him before the archbishop of Prague, by Dominican and Franciscan monks, in 1364; but no complainant appeared at the trial consequently ordered, and Waldhausen succeeded in establishing a satisfactory defence. Effort was made in the same year, by the archbishop of Austria, to recall Waldhausen to Vienna, but ineffectually. He died in Prague in 1369. See Palacky, *Gesch. d. Böhmen*, iii, 1, 161 sq.; 225, note; Jordan, *Vorläufer d. Hussitenthums in Böhmen*; Neander, *Kirchengesch.* vol. vi; Herzog, *Real-Encyklop.* s. v.

**Waldo, Daniel**, a Congregational minister, was born in Windham, Conn., Sept. 10, 1762, and was a graduate of Yale College in the class of 1788. For a time he served as a soldier in the Revolutionary army; he was taken prisoner, and imprisoned by the British in the Sugar House, New York, barely escaping with his life. He was ordained pastor of the Church in West Suffolk, Conn., May 24, 1792, remaining there seventeen years (1792-1809), acting also, a part of the time, as a missionary in Pennsylvania and New York. After preaching in Cambridgeport, Mass., for about a year (1810-11), he performed missionary service in the destitute sections of Rhode Island until 1820, organizing a Congregational Church in East Greenwich and another at Slatersville. He preached for a time at Harvard, Mass., and for twelve years at Exeter, R. I. Afterwards he resided in Syracuse. At the advanced age of ninety-three he was elected chaplain to Congress, and died July 30, 1864, having reached the great age of a hundred and two years. See *Memorials of R. I. Congregational Ministers*. (J. C. S.)

**Waldo, Horatio**, a Presbyterian minister, was a native of Coventry, Conn. He graduated at Williams College in 1804; was a tutor in the college in 1806-7; settled as pastor of the Church in Griswold, Conn., in 1810; resigned his pastoral charge in 1830; and re-

moved to Portage, N. Y., where he died in 1846, aged sixty-nine. See Sprague, *Annals of the Amer. Pulpit*, iv, 630.

**Waldo, Nathan**, a Congregational minister, received the honorary degree of A.M. from Dartmouth College in 1803; was ordained pastor of the church in Williamstown, Vt., in 1806; and died in 1832. See Sprague, *Annals of the Amer. Pulpit*, ii, 269.

**Waldo (or Valdo), Peter**, the founder or ally of the Vaudois or Waldenses (q. v.), a body of Christians who separated themselves from the Church of Rome in the 12th century, was born at Vaux, in Dauphiny, on the banks of the Rhone. He acquired a large fortune by commercial pursuits in Lyons, France; and when he resolved to retire from business, not only devoted himself to the spiritual instruction of the poor, but distributed his goods among them, and in all respects treated them as his children or brothers. The only translation of the Bible then in use was that made by Jerome, called the Latin Vulgate; but Waldo, who was a learned as well as a benevolent man, translated the four gospels into French, this being the first appearance of the Scriptures in any modern language. The possession of these books soon discovered to Waldo and his people that the Church was never designed to be dependent on a priesthood, even for the administration of the sacraments; and his instruction, boldly followed by practice, became so obnoxious to the Church that he was first persecuted by the archbishop of Lyons, and at length anathematized by the pope. No longer safe at Lyons, Waldo and his friends took refuge in the mountains of Dauphiny and Piedmont, and there formed those communities which grew in peace and flourished in rustic simplicity "pure as a flower amid the Alpine snows." From these mountains and valleys the simple doctrines of Christianity flowed out in multiplied rivulets all over Europe. Provence, Languedoc, Flanders, Germany, one after another tasted of the refreshing waters, until, in the course of ages, they swelled into a flood which swept over all lands. Waldo is understood to have travelled in Picardy, teaching his Reformation doctrines hundreds of years before Luther was born. He finally settled in Bohemia, where he died in 1179, the same year in which his tenets were denounced by an oecumenical council. The Waldensian Church was a light on the mountains during the Dark Ages, and, amid all the corruptions of the Church, it held its open Bible and pure doctrines; and that same Church still survives, the basis of all reformatory movements in Italy. (W. P. S.)

**Waldron, Isaac**, an English Wesleyan minister, began his itinerant labors among the Methodists of England in 1760, and died (according to Hill) in 1782. He was not eminent either for piety, gifts, or usefulness. His natural disposition was crooked. He died in obscurity. See Atmore, *Meth. Memorial*, s. v.

**Waldron, William**, a Congregational minister, was the son of captain Richard Waldron, of Portsmouth, N. H., and grandson of major Richard Waldron, of Dover, who was murdered by the Indians in 1689, at the age of eighty years. William was born in Portsmouth, N. H., Nov. 4, 1697, and graduated from Harvard College in 1717. When the New Brick Church in Boston was founded, he became its minister, being ordained May 22, 1722. He died Sept. 11, 1727. See Sprague, *Annals of the Amer. Pulpit*, i, 316.

**Waldschmidt, JOHN**, a German Reformed minister, was born in Nassau, Germany, in 1724, and came to America in 1752. He was pastor of the churches at Cocalico, Weisenland, Mode Creek, and Zelteneich, Pa., from 1752 to 1786. He also supplied Tulpehocken (1756-58) and Heidelberg (176--70). He died in 1786. See Corwin, *Manual of the Ref. Church in America*, s. v.

**Wale.** See WALKER.

**Walenburg, PETER and ADRIAN**, two brothers, born at Rotterdam in the 17th century, who abandoned

their country and their religion and lived at Cologne. The first was a titular bishop in Myria, and suffragan to Cologne; the other was the titular bishop to Adrianople, and suffragan to Mayence. Their works consist chiefly of controversial pieces against the Protestants, and were printed together under the title of *Fratrū Waleburgicorum Opera* (1670, 2 vols. fol.).—Mosheim, *Hist. of the Church*, bk. iv, cent. xvii, § ii, pt. i, ch. i.

**Wales, Christianity in.** The ancient British Church having been founded at a very early period and entirely independent of the Church of Rome, the Roman and Anglo-Saxon churches were hostile towards the Christian Britons, who were obliged to take refuge in the mountainous districts of Wales, where they gradually diminished in numbers and finally became extinct. For centuries following ignorance and superstition overspread the entire principality, until the Reformation in the 16th century reached Wales through England. Gospel truth spread rapidly among the mountaineers, and its benefits were noticeable among all classes. But in the time of the Stuarts the Welsh peasantry, who had once been characterized by a simple scriptural piety, began to degenerate both in religion and morals. Ignorance and vice prevailed to a melancholy extent. Hardly any of the peasantry could read. Both clergy and laity were at once ignorant and immoral. When John Wesley visited Wales, he declared the people to be "as little versed in the principles of Christianity as a Creek or Cherokee Indian." But he also declared them to be "ripe for the Gospel, and most enthusiastically anxious to avail themselves of every opportunity of instruction." The Church of England was fully organized, but seemed utterly incapable of accomplishing the work of elevating the masses above the low condition into which they had fallen. Rev. Griffith Jones, however, by establishing a system of education—now known as the Welsh circulating schools—began a moral revolution, which has accomplished great good. He was instrumental in establishing 3495 schools, in which 158,287 scholars were educated. For the further progress of the work, see Skeats, *Hist. of the Free Churches of England*, p. 392 sq. See WELSH CALVINISTIC METHODISTS.

**Wales, Eleazer**, a Presbyterian minister, was born in Massachusetts, and graduated at Yale College in the class of 1727. He was ordained and settled at Allentown, N. J., in 1730. He remained here but a short time, and accepted a call from the Presbyterian Church at Crosswicks. In consequence of inadequate support, he asked leave of the Philadelphia Presbytery to resign, which, on due consideration, was granted. He was called to Millstone, N. J., Sept. 19, 1735, and joined the East Jersey Presbytery, in the bounds of which it lay. He was one of the first members of the New Brunswick Presbytery, and the only New-Englander besides Treat who was excluded by the Protest. Whitefield and Brainerd both speak of him in their journals in favorable terms. He died in 1749.

**Wales, Elkanah**, an English clergyman of the Established Church, was born in 1588; was for fifty years minister of Pudsey, Yorkshire, whence he was ejected in 1662; and died in 1669. He published a sermon entitled *Mount Ebal Levelled, or Redemption from the Curse*, with a *Life of the Author*.

**Wales, John**, a Congregational minister, was born at Braintree, graduated from Harvard College in 1728. He was ordained pastor of the Church in Raynham, Bristol Co., Mass., in 1731; and died in 1755, at the age of sixty-six years. See Sprague, *Annals of the Amer. Pulpit*, i, 710.

**Wales, Samuel, D.D.**, a Congregational minister, son of Rev. John Wales, of Raynham, Mass., was born in March, 1748. He graduated from Yale College in 1767; for a short time was a teacher in Dr. Wheelock's Indian School in Lebanon, Conn.; in 1769 was elected a tutor in Yale College, and remained in that position

for one year; was ordained pastor, Dec. 19, 1770, of the Church in Milford, Conn. For a short time, in 1776, he served as chaplain in the Continental army. In September, 1781, he was appointed professor of divinity in Yale College, but was not inducted into office until June 12, 1782. Soon after this he became the subject of an alarming malady—an affection of the nervous system. In May, 1786, he went to Europe for the benefit of his health, but returned after an absence of six months, without any marked improvement. His professorship ceased in 1793. His pulpit eloquence was of a high order, and he was esteemed as one of the ablest preachers of his day. He died in New Haven, Conn., Feb. 18, 1794. See Sprague, *Annals of the Amer. Pulpit*, i, 710.

**Walfadur**, in Norse mythology, was a surname of *Odin*, who was the father (master) of all the slain in battle, because the surviving in battle tarried with him.

**Walford, WILLIAM**, an English Dissenting minister, was born at Bath, Jan. 9, 1773, and was some time tutor in Homerton College. He published, *The Book of Psalms, a New Translation, with Notes Explanatory and Critical* (Lond. 1837):—*Curæ Romanæ*:—*Notes on the Epistle to the Romans, with a Revised Translation* (ibid. 1846). He died at Uxbridge, Jan. 22, 1850.

**Walgino**, in Slavonic mythology, is a god, protector of domestic animals, worshipped by the Poles.

**Walhalla**, in Norse mythology, is the golden palace in the kingdom of *Odin* where all heroes slain in battle assembled. Everything known by Northern heroes as luck and blessedness was to be found in Walhalla. *Hermode* and *Braga* received them in the *Glasor* forest, bearing gold leaves, which led the way to the palace reaching up to heaven. In this palace were waiting the most ravishing, blooming maidens—the *Walküren*—where also was spread for them a table of bacchanalian abundance. But there are also in store for them war, victory, and death; because *Odin* will employ the heroes in order to resist *Surtur's* army and the inhabitants of *Muspelheim* on the day of the destruction of the world.—Vollmer, *Wörterb. d. Mythol.* s. v. See NORSE MYTHOLOGY.

**Wali**, in Norse mythology, is the son of the evil *Loke*. After *Loke* had caused the death of *Baldur*, he was caught in the *Faranger-trap* as a lynx. Then *Wali* was changed into a wolf, and he tore to pieces his brother *Narwi*, with whose intestines *Loke* was bound. Another *Wali* is also called *Ali*.

**Walk** (prop.  $\text{לָכַח}$  or  $\text{לָכַח}$ , *περιπατώ*). The Hebrew verb not only signifies to advance with a steady step, but also to augment a moderate pace until it acquires rapidity. It is used in this sense by the evangelical prophet with the greatest propriety in the following passage: "Even the youths shall faint and be weary, and the young men shall utterly fall: but they that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be weary; and they shall walk, and not faint" (Isa. xl, 30, 31).

Walking for the sake of exercise is rarely practiced in the East; indeed, the indolent Orientals are quite unable to comprehend the conduct of Europeans in walking for mere recreation, without any immediate purpose of business. They attribute this to a spirit of restlessness which they believe to be a kind of curse inflicted upon Christian nations; and, in a dispute between Turks, it is not uncommon for one of the parties, as his worst execration, to wish that his opponent should be condemned "to walk like a Frank." Among the females, this dislike of locomotion is carried to a still greater extent, and there is scarcely any epithet which would be more offensive to a Turkish or Persian lady than to be called "a walker." This appears also to have been the case with the Egyptian ladies, for there are but few instances of their being represented on the monuments

Walking-sticks found at Thebes. 2 is of cherry-wood, in Mr. Salt's collection; 3 shows the peg at the side.

in walking attitudes. Wilkinson observes (*Anc. Egypt.* ii, 347, 348):

"When walking from home, Egyptian gentlemen frequently carried sticks, varying from three or four to about six feet in length, occasionally surmounted with a knob imitating a flower, or with the more usual peg projecting from one side, some of which have been found at Thebes. Many were of cherry-wood, only three feet three inches long; and those I have seen with the lotus head were generally about the same length. Others appear to have been much longer: the sculptures represent them at least six feet; and one brought to England by Mr. Madox was about five feet in length. Some were ornamented with color and gilding. On entering a house, they left their stick in the hall or at the door: and poor men were sometimes employed to hold the sticks of the guests who had come to a party on foot, being rewarded by the master of the house for their trouble with a trifling compensation in money, with their dinner, or a piece of meat to carry to their family. The name of each person was frequently written on his stick in hieroglyphics, for which reason a hard wood was preferred, as the acacia, which seems to have been more generally used than any other; and on one found at Athribis the owner had written, 'O my stick, the support of my legs,' etc.

Priests and other Persons of Rank Walking with Sticks. (From Thebes.)

*Walk* is often used in Scripture for conduct in life, or a man's general demeanor and deportment. Thus we are told that Enoch and Noah "walked with God;" that is, they maintained a course of action conformed to the will of their Creator, and acceptable in his sight; drawing near to him by public and private devotions; manifesting, by their piety, a constant sense of his presence, and by their purity of life a reverence for the moral laws which he had established for the guidance of his creatures. In many parts both of the Old and New Test. we find God promising to walk with his people; and his people, on the other hand, desiring the influence of God's Holy Spirit, that they may walk in his statutes. "To walk in darkness" (1 John i, 6, 7) is to be involved in unbelief, and misled by error; "to walk in the light" is to be well informed, holy, and happy; "to walk by faith" is to expect the things promised or threatened, and to maintain a course of conduct perfectly consistent with such a belief; "to walk after the flesh" is to gratify the carnal desires, to yield to the fleshly appetites, and be obedient to the lusts of the flesh; "to walk after the Spirit" is to pursue spiritual objects, to cultivate spiritual affections, to be spiritually minded, which is life and peace.

By a somewhat different figure, the pestilence is said to walk in darkness, spreading its ravages by night as well as by day. God is said to walk on the wings of

the wind, and the heart of man to walk after detestable things.

**Walker, Aldace, D.D.**, a Congregational minister, was born in Strafford, Vt., July 20, 1812. He was prepared for college at Kimball Union Academy, and graduated at Dartmouth College in 1837. From here he went to Brattleborough, and remained as principal of its High-school for one year, until 1838, at which time he entered Yale Theological Seminary, where he remained until 1839. He then entered Andover Theological Seminary, and, after remaining one year in study, graduated in 1840. He was ordained at West Rutland, Vt., Dec. 30, 1840, where he preached for twenty-two years, and was dismissed Aug. 26, 1862. He then became acting pastor at Wallingford, Vt., in 1862, until installed there, March 10, 1869, in which office he remained until his death. He was disabled from service and resigned in January, 1877, but his Church did not accept. He was a trustee of Middlebury College from 1853; corporate member of the American Board of Commissioners for Foreign Missions from 1873. He was register of the General Convention of Vermont from 1856 to 1870, and a member of Fairbank's Board of Education from its first appointment in 1856. He died of general debility, July 24, 1878. (W. P. S.)

**Walker, Alexander Waddell**, a minister in the Methodist Episcopal Church, South, was born in Charleston, S. C., Jan. 22, 1815. He received a good grammar-school education; spent much of his early manhood in marble-working, displaying both skill and taste; was converted in 1830, and was admitted into the South Carolina Conference in 1834, and for twenty-three years did efficient work on circuit, mission, and station, in the up-country and in the lowlands, in the miasma of the swamps and rice-fields, and in the bracing air of the mountains, to the white man and to the black, to the polite and refined, and to the rude and un-

cultivated. In 1857 Mr. Walker settled at Spartanburg as supernumerary, and in 1861 enlisted in the Confederate army and served two years. He died in 1870. Mr. Walker was distinguished for purity and honesty of character, for sincerity, kindness, and generosity of heart, for modesty, constancy, courage, and conscientiousness. See *Minutes of Annual Conferences of the M. E. Church, South*, 1870, p. 419.

**Walker, Augustus**, a Congregational missionary, was born in Medway, Mass., Oct. 30, 1822. He was converted at the age of twelve; followed mercantile pursuits in Charleston, S. C., and Baltimore, Md.; prepared for college at Leicester Academy, and graduated at Yale in 1846. In 1852 he graduated at Andover Theological Seminary, was married and ordained, and in the following year sailed for Smyrna, Turkey—Diarbekir, on the Tigris, being the field designated for him. Here he labored hard and successfully the remainder of his life, except from 1864 to 1865, when he visited his native land. He was welcomed with much joy by his friends and the natives upon his return to Diarbekir. But his work was nearly done. His exhausted and overworked body was stricken with the cholera, and, in spite of all that could be done, he died, Sept. 13, 1866. Mr. Walker did a noble and enduring work on the banks of the Tigris, and his death was felt severely both in

Turkey and America. "He fell where the standard-bearer wishes to fall, at his post, doing manfully, earnestly, even beyond his strength, the work given him to do." See *Cong. Quar.* 1867, p. 202 sq.

**Walker, Benjamin M.**, a Methodist Episcopal minister, was born at Springfield, Vt., April 26, 1809; was converted in 1830; licensed to preach in 1831; and joined the New England Conference in 1834. On the division of the conference he became a member of the Providence Conference. His appointments were as follows: Barnstable, Mansfield, Franklin, Scitico, Tolland, Glastenbury, Wapping, North-west Bridgewater, Woodstock, Square Pond, Norwich Falls, Eastford, South Coventry, West Thompson, South Glastenbury, Wapping, Moosup, Staffordville, Tolland, Windsorville, and Quarryville, where he died, March 28, 1871. Mr. Walker was a man of great devotedness, faith, and zeal. See *Minutes of Annual Conferences*, 1872, p. 37.

**Walker, Charles, D.D.**, a Congregational minister, was born in Woodstock, Conn., Feb. 1, 1791, and died in Binghamton, N. Y., Nov. 28, 1870. At about the age of seventeen years he attended one term at the Academy at Thetford, his education being largely obtained by his own efforts. Subsequently he became a teacher. In 1815 he was converted and united with the Church, and in the year following turned his attention towards the ministry. In September he began to teach at Cherry Valley, N. Y., remaining one year, and then entering the Academy at Plainfield, N. H. In 1818 he entered the Theological Seminary at Andover, and, graduating in 1821, went immediately to New York city, to preach under the direction of the Seaman's and the Evangelical Missionary societies of that city. Going to Central New York, in the year after, he received ordination from the Otsego Presbytery, Feb. 27, at Norwich. After this he preached three months in Lebanon, N. H.; and then, Jan. 2, 1823, after having served there temporarily, was installed pastor of the Church in Rutland, Vt., and served there until 1833. He was trustee of Burr Seminary, Manchester, Vt.; a director of Vermont Domestic Missionary Society, and a warm temperance advocate. In consequence of bronchial trouble he was forced to abandon the pulpit for a time, and took charge of a seminary in Castleton, Vt., for one year (1834). During part of 1834 he supplied the Pine Street Church in Boston, and Jan. 1, 1835, was installed pastor of the Church in Brattleborough, Vt., in which position he remained until Feb. 11, 1846. In 1846 he accepted a call to Pittsford, Vt., and was installed Dec. 2, and resigned in 1864. Though not a brilliant preacher, his style was singularly clear and chaste. He received the honorary degree of A.M. from the University of Vermont in 1823, and from Middlebury and Dartmouth colleges in 1825. The degree of D.D. was bestowed by the University of Vermont in 1847. He was elected one of the corporation of Middlebury College in 1837, and of the American Board of Foreign Missions in 1838. He died while on a visit to his daughter at Binghamton, N. Y. See *Cong. Quar.* 1871, p. 357.

**Walker, Charles S.**, a minister in the Methodist Episcopal Church, South, was born in Charleston, S. C., Jan. 22, 1815; experienced religion in 1830; and entered the South Carolina Conference in 1834. In 1855 he was made supernumerary; in 1856 was appointed agent for Wofford College; and died Jan. 18, 1857. Mr. Walker was a man of stern integrity, sound judgment, and high moral courage. See *Minutes of Annual Conferences of the M. E. Church, South*, 1857, p. 776.

**Walker, Edward P.**, a Presbyterian minister, was born in Amesville, O., in 1834. He entered Marietta College, O., in 1852, where he graduated in 1856. He studied theology in Andover Seminary, and was licensed by Athens Presbytery in 1859. He died Dec. 27, 1861. See Wilson, *Presb. Hist. Almanac*, 1863, p. 310.

**Walker, Elkanah**, a Congregational minister,

was born in Yarmouth, Me., Aug. 7, 1805. He received his preparatory education at Kimball Union Academy. He graduated at the Bangor Theological Seminary in 1837, and was ordained at Brewer, Me., Feb. 14, 1838. In March he set out for the Oregon mission of the American Board of Commissioners for Foreign Missions, and was four months in traversing the wilderness from Missouri. He was stationed at Tshimakain until 1848, when the Indian massacre and troubles necessitated his removal to Fort Colville. After 1849 he resided at Forest Grove, often acting as pastor there, and at Hillsborough and other neighboring villages. He was trustee of the Tualatin Academy and Pacific University, and from 1847 was President of the Oregon Bible Society. He died at Forest Grove, Nov. 21, 1877. (W. P. S.)

**Walker, Elnathan**, a Presbyterian minister, was born at Taunton, Mass., Feb. 18, 1780. He was fitted for college at the Academy in his native town, and was a graduate of Brown University in the class of 1803. After leaving college, he made a public profession of his faith in Christ, and united with the Congregational Church in Dighton, Mass. He commenced soon after this the study of theology with Rev. Dr. Emmons, of Franklin, and was ordained Oct. 25, 1809, and, at the same time, was installed pastor of the Presbyterian Congregation in Homer, N. Y., where he remained until his death. At one time there was a little restiveness on the part of a few persons in his Church, and the question of his dismissal was agitated. He interposed no objection, and consented to the calling of a council to consider the matter. It was said that "the moderator opened the session with a prayer of peculiar fervor and earnestness, especially praying for the movers of so responsible a step as severing the pastoral relation. The spirit of the prayer awakened new thoughts and feelings in the assembly. At its close one of the chief agitators requested a delay of the proceedings, and moved, before the Church, a dismission of the matter to be presented to the council, which motion was unanimously carried." At once a remarkable revival commenced, and many persons were hopefully converted. During his ten and a half years' ministry in Homer the Church enjoyed three general revivals. At the time of his settlement the number of communicants was 99. He received into the membership of the Church 468. At the time of his death, after all losses by removals, deaths, etc., the number of members was 427. And yet, although he had been so laborious and successful a minister, he renounced all righteousness of his own as the ground of salvation, and trusted alone in the efficacious work of the Lord Jesus. He died June 4, 1820. See *Walker Memorial*, p. 55. (J. C. S.)

**Walker, Francis**, one of Wesley's helpers, was born at Tewkesbury, Gloucestershire. He was at the conference of 1753; labored in Wales and Cornwall. One of the great revivals in Cornwall was under his ministry (in 1744). He had his share in suffering persecution. Mr. Walker eventually married and settled in the city of Gloucester, where he died. See Atmore, *Meth. Memorial*, s. v.; Smith, *Hist. of Wesl. Methodism*, i, 237, 262; Wesley, *Journal*, 1744.

**Walker, George** (1), an eminent Puritan divine, was born at Hawkshead, Lancashire, England, in 1581. He was educated at St. John's College, Cambridge; and went to London, where, in 1614, he became rector of St. John the Evangelist's, in Watling Street. Here he continued for nearly forty years, refusing every other preferment. He also became, at the same time, chaplain to Dr. Felton, bishop of Ely. He was distinguished for his controversial powers and their exercise in several instances. In 1635 he preached a sermon in favor of the sacred observance of the Sabbath, for which he was prosecuted by archbishop Laud, fined, and imprisoned; but was released by order of the Parliament. He was chosen in 1643 one of the Assembly of Divines, and was a witness

against Laud, in which he testified that he had endeavored to introduce popery. He died in 1651. See *Chalmers, Biog. Dict.* s. v.

**Walker, George** (2), D.D., an Irish clergyman of the Church of England, was born of English parents in the County Tyrone, Ireland, about 1650. He was educated at the University of Glasgow, and took orders in the Church of England, after which he became rector of Donoughmore, near Londonderry, Ireland. When James II laid siege to that city in 1689, Walker raised a regiment, with which he gallantly defended Londonderry, after it had been abandoned by its governor, and succeeded in holding the city until James was obliged to raise the siege, July 30, 1689. He received the thanks of the House of Commons, and was nominated bishop of Derry by William III; but desiring to pass through another military campaign before entering upon the duties of the episcopal office, he was killed at the battle of the Boyne, July 1, 1690. He published *A True Account of the Siege of Londonderry* (1689), which was attacked and criticised, and the attack brought out a *Vindication*. A statue, mounted on a lofty pillar, has been erected to his memory in Londonderry.

**Walker, George** (3), a Dissenting minister, was born at Newcastle-upon-Tyne, England, in 1734. He became pastor of a body of Dissenters at Durham in 1757; of another, at Great Yarmouth, in 1761; and of another, at Nottingham, in 1774; was tutor in mathematics at Warrington from 1772 to 1796; and tutor in various branches at Manchester in 1796. He died in London in 1807. Among his published works are, *Doctrine of the Sphere*, etc. (1775):—*Dissenter's Plea against the Test Laws* (1790):—*Sermons on Various Subjects* (ed.):—*Essays on Various Subjects, with a Life of the Author* (1809, 2 vols.).

**Walker, George** (4), an English clergyman, was born in 1796. He became minister of Trinity Church, Leeds; head master of the Leeds Grammar-school in 1818; and rector of Papworth St. Everard in 1820. He died at Leeds in 1830. Among other works, he published, *Sermons on the Humiliation and Exaltation of the Son of God* (Lond. 1824):—*Specimens of English Poetry* (1827). See *Gentleman's Magazine* (Lond. 1830), i, 649.

**Walker, George W.**, a Methodist Episcopal minister, was born in Frederic County, Md., Nov. 26, 1804, of Roman Catholic parents. When he was quite young his father, through curiosity, brought into his family a Bible, which was soon the means of converting them all. But George was led astray by gay company, and was soon far from the fold of Christ. Through the instrumentality of his pious sister he was brought back; and, after much struggling, he yielded to the ministerial call, and in 1826 entered the Ohio Conference. Soon after entering the ministry, he was sent to Michigan, than which there was then open no harder field for the itinerant. But no swollen river, dismal swamp, or dangerous fen could daunt the lion-hearted George Walker. In 1839 he took charge of the Lebanon District, O., where he remained four years. Thence he went to Cincinnati, where he spent three years. He next served a full term upon the Dayton District. His last appointment was to the Hillsborough District, where he died, July 31, 1856. Mr. Walker was remarkable for his manliness, intelligence, and devotedness. As a preacher he was powerful, both in argument and declamation. See *Minutes of Annual Conferences*, 1856, p. 155.

**Walker, James** (1), D.D., the venerable primus of the Scottish Church, bishop of Edinburgh, and Pantonian professor of divinity. No record remains of his birth or early life. He took a regular Scottish college course, graduated at the University of Cambridge, and in 1793, returning to his native country, devoted himself to literature as sub-editor of the third edition of the *Encyclopædia Britannica*. In 1830 he was elected bishop of Edinburgh; also president, or primus, of the ministeri-

al body to which he belonged. He died in 1841. Bishop Walker was highly instructive, amiable, and revered by all who knew him. See *Christian Remembrancer*, 1841, p. 319.

**Walker, James** (2), D.D., an American Unitarian clergyman, was born at Burlington, Mass., then a part of Woburn, Aug. 16, 1794. He graduated at Harvard College in 1814, and studied theology at Cambridge; was pastor of the Unitarian Church in Charlestown from 1818 to 1839; editor of the *Christian Examiner* from 1831 to 1839; was Alford professor of intellectual and moral philosophy from 1839 to 1853; and president of Harvard College from 1853 to 1860. He died at Cambridge, Dec. 23, 1874. Among his published works are, *Sermons Preached in the Chapel of Harvard College* (1861):—*Memoir of Josiah Quincy* (1867). He was also editor of *Stewart's Active and Moral Powers* (1849), and Reid's *Intellectual Powers* (1850).

**Walker, James McCulloch**, a Presbyterian minister, was born near Charlotte, N. C., Nov. 1, 1829. He graduated with honor at Davidson College, N. C., in 1847; studied theology at the Erskine Associate Reformed Presbyterian Seminary, Due West, S. C.; was licensed by the First Presbytery of the Associate Reformed Synod of the South in September, 1849; spent two years as a missionary in Kentucky; was ordained pastor of Sardis Church, N. C., May 9, 1851; and subsequently preached in Lancasterville and Waxhaw churches, S. C., and Philadelphia Church, N. C. He died April 15, 1860. Mr. Walker possessed a vigorous intellect; was well versed in theology, science, and general literature; an excellent preacher; a ready writer, contributing largely to the religious press of the day. A *Sermon on Temperance*, and a tract entitled *Grieve not the Holy Spirit*, had been published. See Wilson, *Presb. Hist. Almanac*, 1861, p. 110. (J. L. S.)

**Walker, Jason**, a Methodist Episcopal minister, was born in Ashby, Mass., Feb. 17, 1793. He was converted when about seventeen years of age; successfully filled the offices of class-leader, exhorter, and local preacher, till in June, 1813, when he was received on trial in the travelling connection. He labored as follows: Wethersfield, 1813; Barre, 1814; Bristol, Somerset, and Rhode Island, 1815; Mansfield, 1816; Warwick Circuit, 1818. He died at Smithfield, R. I., April 10, 1819. Humility, zeal, and patience were his characteristics. See *Minutes of Annual Conferences*, 1859, p. 328.

**Walker, Jeremiah**, a Baptist minister, was born in Bute County, N. C., about the year 1747. He is said to have been a lad of remarkable precocity, and was distinguished for his love of books and his desire for mental improvement. When comparatively young, he became a hopeful Christian, and in due time began to preach. His associations with his brethren, who, however, were good men, and in many respects well fitted to the spheres in which they were called to labor, did not help him much in his mental development. But, as his biographer tells us, "the invincible energies of his genius towered above every obstruction." For some time he preached in the neighborhood of his native place and in Pittsylvania County, Va. In 1769 he became the pastor of a newly formed Church in Amelia County. Here he entered upon a career of great usefulness. In a few years, with the assistance which he had from others, especially a number of young preachers who had been trained by him, he established between thirty and forty churches south of James River. In these churches there were not a few persons of character and influence, who afterwards became distinguished as ministers of the Gospel. As a preacher, Mr. Walker was equalled by few of any denomination. He suffered persecution, as did so many of the Virginia Baptist ministers, and was thrown into prison. When released, he continued to preach with great success for some time. But he came under a cloud, overtaken by temptation; and although, after having passed through discipline, he was restored,

he never resumed the place he once occupied among the ministers of his denomination. His last illness was attended with great physical suffering. He died, as was believed, an humble Christian, accepted by his Lord in spite of all his frailties. His death occurred Sept. 20, 1792. See Benedict, *History of the Baptists*, ii, 390. (J. C. S.)

**Walker, Jesse**, a noted pioneer of the Methodist Episcopal Church, whose name was identified for years with the westward progress of Methodism, was a native of North Carolina. The date of his birth is not ascertained, and there is no record of his early life. He was admitted as a travelling preacher in the Western Conference in 1802, travelled circuits in Tennessee and Kentucky for about four years, and in 1806 was appointed to pioneer the Church through Illinois. His appointment was a mission to the whole territory. The country between Kentucky and the interior of Illinois was then a wilderness, and difficult to travel. McKendree, afterwards bishop, but then presiding elder of the Cumberland District, set out with his pioneer itinerant to assist him on the way. They journeyed on horseback, sleeping in the woods on their saddle-blankets, and cooking their meals under the trees. "It was a time," says bishop Morris, who knew both of them, "of much rain; the channels were full to overflowing, and no less than seven times their horses swam the rapid streams with their riders and baggage; but the travellers, by carrying their saddle-bags on their shoulders, kept their Bibles and part of their clothes above the water. This was truly a perilous business. In due time they reached their destination safely. McKendree remained a few weeks, visited the principal neighborhoods, aided in forming a plan of appointments for the mission, and the new settlers received them with much favor." Walker, though left alone in the territory, was not discouraged, and, as the result of his first year's experiment in Illinois, two hundred and eighteen Church members were reported in the printed *Minutes*. His next field of labor was Missouri, and he continued to operate thenceforward alternately in the two territories until 1812, when, as presiding elder, he took charge of all the Methodist interests of both. The old Western Conference having been divided, in 1812, into the Ohio and Tennessee conferences, the Illinois and Missouri work pertained to the latter. He had charge of districts in the two territories until 1819, when he was appointed conference missionary, that he might range about and form new fields of labor among the destitute—"a work to which he was peculiarly adapted, both by nature and grace, and in which he continued to be employed for many years." In 1820 this veteran pioneer formed the purpose of planting Methodism in St. Louis, where previously Methodist preachers "had found no rest for the soles of their feet, the early inhabitants from Spain and France being utterly opposed to our Protestant principles, and especially to Methodism." Some idea of his success in this bold undertaking may be obtained from the fact that, as the result of the first year's experiment, he reported to the conference a chapel erected and paid for, a flourishing school, and seventy Church members in St. Louis. The next year (Oct. 24, 1822), the Missouri Conference held its session in that city, when "an excellent and venerated brother, William Beauchamp, was appointed" his successor. Walker was continued conference missionary, and in 1823 began to turn his special attention to the Indian tribes up the Mississippi. In this self-denying work he continued, "breaking up the fallow ground and establishing new missions, until 1834, when his health had become so infirm that he was obliged to take a superannuated relation." He retired to his farm in Cook County, Ill., where he died in great peace, Oct. 5, 1835. See *Minutes of Annual Conferences*, ii, 487; Sprague, *Annals of the Amer. Pulpit*, vii, 380; Stevens, *Hist. of the M. E. Church*, iv, 354. (J. L. S.)

**Walker, John** (1), D.D., a minister of Excter,

England, is said to have been born in Devonshire near the close of the 17th century. He is best known by his work entitled *An Attempt towards Recovering an Account of the Numbers and Sufferings of the Clergy who were Sequestered in the Rebellion*. He died in 1730.

**Walker, John** (2), a Church of England divine, was born in Cheshire in 1719. He was brought up to business; and after marrying and settling as a draper, he experienced religious convictions by the preaching of the Methodists, among which body he first exercised his gifts as a preacher. He next went through a regular academical course at Northampton in preparation for the ministry, after which he settled as minister at Long Buckley, Northamptonshire. About 1760 he removed to Framlingham, and a few years later to Walpole, Suffolk, where he continued until his decease, Aug. 31, 1805. Mr. Walker was a man of eminent piety, humility, candor, and benevolence. He possessed a clear understanding, a sound judgment, and was well versed in theology. See *Theological Magazine*, 1805, p. 437.

**Walker, John** (3), an Irish clergyman, was born in 1767, and was educated at Trinity College, Dublin, of which he was for some time a fellow, but was expelled about 1800, and originated a sect called the *Church of God*. He died Oct. 25, 1833. He edited several mathematical and classical works. See (Lond.) *Gentleman's Magazine*, 1833, ii, 540.

**Walker, John** (4), an English clergyman, was born in 1770. He was educated at Oxford, where he became fellow of New College; and was vicar of Hornechurch, Essex, from 1819 until his death, which occurred April 5, 1831. Among his published works are, *Curia Ozoniensis:—Selection of Curious Articles from the Gentleman's Magazine* (1809, 3 vols.). He was also one of the original proprietors of the *Oxford Herald*, and for several years an assistant editor.

**Walker, John** (5), a minister of the Associate Church, was born in Washington County, Pa., in 1787. He was educated at Jefferson College, in his native county, studied theology with Dr. Anderson, and was licensed in 1809. He first settled in Mercer County, Pa., where he remained three years preaching to various congregations, and then removed to Harrison County, O., where he continued to labor until his death, in 1845. See Sprague, *Annals of the Amer. Pulpit* (Associate), p. 95 sq.

**Walker, John** (6), a Methodist Episcopal minister, was born in Hampshire County, Va., Feb. 28, 1797. He removed with his parents to Ohio in 1814; was converted soon after; joined the Ohio Conference in 1821; and served with great zeal and usefulness on the following circuits: Knox and Huron in 1822, West Wheeling in 1823, Burlington in 1824, and in 1825 Salt Creek Circuit, where he died of pulmonary consumption. See *Minutes of Annual Conferences*, 1827, p. 540.

**Walker, John** (7), a Methodist Episcopal minister, was born in Burlington County, N. J. He was converted at Mount Holly in his nineteenth year, received on trial in the Philadelphia Conference in 1802, and appointed to the Trenton Circuit, and subsequently to the following places: Flanders, Salem, Chester, Bristol, Philadelphia, Lancaster, Smyrna, Dauphin, Gloucester, Burlington, New Mills, Freehold, Bargaintown, Camden, and Swedesborough. In 1835 he took a superannuated relation, and spent the remainder of his life in Clarksborough, where he died April 5, 1849, in the eighty-fifth year of his age. He was a most successful preacher in winning souls. As a man, he was universally beloved; as a Christian, his piety was deep and genuine. See *Minutes of Annual Conferences*, iv, 320.

**Walker, Joseph** (1), an English Congregational minister, was born in 1802. Mr. Walker was for many years a teacher in the public schools. He graduated

with high honors at Airedale College, and became pastor of Northallerton Independent Church. After years of patient labor, he removed to Hexham, and in 1855 settled at Derby. Mr. Walker was well versed in the Hebrew and Greek Scriptures, and possessed special faculties of imparting his knowledge to others. He died Dec. 2, 1867. See (Lond.) *Cong. Year-book*, 1869, p. 293.

**Walker, Joseph (2)**, an English Wesleyan minister, was converted at the age of fourteen under the ministry of John Crosby. In 1811 he was accepted as a candidate for the ministry. Owing to an affection of the brain, he was temporarily laid aside at Dover from 1834 to 1836. He became a supernumerary at Luton, Bedfordshire, in 1845, and died April 14, 1857, in the sixty-ninth year of his age. His entire course was one of great usefulness. See *Wesleyan Minutes*, 1857.

**Walker, Joseph E.**, a Methodist Episcopal minister, was born at Wilton, Me., in 1847. He was converted at the age of twenty; began preaching in 1869; supplied the Lisbon charge in 1870; and in 1871 joined the Maine Conference, and was appointed to Maple Circuit, where he labored two years, and then returned to Wilton, where he died of consumption, Aug. 26, 1875. Mr. Walker was studious, earnest, and very promising. See *Minutes of Annual Conferences*, 1876, p. 87.

**Walker, Josiah H.**, an English Wesleyan minister, was born in London in 1776. He was piously trained and early united with the Church. In 1804 he entered the sacred office, and for thirty-five years discharged its duties with unwavering fidelity and zeal. In 1835, his health failing, he settled in Manchester. He died July 26, 1843.

**Walker, Levi (1)**, a prominent layman of the Baptist denomination, was born in Rutland, Vt., May 22, 1777, and is said to have been the first white male born in that town. He removed to Whiting, Vt., with his father's family in 1784, and was one of six brothers, all farmers in that town, their farms adjoining and forming one of the best tracts of land in Addison County, embracing about twelve hundred acres on the Otter Creek. He was appointed, under president Madison's administration, assessor for the towns of Whiting and Leicester, and for several years was the first constable of Whiting, and for a time, also, a selectman of the town. Like his brother, James Otis, he was proverbial for his generosity and his public spirit. "If there was a house of worship to be built, a minister of religion to be obtained and supported, any benevolent object to be aided, or public improvement to be accomplished, his purse and influence were generously offered, and to these was owing the success of many a benevolent and useful enterprise." In his will he bequeathed to the town of Whiting twenty acres of land at Whiting Centre, one acre to be used for a cemetery, and the yearly income of ten acres to be appropriated to the support of common-schools, and the income of the remaining nine acres to maintain the preaching of the Gospel. He died July 27, 1822. Upon his grave-stone is this inscription, "The memory of his public spirit will outlast this monument, which marks the humble spot where he lies." See the *Walker Memorial*. (J. C. S.)

**Walker, Levi (2)**, M.D., a Baptist minister, was born in 1784. He spent the early part of his life in Livermore, Me. Not far from the year 1804 he became a hopeful Christian. For some twelve years he was an earnest, zealous preacher in the Methodist denomination. A change of sentiment on the subject of baptism led him to sever his connection with his Methodist brethren, and to unite with the Baptists. He joined the Baptist Church in Fall River, Mass., then under the charge of Rev. Mr. Borden. Having for a time preached in Fall River, New Bedford, and Edgartown, Mass., he accepted a call to the pastorate of the Warwick and Coventry Church, R. I., where he remained until 1819, when he removed to Preston, Conn. Subsequently he

removed to North Stonington, Conn., where he continued to preach and practice his profession nearly to the close of his life. His death occurred at Winstead, Conn., in 1871. He is referred to as "a preacher, clear, logical, and convincing, rising at times to points of highest excellence, both in matter and manner." His professional skill as a physician was everywhere recognised, and had he given his exclusive attention to the practice of medicine, he would have acquired distinction. Three of his sons entered the Christian ministry: Rev. W. C. Walker, for some time the Baptist state missionary of Connecticut; Rev. Levi Walker, Jr., deceased; and Rev. O. T. Walker, now (1879) pastor of the Harvard Street Church, Boston. See Fuller, *Hist. of Warwick*, p. 827. (J. C. S.)

**Walker, Nathan**, a Methodist Episcopal minister, was born in Montgomery County, Md., Oct. 20, 1795; joined the Ohio Conference in 1820; was admitted to deacon's orders in 1822, and to elder's in 1824; and died of typhus fever, Aug. 26, 1825. See *Minutes of Annual Conferences*, 1826, p. 504.

**Walker, Obadiah**, a learned divine, first of the Church of England, and then of the Roman Catholic Church, was born at Worsborough, Yorkshire, England, about 1616. He was educated at University College, Oxford, where he graduated in 1635; took holy orders in 1638, and became a noted tutor; he was for a time one of the preachers before the court of Charles I at Oxford. In May, 1648, he was ejected from his fellowship, and travelled on the Continent, residing mostly at Rome. After the Restoration he was reinstated in his fellowship, and made another visit to Rome as travelling tutor to some young gentlemen. In 1676 he was chosen master of his college, and was also assistant to Abraham Woodhead, who kept a popish seminary. He soon began to give indications of a decided leaning towards the Roman Catholic religion. He went to London in 1685, and on his return to college he announced himself a Roman Catholic. He had mass in his private lodgings, and in 1687, under letters patent from King James, began the publication of books against the Reformed religion. He had some apartments in the college arranged for his use as a chapel, and the income of a fellowship set apart for the maintenance of a priest. For these acts, which were violations of law, he was imprisoned in the Tower, but afterwards released in 1690. He died Jan. 21, 1699. Among his published works are, a *Greek and Roman History, Illustrated by Coins and Medals* (1692);—*A Brief Account of Ancient Church Government* (1662);—*An Historical Narration of the Life and Death of Christ* (1685);—and many others.

**Walker, Peter J.**, a minister in the Methodist Episcopal Church, South, was born in Williamson County, Tenn., 1808; professed religion in 1841; was licensed to preach in 1851, and joined the Alabama Conference in 1858. He died in 1860. See *Minutes of Annual Conferences of the M. E. Church, South*, 1860, p. 263.

**Walker, Robert (1)** (commonly called the *Wonderful Robert Walker*), a minister of the English Church, was born at Seathwaite, England, in 1709. By his own industry he qualified himself for holy orders, was ordained, and appointed curate of Seathwaite with a salary of five pounds per annum. This, however, was afterwards increased, so that by rigid economy he was able to maintain his family, and at his death in 1802 leave two thousand pounds. See his *Life* by Wordsworth.

**Walker, Robert (2)**, a talented minister of the Church of Scotland, was born in the Canongate, Edinburgh, in 1716. He was educated at the University of Edinburgh, and was licensed in 1737. He was ordained minister to Straiton in 1738, and remained there nine years, when he was transferred to the second charge of South Leith. In 1754 he was again removed to one of the collegiate charges of the High Church, Edinburgh,

where he continued until his death, April 4, 1783. He published two volumes of *Sermons*. See *Memoir* prefixed to his *Sermons*.

**Walker, Robert** (3), an English Methodist preacher, was born in Gateshead-on-Tyne in 1838; was converted in his youth and joined the New Connection. His work as a local preacher gave promise of a life of usefulness in the Church, and he entered the ministry in 1863. He travelled in Barnsley, Stockton, Liverpool, Birmingham, and Alnwick; and at the end of ten years' service his health failed him, and in 1874 he became a supernumerary. Hoping for recovery, he took a voyage, but his useful life was cut short; he died at sea, Dec. 21, 1874. See Baggaly, *Digest of the Methodist New Connection*.

**Walker, Samuel**, a Church of England divine, was born at Exeter, Dec. 16, 1714; entered Exeter College, Oxford, in 1732, and took his A.B. degree in 1736; and in 1737 was ordained to the curacy of Doddiscombeleigh. In the following year he travelled in France, and added music to his acquisitions; and in 1739 returned and resumed his ministry as curate of Lanlivery in Cornwall. Subsequently he removed to the curacy of Truro, where his spiritual life underwent a radical change for the better. He died July 19, 1761. Mr. Walker was attractive and commanding in person, expressive in features, frank and courteous in conversation. His tracts are considered of great value, especially *The Christian; a Course of Practical Sermons* (1755), thought to be the best in the English language. His posthumous works are, *Fifty-two Sermons on the Catechism* (1763);—*Practical Christianity:—The Covenant of Grace:—The Christian Mirror:—The Refiner, or God's Method of Purifying his People:—The Christian Armor:—Distrust Removed. See Christian Observer*, Feb. 1877, p. 150; *Christian Remembrancer*, 1838, p. 709; *Church of England Magazine*, i, 468; Sidney, *Life, Ministry, and Remains of Samuel Walker* (1835).

**Walker, Saunders**, a Baptist minister, was born March 17, 1740, in Prince William County, Va. He was a brother of Rev. Jeremiah Walker. Although he had not the intellectual ability of this brother, unlike him he passed through life with no stain left upon his character. He is spoken of as a remarkable instance of the transforming influence of the grace of God. "Before his conversion he was of a turbulent, unmanageable temper, and was much addicted to the vices naturally attendant on such a disposition. But the Divine Spirit not only changed his heart, but his nature too; so that he was ever after distinguished for the meekness and gravity of his deportment. The meek Saunders Walker was a proverbial expression among all who knew him." In the twenty-seventh year of his age he began to preach the Gospel, and continued in the office of the ministry for thirty-eight years. For some time he had charge of a Church in Bute County, N.C. In 1782 he removed to Georgia, where he remained during the rest of his life. For a time he and Rev. Daniel Marshall were the only ordained ministers in the upper part of the state. It was a period of great political excitement, and party spirit ran very high. Mr. Walker was often called to mediate in cases of political animosities, and to reconcile those who had become alienated. The gentleness of his character, and his freedom from the bitterness which turns friends into enemies, eminently fitted him to be a peacemaker, and he had the blessing which our Lord pronounces on those who are peacemakers. After a life of great usefulness in the cause of his Master, nearly forty years of which were spent in the active duties of the ministry, he died in 1805. See Benedict, *History of the Baptists*, ii, 329. (J. C. S.)

**Walker, Simeon R.**, a minister in the Methodist Episcopal Church, South, was born in MacNairy County, Tenn., Jan. 3, 1834. He professed religion at the age of fifteen, and was received into the Memphis Conference in 1854. In 1858 he was transferred to

the Wachita Conference and appointed to the Hampton Circuit, where he died, June 23, 1859. Mr. Walker was a pious man, full of zeal and love for the Church. He died of hemorrhage of the lungs. See *Minutes of Annual Conferences of the M. E. Church, South*, 1859, p. 182.

**Walker, Thomas** (1), a minister of the Society of Friends, was born in Leeds, England, in 1794. He did not enjoy many educational advantages, yet he was instrumental in doing much good. His life was characterized by much simplicity, and by a cheerful, humble willingness to do what he could in the service of the Saviour. He died at Leeds, June 24, 1851. See *Annual Monitor*, 1852, p. 91.

**Walker, Thomas** (2), an English Wesleyan minister, was received into the Church in early life, into the ministry in 1824, and died April 3, 1829. He was zealous in his labors. See *Wesleyan Minutes*, 1830, p. 556.

**Walker, Thomas** (3), an English Wesleyan minister, was converted in his fifteenth year, entered the ministry in 1824, retired in 1847, and settled in York, where he died, July 7, 1848, in the fiftieth year of his age. "His qualifications for the work of the ministry, and the uprightness, integrity, and kindness manifested in his deportment, made his labors to be esteemed in proportion as they were known." See *Wesleyan Minutes*, 1848.

**Walker, W. S. C.**, a Methodist Episcopal minister, was born in Warren County, Tenn., June 27, 1830, and received the best training in early life. He was converted at the age of twenty-four; joined the Southern Illinois Conference in 1865; and served successively at New Haven, Carmi, Grayville, Marion, and MacLeansborough, where he died, Jan. 12, 1873. Mr. Walker was a man of remarkable energy and faithfulness. See *Minutes of Annual Conferences*, 1873, p. 136.

**Walker, William** (1), a learned English divine, was born in Lincolnshire in 1623. Among other works, he published a *Treatise on English Particles*, and *Idiomatologia Anglo-Latina*. He died in 1684.

**Walker, William** (2), a Baptist minister, was born in Dighton, Mass., Sept. 19, 1817. When a young man he resided in New Bedford, where he learned the trade of a shipwright. While thus engaged, he became a hopeful Christian, and his attention was soon turned to the Christian ministry. He was prepared for college at the Academy in Middleborough, and was a graduate of Brown University in the class of 1843. He pursued theological studies at the Newton Institution for six months, and then went to the West, where he found everywhere an open field for ministerial labor. For a year and a half he preached at Dixon, Ill. While attending a meeting of a Baptist association at Peoria, Ill., he was attacked by a fatal disease, and lived only nine days, dying Oct. 26, 1846. See the *Walker Memorial*, p. 91. (J. C. S.)

**Walker, William H.**, a preacher of the United Methodist Free Church, was born at Liverpool, May 21, 1810. His pious parents gave him a good education, and as a boy he joined a Methodist class meeting. In 1835 he separated from the Wesleyans and joined the Association. After careful preparation, he entered the ministry in 1840, and began a mission at Hamburg, where he labored for seven years, both English and Americans joining his Church. He returned to England in 1847. In 1856 his health gave way, and for twenty-one years he acted as chaplain to the Salford Cemetery. He served his generation faithfully, and died of apoplexy, Aug. 25, 1878. See *Minutes of the 23d Annual Assembly*.

**Walkinshaw, Hugh**, a minister of the Reformed Presbyterian Church, was born in the County of Antrim, Ireland, June 15, 1803. He removed with his father's family, in 1819, to Belmont County, O., and was

afterwards educated in Franklin College, where he graduated in 1827. He studied theology under Dr. Black, of Pittsburgh, and Dr. Wylie, of Philadelphia. He was licensed to preach in 1832, and in the spring of 1835 was settled as pastor of the congregations of Brookland, North Washington, Union, Pine Creek, etc., Pa. In 1841 the charge was divided, and he remained as pastor at Brookland and North Washington, where he continued to labor until his death, which occurred April 19, 1843. See Sprague, *Annals of the Amer. Pulpit*, ix, 83 sq.

**Walkyries** (Anglo-Saxon, *Välcyrgear*, from *val*, the battle-field, and *kyra*, to choose), in Norse mythology, are two beautiful young maidens in the service of Odin, as his cup-bearers, called *Hrist* and *Mist*—the former name signifying a black cloud, the latter a watery, floating vapor. In general, they are imagined as hovering over battles, or even participating in the conflict, marking with the point of the lance the heroes who shall fall, and whom they shall conduct to Walhalla. They somewhat resemble the Hours or Destinies, but never attain that lofty and unapproachable dignity which characterizes those deities. The Walkyries, though superhuman, are not goddesses. They fall in love with men, and then confer their favors in battle as they are prompted by their own passions. For this Odin expels them from Walhalla, dooms them to marriage, or drives them into a trance, where they lie sleeping until the warrior comes who understands how to break the spell.

**Wall** (prop. קיר, as a *defence*, or חומה, as a *barrier*; sometimes שורץ, perhaps from its *rocky* character; also various forms from the root בָּרַר, to *enclose*; occasionally חיל, from its *strength*; חוץ, from its *exterior* position; חָרַץ, from being *dug*, etc.; Gr. τεῖχος). The walls of ancient cities and of houses were generally built of earth, or of bricks of clay mixed with reeds or straw and hardened in the sun. When any breach took place in such a mass of earth, either by heavy rains or by some defect in the foundation, the consequences were serious (Gen. xlix, 6; Psa. lxi, 3; Isa. xxx, 13). It is not surprising that walls which were often made in such a rude and perishable manner could be easily destroyed by fire (Amos i, 7, 10, 14). The extensive mounds on the plains of Mesopotamia and Assyria, marking the sites of ancient cities, show that the walls were principally constructed of earth or clay. The thickness of the wall surrounding the palace of Khorsabad is fixed by Botta at 48 feet 9 inches; a very close approximation to the width of the wall of Nineveh, upon which three chariots could be driven abreast. The wall of Babylon was 87 feet broad, and six chariots could be driven together upon it. Not unfrequently stone walls, with towers and a fosse, surrounded fortified cities (Isa. ii, 15; ix, 10; xxvi, 1; Neh. iv, 8; Zeph. i, 16). See FORTIFICATION.

Houses abutting on the city wall frequently had windows which communicated with the exterior (Josh. ii, 15; 1 Sam. xix, 12; Acts ix, 24, 25; 2 Cor. xi, 33; see Hackett, *Illustr. of Script.* p. 67 sq.). See WINDOW.

In Scripture language a wall is the symbol of resistance or separation. See FENCE. The Lord tells the prophet Jeremiah (i, 18; xv, 20) that he will make him as a wall of brass, to withstand the house of Israel. Paul says (Eph. ii, 14) that Christ, by his death, broke down the partition-wall that separated us from God, or rather the wall that separated Jew and Gentile; so that these two people, when converted, may make but one. See PARTITION.

Only a few other points need here be noticed in addition to what has been said elsewhere on wall construction, whether in brick, stone, or wood. See BRICK; HANDICRAFT; MORTAR.

1. The practice was common, in Palestine, of carrying foundations down to the solid rock (Luke vi, 48), as in

X.—III

the case of the Temple, and in the present day with structures intended to be permanent (Josephus, *Ant.* xv, 11, 3; Robinson, ii, 338; *Col. Ch. Chron.* [1857], p. 459). The pains taken by the ancient builders to make good the foundations of their work may still be seen, both in the existing substructions and in the number of old stones used in more modern constructions. Some of these stones—ancient, but of uncertain date—are from 20 feet to 30 feet 10 inches long, 3 feet to 6 feet 6 inches broad, and 5 feet to 7 feet 6 inches deep (Robinson, i, 233, 282, 286; iii, 228). As is the case in numberless instances of Syrian buildings, either old or built of old materials, the edges and sometimes the faces of these stones are “bevelled” in flat grooves. This is common—

Specimens of Ancient Walls.

ly supposed to indicate work at least as old as the Roman period (ibid. i, 261, 286; ii, 75, 76, 278, 353; iii, 52, 58, 84, 229, 461, 493, 511; Fergusson, *Handb. of Archaeol.* p. 288). On the contrary side, see *Col. Ch. Chron.* (1858), p. 350.

But the great size of these stones is far exceeded by some of those at Baalbek, three of which are each about 63 feet long; and one, still lying in the quarry, measures 68 feet 4 inches in length, 17 feet 2 inches broad, and 14 feet 7 inches thick. Its weight can scarcely be less than 600 tons (Robinson, iii, 505, 512; Volney, *Trav.* ii, 241). See STONE.

2. A feature of some parts of Solomon's buildings, as described by Josephus, corresponds remarkably to the method adopted at Nineveh of encrusting or veneering a wall of brick or stone with slabs of a more costly material, as marble or ababaster (Josephus, *Ant.* viii, 5, 2; Fergusson, *Handb. of Archaeol.* p. 202, 203).

3. Another use of the walls in Palestine is to support mountain roads, or terraces formed on the sides of hills for purposes of cultivation (Robinson, ii, 493; iii, 14, 45). Hence the "path of the vineyards" (Numb. xxii, 24) is illustrated by Robinson as a pathway through vineyards, with walls on each side (*Bibl. Res.* ii, 80; Stanley, *Sin. and Pal.* p. 102, 420; Lindsay, *Trav.* p. 239; Maundrell, *Early Trav.* p. 437). See VINE.

**Wall Arcading**, a series of niches added as an ornament in the interior walls of aisles. At Leuchars, Scotland, and at All-Saints', Stamford, it adorns the exterior of the Church. At Battle, Merton, Rochester, and Brecon there is a very lofty series of arcading.

**Wall, Andrew J.**, a Methodist Episcopal minister, was a native of Indiana; joined the Missouri Conference in 1850, and served on the Unionville, Lancaster, and Ashley circuits. After being located for some time, he was again admitted in 1859, and appointed to Linneus Circuit. In 1860 he was superannuated; after which he resided in Laporte, Mo., and finally settled near Fairfield, Ia., where he died in 1865. Mr. Wall was a man of clear intellect, average ability, and possessed an exemplary spirit of humility. See *Minutes of Annual Conferences*, 1865, p. 7.

**Wall, George**, an English Methodist preacher, and one of the original promoters of the New Connection, was born in the Peak of Derbyshire in 1774, and was converted among the Methodists at the age of twenty. Removing to the village of Arnold, Nottingham, he joined the New Connection, and was accepted in this ministry in 1799, and his seventeen appointments embraced the leading circuits in the Connection, in which his integrity, piety, and devotion secured for him acceptance and great usefulness. He was three times president of conference—in 1809, 1815, and 1832. In 1838 declining health obliged him to become a supernumerary, but his forty years' labors comforted him in his retirement. He enjoyed unclouded peace in his last hours, and died at Lightcliffe, near Halifax, March 4, 1852. See *Minutes of the New Connection Conference*.

**Wall, John, D.D.**, an English divine, was born in 1588; became prebendary of Oxford in 1632; and died 1666. He published a number of *Sermons* and other productions.

**Wall, Thomas**, an English Wesleyan missionary, was sent out to St. Mary's, Western Africa, in 1837, arriving there Nov. 26. He was studious, diligent, affectionate, and faithful to all his duties. His promising life was cut short by a paroxysm of fever, and he died Aug. 24, 1838, exactly a year after the death of the lamented young Henry Wilkinson, who preceded him on the station. See *Minutes of the British Conference*, 1839.

**Wall, William, D.D.**, an English divine, was born in 1646. He was for fifty-two years (1676-1728) vicar of Shoreham, Kent, where he died in 1728. He pub-

lished numerous works, among which are, *Infant Baptism Asserted and Vindicated* (1674);—*History of Infant Baptism, in Two Parts* (1705);—and *Critical Notes on the Old Testament* (1734).

**Wallace, Benjamin John, D.D.**, an eminent Presbyterian divine, was born at Erie, Pa., June 10, 1810. He made a profession of religion when in his twelfth year; received an appointment of a cadetship to the West Point Military Academy, N. Y., in 1827; graduated at the Princeton (N. J.) Theological Seminary in 1832; was licensed by the Donegal Presbytery the same year; ordained by the Muhlenburg Presbytery as pastor of the Church at Russellville, Ky., in 1834; became pastor of the Church at York, Pa., in 1837; was elected professor of languages in Newark College, Del., in 1846, where he was faithful as an instructor; chosen editor of the *Presbyterian Quarterly Review* in 1852, and for ten years he sustained it with great ability. This was the most important labor of his life. Much of the interest of the *Review* was created by his own articles. In all his reviews of books and editorials there were an earnestness, a vivacity, and a freshness that made them readable, and some were marked by great eloquence and power. He wrote all the book-notices during the ten years of his editorial charge, and forty-one articles on various subjects. He published two single *Sermons*, and was a contributor to the *Bibliotheca Sacra*, etc. He died July 25, 1862. See Wilson, *Presb. Hist. Almanac*, 1863, p. 311; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; *Presb. Quar. Rev.* Oct. 1862, p. 284-305. (J. L. S.)

**Wallace, Cranmore**, a clergyman of the Protestant Episcopal Church, was born in Ackworth, N. H., Feb. 27, 1802. Mr. W. was educated at Dartmouth College, graduating in 1824, and engaged for a short time in teaching at Boston and other towns in Massachusetts. As early as 1830 he removed to South Carolina, where for the first ten years of his residence he was the principal of the Cheraw Academy. Here he began the study of theology; became principal of the South Carolina Male School, Charleston; was ordained deacon in 1836, and priest a year thereafter. His early clerical labors were spent as a missionary in the upper part of the state, after which he became rector of St. David's Church, Cheraw. Subsequently he was in charge of the parishes of St. James, James's Island; St. John's, Berkeley; and in 1848 he accepted an invitation to St. Stephen's Chapel, in Charleston. He was also rector of the Church Home, and was for many years secretary of the Diocesan Convention and a member of the standing committee of the diocese. He died in Charleston, Feb. 3, 1860. See *Amer. Quar. Church Rev.* 1860, p. 181.

**Wallace, George W.**, a minister of the Baptist denomination, was born at Berkeley, Mass., Feb. 19, 1814. At the age of sixteen he professed his faith in Christ, and united with the Free Baptist Church in Pawtucket, R. I. In 1836 he was licensed to preach by the Rhode Island Quarterly Meeting. For several years, such was the state of his health that he was able to preach only occasionally. During this time he improved his mind by study, and thus prepared himself for more extensive usefulness. He was ordained at Rehoboth, Mass., Aug. 23, 1848. The churches of which he was pastor were at Hebronville, Rehoboth, and Farnumville, Mass.; Georgiaville and Apponaug, R. I.; East Killingly, Conn.; and in one or two other places. His ministry in Apponaug, from 1870 to 1877, was one of marked success. When his age and failing health compelled him to retire from his pastoral work, he returned to his native village, where he spent the remainder of his life, with the exception of the last few months. He died in Providence, R. I., Sept. 11, 1880. See obituary notice in the *Providence Journal*. (J. C. S.)

**Wallace, Henry C.**, a Methodist Episcopal minister, was born in Winchester, Ill., Nov. 5, 1832. He

was converted in his nineteenth year, and in 1858 joined the Illinois Conference and was appointed to Butlerville. The next year he was discontinued. In 1863 he was again received and filled the following charges: Petersburg and Athens, Sangamon, Springfield Circuit, Petersburg, Pawnee, Girard, Whitehall, Whitehall Circuit, Topeka, and Sangamon Circuit, where he died, Sept. 29, 1876. Mr. Wallace was a man of great faith, earnest consecration, and exemplary life. See *Minutes of Annual Conferences*, 1876, p. 144.

**Wallace, James**, embarked in November, 1845, as a Wesleyan missionary for the island of Ceylon, which he reached in safety. In June, 1846, he was driven out to sea while on his way from Jaffna to Batticaloa, and for six days suffered great privations and dangers in a small craft in the Bay of Bengal. From the effects of this exposure he never appears to have recovered. He died at Colombo, April 21, 1847, deeply regretted by those who had witnessed his zeal for the conversion of India. See *Minutes of Wesleyan Conferences*, 1847.

**Wallace, John (1)**, a Methodist Episcopal minister, was born in North Carolina in 1766. He spent the early part of his life in ignorance and wickedness; was converted at the age of twenty-six; received license as a local preacher two years later; labored with acceptance in that capacity about twenty-four years; and in 1818 joined the Missouri Conference, and worked with success Vincennes and Patoka circuits. In 1821 he united with the Ohio Conference and served on Blue River Circuit until his death, Aug. 27, 1822. Mr. Wallace was not a brilliant speaker, yet substantial and powerful. The law and the promises were his great themes. See *Minutes of Annual Conferences*, 1824, p. 424.

**Wallace, John (2)**, a Presbyterian minister, was born near Gap, Lancaster Co., Pa., Oct. 1, 1791. He was self-educated, but out of regard to his classical and theological attainments was licensed by New Castle Presbytery, and ordained by the same in 1832 as pastor of the Pequa Church in Lancaster County, which was his only charge. Here he labored faithfully and successfully for nearly thirty years. He died Oct. 29, 1866. He was an eminently good and faithful man. See Wilson, *Presb. Hist. Almanac*, 1867, p. 214.

**Wallace, Jonathan, M.D.**, a Universalist minister, was of Scotch descent, born at Peterborough, N. H., March 20, 1784. He removed with his father to Berlin, Vt., in 1795, where he received a good common-school education, and taught school for several years; studied medicine in his young manhood, and for some time followed the medical profession; and finally embraced Universalism, and in 1815 began preaching. His first fields of labor were Richmond, Williston, and Jericho, Vt. He was married in 1820. In the winter of 1822-23 he moved to Potsdam, N. Y., where for several years he stood almost alone as a preacher of Universalism, his circuit embracing Canton, Madrid, Pierrepont, Hopkinton, Malone, Bangor, and Potsdam, in which latter place he was pastor over twenty years. In 1837 he began in Potsdam the publication of a semi-monthly Universalist paper, which, not paying expenses, was soon dropped. He was afterwards associate editor of *The Evangelical Magazine and Gospel Advocate* at Utica, N. Y. He went to Boston in 1828 to be treated for epilepsy; preached there about a year; spent his latter years in Potsdam, and died April 6, 1873. Mr. Wallace was a close, original thinker, and very tenacious of his opinions. He left many manuscripts, including a volume of original hymns for public worship. He devoted much of his time preparing young men for the ministry. See *Universalist Register*, 1874, p. 125.

**Wallace, Marcus Jediah**, a Presbyterian minister, was born June 19, 1819, in Cabarrus County, N. C. He received his preparatory education at Mount

Carmel Academy, Tipton County, Tenn., under the tuition of the Rev. James Holmes, D.D., and graduated at the College of New Jersey in 1849. He made a profession of religion in the sixteenth year of his age, and united with the Church of his parents, the Poplar Tent Church. Immediately after his college graduation, he entered Princeton Theological Seminary, where he spent three years, regularly graduating in 1852. He was licensed by the New Brunswick Presbytery April 28, 1852. He began his ministry in Texas, where he preached two years—1853 and 1854—as supply to the churches of Jefferson and Hickory Hill, having been ordained as an evangelist by the Presbytery of Eastern Texas April 4, 1853, at Church Hill, Rusk Co., Texas. Next he supplied Hickory Hill and Smyrna churches from 1855 to 1860, when he moved to his last and longest field of labor, and became supply of Marlbrook and Greenwood (now Hope) churches, in Ouachita Presbytery, Ark. Here he labored assiduously and faithfully for more than eighteen years, until his death, June 21, 1878. He had no fear of death, but during his sickness often expressed a wish to live longer so that he might do something more for the Master. But his work was done, and well done. He was an honest, earnest, and faithful preacher of the Gospel, a firm and devoted friend, true in all the relations of life. (W. P. S.)

**Wallace, Robert (1)**, D.D., a Scotch divine, was born in Perthshire in 1697; was educated at the University of Edinburgh; became minister of Moffat in 1723; also of Greyfriars' Church, Edinburgh, in 1733; and died in 1771. He published, *A Dissertation on the Numbers of Mankind in Ancient and Modern Times* (1753);—*Characteristics of the Present Political State of Great Britain* (1758);—and *Various Prospects of Mankind, Nature, and Providence* (1761).

**Wallace, Robert (2)**, a minister of the Reformed Presbyterian Church, was born in the parish of Loughgilly, County of Armagh, Ireland, in December, 1772. He was educated at the University of Glasgow, from which he graduated in 1810. The next spring he removed to America with his family, consisting of a wife and four children. He studied theology under Dr. Wylie, of Philadelphia, and was licensed in 1814. In the autumn of the same year he received a call from two societies, one in Kentucky and the other near Chillicothe, O., and was ordained and installed in the pastorate. He continued in this relation until 1820, when he resigned the charge in Kentucky and retained the one near Chillicothe. He was instrumental in organizing several societies within convenient distance of his home. In 1822 he received a call from the three societies which he had established at Salt Creek. Here he continued to labor as pastor of these societies and as missionary to the adjoining neighborhoods during the remainder of his life. He died July 19, 1849. See Sprague, *Annals of the Amer. Pulpit*, ix, p. 66 sq.

**Wallace, William**, a Presbyterian minister, was born in Chester County, Pa., March 17, 1787. He graduated at Jefferson College, Pa.; studied theology privately; was licensed by Steubenville Presbytery in 1821, and immediately entered upon the work of a domestic missionary, going through the new settlements of Eastern Ohio, and gathering up and forming nuclei from which have arisen some prominent congregations. In 1822 he became pastor of the two newly organized congregations of Nottingham and Freeport, O., in which relation he continued for eighteen years. He died Dec. 18, 1841. Mr. Wallace had the reputation of being a man of ardent piety and practical worship. He was faithful and successful as a pastor, and plain and instructive as a preacher. See Wilson, *Presb. Hist. Almanac*, 1867, p. 214.

**Wallachian Version.** See ROUMANIAN VERSION.

**Wallauer, GEORGE**, a German Reformed minister.

ter, arrived in America, from Europe, in the winter of 1771. He was pastor of the congregation at Baltimore from 1772 until near May, 1776, when it is said that he left Baltimore. Some one has related that during the American Revolution he left his congregation and joined the British army. See Harbaugh, *Fathers of the Germ. Ref. Church*, ii, 399.

**Wallbridge, Edwin Angel**, an English Congregational missionary, was born April 10, 1813, and died April 27, 1876. Mr. Wallbridge was for a time connected with the British and Foreign School Society, and, in connection with Mr. Trew, engaged in school work at Jamaica. In 1841 he was invited by the London Missionary Society to commence their mission station at Georgetown, Demerara, and here he labored without interruption till 1874. He was deeply interested in the mission work, and was wonderfully blessed in heralding the Gospel of Christ. See (Lond.) *Cong. Year-book*, 1877, p. 420.

**Waller, Alvin F.**, a Methodist itinerant minister and early missionary to Oregon, was born at Abingdon, Luzerne Co., Pa., May 8, 1808. He was the youngest of seven children, his mother dying when he was but five months old. Receiving early religious instruction from his father, a man of earnest piety, he was converted and joined the Methodist Episcopal Church in 1829, from which time to the end of his busy life he was a devoted Christian. In 1832 he was employed as junior preacher on the Lewiston Circuit, Genesee Conference. In 1833 he was married to Miss Elephe White, and the same year entered the Lyra Seminary under the presidency of Rev. Dr. Luckey, where by diligent application and steady piety he made more permanent the faith which governed his life. He connected himself with the Genesee Conference in 1833, remaining until 1839, when he joined the Oregon Mission, under the superintendency of Rev. Jason Lee. After a tedious journey around Cape Horn, he reached Oregon with his family in 1840, and, with scarcely a day's relaxation, worked for his Master up to the time of his death, which occurred in Salem, Oregon, Dec. 26, 1872. Mr. Waller helped to found the Oregon Institute, from which has grown the Willamette University. To his efforts above all others the latter institution owes its existence. He was also the principal agent in establishing the *Pacific Christian Advocate*. In fact, he was thoroughly identified with all the best interests of Oregon. At his death flags were placed at half-mast over the state buildings, and the whole commonwealth was shrouded in mourning. See *Minutes of Annual Conferences*, 1873, p. 132; Simpson, *Cyclop. of Methodism*, s. v.

**Waller, Edmund**, a Baptist minister, was born in Spottsylvania County, Va., Jan. 1, 1775. His father and uncle were Baptist ministers, and distinguished for their zeal for the truth during the times of persecution in Virginia. His hopeful conversion occurred when he was but thirteen years of age. He delayed making a profession of his faith in Christ until he was twenty-three years of age, uniting, in 1798, with the Baptist Church at Bryan's Station, Fayette Co., Ky. In 1802 he was licensed to preach, and ordained May 11, 1805. Following the practice of Baptist ministers in the section of the country in which he lived, he had the pastoral care of two or three churches at the same time. He preached during the last years of his life for two churches—one at Mount Pleasant, and the other at Glenn's Creek—dividing his time between them. His ministry was a successful one. He is believed to have baptized fifteen hundred persons, most, if not all, of whom connected themselves with churches under his pastoral care. He died in 1843. See *Baptist Memorial*, ii, 267. (J. C. S.)

**Waller, John Lightfoot, LL.D.**, a Baptist minister, was born in Woodford County, Ky., Nov. 23, 1809. His early education was limited, yet he studied privately so diligently as to qualify himself for teaching

school for several years, until, in 1835, he accepted the editorship of the *Baptist Banner*, a small semi-monthly sheet published at Shelbyville, Ky., in which occupation he continued to be engaged with great success until 1841. In 1840 he was ordained to the Christian ministry, and, after relinquishing his editorial position, became general agent of the General Association of Kentucky Baptists, preaching in the meantime whenever he found an opportunity, sometimes as often as six times a week. In 1843 he succeeded his father, Rev. Edmund Waller, as pastor of Glenn's Creek Church. In 1849 he was elected a member of the convention called "to readopt, amend, or abolish the Constitution of the State." In 1850 he resumed the editorial management of the *Banner and Pioneer* (now styled the *Western Recorder*), and in April, 1852, the Bible Revision Association having been organized at Memphis, Tenn., he was elected president of the association, and held that office until his death. He died Oct. 10, 1854. See Sprague, *Annals of the Amer. Pulpit*, vi, 837.

**Waller, Ralph**, an English Methodist preacher, was born in 1811, and was converted in his youth in the Methodist Society. During the division of 1835 he joined the New Connection, while at New Mills, near Stockport, and in 1836 entered their ministry. During twelve years he travelled in nine circuits with marked success. In 1844 he obtained entire sanctification by faith, and his ministry was ever after more earnest. His voice failed him in 1846, and he became a supernumerary at Sheffield, where he died in triumph, Nov. 17, 1848. See *Minutes of the Conference*.

**Wallet**, a bag for carrying the necessities for a journey, which anciently always formed a part of the dress of the Christian pilgrim. See SCRIP.

**Wallin, Benjamin**, an English Baptist minister, was born in London in 1711. He received a good education; and although it was the earnest wish of his friends that he should enter the ministry, he felt so distrustful of his qualifications for the work that, for a long time, he resisted their importunities. "When I consider," said he, "the design of such a care to be employed more or less in preaching the Gospel, the very thought strikes me with terror. It is a work of an awful nature." His scruples were, however, in time overcome, and he consented to be set apart to the Christian ministry, and was ordained as the successor of his father, Rev. Edward Wallin, as pastor of the Baptist Church, Maze Pond, London. This position he filled for more than forty years, his death occurring in February, 1782. Mr. Wallin was the author of the hymn, "Hail, mighty Jesus, how divine is thy victorious sword!" See Belcher, *Historical Sketches of Hymns*, p. 252. (J. C. S.)

**Wallin, Johan Olof**, a Swedish theologian, was born Oct. 15, 1779, at Stora Tuna, in Dalecarlia. He studied at Upsala, and on first coming before the public, in 1805, as a poet, he received the great prize of the Swedish Academy, which was also awarded to him in the following years by the same academy, of which he became a member in 1809. He now betook himself to spiritual poetry, and became the most prominent representative of this kind of poetry in Sweden. In the same year he was appointed pastor at Solna, and in 1812 was called to Stockholm, and advanced, in 1816, as *pastor primarius*, thus becoming entitled to a seat and vote in the national diet. In 1837 he was made archbishop of Upsala, and died June 30, 1839. He published sermons under the title *Religiöns-Tal vid ämbets-tillfällen Tillfällen* (Stockholm, 1827-31, 3 vols.); — *Predikningar* (2d ed. 1842, 3 vols.; most of his sermons are translated into German). His poetry he published under the title *Witterhets-arbeten* (1848, 2 vols.). The Swedish hymn-book, which he completed in 1819, is mostly his work. See Zuchold, *Bibl. Theol.* ii, 1412; *Theolog. Universal-Lexikon*, s. v.; Winer, *Handbuch der theol. Lit.* ii, 167, 825. (B. P.)

**Wallis, George**, an English Congregational minister, was born at Andover, in May, 1816, and died Sept. 5, 1874. He was educated at the University of Edinburgh, and preached successively at Leytonstone, Bamberbury, Hungerford, Stonehouse, and Bradford. Mr. Wallis was endowed with talents of no ordinary character, which he cultivated diligently, and became a great power for good to the Church. See (Lond.) *Cong. Year-book*, 1875, p. 372.

**Wallis, Hugh**, a Congregational minister, was a graduate of Dartmouth College in 1791. He was ordained pastor of the Church in Bath, Me., Dec. 9, 1795; was dismissed July 15, 1800; and died in 1848. See Sprague, *Annals of the Amer. Pulpit*, ii, 379.

**Wallis, John (1)**, D.D., F.R.S., an eminent English divine and mathematician, was born at Ashford, Kent, Nov. 23, 1616, and was educated at Emmanuel College, Cambridge, where he graduated about 1636. He took orders in the Church of England in 1640, and was chaplain to sir Richard Darley and to lady Vere. Being an expert in discovering the keys to MSS. written in cipher, he was employed in this capacity by the Long Parliament. He afterwards obtained the living of St. Gabriel, London, but exchanged it for St. Martin's in 1648; became Savilian professor of geometry at Oxford in 1648; keeper of the archives there in 1658; and was confirmed in these offices at the Restoration in 1660. He was a member of the Royal Society in 1662. He had a controversy with Hobbes, who pretended to have discovered the quadrature of the circle, which lasted from 1655 till 1663. He died at Oxford, Oct. 28, 1703. Besides publishing numerous scientific and mathematical works, he was one of the revisers of the *Book of Common Prayer* (1661); edited the posthumous works of Jeremiah Horrox (1673); maintained theological controversies with the Arians, Baptists, and Sabbatarians; published *Theological Discourses* (1692); and left the MSS. of a number of sermons, which were published for the first time in 1791. See his *Memoir*, by Rev. C. E. de Coetlogon, printed with the *Sermons*.

**Wallis, John (2)**, an English clergyman, was born in Cumberland in 1714. He wrote, *Letters to a Pupil on Entering into Holy Orders:—Miscellany in Prose and Verse* (1748);—and *Natural History and Antiquities of Northumberland* (1769). He died at Norton in 1798.

**Wallis, William James**, an English Methodist preacher, was born in London in 1840. His father was an exciseman, his mother a Quakeress, who brought him up religiously. At fourteen he had more friends than companions; at fifteen he gave his heart to God, and devoted himself to his service. At nineteen he removed to Bronsgrove, and joined the Primitive Methodists, who wished to secure him for their ministry; but his New-Connection friends had the first claim on him, and he entered their ministry in 1864, but after travelling in five circuits his voice failed him, and the rupture of a blood-vessel suddenly closed his useful life, at Stockton, April 30, 1870. See *Minutes of the Conference*.

**Walloon Church**, a branch of the French Reformed Church, which still exists in the Netherlands. It differs from the Dutch Reformed Church chiefly in retaining the use of the French language in divine service, and of the Geneva Catechism instead of the Heidelberg. The congregations of this body, though once numerous, are now reduced to a very few; and the ministers are in most cases Dutchmen by birth. The Wal-

loons were largely represented among the early Dutch settlers in North America, particularly in New York and New Jersey.

**Wall-painting.** The large spaces which are sometimes left without any ornamentation in our churches, and which, when whitewashed, appear so cold and unsightly, were originally covered with color, either in the shape of floral or geometrical patterns, or of figures or emblems. The painted glass when treated in conjunction with the wall, as may be seen at St. Chapelle, has a beautiful effect. The bands of color on the wall were, no doubt, in continuation of the transom, or the sill, or a continuation of a band carried round the arches, and taking the place of a drip-stone and string. There are fresh examples discovered every day, but they are seldom in such a state as to admit of preservation.

Wall-painting, Ringstead, Northamptonshire.

**Wall-plate**, a piece of timber laid horizontally on the top of a wall, on which joists rest.

**Wallroth, AUGUST FRIEDRICH CHRISTIAN**, a Protestant theologian of Germany, was born May 3, 1803, at Eutin. He studied at Kiel, Berlin, and Bonn; was appointed pastor at Eutin in 1832; in 1838 he was made court and garrison preacher in Oldenburg, and member of consistory; until in 1849 he was obliged to retire from the Church government on account of the new constitution of the Church. In 1853 he was again appointed for Eutin as superintendent and court preacher, with the title of superior counsellor of the Church. Here he died, April 4, 1876. He published a number of sermons, which are enumerated in Zuchold, *Biblioth. Theolog.* ii, 1413. (B. P.)

**Walls, F. H.**, a Methodist Episcopal minister, who served the Church many years as class-leader, steward, exhorter, and local preacher; joined the Southern Illinois Conference in 1848, when somewhat advanced in years; travelled some years; took the superannuated relation; and a few years later died, Aug. 13, 1862. Mr. Walls was a pious, earnest, successful minister. See *Minutes of Annual Conferences*, 1862, p. 211.

**Walmsley, CHARLES**, D.D., F.R.S., an English Benedictine monk and Roman Catholic bishop, was born in 1721. He was senior bishop and vicar-apostolic of the Western district, and doctor of theology of the Sorbonne. He was the last survivor of those eminent mathematicians who were active in bringing about a change in the chronological style, or calendar, of England, which was accomplished in 1752. He wrote a number of mathematical and theological works, which are at present unimportant. He died at Bath in 1797.

**Walmsley, JOHN**, an English Wesleyan minister, was converted in early life, called to the ministry in

1797, and died April 22, 1842. His sermons evinced an affectionate spirit, a fulness of love to God, compassion for sinners, and sympathy with afflicted saints. He enjoyed the confidence and esteem of his brethren. See *Minutes of Wesleyan Conferences*, 1842.

**Waln, Nicholas**, a member of the Society of Friends, was born Oct. 19, 1742, at Fair Hill, near Philadelphia, Pa. He acquired a good elementary education at a Friends' school in Philadelphia, and on leaving the institution commenced the study of law; and before attaining to his majority was admitted to practice in the courts. In order to extend his knowledge of the law, he went to England in the fall of 1763, and was a student for some time in the Temple. Having secured the object which carried him abroad, he returned to Philadelphia and resumed the practice of his profession. For seven years he devoted himself with untiring industry and success to his work as a lawyer, at the end of which time, having had a remarkable religious experience, he felt it to be his duty to abandon his profession and devote himself to religious work, as a member of the Society of Friends. He was a frequent visitor to quarterly and yearly meetings of Friends in different parts of the country; and his gifts made him an acceptable preacher wherever and whenever he felt moved to address the assembled people. Some of these public discourses were remarkable for their power and their unction, and produced a profound impression on those who listened to them. He visited most of the Friends' meetings in England in the years 1783 to 1785, and ten years after made a similar tour through Ireland. Everywhere he was welcomed, and made a good impression. His death occurred Sept. 29, 1813. See *Biographical Sketches of Friends* (Phila. 1871), p. 381. (J. C. S.)

**Walpurgis, or Walpurga, St.**, was the sister of Willibald, the first bishop of the diocese of Eichstätt after it had been founded by Boniface. She was of English birth, and went as a missionary to Germany at the solicitation of Boniface. After a period of labor in Thuringia, she became abbess of the convent at Heidenheim, in Eichstätt, where Wunnebold, another brother, exercised supervision. Tradition states that Walpurgis exercised control over monasteries also, after Wunnebold's death. She herself died in 776 or 778, and several days are still observed in her honor; e. g. Aug. 4, in memory of her departure from England; Feb. 25, in commemoration of her death; May 1, in honor of her canonization. It is customary in certain sections of Germany to adorn the doors of houses with birch twigs on the last-named of these days, as a protection against witches; and, in explanation of this custom, tradition relates that Walpurgis was in the habit of accompanying the apostles James and Philip in their missionary journeys, thereby incurring the suspicion of maintaining unchaste relations with them. To remove that suspicion, she planted a dry twig in the ground, which immediately produced leaves. The night of Walpurgis, May 1, has long been regarded as the chosen time when witches begin their infernal practices. To banish them, it was customary to bind wisps of straw to long poles and burn them—a custom which became known under the name of Walpurgis-fire. The bones of this saint, especially of the breast, are said to exude an oil which is a specific against the diseases of domestic animals, and which is distributed in the Convent of St. Walpurgis at Eichstätt. See Bollandus et Godefr. Henschenius, *Acta SS. Februarii* 25 (Antw. 1658), iii, 511-572; Herzog, *Real-Encyklop.* s. v.

**Walsh, Henry**, a Presbyterian minister, was born near Dublin, Ireland, Aug. 5, 1824. He came to the United States in 1840; was educated at Oglethorpe University, Ga.; taught for several years; studied theology in the Princeton Theological Seminary; was licensed by Raritan Presbytery in 1852; was pastor of the churches of Carmel and Macedonia, N. C., one year; and then of Edmiston Church (North Mississippi Pres-

bytery), Miss., until his death, Feb. 14, 1861. See Wilson, *Presb. Hist. Almanac*, 1862, p. 121.

**Walsh, John**, an English Wesleyan minister, was born at Ormskirk, Lancashire, in 1795. It was intended by his parents that he should become a Roman Catholic priest, and his education was in reference thereto. Removing to Liverpool, he was led to Christ under the ministry of Joseph Entwisle. He was received into the ministry in 1814; labored two years on the Lancaster Circuit; was sent to Newfoundland; preached at Carbonear, Blackhead, St. John's, and Harbor-Grace; returned to England in 1825; was appointed to several important circuits; became a supernumerary in 1851; and died Dec. 19, 1857. Although somewhat stiff in manner, he was a powerful preacher and a laborious minister. See *Minutes of Wesleyan Conferences*, 1858; Wilson, *Newfoundland and its Missionaries*, p. 238.

**Walsh, Peter**, a learned and liberal Irish Catholic, was born at Moortown, County Kildare, in the early part of the 17th century. He was probably educated at Louvain, where he became professor of divinity. He was also a Franciscan friar. On his return to Ireland, he became procurator of the Romish clergy; and, at the restoration of Charles II, persuaded many of them to sign a remonstrance against the temporal supremacy of the pope and in favor of the king. For this course he was so persecuted by the opposition that he had to take refuge in England (in 1670). He went to London, where he received an annuity of one hundred pounds for life, and remained true to his early faith, notwithstanding the persecutions he suffered. He died in September, 1687. Mr. Walsh wrote several pamphlets of a controversial character, and a *History*, which was not important.

**Walsh, Thomas**, one of the remarkable men in early Methodism, was born at Ballylin, near Limerick, Ireland, in 1730. He went to school until he was nineteen years of age, when he commenced teaching on his own account. His parents were Romanists, and he was educated in the faith of their Church. His temper was constitutionally serious, bordering on melancholy, and he had deep religious solitudes from his childhood. Devotion to the requirements of his Church brought him no relief. In his eighteenth year he became convinced of the errors of the Church, formally abjured its creed, and united with the Established Church. His religious anxiety was now deepened. He heard Swindells and other Methodist itinerants; and in one of their assemblies "he was divinely assured," to use his own words, "that God, for Christ's sake, had forgiven all his sins." He joined the Methodist Society in New Market, and in 1750 he commenced to preach. Persecutions awaited him, not only from Romanists and Churchmen, but even more severely from the Presbyterians of the North (see Morgan, *Life*, ch. iii). No man contributed more than Walsh to the spread of Methodism in Ireland. "He went like a flame of fire through Leinster and Connaught, preaching twice or thrice a day, usually in the open air. The guileless peasants flocked to hear their own rude but touching language. They wept, smote their breasts, invoked the Virgin with sobbing voices, and declared themselves ready to follow him as a saint over the world" (Stevens). His name became famous throughout the country. The priests became alarmed; they instigated mobs, circulated slanders; but in vain. The people still ran after him and wept aloud under his word, as he proclaimed it in mountains, meadows, highways, market-places, prisons, and ships. In 1758 Wesley called him to London, where he had frequent discussions with the Jews, and preached to the Irish in Moorfields and Short's Gardens. "Such a sluice of divine oratory ran through the whole of his language as is rarely to be met with" (Morgan). "I do not remember ever to have known a preacher," says Wesley, "who, in so few years as he remained upon earth, was the instrument of converting so many peo-

ple." It was while in London he commenced the study of Greek and Hebrew. In these studies he progressed with incredible swiftness. "No Catholic saint ever pored more assiduously and devoutly over his breviary than did this remarkable man over the original Scriptures during the rest of his life" (Stevens, *ut infra*, i, 291). His memory was a concordance. "The best Hebrew I ever knew," exclaims the enthusiastic and generous-hearted Wesley over this "blessed man," as he was wont to call him (*Short History of the Methodists*, par. 71). "I knew a young man who was so thoroughly acquainted with the Bible that if he was questioned concerning any Hebrew word in the Old, or any Greek word in the New, Test., he would tell, after a little pause, not only how often the one or the other occurred in the Bible, but also what it meant in every place. His name was Thomas Walsh. Such a master of Bible knowledge I never saw before, and never expect to see again" (Wesley, *Sermons*, ser. xci). Young men from the University of Cambridge, when in London, chose Walsh to initiate them into the Hebrew tongue. But young Walsh was burning the candle at both ends. The manner of his preaching, intense study, habitual self-absorption, and excessive labor and fatigue broke him down, and his nervous sensibilities, at last, suffered great tortures. Wesley, a sagacious man, and who wrote excellent sanitary rules for his ministers, never seems to have admonished Walsh, for whom, indeed, he seems to have had a sentiment of reverence, if not of awe. Walsh was seized with sickness at Bristol, in February, 1758, sailed for Cork as soon as his strength would permit, and was removed by his friends to Dublin, where, after suffering extreme mental anguish on account of a temporary eclipse of faith—occasioned, no doubt, by nervous disorganization—he died with words of rapture on his lips, April 8, 1759.

The Church has produced few such men as Thomas Walsh. With the devotion of a Kempis—strongly tinged, too, with his asceticism—and the saintliness of Fletcher, he had the memory of Pascal and the studiousness of Origen. "His life," says Southey, "might, indeed, almost convict a Catholic that saints are to be found in other communions as well as the Church of Rome." Socrates was not more lost in contemplation on a Potidean battle-field than was Walsh in introspection and prayer as he walked through the streets of great cities. In his devotions he was sometimes so rapt and absorbed in the visions of God that in these profound and solemn frames of mind he remained for hours still and motionless as a statue. Such were his learning, his talents in the pulpit (where he often seemed clothed with the ardor and majesty of a seraph), the saintly dignity and moral grandeur of his character, that contemporary allusions to him are touched with reverence and wonder (see Stevens, i, 338). "His portraits might almost be taken as fac-similes of the current pictures of Jonathan Edwards, whom he resembled much in other respects" (*ibid.* i, 339, note). Charles Wesley wrote several hymns in memory of Thomas Walsh, commencing "God of unfathomable grace;" "Glory, and thanks, and love;" and "Tis finished, 'tis past." Nine *Sermons* by Walsh were published, with a preface by Morgan (1764, 12mo). See Morgan, *Life of Walsh* (Lond. 1762, 12mo; N. Y., 1843; republished in Jackson's *Early Methodist Preachers*, 3d ed. vol. iii); Horne, *Appendix to Walsh's Life* (in Jackson's *Preachers*, iii, 278 sq.); Jackson, *Life of Charles Wesley* (N. Y., 1842, 8vo), xxi, 551 sq.; Tyerman, *Life of John Wesley*, ii, 200, 239, 661; Smith, *Hist. of Wesl. Methodism*, i, 253, 522; Stevens, *Hist. of Methodism*, i, 287 sq., 337 sq.; Myles, *Chron. Hist. of Methodism*, ann. 1750, p. 69; Crowther, *Portraiture of Methodism* (Lond. 1814), p. 356 sq.; Atmore, *Meth. Memorials* (*ibid.* 1801), p. 438-443; Southey, *Life of Wesley*, ch. xxiii; Wesley, *Works* (3d ed. *ibid.* 14 vols.), vii, 54; xii, 448 (see Index); Tefft, *Methodism Successful* (N. Y. 1860, 12mo), p. 138.

Walsh, Tracy R., a minister of the Methodist

Episcopal Church, South, was licensed to preach in 1827, and admitted into the South Carolina Conference in 1830. Several years later he located and assumed charge of the Marion Academy. For thirteen years the impress of his sterling character was stamped upon the youth committed to his training. During these years he did an amount of pulpit and parochial work seldom exceeded by a regular pastor. In 1849 he re-entered the Conference and continued to travel until elected president of Carolina Female College in 1852. In 1860 he again entered the itinerancy, and on Oct. 20, 1867, died. See *Minutes of Annual Conferences of the M. E. Church, South*, 1867, p. 111.

Walsh, William McKendree, a Methodist Episcopal minister, was born in Hanover County, Va., Feb. 19, 1814; was converted in 1829; and in 1835 entered the ministry in the Virginia Conference. During the following year he was transferred to the North Carolina Conference, within which he labored for thirty years. In 1867 he was admitted into the Baltimore Conference; was supernumerated in 1870; became effective again in 1871, and was appointed to Green Ridge Circuit, and two years later to Hedgesville Circuit, where he died, Dec. 10, 1875. Few men have shown equal fortitude and devotedness. See *Minutes of Annual Conferences*, 1876, p. 20.

Walsingham, Sir Francis, an eminent English statesman, was born at Chiselmhurst, in Kent, in 1536. He was ambassador to the court of France from 1570 to 1577, during which time the Massacre of St. Bartholomew occurred. Here he learned much of the part which Mary Stuart took in the intrigues of that dreadful plot, and acquired a deep and abiding hatred towards her. He went as ambassador to Scotland in 1583, and in 1586 became one of the commission for the trial of Mary Queen of Scots. He afterwards became chancellor of the duchy of Lancaster, and remained such until his death, April 6, 1590.

Walsingham, Thomas, an English Benedictine monk of St. Albans, was precentor at that place in 1440, and historiographer royal to Henry IV about the same time. He wrote two histories of England, and continued the *Polychronicon* of Ranulph Higden, from 1342 to 1417.

Walter of Galloway, originally clerk to Roland, the high-constable of Scotland, was made bishop of Galloway in 1209. He gave the church of Sembray to the abbey of Dryburgh, and died in 1235. See Keith, *Scottish Bishops*, p. 272.

Walter of Glasgow, originally chaplain of king William, was elected bishop of Glasgow in 1207, and consecrated Nov. 2, 1208. He was sent to treat about peace with king John of England, and went to a general council at Rome in 1215. He died in 1232. See Keith, *Scottish Bishops*, p. 237.

Walter of St. Victor was a pupil of Hugo of St. Victor, subprior of that monastery to the death of Richard, in 1173, and thenceforward prior. He died in 1180. He is known to posterity through a yet unpublished work, lengthy extracts from which are found in Bulaeus, *Hist. Universit. Paris*, ii, 200 sq., 402 sq., 562 sq., 629 sq. It bears the title *Libri IV contra Manifestos et Damnatos etiam in Conciliis Hæreses, quas Sophistas Abelardus, Lombardus, Petrus Pictavinus et Gilbertus Porretanus Libris Sententiarum suarum Acunt, Lamentant, Roborant*, and is usually known by the title *Contra quatuor Labyrinthos*. Walter was a stranger to the profound mysticism of Hugo and Richard of St. Victor, but he shared their aversion to the trifling subtleties of scholasticism. To scholasticism he opposes the principle that dialectics can bring into view only formal, but not material, truth. The truthfulness of premises assumed lies altogether beyond its field of research. He was nevertheless so much the slave of authority that he violently opposed every attempt at a

philosophical investigation of doctrine as a dangerous heresy. His work is filled with abusive epithets and denunciations. He accused Peter Lombard of Nihilism, and Abelard of errors with respect to the Trinity.

Various historians, among them Neander, have erroneously identified Walter of St. Victor with Walter of Mauritania (i. e. of Mortagne in Flanders). The latter taught rhetoric at Paris, was the tutor of John of Salisbury (q. v.), became bishop of Laon in 1155, and died in 1174. He left few writings, among which is a polemical letter on the subject of the Trinity addressed to Abelard. See Herzog, *Real-Encyklop.* s. v.

**Walter, Ann**, a Bible Christian minister, was converted in 1820. In 1825 she entered the itinerant work. She bore a long and painful affliction with exemplary patience, and died triumphantly in the faith in 1835.

**Walter, Ernst Johann Konrad**, a German divine who died as doctor of philosophy and pastor at Neukloster, near Wismar, Sept. 25, 1800, was born Aug. 9, 1741, at Claber. He wrote, *Versuch eines schriftmässigen Beweises, dass Joseph der wahre Vater Christi sey* (Berlin, 1791):—*Neue Vorstellungen von den Strafen der Verdammten in der Ewigkeit nach Gründen der Schrift* (Rostock and Leipsic, 1773). See Winer, *Handbuch der theol. Lit.* i, 478, 555. (B. P.)

**Walter, Ferdinand**, a Roman Catholic canonist of Germany, was born Nov. 30, 1794, at Wetzlar; and studied law at Heidelberg, where he was promoted in 1818 as *doctor utriusque juris*. Here he also commenced his lectures, when in 1819 he was called to Bonn as professor of Roman and canon law, where he died, Dec. 12, 1879. He published *Lehrbuch des Kirchenrechts* (Bonn, 1822; 14th ed. 1871, ed. Gerlach). This is his main work, which was translated into French, Spanish, and Italian. Besides, he published, *Corpus Juris Germanici* (1824, 3 vols.):—*Geschichte des römischen Rechts* (1834–40, 2 vols.; 2d ed. 1845; 3d ed. 1860; also translated into French and Italian):—*Deutsche Rechtsgeschichte* (1853, 2 vols.; 2d ed. 1857):—*Das alte Wales* (1859):—*Fontes Juris Ecclesiastici* (1862):—*Naturrecht und Politik* (1863; 2d ed. 1871):—*Das alte Erzstift und die Reichsstadt Köln* (1866):—*Erinnerungen aus meinem Leben* (1865). See *Theolog. Universal-Lexicon*, s. v.; Zuchold, *Bibl. Theolog.* ii, 1414; *Literarischer Handweiser für das kath. Deutschland*, 1880, p. 3 sq. (B. P.)

**Walter, Henry**, a Church of England divine, was born at Louth, Lincolnshire, Jan. 28, 1785. He received a careful religious training, and was educated at St. John's College, Cambridge, taking his degree of A.B. in 1806. In 1838, being left without a curate, he preached in his schoolroom and still kept up his pastoral work. He died in January, 1859. Mr. Walter attained great proficiency as a chemist, astronomer, and naturalist. His intimacy was sought and cherished by the clergy for miles around. His publications were all stamped by his characteristic accuracy of research. They are his *History of England*, finished in 1839 (7 vols.):—his collated edition of the *Primer of Edward VI.*:—*Biographical Notice of Tyndal the Martyr*:—and his *Letters to Bishop Marsh, of Peterborough, on the Independence of the Authorized Version of the Bible*, as well as many of lesser note. See *Christian Observer*, March, 1859, p. 209.

**Walter, Hubert**, archbishop of Canterbury, was born at West Dereham, in Norfolk, where he afterwards founded a Premonstratensian monastery. He was educated in the house of his uncle, Ranulph de Glanville, to whom, on his ordination, he became chaplain. In 1186 he was dean of York. Oct. 22, 1189, he was consecrated lord bishop of Salisbury, and in 1190 sailed for the Holy Land. He was enthroned archbishop of Canterbury May 30, 1193. Towards the close of 1198, Hubert was summoned to Normandy. The two sovereigns—the king of France and the king of England—had selected him to mediate between them, and to effect, if

possible, a reconciliation. He did not succeed, but this instance shows the high estimation in which he was held as an honest and skillful diplomatist. Hubert died April 6, 1199. See Hook, *Lives of the Archbishops of Canterbury*, ii, 584 sq.

**Walter, Johann Gottlob**, a Protestant theologian of Germany, was born April 5, 1704, and died Nov. 16, 1782, as superintendent at Neustadt-an-der-Orla. He is the author of *Prima Gloria Clerogamic Restituta Luthero Vindicata* (Neustadt, 1767). See Winer, *Handbuch der theol. Lit.* i, 751. (B. P.)

**Walter, Michael**. See WALTHER, MICHEL.

**Walter, Nathaniel**, a Congregational minister, son of Rev. Nehemiah Walter, of Roxbury, Mass., graduated from Harvard College in 1729. He was ordained pastor of the Second Church in Roxbury, July 10, 1734; and died March 11, 1776. See Sprague, *Annals of the Amer. Pulpit*, i, 220.

**Walter, Nehemiah**, a Congregational minister, was born in Ireland, in December, 1663, of English parents. As early as 1679, his father, Thomas Walter, settled in Boston, Mass. Nehemiah's preliminary education was received in his native country. In 1684 he graduated from Harvard College, and shortly after went to Nova Scotia, and resided with a French family to learn the language. Returning to Massachusetts, he resumed his studies at Cambridge, and was appointed a fellow of that college. Oct. 17, 1688, he was ordained as colleague with the famous Apostle of the Indians, John Eliot, who was then settled in Roxbury, Mass. Eliot died two years after. About 1717, in consequence of excessive application to study, health failed, and he was incapable of performing the duties of his office. He gradually recovered his health, and resumed his ministry. For twenty-eight years he was without a colleague; but Oct. 19, 1718, his son, Rev. Thomas Walter, was chosen to that position. After five years the son died, and the father again assumed the entire pastoral charge. He died Sept. 17, 1750. A volume of his *Sermons* was published after his death, in 1775. See Sprague, *Annals of the Amer. Pulpit*, i, 217.

**Walter, Thomas**, a Congregational minister, son of Rev. Nehemiah Walter, was born Dec. 13, 1696. He graduated from Harvard College in 1713; was ordained as colleague to his father in Roxbury, Mass., Oct. 19, 1718. Among his publications were, *Grounds and Rules of Music Explained* (1721):—*an Essay upon Infallibility*, etc. (1724). He died Jan. 10, 1724. See Sprague, *Annals of the Amer. Pulpit*, i, 219.

**Walter, William, D.D.**, a Protestant Episcopal clergyman, was born in Roxbury, Mass., Oct. 7, 1737. He graduated at Harvard College in 1756; went to England for holy orders in 1764; and July 22 of the same year was installed rector of Trinity Church, Boston, the third Episcopal Church of that city. He resigned this charge March 17, 1776, and went to Nova Scotia, where he remained several years, and preached during a considerable portion of the time at Shelburne. In 1791 he returned to Boston, and purchased an old mansion in Charter Street, which formed his home during the remainder of his life. In 1792 he was installed rector of Christ Church, Boston. He died Dec. 5, 1800. See Sprague, *Annals of the Amer. Pulpit*, v, 226 sq.

**Walter, William Bicker**, a poet and Unitarian preacher, a descendant of Nehemiah Walter, was born in Boston, Mass., in 1796. He graduated at Bowdoin College in 1818; studied theology at Harvard, and sometimes preached, but did not obtain a license. He died at Charleston, S. C., in 1822. He was the author of *Sukey; a Poem* (Boston, 1821):—and *Poems* (ibid. 1821). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Walters, Christian**, a Methodist Episcopal minister, was born in Dauphin County, Pa., March 16, 1827. He was converted in 1842; licensed to preach in 1852; labored several years as colporteur for the Bible Society;

and in 1856 entered the Philadelphia Conference. After serving Safe Harbor Circuit two years; St. Paul's, Lancaster, two years; Tamaqua two years; Port Carbon two years; and Second Street, Philadelphia, one year, he took the supernumerary relation, travelled some time for the improvement of his health, and finally settled in Harrisburg, where he died, July 12, 1869. Mr. Walters was remarkable for his gentlemanliness, zeal, and perseverance. See *Minutes of Annual Conferences*, 1870, p. 47.

**Walters, John**, a Wesleyan Methodist missionary, was a native of South Wales. He was converted in his youth, was sent to the West Indies in 1830, and appointed to the island of Jamaica. On the death of William Wood (q. v.), May 24, 1835, he was sent from Spanish Town to St. Ann's Bay, to supply the place of the deceased, although he stated to the committee he had an invincible aversion to the place, owing to an impression he could not get rid of, that in a few weeks he himself would die there. With thin and pallid features the slender and delicate Walters startles the mourning people with the words, "Dear Christian friends, I am come this morning to preach Mr. Wood's funeral sermon, and I shall at the same time preach my own also." On that very day the yellow fever smites him, and in one week he passes away. Regard for the poor and sick, and fervent zeal for God, were traits in the character of the young and holy Walters. See *Minutes of Wesleyan Conferences* (1836); Bleby, *Romance without Fiction, or Sketches from the Portfolio of an Old Missionary* (Lond. and N. Y. 16mo), sk. xxiii, p. 459 sq.

**Walters, Thomas**, a Methodist Episcopal minister, was born at Hanley, England, July 18, 1824, of devoted Wesleyan parents, who gave him a careful training, and brought him to Christ at the age of fifteen. He received license to preach at the age of nineteen, and continued on circuit work until 1848, when he sailed to the United States, and settled in Belleville, N. J., where his preaching soon attracted attention, and he received a call to supply Sandystone Circuit. In 1849 he united with the New Jersey Conference, and was appointed to Vernon Circuit. Subsequently he labored at Newton, Rockaway, Barryville, Milford, Rome and Greenville, Asbury, Flemington; Second Church, Rahway; Belvidere; St. Paul's, Staten Island; Belleville, Boonton, Dover; Eighth Avenue, Newark; Prospect Street, Paterson; and First Church, Hackensack. He died July 7, 1879. Mr. Walters was intensely practical, a diligent reader, and a thorough student, eminently scriptural; had a very tenacious memory, a clear, full, rich voice; was cultured in music, and in oratory. See *Minutes of Annual Spring Conferences*, 1880, p. 36.

**Walther** (WALTHERUS or GUALTERUS), a German Lutheran divine, was born at Allendorf, in Thuringia, in the latter part of the 16th century. He studied divinity at Jena, and gave special attention to classical and Oriental languages. He became professor of Greek and Hebrew at Jena, and afterwards was appointed superintendent of the Lutheran Church in the duchy of Saxe-Gotha and in the duchy of Brunswick-Wolfenbittel. He died Nov. 15, 1640. He was the author of several theological and linguistic works. See Zeumerus, *Vita Professorum Jenensium*.

**Walther, Christian** (1), a German theologian, was born about the beginning of the 16th century. He studied divinity, took orders, and lived for some time in a convent. Afterwards he joined the Protestants and settled at Wittenberg, where he was much esteemed by the theologians for his learning. He was employed by the celebrated printer Hans Lufft as proof-reader for thirty-four years; was also sub-editor of the Wittenberg edition of Luther's works; and was the author also of some pamphlets and other works. He died about 1572. See Zeltner, *Theatrum Virorum Eruditiorum*, p. 542.

**Walther, Christian** (2), D.D., a German divine,

was born at Norkitten, near Königsberg, in 1656. He was educated at Königsberg, Leipsic, and Jena, receiving the degree of A.M. at the latter place in 1677. He then returned to his native country, where he held several ecclesiastical offices. In 1701 he became a member of the Academy of Science at Berlin; in 1703 was appointed professor of divinity in the University of Königsberg; in 1704 was made inspector of the synagogue of the Jews in the same city. During some time he was rector magnificus of the University of Königsberg, and died there in 1717. Among his works are, *Tractatus de Cultu Divino Sanctuarii Veteris Testamenti, quem Stando Fieri Oportebat*;—*De Duabus Tabulis Lapideis*;—*De Quatuor Penarum Generibus apud Hebræos*;—*Disputationes VIII de Pluralitate Personarum in Divinis, ex Genesi i, 26*.

**Walther, Christoph Theodosius**, a German missionary, was born at Schildberg, in Brandenburg, in 1699, and studied divinity at Halle. On the invitation of Frederic IV, king of Denmark, he arranged to go as a missionary to the Danish possessions in East India. He went to Copenhagen in company with Henry Plüschow and Bartholomew Ziegenbalg in 1705, and they arrived at Tranquebar, India, July 9, 1706. Walther then learned Portuguese and several Indian dialects, and visited the whole coast of Coromandel, preaching to the inhabitants with great success. He founded the missionary establishment of Majinbaram. On account of failing health, he returned to Europe in 1740; but, before reaching Denmark, he died at Dresden, April 27, 1741. He was the author of several works pertaining to his missionary labors, and for the benefit of the heathen nation to which he preached. See Schöttgen, *Commentarii de Vita et Agone Christiani Theodosii Waltheri* (Halle, 1743).

**Walther, Heinrich Andreas**, a German Protestant clergyman, was born at Königsberg, in Hesse, in 1696. He became minister at Worms in 1729, and of St. Catherine's, Frankfort-on-the-Main. In 1741 he was honored with the rank of senior of the Protestant clergy at Frankfort, and with the degree of doctor of theology by the faculty of Giessen. He died in 1748. Among his principal works are the following: *Disputatio ex Antiquitate Orientali de Zabis*;—*Finsterniss bey dem vermeinten Lichte der römisch-katholischen Lehre, gegen ein von einem Jesuiten herausgegebenes Büchlein, genannt Licht in der Finsterniss*;—*Exegesis Epistolæ Judæ*;—*Erste Gründe der Weisheit und Tugend*;—and *Erläuterter Katechismus*.

**Walther, Johann**, a German divine, was one of Luther's intimate friends. As a composer of tunes, he was able to assist the great Reformer in improving Church psalmody. In 1524 he published, with Luther's assistance, the first *Lutheran Choral Book*, containing some of his own tunes. He filled the office of precentor at Torgau, and was afterwards director of the choir to prince John Frederick, and to prince Maurice of Saxony. In 1530 he removed to Wittenberg, received the degree of A.M., and was appointed a lecturer in the university. In 1547 he removed to Dresden, where he probably died, in 1564. He is the author of a fine German hymn, *Herzlich thut mich erfreuen* (Eng. transl. in *Lyra Germ.* ii, 288: "Now fain my joyous heart would sing"). See Koch, *Gesch. des deutsch. Kirchenliedes*, i, 247, 285 sq.; 455 sq.; ii, 471; viii, 655. (B. P.)

**Walther, John L.**, a Methodist Episcopal minister, was born in Kulmbach, Bavaria, Sept. 10, 1818. He emigrated to America in 1840; was powerfully converted at watch-night services in St. Louis, Mo., at the close of 1848; served the Church grandly as exhorter and local preacher; joined the Illinois Conference in 1851, which he served faithfully and successfully until 1861, when he was appointed chaplain of the Forty-third Regiment of Illinois Volunteers. As chaplain he was persistent in all his duties, and highly honored by officers and soldiers. He was shot in the chest April 6,

1862, on the battle-field of Shiloh, while caring for the wounded, and expired almost without a struggle. Mr. Walther was the third chaplain of the Union army dying in the service of his nation; and was first in excellence among German preachers in the Illinois Conference. See *Minutes of Annual Conferences*, 1862, p. 224.

**Walther, Michel** (1), a Lutheran theologian of Germany, was born at Nuremberg, April 6, 1593. He studied, at first, medicine at Wittenberg; but afterwards he betook himself to the study of theology at Giessen and Jena. In the latter place he was appointed adjunct to the philosophical faculty. For a time he acted as court-preacher to the duchess of Brunswick and Lüneburg, occupying at the same time a professorship at Helmstädt. After the death of the duchess, in 1626, he was appointed court-preacher and general superintendent at East Friesland; in 1642 he was called to Zelle, where he died, Feb. 9, 1662. He wrote, *Harmonia Biblica*:—*Postilla Mosaisca, Prophetica, Hiero-psaltica, Evangelistica*:—*Comm. in Epist. ad Ebræos*:—*Introitus ad Psalterii Sacrarum*:—*Spicilegium Controversiarum de Nominibus Jehovah, Elohim*:—*Agnus est Phas*:—*Tractatus de Unctione Christi*, etc. See Freher, *Theatrum Eruditum*; Hoffmann, *Lexicon Universale*; *Acta Eruditum Latinus*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Walther, Michel** (2), a Lutheran theologian of Germany, son of the preceding, was born March 3, 1638, at Aurich, in Friesland. When sixteen years of age he entered the University of Wittenberg, where he was appointed, in 1687, professor of theology. He died Jan. 21, 1692. He wrote, *De Fide Nicæna*:—*De Fide Infantum Baptizatorum*:—*De Catechizatione Veterum*:—*De Novo Legislatore Christo contra Socinianos et Arminianos*:—*De Satisfactione Christi*:—*De Dissimilitudine Ortus Nostri et Christi Hominis*:—*De Duabus Tabulis Lapidatis ex Ezod. xxx, 18, et xxxii, 15, 16*:—*De Ingressu Sacerdotis Summi in Sanctum Sanctorum ex Levit. xvi*:—*De Chiromantia ex Job. xxxvii, 7, non Probabili*:—*De Deo Abscondito ex Jes. xlv, 15*:—*De Viro Nominis Zemach, sive German ex Zach. vi, 12*:—*De Sensu Verborum ἐπιβαλὼν ἐκλαυε Marc. xiv, 72*:—*De κοινωνία φύσεως ex 2 Petr. i, 4*:—*De Articuli SS. Trinitatis Antiquitate, Veritate et Necessitate*, etc. See Bunemann, *De Doctis Westphalis*; *Nova Literaria Germaniæ*; Pipping, *Memoriæ Theologorum*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Walther, Rudolph**, a Reformed theologian of Germany, was born at Zurich, Nov. 9, 1519. He studied at different places, visited England, and, after his return, he continued his studies at Marburg. Here he attracted the attention of the landgrave, Philip of Hesse, who took him in 1541 to Ratisbon, where he acted as clerical secretary. Here he made the acquaintance of Melancthon, Bucer, Sturm, Cruciger, and others. After his return, he was appointed pastor at Schwammendingen, and in 1542 pastor of St. Peter's at Zurich. He died Nov. 25, 1586. He wrote, *Apologia Zwinglii*:—*Commentarii in Libros Historicos Novi Testamenti*:—*Epistolæ Pauli, Petri, Jacobi, Johannis, et Judæ*:—*Homiliæ in Evangelia Dominicalia*:—*Homiliæ in Totum Novum Testamentum*:—*Homiliæ in Prophetas XII Minoras*:—*Homiliæ XXXII de Incarnatione, Nativitate, et Vita Filii Dei*, etc. See Verheiden, *Elogia Præstantiorum aliquot Theologorum*; Adam, *Vita Eruditum*; Teissier, *Éloges des Savans*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Walton, Brian, D.D.**, a learned English prelate, was born at Seamer, in the district of Cleaveland, in Yorkshire, in 1600. He was educated at Cambridge, where he took the degree of A.M. in 1623. He first went to Suffolk as master of a school, and for some time served as curate; he then went to London, where he acted as curate of All-hallows', Bread Street. In 1626 he became rector of St. Martin's Orgar, in London, and of Sandon, in Essex. Some time afterwards he became a

prebendary of St. Paul's, London, and chaplain to the king. In 1639 he commenced as doctor of divinity at Cambridge. About this time he became involved in the troubles between the king and Parliament, in which he made himself obnoxious to the Puritans, and was deprived of his preferments and compelled to fly from London. He took refuge in Oxford, and in 1645 was incorporated doctor of divinity. There he formed the plan of his famous *Polyglot Bible*, and commenced the collection of materials; but it was not completed till some years after his return to London, which occurred after the death of the king. The work appeared in six volumes, large folio. It was published by subscription, and is thought to be the first book printed in England on that plan. The first volume appeared in September, 1654; the second in July, 1655; the third in July, 1656; and the last three in 1657. It is accompanied by the *Lexicon Heptaglotton* of Dr. Edmund Castell (published in 1669, in 2 vols. fol.). This is a lexicon of the seven Oriental languages used in Walton's *Polyglot*, and has grammars of those languages prefixed. The *Polyglot* cannot be considered complete without it. The Prolegomena to the *Polyglot*, which are highly valued, and have several times been reprinted separately (Zurich, 1573; Leips. 1777, etc.), are a monument to the author's learning, and contain sixteen dissertations on the languages, editions, and translations of the Bible, the various readings, critical condition, Jewish and other revisions of the text, the cognate Shemitic tongues and versions, etc. Some copies of the *Polyglot* are ruled with red lines by hand, and are therefore more valuable. Walton published, besides his *London Polyglot*, *The Considerator Considered* (1659), a reply to the *Considerations* of Dr. Owen:—and an *Introductio ad Lectionem Linguarum Orientalium* (1655). In 1660, after the Restoration, he was appointed chaplain to the king; and in 1661 bishop of Chester. He enjoyed the honor of the office but a short time, for he died Nov. 29, 1661. See Todd, *Life and Writings of the Right Rev. Brian Walton, D.D.*, Lord Bishop of Chester (Lond. 1821). See *POLYGLOT BIBLES*.

**Walton, James**, a minister in the Methodist Episcopal Church, South, was born near Chester, S. C., Aug. 16, 1799. He removed to Knox County, Tenn., in early life, where he received a careful religious culture, and was trained in the art of agriculture; embraced religion at the early age of eight years; removed to Mississippi in 1832; for two years represented Oktibbeha County in the State Senate; was licensed to preach in 1838; and in 1842 was admitted into the Mississippi Conference, where he labored with great zeal and devotedness until his death, Jan. 18, 1861. Mr. Walton was deeply pious, had a strong, well-balanced mind, and was an example of prudence and fidelity. See *Minutes of Annual Conferences of the M. E. Church, South*, 1861, p. 318.

**Walton, Jonathan, D.D.**, an English clergyman of the Episcopal Church, was born in 1774; became rector of Birdbrook, in Essex, and rural dean; and died in 1846. He was the author of *Lectures on Repentance*:—*The Prodigal Son*, etc. (1833):—*The Glory of the Latter House* (1842):—and several single *Sermons*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Walton, Robert Hall**, a Presbyterian divine, was born in Hartford, Conn., in 1833. He entered Delaware College, and graduated in 1854, and commenced his theological studies in Union Seminary in 1857. He was ordained in 1860, and labored in the Broadway Church, Va., as a stated supply. From this he went to Georgia, and supplied the Church at Cassville until his death, April 2, 1876. (W. P. S.)

**Walton, William, D.D.**, a professor and clergyman of the Protestant Episcopal Church, died in New York, Sept. 21, 1869, aged fifty-nine years. He was the eldest son of rear-admiral Walton of the British navy; and at the time of his death he was professor of He-

brew in the General Theological Seminary, New York city. See *Amer. Quar. Church Rev.* Jan. 1870, p. 636.

**Walton, William C.**, a Presbyterian minister, was born in Hanover County, Va., Nov. 4, 1793. He was educated at Hampden Sidney College; licensed to preach Oct. 22, 1814; ordained April 25, 1818; and on May 6 following was installed pastor of the Presbyterian Church in Hopewell. In 1823 he accepted a call to the Third Presbyterian Church in Baltimore; in 1825 returned to Virginia; in July, 1827, was installed pastor of the Second Presbyterian Church in Alexandria, Va.; in October, 1832, of the Free Church in Hartford, Conn., where he continued to labor until his death, Feb. 18, 1834. He was a most zealous and devoted minister, full of love for souls and the glory of God. See Danforth, *Life of W. C. Walton* (1837, 12mo); *Christ. Quar. Spectator*, x, 193; Sprague, *Annals of the Amer. Pulpit*, iii, 565.

**Waltz, Henry C.**, a Methodist Episcopal minister, was born in Wayne County, Ind., June 5, 1843. He spent his boyhood on a farm; entered Indiana Asbury University in 1860; was converted in 1862; graduated in 1866; spent twenty-two months in travelling over Europe and the Orient; lectured the following year on the sights, scenes, customs, and habits of the people of the Old World; joined the North Indiana Conference in 1869; and served the Church at Wabash and Fort Wayne. In 1871 he joined the Colorado Conference, which he served faithfully until 1875, when his failing health obliged him to take a supernumerary relation. He next removed to Quincy, Ill., where he died, May 11, 1877. As a writer, Mr. Waltz was clear, lucid, instructive, and interesting; as a preacher, above the average, faithful, practical, logical; as a pastor, devoted; as a father, affectionate. See *Minutes of Annual Conferences*, 1877, p. 82.

**Wama** (or **Vama**), in Hindû mythology, was the wife of king Aswarena, who sprang from the holy family of Ikswaka. She gave birth, by her husband, to Parswa, who became so renowned for his piety that he was made one of the twenty-three elders of Buddha.

**Wamack, Drury**, a minister in the Methodist Episcopal Church, South, was born in Rutherford County, N. C., Oct. 12, 1806. He professed religion after reaching his majority, and entered the Tennessee Conference. In 1854 he went to Texas, and entered the North-west Texas Conference. He died in 1878 or 1879. See *Minutes of Annual Conferences of the M. E. Church, South*, 1879, p. 77.

**Wambaugh, Abraham B.**, a Methodist Episcopal minister, was born in Hunterdon County, N. J., Oct. 26, 1815. He was converted at the age of thirteen; joined the Ohio Conference in 1838, and served at Jamestown, Bellefontaine, East Liberty, Jamestown a second term, Columbus, and Circleville. In 1844, because of failing health, he located, studied law, and for six years pursued that profession, though all the time punished by a guilty conscience. In 1862 he was readmitted into the Conference, in which he labored earnestly until his death, Aug. 14, 1873. Mr. Wambaugh was a minister of large ability, reserved among strangers, amiable among acquaintances, always very dignified. See *Minutes of Annual Conferences*, 1873, p. 146.

**Wamen.** See VANAMA.

**Wan**, in Norse mythology, is one of the infernal streams in the kingdom of Hell.

**Wanadis**, in Norse mythology, is a surname of *Freia*, the goddess of the Wanæs, she having sprung from that nation.

**Wanagaren** (or **Vanagaren** or **Banafsheren**), in Hindû mythology, is the son of the giant-king Bali, and reigned in Maralipuram. Because Krishna's son Anuredh enticed his daughter and was captured, Krishna carried on a war with him, and captured his kingdom, notwithstanding Siva's defence, and cut off the

giant's thousand hands, all but two, with which he is obliged to pay homage. It would seem as if this myth were designed to express the removal of the Siva-worship by Vishnu.

**Wanaheim**, in Norse mythology, is the country of the Wanæs, and is thought to be in the extreme north of Europe, but is difficult to locate exactly either its history or its geography.

**Wandalin, Johan** (1), a Protestant theologian of Denmark, was born Jan. 26, 1624, at Viborg, in Jutland. At the age of fourteen he was acquainted with the Hebrew, Chaldee, Syriac, Arabic, and Rabbinical languages. He studied at Copenhagen, Leyden, Utrecht, and other universities. In 1651 he returned to Copenhagen; was appointed in 1652 professor of languages, and in 1655 professor of theology. He died as bishop of Seeland in 1675. He wrote, *Comment. in Hag-gæum*; — *Comment. in Librum Ezræ*; — *Ezeritatt. in Historiam Sacram Antediluv.*; — *De Statu Animarum Post Mortem*, etc. See Witte, *Memoriae Theologorum*; Vindingi, *Academia Hafniensis*; Barthelini, *De Scriptoribus Danis*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Wandalin, Johan** (2), son of the preceding, was born at Copenhagen, Jan. 14, 1656, where he also became professor of Oriental languages in 1683. He died March 20, 1710. He wrote, *Dissertatio Philologico-theologica de Prophetis et Prophetiis* (Hafniae, 1676); — *Discussio Spei Speciosa de Conversione Judæorum* (ibid. 1702). See Raupach, *De Utilitate Peregrinationis Danicæ*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; Fürst, *Bibl. Jud.* iii, 493. (B. P.)

**Wandalin, Peter**, a Protestant theologian and linguist of Germany who died in 1659, is the author of *Catalogus 300 Vocabulorum Danicorum Cognationem ex Lingua Hebr. Ducentium* (Hafniae, 1651). He also wrote *Paraphrasis Germ. in 7 Psalmos Penitentiales*, in *Epist. ad Galatas*, *Philippenses*, *Hebræos*, et *Tres Johannis Epistolas*. He wrote likewise in the Danish language. See Moller, *Cimbria Litterata*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Wandelbert**, a saint of German extraction, was born A.D. 813, and became a monk in the monastery of Prüm. He was a learned theologian and Latin scholar, whose attainments not only won for him the position of master in the school of his convent, but also gave him literary celebrity and earned for him the notice of the emperor Louis the Pious. Wandelbert was a devoted educator and scholar, and also a busy writer. He left numerous works at his death, both in prose and verse, only two of which are still extant. The first, entitled *Vita et Miracula S. Goaris Presbyteri*, was published at Mayence in 1489, and afterwards incorporated by Surius and Mabillon in their respective *Acta*. It originated in the desire to perpetuate the fame of St. Goar, whose cell on the Rhine was given to the monastery of Prüm by kings Pepin and Charlemagne, and is valuable for a correct apprehension of the conditions of Carolingian times. The second work, a *Martyrologium*, is more important. It was written in verse, and completed about A.D. 850. A preface in prose was prefixed, which describes the different meters employed by him, but otherwise not in general use in his age; and upon this follow six lyrics whose burden is the invocation of God, an address to the reader, a dedication to the emperor Lothaire, a statement of the plan of the work, and a survey of the different parts of the year. The martyrology itself begins with Jan. 1, and describes in brief the life, character, and death of one or more saints for each day in the year. The conclusion of the work is made by a *Hymnus in Omnes Sanctos* in Sapphic verse; and two other hymns on the seasons and pastoral occupations, etc., in heroic verse. These poems cannot be regarded as successful essays in poetry so much as they must be considered noteworthy productions of the learned culture of that time. The martyrology, unaccompanied by the minor

poems above described, was first published in 1536 by Bede, and afterwards by Molanus, in Usuard, and completely by D'Achéry, in the *Spicilegium*, v, 305 sq. Wandalbert died probably in the year 870. See Trithemius, *De Scriptoribus Eccl.* p. 281 sq.; Oudinus, *Comment. de Scriptoribus*, ii, 149 sq.; Fabricius, *Bibl. Med. et Inf. Lat.* vi, 314 sq.; *Hist. Lit. de la France*, v, 377 sq.; Bähr, *Gesch. d. röm. Lit. im karol. Zeitalter*, 114 sq., 229 sq.; Schröckh, *Kirchengesch.* xxiii, 215 sq.; Rettberg, *Kirchengesch. Deutschlands*, i, 465, 482.—Herzog, *Real-Encyclop.* s. v.

**Wandering BEGGARS, CLERGY, AND MONKS.** See VACANTIV.

**Wandering** IN THE WILDERNESS. See EXODE; WILDERNESS OF THE WANDERING.

**Wandering Jew.** See JEW, THE WANDERING.

**Wandsworth**, a large village of England, county of Surrey, on the Wandle, near its mouth in the Thames, five miles south-west of St. Paul's, and now included in the city of London; noted as being the seat of the first Presbyterian Church and the first presbytery. In 1572 the first presbytery was organized secretly. The members were Mr. Field, lecturer of Wandsworth; Mr. Smith, of Mitcham; Mr. Crane, of Roehampton; Messrs. Wilcox, Standen, Jackson, Bonham, Saintloe, and Edmonds; and afterwards Messrs. Travers, Clarke, Barber, Gardiner, Crook, Egerton, and a number of very influential laymen. Eleven elders were chosen, and their duties described in a register entitled *The Orders of Wandsworth*. See PRESBYTERIAN CHURCHES.

**Wanes**, in Norse mythology, is a people the location of whose country, Wanaheim, is not definitely given; sometimes being thought to be on the Don (Tanais), sometimes on Cape North. This people is remarkable only as being implicated in a long and frightful war with the Asas, which seemed to lead to the destruction of both, until finally peace was made and hostages exchanged, whereby the Asas received Niord and Freia, and the Wanes Häner and Mimer. Both parties also spit into a cask, from whose contents the Asas then created the white man Quaser. The Wanes appear to have been an experienced people, because their hostages introduced the worship of deities among the Asas. They seem, however, to have been inexperienced in state management, as the Asas made Häner their king, while the wise Mimer was made his adviser; from this is explained the fact of the partial submission of the Wanes to the conquering Asas.

**Wagnereck**, HEINRICH, a German Jesuit, was born in 1595, and died Nov. 11, 1664. He wrote, *Notæ in Confessionem S. Augustini*:—*De Creatione Animæ Rationalis*:—*Antitheses Catholice de Fide et Bonis Operibus*, *Aræculis IV, VI, XX*, *Confessionis Augustanæ Opposita*:—*Judicium Theologicum super Questione: an Pax, qualem Desiderant Protestantes, sit secundum se Illicita?* etc. See Witte, *Diarium Biographicum*; Alegambe, *Bibliotheca Scriptorum Societatis Jesu*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Wanker**, FERDINAND GEMINIAN, a Catholic divine of Germany, was born Oct. 1, 1758, at Freiburg, in the Breisgau, where he also studied, and where, on account of his excellent examination, he was promoted as doctor of divinity. In 1782 he received holy orders at Constance, in 1783 was made subregens at the seminary in Freiburg, and in 1788 was appointed professor of ethics. For a great many years he occupied this chair, and was about to be confirmed as archbishop of Freiburg, when he died, Jan. 19, 1824. He is the author of *Christliche Sittenlehre* (Ulm, 1794; 3d ed. Vienna, 1810). He also wrote, *Ueber Vernunft und Offenbarung in Hinsicht auf die moralischen Bedürfnisse der Menschheit* (ibid. 1804; new ed. Freiburg, 1819):—*Vorlesungen über Religion nach Vernunft und Offenbarung* (Mayence, 1828), etc. His works were edited by Friedrich Weick (Sulzbach,

1830 sq. 4 vols.). See Werner, *Gesch. der katholischen Theologie*, p. 264; Hug, *Rede auf Ferd. Wanker, Dr. u. Prof. der Theologie*; *Theologisches Universal-Lexikon*, s. v.; Winer, *Handbuch der theol. Lit.* i, 286, 316; ii, 324, 826. (B. P.)

**Wanley**, NATHANIEL, an English clergyman and author, was born at Leicester in 1633, and educated at Trinity College, Oxford. He became minister at Beeby, Leicestershire, and subsequently vicar of Trinity Church, Coventry. He died in 1680. Mr. Wanley was the author of *Vox Dei*; or, *The Great Duty of Reflection upon a Man's Own Ways* (London, 1658):—*The Wonders of the Little World*; or, *A General History of Man* (1678):—*The History of Man*; or, *The Wonders of Human Nature in Relation to the Virtues, Vices, and Defects of Both Sexes* (1704). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Wansleben**, JOHANN MICHAEL, an Oriental scholar and traveller in Abyssinia and Egypt, was born in Thuringia in 1635. He was living at Erfurth in 1663, when he was sent by Ernest, duke of Saxe-Gotha, with instructions to conciliate, if possible, the good-will of the Abyssinians, and open up the way for teachers of the Reformed religion. He lingered in Egypt, and, on his return, not being able to account for the money intrusted to him, revolted to the Roman Catholic Church in 1667. He then went to Paris, whence he was sent by Colbert, in 1672, to Egypt, to purchase rare manuscripts for the king's library. In 1678 he became vicar of a church near Fontainebleau, and subsequently vicar of Bouron, where he died in 1679. He was the author of *Historia Ecclesiæ Alexandrinæ*:—*Relazione dello Stato Presente dell' Egitto*:—*Nouvelle Relation en Forme de Journal de son Voyage Fait en Egypte* (1677). See Mosheim, *Hist. of the Church*, bk. iv, cent. xvii, § ii, pt. i, ch. ii.

**Waple**, EDWARD, an English clergyman of the 17th century, became prebendary of Bath and Wells in 1677; archdeacon of Taunton in 1682; prebendary of Winchester in 1690; and died in 1712. He was the author of *Book of the Revelation Paraphrased* (1693):—and *Seventy Sermons* (1714-20, 3 vols.; a second edition with *Life*, 1729). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Wappers**, GUSTAVE, a Flemish painter, was born at Antwerp in 1803. He studied there, and afterwards at Paris, where he adopted the style of the Romantic school. In 1830 he produced the *Devotions of the Burgomasters of Leyden*, which established his reputation as an original historical painter. He was secretary of Leopold I, who made him a baron; and was director of the Academy of Antwerp until about 1855, when he removed to Paris, and died there Dec. 6, 1874. Among his best works are, *Christ at the Sepulchre*:—*Charles I Taking Leave of his Children*:—*Charles IX on the Night of St. Bartholomew*:—and *Execution of Anne Boleyn*.

**War** (prop. מלחמה, πόλεμος, but represented in the Heb. by many subsidiary terms), HEBREW. We may define war as "an attempt to decide a contest between princes, states, or large bodies of people, by resorting to excessive acts of violence, and compelling claims to be conceded by force."

I. *Early History of Warfare*.—This we treat, however, only in its relation to the Hebrews.

1. *Patriarchal*.—It is probable that the first wars originated in nomad life, and were occasioned by the disputes which arose between wandering tribes for the exclusive possession of pasturage favorable to their flocks and herds. Tribes which lived by hunting were naturally more warlike than those which led a pastoral life; and the latter, again, were more devoted to war than agricultural races. There was almost a natural source of hostility between these races: the hunters were enraged against the shepherds because they appropriated animals by domestication, and the shepherds

equally hated the agriculturists because they appropriated land by tillage, and thus limited the range of pasturage. Hunting also indisposed those who lived by the chase to pursue more toilsome and less exciting occupations; those who thus supported themselves sought to throw all the burden of manual labor on their wives, their children, and afterwards on persons whom they reduced to slavery. There is a universal tradition in Western Asia, that Nimrod, mentioned in Scripture as "a mighty hunter before the Lord," was the first who engaged in extensive wars for the purpose of obtaining slaves, and that he was also the first who introduced the practice of compelling conquered nations to rescue themselves by the payment of tribute as a ransom. So early as the days of Abraham, we find that wars were undertaken for the express purpose of obtaining slaves and tribute. Chedorlaomer forced several neighboring princes, including the king of Sodom, to pay him tribute for twelve years; and when they ceased to submit to this exaction, he invaded their territories for the purpose of reducing the inhabitants to slavery. He succeeded, and carried away a host of captives, among whom were Lot and his family; but the prisoners were rescued by Abraham.

2. *Among the Early Nations, Neighbors to the Israelites.*—From the existing monuments of Egypt and Assyria, we learn that war was, among the ancient nations, the main business of life. The Egyptians early possessed a considerable standing army, which was probably kept up by conscription. "Wherever," says Rosellini, "the armies are represented on the great monuments of Egypt, they are composed of troops of infantry, armed with the bow or lance, and of ranks of war-chariots, drawn by two horses. The few figures upon horses almost all belong to foreigners." Chariots also appear in Homer, as the principal strength of the Egyptian army (*Iliad*, ix, 383). Champollion also says of the war-chariots: "This was the cavalry of the age; cavalry, properly speaking, did not exist then in Egypt." Hence, when Pharaoh pursued the fugitive Hebrews, he "took six hundred chosen chariots," evidently the royal guard; and also all the chariots of Egypt, i.e. the remainder of his disposable mounted forces; as the infantry could not well take part in the pursuit. "And the Egyptians followed them and overtook them, where they were encamped by the sea, all the chariot-horses of Pharaoh and his riders and his host" (*Exod.* xiv, 6, 7, 9, 23, 25, 26, 28). The Assyrian monuments exhumed by Botta and Layard exhibit the military force of the Assyrians as composed of infantry, armed with the bow and the lance; also of war-chariots and regular cavalry (*Isa.* xxxvi, 8, 9; *Ezek.* xxiii, 12). The war-chariots which are depicted on the walls of Khorsabad are low, with two small wheels, with one or two persons standing in each, besides the driver; the horses are full of mettle, some of them splendidly caparisoned (*Nah.* iii, 2, 3). See CHARIOT.

II. *Military Tactics among the Hebrews.*—(In this section we follow Kitto's *Cyclopædia*.) The Hebrew nation, so long as it continued in Egyptian bondage, might be regarded as unacquainted with military affairs, since a jealous government would scarcely permit so numerous and dense a population as the pastoral families of Israel which retained their seat in Goshen certainly were to be in possession of the means of resistance to authority; but, placed as this portion of the people was, with the wanderers of the wilderness to the south and the mountain robbers of Edom to the east, some kind of defence must have been provided to protect its cattle and, in a measure, to cover Lower Egypt itself from foreign inroads. Probably the laboring population, scattered as bondmen through the Delta, were alone destitute of weapons; while the shepherds had the same kind of defensive arms which are still in use and allowed to all classes in Eastern countries, whatever be their condition. This mixed state of their social position appears to be countenanced by the fact that,

when suddenly permitted to depart, the whole organization required for the movement of such a multitude was clearly in force; yet not a word is said about physical means to resist the pursuing Egyptians, although at a subsequent period it does not appear that they were wanting to invade Palestine, but that special causes prevented them from being immediately resorted to. The Israelites were, therefore, partly armed; they, doubtless, had their bows and arrows, clubs, and darts, wicker or ox-hide shields, and helmets (cape) of skins or of woven rushes.

From their familiar knowledge of the Egyptian institutions, the Israelites, doubtless, copied their military organization, as soon as they were free from bondage, and became inured to a warlike life during their forty years' wandering in the desert; but with this remarkable difference, that while Egypt reckoned her hundred thousands of regulars, either drawn from the provinces or nomads by a kind of conscription, such as is to be seen on the monuments, or from a military caste of hereditary soldiers, the Hebrew people, having preserved the patriarchal institution of nomads, were embodied by families and tribes, as is plainly proved by the order of march which was preserved during their pilgrimage to the Land of Promise. That order likewise reveals a military circumstance which seems to attest that the distribution of the greatest and most warlike masses was not on the left of the order of movement—that is, towards their immediate enemies—but always to the front and right, as if even then the most serious opposition might be expected from the east and north-east—possibly from a reminiscence of past invasions of the giant races and of the first conquerors, furnished with cavalry and chariots, having come from those directions.

At the time of the departure of Israel, horses were not yet abundant in Egypt, for the pursuing army had only six hundred chariots; and the shepherd people were even prohibited from breeding or possessing them. The Hebrews were enjoined to trust, under divine protection, to the energies of infantry alone, their future country being chiefly within the basin of high mountains, and the march thither over a district of Arabia where, to this day, horses are not in use. We may infer that the inspired lawgiver rejected horses because they were already known to be less fit for defence at home than for distant expeditions of conquest, in which it was not intended that the chosen people should engage.

Where such exact order and instruction existed, it may not be doubted that in military affairs, upon which, in the first years of emancipation, so much of future power and success was to depend, measures no less appropriate were taken, and that, with the Egyptian model universally known, similar institutions or others equally efficient were adopted by the Israelites. Great tribal ensigns they had, and thence we may infer the existence of others for subordinate divisions. Like the Egyptians, they could move in columns and form well-ordered ranks in deep fronts of battle; and they acted upon the best suggestions of human ingenuity united with physical daring, except when expressly ordered to trust to divine interposition. The force of circumstances caused in time modifications of importance to be made, where doctrine had interfered with what was felt to hinge on political necessities; but even then they were long and urgently wanted before they took place, although the people in religion were constantly disregarding the most important points, and forsaking that God who, they all knew and believed, had taken them out of bondage to make them a great nation. Thus, although, from the time the tribes of Reuben and Manasseh received their allotment east of the Jordan, the possession of horses became in some measure necessary to defend their frontier, still the people persisted for ages in abstaining from them, and even in the time of David would not use them when they were actually captured; but when the policy of Solomon had made extensive

conquests, the injunction was set aside, because horses became all-important. From the Captivity till after the destruction of Jerusalem, the remnant of the Eastern tribes were in part warlike equestrian nomads, who struck terror into the heart of the formidable Persian cavalry, won great battles, and even captured Parthian kings. When both the kingdoms of Judah and Israel were again confined to the mountains, they reduced their cavalry to a small body; because, it may be, the nature of the soil within the basin of the Libanus was, as it still is, unfavorable to breeding horses. Another instance of unwillingness to violate ancient institutions is found in the Hebrews abstaining from active war on the Sabbath until the time of the Maccabees.

There are, however, indications in their military transactions, from the time Assyrian and Persian conquerors pressed upon the Israelitish states, and still more after the Captivity, which show the influence of Asiatic military ideas, according to which the masses do not act with ordered unity, but trust to the more adventurous in the van to decide the fate of battle. Later still, under the Maccabees, the systematic discipline of Macedonian importation can be observed, even though in Asia the Greek method of training, founded on mathematical principles, had never been fully complied with, or had been modified by the existence of new circumstances and new elements of destruction; such, for example, as the use of great bodies of light cavalry, showering millions of arrows upon their enemies, and fighting elephants introduced by the Ptolemies.

But all these practices became again modified in Western Asia when Roman dominion had superseded the Greek kingdoms. Even the Jews, as is evident from Josephus, modelled their military force on the Imperial plan; their infantry became armed and was manœuvred in accordance with that system which everywhere gave victory by means of the firmness and mobility which it imparted. The masses were composed of cohorts, or their equivalents, consisting of *centuriae* and *decuriae*, or subdivisions into hundreds, fifties, and tens—similar to modern battalions, companies, and squads; and the commanders were of like grades and numbers. Thus the people of Israel and the nations around them cannot be accurately considered, in a military view, without taking into account the successive changes here noticed; for they had the same influence which military innovations had in Europe between the æras of Charlemagne and the emperor Charles V, including the use of cannon—that invention for a long time making no greater alteration in the constitution of armies than the perfection of war machines produced upon the military institutions of antiquity.

The army of Israel was chiefly composed of infantry, as before remarked, formed into a trained body of spearmen, and, in greater numbers, of slingers and archers, with horses and chariots in small proportion, excepting during the periods when the kingdom extended over the desert to the Red Sea. The irregulars were drawn from the families and tribes, particularly Ephraim and Benjamin; but the heavy-armed derived their chief strength from Judah, and were, it appears, collected by a kind of conscription—by tribes, like the earlier Roman armies—not through the instrumentality of selected officers, but by genealogists of each tribe under the superintendence of the princes. Of those returned on the rolls, a proportion greater or less was selected, according to the exigency of the time; and the whole male population might be called out on extraordinary occasions. When kings had rendered the system of government better organized, there was an officer denominated שׁוֹטֵר, *shotér*, a sort of muster-master, who had returns of the effective force or number of soldiers ready for service, but who was subordinate to the סֹפֵר, *sophér*, or scribe, a kind of secretary of state. These officers, or the *shoterim*, struck out or excused from service: (1) those who had built a house without having

yet inhabited it; (2) those who had planted an olive or vineyard and had not tasted the fruit, which gave leave of absence for five years; (3) those who were betrothed, or had been married less than one year; (4) the faint-hearted, which may mean the constitutionally delicate, rather than the cowardly, as that quality is seldom owned without personal inconvenience, and where it is no longer a shame the rule would destroy every levy.

The levies were drilled to march in ranks (1 Chron. xii, 38), and in column by fives (חֲמֻשִּׁים, *chamushim*) abreast (Exod. xiii, 18); hence it may be inferred that they borrowed from the Egyptian system a decimal formation—two fifties in each division making a solid square, equal in rank and file: for twice ten in rank and five in file being told off by right-hand and left-hand files, a command to the left-hand files to face about and march six or eight paces to the rear, then to front and take one step to the right, would make the hundred a solid square, with only the additional distance between the right-hand or unmoved files necessary to use the shield and spear without hindrance; while the depth being again reduced to five files, they could face to the right or left and march firmly in column, passing every kind of ground without breaking or lengthening their order. The pentastichous system, or arrangement of five men in depth, was effected by the simple evolution just mentioned, to its own condensation to double number, and at the same time afforded the necessary space between the standing files of spearmen, or light infantry, for handling their weapons without obstacle—always a primary object in every ancient system of training. Between the fifth and sixth rank there was thus space made for the ensign-bearer, who, as he then stood precisely between the companies of fifty each, had probably some additional width to handle his ensign, being stationed between the four middlemost men in the square—having five men in file and five in rank before, behind, and on each side. There he was the regulator of their order, coming to the front in advancing, and to the rear in retreating; and this may explain why σιγῆς, a file, and the Hebrew *dégel* and *nes*, an ensign, are in many cases regarded as synonymous. Although neither the Egyptian depth of formation, if we may judge from their pictured monuments, nor the Greek phalanx, nor the Roman legion, was constructed upon decimal principles, yet the former was no doubt so in its origin, since it was the model of the Israelites; and the tetrastichal system, which afterwards succeeded, shows that it was not the original, since even in the phalanx, where the files formed, broke, and doubled by fours, eights, sixteens, and thirty-twos, there remained names of sections which indicated the first-mentioned division. Such was the pentacontarchy, denoting some arrangement of fifty, while in reality it consisted of sixty-four; and the decany and decurio, though derived from a decimal order, signified an entire file or a compact line in the phalanx, without reference to number.

With centuries thus arranged in masses, both movable and solid, a front of battle could be formed in simple decimal progression to a thousand, ten thousand, and to an army at all times formidable by its depth, and by the facility it afforded for the light troops, chariots of war, and cavalry to rally behind and to issue from thence to the front. Archers and slingers could ply their missiles from the rear, which would be more certain to reach an enemy in close conflict than was to be found the case with the Greek phalanx, because from the great depth of that body missiles from behind were liable to fall among its own front ranks. These divisions were commanded, it seems, by קֶטֶרֶת, *ketherim*, officers in charge of one thousand, who, in the first ages, may have been the heads of houses, but in the time of the kings were appointed by the crown, and had a seat in the councils of war; but the commander of the host, שַׂר אֶל הַתָּבָא, *sar al ha-taba*—such as Joab, Abner, Benaiah, etc.—was either the judge, or, under the

judge or king, the supreme head of the army, and one of the highest officers in the State. He as well as the king had an armor-bearer, whose duty was not only to bear his shield, spear, or bow, and to carry orders, but, above all, to be at the chief's side in the hour of battle (Judg. ix, 54; 1 Sam. xiv, 6; xxxi, 4, 5). Besides the royal guards there was, as early, at least, as the time of David, a select troop of heroes, who appear to have had an institution very similar in principle to our modern orders of knighthood, and may have originated the distinctive marks already pointed out as used by the Romans; for it seems they strewed their hair with gold-dust. See ARMOR.

In military operations, such as marches in quest of, or in the presence of, an enemy, and in order of battle, the forces were formed into three divisions, each commanded by a chief captain or commander of a corps, or third part (שָׁלִישׁ, *shalish*), as was also the case with other armies of the East; these constituted the centre and right and left wing, and during a march formed the van, centre, and rear. The great camp in the wilderness was composed of four of these triple bodies disposed in a quadrangle, each front having a great central standard for its leading tribe, and another tribal one in each wing.

The war-cry of the Hebrews was not intoned by the ensign-bearers, as in the West, but by a Levite; for priests had likewise charge of the trumpets and the sounding of signals; and one of them, called "the anointed for war," who is said to have had the charge of animating the army to action by an oration, may have been appointed to utter the cry of battle (Deut. xx, 2). It was a mere shout (1 Sam. xvii, 20), or, as in later ages, *Hallelujah!* while the so-called mottoes of the central banners of the four great sides of the square of Judah, Reuben, Ephraim, and Dan were more likely the battle-songs which each of the fronts of the mighty army had sung on commencing the march or advancing to do battle (Numb. x, 34, 35, 36; Deut. vi, 4). These verses may have been sung even before the two books wherein they are now found were written, and indeed the sense of the text indicates a past tense. It was to these, we think, Jehoshaphat addressed himself when about to engage the Moabites: he ordered "the singers before the Lord" to chant the response (2 Chron. xx, 21), "Praise the Lord, for his mercy endureth forever." With regard to the pass-word, the sign of mutual recognition occurs in Judg. vii, 18, when, after the men had blown their trumpets and shown light, they cried, "The sword of the Lord and of Gideon"—a repetition of the very words overheard by that chief while watching the hostile army.

Before an engagement the Hebrew soldiers were spared fatigue as much as possible, and food was distributed to them; their arms were enjoined to be in the best order, and they formed a line, as before described, of solid squares of hundreds, each square being ten deep, and as many in breadth, with sufficient intervals between the files to allow of facility in the movements, the management of the arms, and the passage to the front or rear of slingers and archers. These last occupied posts according to circumstances, on the flanks or in advance, but in the heat of battle were sheltered behind the squares of spearmen; the slingers were always stationed in the rear, until they were ordered forward to cover the front, impede a hostile approach, or commence an engagement, somewhat in the manner of modern skirmishers. Meantime the king, or his representative, appeared clad in the sacred ornaments (הַדְרֵי הַקֹּדֶשׁ, *hadrey kodesh*, in our version rendered "the beauty of holiness," Psa. cx, 3; 2 Chron. xx, 21), and proceeded to make the final dispositions for battle, in the middle of his chosen braves, and attended by priests, who, by their exhortations, animated the ranks within hearing, while the trumpets waited to sound the signal. It was now, with the enemy at hand, we may suppose, that the

slingers would be ordered to pass forward between the intervals of the line, and, opening their order, would let fly their stone or leaden missiles, until, by the gradual approach of the opposing fronts, they would be hemmed in and recalled to the rear, or ordered to take an appropriate position. Then was the time when the trumpet-bearing priests received command to sound the charge, and when the shout of battle burst forth from the ranks. The signal being given, the heavy infantry would press forward under cover of their shields, with the רֹמַח, *romach*, protruded directly upon the front of the enemy; the rear ranks might then, when so armed, cast their darts, and the archers, behind them all, shoot high, so as to pitch their arrows over the lines before them into the dense masses of the enemy beyond. If the opposing forces broke through the line, we may imagine a body of charioteers in reserve rushing from their post and charging in among the disjointed ranks of the enemy before they could reconstruct their order; or, wheeling round a flank, fall upon the rear; or being encountered by a similar manoeuvre, and perhaps repulsed, or rescued by Hebrew cavalry. The king, meanwhile, surrounded by his princes, posted close to the rear of his line of battle, and, in the middle of showered missiles, would watch the enemy and strive to remedy every disorder. Thus it was that several of the sovereigns of Judah were slain (2 Chron. xviii, 33; xxxv, 23), and that such an enormous waste of human life took place; for two hostile lines of masses, at least ten in depth, advancing under the confidence of breastplate and shield, when once engaged hand to hand, had difficulties of no ordinary nature to retreat; because the hindermost ranks, not being exposed personally to the first slaughter, would not, and the foremost could not, fall back; neither could the commanders disengage the line without a certainty of being routed. The fate of the day was therefore no longer within the control of the chief, and nothing but obstinate valor was left to decide the victory. Hence, with the stubborn character of the Jews, battles fought among themselves were particularly sanguinary; such, for example, as that in which Jeroboam, king of Israel, was defeated by Abijah of Judah (xiii, 3-17), wherein, if there be no error of copyists, there was a greater slaughter than in ten such battles as that of Leipsic, although on that occasion three hundred and fifty thousand combatants were engaged for three successive days, provided with all the implements of modern destruction in full activity. Under such circumstances defeat led to irretrievable confusion, and, where either party possessed superiority in cavalry and chariots of war, it would be materially increased; but where the infantry alone had principally to pursue a broken enemy, that force, loaded with shields and preserving order, could overtake very few who chose to abandon their defensive armor, unless they were hemmed in by the locality. Sometimes a part of the army was posted in ambush, but this manoeuvre was most commonly practiced against the garrisons of cities (Josh. viii, 12; Judg. xx, 38). In the case of Abraham (Gen. xiv, 15), when he led a small body of his own people, suddenly collected, and, falling upon the guard of the captives, released them, and recovered the booty, it was a surprise, not an ambush; nor is it necessary to suppose that he fell in with the main army of the enemy. At a later period there is no doubt the Hebrews formed their armies, in imitation of the Romans, into more than one line of masses, and modelled their military institutions as near as possible upon the same system.

Such were the instruments and the institutions of war which the Hebrew people, as well as the nations which surrounded them, appear to have adopted; but in the conquest of the Promised Land, as regarded their enemies, the laws of war prescribed to them were, for purposes which we cannot now fully appreciate, more severe than in other cases. All the nations of antiquity were cruel to the vanquished, perhaps the Romans most

of all: even the Egyptians, in the sculptures of their monuments, attest the same disposition—the males being very generally slaughtered, and the women and children sold for slaves. With regard to the spoil, except in the special case just referred to, the Hebrews divided it in part with those who remained at home, and with the Levites, and a portion was set apart as an oblation to the Lord (Numb. xxxi, 50). This right of spoil and prey was a necessary consequence of military institutions where the army received no pay. שָׁלָל, *shalâl*, that is, the armor, clothes, money, and furniture, and מַלְכוּת, *mal'koach*, prey, consisting of the captives and live-stock, were collected into one general mass, and then distributed as stated above; or, in the time of the kings, were shared in great part by the crown, which then, no doubt, took care to subsist the army and grant military rewards. See ARMY.

III. *Military Preparations, Operations, and Results.*—(In this section we follow Smith's *Dict. of the Bible*.) Before entering on a war of aggression, the Hebrews sought for the divine sanction by consulting either the Urim and Thummim (Judg. i, 1; xx, 27, 28; 1 Sam. xiv, 37; xxiii, 2; xxviii, 6; xxx, 8) or some acknowledged prophet (1 Kings xxii, 6; 2 Chron. xviii, 5). The heathens betook themselves to various kinds of divination for the same purpose (Ezek. xxi, 21). Divine aid was further sought in actual warfare by bringing into the field the ark of the covenant, which was the symbol of Jehovah himself (1 Sam. iv, 4-18; xiv, 18); a custom which prevailed certainly down to David's time (2 Sam. xi, 11; comp. Ps. lxviii, 1, 24). During the wanderings in the wilderness the signal for warlike preparations was sounded by priests with the silver trumpets of the sanctuary (Numb. x, 9; xxxi, 6). Formal proclamations of war were not interchanged between the belligerents; but occasionally messages either deprecatory or defiant were sent, as in the cases of Jephthah and the Ammonites (Judg. xi, 12-27), Ben-hadad and Ahab (1 Kings xv, 2), and again Amaziah and Jehoash (2 Kings xiv, 8). Before entering the enemy's district, spies were sent to ascertain the character of the country and the preparations of its inhabitants for resistance (Numb. xiii, 17; Josh. ii, 1; Judg. vii, 10; 1 Sam. xxvi, 4). When an engagement was imminent, a sacrifice was offered (1 Sam. vii, 9; xiii, 9), and an inspiring address delivered either by the commander (2 Chron. xx, 20) or by a priest (Deut. xx, 2). Then followed the battle-signal, sounded forth from the silver trumpets as already described, to which the host responded by shouting the war-cry (1 Sam. xvii, 52; Isa. xlii, 13; Jer. l, 42; Ezek. xxi, 22; Amos i, 14). The combat often assumed the form of a number of hand-to-hand contests, depending on the qualities of the individual soldier rather than on the disposition of masses. Hence the high value attached to fleetness of foot and strength of arm (2 Sam. i, 23; ii, 18; 1 Chron. xii, 8). At the same time, various strategic devices were practiced, such as the ambuscade (Josh. viii, 2, 12; Judg. xx, 36), surprise (vii, 16), or circumvention (2 Sam. v, 23). Another mode of settling the dispute was by the selection of champions (1 Sam. xvii; 2 Sam. ii, 14), who were spurred on to exertion by the offer of high reward (1 Sam. xvii, 25; xxviii, 25; 2 Sam. xviii, 11; 1 Chron. xi, 6). The contest having been decided, the conquerors were recalled from the pursuit by the sound of a trumpet (2 Sam. ii, 28; xviii, 16; xx, 22).

The siege of a town or fortress was conducted in the following manner: A line of circumvallation (צִיר, lit. an "enclosing" or "besieging," and hence applied to the wall by which the siege was effected) was drawn round the place (Ezek. iv, 2; Mic. v, 1), constructed out of the trees found in the neighborhood (Deut. xx, 20), together with earth and any other materials at hand. This line not only cut off the besieged from the surrounding country, but also served as a base of operations for the besiegers. The next step was to throw out from this

line one or more "mounts" or "banks" (הֲבֵלָה, *Seal-schütz* [*Archäol.* ii, 504] understands this term of the scaling-ladder, comparing the cognate *sullām* [Gen. xxviii, 12], and giving the verb *shapháh*, which accompanies *soléháh*, the sense of a "hurried advancing" of the ladder) in the direction of the city (2 Sam. xx, 15; 2 Kings xix, 32; Isa. xxxvii, 33), which was gradually increased in height until it was about half as high as the city wall. On this mound or bank towers (מִגְדָּל, *Some doubt exists as to the meaning of this term. The sense of "turrets" assigned to it by Gesenius* [*Thesaur.* p. 330] has been objected to on the ground that the word always appears in the singular number, and in connection with the expression "round about" the city. Hence the sense of "circumvallation" has been assigned to it by Michaelis, Keil [*Archäol.* ii, 303], and others. It is difficult, however, in this case, to see any distinction between the terms *dayék* and *matszôr*. The expression "round about" may refer to the custom of casting up banks at different points: the use of the singular in a collective sense forms a greater difficulty) were erected (2 Kings xxv, 1; Jer. lii, 4; Ezek. iv, 2; xvii, 17; xxi, 22; xxvi, 8), whence the slingers and archers might attack with effect. Battering-rams (מַרְבֵּן, *Ezek. iv, 2; xxi, 22*) were brought up to the walls by means of the bank, and scaling-ladders might also be placed on it. Undermining the walls, though practiced by the Assyrians (Layard, *Nineveh*, ii, 371), is not noticed in the Bible: the reference to it in the Sept. and Vulg., in Jer. li, 58, is not warranted by the original text. Sometimes, however, the walls were attacked near the foundation, either by individual warriors who protected themselves from above by their shields (Ezek. xxvi, 8), or by the further use of such a machine as the *helepolis*, referred to in 1 Macc. xiii, 43. This is described by Ammianus Marcellinus (xxiii, 4, 10) as a combination of the *testudo* and the battering-ram, by means of which the besiegers broke through the lower part of the wall, and thus "leaped into the city;" not from above, as the words *prima facie* imply, but from below. Burning the gates was another mode of obtaining ingress (Judg. ix, 52). The water-supply would naturally be cut off, if it were possible (Judith vii, 7). The besieged, meanwhile, strengthened and repaired their fortifications (Isa. xxii, 10), and repelled the enemy from the wall by missiles (2 Sam. xi, 24), by throwing over beams and heavy stones (Judg. ix, 53; 2 Sam. xi, 21; Josephus, *War*, v, 3, 3; 6, 3), by pouring down boiling oil (ibid. iii, 7, 28), or, lastly, by erecting fixed engines for the propulsion of stones and arrows (2 Chron. xxvi, 15). See ENGINE. Sallies were also made for the purpose of burning the besiegers' works (1 Macc. vi, 31; *War*, v, 11, 4), and driving them away from the neighborhood. The foregoing operations receive a large amount of illustration from the representations of such scenes on the Assyrian slabs. We there see the "bank" thrown up in the form of an inclined plane, with the battering-ram hauled up on it assailing the walls; movable towers of considerable elevation brought up, whence the warriors discharge their arrows into the city; the walls undermined, or attempts made to destroy them by picking to pieces the lower courses; the defenders actively engaged in archery, and averting the force of the battering-ram by chains and ropes; the scaling-ladders at length brought, and the conflict become hand-to-hand (Layard, *Nineveh*, ii, 366-374). See BATTERING-RAM; LEVER.

The treatment of the conquered was extremely severe in ancient times. The leaders of the host were put to death (Josh. x, 26; Judg. vii, 25), with the occasional indignity of decapitation after death (1 Sam. xvii, 51; 2 Macc. xv, 30; Josephus, *War*, i, 17, 2). The bodies of the soldiers killed in action were plundered (1 Sam. xxxi, 8; 2 Macc. viii, 27); the survivors were either killed in some savage manner (Judg. ix, 45; 2 Sam. xii, 31; 2 Chron. xxv, 12), mutilated (Judg. i, 6; 1 Sam. xi,

2), or carried into captivity (Numb. xxxi, 26; Deut. xx, 14). Women and children were occasionally put to death with the greatest barbarity (2 Kings viii, 12; xv, 16; Isa. xiii, 16, 18; Hos. x, 14; xiii, 16; Amos i, 13; Nah. iii, 10; 2 Macc. v, 13); but it was more usual to retain the maidens as concubines or servants (Judg. v, 30; 2 Kings v, 2). Sometimes the bulk of the population of the conquered country was removed to a distant locality, as in the case of the Israelites when subdued by the Assyrians (xvii, 6), and of the Jews by the Babylonians (xxiv, 14; xxv, 11). In addition to these measures, the towns were destroyed (Judg. ix, 45; 2 Kings iii, 25; 1 Macc. v, 28, 51; x, 84), the idols and shrines were carried off (Isa. xlvi, 1, 2), or destroyed (1 Macc. v, 68; x, 84); the fruit-trees were cut down, and the fields spoiled by overspreading them with stones (2 Kings iii, 19, 25); and the horses were lamed (2 Sam. viii, 4; Josh. xi, 6, 9). If the war was carried on simply for the purpose of plunder or supremacy, these extreme measures would hardly be carried into execution; the conqueror would restrict himself to rifling the treasures (1 Kings xiv, 26; 2 Kings xiv, 14; xxiv, 13), or levying contributions (xviii, 14). See CAPTIVITY.

The Mosaic law, however, mitigated to a certain extent the severity of the ancient usages towards the vanquished. With the exception of the Canaanites, who were delivered over to the ban of extermination by the express command of God, it was forbidden to the Israelites to put to death any others than males bearing arms; the women and children were to be kept alive (Deut. xx, 13, 14). In a similar spirit of humanity the Jews were prohibited from felling fruit-trees for the purpose of making siege-works (ver. 19). The law further restricted the power of the conqueror over females, and secured to them humane treatment (xxi, 10-14). The majority of the savage acts recorded as having been practiced by the Jews were either in retaliation for some gross provocation, as instanced in the cases of Adoni-bezek (Judg. i, 6, 7), and of David's treatment of the Ammonites (2 Sam. x, 2-4; xii, 31; 1 Chron. xx, 3); or else they were done by lawless usurpers, as in Menahem's treatment of the women of Tiphshah (2 Kings xv, 16; comp. Judg. ix, 45). The Jewish kings generally appear to have obtained credit for clemency (1 Kings xx, 31; comp. 2 Kings vi, 20-23; Isa. xvi, 5).

The conquerors celebrated their success by the erection of monumental stones (1 Sam. vii, 12; 2 Sam. viii, 13, where, instead of "gat him a name," we should read "set up a memorial"), by hanging up trophies in their public buildings (1 Sam. xxi, 9; xxxi, 10; 2 Kings xi, 10), and by triumphal songs and dances, in which the whole population took part (Exod. xv, 1-21; Judg. v; 1 Sam. xviii, 6-8; 2 Sam. xxii; Judith xvi, 2-17; 1 Macc. iv, 24). The death of a hero was commemorated by a dirge (2 Sam. i, 17-27; 2 Chron. xxxv, 25), or by a national mourning (2 Sam. iii, 31). The fallen warriors were duly buried (1 Kings xi, 15), their arms being deposited in the grave beside them (Ezek. xxxii, 27), while the enemies' corpses were exposed to the beasts of prey (1 Sam. xvii, 44; Jer. xxv, 33). The Israelites were directed to undergo the purification imposed on those who had touched a corpse, before they entered the precincts of the camp or the sanctuary (Numb. xxxi, 19). See FIGHT.

IV. *Moral Principles Involved.*—We may distinguish two kinds of wars among the Hebrews. Some were of obligation, being expressly commanded by the Lord; others were free and voluntary. The first were such as those against the Amalekites, and the intrusive and wicked Canaanites, nations devoted to an anathema. The others were to avenge injuries, insults, or offences against the nation. Such was that against the city of Gibeah, and against the tribe of Benjamin; and such was that of David against the Ammonites, whose king had insulted his ambassadors. Or they were to maintain and defend their allies, as that of Joshua against

the kings of the Canaanites, to protect Gibeon. In fact, the laws of Moses suppose that Israel might make war, and oppose enemies.

As to details, the laws of war among the Hebrews, as we have seen, permitted severities in the treatment of the conquered such as we should not now approve. Probably in practice limitations were put upon the abstract rights of conquerors among the Jews just as among Christian nations. This is not invalidated by severities such as those of Gideon towards the kings who had enslaved Israel (Judg. vii, 25; viii, 18-21); or of David cutting off and carrying away the head of the Philistine champion (1 Sam. xvii, 54); nor by such exceptional dealings as those with the Midianites, who had made themselves almost as obnoxious to punishment as the devoted Canaanites (Numb. xxxi). The same may be said of the fearful threatening in Psa. cxxxvii, 8, 9; but, as a matter of practice, contrast the cruelty of putting out eyes by the Philistines, the Ammonites, and the Chaldeans (Judg. xvi, 21; 1 Sam. xi, 2; 2 Kings xxv, 7). The treatment of the men of Succoth and Peniel by Gideon, of the Ephraimites by Jephthah, and of the men of Jabesh-gilead by the assembled Israelites (Judg. viii, 4-7; xii, 1-6; xxi, 8-12), are unmistakably punishments of extraordinary severity on account of aggravated acts of treason against Jehovah. The treatment of ten thousand Edomites by Amaziah is a parallel on the part of one whose principles and practice ought to have been better (2 Chron. xxv, 12). On the other hand, it should be borne in mind that these were not usages of Judaism as such, nor peculiar to the Hebrews; but manifestations of the common spirit of the age and region, which the Mosaic law did all it could, as we have seen, to soften and lessen. Nor should we try a distant æra by the rules of modern humanity which is the offshoot of Christianity. See MOSAISM.

It has been questioned whether wars are, under any circumstances, justifiable from Jewish example. While it is certain that the practice of offensive wars cannot be defended by reference to sacred history, it is equally clear, if wars must be, that they can only be consistent with the light of that dispensation which breathes forgiveness and forbearance on the clear and obvious ground of necessity and self-defence. When the principles of the Bible shall have illuminated the minds of all nations, wars shall cease from the ends of the earth, and all men will give glory to God in the highest, and on earth peace and good-will will universally prevail (Psa. xlv, 9; lxxv, 3; Isa. ii, 4; Ezek. xxxix, 9; Luke ii, 14). See PEACE.

WAR, CHRISTIAN VIEWS OF. I. *History of Opinion.*—The question whether war is allowable to Christians divides itself into two, which are intimately related to each other: (a) Is it right for a Christian government to carry on war? and (b) is a Christian subject obliged to serve as a soldier? Christianity always breathes the spirit of peace among individuals and nations, and likewise the spirit of freedom and personal respect, yet never by command does it do away with either slavery or war, nor does it forbid civil government using the sword. The objections of early Christians to serve in war were based principally upon the text "Whosoever sheddeth blood," etc. But there were also other reasons. The early Christians did not feel obligated to serve a government that constantly persecuted them, and they also dreaded the idolatry connected with the service of war. Tertullian forbids serving as a common soldier, although such were not so imperatively required to engage in idolatry as were those of higher rank; yet it was sufficient for Tertullian to know that the Roman ensigns bore images and pictures of idols (see Tertull. *De Idololatria*, c. xix; *De Corona Militis*, c. xi; *Apol.* c. xlii; *Ad Scapulam*, c. iv). Notwithstanding these objections, a great many Christians served as soldiers. The conversion of Constantine and the exchange of the idol standards for the banner of the Cross laid every

Christian under obligations to serve as a soldier; the interests of the Church and State having now become common.

Augustine speaks of himself as holding no conscientious scruples concerning Christians serving as soldiers (*Ep.* 138, *ad Marcellinum*, xii). The opinions of the early Christians do not entirely disapprove military service except in reference to the clergy. The opinion of Origen is now limited to the clergy (*Cont. Celsum*, vii, 73, 74). In the Romish Church the clergy assume the same attitude that the earlier Christians held, namely, that the services of the sanctuary forbid the shedding of blood; yet they hold that the more closely Church and State are united, the more justifiable is war. Referring, also, to the Old Test. and to the Church fathers, they make the following distinctions: (1) prosecution of war in itself is no sin; (2) the clergy are not personally to handle the sword, although they may incite others to do so. This was the doctrine of the Middle Ages, and has continued, to a great extent, the doctrine of the Romish Church to-day (Richter, iv, § 94, note 12).

Yet the oft-repeated threatenings and rebukes in early Christian documents (*Apost. Can.* lxxxii, c. 4, 23, qu. 8; *Conc. Tolet.* iv, c. 45, ann. 633; *Conc. Meldense*, c. 37, ann. 845; c. 2, x; c. 25, x, 5, 39) indicate that the warlike inclinations of many of the clergy transgressed one of the above rules. Athanasius already lamented that bishops engaged in war. There were three causes that produced this spirit: (a) zealotism, which was anxious to exterminate heretics; (b) self-defence in case of necessity; (c) the feudal system (see Ziegler, *Συζητοῦντες Ecclesiasticum* [Wittenberg, 1672]). In the time of Chrysostom the monks travelled in large companies from place to place with imperial authority to exterminate heathenism; and that which had a rough unsystematic commencement became very effectually systematized in after-ages. During the crusades bishops became renowned as military men (Raumer, *Hohenstaufen*, ch. i); and these holy wars were carried on by the Church to such an extent that it became part, so to speak, of the Church itself, in the form of the different orders of knights. This warlike spirit became so common among the clergy that whenever anything was to be gained, they were ever ready for war.

The question as to whether individuals are obligated to serve as soldiers depends largely upon the government of the country in which they live. So far as the Evangelical Church is concerned in the question whether war is allowable to Christians, we have sufficient proof that the Reformers believed it to be right for Christians to use the sword. The *Augsburg Confession* refers to this subject in art. 16 ("Docent quod Christianis liceat jure bellare"). Only a few small sects are opposed to Christians engaging in war. The evangelical doctrine has generally been on the affirmative side of the question (see Reinhard, *Moral.* § 244, 302; Aumon, *Handb. d. christl. Sittenlehre*, § 181; Harless, *Christl. Ethik*, p. 250). Schleiermacher (*Die christl. Sitte*, p. 273) contends that every individual is bound to obedience when a call to war is made; so also Hegel, "The agitation of war purifies a nation" (*Rechtsphilos.* p. 324). The Evangelical Church at large has no ban against clergy serving in war.—Herzog, *Real-Encyklop.* viii, 81 sq.

II. *Dogmatic View.*—These modern opinions in defence of warfare, however, have evidently grown out of a desire to conciliate the civil power, and are clearly opposed to the ancient Christian doctrine and to the whole spirit of the Gospel, as well as to specific precepts in the New Test. (Matt. v, 39; Rom. xii, 17-21, etc.). The appeal to a few passages is futile against this (e. g. Luke xxii, 26; comp. Matt. xxvi, 52. Rom. xiii, 4 refers only to magisterial or municipal justice). The lame effort to avoid the force especially of Christ's command may be strikingly seen in Stier's inconclusive argument (*Words of the Lord Jesus* [Amer. ed.], i, 74), who contends that because they live in an evil world Christians

are justified in resorting to arms; as if two wrongs made one right! Doubtless all men have a *natural* and even a *political* right to take up arms in a just cause; but as Christians they are required to hold these rights in abeyance, and trust to the divine protection. Whether in absolute self-defence they may not exert physical force, even to the extent of homicide, may, indeed, be left an open question; but warfare, as usually carried on by nations, scarcely ever comes under this extreme category. On the other hand, no humane, much less godly man, can look abroad at the diabolism of war, as systematically practiced in ancient or modern times, without the most intense horror and deprecation. That he should deliberately enter upon such a course of action, involving, as it must, not only the immense destruction of human life and property, but also the ruin and misery of helpless and innocent families, cannot for a moment be reconciled with the impulses of philanthropy, much less with the principles of Christianity, which teach universal love and beneficence. To justify such conduct from considerations of personal, local, or temporary advantage, or even of national gain and advancement, is clearly to adopt the damnable doctrine that "we may do evil in order that good may come" (Rom. iii, 8). Least of all can a Christian consistently adopt warfare as a profession, and hold himself subject to even his country's call in any cause, without the privilege of deciding for himself the justice of the quarrel.

Casuists have usually relieved the Christian conscience in such cases by throwing the responsibility of war upon "the powers that be," i. e. the civil or military authorities; in other words, the government itself. But such a course of reasoning would excuse the Christian in committing any enormity, even idolatry, at the dictation of secular or political rulers. The will of a majority under democratic or republican government makes no essential difference in this responsibility. Each man must act for himself in the fear of God in moral cases.

III. *Schemes for the Abolition of War.*—The invention of gunpowder and recent improvements in artillery, while they have greatly shortened the periods of warfare, have immensely increased its destructiveness. Hence victory now usually depends rather upon numbers, equipment, and strategic skill than upon personal bravery. At the same time, arbitration has more frequently been resorted to, in settlement of national disputes, instead of the sword. Still the history of the present century, and the "armed neutrality" of the nations, especially of Europe at the present time, do not favor the hope that war will soon be abandoned in such cases. On this continent likewise, and within the existing generation, we have had fearful evidence of the liability to this *dernier ressort*. The methods by which philanthropists and statesmen have proposed to supersede the necessity of a recourse to arms in modern times are chiefly two, aside from the usual efforts of diplomatic correspondence and the intervention of arbitration.

1. *Peace Congresses.*—These are conventions of representatives from allied or interested nations, to which have been referred, or which have voluntarily assumed, the discussion and adjustment of difficulties between particular states. An account of them may be found at length in a recent work (Amos, *Political and Legal Remedies for War* [N. Y. 1880]), from which it does not appear that this method has been particularly successful in preventing the occurrence of war. It is to be hoped, however, that, as the principles of international law extend and are more generally recognised, this means of averting collisions between contiguous as well as remote nations may become more efficacious.

2. *Peace Societies.*—These are purely voluntary associations, which labor in moral and social lines to promote harmony and fraternity among the peoples of the earth, especially in civilized lands, and thus aim privately and gradually to extinguish the spirit of ani-

mosity and contest. The exciting scenes of "the Eastern question," the Franco-German struggle in Europe, and the rebellion in this country have greatly retarded the success of this movement. Nevertheless, organizations of this kind have been in operation for many years in Great Britain, and others in the United States, which are securely but slowly laying the foundation for a future reform on this subject. As in the case of the temperance movement, the passions and habits of mankind are in the opposite direction, and hence the effort must be protracted and even precarious. But the enlarged views of modern statesmanship, together with the increasing ties that bind nations together, must continue to supplement the moral arguments advanced in favor of the abolition of war, so that we may anticipate an eventual millennium in this as well as in the general diffusion of the Gospel.

**War** (or **Woer**), in Norse mythology, is the goddess of connubial love and fidelity, and the avenger of conjugal unfaithfulness.

**Wara.** See **VARA**.

**Waranda**, in Norse mythology, is one of the three Destinies, who sit at the well of Urdar and control the fate and destiny of the world.

**Warburton, William, D.D.**, an eminent English prelate, was born at Newark-upon-Trent, Dec. 24, 1698. His father was attorney and town-clerk at Newark, and young William was designed for the law. He received the usual grammar-school education at Oakham and his own native village, and in 1715 was placed in the office of an attorney at East Markham, in Nottinghamshire, where he remained until April, 1719. He then commenced the practice of law; but his literary tastes prevented his success in that profession, and he abandoned it for the ministry. He was ordained deacon by Dawes, archbishop of York, in 1723; ordained priest by Gibson, bishop of London, in 1726, and appointed vicar of Gryesley, Nottinghamshire; became rector of Brant-Broughton, Lincolnshire, in 1728; preacher to the society of Lincoln's Inn in 1746; prebendary of Gloucester in 1753; king's chaplain in ordinary in 1754; prebendary of Durham in 1755; dean of Bristol in 1757; bishop of Gloucester in 1760; and died there June 7, 1779. In 1739-40 he published a series of letters, in *The Works of the Learned*, in defence of the orthodoxy of Pope's *Essay on Man*, which gained him the life-long friendship of the poet; and on the death of Pope, in 1744, it was found that he had bequeathed to Warburton half of his library, and the profits arising from the publication of all his works not otherwise disposed of. But the most important service rendered him by Pope was his introduction to the house of Ralph Allen, Esq., of Prior Park, near Bath. This led to his marriage, in 1745, with Allen's niece, Miss Gertrude Tucker, in whose right, on the death of Allen, in 1764, he became proprietor of Prior Park. Among his other literary writings are, *Miscellaneous Translations in Prose and Verse* (1723); — *An Inquiry into the Causes of Prodiges and Miracles* (1727); — *Alliance between Church and State* (1736); — *Divine Legation of Moses* (1738-41); this is his greatest work; — an edition of *Shakespeare* (1747); — *Julian* (1750); — an edition of Pope's *Works* (1751); — and *The Doctrine of Grace* (1762). Warburton's *Works* were published by his friend bishop Hurd, in 7 vols. 4to, in 1788, and a subsequent edition with a *Memoir* in 1794. In 1809 appeared a volume of *Letters*, and in 1841 another volume, entitled *Literary Remains of Bishop Warburton*. See Watson, *Life of Warburton* (1863).

**Warburtonian Lecture**, a lecture founded by bishop Warburton (q. v.), to prove the truth of revealed religion in general, and the Christian in particular, from the completion of the prophecies in the Old and New Testaments, which relate to the Christian Church, especially the apostasy of papal Rome. Courses of lectures on this foundation have been delivered by Halifax, Hurd, Lagot, Athorp, and many others.

**Wardlaw, John Smith, D.D.**, an English Congregational missionary, was born at Glasgow, July 25, 1813. He early dedicated himself to the Lord, and commenced preparation for his great work. Mr. Wardlaw had every advantage for mental and spiritual culture. He graduated with honor at Glasgow University and Theological Academy, and at once decided to give his life to missionary work. He was ordained as a missionary July 14, 1841, and sailed for India under the auspices of the London Missionary Society, arriving at Madras in September, 1841. He at once took an efficient part in carrying out the objects of the mission—teaching, preaching, itinerating, and superintending the printing-press. He translated the Scriptures into the Telugu language, and was able to send thousands of copies of the New Test. into the mission fields. In 1855 Dr. Wardlaw visited Vizagapatam, and in 1859 also visited Calcutta and the missions on the coast. He died Oct. 13, 1872. "Dr. Wardlaw was a laborious and faithful student, exact, thorough, with great analytical power," and the ability to express with clearness his conclusions. He was a man of broad sympathies, unselfish in friendship, with a character transparent and spotless, and with an "exhaustless patience and charity." See (Lond.) *Cong. Year-book*, 1873, p. 365.

**Wardlaw, Ralph, D.D.**, an eminent Scotch Congregational divine, was born in Dalkeith, Dec. 22, 1779. Though bred in the principles of the Secession Church, he resolved to join himself to the Congregational party; and was in 1803 ordained and installed pastor of the chapel in Albion Street, Glasgow, but subsequently removed to a larger church in George Street. In 1811 he was appointed professor of theology in the Seminary of the Congregational Church of Scotland, which position he occupied, in connection with his pastorate, until his death, Dec. 17, 1853. He acquired a high reputation as a theologian. His life was a very laborious and earnest one. Besides discharging faithfully and ably the duties of the pulpit and the professor's chair, he was a voluminous author; often involved in theological controversy, and a prominent actor in the public, religious, and philanthropic movements of the day. His intellect was acute, his understanding sound, and his style remarkable for its perspicacity, vigor, and grace. The most important of Dr. Wardlaw's works are, *Discourses on the Socinian Controversy*; — *Lectures on Ecclesiastes* (2 vols.); — *Essays on Assurance of Faith, and on the Extent of the Atonement and Universal Pardon*; — *Discourses on the Sabbath*; — *Christian Ethics*; — *Discourses on the Nature and Extent of the Atonement of Christ*; — *The Life of Joseph and the Last Years of Jacob*; — *Congregational Independence*; — *On Miracles*; — and *Lectures against Religious Establishments*. His life and correspondence were published by Dr. Alexander in 1856. See Alibone, *Dict. of Brit. and Amer. Authors*, s. v. (W. P. S.)

**Wardlaw, Thomas Delacey, D.D.**, a Presbyterian minister, was born at Warrenpoint, County Down, Ireland, Nov. 1, 1826, where he received his preparatory education. He graduated from Belfast College in 1844; and soon after went to Quebec, Canada, and from thence to the United States in 1846, when he entered Princeton Theological Seminary, from which he graduated in 1849. Immediately on leaving the seminary, he began to preach as a stated supply at Port Carbon, Pa.; but subsequently, having accepted a call, was ordained and installed pastor. After two years' service, he was released to take charge of the Church at Paris, Ky., where he was installed; after a service of six years he was called to Clarksville, Tenn., where he continued nine years. After this he removed to Shelbyville, where he continued to reside until his death, Aug. 29, 1879. He became principal of a Young Ladies' Seminary in that place, at the same time supplying the neighboring churches of Petersburg and Bethlehem. He was a man of superior scholarship and extensive literary culture. See *Necrological Rep. Princeton Sem. Alumni*, 1880. (W. P. S.)

**Ware, Henry, Sr., D.D.**, a Unitarian clergyman, was born at Sherburne, Mass., April 1, 1764. He graduated at Harvard College in 1785, and studied theology under Rev. Timothy Hilliard for a year and a half following. He became pastor of the First Congregational Church at Hingham in 1787, and labored there until 1805, when he was chosen Hollis professor of divinity at Harvard College. This election was the occasion of a sharp controversy between the Unitarians and the Trinitarian Congregationalists, which resulted in the separation of the two parties as distinct bodies of Christians. He held his chair in the college until 1816, when, on the organization of the Harvard Divinity School, he became professor of systematic theology and the evidences of Christianity, which office he held until 1840, when he was compelled to resign on account of the loss of his eyesight. He died at Cambridge, June 12, 1845. Dr. Ware published, *Letters to Trinitarians and Calvinists* (Camb. 1820), in reply to Dr. Wood's *Letters to Unitarians*:—*Answer to Dr. Wood's Reply* (1822):—*Postscript to the Answer to Dr. Wood's Reply* (1823):—*An Inquiry into the Foundation, Evidences, and Truths of Religion* (1842, 2 vols.):—and numerous *Sermons*. See Sprague, *Annals of the Amer. Pulpit*, viii, 199.

**Ware, Henry, Jr., D.D.**, a Unitarian clergyman, eldest son of the preceding, was born at Hingham, Mass., April 21, 1794. He was educated at Phillips Academy, Andover, and at Harvard College, from which he graduated in 1812. During the next two years he taught in the academy at Exeter, N. H., spending much of his leisure time in the study of theology; and during the latter part of this period he conducted the public services of a Unitarian society in Exeter by performing the devotional part of the service and reading a printed sermon. In 1814 he returned to Cambridge to study theology as a resident graduate of the university, and was appointed sub-librarian of the college, which office he held one year. He was called to the pastorate of the Second Church in Boston, and was ordained and installed Jan. 1, 1817. In this relation he remained until the autumn of 1830. In 1819 he became editor of the *Christian Disciple*, and remained in that office until 1822. On account of declining health Mr. Ware desired to resign his charge in 1829; but his Church and congregation, not willing to lose his services, chose as colleague pastor Mr. Ralph Waldo Emerson, upon whom should devolve the burden of the active pastoral labor. In October, 1830, Mr. Ware removed to Cambridge to enter upon the duties of professor of pulpit eloquence and the pastoral care, to which he had lately been elected. In 1842, on account of feeble health, he resigned his professorship and removed to Framingham, where he died, Sept. 22, 1843. Among his published works are the following: *Discourses on the Offices and Character of Jesus Christ* (1825):—*Sermons on Small Sins* (1827):—*On the Formation of the Christian Character* (1831):—*The Life of the Saviour* (1832):—several single *Sermons*, *Essays*, and *Poems*:—and *Memoirs of Oberlin, Noah Worcester, Dr. Joseph Priestley, Nathan Parker*, and others. See his *Select Writings*, by Rev. Chandler Robbins (Bost. 1846-47, 4 vols.); Ware [John], *Memoir of Rev. Henry Ware, Jr., D.D.* (ibid. 1846, 2 vols.); Sprague, *Annals of the Amer. Pulpit*, viii, 472 sq.

**Warham, William, D.D., LL.D.**, an eminent English prelate, was born at Okeley, in Hampshire, about 1450. He was educated at Winchester School and at New College, Oxford, of which he became a fellow in 1475. He remained at Oxford until 1488, having in the meantime taken holy orders, and then, it is believed, was collated to some living in the Church. Shortly after this, he is found practicing as an advocate in the Court of Arches, and acting as principal or moderator of the Civil Law School of the parish of St. Edward's, Oxford. In 1493 he was sent by Henry VII as a joint envoy to the duchess of Burgundy, to complain of her countenance to the pretender Perkin Warbeck. He was

master of the rolls from 1494 to 1502; joint envoy to Maximilian of Burgundy in 1501-2; became keeper of the great seal Aug. 11, 1502; lord chancellor, Jan. 1, 1503; bishop of London in 1503; archbishop of Canterbury, March 9, 1504; and chancellor of Oxford University soon after. He was an intimate friend of Erasmus; a rival of Fox, bishop of Winchester; and, later, a rival of cardinal Wolsey, with whom he had many contentions concerning jurisdiction. He opposed the marriage of Catharine of Aragon with Henry VIII, but officiated at the ceremony in June, 1509; and resigned the great seal to Wolsey, Dec. 22, 1515. During his latter years he drew some discredit upon himself by his connection with the affair of the Maid of Kent, to whose pretensions he lent some support. He died at St. Stephen's, near Canterbury, Aug. 23, 1532.

**Warner, Aaron, D.D.**, a Congregational minister, was born at Northampton, Mass., Oct. 20, 1794. After graduating from Williams College in 1815, he entered Andover Theological Seminary, from which he graduated four years afterwards. He was city missionary in Charleston, S. C., from 1819 to 1822, and part of the time was acting pastor of the Circular Church in that city. At Salem, Mass., he was ordained as an evangelist, Sept. 25, 1823; and a year after he was installed pastor of the Second Church in Medford, which he served until 1832. From February, 1835, to November, 1843, he was professor of sacred rhetoric in the Gilmanton Theological Seminary. In January of the following year he was made professor of rhetoric and oratory and English literature in Amherst College, retaining this position until 1853; after which, and until his death, May 14, 1876, he resided in Amherst without charge. Dr. Warner was a corporate member of the American Board of Commissioners for Foreign Missions from 1838. See *Cong. Quarterly*, 1877, p. 427.

**Warner, Ferdinando, LL.D.**, an English clergyman and voluminous writer, was born in 1703. He studied some time at Jesus College, Cambridge, but is not recorded among its graduates; became vicar of Ronde, Wiltshire, in 1730; rector of St. Michael Queenhithe, London, in 1746; and, in addition, rector of Barnes, in Surrey, in 1758. He died of gout about 1767. Among his published works are the following: *System of Divinity and Morality* (Lond. 1750):—*Rational Defence of the English Reformation* (1752):—*An Illustration of the Book of Common Prayer and Administration of the Sacraments* (1754):—*Ecclesiastical History of England from the Earliest Accounts to the Eighteenth Century* (1756-57):—*Memoirs of the Life of Sir Thomas More* (1758):—*The History of Ireland* (1763):—and *History of the Rebellion and Civil War in Ireland from 1641 to 1660* (1767).

**Water** (מים, מֵיִם), universally one of the chief necessities of life. No one can read far in the Sacred Scriptures without being reminded of the vast importance of water to the Hebrews in Palestine, and, indeed, in every country to which their history introduces us; but more particularly in the deserts in which they wandered on leaving Egypt, as well as those into which they before or afterwards sent their flocks for pasture.

I. *Supply*.—In our temperate climate, surrounded as we are with perpetual verdure and never-failing streams, we can scarcely conceive the value of water in Palestine and other regions of the East. During summer and autumn, when the small streams are dried up through want of rain, the inhabitants are entirely dependent upon the water derived from wells, or preserved in cisterns or reservoirs, which sometimes becomes unpleasant. See CISTERN. Hence the water of running streams and fountains, as opposed to that of stagnant cisterns, pools, or marshes, is called *living water* (Gen. xxvi, 19; Zech. xiv, 8; John iv, 10, 11; vii, 38; Rev. vii, 17). See POOL. Water is commonly drawn out of the wells or cisterns by females, and carried, upon the shoulder or head, in large leathern or earthen vessels (Gen. xxiv, 45). See WELL.

In the hot countries of the East, the assuaging of thirst is one of the most delightful sensations that can be felt (Psa. cxliii, 6; Prov. xxv, 25); and every attention which humanity and hospitality can suggest is paid to furnish travellers with water; and public reservoirs or pools are opened in several parts of Egypt and Arabia (Matt. x, 42). See FOUNTAIN. Water was sometimes paid for, and is now occasionally in the East (Numb. xx, 17, 19; Lam. v, 4). See DRAWER OF WATER.

II. *Peculiar Usages.*—Among the optical illusions which the deserts of the East have furnished is the *mirage*. This phenomenon of “waters that fail,” or “are not sure,” was called by the Hebrews *sharab*, i. e. heat, and is rendered “the parched ground” (Isa. xxxv, 7); properly, “And the mirage shall become a pool,” i. e. the desert which presents the appearance of a lake shall be changed into real water. See MIRAGE.

Throughout the East it is customary to irrigate their fields and gardens by means of small canals or rivulets, which distribute the water in every direction (Psa. i, 3). Allusion is probably made to this custom in Ezek. xxxi, 3, 4. Sometimes the channels are bordered with stone, and accompanied with troughs; at other times they are mere ridges of earth, to regulate the flow (Prov. xxi, 1). Thus, in Deut. xi, 10, it is said the land of Canaan is not like Egypt, “where thou sowest thy seed, and waterest it with thy foot.” Palestine is a country which has rains, plentiful dews, springs, rivulets, and brooks, which supply the earth with the moisture necessary to its fruitfulness; whereas Egypt has no river but the Nile; and, as it seldom rains, the lands which are not within reach of the inundation continue parched and barren (see Hackett, *Illustr. of Script.* p. 151 sq.). See IRRIGATION.

III. *Metaphorical and Symbolical Phrases.*—Water sometimes signifies literally the element of water (Gen. i, 10), and occasionally its parallel in tears (Jer. ix, 1, 7); hence, figuratively, trouble (Psa. lvi, 1) and misfortune (Lam. iii, 54; Psa. lxi, 1; cxvii, 16; cxxiv, 4, 5). Water is put for children or posterity (Numb. xxiv, 7; Isa. xlviii, 1); for the clouds (Psa. civ, 3); for the ordinances of the Gospel (Isa. xii, 3; xxxv, 6, 7; lv, 1; John vii, 37, 38). “Stolen waters” denote unlawful pleasures with strange women (Prov. ix, 17). The Israelites are reproached with having forsaken the fountain of living water to quench their thirst at broken cisterns (Jer. ii, 13); that is, with having quitted the worship of the all-sufficient God for the worship of vain and senseless idols.

Water is used in the sense of purification, as the

“washing away of sin.” See BAPTISM. When clear, cool, and pleasant, it is the symbol of great good; and, when muddy and thick, it denotes disease and affliction (as above). Hence, the torments of wicked men after this life were by the ancients represented under the symbol of a lake whose waters were full of mud and filth (Isa. lvii, 20).

Many waters, on account of their noise, number, disorder, and the confusion of the waves, are the symbols of peoples, multitudes, nations, and tongues (Rev. xvii, 15; Jer. xlvii, 2); waters signifying an army or multitude (Isa. xvii, 12, 13).

As in Scripture bread is put for all sorts of food or solid nourishment, so water is used for all sorts of drink. The Moabites and Ammonites are reproached for not meeting the Israelites with bread and water; that is, with proper refreshments (Deut. xxiii, 4). Nabal says, insulting David’s messengers, “Shall I then take my bread and my water, and my flesh that I have killed for my shearers, and give it unto men whom I know not whence they be?” (1 Sam. xxv, 11).

WATER OF BAPTISM. The scholastics adopted the mystical interpretation of the water, but carried their discussions and inquiries concerning the fluids to be used at the performance of the rite of baptism to a ridiculous extreme. Various opinions obtained as to the question whether beer, broth, fish-sauce, mead or honey-water, lye or rose-water, might be used instead of pure water. They carried their absurdities so far as to start the question “Quid faciendum, si puer urinalet (stercorizaret) in fontem?” A distinction was also made between “aqua artificialis, naturalis, and usualis.” See Hagenbach, *Hist. of Doctrines*, ii, 84. See BAPTISM; HOLY WATER.

WATER, HOLY. See BAPTISM; HOLY WATER.

WATER OF JEALOUSY (Numb. v, 11–31, מֵי הַזְּמִירָה, “waters of bitterness,” sometimes with מֵי הַזְּמִירָה added, as causing a curse; Sept. ὕδωρ τοῦ ἰλεγμοῦ; Philo, ii, 310, πόρος ἰλεγγου). This was probably not the “water of separation” for purification, mixed with the ashes of the red heifer, for, as its ceremonial property was to defile the pure and to purify the unclean (Numb. xix, 21) who touched it, it could hardly be used in a rite the object of which was to establish the innocence of the upright or discover the guilt of the sinner without the symbolism jarring. Perhaps water from the laver of the sanctuary is intended. The ritual prescribed consisted in the husband’s bringing the woman

before the priest, and the essential part of it is unquestionably the oath, to which the “water” was subsidiary, symbolical, and ministerial. With her he was to bring the tenth part of an ephah of barley-meal as an offering. Perhaps the whole is to be regarded from a judicial point of view, and this “offering” in the light of a court-fee. Yet being an offering to “bring iniquity to remembrance” (v, 15), it is ceremonially rated as a “sin-offering;” hence no oil is to be mixed with the meal before burning it, nor any frankincense to be placed upon it when burned, which same rule was applied to “sin-offerings” generally (Lev. v, 11). With meat-offerings, on the contrary, the mixture of oil and the imposition of frankincense were prescribed (ii, 1, 2, 7, 14, 15). God himself was suddenly invoked to judge, and his presence recognised by throwing a handful of the barley-meal on the blazing altar in the course of the rite. In the first instance, however, the priest “set her before the Lord” with the offering in her hand. The Mishna (*Sotah*) prescribes that she be clothed

A Watered Garden.

in black with a rope girdle around her waist; and from the direction that the priest "shall uncover her head" (Numb. v, 18) it would seem she came in veiled, probably also in black. As she stood holding the offering, so the priest stood holding an earthen vessel of holy water mixed with the dust from the floor of the sanctuary, and, declaring her free from all evil consequences if innocent, solemnly devoted her in the name of Jehovah to be "a curse and an oath among her people," if guilty, further describing the exact consequences ascribed to the operation of the water in the "members" which she had "yielded as servants to uncleanness" (ver. 21, 22, 27; comp. Rom. vi, 19; and Theodoret, *Quæst. x in Numb.*). The words נִשְׁפָּךְ, נִשְׁפָּךְ, נִשְׁפָּךְ, rendered in the A. V. by the word "rot," rather indicate, according to Gesenius, s. v. נִשְׁפָּךְ, to "become or make lean." Michaelis thought ovarian dropsy was intended by the symptoms. Josephus says, τοῦ τε σκέλους ἐκπεσόντος αὐτῆς, καὶ τὴν κοιλίαν ὑδίου καταλαμβάνοντος (*Ant. iii, 11, 6*). The priest then "wrote these curses in a book, and blotted them out with the bitter water," and, having thrown, probably at this stage of the proceedings, the handful of meal on the altar, "caused the woman to drink" the potion thus drugged, she, moreover, answering to the words of his imprecation, "Amen, Amen." Josephus adds, if the suspicion was unfounded, she obtained conception; if true, she died infamously. This accords with the sacred text, if she "be clean, then shall she be free and shall conceive seed" (Numb. v, 28), words which seem to mean that when restored to her husband's affection she should be blessed with fruitfulness; or that, if conception had taken place *before* her appearance, it would have its proper issue in child-bearing, which, if she had been unfaithful, would be intercepted by the operation of the curse. It may be supposed that a husband would not be forward to publish his suspicions of his own injury, unless there were symptoms of apparent conception and a risk of a child by another being presented to him as his own. This is somewhat supported by the rendering in the A. V. of the words וְהָיָה לָאִשָּׁה נְהִיטָה (ver. 13) by "neither she be taken *with the manner*," the italicized words being added as explanatory, without any to correspond in the original, and pointing to the sudden cessation of "the manner" or "custom of women" (Gen. xviii, 11; xxxi, 35), i. e. the menstrual flux, suggesting, in the case of a woman not past the age of child-bearing, that conception had taken place. If this be the sense of the original, the suspicions of the husband would be so far based upon a fact. It seems, however, also possible that the words may be an extension of the sense of those immediately preceding, וְהָיָה לָאִשָּׁה נְהִיטָה, when the connected tenor would be, "and there be no witness against her, and she be not taken," i. e. taken in the fact; comp. John viii, 4, αὐτῇ ἡ γυνὴ κατελήφθη ἐπ' αὐτοφώρῳ μοιχευομένη. In the case of pregnancy the woman's natural apprehensions regarding her own gestation would operate very strongly to make her shrink from the potion if guilty. For plainly the effect of such a ceremonial on the nervous system of one so circumstanced might easily go far to imperil her life even without the precise symptoms ascribed to the water. Meanwhile the rule would operate beneficially for the woman if innocent, who would be, during this interval, under the protection of the court to which the husband had himself appealed, and so far secure against any violent consequence of his jealousy, which had thus found a vent recognised by law. Further, by thus interposing a period of probation the fierceness of the conjugal jealousy might cool. On comparing this argument with the further restrictions laid down in the treatise *Sotah* tending to limit the application of this rite, there seems grave reason to doubt whether recourse was ever had to it in fact. See ADULTERY. The custom of writing on a parchment

words cabalistic or medical relating to a particular case, and then washing them off, and giving the patient the water of this ablution to drink, has descended among Oriental superstitions to the present day, and a sick Arab would probably think this the most natural way of "taking" a prescription. See, on the general subject, Grodeck, *De Vett. Hebr. Purgat. Castitatis*, in Ugolino, *Thesaur.* The custom of such an ordeal was probably traditional in Moses' time, and by fencing it round with the wholesome awe inspired by the solemnity of the prescribed ritual, the lawgiver would deprive it to a great extent of its barbarous tendency, and would probably restrain the husband from some of the ferocious extremities to which he might otherwise be driven by a sudden fit of jealousy, so powerful in the Oriental mind. On the whole, it is to be taken, like the permission to divorce by a written instrument, rather as the mitigation of a custom ordinarily harsh, and as a barrier placed in the way of uncalculating vindictiveness. Viewing the regulations concerning matrimony as a whole, we shall find the same principle animating them in all their parts—that of providing a legal channel for the course of natural feelings where irrepressible, but at the same time of surrounding their outlet with institutions apt to mitigate their intensity, and so assisting the gradual formation of a gentler temper in the bosom of the nation. The precept was given "because of the hardness of their hearts," but with the design and the tendency of softening them. (See some remarks in Spencer, *De Leg. Hebr.*) See JEALOUSY; ORDEAL.

WATER OF SEPARATION. See PURIFICATION.

**Waterbury, JARED BELL, D.D.**, a Presbyterian minister, was born in the city of New York, Aug. 11, 1799. He was converted at the age of seventeen, and united with the Rutgers Street Presbyterian Church, becoming at once an earnest Christian worker. He entered Yale College and graduated with high honors in 1822, and in the autumn of the same year he entered upon his theological studies in Princeton Seminary, where he remained two years. On April 15, 1823, he was taken under the care of the New York Presbytery as a candidate for the ministry, and that body licensed him to preach in 1825 and ordained him *sine titulo* Nov. 13 of the same year. Shortly after completing his theological studies, he accepted an agency for the American Bible Society, and made a highly successful and useful tour in its interests through the Southern States. In the year 1826 he commenced preaching at Hatfield, Mass.; and having been dismissed by the Presbytery of New York, April 18, 1827, to the Association of Northampton, Mass., was shortly after installed pastor of the Hatfield Church. While residing there, he published a small volume entitled *Advice to a Young Christian, by a Village Pastor*, with a very interesting introduction by Dr. Archibald Alexander. This little book was widely read and very useful. In 1829 he was called to Portsmouth, N. H., where he was installed shortly after, and remained for two years in a happy and useful ministry, which he was compelled to resign on account of his health. For a short time he resided in Brooklyn, at the house of his father-in-law, the late Zachariah Lewis. In the fall of 1832, he began to supply the Presbyterian Church at Hudson, N. Y., and in the spring accepted a call from and was installed its pastor. Here he labored fourteen years, and his earnest and fervent pulpit efforts, his genial and social manners, glowing zeal and godly life, secured for him the unbounded affection of the entire community. During his ministry, a large and beautiful church was erected, and a great number of persons, many of them of high social position and intelligence, were gathered into the church. In 1846 he accepted a call to the Bowdoin Street Church, Boston, where he was installed pastor, and where he continued to labor until 1857, when he resigned his charge and removed to Stamford, Conn., where he lived over two

years in retirement, but preaching occasionally as opportunity offered. In 1859 he supplied the pulpit of the Central Presbyterian Church, Brooklyn, N. Y., during the absence of its pastor (Dr. Rockwell) in Europe, and thenceforward to the end of his life he made that city his home. During the late war of the Rebellion, Dr. Waterbury was made secretary of the Brooklyn branch of the Christian Commission, in which position he rendered valuable and effective service, collecting books and pamphlets to be sent to the Union army, and superintending the sending-out of ministers to supplement the work of the regular chaplains in the army. He was afterwards appointed city missionary in Brooklyn. He had a large tent erected on Fort Greene and in Lefferts Park, where on Sundays the outside multitude were congregated to hear the Gospel. Misfortune clouded his last days. His ample property was swept away at a stroke, and his health was gone; yet in the midst of all he never lost his cheerfulness or trust in God, but rested calmly on the never-failing promises. Dr. Waterbury was a man of warm piety, and always watchful for opportunities of winning souls to Christ. As a pastor, he was faithful, sympathetic, and earnest. In his prime he was a preacher of unusual excellence and power. He wrote much for the religious press, published quite a number of sermons and tracts, besides six or eight volumes of works on various religious subjects. Among his last utterances was this—"Jesus is with me." He died on Sabbath morning, Dec. 31, 1876. (W. P. S.)

**Waterland, DANIEL, D.D.**, an eminent English theologian and controversialist, was born at Wasely, in Lincolnshire, Feb. 14, 1683. He was educated at the free-school of Lincoln, and Magdalene College, Cambridge, where he graduated about 1703, and became a fellow of the college in 1704. He continued to reside at the university, and after taking holy orders he acted as tutor for many years. He became master of his college in 1713, and during the same year was rector of Ellingham, in Norfolk. He was appointed one of the chaplains in ordinary to king George I in 1714; preached the Lady Moyer Lectures at St. Paul's, London, in 1720; became rector of St. Austin's and St. Faith's, London, in 1721; chancellor of the Church of York in 1723; canon of Windsor in 1727; and vicar of Twickenham and archdeacon of Middlesex in 1730. He died in London, Dec. 23, 1740. Dr. Waterland was greatly distinguished as a Trinitarian controversialist, having been especially noted for his treatises on the *Divinity of Christ* in reply to the positions of Drs. Whitby and Samuel Clarke, in vindication of the authority of the Scriptures against the positions of Middleton and Tindal, and on the doctrines of the eucharist and baptismal regeneration. His most important works are the following: *Vindication of Christ's Divinity* (1719);—*Second Vindication* (1723);—*Further Vindication* (1724);—*Eight Sermons in Defence of the Divinity of our Lord Jesus Christ* (1720), preached at the Moyer Lectures;—*Case of Arian Subscription Considered* (1721);—*Five Letters to William Staunton concerning the Trinity* (1722);—*Critical History of the Athanasian Creed* (1724);—*Scripture Vindicated* (1730-34);—*Nature, Obligation, and Efficacy of the Christian Sacraments Considered* (1730);—*Importance of the Doctrine of the Holy Trinity Asserted* (1734);—*Review of the Doctrine of the Eucharist as Laid Down in the Scriptures and Antiquity* (1737);—*Regeneration Stated and Explained* (1740);—*Sermons on Several Important Subjects* (1742), published after his death by Joseph Clarke. In 1823 appeared a complete edition of his works in eleven volumes, with a *Review of the Author's Life and Writings*, by William Van Mildert, D.D., lord bishop of Llandaff.

**Waterman, JOHN A., D.D.**, a Methodist Episcopal divine, was born in New Hampshire, June 29, 1790. He was converted in his eighteenth year; admitted into the Ohio Conference in 1814; and travelled successively the Miami, Mahoning, and Zanesville circuits. When

the Pittsburgh Conference was formed, he fell within its bounds, and successively filled Pittsburgh, Wheeling, Washington, Steubenville, and other prominent appointments. In 1832 he was transferred to the Ohio Conference, as a superannuate; in 1837 he was made effective, and appointed to Oxford, where he died, Aug. 6, 1837. Mr. Waterman was a self-made man. See *Minutes of Annual Conferences*, ii, 570.

**Watson, James V., D.D.**, a Methodist Episcopal minister, was born in London, England, in 1814. He emigrated to the United States while young; became a local preacher in early manhood in Indiana; and in 1832 joined the Missouri Conference. Two years later he returned to Indiana, and joined the Indiana Conference. In 1840 he became a member of the Michigan Conference, and later of the Detroit Conference, in which he filled some of the most prominent appointments; then he labored two years as agent of the American Bible Society; and finally superannuated and established a Christian newspaper, which he edited with success until the organization of the *North-western Christian Advocate*, in 1852, when he became its editor. This position he held till his death, Oct. 17, 1856. Mr. Watson was tall and slender in person, amiable and charming in social life, marvellous in his preaching abilities, and profound as an editor. See *Minutes of Annual Conferences*, 1857, p. 431.

**Watson, Richard (1).** D.D., F.R.S., an eminent English prelate, was born at Haversham, near Kendal, Westmoreland, in August, 1737, where he received his early education from his father. He graduated at Trinity College, Cambridge, in 1759, and was elected to a fellowship in 1760. He then took orders in the Church of England, and became assistant tutor in November of the same year. He became moderator in 1762; professor of chemistry in 1764; one of the head tutors in 1767; and regius professor of divinity in 1771, and at the same time rector of Somersham, Huntingdonshire. In 1774 he exchanged his rectory for the prebend of Ely, and in 1780 became archdeacon of Ely and rector of Northwold, Norfolk. In 1782 he became rector of Knaptoft, Leicestershire, and bishop of Llandaff. In 1786 he received a bequest of property from his friend Mr. Luther, of Ougar, Essex, from which he realized £20,500. This, together with his bishopric, his professorship, his archdeaconry, and his rectory, enabled him to live in opulence, despite his complaints of poverty and neglect. He died at Calgarth Park, Westmoreland, July 4, 1816. He was the author of *An Apology for Christianity* (1776);—*An Apology for the Bible* (1796);—*Chemical Essays* (1781-87, 5 vols.);—*Sermons on Public Occasions* (1788);—*Miscellaneous Tracts on Religious, Political, and Agricultural Subjects* (1815);—and several other works on kindred subjects. He also edited a *Collection of Theological Tracts, selected from Various Authors* (1785, 6 vols.). His autobiography was published by his son, Richard Watson, LL.B., in 1817.

**Watson, Richard (2).** a Wesleyan theologian, was born at Barton-upon-Humber, Lincolnshire, Feb. 22, 1781. Physically feeble, he had a precocious mind, and against poverty and great difficulties he bent his energies to the acquisition of knowledge. He enjoyed no school advantages after he was fourteen, having at that age left the grammar-school in Lincoln. Wild and impious in youth, he was converted when about thirteen; commenced to preach when fifteen; was received into the Wesleyan Methodist ministry in 1796; resigned under false imputation of heresy in 1801; entered the ministry of the Methodist New Connection in 1803; and was received again into the Wesleyan body, chiefly through the instrumentality of Jabez Bunting, in 1812. He was active in the formation of the Wesleyan Missionary Society in 1813 (not formally inaugurated until 1817), and was made one of its secretaries in 1816, retaining the office for fourteen years. Besides attending to the duties of this office, he devoted himself to the the-

ological training of candidates for the mission work. In 1826 he was elevated to the presidency of the Conference, and in 1827 he resumed the itinerancy in Manchester. In 1830 he declined an invitation to the chair of belles-lettres and moral philosophy in Wesleyan University, Conn. About this time Watson, who was strongly opposed to slavery and intimate with Buxton, Lushington, and other leaders in the antislavery movement, made some eloquent speeches in favor of negro-emanicipation. In 1832 he was again appointed to the secretariate of missions. But his comrades were falling. Clarke had died on Aug. 25 of that year; Stanley sank to rest Oct. 9; and Watson's devoted colleague, James, passed away Nov. 6. His own dissolution was not far off. Disease had been gnawing at his vitals all his life; but with devotion indomitable he still wrote. He died, after intense suffering, Jan. 8, 1833.

Watson's character was one of great beauty. His humility and piety never shone brighter than at the time of his greatest popularity; and sympathy, tenderness, and strength blended in a spirit purified by fire. How many felt the power of his presence! "A figure so tall and thin is seldom to be seen, yet there was something majestic in his gait and manner, and, when his head was bared, the outbeamings of intelligence bespoke the genius which was concealed there, and a kind of awe was felt which indicated the presence of a superior being" (Stevenson, *Hist. of City Road Chapel*, p. 564).

He was a man of elegant taste, of a remarkably tenacious memory, great vigor of intellect, and unconquerable application. His mind was versatile; his sympathies universal. He was at home in theology, metaphysics, politics, and domestic economy. As a preacher, great things are spoken of him. *Nihil tēgit quod non ornavit*. "He soars," says Robert Hall, "into regions of thought where no genius but his own can penetrate." "He led his hearers into realms of thought of which they had previously no conception; and his tall and graceful form, his pallid countenance bearing marks of deep thought and of severe pain, and at the same time beaming with benignity and holy delight, served to deepen the impression of his incomparable discourses. The greatest charm of his preaching was its richness in evangelical truth and devotional feeling; and in those qualities it increased to the last" (*Wesl. Meth. Magazine*, 1833, p. 151). "Watson had not the earnestness and force of Chalmers," says an elaborate and able article in the *London Quarterly Review*, 1854, ii, 192; "but he possessed much more thought, philosophy, calm ratiocination, and harmonious fulness. He had not, perhaps, the metaphysical subtlety and rapid combination, the burning affections and elegant diction of Hall; but he possessed as keen a reason, a more lofty imagination, an equal or superior power of painting, and, as we think, a much more vivid perception of the spiritual world, and a richer leaven of evangelical sentiment. Owen's oratory seemed to be more flowing, spontaneous, and impassioned than that of Watson; but the latter exceeded Owen in stretch of thought, sublimity, beautiful imagery, and deep and touching pathos."

Watson gave the first systematic treatment of Wesleyan theology. His *Institutes*, though not the legal, have been the moral and scientific, standard of Methodist doctrine. Although the works of Profs. Pope and Raymond fill a niche in the temple of more recent literature, which, of course, the *Institutes* cannot fill, the latter work can never be superseded. The elder Hodge speaks of it as "excellent, and well worthy of its high repute among Methodists" (*Systematic Theology*, iii, 190). In 1852 Dr. John Brown, of Edinburgh, characterized Watson as "a prince in theology, and the *Institutes* as the noblest work in Methodism, and truly valuable." The late Dr. J. W. Alexander says, "Turretine is in theology *instar omnium*—that is, so far as Blackstone is in law. Making due allowance for difference in age, Watson, the Methodist, is the only systematizer,

within my knowledge, who approaches the same eminence; of whom I use Addison's words, 'He reasons like Paley, and descants like Hall'" (*Forty Years of Familiar Letters* [letter of Dec. 26, 1831]). The *Institutes* have defects, however (see Stevens, *Hist. of Methodism*, iii, 479). Watson's *Exposition* was written in sickness, left unfinished, and published posthumously. In the opinion of some, it is one of the finest specimens of such work in the English language. Although of ample yet modest learning, and eminently theological, it is beautiful and tender, and brings the hearer nearer to God (see Jackson, *Life of Watson*, p. 461).

Watson's influence has been great and enduring. His premature death was greatly lamented; but, "with an intellect so intense, mental labor so abundant and untiring, activity so incessant, and feelings so deep, we are not surprised that Watson fell a martyr to his exertions in the midst of his years" (*London Quarterly Review*, 1854, p. 237).

Besides missionary reports, essays, pastoral addresses, and other Conference documents, Watson wrote the following: *An Apology for the Methodists* (1799), in a letter to Rev. J. Hotham, A.B., rector of St. Werburg's, Derby, in answer to a pamphlet entitled *An Address to the People called Methodists:—Memoirs*, in the *Meth. New Connection Magazine*, 1805, etc.:—*Popular History and Description of the City of Liverpool* (1807):—*Brief History of the Reign of George III* (1807, 12mo):—*Editorial Articles*, in the *Liverpool Courier*, 1807 sq.:—*A Letter to William Roscoe* (1808), containing strictures on his late publication on the present war with France:—*Defence of Wesleyan Methodist Missions in the West Indies* (London, 1817, 8vo):—*Remarks on the Eternal Sonship of Christ; and The Use of Reason in Matters of Revelation* (ibid. 1818), suggested by passages in Clarke's *Commentary on the N. T.*:—*Observations on Southey's Life of Wesley* (ibid. 1821, 8vo; bound with Watson's *Life of Wesley*, ibid. 1835, 8vo):—*The Labyrinth, or Popish Circle* (transl. from the Latin of Simon Episcopus, 1650; London, 1826), being a confutation of the supposed infallibility of the Church of Rome:—*Theological Institutes* (ibid. 1824, 3 vols. 8vo; 8th ed. 1850, 4 vols. 12mo; reprinted in N. Y., Nashville, etc.):—*Life of John Wesley* (London, 1831, 12mo, often reprinted; Amer. ed. N. Y. 1831; Cooperstown, 1845):—*An Affectionate Address to the Leaders of the London South Circuit* (London, 1830), in opposition to certain tendencies towards Independency:—*Conversations for the Young* (London, and N. Y., 1830, 12mo), designed to promote the profitable reading of the Holy Scriptures:—*Biblical and Theological Dictionary* (London, 1832, royal 8vo; 10th ed. 1850; N. Y., Nashville, 1857, 8vo, revised with additions by T. O. Summers):—*Sermons, and Sketches of Sermons* (London, 1834, 3 vols. 12mo; 1854, 3 vols. 8vo; N. Y. 1845):—*Expositions of the Gospels of Matthew and Mark and other Portions of the Holy Scriptures* (London, 1833, royal 8vo; 5th ed. 1848, 12mo; N. Y. 1837, 8vo). Watson projected sermons on the Epistle to the Romans, and a complete exposition of the New Test. His *Works* were published in London in 1834-37, with *Life*, by Jackson (13 vols. 8vo; 2d ed. 1838, 12 vols. 12mo). An *Analysis of the Institutes* was prepared by Dr. McClintock in 1842, bound with a new edition of the work (N. Y. 1850, 2 vols. 8vo), and revised by James A. Bastow (published separately, London, 1876, 12mo).

Besides the authorities cited in the article, see Jackson, *Life of Watson* (London, and N. Y. 1834, 8vo); Stevens, *Hist. of Methodism* (see Index, vol. iii); Smith, *Hist. of Wesl. Methodism* (see Index, vol. iii); *Meth. Quar. Review*, 1861, p. 15 sq.; Gorrie, *Lives of Eminent Methodists* (Auburn, 1852, 12mo); Scott, *Obituary, in Minutes of the Conference*, 1833; Lowndes, *Bibliog. Manual*, s. v.; Jacoby, *Geschichte des Methodismus*, i, 335. For able reviews of the apologetics of the *Institutes*, see Bangs, in the *Meth. Quar. Review*, July, 1837; Jan. 1838; and of their metaphysics, see Cocker, *ibid.* April, 1862. For a reply to both Bangs and Cocker, see Lev-

ington, *Watson's Theological Institutes Defended* (Detroit and N. Y. 1863, 12mo). Against Levington, see Whedon, *Meth. Quar. Review*, 1864, p. 155. For a review of the moral philosophy of the *Institutes*, see Cocker, in the *Meth. Quar. Review*, Jan. and April, 1864. See also Bunting, *Memorials of the Late Rev. Richard Watson* (Lond. 1833, 8vo); id. *Sermons and Outlines by Rev. Richard Watson*; Dixon, *His Character and Writings*, edited, with *Biographical Sketches*, by Rev. William Willan (ibid. 1865, 8vo).

**Watts, Isaac, D.D.**, a celebrated divine and poet, was born at Southampton, England, July 17, 1674. His father was the master of a boarding-school in that town, a man of strong devotional feeling, and a rigid Nonconformist. He was imprisoned, on account of his Nonconformity, in the time of Charles II; and, during his confinement, his wife sat on a stone at the prison door with Isaac, then an infant, at her breast. Young Watts early displayed a love for books, and imbibed, under the training of his parents, that turn of mind which prompted him to become a Dissenting minister. He entered upon the study of Latin at four years of age, and very soon after began the study of Greek and Hebrew under the Rev. John Pinhorn, master of the free grammar-school at Southampton. He was very studious, spending for books the little money given him in presents, and devoting his leisure hours to study and reading instead of joining the other boys in play. The progress he made here induced some friends to raise a sum of money sufficient to maintain him at one of the universities; but he decided to remain among the Dissenters, to whom his ancestors had belonged for several generations. Accordingly, in 1690 he was sent to an academy in London kept by Rev. Thomas Rowe, then minister of the Independent meeting-house in Haberdasher's Hall. Here he remained three years, studying with such zeal and application as permanently to injure his health. He allowed himself no time for exercise, and very little for sleep. He used to mark all the books he read, to abridge some, and annotate others of them. Of his classical acquirements at this period, Dr. Johnson says, "Some Latin essays, supposed to have been written as exercises at his academy, show a degree of knowledge both philosophical and theological, such as very few attain even by a much longer course of study." His leisure hours seem to have been early occupied in poetical efforts. He intimates in his miscellanies that he was a maker of verses from fifteen to fifty. His Latin verses, "written to his brother, in the glyconic measure, at the age of seventeen, are remarkably easy and elegant." He made considerable proficiency in the study of Hebrew, logic, and scholastic divinity; but his acquirements in mathematics and the physical sciences were inconsiderable. In 1693 he joined in communion with the congregation of Mr. Rowe; and in 1694 returned to his father's house, where he spent two years in private study and devotion. It was during this period that the greater part of his hymns, and probably most of his juvenile productions, were composed.

At the end of this time he was invited by Sir John Hartopp to reside in his family, at Stoke Newington, near London, as tutor to his son. Here he remained until 1702; but on the completion of his twenty-fourth year (in 1698), he preached his first sermon, and was chosen soon after assistant to Dr. Chauncy, pastor of the Independent Church then meeting at Mark Lane. In 1702 he was persuaded to succeed Dr. Chauncy in the pastoral office; but soon after his entrance upon this charge he was seized with a dangerous illness, which left him with a constitution so greatly impaired that the congregation decided to procure him an assistant. His health returned gradually, and he continued to labor in this field until 1712, when he was seized by a fever so violent and of such continuance that he never fully recovered. While in this afflictive situation he was invited to the house of Sir

Thomas Abney, at Theobalds, whither he went expecting to remain a week, but he continued there for thirty-six years—the remainder of his life. Here he continued preaching in his Church, overlooking his congregation, or engaging in literary work, as health and inclination prompted him. During the last years of his life, the conduct of some of his near relatives caused him much bitterness of soul, and seemed to so stupefy him that he took but little notice of anything about him. But the worst part of this misconduct was kept from him. Says a correspondent of Doddridge, "Lady Abney keeps him in peaceful ignorance, and his enemies at a becoming distance; so that in the midst of this cruel persecution he lives comfortably. And when a friend asks how he does, says, 'Waiting God's leave to die.'" In this peaceful state he died, Nov. 25, 1748, and was buried in Bunhill Fields.

Dr. Watts wrote largely for almost all classes of readers, students of all ages, in science, literature, poetry, and divinity. His principal published works are the following: *Horæ Lyricæ* (Lond. 1706); poems chiefly of the lyric kind:—*Hymns* (ibid. 1707):—*Orthodoxy and Charity United* (1707):—*Guide to Prayer* (1715):—*The Psalms of David* (1719):—*Divine and Moral Songs for Children* (1720):—*Sermons on Various Subjects, Divine and Moral* (1721–23):—*Logic; or, The Right Use of Reason in the Inquiry after Truth* (1725):—*The Knowledge of the Heavens and the Earth Made Easy; or, The First Principles of Geography and Astronomy Explained* (1726):—*Dissertations Relating to the Christian Doctrine of the Trinity* (ed.) :—*Essay on the Freedom of the Will in God and in Creatures* (1732):—*Philosophical Essays* (1733):—*The World to Come* (1738):—*Essay on the Ruin and Recovery of Mankind* (1740):—*Improvement of the Mind* (1741):—*Glory of Christ as God-man Unceiled* (1746):—*Evangelical Discourses* (1747):—and many others. His complete works have been published in various editions of from six to nine volumes. Of his literary merits Dr. Johnson, in his *Lives of the English Poets*, says, "Few men have left behind such purity of character or such monuments of laborious piety. He has provided instruction for all ages—from those who are lisping their first lessons to the enlightened readers of Malebranche and Locke; he has left neither corporal nor spiritual nature unexamined; he has taught the art of reasoning and the science of the stars. His character, therefore, must be formed from the multiplicity and diversity of his attainments rather than from any single performance, for it would not be safe to claim for him the highest rank in any single denomination of literary dignity; yet, perhaps, there was nothing in which he would not have excelled if he had not divided his powers to different pursuits. As a poet, had he been only a poet, he would probably have stood high among the authors with whom he is now associated. . . . He is, at least, one of the few poets with whom youth and ignorance may be safely pleased; and happy will be that reader whose mind is disposed, by his verse or prose, to imitate him in all but his Nonconformity; to copy his benevolence to man and his reverence to God." Of his *Hymns* Mr. James Montgomery (*Introductory Essay to the Christian Psalmist*) says, "Every Sabbath, in every region of the earth where his native tongue is spoken, thousands and tens of thousands of voices are sending the sacrifices of prayer and praise to God in the strains which he prepared for them a century ago; yea, every day 'he being dead yet speaketh' by the lips of posterity in these sacred lays." His works on logic and philosophy are of no great value at the present time, having been superseded by later and more discriminating treatises.

Dr. Watts was small in stature, being little more than five feet high; and was never married, although, it is claimed, not by his own fault. Monuments have been erected to his memory in Abney Park and Westminster Abbey; a statue by Chantrey was dedicated at Southampton in 1861; and the foundation of a memorial hall

was laid there May 6, 1875. See Southey, *Memoir of Isaac Watts, D.D.*; Johnson, *Life of Watts*; Jennings, *Sermon on the Death of the Late Rev. Isaac Watts, D.D.*; Gibbons, *Memoirs of the Rev. Isaac Watts, D.D.* See HYMNOLOGY.

**Watts, William, D.D.**, an English ecclesiastic, was born near Lynn, in Norfolk, about the close of the 16th century, and was educated at Caius College, Cambridge, where he graduated in 1610. He afterwards travelled abroad, and became familiar with several foreign languages. On his return, he became chaplain to king Charles I, and had the living of St. Alban's, Wood Street, London. Some time after this he became chaplain under the earl of Arundel, general of the forces in the Scotch expedition in 1639, and prebendary of Wells. About 1642 his living in London was sequestered, on account of his adherence to the crown, and his family made homeless. He was compelled to fly, and was made chaplain to prince Rupert. He died at Kinsale, Ireland, in 1649. Among his published works are, a *Translation, with Notes, etc., of Augustine's Confessions* (1631);—*Advice concerning the Philosophy of Foreign Discovery*. He also had a principal hand in Spelman's *Glossary*, and published a fine edition of Matthew Paris (London, 1640).

**Waugh, Alexander, D.D.**, a Scotch Presbyterian divine, was born at East Gordon, in Berwickshire, Aug. 16, 1754. He was educated in the grammar-school at Earlston and the universities of Edinburgh and Aberdeen, besides having studied theology two years (1774-76) under the Rev. John Brown, at Haddington. He was licensed to preach June 28, 1779, and supplied the pulpit at Well Street, London, for a short time. In 1780 he was settled as pastor at Newtown, in the parish of Melrose, Roxburghshire, and remained two years. In 1782 he became pastor in Oxford Street, London, where he continued to the time of his death, Dec. 14, 1827. He was one of the fathers of the London Missionary Society, and was very active in its support.

**Waugh, Beverly, D.D.**, a bishop of the Methodist Episcopal Church, was born in Fairfax County, Va., Oct. 25, 1789. His father, Capt. James Waugh, was a substantial farmer, and headed a company of militia at the time lord Cornwallis invaded Virginia. Mr. Waugh's youthful days were guarded by pious parents, who screened him from the common follies of early life, and gave him the best education the country could afford. At the age of fifteen he embraced religion, and maintained his reputation as a consistent Christian through life. His Christian zeal attracted the attention of a pious merchant, who, finding Mr. Waugh well qualified in figures and penmanship, engaged him as clerk, and after a thorough trial gave him full management of a store in Middleburgh, forty miles from Alexandria, the home of his employer. Thus was laid the foundation of his well-developed business habits in after-life. While in his mercantile life, he began exercising his gift as an exhorter, under the conviction that to decline laboring for the salvation of souls would bring a great peril upon his soul and frustrate his religious enjoyment. Prompted by such a motive, he quitted business in 1809, and, entering the Baltimore Conference, was appointed helper on the Stafford and Fredericksburg Circuit, Va. In 1810 he travelled the Greenbrier Circuit; and in 1811 was admitted into full connection, and stationed at Ebenezer, Washington city, the only Methodist Church then in the national metropolis. On April 12, 1812, he was married to Miss Catherine B. Busby, of Washington city. The following eighteen years of his itinerant career were marked with all the peculiar lights and shades, joys and sorrows, of a Methodist preacher's life. In 1828 Mr. Waugh was elected assistant book-agent, and in 1832 principal book-agent, in the Methodist Book Concern in New York city. In 1836 he was constituted bishop. His views respecting

the new office, as recorded in his private journal at the time, exhibit his characteristic strong sense of duty and his habitual diffidence and self-distrust. He says, "Much as I felt my utter inadequacy to the important work, I feared to take myself out of the hands of my brethren. I could not, therefore, see my way clear to do anything else than to throw myself and my all into the arms of Christ, and by his grace attempt the performance of the work to which God, by his Church, appeared plainly to call me." To follow Bishop Waugh on his regular episcopal tours for twenty-two consecutive years, and review his travels and labors, would not be suitable in this brief sketch. Suffice it to say, in whatever locality his office demanded his presence during those twenty-two years he was never absent, and was so tenacious of performing his whole duty that, sick or well, he seldom called for a moment's relief. In considering bishop Waugh's character, there is much to impress and interest. His personal appearance was very striking. He was sedate and grave, but not sad; cheerful, but not trifling; proverbially neat; and his strength and meekness were happily blended. Christianity pervaded and ennobled him. About two weeks before his death, the bishop went to Carlisle, Pa., to assist a brother minister in an interesting revival, where he labored with his usual zeal and success. He died suddenly at his home in Baltimore, of erysipelas, followed by an affection of the heart, Feb. 9, 1858. See *Minutes of Annual Conferences*, 1858, p. i-iv, 6-8; *Simpson, Cyclop. of Methodism*, s. v.; *Sprague, Annals of the Amer. Pulpit*, vol. vii.

**Wayland, Francis, D.D., LL.D.**, an eminent Baptist divine and educator, was born in the city of New York, March 11, 1796. His parents came to the United States from England in 1793. Soon after his settlement in New York, his father left his secular business and was licensed to preach the Gospel, and spent the remainder of his days in the ministerial office. The early educational advantages of the son were not of the highest order, apart from those which he enjoyed in his own home, where he felt the influence, in moulding his intellectual character, of a mother of rare qualities of mind and heart. He always gratefully referred, in after-life, to the ability of the instructor who seems first to have taught him to study for the love of it, Mr. Daniel H. Barnes. He was admitted into the sophomore class of Union College, Schenectady, in May, 1811, and was graduated July 28, 1813. On leaving college he began at once the study of medicine, and proceeded so far in his professional career that he had begun to practice, when a sudden turn was given to all his life plans by his conversion. He now resolved to study for the ministry. To make the necessary preparation for entering upon his work, he went to Andover in the autumn of 1816, where he remained one year, deriving great benefit from the instructions of Moses Stuart, one of the most earnest, inspiring teachers any institution in this country has ever had. He left Andover at the close of the session of 1816-17, expecting to resume his studies in the fall. He did not return, however, having accepted an appointment as tutor in Union College, where he remained the next four years. The First Baptist Church in Boston being destitute of a pastor, at the suggestion of Dr. Wisner, then the minister of the Old South Church, the name of Mr. Wayland was mentioned to the Church, as a most suitable person to fill the vacant place. In due time a call was extended to him, and he was ordained Aug. 21, 1821, being then a few months over twenty-five years of age. In some respects it was far from being an inviting field of labor to which he had been called. The house of worship was old and unattractive. The Church had been greatly weakened in its numbers and in its resources. The personal appearance of the new minister was not particularly graceful or winning. It was a severe discipline through which he was called to pass, but he took up his burdens with meekness, and demeaned himself as a good

minister of Jesus Christ, and at length his reward came, and it came deservedly as the result of hard, untiring work, and unflinching devotion to his duties as a Christian minister. Not that he became what is called a "popular" preacher, a thing which he never aspired to be, and could not have been under any circumstances, but he grew every month in the esteem and respect of those who knew him intimately and could appreciate his worth. A little more than two years after his settlement he preached his celebrated sermon on *The Moral Dignity of the Missionary Enterprise*. It was on Sunday evening, Oct. 26, 1823, that he delivered it, it being his turn to preach the lecture to the three churches of his denomination in Boston, which were wont occasionally to hold a union service. "The house was uncomfortable," we are told (the preacher wearing his great-coat throughout the service), "and there was but little enthusiasm on the occasion." What the preacher's estimate of the performance was, we infer from the statement that "on Monday morning he went to Dr. Wisner's, and threw himself on a sofa, in one of his most depressed moods, saying, 'It was a complete failure. It fell perfectly dead.'" It is needless to say that he was mistaken. Probably no sermon ever preached in America, at least up to that time, has had a wider circulation, or been perused by a larger number of readers. Dr. Wayland was pastor of the Church in Boston which he served so faithfully five years, when he was invited to accept the professorship of moral philosophy in Union College, made vacant by the resignation of Rev. Dr. Alonzo Potter. In this position he remained only a few months, having been called to the presidency of Brown University, upon the duties of which office he entered in February, 1827, being at the time not quite thirty-one years of age.

Dr. Wayland now entered upon what was to be the work of nearly the whole of the remainder of his life. What he accomplished as president of Brown University has passed long since into the records of the literary history of our country. But it was no bed of roses on which he was called to recline. From the outset of his administration he had a well-defined "policy." It was not popular, but he believed it to be right, and he firmly and persistently pursued it against opposition which at times was very bitter and unrelenting. "I was not responsible," he remarks, in the review of his administration, "for the continuance of a college in Providence, but I considered myself responsible for the conduct of the college on correct principles so long as it continued. What income I derived from my position was a secondary matter. I could live on the poorest fare and wear the cheapest clothing, but I must and would do what seemed my duty." He was so pleased with a remark of Dr. Arnold's that he made a special note of it in his copy of the *Life* of that great teacher. "It is not necessary that this (Rugby School) should be a school of three hundred, or one hundred, or of fifty boys; but it is necessary that it should be a school of Christian gentlemen." It is not to be wondered at that shirks, and idle men, and doting parents should look with disfavor upon a man so earnest, and so determined to raise the standard of education to the highest point possible. Such persons had but slight appreciation of the moral courage which led him to say, "The vessel might sink; but if so, it should sink with all its colors flying. We would strive to make it a place of thorough education, and for the cultivation of elevated and noble character." In a sketch like this we cannot present minute details. It must suffice to say that the policy which the new president marked out for himself commended itself to thoughtful men and the lovers of good learning. Those who had long loved the university, and contributed to its prosperity, felt new hope. The men of wealth in the city where it had its home gave liberally to supply its wants. While he was in office, and chiefly through his personal efforts, Manning Hall was erected, a twenty-five-thousand-dollar fund raised

for the library, and the library itself greatly enlarged and enriched by some of its most valuable treasures; Rhode Island Hall erected, a new president's house built, the college campus greatly improved and extended, and the endowment and scholarship and aid funds enlarged. For twenty-eight years and a few months Dr. Wayland was president of Brown University. Weary with this long service, and convinced that the prolongation of his life depended on his relaxation from his arduous duties, he resigned his office, Aug. 20, 1855. It was a touching remark which he made to his associate, Prof. Goddard, when the bell rang for the opening exercises of the new term: "No one can conceive the unspeakable relief and freedom which I feel at this moment to hear that bell ring, and to know, for the first time in nearly twenty-nine years, that it calls me to no duty." For less than two years he remained in the comparative quiet of his pleasant home, within an easy walk of the college grounds. He was invited to act as pastor of the First Baptist Church in Providence for such time as he might find his strength adequate to perform the duties of the office. With his wonted zeal and earnestness, he entered upon the work early in the spring of 1857, and continued in it a little more than a year, exhibiting, in the course which he pursued both as preacher and pastor, an illustration of what was his conception of the duties of an office than which none more honored could a Christian man take upon himself. After retiring from public life, Dr. Wayland passed the few remaining years of his life in Providence, where he died, Sept. 30, 1865.

We find in the list of the publications of Dr. Wayland, in the form of books, sermons, addresses, etc., the number of seventy-two, exclusive of many articles which he wrote for the periodicals, daily, weekly, and quarterly. From this number we select the following as among those best known: *Discourse on the Moral Dignity of the Missionary Enterprise* (1823):—*Discourse on the Duties of an American Citizen* (1825):—*Murray Street Discourse:—Certain Triumphs of the Redeemer* (1830):—*Moral Efficacy of the Atonement* (1831):—*Philosophy of Analogy* (ed.):—*Sermon at the Installation of William R. Williams* (1832):—*Dependence of Science upon Revealed Religion* (1835):—*Elements of Moral Science* (ed.):—*Elements of Political Economy* (1837):—*Limitations of Human Responsibility* (1838):—*Thoughts on the Present Collegiate System in the United States* (1842):—*Domestic Slavery Considered as a Scriptural Institution*:—*Discussion with Rev. R. Fuller, D.D.* (1845):—*Memoir of Miss Harriet Ware* (1848):—*University Sermons* (1850):—*Memoir of the Life and Labors of Rev. A. Judson, D.D.* (1853):—*Sermon at Rochester on the Apostolic Ministry* (ed.):—*Elements of Intellectual Philosophy* (1854):—*Notes on the Principles and Practices of the Baptist Churches* (1856):—*Sermons to the Churches* (1858):—*Introduction to Muller's Life of Trust* (1861):—*Memoir of the Christian Labors of Thomas Chalmers, D.D., LL.D.* (1864):—*Revised Edition of Elements of Moral Science* (1865). See *A Memoir of the Life and Labors of Francis Wayland, D.D., LL.D.* (N. Y., 1867), by his sons Francis Wayland and H. L. Wayland. (J. C. S.)

**Wayland, John, D.D.**, a clergyman of the Protestant Episcopal Church, was born in New York city. His father was pastor of a Baptist Church in Troy, N. Y. John graduated from Union College with honor; became professor of mathematics and rhetoric in Brown University, Providence, R. I., of which institution Dr. Francis Wayland, his brother, was president. For many years he was pastor of a Baptist congregation in Salem, Mass.; but afterwards entered the Protestant Episcopal Church, and became rector of St. John's parish, Canandaigua, N. Y. In 1848 he assumed the rectorship of St. James's parish, Roxbury, Mass., where he remained twelve years. The last two years of his life were spent in Saratoga, without parochial charge. He died at Saratoga Springs, N. Y., Oct. 16, 1863. See *Amer. Quar. Church Review*, Jan. 1864, p. 668.

**Wayte, James H.**, an English Wesleyan missionary, was born at Newcastle-under-Lyne, Staffordshire, in May, 1822. His parents feared the Lord, and he himself early united with the Church. He believed that he was destined for the mission field. In 1844 he was appointed to the Richmond branch of the theological institution for training for the foreign field. Here he was very diligent in his studies, and very exemplary in his piety and zeal. In October, 1845, Wayte embarked for Sierra Leone, in company with T. Raston, David Griffiths, and others. But the horrid yellow-fever, the missionary-slayer, would not pass him by. Symptoms appeared on Jan. 5, 1846, and on the 16th he died at Free Town. His death-bed scene was one of the most beautiful and triumphant on record. See *West. Meth. Magazine*, Feb. 1849, p. 113; *Minutes of Conferences*, 1846.

**Wayu** (or **Vayu** [q. v.]), in Hindû mythology, is one of the three deities whom Kunti, wife of Pandu, called from heaven, so as through him to become mother of Pandus. By him she became mother of Bhirwa.

**Wayusaccha** (or **Vayusacca**), in Hindû mythology, is a surname of the god Agni (fire); it signifies *friend of the air*.

**Wazo**, bishop of Liege, was born probably in the eighth decade of the 10th century. His name was originally *Walter* or *Warner*. He came under the notice of bishop Notger, and was admitted into the seminary for the clergy at Liege, in time becoming its chaplain, canon of the cathedral, and magister scholarum. In 1017 he was made dean, and authorized to share in the administration of the secular property of the chapter. In this position he displayed so much strictness towards inferiors and so much self-assertion towards superiors as to make many enemies. The bishop, Wolpodo, took active part against him by exciting the passions of the peasants and disturbing the peace of the school to such a degree as involved the life of Wazo in danger and induced him to resign the leadership of the school. In A.D. 1030 the emperor Conrad chose Wazo to be one of his chaplains. Two years later he was made provost and archdeacon of Liege. In 1037 his influence secured the election of bishop to the youthful Nithard; but when the latter died, in 1041, Wazo was compelled by the unanimous voice to assume episcopal functions himself. In his new position he displayed independence in administering the Church, and unequalled force and skill in the conduct of civil affairs, such as were then under the control of the bishops of the Church. He refused to obey the emperor's behest and pronounce sentence upon archbishop Wigger of Ravenna, who had been convicted of deviating from the customs of the Church in a certain matter, on the ground that Wigger was an Italian, and subject therefore to the pope rather than the emperor. He also braved the emperor's anger with the declaration that a pope could be judged of God only, and that therefore Henry III had no authority to fill the pontifical chair vacated by the Synod of Sutri in 1046. Wazo further angered the emperor by collecting forces and participating in the wars against the Lorraine rebels, who had threatened the peace and property of his diocese, and carried on a campaign of murder and pillage. The court held that Wazo had taken up arms from motives of personal aggrandizement and love of war; and when he refused to take advantage of the conduct of lady De Mons, who wished to deliver up her husband as guilty of high-treason, his loyalty came under suspicion. In the meantime Wazo wrote repeated letters to the king of France, dissuading him from prosecuting an alleged claim upon the possession of Lorraine, for which attempt troops were already collected. Nothing, however, could regain for him the emperor's favor, and he was eventually brought to undergo a public humiliation, and pay a fine for an act of alleged disobedience. As bishop, Wazo was a zealous patron of schools; a liberal benefactor of the poor and

needy; a tolerant critic of heretical opinions. He denied the power of bishops to pronounce sentence of death upon heretics. He was also deeply pious. It is stated, indeed, that he avoided in his clothing *totius superstitiosis typus*, i. e. wore no *cilicium*; but he nevertheless mortified the flesh. He died July 8, 1047. The material for a life of Wazo is furnished by Anselm, canon of Liege (died about 1056), in his *Gesta Episc. Leodiensium*, c. 39-73. See Pertz, *Monum. Hist. Script.* vii, 210-233; Fisen, *Sancta Legia*, i, 158 sq.; Stenzel, *Gesch. Deutschlands u. d. fränk. Kaisern*, vol. i; Giesebrecht, *Gesch. d. deutsch. Kaiserzeit*, vol. ii.—Herzog, *Real-Encyklop.* s. v.

**Wealth.** See **RICHES**.

**Wean** (נָנַן), from the completion of the infant at that time). Most Oriental mothers suckle their children much longer than is usual in Europe, and the same custom seems to have prevailed among the ancient Hebrews. When Samuel was weaned, he was old enough to be left with Eli for the service of the tabernacle (1 Sam. i, 24). As no public provision was made for the children of priests and Levites until they were three years of age, it is probable that they were not weaned sooner (2 Chron. xxxi, 16; 2 Macc. vii, 27). In India a boy is not taken from the breast until he is three years of age; but throughout the East a girl is generally weaned within the first or second year. "Abraham made a great feast when Isaac was weaned" (Gen. xxi, 8), and the same custom prevails among the Hindus and Persians. See **CHILD**.

**Weapon** (usually נֶפֶשׁ, ὄπλον, which denote an instrument of any kind). Among the Hebrews we find, in general, the same kinds of military weapons mentioned (1 Sam. xvii, 5 sq.; 2 Chron. xxvi, 14; Neh. iv, 13, 16; Ezek. xxxix, 9; comp. Philo, *Opp.* ii, 530) as among other warlike nations of antiquity (see Herod. vii, 61 sq.). We can therefore determine little about their precise form or material, except so far as monuments or modern usage enables us to draw a comparison. We note the following kinds (comp. 2 Cor. vi, 7, ὅπλα; δέξια καὶ ἀριστερά, Diod. Sic. iii, 51; σκεπαστήρια, ἀμυντήρια, Lat. *arma et tela*; see Bremi on Nepos, xiv, 11):

1. *Protective Weapons*.—To this class belong the following:

1. The *Shield* (q. v.).

2. The *Helmet* (כִּנְיֹה or כִּנְיָה, 2 Chron. xxvi, 14; Jer. xli, 4; ἡ περικεφαλαία, Eph. vi, 17) of brass (1 Sam. xvii, 5, 38; 1 Macc. vi, 35; comp. Diod. Sic. v, 30; Xenoph. *Anab.* i, 2, 16). Whether the Israelites also wore them of leather (neats' hide, Homer, *Il.* x, 257 sq.; Strabo, vii, 306, etc.; see Passow, s. v. *κυνήη*) is uncertain, although such certainly belonged to rude ages (for the ancient Egyptian form, see Wilkinson, i, 331). See **HELMET**.

3. The *Breastplate* (חֲזִיקֵי, θώραξ), which covered the centre of the person (1 Sam. xvii, 5; Neh. iv, 16; 2 Chron. xxvi, 14; 1 Macc. iii, 3), usually of brass (1 Sam. xvii, 5; Rev. ix, 9; comp. *Iliad*, xiii, 371 sq. 397 sq.) and sometimes composed of plates (חֲזִיקֵי, 1 Sam. xvii, 5), by which, however, we must not understand the Roman *lorica squameata*, consisting of a leather corselet covered with brass scales. In order to wound a fully equipped soldier, it was necessary to strike some spot where the brazen pieces failed to join each other fully, or where ordinary clothing intervened (1 Kings xx, 34). Among the Syro-Seleucid generals we find chain-armor (panoply) in use (1 Macc. vi, 35; comp. the Sept. at 1 Sam. xvii, 5; Diod. Sic. v, 30); but of linen corselets (see Köpke, *Kriegsw. d. Griech.* p. 97 sq.) there appears no trace in the Bible. See **BREASTPLATE**.

4. *Greaves* for protecting the knees and legs (קִנְיָה, κνημίδες, ocreæ; 1 Sam. xvii, 6), commonly of brass (*Iliad*, vii, 42), were universal in classical antiquity (Xenoph. *Anab.* i, 2, 16; iv, 7, 16; Virgil, *Æn.* xi, 177

Pliny, xxxiv, 18, etc.), and are regarded as an invention of the Carians (Pliny, vii, 57). We must distinguish from these the military shoe (סָאָן, Isa. ix, 4), probably like the Roman *caliga* (see Byneus, *De Calceis Hebr.* p. 83 sq.), a sort of half-boot of leather shod with strong nails (Juvenal, xvi, 24; Josephus, *War*, vi, 1, 8; *clavi caligerae*, Pliny, ix, 33; xxii, 46; xxxiv, 41). See GREAVES; SHOE.

II. *Aggressive Weapons*.—1. *The Sword* (חֶרֶב), which was carried in a special belt at the hips (1 Sam. xvii, 37; xxv, 13; 2 Sam. xx, 8), but certainly not (as Jahn [*Archäol.* II, ii, 40] falsely argues from Judg. iii, 16, 21; Josephus, *War*, iii, 5, 5) on the right side (see the figures of Ninevites in the *Journal Asiatique*, 1840, vii, pl. 3, 6, 7, 10; x, 17, 19, 22, 53, etc.). It was enclosed in a sheath (סֶכֶּל, 1 Sam. xvii, 51; 2 Sam. loc. cit.; נֶדֶן, 1 Chron. xxi, 27; שֶׁקֶל, John xviii, 11), hence the phrase "to draw the sword" (לְהַרְבֵּי חֶרֶב, or שֶׁלֶחָה, or שֶׁנִּי סֶכֶּל, Judg. iii, 16; Prov. v, 4; *δίστομος*, Heb. iv, 12; Rev. i, 61; ii, 12; *ἀμφήκης*, *liad*, xxi, 118). It was used both for striking and stabbing (1 Sam. xxxi, 4; 2 Sam. ii, 16; xx, 10, etc.). The Sept. usually translates the Heb. חֶרֶב by μάχαира, which latter occurs in the New Test., and originally denoted the short dagger (comp. *liad*, iii, 271 sq.), but later any (curved) sabre in distinction from ξίφος, the proper (military) sword; but that חֶרֶב also signifies the straight sword there can be no doubt. The Roman *sica*, a somewhat curved poniard, was introduced later among the Jews, and became, shortly before the destruction of Jerusalem, the deadly weapon of the bold robbers, who hence were called *Sicarii* (Josephus, *Ant.* xx, 8, 10; *War*, vii, 10, 1; *Life*, § 66). See SWORD.

2. *The Spear*, lance, or dart, was used as a weapon both for thrusting (close at hand) and for throwing (at a short distance), like the *δόρυ* of the Greeks (Strabo, x, 448); but chiefly for the former (see 1 Sam. xviii, 1; xix, 10; xx, 33). The usual Heb. designations are רֶבֶב and חֲבִירָה, which can hardly be distinguished, except that the latter is generally used in connection with the sword (or bow), while both appear in connection with the shield (Judg. v, 8; 1 Sam. xvii, 15). Instead of either word, we sometimes find קֶרֶן (2 Sam. xxi, 16) and קִירְדֹן (Josh. viii, 18, 26; 1 Sam. xvii, 6; Job xli, 21); also שֶׁבֶט in some cases (2 Sam. xviii, 14, according to some). They are also thought to have been used as standards for colors (Gesen. *Thesaur.* p. 683). The spears (see the Persepolitan specimens in Porter, *Travels*, i, pl. 36, 40, 46, 49) had a wooden shaft (חֵץ, 1 Sam. xvii, 7; or קֶץ, 2 Sam. xxi, 19; xxiii, 7) and an iron point (1 Sam. xvii, 7). Ash or fir was preferred (Virgil, *En.* xi, 667; Homer, *Il.* xix, 390 sq.; xxii, 293; *Odys.* xiv, 281; Ovid, *Metam.* x, 93; Statius, *Theb.* vi, 102; comp. Pliny, xvi, 24), and hence many (so Rosenmüller) explain Nah. ii, 4; but בִּרְשָׁת is probably cypress (q. v.). The *hasta* of the Romans, a weapon for throwing, is called λόγχη in the New Test. (John xix, 34; comp. 2 Macc. v, 2; xv, 11; see Alstorph, *De Hastis Veter.* [Amst. 1757]). See SPEAR.

3. *The Bow* (q. v.) in connection with *Arrows* (q. v.).

4. *The Sling* (q. v.).

5. *A Battle-axe* (see Wilkinson, i, 323, 325 sq.) is named סִנְיֹר, *Psa.* xxxv, 3; comp. the *σάγαρις* of the Scythians, Massagetae, and Persians, Herod. i, 215; iv, 70; vii, 64; Xenoph. *Cyrop.* i, 2, 9; ii, 1, 9; Strabo, xv, 734; the Armenian *sac* as a special weapon of attack (comp. the *כֶּרֶב־חַיִּי* of the Chaldeans, Jer. xli, 2). A sledge-hammer may perhaps be meant in one passage (בִּסְרִי, Prov. xxv, 18; Sept. *ρόπαλον*; comp. *Odys.* xi, 575); but it is probably only the ordinary mallet

(מַסְרִי). See generally Bosvelt [Rau], *De Armis Vett. Hebr.* (Tr. ad Rh. 1781); Jahn, *Archäol.* II, ii, 400 sq.; Seume, *Arma Vett. cum Nostris Comparata* (Lips. 1792). See ARMOR.

Of the custom of many nations of burying arms with a warrior in the grave, there is no trace in the Bible (see Ezek. xxii, 27; 1 Macc. xiii, 29; comp. Tacitus, *German.* xxvii; Rosenmüller, *Morgenl.* iv, 343 sq.). Captured weapons were suspended in temples or burned in heaps (Isa. ix, 4 sq.; Ezek. xxxix, 9; comp. Virgil, *Æn.* viii, 562 sq.). *Arenals* (בְּרִירִים, 2 Kings xx, 13; Isa. xxxix, 2; *ὀπλοθήκη*, Josephus, *War*, ii, 17, 9) were erected in cities for the deposit of weapons. See ARMORY.

**Weasel** (חֹלֶה, *chôled*, so called from its *gliding* [Gesen.] or *burrowing* [Fürst]) occurs only in Lev. xi, 29, in the list of unclean animals. According to the old versions and the Talmud, the Heb. *chôled* denotes "a weasel" (see Lewysohn, *Zool. des Talm.* p. 91, and Buxtorf, *Lex. Chald. et Talm.* p. 756); but if the word is identical with the Arabic *chuld* and the Syriac *chuldo*, as Bochart (*Hieroz.* ii, 435) and others have endeavored to show, there is no doubt that "a mole" is the animal indicated. Gesenius (*Thesaur.* p. 474), however, has the following very true observation: "Satis constat animalium nomina persæpe in hac lingua hoc, in alia cognata aliud, id vero simile, animal significare." He prefers to render the term by "weasel," as in the Sept. (γαλή), Vulg. (*mustela*), and the English version. See MOLE.

Moles are common enough in Palestine. Hasselquist (*Travels*, p. 120), speaking of the country between Jaffa and Ramah, says he had never seen in any place the ground so cast up by moles as in these plains. There was scarcely a yard's length between the mole-hills. It is not improbable that both the *Talpa Europæa* and the *T. cæca*, the blind mole of which Aristotle speaks (*Hist. Anim.* i, 8, 3), occur in Palestine, though we have no definite information on this point. The ancients represented the mole as having no eyes, which assertion later scientific writers believed they had disproved by showing our species to be possessed of these organs, though exceedingly small. Nevertheless, recent observations have proved that a species, in other respects scarcely, if at all, to be distinguished from the common, is totally destitute of eyes, and consequently has received the name of *Talpa cæca*. It is to be found in Italy, and probably extends to the East, instead of the *Europæa*. Moles must not, however, be considered as forming a part of the rodent order, whereof all the families and genera are provided with strong incisor teeth, like rats and squirrels, and therefore intended for subsisting chiefly on grain and nuts; they are, on the contrary, supplied with a great number of small teeth, to the extent of twenty-two in each jaw—indicating a partial regimen; for they feed on worms, larvae, and underground insects, as well as on roots, and thus belong to the insectivorous order, which brings the application of the name somewhat nearer to carnivora and its received interpretation "weasel."

Bochart, inclined to recognise the word חֹלֶה, *tsiyim* (A. V. "wild beast of the desert," etc.), as a general term denoting cats, or any kind of wild beasts that frequent dry places, discovered an incongruity when it is opposed to a single species, חֹלֶה, *iyim* (A. V. "wild beast of the islands"), which he translates *thoes* (Isa. xxxiv, 14; Jer. l, 39). Both words are meant, it seems, to imitate the cry of animals; and if he be right in regarding the first as expressive of the mewing or screaming of wild-cats, with such other animals as the ancients included in the feline tribe, and we now class among *Felivæ* and *Mustelidæ*, each including several genera, more or less represented by species residing in and around Palestine, we then find the opposition of the two words strikingly just, provided that, instead of the single *thoes* of Bo-

chart, we make *iyim* include also the various wild canidæ (dogs) of the same region, amounting to at least twelve species, without including two hyenas.

Such is the vagueness of Oriental denominations, and the necessity of noticing certain species which, from their importance, cannot well be supposed to have been altogether disregarded in the Bible, that in this place a few words descriptive of the species of *Viverridæ* and *Mustelidæ* known to reside in and near Palestine, and supposed to be collectively designated by the term *tsiyim*, may not be irrelevant. They appear, both anciently and among ourselves, collected into a kind of group, under an impression that they belong to the feline family; hence we, like the ancients, still use the words civet-cat, tree-cat, polecat, etc.; and, in reality, a considerable number of the species have partially retractile claws, the pupils of the eyes being contractile like those of cats, of which they even bear the spotted and streaked liveries. All such naturally have arboreal habits, and from their low lengthy forms are no less disposed to burrow; but many of them, chiefly in other hemispheres, are excellent swimmers. One of these species, allied to, if not the same as, *Genetta barbara*, is the *Thela Ælan*, described by Bochart as having "various colors, and as being spotted like a pard." In Syria it is called *sephka*, in Arabia *zebebe*, and lives by hunting birds and shaphans. There are, besides, in the same region, the *nimse*, ferret or polecat (*Putorius vulgaris*), for these two are not specifically distinct; *fertel-heile*, the weasel (*Mustela vulgaris Africana*), differing from ours chiefly in its superior size and darker colors. A *paradozurus*, identical with, or nearly allied to, *P. typus*, occurs in Arabia; for it seems these animals are found wherever there are *palmiferae*, the date-palm in particular being a favorite residence of the species. Two or three varieties, or perhaps species, of *nems* occur in Egypt solely; for the name is again general in the Arabian dialects, and denotes the ichneumon. Arabia proper has several other animals not clearly distinguished, though belonging to the families here noticed; but which of these are the *sumgiab* and the *simur*, or the *alphanex* of Ibn Omar ben-Abdulbar, quoted by Bochart, is undetermined; albeit they evidently belong to the tribes of vermin mammals of that

*Purodoxurus typus* (Palm-marten).

region, excepting as regards the last mentioned, now known to be a kind of miniature fox (*Megalotis zerda*, Ham. Smith), or *fennec* of Bruce, who nevertheless confounded it with *Paradozurus typus*, or an allied species which equally frequents palm-trees; but the *fennec* does not climb. It is equally impossible to point out the cats, tree-cats, and civet-cats noticed by the poet Nemesianus, who was of African birth, or by the Arabian Damir, who makes no further distinctive mention of them.

The *chôled* is described in Lev. xi, 29 as one of the small animals which are thrown together under the general designation of "creeping things," and which appear to include the smaller carnivorous and insectivorous *mammalia*, as well as the four-footed *reptilia*. The whole category is prohibited as unclean. The

original word, as above seen, is referred by many to the Arabic and Syriac, in which it is said to imply a creeping, insidious motion; and hence peculiarly appropriate to the *Mustelidæ*, which, from their remarkably long, slender, and vermiform bodies and short legs, seem to glide along the earth more like reptiles than quadrupeds, and insinuate themselves into the smallest crevices. Kitto mentions the fitchet or polecat (*Mustela putorius*) as found in Palestine in the neighborhood of the villages, but says that it is rarely seen in towns. The skin is of no value in Syria, as the people have not, as in Europe, any means of divesting it of its unpleasant smell (*Phys. Hist. of Palest.* p. 355). The common weasel is doubtless found there also, as it is spread over Europe; but not the stoat or ermine, the climate being

Polecat (*Mustela putorius*).

too warm for it. All these animals, but particularly the first-named, are most destructive to other small animals; and from their depredations in the poultry-yard are held in detestation by the farmer, who, however, does not consider the benefit they do him in the destruction of myriads of field-mice, house-mice, and rats. Their appetite for blood seems insatiable; their ferocity and courage prompt them to fly at animals larger than themselves; while their carnivorous organization is developed perhaps even more highly than in the typical cats, and they use their powers with the utmost skill and judgment. They prefer the brain and blood of their prey to the flesh.

**Weather** (ים, *yôm*, day, as usually rendered; "fair weather," זָהָב, *zahâb*, Job xxxvii, 22, lit. gold, i. e. "brightness;" εὐδία, Matt. xvi, 2; "foul weather," χιμῶν, ver. 3, storm, as elsewhere) IN PALESTINE is, in consequence of the region being greatly diversified by hills, valleys, and plains, quite various in different parts, being hot during the summer, especially along the sea-shore (comp. Josephus, *War*, iii, 9, 1) and in the Jordan gorge (*ibid.* iv, 8, 3), and cooler on the mountain ridges, especially in winter, but, on the whole, more equable than in Northern and Occidental countries. The length of the day also varies less in different seasons than in higher latitudes, and thus tends to equalize the temperature. See CALENDAR; PALESTINE; SEASON.

**Weathercock** is a weather vane, on which is the metal or wooden representation of a cock, placed on the top of a spire, which vane turns by the force and direction of the wind.

**Weatherford, John**, a Baptist minister, was born in Charlotte County, Va., about 1740. His parents were members of the Presbyterian Church, his father being an elder in the church of which the distinguished Dr. Rice was the minister. Soon after his conversion, his mind began to be troubled on the subject of baptism. Having conversed on the matter with his pastor, and his doubts not having been removed, Dr. Rice had the magnanimity to say to him, "I perceive, John, that you will be a Baptist. Go, and the Lord be with you." He became a member of the Baptist Church when he was about twenty years of age. He commenced to preach about the year 1761, and his ministry was so popular that crowds were drawn to hear him. Persecution now began to follow him. After preaching on a certain occasion in Chesterfield, Va., he was arrested and thrown into prison, where he was held in confinement five months. It is said of him that "his courage

forsook him not. The love of Christ constrained him. He preached at the door of the prison as long as allowed that privilege. When refused that, he preached through the gratings of the window; but such determined opposition did he meet that an effort was made by his enemies to put a stop to that also. For this purpose they built an outer wall above the grating, but Weatherford devised means to overcome the obstacle. A handkerchief by the congregation was to be raised on a pole above the wall, as a signal that the people were ready to hear. His voice being very strong, he could throw it beyond these impediments, and convey the words of life and salvation to the listening crowds." At last, through the kind interference of Patrick Henry, he was liberated from his bondage, and again, with greater zeal than ever, entered anew on the work of preaching the Gospel. Most of his life-work was that of an evangelist. Towards the close of the century, however, he sustained the relation of pastor to two churches, which are said to have flourished under his ministry. He took up his residence in Halifax County, Va., in 1813, where he lived about ten years, and then removed to Pittsylvania, where he died, Jan. 23, 1833, having been a preacher of the Gospel over seventy years. He belonged to an order of ministers who accomplished a vast amount of good in a state the people of which had too generally settled down into a condition of formalism, and needed to be roused to thoughtfulness by such instrumentalities as were represented by the subject of this sketch. However despised they may have been by some, they certainly reaped the honor which comes from God only. See *Lives of Virginia Baptist Ministers*, p. 55-61. (J. C. S.)

**Weatherford, Thomas**, a Methodist Episcopal minister, was born in Europe about 1736. He labored four years in the ministry in the United States. He was slender in frame, remarkable for his piety, and died triumphantly in 1792. See *Minutes of Annual Conferences*, 1792, p. 45.

**Weaver, John M.**, a Methodist Episcopal minister, was born in Washington County, N. Y., July 5, 1792. He embraced religion when about twenty-one; was licensed to preach in 1816; and joined the New York Conference in 1829, in which he served faithfully until 1855, when he was granted a superannuated relation. In 1859 he resumed his Conference work, labored earnestly two years, and then retired from stated work. He died at Ganges, Mich., May 12, 1872. Mr. Weaver was very devoted to Methodism, deeply pious, and an excellent preacher. See *Minutes of Annual Conferences*, 1873, p. 66.

**Weaver, Lindsey Carr**, a Methodist Episcopal (South) minister, was born in Spartanburg District, S. C., Nov. 16, 1837. He joined the Church in 1858, while a student at Wofford College; graduated in 1859; and in 1860 entered the South Carolina Conference, and labored zealously until failing health obliged him to retire from active service. He died at Bishopville, S. C., Feb. 28, 1863. Mr. Weaver was a young man of great promise, amiable in spirit, uncompromising in integrity, unflinching in zeal, and abundant in good deeds. See *Minutes of Annual Conferences of the M. E. Church, South*, 1863, p. 449.

**Weaver, Richard**, an English Congregational minister, was born at Tewkesbury, Sept. 9, 1804. In early life his mind was impressed with the importance of personal piety. He was educated at Wymondley College for ministerial work, and in 1830 was ordained over the Independent Church at Foulmire, where he labored usefully for some years. In 1838 he was stationed at Balsham, and continued for several years in charge of that church. He died Dec. 16, 1862. See (Lond.) *Cong. Year-book*, 1864, p. 248.

**Weavers, BROTHER**, is a name given to the Beghards, or Lollards, in France on account of the occupation of most of them. See LOLLARDS.

**Weaving** (אָרָב, *arav*) is an art which appears to be coeval with the first dawning of civilization. In what country or by whom it was invented, we know not; but we find it practiced with great skill by the Egyptians at a very early period, and hence the invention was not unnaturally attributed to them (Pliny, vii, 57). The "vestures of fine linen" such as Joseph wore (Gen. xli, 42) were the product of Egyptian looms, and their quality, as attested by existing specimens, is pronounced to be not inferior to the finest cambric of modern times (Wilkinson, ii, 75). The Israelites were probably acquainted with the process before their sojourn in Egypt; but it was undoubtedly there that they attained the proficiency which enabled them to execute the hangings of the Tabernacle (Exod. xxxv, 35; 1 Chron. iv, 21) and other artistic textures. At a later period the Egyptians were still famed for their manufactures of "fine" (i. e. hackled) flax and of *chori*, אֲרִי, rendered in the A. V. "networks," but more probably a *white* material either of linen or cotton (Isa. xix, 9; comp. Prov. vii, 16). From them the Tyrians procured the "fine linen with broidered work" for the sails of their vessels (Ezek. xxvii, 7), the handsome character of which may be inferred from the representations of similar sails in the Egyptian paintings (Wilkinson, ii, 131, 167). Weaving was carried on in Egypt generally, but not universally, by men (Herod. ii, 35; comp. Wilkinson, ii, 84). This was the case also among the Jews about the time of the Exode (1 Chron. iv, 21); but in later times it usually fell to the lot of the females to supply

Ancient Egyptian Women Weaving.

the household with clothing (1 Sam. ii, 19; 2 Kings xxiii, 7), and an industrious housewife would produce a surplus for sale to others (Prov. xxxi, 13, 19, 24).

The character of the loom and the process of weaving can only be inferred from incidental notices. The Egyptian loom was usually upright, and the weaver stood at his work. The cloth was fixed sometimes at the top, sometimes at the bottom, so that the remark of Herodotus (ii, 85) that the Egyptians, contrary to the usual practice, pressed the woof downwards, must be received with reservation (Wilkinson, ii, 85). That a similar variety of usage prevailed among the Jews may be inferred from the remark of John (xix, 23) that the seamless coat was woven "from the top" (ἐκ τοῦ ἀνωθεν). Tunics of this kind were designated by the Romans *rectæ*, implying that they were made at an upright loom at which the weaver stood to his work, thrusting the woof upwards (Pliny, viii, 74). The modern Arabs use a procumbent loom, raised above the ground by short legs (Burchhardt, *Notes*, i, 67). The Bible does not notice the loom itself, but speaks of the beam (כִּנּוּר, so called from its resemblance to a ploughman's yoke) to which the warp was attached (1 Sam. xvii, 7; 2 Sam. xxi, 19); and of the pin (פִּיִּסָּה, a term otherwise understood of the warp, as in the Sept. and the Vulg. [Gesenius, *Thesaur.* p. 890]) to which the cloth was fixed, and on which it was rolled (Judg. xvi, 14). We have also notice of the shuttle (אָרָב, denoting both the web and the shuttle), which is described by a term significant of the act of weaving (Job

An Egyptian Loom. (*k* is a shuttle, not thrown, but put in with the hand. It had a hook at each end.)

vii, 6); the thrum (תֵּרֶם) or threads which attached the web to the beam (Isa. xxxviii, 12, marg.); and the web itself (Judg. xvi, 14; A. V. "beam"). Whether the terms in Lev. xiii, 48, rendered "warp" (שָׂרִיר) and "woof" (עֲרֵב), really mean these admits of doubt, inasmuch as it is not easy to see how the one could be affected with leprosy without the other: perhaps the terms refer to certain kinds of texture (Knobel, *ad loc.*). The shuttle is occasionally dispensed with, the woof being passed through with the hand (Robinson, *Bibl. Res.* i, 169). The speed with which the weaver used his shuttle, and the decisive manner in which he separated the web from the thrum when his work was done, supplied vivid images—the former of the rapid passage of life (Job vii, 6), the latter of sudden death (Isa. xxxviii, 12).

The textures produced by the Jewish weavers were very various. The coarser kinds, such as tent-cloth, sackcloth, and the "hairy garments" of the poor, were made of goat's or camel's hair (Exod. xxvi, 7; Matt. iii, 4). Wool was extensively used for ordinary clothing (Lev. xiii, 47; Prov. xxvii, 26; xxxi, 13; Ezek. xxvii, 18); while for finer work flax was used, varying in quality, and producing the different textures described in the Bible as "linen" and "fine linen." The mixture of wool and flax in cloth intended for a garment was interdicted (Lev. xix, 19; Deut. xxii, 11). With regard to the ornamental kinds of work, the "needlework" and "the work of the cunning workman" have already been discussed under the head of NEEDLEWORK to the effect that both kinds were produced in the loom, and that the distinction between them lay in the addition of a device or pattern in the latter, the *rikmah* consisting

simply of a variegated stuff without a pattern. We may further notice the terms (1) *shabáts* (שָׁבֵט) and *tushbēts* (תִּשְׁבֵּט), applied to the robes of the priest (Exod. xxviii, 4, 39), and signifying *tesselated* (A. V. "broidered"), i. e. with depressions probably of a square shape worked in it, similar to the texture described by the Romans under the term *scutulatus* (Pliny, viii, 73; Juvenal, ii, 97); this was produced in the loom, as it is expressly said to be the work of the weaver (Exod. xxxix, 27); (2) *moshzár* (מֹשֶׁזֶר) (A. V. "twined"), applied to the fine linen out of which the curtains of the tabernacle and the sacerdotal vestments were made (xxvi, 1; xxviii, 6, etc.); in this texture each thread consisted of several finer threads twisted together, as is described to have been the case with the famed corselet of Amasis (Herod. iii, 47); (3) *mishbetsôth zahâb* (מִשְׁבְּצוֹת זָהָב) (A. V. "of wrought gold"), textures in which gold-thread was interwoven (Psa. xlv, 13). The Babylonians were particularly skilful in this branch of weaving, and embroidered groups of men or animals on the robes (Pliny, viii, 74; Layard, *Nineveh*, ii, 413). The "goodly Babylonish garment" secreted by Achan was probably of this character (Josh. vii, 21). The sacerdotal vestments are said to have been woven in one piece without the intervention of any needlework to join the seams (Josephus, *Ant.* iii, 7, 4). The "coat without seam" (χιτών ἀρραφος), worn by Jesus at the time of his crucifixion (John xix, 23), was probably of a sacerdotal character in this respect, but made of a less costly material (Carpzov, *Appar.* p. 72). See WEB.

**Web:** 1. The spider's (בֵּית, *báyith*, Job viii, 14, a house, as elsewhere; קִירִים, *kurim*, Isa. lix, 5, 6, threads): 2. Of the loom (מַסְכֶּת, *masseketh*, Judg. xvi, 13, 14, warp, as woven). See WEAVING.

**Webb, Benjamin C.**, a clergyman of the Protestant Episcopal Church. His ministry was devoted to one object, the salvation of the Southern slaves, having had charge of several large plantations in Prince William County, Va. In 1854 he removed from the low country to Abbeville, S. C., to take charge of a white congregation, hoping to improve his health by the change of climate; but he resigned the Church, and was seeking relief at Wilson's Springs, N. C., in 1855, when he died, aged forty-five years. See *Amer. Quar. Church Review*, 1855, p. 482.

**Webb, Daniel**, a Methodist Episcopal minister, was born at Canterbury, Conn., April 13, 1778. He embraced religion in 1797, and immediately began his life-work of preaching. He entered the New England Conference in his twentieth year, and labored on its many and vast circuits, with marvellous endurance and experience, until 1814, when the wide-spread distress occasioned by the war with Great Britain compelled him to locate, which he did at Newport. Here he opened a school, and for nine years performed the responsible duties of both schoolmaster and preacher in charge. In 1823 he rejoined the New England Conference, and during the following eighteen years filled the most important charges in the Conference; published the *Zion's Herald* one year (1827); and was presiding elder for several years. In 1841 he superannuated; in 1843 he was transferred to the Providence Conference, and was stationed first at Little Compton, and then at

Modern Egyptian Shawl-weaver.

Barnstable, where by various arrangements by his highly cultured and appreciative audience he was continued six years consecutively. Here he died, March 19, 1867, one of the most noted Methodists of his time, having spent more years in the active work than any other preacher in the annals of Methodism. See *Minutes of Annual Conferences*, 1867, p. 101.

**Webb, Francis**, an English Baptist minister, was born at Taunton in 1735. He became minister of a congregation at Barbican, London; also at Honiton; and died in 1815. He was the author of some volumes of *Sermons*:—*Somer-set: a Poem* (1811);—and *Pankharmonicon* (1815). See (Lond.) *Gentleman's Magazine*, 1815, ii, 278, 568.

**Webb, James**, a Methodist Episcopal minister, was born in Pennsylvania in 1829. He embraced religion in early life; years later was licensed as an exhorter; and began his ministerial life in 1858 on Zion Circuit, Cecil Co., Md. Meeting with discouragements, he began to doubt the genuineness of his call, and soon returned to his former vocation. After much prayer and counsel he again began the active work; joined the Philadelphia Conference in 1860, and in it labored four years so persistently that his health gave way and caused his superannuation. He died, greatly lamented, in Chester County, Pa., Oct. 8, 1864. See *Minutes of Annual Conferences*, 1865, p. 34.

**Webb, John** (1), an American divine, was born in 1687. He graduated at Harvard College in 1708; was ordained minister of the New North Church, Boston, in 1714; and died in 1750. He published twenty single *Sermons*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Webb, John** (2), an English clergyman and eminent antiquary, was born in 1776, and died in 1869. He was the author of, *Translation of a French Metrical History of the Deposition of King Richard II* (Lond. 1823):—*Household Expenses of Richard de Swinfield* (1855). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Webb, John** (3), an English Congregational minister, was born at Dulcot in 1827. Early in life he experienced a thorough consecration to God, and was diligent in preparation for the ministry. Mr. Webb graduated at the Western College, and settled at Castle Cary in 1851. He removed to Shepton-Mallet in 1858, and settled at Lewis in 1864. The Church and congregation greatly increased under his administration. Mr. Webb's reading was extensive among the best writers and thinkers of the day; and his preaching, though simple, was combined with such intelligence that he attracted the thoughtful Christians, and always attached them to his ministry. He died Nov. 7, 1867. See (Lond.) *Cong. Year-book*, 1868, p. 301.

**Webb, John** (4), an English minister of the Bible Christians, was born Jan. 31, 1836. After laboring for some time as a local preacher, he gave himself wholly to the work of the ministry. He entered the Conference in 1860. At the Conference of 1873, feeble health obliged him to take a supernumerary relation. He died June 7, 1874. See *Minutes of Conferences*, 1874.

**Webb, Joseph**, a Presbyterian minister, was a graduate of Yale College in the class of 1715. He was ordained and installed pastor of the Church at Newark, N. J., and became a member of the Synod in 1720. He proposed to the Synod a case of conscience, but in such general and doubtful terms that it was remitted to the Presbytery. In 1726 a committee of Synod, at his request, went to Newark to settle a difficulty which had arisen: and the Synod approved of its action in the premises. In 1732 difficulties in his congregation led the Church missionaries to commence their services in the town. Dickinson preached on "the vanity of human institutions in matters of religion." Colonel Josiah Ogden had been suspended from Church privileges be-

cause, for fear of losing his hay, he had gathered it in on the Lord's day. He wrote to the Synod in 1734, and Cross and Pemberton replied; but the letter did not satisfy him. Dickinson and Pemberton wrote the next year. The result was that Ogden joined the Episcopalians, and a Church missionary was stationed in Newark. Webb continued his relation to the Synod till 1740. He and his son, a student of Yale College, were drowned while crossing the ferry at Saybrook, Conn., Oct. 21, 1741. (W. P. S.)

**Webb, Loren**, a Methodist Episcopal minister, was born at Ridgefield, Huron Co., O., Aug. 9, 1837. He removed with his parents to La Porte, Ind., when thirteen years of age; there received a common-school education; experienced conversion in 1855; removed to Roscoe, Minn., in 1857; spent two winters in a printing-office; received license to preach in 1858; studied two years at McKendree College; was one of the first to respond to president Lincoln's call for volunteers to put down the Rebellion, and served the first three months as first lieutenant, and the next three years as captain of Company F, Ninth Illinois Infantry; then, being disabled for the infantry, returned home. Soon after he joined in the effort to suppress the Sioux Indian outbreak; afterwards labored zealously as a recruiting-officer; and finally, re-entering the university at Red Wing, resumed his studies. In 1867 he entered the New York East Conference, and was stationed at Collinsville, Conn. His subsequent charges were: Essex, in 1868-69; and in 1870 Forestville, where his close application and over-exertions undermined his constitution, and hemorrhage of the lungs set in. He removed South, and employed himself at various manual occupations until his demise at Nashville, Tenn., Feb. 20, 1880. The last six years of his life were full of poverty, bereavement, and deep sorrow. See *Minutes of Annual Conferences*, 1880, p. 50.

**Webb, Nathan**, a Congregational minister, was born in Braintree, Mass. He graduated from Harvard College in 1725; was ordained pastor of the Church in Uxbridge, Feb. 3, 1731; and died March 14, 1772, in the sixty-seventh year of his age. See Sprague, *Annals of the Amer. Pulpit*, ii, 85.

**Webb, Samuel**, an English Wesleyan minister, was born at Hanham, near Bristol, in 1783. He feared the Lord from his youth, and joined the Methodist Church at the age of twenty-two. He was called into the ministry in 1808, in which he continued with an unsullied reputation until his death, June 25, 1847. Meek, humble, and modest, he was firm in principle and talented in preaching. See *Minutes of Wesleyan Conferences*, 1847.

**Webb, Thomas**, prominent in the early history of Methodism, was an English soldier—for several years lieutenant of the Forty-eighth Regiment of Foot—and a man of wealth and education. He lost an eye and was nearly killed in the storming and capture of the French fort of Louisbourg, Acadia (Nova Scotia), in 1758; and was, with Washington, one of the few officers who survived the terrible slaughter at the battle known as "Braddock's Defeat"—the unsuccessful attack in 1755 on the French fort Duquesne, where Pittsburgh, Pa., now stands. Four years afterwards he scaled the Heights of Abraham with Gen. Wolf, and saw Canada pass forever from the hands of France. He was converted under a sermon preached by Wesley, in Bristol, in 1765; united with the Methodist society, and commenced preaching. We next hear of him as barrack-master at Albany, N. Y. The report that the Methodists had commenced meetings in New York reached the ears of the zealous captain, and he at once repaired thither (spring of 1767). Webb was the providential man. "The little society needed a leader—Webb was born to command. They needed another preacher of more experience, learning, and power—Webb was one of the best preachers then on the continent of America. They

needed money wherewith to house their young society.—Webb was rich and generous. . . . It would have been a hard matter for them to have suited themselves by a choice, out of all the Methodist preachers, better than God had suited them" (Daniels, *Hist. of Methodism*, p. 388). The congregations became too large, and in 1768 John Street Church was dedicated, Webb being one of the principal contributors in meeting the expenses of the new building. The military authorities now placed the captain on the retired list, but with full pay. He at once commenced itinerating. He introduced Methodism into Long Island at Jamaica; founded societies at Pemberton, Burlington, and Trenton, N. J.; traversed Delaware and Maryland; became the pioneer of Methodism in Philadelphia, where he preached in a sail-loft and formed a class in 1768, and two years after gave liberally for the purchase of St. George's Church. The work was now spreading rapidly. Help was needed. Webb sailed for England in 1772; preached in Dublin, London, etc.; made a stirring appeal before the Leeds Conference; and in 1773 returned with Shadford, Rankin, and Yearbry. He continued his evangelistic labors till after the breaking-out of the Revolutionary War, being one of the last of the English preachers to leave; but finally the country became too hot for him, and he bade a reluctant good-bye to America, the scene of so many struggles and victories in his eventful and varied life. On his return to England, he secured a home for his family in Portland, on the heights of Bristol; but still travelled and preached extensively in chapels, in market-places, and in the open air, listened to by immense congregations. The French prisoners at Winchester (1776-82) and the soldiers and sailors at Portsmouth were benefited by his labors. In 1792 he was liberal and active in the erection of Portland Chapel, at that time one of the most elegant meeting-houses in the Methodist connection. The old soldier and evangelist died Dec. 20, 1796, aged seventy-two years, and was laid to rest under the chancel of Portland Chapel.

Wesley writing to a friend in Limerick, said, "Captain Webb is a man of fire, and the power of God constantly attends his word" (*Jour.* Feb. 2, 1773; *Works* [3d. ed. Lond.], xii, 378). Charles Wesley speaks of him as an "inexperienced, honest, zealous, loving enthusiast." In 1774 John Adams says, "Mr. Webb is one of the most fluent, eloquent men I ever heard. He reaches the imagination, and touches the passions very well, and expresses himself with great propriety." See Atmore, *Meth. Mem.* s. v.; Stevens, *Hist. of Meth.* i, 427; iii, 99; id. *Hist. of M. E. Ch.* (Index), vol. iv; Porter, *Hist. of Meth.* p. 247-50, 261; Simpson, *Cyclop. of Meth.* s. v.

**Wegscheider**, JULIUS AUGUST LUDWIG, the foremost systematic theologian of rationalism, was born in 1771 at Kübbelingen, in Brunswick. In 1791 he was in the University of Helmstädt, where Henke then occupied the theological chair, and in 1795 he became tutor in the family of a prominent merchant of Hamburg. He gave ten years to this service. His leisure time was devoted to the study of Kant's philosophy, the fruit of which appeared in 1797 in *Ethices Stoicorum . . . cum Principiis Ethicis a Kantio Propositis Comparata*, and in a *Versuch d. Hauptsätze d. philosoph. Religionslehre in Predigten darzustellen*. In 1804 he added to these a treatise *Ueber die Trennung der Moral von der Religion*. In 1805 he obtained a tutorship in the University of Göttingen, and in the following work came more prominently before the public by the issue of his *Einleitung in das Evangelium Johannis*. He was thereupon called to a professorship in the Hessian University of Rinteln, and afterwards on the absorption of Rinteln was transferred to Halle. Here he became exceedingly popular with students, who thronged his lecture-rooms, and he added to his fame by the publication of his *Institutiones Theologiæ Dogmaticæ*. His popularity continued until the *Denunciation of the Evangelical Kirchenzeitung*, as it was called, in 1830, when he was, together with his colleague Gesenius,

cited before a committee of examination to defend himself against complaints respecting his teachings in the lecture-room. The intervention of political events deprived the examination of such importance as it might have possessed for him, but his influence was nevertheless irrevocably broken. Ullmann came to reinforce Tholuck in 1829, Julius Müller ten years afterwards; and the orthodox tendency grew in every direction. Many of the polemical blows aimed by Hase against Röhr in 1834 took effect on Wegscheider also. As his reputation declined, students no longer found it possible to endure the tediousness and monotonous delivery of his lectures, and but few of them continued to sit at his feet after 1840. He died in February, 1849. The scientific value of his *Institutiones*, the great systematic theology of rationalism, owes but little of its character to Wegscheider. Its thoughts are borrowed, usually from Henke's *Lineamenta* and Ammon's *Summa*, and, in many instances, in the exact words of those books. It abounds in half-completed ideas and unreconciled differences, as does scarcely any other theological work. Its true character was shown up for the first time by Hase in his *Antiröhr* (1837). See also Steiger, *Kritik des Rationalismus in Wegscheider's Dogmatik* (1830) and Herzog, *Real-Encyclop.* s. v.

**Wegswin**, in Norse mythology, is one of the streams of Hel, flowing through Niflheim.

**Weichselzopf**, in German mythology, is a name given to a certain disease which was thought to be derived from the river Weichsel, because this sickness was supposed to be common in Poland. It is, however, now quite certain that the name really is *Wichtelzopf*, taken from the superstitious idea of Wichtel—small, domestic, elf-like spirits that, doubtless, in many cases are beneficial to men, yet, when teased or tantalized, are angry and evil-minded; and, besides doing other mischief, they are said to interlace the hairs of the head into inextricable plats and knots.—Vollmer, *Wörterb. d. Mythol.* s. v.

**Weickhmann**, JOACHIM SAMUEL, a Lutheran theologian of Germany, was born May 1, 1714, at Dantzic. From 1735 to 1739 he studied at Leipsic, and his dissertation, published in 1739, *De Fontibus Veritatis Sacre in Rivulis Profundis Sparse ad Lactant. Lib. VII, Cap. 7*, gave him the privilege of lecturing on philosophy. In 1740, having presented another dissertation, *De Platonica Animorum Immortalitate*, he was appointed adjunct to the philosophical faculty. Three years later he was made professor extraordinary, and in 1744 professor in ordinary of theology, his dissertation for this occasion having been *De Theologis Tridentinis, alia Loquentibus, alia Sentientibus*. Shortly afterwards he was made doctor of theology, and died Oct. 18, 1774. Besides the writings already mentioned, he published, *De Christo in Morte Gloriosissimo* (Vitebergæ, 1755);—*De Discrimine Gratiæ Divinæ sine Merito contra Meritum* (ibid. 1757);—*Jobus, Resurrectionis non Typus, sed Professor* (ibid. 1759). His other writings are enumerated in Fürst, *Bibl. Jud.* iii, 497; Döring, *Die gelehrten Theologen Deutschlands*, iv, 672 sq. (B. P.)

**Weidelbot** is a priest of the Wendts in Pomerania and Rügen, the next to Griwe.

**Weidman**, PAUL, a Reformed (Dutch) minister, was born in 1788. He graduated at Union College in 1818, at New Brunswick Theological Seminary in 1820, and was licensed by the Classis of New Brunswick the same year; was pastor at Schoharie, N. Y., 1820-36; at Manheim, 1837-41, and again, 1841-50. He died in 1852. See Corwin, *Manual of the Ref. Church in America*, p. 543.

**Weidner**, JOHANN JOACHIM, a Lutheran theologian of Germany, was born Aug. 11, 1672, at Rostock. He studied at different universities, and in 1699 he was appointed deacon at St. Mary's in his native place. In 1706 he received the degree of D.D., in 1716 was ap-

pointed professor of theology, and in 1721 senior of the theological faculty, and died Oct. 17, 1732. He was a voluminous writer. Of his works we mention: *Disput. IX contra Reformatos, quod non Conveniant cum Lutherana in Plurimis Articulis Fidei*:—*Dissertationes Tres de Gratia Dei Universalis non Particulari*:—*Christus ex Bibliis ὑποούσιος*:—*De Forma S. Cæne in Consecratione et cum eadem Conjuncta Sacramentali Manducatione et Bibitione*:—*Miraculum Murorum Hierichuntis Cadentium*:—*Christus Resurgens Victor*, etc. See *Seelen, Athenæ Lubecenses*; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v. (B. P.)

**Weidner, Paul**, a Jewish convert of Carinthia who joined the Christian Church in 1588, was professor of Hebrew at the Vienna University, and was appointed by imperial permission to preach occasionally to the Jews. He wrote *Loca Præcipua Fidei Christianæ Collecta et Explicata* (Vienna, 1559; 2d ed. 1562, with *Epistola Hebr. ad R. Jehudam, Venet. Habitantem, cum Versione Latina*). See Kalkar, *Israel und die Kirche*, p. 90; Delitzsch, *Wissenschaft, Kunst, Judenthum*, p. 139, 290; Wolf, *Bibl. Hebr.* i, 964; Jöcher, *Allgemeines Gelehrten-Lexikon*, s. v.; Fürst, *Bibl. Jud.* iii, 498; Bayle, *Dictionnaire Historique et Critique*. (B. P.)

**Weigel, Christopher**, a German engraver, was born at Redwitz, in Bohemia, in 1654. After visiting various German cities, he settled in Nuremberg, where he died in 1725. His principal work was a set of Bible plates engraved from his own designs, entitled *Sacra Scriptura Loquens in Imaginibus*, etc., published in 1690. They were executed with the graver. He is also said to have engraved in mezzotinto, and to have carried on an extensive commerce in prints. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Weigel, Valentine**, a mystic of the 16th century, was born in 1533 at Hayn, in Misnia, where his father was then pastor. He studied at Leipsic and Wittenberg from 1554 to 1567, and was ordained pastor of Zschoppau, in the diocese of Chemnitz, Nov. 16, 1567, by Paul Eber (q. v.). He remained in that position till he died, June 10, 1588. He was married, but remained childless. He was beloved by his parishioners, who were not capable of discovering his heterodox views, more especially as he did not publish them to the world, and contented himself with privately elaborating them. He was not wholly successful, however, in preventing reports of his unsound opinions from being circulated, according to which he was tainted with Osiandrian and Schwenkfeldian errors. His cantor, Weikert, collected a band of mystical adepts, who undertook the multiplication, and subsequently the publication, of Weigel's works; and who issued them at Halle, Magdeburg, and elsewhere, in 1612, and afterwards in repeated editions. It is possible that interpolations of foreign matter into these writings took place, as the editors assumed pseudonymous names.

The sum and substance of Weigel's theorizing may be comprehended in the words of his epitaph at Zschoppau (see Arnold, *Kirchen- u. Ketzerhistorie*, ii, 17, 17), "O man, learn to know thyself and God; this is sufficient for thee!" His argumentation proceeds within the range of the subjective consciousness, objective proofs being regarded by him as the demonstration of a bondage to the letter which is opposed to all true spiritual wisdom. He teaches that man is a microcosm which embodies within itself the potentiality of salvation equally with other elements. Nature and grace are not in contrast with each other, even in an ethical sense, but are simply different degrees of the same state. Man is furthermore a threefold principle—his body being taken from the *limus terre*, his soul from the stellar spirit or firmament, and his spirit from the *spiritulum vite* in God. This spirit is also the Holy Divine Spirit; or, more strongly expressed, man comprehends in himself by nature not only the world, but also God and Christ. Man is consequently both a microtheos and a microcos-

mos, and constitutes the point at which the world, which emanated from God, returns to God. Weigel's pantheism is undeniable. The idea of emanation appears in his cosmology, and the thoughts of eternity and time, the invisible and the visible, are everywhere regarded by him as correlated, so that none of them can exist without its counterpart. The creature is considered essential to the unfolding of the divine nature. The personality of the Son and the Holy Spirit is not necessary to the immanent being of God, but originates in connection with the emanation of the world from God. The Son is the centre in which God and the creature come together. Through him God becomes corporeal and temporal. It will be noticed that this does not effect the emanation of the creature from God, but is a mere impossible reduction of the divine and the eternal to the measure of time and sense; nor does Weigel anywhere succeed in achieving the completeness essential to the consistency of his system which the establishing of a distinct creature-nature would involve. Angels were created by the word of God, and in them the invisible world; but when Lucifer fell, God desired to have man, and therefore created the earth. Yet man is called the eye, ear, foot, hand, instrument of God, through which everything must be recognised and wrought; and it is said that this could not have come to pass had Adam remained in Paradise. In brief, all externality is but a reflex of the internal, and an idealism exists in which the distinction between the world and God is altogether subjective, and whose result is that man lacks personality. All effect is the result of the divine action, and yet the human will is said to be unnecessitated in the fall into sin—a contradiction which Weigel nowhere explains. Sin is not a substance, but an accident assumed by the will, though it may be considered a substance in view of its effect on human nature, which involves the loss to man of his whole body—body being equivalent to all that is objective. Original sin is a necessary condition of the creature nature, which involves the departure of man from Eden, that he may till the soil and learn to know himself. Redemption consequently has no objective signification. Christ and the new life exist naturally in man. The kingdom of God is so in man that all the potencies of salvation exist in him, and it is actualized by the attainment of the soul to a knowledge of itself, and thereby to a knowledge of the Eternal and of God. The key to the whole of Weigel's system is his postulated opposition between the internal, which is the divine in man, and the external, which is the product of the internal. The Scriptures, as the outward letter, are depreciated and accounted incapable of revealing eternal life, which, according to Weigel, is made known by the subjective spirit alone; and yet they are said to be necessary in another direction, because of our blindness and weakness. The duty of man is fulfilled in a simple surrender to the operations of the immanent Christ.

It remains to be observed that while, in his opposition to the literalism of the Church, Weigel was at one with the sects of the time of the Reformation, he was utterly at variance with them in his advocacy of a fully developed quietism, and in his denunciation of war, lawsuits, etc., as he was also with the gross materialism which characterized the early Anabaptists in the unqualified intellectualism of his views. His mysticism afforded no aid whatever towards the thorough regeneration of theology. His significance probably extends no further than his influence contributed to the renewal of philosophical methods in theological inquiry, and as he antagonized the supernaturalism then current with his principle that nothing can be true which does not impress itself immediately upon the consciousness as being true.

See Arnold, *Kirchen- u. Ketzerhistorie*, ii, 17, 17, where a complete list of Weigel's works is given; *Unschuldige Nachrichten*, 1715; Hilliger, a dissertation entitled *Fata et Scripta M. V. Weigel*, etc. (Wittenberg,

1721); comp. also Roth, *Nöthiger Unterricht von d. prophet. Weissagungen* (1694), § 24. Arnold has stated Weigel's peculiar tenets in an apologetical way, while Hilliger has furnished a somewhat extended list of his heresies. His importance to philosophy is set forth in Ritter, *Gesch. d. Philosophie*, x, 77–100; Standenmayer, *Philos. d. Christenthums*, i, 723 sq.; Carrière, *Philosoph. Weltanschauung d. Reformationszeit*, p. 203–209; further, Walch, *Eind. in d. Rel.-Streitigkeiten*, iv, 1024–1066; Planck, *Gesch. d. prot. Theologie*, p. 72 sq.; Hagenbach, *Vorles. üb. d. Ref.-Gesch.* iii, 337 sq.; Dorner, *Christologie*, ii, 853; Baur, *Trinitätslehre*, iii, 255–260; id. *Versöhnungslehre*, p. 463.—Herzog, *Real-Encyklop.* s. v.

**WEIGHING OF SOULS** is a practice accredited to the Egyptian gods to determine their place in the future world. The heart of the deceased was placed on one side of the scales held by Horus and Anubis, and the god Thoth registered the result of the weighing. Upon this judgment (which was rendered by Osiris and his forty-two deputies) the irrevocable fate of the soul depended. If the deceased was convicted of unpardonable faults, he became the prey of an infernal monster, with the head of a hippopotamus, and was beheaded by Horus and by Smu, one of the forms of Set, upon the *nemmu*, or infernal scaffold. The most wicked were punished with final annihilation. See Lenormant, *Chaldean Magic*, p. 86. See **WEIGHT**.

**Weight** (מִשְׁקָל, *eben*, Dent. xxii, 24; xxv, 15; 2 Sam. xiv, 26; Prov. xi, 1; xvi, 11; xx, 10; Mic. vi, 11; a stone, as elsewhere rendered; usually מִשְׁקָל, *mishkál* [once מִשְׁקָל, *mishkál*, Ezek. iv, 10], from מִשַּׁקַּל, to weigh; מִשְׁקָל, *péles*, Prov. xvi, 11; “scales.” Isa. xl, 12, a balance; ὄγκος, Heb. xii, 1, a mass; βάρος, 2 Cor. iv, 17, elsewhere “burden”). It is evident from one of these names (*eben*) that stones were used in the most ancient times among the Hebrews for weights, as they were also among many other nations; and from another (*mishkál*), that of their money weights and terms, the shekel was that in most common use, and the standard by which others were regulated. In later times weights were made of lead (Zech. v, 6). These weights were carried in a bag (Deut. xxv, 13; Prov. xvi, 11) suspended from the girdle (Chardin, *Voy.* iii, 422), and were very early made the vehicles of fraud. The habit of carrying two sets of weights is denounced in Deut. xxv, 13 and Prov. xx, 10, and the necessity of observing strict honesty in the matter is insisted upon in several precepts of the law (Lev. xix, 36; Deut. xxv, 13). But the custom lived on, and remained in full force to the days of Micah (vi, 11), and even to those of Zechariah, who appears (ch. v) to pronounce a judgment against fraud of a similar kind. See **BAG**.

Between ancient weights and money there was a very intimate connection. All Greek money was originally a certain weight of silver, and a similar rule probably held with the money of other nations. Hence, perhaps, the best mode of ascertaining an ancient weight is by weighing a good coin of the same denomination. When this is ascertained, we can form a just opinion of the other weights in the scale from their relative proportions. Gold, even as late as the time of David, was not used as a standard of value, but was considered merely as a very precious article of commerce, and was weighed like other articles. In Oriental countries, as far back as the time of Abraham, the value of goods was estimated at a certain quantity of silver, the purity of which was taken into account by the merchant (Gen. xxiii, 16). But there is no trace of stamped silver or coin previous to the Captivity. Nor, indeed, was it at that early period divided into pieces of a certain size. It was commonly weighed out in balances, though its weight was sometimes ascertained by means of an instrument of weighing answering to our steelyards. See **SCALE**. By means of the balance the Hebrews appear to have been able to weigh with considerable del-

icacy, and for this purpose they had weights of extreme minuteness, which are called metaphorically “the small dust of the balance” (Isa. xl, 15). The “little grain” (ῥοπή) of the balance in Wisd. xi, 22 is the small weight which causes the scale to turn. In this passage, as in 2 Macc. ix, 8, the Greek word *πλάστιγξ*, rendered “balance,” was originally applied to the scale-pan alone. See **BALANCE**. The balance in this form was known at a very early period. It is found on the Egyptian monuments as early as the time of Joseph, and we find allusions to its use in the story of the purchase of the cave of Machpelah (Gen. xxiii, 16) by Abraham. Before coinage was introduced, it was of necessity employed in all transactions in which the valuable metals were the mediums of exchange (xliii, 21; Exod. xxii, 17; 1 Kings xx, 39; Esth. iii, 9; Isa. xlv, 6; Jer. xxxii, 10, etc.). See **MONEY**.

The shekel, the half-shekel, the talent, are not only denominations of moneys, of certain values, in gold and silver, but also of certain weights. The earliest weight to which reference is made is the *kesitáh* (Gen. xxxiii, 19; Josh. xxiv, 32; Job xlii, 11), which in the margin of our version is in two passages rendered “lambs,” while in the text it is “piece of money.” It may have derived its name from being in the shape of a lamb. See **SHEEP**. A number of small statues, of a crouching lion in bronze, forming a series of various dimensions, from one inch to twelve in length, found at Nimrud, and now in the British Museum, appear to have been Assyrian weights. On the tombs at Thebes

Ancient Egyptian Scales.

Assyrian Weights. (From specimens in British Museum.) 1. Bronze—15 manehs; 2. Bronze—3 shekels; 3. Bronze—1 maneh; 4, 5, 6. Stone weights in form of ducks with heads thrown back.

are representations of weights having the form of stags, sheep, gazelles, etc. There are also among the Egyptian antiquities some Coptic weights of great antiquity, but not antecedent to the Christian æra. They are circular, and have grooves or channels cut in them. See **MINE**.

The *Weight of the Sanctuary*, or Weight of the Temple (Exod. xxx, 13, 24; Lev. v, 15; Numb. iii, 50; vii, 19; xviii, 16, etc.) was probably the standard weight,

preserved in some apartment of the Temple, and not a different weight from the common shekel (1 Chron. xxiii, 29); for though Moses appoints that all things valued by their price in silver should be rated by the weight of the sanctuary (Lev. xxvii, 25), he makes no difference between this shekel of twenty oboli, or twenty gerahs, and the common shekel. Ezekiel (xlv, 12), speaking of the ordinary weights and measures used in traffic among the Jews, says that the shekel weighed twenty oboli, or gerahs; it was therefore equal to the weight of the sanctuary. Neither Josephus nor Philo nor Jerome, nor any ancient author, speaks of a distinction between the weights of the Temple and those in common use. Besides, the custom of preserving the standards of weights and measures in temples is not peculiar to the Hebrews. The Egyptians, as Clemens Alexandrinus informs us, had an officer in the college of priests whose business it was to examine all sorts of measures and to take care of the originals; the Romans had the same custom (Fannius, *De Amphora*); and the emperor Justinian decreed that standards of weights and measures should be kept in Christian churches. The Jews do not seem to have had any officers whose especial duty it was to superintend weighing transactions like the kabbáneh, or public weighers of Egypt, the Greek *ζυγοστάται* (Artemid. ii, 37), or Latin *libripens* (Pliny, xxxiii, 8); but care was always taken that the money used should be of full weight (Gen. xliii, 21). For the estimation of Hebrew weights, see METROLOGY.

of his body; of which they speak flatteringly, however they think it to be." It appears, however, from a consideration of the other metaphorical expressions in the same passage of Daniel that the weighing in balances is simply a figure, and may or may not have reference to such a custom as that above described. Many examples of the use of the same figure of speech among Orientals are given in Roberts's *Oriental Illustrations*, p. 502. The allusion, however, may be of a far more solemn character. The Egyptians entertained the belief that the actions of the dead were solemnly weighed in balances before Osiris, and that the condition of the departed was determined according to the preponderance of good or evil. Such judgment scenes are very frequently represented in the paintings and papyri of ancient Egypt, and one of them (given on the following page) we have copied as a suitable illustration of the present subject. One of these scenes, as represented on the walls of a small temple at Deir-el-Medineh, has been so well explained by Mr. Wilkinson that we shall avail ourselves of his description; for although that to which it refers is somewhat different from the one which we have engraved, his account affords an adequate elucidation of all that ours contains: "Osiris, seated on his throne, awaits the arrival of those souls that are ushered into Amenti. The four genii stand before him on a lotus-blossom [ours has the lotus without the genii], the female Cerberus sits behind them, and Harpocrates on the crook of Osiris. Thoth, the god of letters, arrives in the presence of Osiris, bearing in his hand a tablet, on which the actions of

the deceased are noted down, while Horus and Anubis are employed in weighing the good deeds of the judged against the ostrich feather, the symbol of truth and justice. A cynocephalus, the emblem of truth, is seated on the top of the balance. At length arrives the deceased, who appears between two figures of the goddess, and bears in his hand the symbol of truth, indicating his meritorious actions, and his fitness for admission to the presence of Osiris" (Kitto, *Pict. Bible*, note ad loc.).

A weight of glory, of which Paul speaks (2 Cor. iv, 17), is opposed to the lightness of the evils of this life. The troubles we endure are really of no more weight than a feather, or of no weight at all, if compared to the weight

or intenseness of that glory which shall be hereafter a compensation for them. In addition to this, it is probable the apostle had in view the double meaning of the Hebrew word *קָבוֹד*, *kabód*, which signifies not only weight, but glory; that is, splendor is in this world the lightest thing in nature; but in the other world it may be real, at once substantial and radiant.

**Weihenmayer**, JOHANN HEINRICH, a Lutheran theologian of Germany, was born at Ulm, Aug. 4, 1637. He studied at Jena, was appointed deacon in 1662 at Leipheim, and pastor at Altheim in 1681. In 1687 he was called to Ulm, where he died, May 29, 1706. He left a great many writings, mostly of an ascetical nature, which are given in Pipping, *Memorie Theologorum*; Serpillius, *Epitaphia Theologorum*; Jöcher, *Allgemeines Gelehrten-Lex.* s. v. (B. P.)

**Weikel**, JOHN H., a German Reformed minister,

Ancient Egyptian Kabbáneh, or Public Weigher and Notary.

1. The weigher; 2. The notary making an official record; a. The bag of money to be weighed; b. The frame or box containing c, a pile of coins in the form of rings; c. A stand supporting d, a weight in the form of a lamb; d. One scale containing a number of coins; e. An apparatus for steadying g, the arm of the balance; f. A. An ape, the emblem of Thoth, the god of justice, presiding over the operation; g. The other scale containing the weight.

The expression in Dan. v, 27, "thou art weighed in the balances, and art found wanting," has been supposed to be illustrated by the custom of weighing the Great Mogul on his birthday in the presence of his chief grandees. The ceremony is described in a passage from Sir Thomas Roe's *Voyage in India*, quoted in Taylor's *Calmet*, *Frag.* 186: "The scales in which he was thus weighed were plated with gold, and so the beam on which they hung by great chains, made likewise of that most precious metal. The king, sitting in one of them, was weighed first against silver coin, which immediately after was distributed among the poor; then was he weighed against gold; after that against jewels (as they say); but I observed (being there present with my lord ambassador) that he was weighed against three several things, laid in silken bags, on the contrary scale. . . . By his weight (of which his physicians yearly keep an exact account) they presume to guess of the present state

Ancient Egyptian Death Judgment. (From a drawing on one of the sepulchral papyrus rolls.)

was pastor of Boehm's and some other churches in Montgomery County, Pa., from 1776 to 1781, but his loyalty to the American cause during the Revolution finally led to his resignation on account of dissatisfaction among his parishioners. Nothing seems to be known of him after the war. See Harbaugh, *Fathers of the Germ. Ref. Church*, ii, 400.

**Weil, JAKOB**, a Jewish teacher of Germany, was born in 1792 at Frankfort, where he died, Nov. 19, 1864. He wrote and spoke for the emancipation of his coreligionists. He published, *Fragmente aus dem Talmud und den Rabbinen* (Frankf. 1811-12):—*Das junge Deutschland und die Juden* (ibid. 1836):—*Die erste sächsische Kammer und die Juden* (Hanau, 1837):—*Wagner, Stuhl, die Juden und die protestantischen Dissidenten* (Frankf. 1857):—*Die alten Propheten und das Leben Jesu* (ibid. 1864). See Winer, *Handb. der theol. Lit.* i, 526; Fürst, *Bibl. Jud.* iii, 499; Kayserling, *Bibliothek jüdischer Kanzelredner*, i, 400 sq. (B. P.)

**Weiller, KAJETAN VON**, a Roman Catholic theologian of Germany, was born at Munich, Aug. 2, 1762. He studied theology and philosophy in his native place. In 1785 he received holy orders, and in 1799 he was placed in the chair of philosophy and pedagogics. The University of Landshut conferred on him the degree of doctor of philosophy in 1802, while learned societies admitted him to membership. In 1812 he was enno-

bled by his king, and died June 24, 1826. His writings are, *Ueber die religiöse Aufgabe unserer Zeit* (Munich, 1819):—*Das Christenthum in seinem Verhältnisse zur Wissenschaft* (ibid. 1821):—*Der Geist des ältesten Katholicismus, als Grundlage für jeden spätern* (ibid. 1824):—*Grundriss der Philosophie* (ibid. 1818):—*Grundlegung der Psychologie* (ibid. 1818). His orations and minor treatises are collected in his *Kleine Schriften, Schulreden*, etc. (3 vols. 1822-26). See Döring, *Die gelehrten Theologen Deutschlands*, iv, 679 sq.; Winer, *Handbuch der theologischen Literatur*, i, 406, 509, 865; ii, 145. (B. P.)

**Weimar, DAVID**, a Jewish philologist of Germany who lived in the 17th century, is the author of *מורה נטורי*, *Doctrina Accentuationis Hebr.* (Cizæ, 1681; studio Matthesii, Lips. 1687 a. o.):—*Mysterium in Infallibili Accentuum Bibl. Ministerio Detectum* (ibid. 1681):—*Solida Demonstratio de Vera Decalogi Divisione et Infallibili Duplicitate Accent. Principio* (ibid. eod.):—*Usus Accentuationis Bibl. per 25 Locos Vel. Test. Præmissa ejus Scorumvaria Demonstratione* (Jenæ, 1693 a. o.). See Fürst, *Bibliotheca Judaica*, iii, 501 sq.; Steinschneider, *Bibliographisches Handbuch*, s. v. (B. P.)

**Welch, Bartholomew T., D.D.**, an eminent Baptist minister, was born in Boston, Sept. 24, 1794. There was something in the history of his ancestry that inspired and kept alive those feelings of patriotism which were so marked a feature in his subsequent life. His father was a midshipman in the navy, and his grandfather a lieutenant. His grandfather on his mother's side was Bartholomew Trow, one of the famous party who threw over the tea in Boston Harbor. He was present at the battle of Lexington, and served his country in the Revolutionary war. His father died when he was but a child. The pastor of his early days was the excellent Dr. Thomas Baldwin, and he received a good religious education in his early home. With a restlessness which is often characteristic of youth, he aspired after more freedom than he found in his home, and at the age of seventeen he started for Philadelphia, making the journey on foot, with the hope of finding business. But the war had put a check to strictly mercantile pursuits, in which he had been reared, and he became an apprentice to learn the engraver's art. For some time he seems to have lived a thoughtless, careless life, so far as religion was concerned, and it is said that through a whole year he never entered a house of worship. At length, the Spirit of God took strong hold on his conscience. He saw the wickedness and folly of the course he had been pursuing, and his heart was bowed in submission to Christ. He was baptized, the first Sunday in September, 1815, by Rev. Dr. Staughton, and became a member of the Sansom Street Baptist Church in Philadelphia. In 1816 he removed to Baltimore, with the hope of meeting with better success in the practice of his art as an engraver. At once he identified himself with the cause of Christ and became an earnest worker in the vineyard of his Lord. It was not long before he felt an impulse, which he struggled hard to resist, to preach the Gospel. After many conflicts growing out of the consideration that he was utterly unprepared by the want of intellectual training for the sacred office, he yielded at length his own will and acquiesced in what seemed to him to be the call of God that he should be an ambassador for Christ. In August, 1824, he abandoned his profession as an engraver, and entered upon what was to be the work of his life. His early labors as a preacher were as a missionary among the destitute churches within the limits of the Baltimore Baptist Association. He crossed the mountains of Maryland and visited the villages and hamlets scattered along the banks of the Juniata, proclaiming as he went the news of salvation through a crucified Redeemer. One year was spent in such work as this. In the summer of 1825, he was on a visit to

some friends in New York, and was requested to do the kind of work which he had performed so successfully in Maryland among the feeble churches of the Baptist denomination along the line of the Hudson River. In October of this year he was ordained as pastor of the Church in Catskill, and remained here a little less than two years, when he was called to take charge of what is now the Emanuel Church in Albany, N. Y. He entered upon his duties here in September, 1827. It was a dark day in the history of the Church when Dr. Welch commenced his ministry with them. "The Church," says Dr. Bridgman, "was feeble and staggering with their debt. The old theatre in Green Street had been turned into their sanctuary, but the house was thought to be too large, and a partition had been built to save fuel, 'and to make neighbors of the worshippers.'" At once a change took place, and as a preacher Dr. Welch soon stood in the foremost rank among the most gifted and eloquent ministers in the city of Albany. A few years of such work as he put into his ministry told wonderfully upon the prosperity of the enterprise. The feeble band grew to be a Church of three hundred and twenty-seven members, "united in their counsels, free from all embarrassment, and in a condition of great material and spiritual prosperity." The question of colonizing began to be discussed, and after the usual delays which arose from the reluctance of Church members to break away from their religious homes, it was decided that the time had come to engage in a new enterprise. An appeal was made to the friends of religion, and those who had become warmly attached to Dr. Welch, although not belonging to the Baptist denomination, for the necessary funds to carry out the projected plan. Among the contributors to these funds we notice the names of William L. Marcy, Martin Van Buren, Erastus Corning, and P. S. Van Rensselaer. The corner-stone of the new church was laid in July, 1833, and the building was ready for occupancy in the month of October following. A colony of about one hundred and twenty, with Dr. Welch as the pastor of the new church, took possession of what was then regarded as one of the most elegant houses of worship in Albany. The record of the results of a ministry of fourteen years in the Pearl Street Church is summed up in very general terms by saying that during these fourteen years five hundred and seven persons were received by baptism, and two hundred and sixty-two by letters from other churches. During all this time Dr. Welch took a prominent position in all the great religious enterprises in which the Baptist churches were interested, especially in the American and Foreign Bible Society, of which, for many years, he was the president. On resigning his pastorate of the Pearl Street Church, Dr. Welch took charge of the Pierrepont Street Church in Brooklyn, where he remained eight years, and then removed to Newtonville, near Albany, and was pastor for ten years. Worn down by the labors of his long ministry, Dr. Welch went into retirement. His great powers gradually grew weaker and weaker, until the lamp of life went out, to be rekindled amid the glories of a better world. He died Dec. 9, 1870. See *Minutes of the Hudson River Baptist Assoc.* for 1871; *Dr. Bridgman's Sermon*. (J. C. S.)

**Welch, Moses Cook, D.D.**, a Congregational minister, son of Rev. Daniel Welch, was born in Mansfield, Conn., Feb. 22, 1754. Although he graduated from Yale College in 1772, he remained for several years undecided as to his profession. For a while he was teacher of a grammar-school in Windham, Conn., and then entered the office of Hon. Eliphalet Dyer to study law. His father's aversion to this profession induced him to abandon it in about a year. Then he taught school and studied medicine a short time. As the Revolution was fairly begun, he engaged with Mr. Samuel Nott in the manufacture of saltpetre, to be used in making powder to supply the Continental Army. Having been drafted, he cheerfully entered the army, but, contracting a disease in camp, was obliged to return home. About this

time he was converted. Turning his attention to the ministry, he studied theology under Rev. Dr. Salter, of Mansfield, and Rev. Stephen White, of Windham. When his father died, in 1782, he was called to succeed him as pastor of the Church in North Mansfield, to which office he was ordained June 2, 1784. In 1812 he was detailed as chaplain in the American army, a service which he promptly performed. For two years, from 1822, he belonged to the Corporation of Yale College. He died at North Mansfield, April 21, 1824. In consequence, probably, of his legal training, he was a great ecclesiastical lawyer. With a vigorous mind, an ardent temperament, and clear perceptions, he became a popular preacher. See Sprague, *Annals of the Amer. Pulpit*, ii, 284.

**Welchman, EDWARD, D.D.**, an eminent English divine, was born about 1665. He became a commoner of Magdalen Hall, Oxford, in 1679; graduated in 1683; was admitted probationer fellow of Merton College in 1684; became rector of Lapworth and of Solihull, Warwickshire; archdeacon of Cardigan in 1727; and died in 1739. He was the author of, *Defence of the Church of England* (1692);—*Husbandman's Manual* (1695);—*Articuli XXXIX Ecclesie Anglicane Textibus et Scripturis Depromptis Confirmati*, etc. (1713); translated into English (1740); his most famous work:—*Doctrine of Baptism* (1706);—*Dr. Clarke's Scripture Doctrine of the Trinity Examined*, etc. (1714);—*Conference with an Arabian* (1721);—and other works. See Chalmers, *Biog. Dict.* a. v.

**Weld, LUDOVICUS**, a Congregational minister, was born at Braintree, Mass., Sept. 12, 1766, being a son of the Rev. Ezra Weld. He graduated at Harvard College in 1789; taught school in Cambridge; studied theology with his father; and was ordained at Hampton, Conn., in 1799, where he remained until infirmities induced him to seek a dismission (1824). He removed to Fabius, N. Y., where he ministered to vacant churches for several years. In 1842 he purchased a residence near his son Theodore, in Belleville, N. J., where he died, Oct. 9, 1844. Mr. Weld's character from early life was manly and upright; his mental abilities were superior, so that he was considered one of the ablest men of his day in that region. Three of his sermons were published. See *Cong. Quar.* 1860, p. 181.

**Well** (prop. מַיִם, *bêr*, φάειρα, a dug source of living, though not running, water; but "well" is an occasional rendering in the A. V. likewise of בּוֹר, *bôr*, 2 Sam. iii, 26; xxiii, 15, 16; 1 Chron. xi, 17, 18; 2 Chron. xxvi, 10, a "pit," i. e. *cistern*; also of מַיִם, *mayân*, Josh. xviii, 15; 2 Kings iii, 19, 25; Psa. lxxiv, 6, a "fountain;" of מְקוֹר, *makôr*, Prov. x, 11, a "fountain;" and even of יַיִן, *ayin*, Gen. xxiv, 13, 16, 29, 30, 42, 48, 45; xlix, 22, a living *spring*; and so of πηγή, John iv, 6, 14). The difference between a well (*bêr*) and a cistern (*bôr*) consists chiefly in the use of the former word to denote a receptacle for water springing up freshly from the ground, while the latter usually denotes a reservoir for rain-water (Gen. xxvi, 19, 32; Prov. v, 15; John iv, 14). See CISTERN. Both these Heb. words come from a root (בָּרָא or בָּרַךְ) significant of *digging*, and are thus distinguished from a natural fountain. The former (*bêr*) is still represented by the Arabic *bîr*, used in the same sense; but the latter (*bôr*) has in modern times given place to *bîrket* (=Heb. בְּרִיקָה), which signifies an open pool of surface water. See TOPOGRAPHICAL TERMS.

The first well mentioned in Scripture is in "the wilderness," in the way to Shur, where Hagar sat down when fleeing from Sarai, which was afterwards called *Beer-lahai-roi*, "the well of him that liveth and seeth me" (Gen. xvi, 14), between Kadesh and Bered. It is called both a "fountain" and a "well." The second well mentioned is also in connection with Hagar's his-

tory (xxi, 19) in the wilderness of Beersheba. After this a good many wells are mentioned: the wells of Beersheba, which remain to this day (xxvi, 25); the Mesopotamian well (xxiv, 11), at the city of Nahor; the wells in Gerar (xxvi, 15, 18); the well Esek (ver. 20); the well Sitnah (ver. 21); the well Rehoboth (ver. 22); the well in Haran (xxix, 2); the wells of Elim (Exod. xv, 27); the well dug by the princes (Numb. xxi, 61); the well of Nephtoi (Josh. xviii, 15); the great well in Sechu (1 Sam. xix, 22); the well of Bethlehem by the gate (2 Sam. xxiii, 16); the well of Harod (Judg. vii, 1); Jacob's well, on the low slope of Gerizim (John iv, 6). See FOUNTAIN.

The importance of wells is very great, especially in the desert, where the means of forming them are deficient, as well as the supply of labor necessary for such undertakings, which, after all, are not always rewarded by the discovery of a supply of water. Hence in such situations, and indeed in the settled countries also, the wells are of the utmost value, and the water in most cases is very frugally used (Numb. xx, 17-19; Deut. ii, 6, 28; Job xxii, 7). It is, however, not merely the value of the well itself, but certain other considerations that explain the contests about wells which we find in the histories of Abraham and Isaac (Gen. xxi, 25-31; xxvi, 15-22). The special necessity of a supply of water (Judg. i, 15) in a hot climate has always involved among Eastern nations questions of property of the highest importance, and sometimes given rise to serious contention. To give a name to a well denoted a right of property, and to stop or destroy one once dug was a military expedient, a mark of conquest, or an encroachment on territorial right claimed or existing in its neighborhood. Thus, the well Beersheba was opened, and its possession attested with special formality by Abraham (Gen. xxi, 30, 31). In the hope of expelling Isaac from their neighborhood, the Philistines stopped up the wells which had been dug in Abraham's time and called by his name, an encroachment which was stoutly resisted by the followers of Isaac (xxvi, 15-33; see also 2 Kings iii, 19; 2 Chron. xxvi, 10; comp. Burckhardt, *Notes on the Bed.* ii, 185, 194, 204, 276). The Koran notices abandoned wells as signs of desertion (sur. xxii). To acquire wells which they had not themselves dug was one of the marks of favor foretold to the Hebrews on their entrance into Canaan (Deut. vi, 11). To possess one is noticed as a mark of independence (Prov. v, 15), and to abstain from the use of wells belonging to others, a disclaimer of interference with their property (Numb. xx, 17, 19; xxi, 22). Similar rights of possession, actual and hereditary, exist among the Arabs of the present day. Wells, Burckhardt says, in the interior of the desert, are exclusive property, either of a whole tribe, or of individuals whose ancestors dug the wells. If a well be the property of a tribe, the tents are pitched near it, whenever rain-water becomes scarce in the desert; and no other Arabs are then permitted to water their camels. But if the well belongs to an individual, he receives presents from all strange tribes who pass or encamp at the well, and refresh their camels with the water of it. The property of such a well is never alienated; and the Arabs say that the possessor is sure to be fortunate, as all who drink of the water bestow on him their benedictions

Well at Beersheba.

(*Notes on the Bed.* i, 228, 229; comp. Numb. xxi, 17, 18, and Judg. i, 15).

It is thus easy to understand how wells have become in many cases links in the history and landmarks in the topography both of Palestine and of the Arabian Peninsula. The well once dug in the rocky soil of Palestine might be filled with earth or stones, but was with difficulty destroyed, and thus the wells of Beersheba, and the well near Nablûs, called Jacob's Well, are among the most undoubted witnesses of those transactions of sacred history in which they have borne, so to speak, a prominent part. On the other hand, the wells dug in the sandy soil of the Arabian valleys, easily destroyed, but easily renewed, often mark, by their ready supply, the stations at which the Hebrew pilgrims slaked their thirst, or, as at Marah, were disappointed by the bitterness of the water. In like manner the stations of the Mohammedan pilgrims from Cairo and Damascus to Mecca (the Haj route) are marked by the wells (Robinson, i, 66, 69, 204, 205; ii, 283; Burckhardt, *Syria*, p. 318, 472, 474; App. iii, 656, 660; Shaw, *Trav.* p. 314; Niebuhr, *Descrip. de l'Arabie*, p. 347, 348; Wellsted, *Trav.* ii, 40, 43, 64, 457, App.).

Wells in Palestine are usually excavated from the solid limestone rock, sometimes with steps to descend into them (Gen. xxiv, 16; see Burckhardt, *Syria*, p. 232; *Col. Ch. Chron.* 1858, p. 470). The brims are furnished with a curb or low wall of stone, bearing marks of high antiquity in the furrows worn by the ropes used in drawing water (Robinson, i, 204). This curb, as well as the stone cover, which is also very usual, agrees with the directions of the law, as explained by Philo and Josephus, viz. as a protection against accident (Exod. xxi, 33; comp. Josephus, *Ant.* iv, 8, 37; Philo, *De Spec. Leg.* iii, 27; ii, 324, ed. Mangey; see Maundrell, in *Early Trav.* p. 435). It was on a curb of this sort that our Lord sat when he conversed with the woman of Samaria (John iv, 6); and it was this, the usual stone cover, which the woman placed on the mouth of the well at Bahurim (2 Sam. xvii, 19), where the A. V. weakens the sense by omitting the article (בִּקְרֵי; Sept. τὸ ἐκκάλυμμα; Vulg. *velamen*). Sometimes the wells are covered with cupolas raised on pillars (Burckhardt, App. v, p. 665).

A well was often covered with a great stone, which being removed, the person descended some steps to the surface of the water, and on his return poured into a

trough that which he had brought up (Gen. xxiv, 11-15; xxix, 3-10; Exod. ii, 16; Judg. v, 11). There is, in fact, no intimation of any other way of drawing water from wells in Scripture. But as this could only be applicable in cases where the well was not deep, we must assume that they had the use of those contrivances which are still employed in the East, and some of which are known from the Egyptian monuments to have been very ancient. This conclusion is the more probable as the wells in Palestine are mostly deep (Prov. xx, 5; John iv, 11). Jacob's Well near Shechem is said to be 120 feet deep, with only fifteen feet of water in it (Maundrell, *Journey*, March 24); and the labor of drawing from so deep a well probably originated the first reluctance of the woman of Samaria to draw water for Jesus: "Sir, thou hast nothing to draw with, and the well is deep." See JACOB'S WELL. From this deeper kind of well the usual methods for raising water are the following: 1. The rope and bucket, or water-skin (Gen. xxiv, 14-20; John iv, 11). When the well is deep, the rope is let down over the curb by the man or woman, who pulls it out to the distance of its full length, or by an ass or ox employed in the same way for the same purpose. Sometimes a pulley or wheel is fixed over the well to assist the work (Robinson, i, 204; ii, 248; Niebuhr, *Descr. de l'Arabie*, p. 137, pl. 15; *Col. Ch. Chron.* 1859, p. 350; Chardin, *Voy. iv*, 98; Wellsted, *Trav.* i, 280). 2. The *sakiyeh*, or Persian wheel. This consists of a vertical wheel furnished with a set of buckets or earthen jars attached to a cord passing over the wheel, which descend empty and return full as the wheel revolves. On the axis of the wheel revolves a second wheel parallel to it, with cogs which turn a third wheel set horizontally at a sufficient height from the ground to allow the animal used in turning it to pass under. One or two cows or bulls are yoked to a pole which passes through the axis of this wheel, and as they travel round it turn the whole machine (Numb. xxiv, 7; see Lane, *Mod. Egypt.* ii, 163; Niebuhr, *Voy.* i, 120; *Col. Ch. Chron.* 1859, p. 352; Shaw, p. 291, 408). 3. A modification of the last method, by which a man, sitting opposite to a wheel furnished with buckets, turns it by drawing with his hands one set of spokes prolonged beyond its circumference, and pushing another set from him with his feet (Niebuhr, *Voy.* i, 120, pl. 15; Robinson, ii, 22; iii, 89). 4. A method very common, both in ancient and modern Egypt, is the *shaduf*, a simple contrivance consisting of a lever moving on a pivot, which is loaded at one end with a lump of clay or some other weight, and has at the other a bowl or bucket. This is let down into the water, and, when raised, emptied into a receptacle above (Niebuhr, *Voy.* i, 120; Lane, *Mod. Egypt.* ii, 163; Wilkinson, *Anc. Egypt.* i, 35, 72; ii, 4). See IRRIGATION.

Wells are usually furnished with troughs of wood or

Ancient Egyptian Machine for Raising Water, identical with the *shaduf* of the present day.

stone (כֶּסֶף; Sept. *ποτιστήριον*; Vulg. *canalis*), into which the water is emptied for the use of persons or animals coming to the wells. In modern times an old stone sarcophagus is often used for this purpose. The bucket is very commonly of skin (Burckhardt, *Syria*, p. 63; Robinson, i, 204; ii, 21, 315; iii, 35, 89, 109, 134; Lord Lindsay, *Trav.* p. 235, 237; Wilkinson, *Anc. Egypt.* loc. cit.; comp. Gen. xxiv, 20; Exod. ii, 16).

Unless machinery is used, which is commonly worked by men, women are usually the water-carriers. They carry home their water-jars on their heads (Lindsay, p. 236). See DRAWER OF WATER. Great contentions often occur at the wells, and they are often, among Bedawin, favorite places for attack by enemies (Exod. ii, 16, 17; Judg. v, 11; 2 Sam. xxiii, 15, 16). See Burckhardt, *Syria*, p. 63; *Notes on the Bed.* i, 228; *Col. Ch. Chron.* 1859, p. 473; Lane, *Mod. Egypt.* i, 252; Robinson, iii, 153; Hackett, *Illustr. of Script.* p. 88-93. See WATER.

**Wellbeloved**, CHARLES, D.D., an English Unitarian minister, was born at York about 1770. He became a clergyman at his native place; was noted for his philological and archæological attainments; and died at York in 1858. He was the author of, *Eboracum; or, York under the Romans* (1842);—*The Holy Scriptures of the Old Covenant* (1859-62), in a revised translation, in which he was assisted by Rev. George Vance Smith and Rev. John Scott Porter; and other works. A *Memoir*, by Rev. John Kenrick, appeared in 1860.

**Weller, George**, D.D., a Protestant Episcopal clergyman, was born in Boston, Mass., Nov. 15, 1790. He was educated in the public schools of Boston; learned the trade of a bookbinder; opened a small bookstore in Newark, N. J.; and afterwards removed it to Danbury, Conn. About the year 1813 he entered the family of the Rev. Bethel Judd, D.D., of Norwalk, to study theology. He began to officiate as lay reader at Bedford, N. Y., in June, 1814; was admitted to deacon's orders by bishop Hobart June 16, 1816; missionary in the counties of Putnam and Westchester in 1816-17; ordained priest April 2, 1817; instituted rector of Great Coptank parish at Cambridge, Md., Nov. 15, 1817; rector of St. Stephen's Church, Cecil County, Md., in November, 1822; became editor of *The Church Register* Jan. 7, 1826, in which office he continued three years; was secretary and agent of the Domestic and Foreign Missionary Society in 1828; removed to Nashville, Tenn., about 1829, where he built a new church, the first Episcopal Church in Tennessee; retired for a time on account of feeble health about 1835; became rector of Calvary Church, Memphis, in 1838; rector of Christ Church, Vicksburg, Miss., in 1839. This was his last field of labor. During the prevalence of the yellow fever in Vicksburg, he was overburdened with the claims of the sick and friends of the dead, and fell a victim of the epidemic, Nov. 9, 1841. He was the author of *Vindication of the Church* (1824);—and editor of the *Poems of Bishop Heber* (about 1826);—and the *Weller Tracts*. See Sprague, *Annals of the Amer. Pulpit*, v, 601.

**Welles, Noah**, D.D., a Congregational minister, was born at Colchester, Conn., Jan. 23, 1718. He graduated at Yale College in 1741; engaged in teaching school at Hartford for some time; and became tutor of Yale College in 1745. He was licensed to preach soon after, and ordained pastor of the Church at Stamford, Conn., Dec. 31, 1746, where he remained in the quiet and faithful discharge of his duties until his death, Dec. 31, 1776. He was chosen fellow of Yale College in 1774, and also delivered the *concio ad clerum* in the chapel of that institution, Sept. 13, 1770, before one hundred and twenty ministers. He took an active part in the dispute concerning the validity of non-episcopal ordination in 1763, publishing three pamphlets on the subject. He also published other single *Sermons* and *Addresses*. See Sprague, *Annals of the Amer. Pulpit*, i, 461-

**Wells, Edward, D.D.**, a learned English divine, was born about 1665. He was admitted to Westminster School in 1680, and in 1686 to Christ Church College, Oxford, where he proceeded as A.M. in 1693, and as D.D. in 1704; became a tutor in his college; took orders in the Church of England; and became rector of Bletchley, in Buckinghamshire, and of Cottesbach, in Leicestershire, in 1717, where he died, in August, 1727. He was the author of, *A Treatise of Ancient and Present Geography* (1701):—*Historical Geography of the New Testament* (1708):—*Historical Geography of the Old Testament* (1711-12):—*A Help to the More Easy and Clear Understanding of the Holy Scriptures* (1709-28, 8 vols. 4to), being a revised translation of the Bible, with a paraphrase and annotations:—*The Book of Daniel Explained*, etc. (1716):—and other works, especially on mathematics. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Welsh, David, D.D.**, an eminent Scotch clergyman, was born at Braefoot, Dumfriesshire, in 1793. He was educated at the University of Edinburgh; was pastor of the parish of Crossmichael, Presbytery of Kirkcudbright, for several years, beginning in 1821; became minister of St. David's in Glasgow, in 1826; was appointed professor of Church history in the University of Edinburgh in 1831; travelled on the Continent in 1834, studying the German language and literature; was appointed inspector of Bibles in Scotland; was moderator of the General Assembly in 1842; left the Established Church in 1843; became professor of Church history in the Free Church College, and was first editor of *The North British Review*. He died April 24, 1845. He was the author of, *An Account of the Life and Writings of Thomas Brown, M.D.*, etc. (1825):—*Sermons on Practical Subjects* (1834):—*Elements of Church History* (1844, vol. i):—and *Sermons, with a Memoir* by A. Dunlop, Advocate (1846).

**Wesel, JOHANN VON**, whose name really was *Johann Ruchrath*, of Oberwesel, was one of the most prominent forerunners of the Reformation in Germany. He was born early in the 15th century. The first authentic record we have of his life brings him into view as a master in philosophy at Erfurt, about 1445. Soon afterwards he was professor and doctor of theology. In philosophy he was a nominalist, and sufficiently able to project his influence over many years, so that Luther is yet constrained to acknowledge his power (see *De Conclis*, in *Opp.* ed. Walch, xvi, 2743). The age in which he lived was too greatly under the rule of traditional authority to be strongly impressed by his Biblical tendency in theology, as may be seen in the fact that a scholarly essay from his pen aimed against indulgences excited so little attention that he was chosen, subsequent to its appearance, to be vice-rector of the university, and preacher at Mayence, about 1460: it does not seem certain that he accepted the latter position. A statement is extant to the effect that Wesel was driven from Mayence in 1461 or 1462 by pestilence, and afterwards became preacher at Worms, giving the next seventeen years to the preaching of the Gospel. His utterances were exceedingly frank and bold, and were supported by the labors of his pen until the rulers of the Church came to regard him as a mischievous personage, upon whom they might justly bring vexatious tribulations, and whom, eventually, they must silence. An article directed against the hierarchy as the central abuse in the administration of the Church finally induced the archbishop of Mayence, Diether of Isenburg, to take definite measures for compelling the bold agitator to end his work. It is not known why the archbishop, whose jurisdiction did not extend over Wesel, took action rather than the bishop of Worms, Reinhard of Sickingen, who was Wesel's immediate superior; but Argentré, who reported the trial of Wesel, asserts that the persecution of Wesel had for its inspiration the hatred which the Thomists who stood op-

posed to him in philosophy bore against him. Wesel was summoned before a tribunal composed of theologians from the universities of Cologne and Heidelberg, who were, with a single exception, realists. The Dominicans M. Gerhard Elten, M. Jacob Sprenger, and a third unknown person were inquisitors at the trial. The preliminary proceedings began on the Friday after Candlemas, probably February 4, 1479, at Mayence. Elten, a fanatic, presided. The accused was required to explain certain suspicious facts in his personal history, such as his intercourse with the Bohemians, and especially with a certain Nicholas of Bohemia. He was examined with regard to any possible adherents he might have gained, and respecting a communion service he had held. Bayle (*Dictionnaire*, s. v. "Wesalia") and Erhardt (*Gesch. des Wiederaufblühens*, etc., i, 291) state that he was also questioned with regard to his relations with the Jews; but as Argentré does not mention this point, a confounding of Wesel with Wessel would seem to have been made by those authorities. A second part of his trial was concerned with doctrinal errors alleged against Wesel, e. g. that he denied the procession of the Holy Spirit from the Son, which he admitted, but defended his view by an appeal to the Scriptures; that he rejected the authority of tradition, with respect to which he was obliged to acknowledge his opinion that the holy fathers and doctors were not guided in their interpretations of Scripture by the same infallible Spirit by which it was originally revealed, and that the immediate direction of the Holy Spirit could not be certainly assumed of every council which might be convened by the proper authority. Other errors charged against him had reference to indulgences, the sacraments, sin in general, and original sin in particular. Under the dogma of the Church, he stated his belief in one holy Church; but was charged with omitting the attribute of universality. He conceded the rule of the Holy Ghost over the Church, and also her freedom from error. He also conceded the necessity of a papacy to the Church of Rome, though not without equivocation. It is evident that he did not hold the views respecting the authority of the Church which were current in his time. He denied any distinction between bishop and presbyter, and endeavored to overturn the right of civil jurisdiction and legislation as claimed by the Church. He did not consider celibacy, monasticism, and fasting as of binding obligation, and was able to reply in a satisfactory manner to the charges against him upon these points, only because they were conceived and expressed in a form in which he had actually never held the views to which they referred. It appears that Wesel endeavored to give way to his persecutors as far as he could without doing too great violence to his conscience, and that he sought to take advantage of every ambiguity in the charges against him, or which he could weave into his own explanations. He even went so far as to repeatedly ask for mercy. He needed all the encouragement he could get. He was old and broken down, threatened with death by fire, and obliged to undergo usage which he declared would have turned Christ himself into a heretic. He finally consented to retract, with the proviso that the retraction should be charged upon the conscience of his judges. The formula adopted was of a general nature, and set forth that erroneous matter might be found in his writings, which he now recalled; that he submitted to the authority of the Church and the teachings of her doctors; that he was ready to perform whatever penance might be imposed; and that he asked for forgiveness. This retraction took place before the assembled tribunal, and was followed by a similar act in the cathedral. His writings were burned, and he was himself condemned to life-long imprisonment in the Augustinian convent, where he died in 1481.

Wesel stated the doctrine of the sufficiency of Scripture, the formal principle of Protestantism, with greater

clearness than was possible to the Reformers in the beginning of their work. He joined its perspicuity with its sufficiency as a necessary consequence. He also laid down the foundations of the doctrine of the witness of the Spirit, though he did not develop it. With reference to the material principles of the Reformation Wesel was less clear. He assailed indulgences, as not authorized by Scripture, and denied that God could confer jurisdiction in divine things upon the Church. His argument, however, was altogether that of a clear-headed, well-meaning theologian, who saw in the doctrine of indulgences a scientific error involving practical consequences, but it was not at all the retort of a conscience whose most sacred convictions are outraged. Indulgences were in his view an ecclesiastical abuse, but not a peril which threatened the soul. His idea of sin is that it is a debt and a deficiency. He does not appreciate its power over the inner man. Grace is exalted by him, but rather as demonstrating the causality of God than as benefiting the soul of man; and he accordingly gives a foremost place to the doctrine of election. He regarded the Church as being above all a communion, and held that the true Church is the holy Church, within the universal Church. He denied emphatically that the apostles had received power from Christ to enact canons and laws, and refused to recognize the pope as the vicar of Christ in any sense which would involve the concession of legislative functions. He was even disposed to question the authority of secular princes to enact laws; but as he was compelled to see the necessity of order in the world, he found himself involved in uncertainty, which led him to concede much on his trial which he had previously denied. Ministers were conceived of by him as ambassadors for Christ, and both pope and priests as deriving their authorization from him. Every Christian possessed the right in his view of refusing obedience to an ecclesiastical commandment which antagonizes the Word of God, and the humblest Christian has authority to rebuke an erring pope. He required obedience to the clergy, however, in things indifferent.

Wesel was probably a fertile writer. Jakob Wimpfeling says, in Flacius, that Wesel had adorned the Erfurt school by his teaching and writings; and Flacius adds that the writings were still preserved at Erfurt. Only the two tracts *Adversus Indulgentias* and *De Potestate Ecclesiastica* are now extant. See Argentré, *Collectio Judiciorum*, I, ii, 291 sq.; Walch, *Monum. Medii Ævi*, I, i, 114 sq.; Ulmann, *Johann Wesel, der Vorläufer Luther's*; id. *Reformatoren vor der Reformation*.—Herzog, *Real-Encyclop.* s. v.

**Wesi-Hiisi**, in Finnish mythology, was a servant of the wicked giant Hiisi (the personification of the wicked principle), who rules over the waters, as others ruled over the mountains, the air, etc. See Lenormant, *Chaldean Magic*, p. 257.

**Wesley** (originally **Wellesley**), a name memorable in English ecclesiastical history, as will be seen from the biographies following. The pedigree on the following page supplies the link connecting all the chief branches of the Wesley family, and extends backward for more than five hundred years. It indicates the branches from which descended the late Arthur, Duke of Wellington, and the two sisters Ann and Jane Porter. It also includes the names of nearly twenty members of the family living at the present time, some of which are now affixed for the first time to add as much completeness as possible to the record. It was prepared by Mr. George J. Stevenson, A.M., of London.

**Wesley, Bartholomew**, an Episcopal clergyman, great-grandfather of John and Charles Wesley, was born in England about 1595. He received a university education (probably at Oxford), and took orders in the Church of England. He was rector of Catherston and Charmouth, two villages in Dorset, in 1650, and

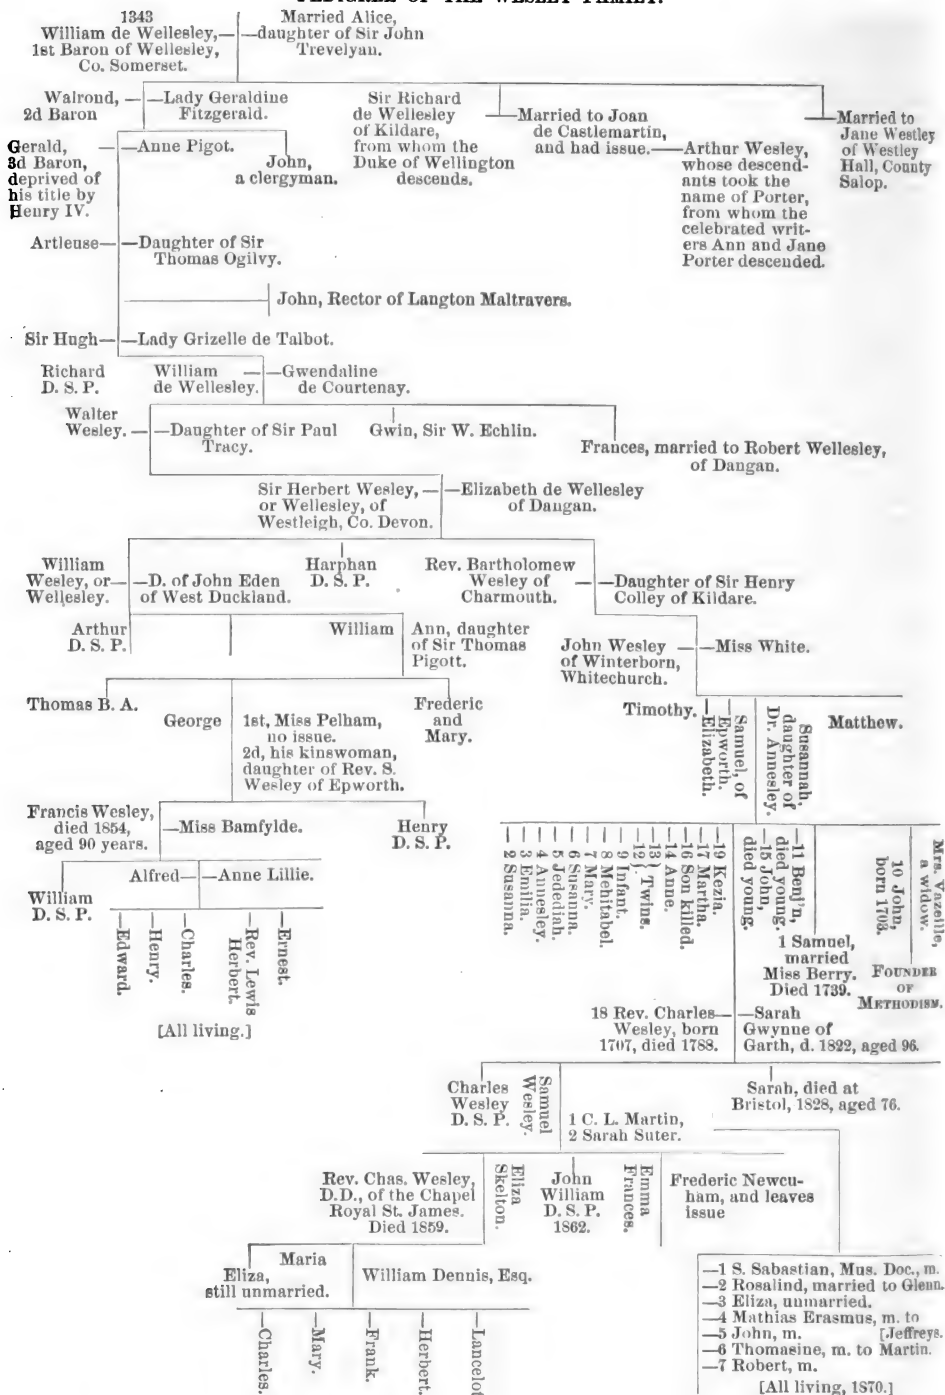

was ejected from both by the Act of Uniformity in 1662. After his ejection he followed the profession of a physician, for which he had prepared while in the university, and preached among the Nonconformists as opportunity served. He died about 1680.

**Wesley, Charles** (1), A.M., the hymnist of Methodism, and one of "the sweet singers in Israel," was celebrated also as a preacher and a coadjutor of his brother John in the great evangelical and ecclesiastical movement of their lives and times.

**I. Life.**—Charles Wesley was born at the parsonage, Epworth, Lincolnshire, Dec. 18, 1707, being the eighteenth child and the youngest son of Rev. Samuel Wesley. (All the biographers except one give the date as Dec. 18, 1708; the latest, Mr. Geo. J. Stevenson, says that the information now at hand places the date a year earlier. See *Memorials of the Wesley Family* [Lond. 1876], p. 385.) When five years of age he entered his mother's school, where began that systematic course of mental discipline which laid the groundwork of his after-success in academic pursuits. At eight he was enrolled at Westminster School, where his brother Samuel was usher—an elegant scholar, and who imbued his little charge with his own High-Church notions. Here he became a friend of a Scotch lad, James Murray, afterwards the celebrated lord Mansfield. Young Charles made such progress in his studies that in 1721 he was admitted one of the king's scholars, his expenses being thus henceforth borne by the Foundation. The biographers think it doubtful whether religion would ever have had the services of the great hymnist, or the State those of the administrator of India and the hero of Waterloo, if the student at Westminster had accepted an heirship to the estates of Garrett Wesley, Esq., member of Parliament for the County of Meath, at this time (about 1726) pressed upon him by his landed relative. In 1726 he was elected to Christ Church College, Oxford, an institution which his brother John had left a little before. Here he and a few friends became so diligent in study, serious in manner, and observed with such strictness the method of study and practice laid down in the statutes of the university, that they won for themselves an epithet first applied to a college of physicians in Rome in the time of Nero, and soon the little band was known by a word that has now in a large measure lost its opprobrious note—*Methodist*. At the age of twenty-one Charles took his A.B. degree, and became tutor in the college. In November, 1729, the "Methodists" were joined by John Wesley, and through insult and ridicule pursued their devotional and self-denying labors. The brothers remained at the university until the death of their father, in April, 1735. Having been persuaded to accompany John on the mission to Georgia, primarily as secretary to the managing committee of the colony and private secretary to general Oglethorpe, its founder, Charles, at the instance of Dr. Burton, was ordained deacon in Oxford by Dr. John Potter, bishop of that city, and on the following Sunday he was ordained priest in the metropolis by Dr. Gibson, bishop of London (autumn of 1735). The ship *Symmonds* sailed up the Savannah Feb. 5, 1736. It is needless to treat the reader with an account of the mishaps, privations, trials, and persecutions which befell our subject in this country. He can read it in Charles Wesley's *Journal and Life*. Suffice it to say that diligently and conscientiously he endured hardship as a good soldier while stationed at Frederica. On the 11th of August, 1736, Charles Wesley, sick and disappointed, embarked for England. The vessel was compelled to put into Boston, where, under kind and hospitable treatment, he quite fully recovered, so as to be able to preach frequently in King's Chapel. On Dec. 3, 1736, he arrived at Deal, England. By the desire of the University of Oxford, Charles Wesley was requested to present their address to the king, which he did at Hampton Court, Aug. 29, 1737. He was graciously received, and dined with the royal household.

In February, 1738, the brothers Wesley were intro-

## PEDIGREE OF THE WESLEY FAMILY.

duced to Peter Böhler, the Moravian. On the 20th, Charles began to instruct his friend in English, and Peter in return taught him the plan of salvation by faith. It was on Whitsunday, May 21, 1738, his heart having been prepared by sickness, that this devout and laborious priest of the Church of England obtained the sense of pardon and adoption. It was just a week before his brother received the same blessing. Henceforth, what had been a labor of conscience and duty was to be one

also of joy and love. He at once commenced addressing small audiences in the houses of friends, having sometimes as a devout hearer Robert Ainsworth, author of the *Latin Dictionary*. He was soon appointed curate of St. Mary's, Islington, London, which was the only preferment Charles Wesley ever had in the Church of England, although to the end of his long life one of his firmest adherents. His faithful ministry speedily procured his dismissal. "He was literally," says Dr. Ad-

ams, "expelled by violence, and that violence received the sanction of the diocesan" (*The Poet Preacher*, p. 67). In June, 1739, he was summoned to appear before the archbishop of Canterbury to answer the charge of preaching in churches to which he had no canonical appointment. The learned prelate angrily dismissed the youthful preacher, and forbade the clergy to permit the Wesleys to preach in their churches. On the Sunday after Dr. Potter's interdiction, Charles Wesley preached to ten thousand people in Moorfields from the words "Come unto me, all ye that travail," etc. Henceforth this ardent Churchman, contrary to all the traditions of his training and life, baptized with the spirit of consecration, entered upon that work which, under Wesley and Whitefield, and Cownley and Hopper, was to stir through and through the rotten society and dead churches of England from Land's End to the Tweed. From this time until 1756, Charles Wesley itinerated throughout England and Wales, in delicate health, and amid bodily infirmities, but with a zeal which hardships never abated, and with a courage which opposition never quelled. Charles Wesley was no muscular, iron-hearted Cromwell; his spirit was gentle, his sensibilities tender; yet, near to martyrdom, he over and over again faced mobs and held his ground "until his clothes were torn to tatters and the blood ran down his face in streams" (Daniels, *Ill. Hist. of Meth.* p. 326). For the thrilling but sickening details of these adventures, see his biographers and the history of the early Methodist movement.

After 1756, it appears, according to Jackson, that Charles Wesley ceased the active itinerant life. His labors now became chiefly confined to London and Bristol, with visits to intermediate and surrounding places. The reasons for this change were, his marriage, the cares and attractions of domestic life, and the fact that, differing so widely from his brother in points of Church order, he could not regulate the affairs of the societies satisfactorily to all concerned. (The preachers and members almost invariably agreed with John.) He therefore thought it best to leave the oversight with John, whose unrivalled administrative ability he could not fail to see, in fact acknowledged. (See Jackson, *Life of C. Wesley*, N. Y. ed., p. 548). "The effect of his retirement from the itinerancy was the reverse of favorable, so far as he was personally concerned. His mind was naturally inclined to view things in a gloomy aspect, but amid the excitement, the change, the toil of an itinerant ministry, he had no time to be melancholy. . . . The manifest success which attended his preaching filled him with unutterable gratitude; and while all his powers were engaged in this work, he enjoyed a heaven upon earth. When he ceased to travel, he was at leisure to cherish his painful forebodings; croakers and busybodies tormented him with letters complaining of the ambition of the preachers, and of the alienation of the people from the Church; and the pernicious leaven of mysticism which he had imbibed at Oxford, and from which his mind had never been thoroughly purged, regained its ascendancy over him so as often to interfere with his spiritual enjoyments: yet his piety and integrity of purpose were unimpeachable. Often was he in agonies of fear lest the Methodists should leave the Church when he and his brother were dead, while John was as happy as an angel, flying through the three kingdoms, sounding the trumpet of the world's jubilee and joyfully witnessing every successive year the steady advancement of the work of God" (Jackson, *ut sup.*, p. 549). He still remained with the Methodists, and still threw off his matchless hymns. In 1771-72 he finally removed to London. In 1777 he frequently visited the unfortunate Dr. Dodd, condemned to die for forgery, and from his pen came *A Prayer for Dr. Dodd under Condemnation*. In 1780, in age and feebleness, he attended at Bristol his last Conference. Gradually he weakened until he quietly passed away, at No. 1 Chesterfield Street, London, March 29, 1788. His body rests in the old Marylebone church-yard.

II. A few *special topics* remain to be treated before we can get a satisfactory view of the career, influence, and genius of Charles Wesley.

1. *His Family*.—On April 8, 1749, Charles Wesley was married to Sarah Gwynne, a Welsh lady of piety, refinement, and fortune. Of this happy marriage were born four sons and four daughters. Three only survived their father—Charles, Sarah, and Samuel. The two sons were musical prodigies. They gave concerts before the *élite* of London with great applause, and were shown marked favor by the royal family. The last days of their father's life were embittered by the perversion of his third son, Samuel, to the Church of Rome in 1786. This called forth from the old man one of the most touching poems in the language, commencing "Farewell, my all of earthly hope." If the father had lived long enough, he would have seen his son leave the Roman Catholic Church in contempt and become her public antagonist. Mrs. Wesley survived her husband thirty-five years, and died Dec. 28, 1822, aged ninety-six years. Numerous descendants are living (see Stevenson, *Pedigree of the Wesley Family from A.D. 938 to 1875, in Memorials of the Family*).

2. *His Character*.—Although abrupt and singular in his manners, and with the utmost simplicity and frankness of mind, he had much warmth of affection and tenderness of sympathy; so that his friendship was felt to be of inestimable value. His views were ascetic. In him appeared "the true Reformer's fire, the fearless zeal, the utter self-renunciation, the contempt for what other men prize, the unworldly aspirations, the miracle-working faith" (Bird, *ut infra*, p. 146). "The most remarkable feature of the poet's mind," continues the same writer, "was its subjectiveness. His vision was perpetually introverted; he had no eyes for external objects, no interest in the things that other men care most for; he was all soul; spiritual ideas and facts were the world to him" (p. 151). He was powerful in his antipathies and tenacious of his peculiarities of opinion.

3. *His Preaching and Scholarship*.—His discourses were effusions of the heart rather than the offspring of the intellect or of the imagination. Of the Bible he was a diligent and enraptured student, and he imbued his sermons with its doctrines and language. To turn men from sin to Christ was the object of his preaching, and in those less artificial, slower, and perhaps more ignorant days he did not hesitate to preach long—sometimes two hours—if he thought good could be accomplished thereby. With the Latin, Greek, Hebrew, and French languages he was well acquainted, and he had studied Arabic. Horace and Virgil he loved, and often repeated from memory large portions of the *Æneid*. Jackson thinks that had he devoted himself to sacred literature, he would have taken high rank among the poets of Great Britain.

4. *His Differences of Opinion with his Brother, and his Relation to Methodism*.—Charles Wesley was an ardent Churchman (see his Postscript in John Wesley's *Reasons against a Separation from the Church of England*). He loved the Church as his own life; yet he thought he was not for that reason less a Methodist. Against the administration of the sacraments by the preachers he resolutely contended (see his letters quoted in his biographies). He also differed with his brother concerning the qualifications necessary for an itinerant preacher, and sometimes silenced those whom John had admitted. From the first he opposed his brother's ordaining the preachers; he made no exceptions for Scotland and America, although Dr. Rigg says he admitted his brother's right to ordain his preachers to administer. (Dr. Rigg gives no authority for that statement; there are facts which look, to say the least, the other way.) "He lived in hope, sometimes sanguine, more often desperate and scarce surviving, that a bishop would be raised up to ordain the best of the preachers in the succession, as they became ripe for ordination, to cures in the Church of England. He would thus have made Meth-

odism a nursery for evangelical pastors and preachers in the Church of England, and an outwork of the Establishment. He was, however, himself practically even less of a Churchman than his brother, and his hopes of a bishop were continually disappointed. "The bishops might, if they pleased," he wrote to Latrobe, the Moravian minister, in 1785, "save the largest and soundest part of them back into the Church; perhaps to leaven the whole lump, as archbishop Potter said to me. But I fear, however, betwixt you and me, their lordships care for none of these things. Still, I should hope, if God raised up but one primitive bishop, and commanded the porter to open the door" (John H. Rigg, *London Quar. Rev.* [Wesleyan], No. LX, July, 1868, p. 302). Yet this same Churchman approved of lay preaching, separate meetings, and almost everything else that belonged to the earliest Methodism. He himself was the first to administer the Lord's supper to the separate societies. In fact, as Jackson well says, "there was a singular discrepancy between his theory of churchmanship and his conduct. For thirty years he made more noise on the subject of the continued union of the Methodists with the Church than any man of the age; and all this time he was beyond comparison the greatest practical separatist in the whole connection. John Wesley spent most of his time travelling through Great Britain and Ireland, often preaching twice every day, and two or three times on the Sabbath. Rarely, however, did he preach in Church hours except when he officiated for a brother clergyman. . . . He attended the Church where he happened to be, and pressed the people to accompany him thither. Many of the itinerant preachers pursued the same course. . . . This was the recognised plan of Methodist practice. . . . But this was not the state of things in London under the administration of Charles Wesley. He preached twice during Church hours every Sabbath, and indulged the society with a weekly sacrament at their own places of worship. He conducted divine worship, indeed, according to the order of the Church of England, except that he used extemporary prayer and sang his own beautiful hymns; but he and the society had otherwise no more connection with the Established Church than any Dissenting minister and congregation had. He was under no episcopal control, the chapels were licensed by no bishop. . . . The country societies wished in this respect to be on an equality with their metropolitan brethren, and they were never satisfied until this was conceded to them" (*Life of Charles Wesley*, Lond. ed., ii, 404, 405). "Though Charles Wesley hardly ever went to Church, and was no more under the jurisdiction of a bishop than I am, yet he was so attached to the name of a Churchman that I heard him say he should be afraid to meet his father's spirit in Paradise if he left the Church" (Bradburn, *Are the Methodists Dissenters?* [Bristol, 1792]).

Charles lacked the breadth of view, the practical cast of mind, the wisdom, of his brother; and in measures of Church administration his influence over the latter was slight. Perhaps the remark of Dr. Stevens is justified: "Had the leadership of Methodism early devolved upon him by the death of his brother, as was at one time likely, it would probably have been either extinct to-day, or hardly distinguishable as a special religious agency in the world" (*Hist. of Methodism*, ii, 275). It was as a hymnist his influence over Methodism was so great and so blessed.

5. *His Hymns.*—Charles Wesley's fame rests, and will forever rest, upon his hymns. Upon these it is secure for all time. Critics, however, have found certain faults in these hymns. These alleged defects we will first give. They call attention to "the prosaic, literal, doctrinal character of many of the lines; their occasional harshness, and the preponderance of the subjective element of personal experience" (*Amer. Presb. Rev.* April, 1867, p. 343). "The paucity of his topics produces frequent repetition. He has little variety of manner, and less variety of matter. . . . Many of his pieces wear the ex-

clusive aspect of the sectarian; he casts his mite into the treasury of a party; he writes as a poet of Methodism, not as the servant of the universal Church" (Milner, *Life of Watts*). Certain extravagant expressions and violations of correct judgment and taste are pointed out: as, e.g., the remarkable hymn, "Ah, lovely appearance in death," the lines of which, the objector allows, "are invested with all his own grace and tenderness" (Bird, *Biblioth. Sac.* Jan. 1664, p. 148). [Dr. Whedon stoutly defends this hymn, taking issue with Dr. Floy and critics generally. He says it is rarely excelled for originality, solemnity, and pathos; compares it with Byron's celebrated passage in the *Giaour*, and awards the palm to the poem of Wesley, "describing an inexpressible moral and divine beauty connected with repose from the toils, sorrows, and sins of life, and the hush of the spirit to its eternal and ineffable repose" (*Meth. Quar. Rev.* April, 1867, p. 307).] Finally, George Macdonald—an undoubted authority—denies them "much literary merit" (*England's Antiphon*, 1869. See also adversely, J. D. Burns, in the *Encyclop. Brit.*, 8th ed., xii, 189).

On the other side, we give the judgment of a Lutheran critic, Rev. Frederic M. Bird, a most thorough and ardent student of Wesleyan hymnology. We quote from an able, elaborate, and interesting review in the *Bibliotheca Sacra*, Jan. and April, 1864: "The more extensively and closely his writings are examined, the more will be found in them worthy to be admired and used" (p. 129). "Dr. Watts has been commonly considered the most powerful of hymnists. The published Wesleyan hymns are five times as numerous as his; and of this immense mass the literary standard is far higher than that of the lesser bulk of the more celebrated writer. Set aside one hundred of Watts's and five hundred of Wesley's best hymns, there will be no comparison between the remainder in style and poetic merit. Dr. Watts was a poet at certain times, and under special inspiration; Charles Wesley was a poet by nature and habit, and almost always wrote as such. Of course his effusions are not equal among themselves; but he established and observed, through all his multiplicity of verses, a standard which no other hymn-writer, up to his time, was able to approach, and which none has since surpassed" (ibid.). "No other sacred poet has attempted such a 'variety of matter'; and his versatile muse handles all these multifarious topics with unequalled, almost with unvarying, ease and grace. . . . There are no hymns in the world of such 'spontaneous devotion'; none so loftily spiritual; none so unmistakably genuine and intensely earnest, as the best-known and most largely used of Wesley's. It is the highest praise of the few noblest hymns of Watts and Cowper that they reach an elevation on which the Methodist poet generally sat, and express a mental state which was habitual with him" (p. 140). "No hymn-writer is more intellectual; none puts more doctrine, thought, solid mental pabulum into his poems. And certainly none is more awakening and edifying; few others, in fact, approach him in native moral earnestness, force, fire; and none possesses a higher, purer, more consistent, uniform, and positive spirituality" (p. 311). "As a polemic poet Charles Wesley has never been equalled. . . . The most powerful, combative, and controversial poems we have ever seen appeared in *Hymns on God's Everlasting Love*, published in 1741, and greatly enlarged in 1756" (p. 288-289). Mr. Bird gives a fine résumé of these rhyming polemics. "The *Funeral Hymns* of Charles Wesley are, perhaps, the noblest specimens of his genius" (see further, p. 298 sq.). "Doddridge and Steele are diluted reproductions of Dr. Watts. Montgomery, a professed and life-long poet, is inferior to Wesley in all the qualities mentioned above, and in no respect above him in propriety, harmony, and grace of style. Heber, the most elegant and mellifluous of sacred poets, is not more polished and fluent than his Methodist predecessor; nor has he anything of his so-

lidity, strength, and fire. Cowper is the greatest name in the hymn-books; but Cowper's best poems, which are very few, are but equal, not superior, to Wesley's best, which are very many. Toplady approaches most nearly the Methodist poet, but Toplady borrowed his inspiration from Wesley and reproduced his style; and it is the Calvinist's highest praise that his finest pieces are undistinguishable from those of his Arminian neighbor. No other names in British sacred lyric poetry can be mentioned with that of Charles Wesley. And when it is remembered that all these counted their poems by dozens or hundreds, while he by thousands; and that his thousands were in power, in elegance, in devotional and literary value, above their few, we call him yet more confidently great among poets and prince of English hymnists" (p. 318). This high praise comes from one who—not a Methodist—has by long and patient study earned for himself a place among the very few authorities in the hymnology of Wesley.

It is needless to mention single hymns of surpassing excellence. Several have been already referred to in the art. HYMNOLGY. Suffice it here to call attention to three only:

(a.) The poem on "Wrestling Jacob" has enraptured all readers. Who has not felt the power of that masterpiece? "With consummate art he carries on the action of a lyric drama; every turn in the conflict with the Mysterious Being, against whom he wrestles all night, being marked with precision by the varying language of the speaker, accompanied by intense increasing interest, till the rapturous moment of the discovery, when he prevails and exclaims, 'I know thee, Saviour, who thou art'" (Montgomery, *Christian Psalmist* [1828]).

(b.) "Jesus, lover of my soul" is the essence of a thousand hymns and prayers. Tributes innumerable might be laid down here. But what are these? The heart of the world is brought near to God.

(c.) "Stand the omnipotent decree," "the finest lyric in the English language," says Southey.

III. *Literature*.—We classify this for convenience' sake, under separate heads.

1. Charles Wesley's own poetical works (published during his life) may be enumerated, as follows, in tabular form (we include a few prose writings):

Date of Publ.	Title.	No. of Hymns.
1739,	Hymns and Sacred Poems.....	189
1740,	Hymns and Sacred Poems.....	96
1741,	Hymns of God's Everlasting Love.....	38
1742,	Hymns and Sacred Poems.....	155
1743,	Collection of Psalms and Hymns (enlarged).....	188
1744,	Hymns for Times of Trouble and Persecution.....	33
1744,	Hymns for the Nativity of our Lord.....	18
1744,	Hymns for Watch-night.....	11
1744,	Funeral Hymns.....	16
1745,	Hymns for Times of Trouble for the Year 1745.....	15
1745,	A Short View of the Differences between the Moravian Brethren.....	
1745,	Hymns for the Lord's Supper.....	166
1746,	Hymns for Times of Trouble.....	6
1746,	Gloria Patri, etc.: Hymns to the Trinity.....	9
1746,	Hymns on Great Festivals (with music by Lampe).....	24
1746,	Hymns of Petition and Thanksgiving for the Promise of the Father (Whitsunday).....	32
1746,	Hymns for Ascension-day.....	7
1746,	Hymns for our Lord's Resurrection.....	16
1746,	Graces before and after Meat.....	26
1746,	Hymns for Public Thanksgiving (Oct. 9, 1746).....	7
1747,	Hymns for those that Seek and those that Have Redemption in the Blood of Jesus Christ.....	52
1748,	Hymns on his Marriage.....	17
1749,	Hymns and Sacred Poems.....	465
1750,	Hymns for New-year's-day (1751).....	7
1750,	Hymns Occasioned by the Earthquake (Mar. 8).....	19
1753,	Hymns and Spiritual Songs.....	116
1755,	An Epistle to Rev. John Wesley (churchly and brotherly [see Jackson, <i>Life of Charles Wesley</i> , N. Y. ed., p. 50]).	
1755,	An Epistle to Rev. George Whitefield (brotherly [ibid. p. 518]).

See Stevenson, <i>Memorials of the Wesley Family</i> , p. 412.		
2. <i>Collective Poems</i> .—A Collection of the Poems of John and Charles Wesley (Wesl. Conf. Office, Lond. 1868–72, 13 vols. 8vo), reprinted from the originals with the last corrections of the authors, collected and arranged by G. Osborne, D.D.; <i>Charles Wesley Seen in his Finer and Less Familiar Poems</i> (N. Y. 1867, 24mo), edited with notes by Frederic M. Bird; Wesley [Chas.], <i>A Poetical Version of the Pauline</i> (Lond. 1854, 8vo), edited, with an introduction, by Henry Fish, A.M.		

3. For authorities on Charles Wesley's life, see Whitehead, *Lives of John and Charles Wesley* (Lond. 1793; Boston, Mass., 1844, 8vo; Auburn and Rochester, N. Y., 1854); Moore, *Lives of John and Charles Wesley* (Lond. 1824); Jackson, *Life of Charles Wesley* (Lond. 1841, 2 vols. 8vo; N. Y. 1844, 8vo, slightly retrenched [an abridgment of this excellent work was subsequently publ. in Lond.]), with a review of his poetry, sketches of the rise and progress of Methodism, and notices of contemporary events and characters; Dove, *Biog. Notices of the Wesley Family*; Stevenson, *Memorials of the Wesley Family* (Lond., N. Y., and Cincinnati, 1876, 8vo [invaluable]), p. 384–413; Adams, *The Poet Preacher* (N. Y. 1859, 16mo); Wakeley, *Anecdotes of the Wesleys* (ibid. 1869, 16mo), p. 323–386; Jackson, *Journal of Charles Wesley* (Lond. 1849, 2 vols. 8vo), selections from his correspondence and poetry, with introduction and notes; Smith, Stevens, and Porter, *Histories of Methodism* (N. Y. 1875, 12mo); Daniels, *History of Methodism* (ibid. 1879, 8vo [see Indices]); Crowther, *Portraiture of Methodism*, p. 15–19; Myles, *Chron. Hist. of the Methodists*, ann. 1729, 1788; Atmore, *Meth. Memorial*, s. v.; *Minutes of the Conferences* (Lond. 1788, 8vo), p. 201; *Meth. Quar. Review*, Jan. 1842, art. viii; Tyerman, *Life of John Wesley* (see Index), vol. iii; Wesley, *Works* (see Index); Stevenson, *Hist. of City Road Chapel*, p. 148, 348; and articles in the cyclopedias.

4. On his poetry, see, in addition to the above and to the authorities cited in the text, Christophers, *The Epworth Singers and other Poets of Methodism* (Lond. and N. Y. 1874, 12mo); Creamer, *Meth. Hymnology* (N. Y. 1848, 12mo); Burgess, *Wesleyan Hymnology* (Lond. 1845); Holland, *Psalmists of Britain*; Symons, *Notes on Methodist Hymn-writers and their Hymns*; Kirk, *Charles Wesley, the Poet of Methodism* (1860, 12mo); Belcher, *Hist. Sketches of Hymns*; Stevenson, *The Methodist Hymn-book and Its Associations* (Lond. 1870, 12mo); *Lond. Quar. Review* [Wesl.], Jan. 1869, p. 500; *Bibl. Sacra*, July, 1867, p. 591; McMullen, *Sacred Poetry*; Schaff, *Christ in Song* (N. Y. 1868); Miller, *Our Hymns, Their Authors and Origin* (Lond. 1867 [see *Lond. Quar. Review*, April, 1867, p. 258]); *Ladies' Repository*, May, 1874, p. 355; *The Christian Advocate* (N. Y.), Oct. 7, 1880, p. 1. See works mentioned in articles HYMNOLGY; PSALMODY, CHRISTIAN.

5. The great musicians Lampe, Giardini, and Handel composed tunes for Charles Wesley's hymns.

**Wesley, Charles** (2), an eminent musician, son of the Rev. Charles Wesley, was born at Bristol, England, in 1757; was for many years organist at St. Marylebone, and died in 1834. He was the author of *A Set of Eight Songs* (1784):—and, among other

pieces, an anthem entitled *My Soul Hath Patiently Tarried*.
